U. S. Congress

CONGRESSIONAL RECORD:

CONTAINING

THE PROCEEDINGS AND DEBATES

OF THE

SIXTY-THIRD CONGRESS, THIRD SESSION.

VOLUME LII.

WASHINGTON:
1915.

UNITED STATES OF AMERICA
GOVERNMENT PRINTING OFFICE

VOLUME LII. PART III.

CONGRESSIONAL RECORD.

SIXTY-THIRD CONGRESS, THIRD SESSION.

HOUSE OF REPRESENTATIVES.

SUNDAY, *January 24, 1915.*

The House met at 12 o'clock noon, and was called to order by Mr. BAKER as Speaker pro tempore.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou God and Father of us all, the inspiration of all that is purest, noblest, best in us; the author and finisher of our faith. We are here to-day in memory of a departed soul who left behind him an enviable record, a mechanic, a soldier, a journalist, a Member of this House, and, though his career was cut short by the hand of death, whatever he did he put his soul into it and won the plaudits of his fellows for efficiency and faithfulness, than which no greater tribute can be paid to any man.

It is not the man who lives longest but the man who puts into a short life the best that is in him who accomplishes most. We mourn his going, but the memory of his genial and optimistic view of life, which under the most adverse and discouraging circumstances left its impress and still lives in the hearts of all with whom he came in contact, to him the well done, good and faithful servant, came in all its fullness, and though his body has passed into dust his soul lives to the glory and honor of his Maker.

Be this our comfort and solace to those to whom he was nearest and dearest. Give to us and to them the upward look, the undying hope in Him who burst the bonds of death, the earnest of all who put their trust in Him, and Thine be the glory forever. Amen.

THE JOURNAL.

The SPEAKER pro tempore. The Clerk will read the Journal of the proceedings of yesterday.

Mr. DRUKKER. Mr. Speaker, I move that the reading of the Journal be dispensed with.

The motion was agreed to.

THE LATE REPRESENTATIVE BREMNER.

The SPEAKER pro tempore. The Clerk will read the special order for to-day.

The Clerk read as follows:

On motion of Mr. DRUKKER, by unanimous consent,

Ordered, That Sunday, January 24, 1915, be set apart for services upon the life, character, and public services of Hon. ROBERT G. BREMNER, late a Representative from the State of New Jersey.

Mr. DRUKKER. Mr. Speaker, several Members of the House who had signified their intention of being here to-day have been unexpectedly called from the city. I ask unanimous consent that they may print in the RECORD remarks on the life, character, and services of the late Mr. BREMNER.

The SPEAKER pro tempore. The gentleman from New Jersey asks unanimous consent that Members who desire to do so may print in the RECORD remarks on the life, character, and services of the late Mr. BREMNER. Is there objection?

There was no objection.

Mr. DRUKKER. Mr. Speaker, I send to the Clerk's desk the following resolution.

The SPEAKER pro tempore. The Clerk will report the resolution offered by the gentleman from New Jersey.

The Clerk read as follows:

House resolution 711.

Resolved, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. ROBERT G. BREMNER, late a Member of this House from the State of New Jersey.

Resolved, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career the House, at the conclusion of these exercises, shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

The resolution was agreed to.

[Mr. HAMILL addressed the House. See Appendix.]

Mr. BAILEY. Mr. Speaker, if we are to understand the brave soul in whose memory we are assembled to-day, we must understand something at least of the philosophy which bore him up even in the unspeakable agonies which gripped his poor body as he dropped slowly down into the valley of the shadow of death.

BOB BREMNER was one of the finest souls it has ever been my good fortune to know. While my personal acquaintance with him was but brief; while we met only a very few times, and then only for fleeting moments, I had known of him for years, and had known of his work as a newspaper man, and as an evangel of that great gospel of brotherhood in spreading which almost his latest breath was given.

We were drawn together by a kinship of faith, by a kinship of aspiration, by a kinship of desire. All the great heart of BOB BREMNER was responsive to the cry of the oppressed. He hated injustice. His anger flamed out against tyranny. Every fiber of his being rebelled against a social system which condemns increasing thousands to involuntary poverty.

Against this stupid system BOB BREMNER arrayed himself in deadly and unrelenting conflict. To the very last hours of his life he was dedicated to its overthrow; and there can be no doubt that had disease not laid him low he would have become a power in this House, as he had been a power in his State and in his city, for the advancement of the fundamental truths which lay at the base of his philosophy and made living to him worth while.

The increase of poverty with the increase of wealth was to him a monstrous perversion of the natural order. He could reconcile the fact with no sane interpretation of God's design in this world. To him the want and misery which he saw all around him were a frightful indictment of our so-called Christian civilization. It was at the same time a sharp and bitter impeachment of a social order which would tolerate it.

While there was never a more charitable being on earth than BOB BREMNER, charity, in his estimation, was no solution of the problem which forces itself upon our attention at every turn. He gave with a free hand, yet knowing that in giving he was perhaps accentuating the evil which he sought to relieve. But he never was content with mere giving. That did not salve his conscience as it salves the conscience of so many. He felt that more than this was demanded, and so he gave of his life, of his labor, of the very essence of his fine soul to the solution of the problem itself by breaking down the barriers between labor and opportunity, between the worker and the good things which wait on effort.

BOB BREMNER saw with a clear vision the monstrous blasphemy against the Creator of that comfortable doctrine which ascribes the present social order to a dispensation from on high. He knew that God did not create this beautiful earth for the fortunate few. He knew it was created for all the children of men. The heaven, even the heaven is the Lord's; but the earth hath He given to the children of men—not to some of the children; not to the children of some men; not to my lord or his grace; not to the first comers and their heirs and assigns forever, but to all the children of men throughout all the generations; theirs to live and labor on; theirs to enjoy; theirs to make blossom as the rose.

I do not know what faith as to the future our friend had. I do not know that conventional faith had any hold on him at all. But I do know that he had a religion of humanity which irradiated his life and gave it a sweet and beautiful meaning. With Henry George he felt that it was not selfishness that enriches the annals of every people with heroes and saints.

It is not selfishness that on every page of the world's history bursts out in sudden splendor of noble deeds or sheds the soft radiance of benignant lives. It was not selfishness that turned Gautama's back to his royal home or bade the Maid of Orleans lift the sword from the altar; that held the Three Hundred in the Pass of Thermopylæ, or gathered into Winkelried's bosom the sheaf of spears; that chained Vincent de Paul to the bench of the galley, or brought little starving children during the Indian famine tottering to the relief stations with yet weaker starvelings in their arms. Call it religion, patriotism, sympathy, the enthusiasm for humanity or the love of God—give it what name you will; there is yet a force which overcomes and drives out selfishness; a force which is the electricity of the moral universe; a force beside which all others are weak.

And it was this force which possessed BOB BREMNER and bore him up even when the shadows were gathering around about him. With him it was possible to say in the words of the great leader he was so proud to follow:

Look around to-day. Lo, here, now, in our civilized society, the old allegories yet have a meaning, the old myths are still true. Into the Valley of the Shadow of Death yet often leads the path of duty, through the streets of Vanity Fair walk Christian and Faithful; and on Greatheart's armor ring the clanging blows. Ormuzd still fights with Ahriman—the Prince of Light with the Powers of Darkness. He who will hear, to him the clarions of the battle call.

How they call, and call, and call, till the heart swells that hears them! Strong soul and high endeavor, the world needs them now. Beauty still lies imprisoned; and iron wheels go over the good and true and beautiful that might spring from human lives. And they who fight with Ormuzd—

As our brother so bravely did—

though they may not know each other—some where, some time, will the muster roll be called.

Mr. HART. Mr. Speaker, when night was coming upon the Hon. ROBERT GUNN BREMNER; when tortured by a gnawing pain and martyred by experiment, he soothed his sufferings with the thought—

My life is not worth one-tenth of the effort that has been put forth to save it. I am ready for the scrap-heap, but I feel the cutting and

281112

the doctoring has added to the knowledge——. Some poor soul who comes after may benefit. The question is not whether I am going to get well or not, but rather if I am going to live up to ideals under tests; for dying gamely is just as helpful to the race as living bravely. Some day science will conquer, and I think I would rather be in the category of those who were in the fight, and helped win the victory, than be one of those who placidly reap the benefit.

Then he voiced his dominant characteristic—a sinking of self in the welfare of others.

He had an eye single upon the advancement of all but himself. In a long and close companionship, I never heard him seek personal preferment or consideration; and he was influenced to accept the nomination which resulted in his election to the House of Representatives, largely because by so doing it was believed he would strengthen the chances of his associates.

His father was a victim of the decaying industries of Wick, Caithness, Scotland, of which Stevenson wrote: "The meanest of man's towns in the boldest of God's bays."

While "Bob" was yet a child in arms his father emigrated to Canada. The spirit of this father, which enabled him to cast aside the memory of a lost fortune and begin life anew, in not only a new enterprise but in an unknown country, was inherited by "Bob" BREMNER in a marked degree.

Believing the sphere of his youth too narrow, without plan, and armed alone by a supreme confidence in his own resourcefulness, early in life he passed from his rural home to one of our largest cities.

Without assistance, he procured employment in this unfamiliar environment. Progressing, step by step, he soon became the proprietor and editor of one of the most influential newspapers in northern New Jersey, and a benefactor of the poor and distressed.

His faults were other people's virtues.

I occupy the desk that was once my late colleague's, and am inspired by Carlyle's lines, conspicuously pasted thereon by him!

"Out of eternity this new day is born;
Into eternity at night will return.
Behold it aforetime no eye ever did,
So soon it forever from all eyes is hid.
See here has been dawning another blue day,
Think; wilt thou let it slip useless away?"

He entertained no fear, except of idleness and uselessness. There seemed no limit to his ambition or his activities. While lying in apparent agony, a smile struggling with a facial twitch of pain, his greeting was ever "Never felt better in all my life," a pardonable misstatement. He shamed us all who were prone to complain.

That smile has passed from us, but the memory of it is here, and we may retain it as our most valuable asset. He taught us to work, to produce, to suffer, and yet to smile. And fortunate is the man who profits by "Bob's" lesson.

He was never spectacular, but ever persuasive. There was none of the spurious about BOB BREMNER. He detested hypocrisy and falsehood—the falsehood of deeds as of words. Born in poverty, suffering as a pioneer, he understood the poor and their struggles, and with indomitable courage he fought their fight.

His virtues were natural—he had no veneer. We served in one regiment through the Spanish-American campaign of 1898 and in close companionship I observed him—at all hours, under every mental and physical influence.

Truly, he was an asset to the world; he improved his talents and will hear "Well done."

A companion of the press has handed me his tribute to our bereaved colleague. I have read it, and feel that it must strike a harmonious chord in every breast.

(In memoriam R. G. BREMNER, by L. H. Robbins, Newark News.)

UPWARD.

Upward his watchword was, and year by year,
Joy in his eyes, he climbed the rugged way.
Even when death's hard hand struck icy fear
Into his soul, he halted not a day.

Upward he toiled through grief no friend might know,
True to his dream at any painful price.
Serving his fellow men we saw him go
Up to the very door of Paradise.

Mr. EAGAN. Mr. Speaker, almost a year ago there passed from among us one of the most remarkable men who ever sat in this legislative body, ROBERT GUNN BREMNER, a Representative from the seventh congressional district of New Jersey. Following the old and beautiful custom of this House, we pause to-day in our legislative labors to pay our tributes of respect to his memory and to tell as best we may the story of his short but very useful life and to point out the lesson of that life.

It was not my good fortune to know BOB BREMNER until election to this House brought us into association with one another. In the all too short time between our first meeting and his death I saw but little of him, and yet that little was sufficient to convince me that BOB BREMNER was one of the noblest of men. I must leave to those of my colleagues who knew him longer and more intimately the pleasant task of recounting his many and more intimate virtues.

Membership in this great body has its responsibilities and its cares, but it also has its compensations. One of the greatest of these is the intimate and enduring friendships which we form with one another. My friendship—aye, my love—for BOB BREMNER began, as it did with every one else who had the good fortune to know him, from the moment almost of our introduction. That friendship will be one of the dearest memories I shall take with me when I leave this House. The old saying, "To know him was to love him," applied with special force to BOB BREMNER.

The world surely is better because BOB BREMNER lived. Every Member of this House who knew him at all—indeed, every man and woman in America who followed his manly fight for life against the ravages of the dread disease which was slowly but surely overwhelming him, is the better because the Almighty saw fit to place the great soul of BOB BREMNER in its tenement of clay for a few short years.

BOB BREMNER was indeed "a brave man struggling in the storms of fate." Coupled with indomitable courage and great optimism was a never-failing cheerfulness, which enabled him to smile while undergoing the most intense pain. He possessed in a rare degree the ability to look on the brighter side of life and to impart to all who came within his reach much of the cheerfulness which radiated from him.

His all-pervading good humor made him a welcome addition to any group of his fellows. His entrance into this Chamber was always the signal for many eyes to be turned on him in admiration of his manly struggle against fate, and for a number of his colleagues to gather around him to inquire how he was getting on and to be entertained by his quaint and witty comments on men and events.

I shall never forget the last visit made to him by Congressman HART and myself at Dr. Kelly's sanitorium in Baltimore a few days before his death. We found him propped up in bed with Bible on one side and a volume of Shakespeare on the other. When we entered the room it was plain to us that the shadow of death was even then upon him. I believe that he knew that he had but a very few days to live and yet he was as cheerful as when I first met him. He assured us that he would be back at his work in a short time and told us of the plans he was making for his return to the House and to his congressional labors. He appeared to take as keen an interest in events as if he really expected to be back at his work the following week. We recited at some length the story of our patronage and other troubles of the preceding week, to his great amusement. He recounted to us his own troubles along the same line with his usual zest and good humor. It was almost impossible to realize that a spirit such as his was about to leave us.

BOB BREMNER was as unselfish as he was heroic. His heroism and unselfishness can be expressed in no better way than in the simple statement from what was to be his deathbed that even if the treatment to which he was being subjected were to prove unsuccessful in his own case, he was glad to suffer if the experiment should result in relieving others afflicted with the dread disease which was soon to claim him for its own. He suffered intense agony in these experiments, not so much, I believe, in the hope that it might benefit himself as that it would benefit others.

I can not conclude this feeble tribute to the memory of my friend and colleague without a reference to the sisterly devotion and affection of Miss Helen Bremner. Miss Helen was with her brother constantly. She aided him in his congressional work, and when the heavy hand of illnesss was laid upon him and he was unable to go to his office she was his very able and courteous substitute. At the end of each day she dropped the rôle of secretary to take up that of nurse.

While BOB BREMNER's death was a very great loss to all the members of his family, it was, if possible, an even greater loss to Miss Helen, who never left the bedside of her brother during the last eight days of his illness.

BOB BREMNER's friends were legion. By none was he more esteemed and loved than by President Wilson and his lamented wife. It is fitting that I should close with this tribute to his memory by President Wilson:

I am deeply grieved by the loss of BOB BREMNER. He was a personal friend, whom I greatly admired, and was such a man as attracts deep affection. Throughout his suffering, which was long-continued,

he seemed never to think of himself, as he certainly never spoke of himself, and he was throughout as keenly interested in the diligent performance of his public duties and in kindly offices to others as if he had been free from pain. I feel that a beautiful spirit has gone out of the world.

Mr. DRUKKER. Mr. Speaker, ROBERT GUNN BREMNER was born in Keiss, Scotland, December 17, 1873, and it was from his Scotch ancestry that he inherited much of the indomitable will and courage which marked his career. At an early age he went to Toronto and ultimately settled on a farm in the neighboring village of Camella. He studied diligently, taught school, and subsequently came to Paterson, N. J., where he engaged in newspaper work. At the outbreak of the Spanish-American War he enlisted in Company C, Second New Jersey Volunteer Infantry. In 1902 he became editor and publisher of the Passaic Herald and served in that capacity up to the time of his death.

BOB BREMNER, as he was familiarly called, had the faculty of making and retaining friends. His mind was a storehouse of knowledge; his disposition sunny and cheerful. He was eminently fitted for the career he had mapped out and for the duties which were imposed upon him during the last year of his life.

His marked ability and leadership early attracted attention; and though suffering from an incurable illness he was nominated by his party without opposition to represent the seventh congressional district of New Jersey in the Sixty-third Congress. Only those who were favored with intimate acquaintance know how with pain-racked body he sought faithfully to carry out the wishes of his constituents. Those who were most closely associated with him during his protracted illness recall that even the greatest suffering could not break this masterly spirit of cheerfulness. No matter how severe his agony, this man, whose body was so cruelly spent by disease, had always the same tender smile and cheery welcome for his visiting townspeople.

History has made heroes of men whose deeds required no such fortitude as was displayed by this young Passaic editor, in whom bodily affliction could not put a check upon ambition, and who was able to look at life hopefully and philosophically even though, in his own heart, he knew that nothing could save him.

We can well believe the story which reached us from his bedside during his last hours. When asked why he submitted to further treatment after the attending physicians were forced to admit that it was impossible to extend further relief, he replied:

> They may not be able to help me, but they can learn something from their experience which may be of help to others.

As an editor he did much for his city, where his pen was always ready to advocate reform. His life will be measured not by his achievements in this Chamber, where his illness prevented him from regular attendance, but in Passaic, N. J., where he labored long and was untiring in his efforts to advance the public good.

Mr. MONTAGUE. Mr. Speaker, the late Member of this House in whose memory we are now gathered has living within my district two brothers, one a very earnest and devout minister of the Gospel, and the other a lawyer of capability and success, of energy and good example. Knowing well these gentlemen, for I count them my friends, I was naturally much interested in meeting their brother when I became a Member of this House.

I had learned somewhat of his illness, but I was hardly prepared to see the inroad of this fatal malady so marked and so advanced. I first saw him sitting on the front row beyond the last aisle to the right of the Speaker with his arm apparently beneath the sleeve of his coat and supported by a dark bandage of cloth. It was apparent that the winding sheet of death was more than half about him, but despite this gloomy picture I found the greeting cordial and cheerful, a face of smiles, almost effeminate in tenderness, and here and there a seam or line that indicated intensity of suffering, but a fortitude to combat it. Such a personality attracted me as I am sure it attracted every Member who met him.

It is a fine thing to see a man battling against tremendous adversities of life. It is an inspiration to see a great soul endeavoring to overcome the moral and physical difficulties of the world. But to observe at close hand a man fighting for his life against such transcendent obstacles, with supreme cheerfulness and rare courage, will perhaps leave to you and to me a stimulus for the public good, a contribution to our official standards, greater than any forensic triumphs that may resound through this Hall.

Eloquence may be sometimes preserved by the records of this House; wit may here and there leave a shaft to be seen in after years; reason and exposition may cleave the clouds of our doubts; but I suspect I voice the inner conscience of the membership of the House should I observe that you and I are most helped in the discharge of our public duties by contact with a clean, lofty soul standing firm amidst racking pain and lowering clouds that gather about the end of the journey, and knowing no hypocrisy and no cant.

In the short period of life, which is but a watch in the night, it is more helpful to strike hands with some sincere man, burdened with the same responsibilities, than to be moved by those forces that sometimes lend majesty to this forum. We have in our natures those subtle, finer, and more enduring qualities that find their sources in the spirit, and to the spirit the still small voice is deep if not loud. Contact with such a character lends luster and exaltation to life.

Mr. Speaker, it is a mournful pleasure to associate myself with the membership of this House in giving some expression to my appreciation of ROBERT G. BREMNER and to pay my feeble tribute to this patient, hopeful man, with a serene but intrepid spirit, laboring for good amidst pain and agony and walking the last path of earth with a faith and a hope we may well envy.

ADJOURNMENT.

The SPEAKER pro tempore. The exercises having been concluded, in accordance with the resolution already adopted, the House will stand adjourned until to-morrow at 11 o'clock a. m.

Accordingly (at 12 o'clock and 55 minutes p. m.), under the order previously agreed to, the House adjourned until to-morrow, Monday, January 25, 1915, at 11 o'clock a. m.

SENATE.

MONDAY, *January 25, 1915.*

(Legislative day of Friday, January 15, 1915.)

The Senate reassembled at 11 o'clock a. m., on the expiration of the recess.

CORRESPONDENCE RELATIVE TO CONTRABAND (S. DOC. NO. 716).

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

Mr. STONE. Before the Senator does that, will he yield for just a moment?

Mr. SMOOT. I withhold the demand.

Mr. STONE. I have here a document that I have made two or three efforts to have printed as a document. It is correspondence mentioned in the papers this morning in reference to contraband. Several Senators have told me that they want to have it printed as a document. I should like to have consent to have it printed in the RECORD and also made a public document.

Mr. SMOOT. One or the other.

Mr. STONE. I will ask that it be printed as a Senate document.

The VICE PRESIDENT. Will the Senator from Utah withhold his suggestion of the absence of a quorum?

Mr. SMOOT. I will.

The VICE PRESIDENT. Is there objection to printing the correspondence as a Senate document?

Mr. STONE. I should like to have 5,000 additional copies printed for the use of the Senate document room.

The VICE PRESIDENT. The Chair hears no objection, and it is so ordered.

CALLING OF THE ROLL.

The VICE PRESIDENT. The Senator from Utah suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Borah	Gallinger	Overman	Sterling
Brady	Hardwick	Page	Stone
Brandegee	Hollis	Perkins	Sutherland
Bristow	Johnson	Pittman	Thomas
Bryan	Jones	Pomerene	Thompson
Burton	Kern	Robinson	Thornton
Camden	La Follette	Root	Tillman
Catron	Lippitt	Saulsbury	Townsend
Chamberlain	McCumber	Sheppard	Vardaman
Chilton	McLean	Sherman	Warren
Clapp	Martin, Va.	Shively	White
Clark, Wyo.	Martine, N. J.	Simmons	Williams
Cummins	Nelson	Smith, Ariz.	Works
Dillingham	Norris	Smith, Ga.	
Fletcher	Oliver	Smoot	

Mr. PITTMAN. The Senator from Oregon [Mr. LANE] requested me to announce that he is busy on committee work.

Mr. LA FOLLETTE. I was requested to announce that the Senator from Montana [Mr. WALSH] is engaged in presenting a matter to the Committee on Indian Affairs and is unable to attend the session of the Senate this morning.

Mr. OLIVER. My colleague [Mr. PENROSE] is unable to attend the session of the Senate on account of serious illness. I make this announcement for the day.

The VICE PRESIDENT. Fifty-eight Senators have answered to the roll. There is a quorum present.

CREDENTIALS.

Mr. SUTHERLAND presented the credentials of REED SMOOT, chosen by the electors of the State of Utah a Senator from that State for the term beginning March 4, 1915, which were read and referred to the Committee on Privileges and Elections.

THE MERCHANT MARINE.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia, to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes.

Mr. ROOT. Mr. President, I wish to address myself this morning to the amendment to the pending ship-purchase bill offered by the Senator from Massachusetts [Mr. LODGE]. I may find it necessary hereafter to speak upon another important phase of the proposed legislation, but at present I speak upon that alone.

I wish at the outset to say a few words regarding the discussion of the measure. I hope I am not warped or carried away by feeling or by any partisan considerations, but it does not seem to me that this bill to put the Government of the United States into the business of foreign shipping is receiving the kind of discussion which a measure of great importance and novelty ought to have. It is a very important measure. It is important not merely because it involves the expenditure of a vast sum of money at a time when we have been forced to make up a deficit in our revenues by imposing an extraordinary tax which we call the war-revenue tax, but it is important because it embarks the Government of the United States upon a new departure, based upon a reversal of the principles of government which we have always followed up to this time. No such change of principle and policy was in the contemplation of the people of the United States when the present administration was put into power by their votes. No such reversal of principle and policy was ever discussed and passed upon by the people of the United States in any election.

Plainly the judgment of the people should be taken so far as it is possible by the ordinary methods in which a free, self-governing people proceed with the conduct of their Government. Plainly if there be any strength or virtue in our representative government such a new departure and reversal of principle and policy should have the fullest possible discussion in the great public forum of the Congress of the United States. Is this measure receiving that? It seems to me, sir, that it is not.

The bill in its present form was reported on the 6th of January. During the month before in December it had been introduced by the Senator from Missouri [Mr. STONE] and referred to the Committee on Commerce. It was reported by that committee without hearing and without any extended consideration or discussion in the committee.

The bill was brought before the Senate for consideration, if I am not mistaken in my dates, on the 4th day of the present month, and the Senator from Florida presented in a brief and not exhaustive or extensive manner the report in favor of the bill. Upon that day notice was given that discussion of the bill by the minority in the Senate would be regarded as improper and obstructive. Those are substantially the words that were used by the senior Senator from Missouri [Mr. STONE]. Notice was given which stigmatized all discussion of the bill by the minority as obstructive and improper.

Mr. FLETCHER. May I interrupt the Senator?

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Florida?

Mr. ROOT. Certainly.

Mr. FLETCHER. May I inquire who gave that notice?

Mr. ROOT. The Senator from Missouri [Mr. STONE] gave that notice.

Mr. STONE. Mr. President——

Mr. FLETCHER. I certainly did not myself, because I stated positively that we would afford ample opportunity for full discussion.

Mr. ROOT. The Senator from Missouri, who introduced the bill, gave the notice, and he accompanied it by the statement that they had the votes to pass the bill.

Mr. STONE. Mr. President——

Mr. ROOT. In advance of any discussion, in advance of any consideration, the notice was given that the majority in the Senate had the votes to pass the bill.

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Missouri?

Mr. STONE. Mr. President, I was looking for the record of exactly what occurred. I did look that up when the Senator from New York made a statement somewhat similar to the one which he repeats this morning, and I thought later to have the exact facts shown from the record of what was said repeated here. I am not able at this moment to turn to that record, not recalling the exact time when the colloquies occurred; but if the Senator will permit me a few moments, as soon as I can look it up I will be very glad to have the exact facts and everything that was said in consecutive order stated.

Now, Mr. President——

Mr. ROOT. Mr. President, it is not my purpose to yield the floor.

Mr. STONE. I am not asking the Senator to yield the floor.

The VICE PRESIDENT. The Chair would not rule that the Senator from New York had yielded the floor.

Mr. ROOT. I say that because it is commonly reported——

Mr. STONE. But the statement——

Mr. ROOT. That it will be regarded during the progress of this debate as a yielding of the floor by the Senator holding it if he permits any interruption for the purpose of any speech or business whatever—that is the understanding—except the asking of a question.

Mr. STONE. Very well; I will wait until the Senator from New York concludes his address, Mr. President, and then I will produce the RECORD, for I am sure the Senator from New York does not wish to make a misleading statement, although a mistaken one.

Mr. ROOT. Mr. President, I do not wish to do the Senator from Missouri any injustice. Like him, I have not examined to get the precise words which were used. I am stating the effect of what he said upon my mind, the effect upon the mind of all the Senators about me, and upon the minds of all the Senators with whom I have since conversed. The effect was that the Senator from Missouri intended on the 4th of January to give notice that discussion of this ship-purchase bill on this side of the aisle would be regarded as improper and obstructive. He accompanied that by the statement: "We have the votes to put the bill through, unless it is prevented from coming to a vote by improper or obstructive tactics." That was but the beginning.

Two days after this notice was given a substitute bill was introduced striking out everything that had been in the measure on the 4th of January and substituting an entirely new measure, with much that was in the old, but a new measure from beginning to end. Since that time we have not been discussing this bill; there has been no discussion of this bill in this representative body. Some of us who have been opposed to the bill have been making speeches about it, but the bill has not been discussed.

I have sat here and counted with wonder from time to time the numbers of the majority who have been present while men eminent for learning and experience and ability and patriotism have been attempting to discuss the bill. I have seen here four Democratic Senators present, three present, one present. I marked the presence of but one Democratic Senator in this Chamber by saying to the Senator from New Hampshire [Mr. GALLINGER]: "If some one would call Mr. FLETCHER out of the Chamber, we might move to adjourn." I say that has been the rule—one, three, four, five, half a dozen Senators present while the Senator from Ohio [Mr. BURTON], the senior Senator from Iowa [Mr. CUMMINS], the junior Senator from Massachusetts [Mr. WEEKS], and the senior Senator from Massachusetts [Mr. LODGE] have been trying to perform their duty of discussing this great and novel measure in the Senate of the United States. The men who announced at the beginning that they had the votes to carry the bill have been absent.

The Senator from Mississippi [Mr. WILLIAMS], with that genial humor which so often brightens the closing hours of our legislative days, had—I will not say the effrontery, but I will say—the disrespect to tell the Senate that the speeches made by these gentlemen were not worth listening to. He said what was true, that he was not obliged to listen to the Senator from Ohio or to the Senator from Massachusetts or to the Senator from Iowa—that is true—but when having been absent, not having heard one word, he comes into the Senate and says they were not worth listening to, that they were long speeches with nothing in them, he denies the efficacy of the American system of representative government; he discredits the Senate of the United States; for, sirs, there is not now and never has been

in our history a group of men whose study and thought and expression upon great public questions have been of greater value to the people of the United States than the Senators whom I have pointed out and who, the Senator from Mississippi says, are not worth listening to.

Why is it, Mr. President, that this course has been followed? Not because the Senators upon the other side really believe that the contributions these Senators have made to the discussion of this bill are not worth listening to, but for a very different reason. It has not been the ordinary fatigue or desire to attend to other business; it has been for a specific purpose. Before I state that purpose, let me add that not only had there been an announcement at the beginning that you had the votes to pass the bill, and, subsequent to that, abstention from the meetings of the Senate during our attempts at discussion; not only has there been the open and public declaration that what the ablest men in the minority had to say on this new subject is not worth listening to, but the rules of the Senate have been so used, have been used in such an unusual and extraordinary way as to make any attempt at discussion upon this side of the Chamber most burdensome and difficult.

I am now speaking on the 25th day of January, but we are proceeding according to the Calendar of Business, from which I read, and according to the order of the majority of the Senate, upon the legislative day of Friday, January 15, 1915. Why is that fiction employed?

Mr. HUGHES. Mr. President——

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from New Jersey?

Mr. ROOT. I yield so far as I may without losing the floor.

Mr. HUGHES. I merely desire to ask the Senator if that situation does not exist by virtue of unanimous consent entered into in this body?

Mr. ROOT. Mr. President, it does not exist by unanimous consent.

Mr. HUGHES. Well, practically by unanimous consent.

Mr. ROOT. It does not exist practically by unanimous consent. It exists against my open and vigorous objection, and it exists because of the voting down of a motion to adjourn made by the junior Senator from Pennsylvania [Mr. OLIVER] and the carrying by the majority of a motion for a recess until 11 o'clock, instead of the ordinary adjournment.

Mr. President, why is it that for 10 days we have been conducting our business under a fiction, under a false pretense—the pretense that we are in the day of January 15? Why, sir, it is in order that we may have from 11 o'clock in the morning until 6 or 7 o'clock in the evening, during which no business can be transacted, except the making of speeches on this bill; that is, eight hours of continuous speaking on this bill with no other business. This fiction of a continuous legislative day cuts out the morning hour; it cuts out the order of business under which petitions and memorials may be presented, under which bills may be introduced, under which reports of committees may be submitted; all business of the Senate is pushed aside by this fiction in order that the opponents of this bill may be turned into the Chamber under the necessity of speaking continuously eight hours every day, and with the threat looming up before us of night sessions also, and speaking to empty benches on the other side.

Mr. SIMMONS. Mr. President——

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from North Carolina?

Mr. ROOT. I yield for a question.

Mr. SIMMONS. I do not rise especially to ask a question, but I rise——

Mr. ROOT. Then, Mr. President, I feel that I can not yield.

Mr. SIMMONS. I rise for the purpose of correcting an error in the statement of the Senator from New York, and I hope he will permit me to do that.

Mr. ROOT. If I do not lose the floor I will gladly yield.

Mr. SIMMONS. I do not ask the Senator to yield the floor.

The VICE PRESIDENT. The Senator from New York will not lose the floor.

Mr. SIMMONS. I appeal to the Senator if he will not permit me to correct what I think is a misleading, an unintentionally misleading, statement of the Senator from New York.

Mr. ROOT. I should be glad to be corrected.

Mr. SIMMONS. Mr. President, I have been in the Chamber not all the time since this debate began, but I have been in the Chamber as much during the speech of the Senator from Ohio and the speech of the Senator from Massachusetts as has any other Senator in this body.

Mr. GALLINGER. Mr. SMOOT, and others. Oh!

Mr. SIMMONS. But I want to say, as a result of my observations, believing that I was present as much as any other Senator in this body while those two speeches were being delivered, that, as a rule, there were as many Senators on this side of the Chamber while those speeches were being delivered as there were on the other side.

Sometimes there were more on the other side than on this side, and sometimes there were more on this side than on the other side; the attendance on both sides has been exceedingly meager. The great Senator from New York was in his seat very little of the time during the deliverance of those two speeches. It has been the case since I have been here that when a filibuster was going on and a Senator was speaking largely for the purpose of consumption of time both sides of the Chamber have been a little indifferent with reference to attending the discussions. I do not believe the Senator's criticism of the absence of Senators on this side is any more just than a like criticism of the absence of Senators on the other side during the delivery of the two speeches referred to. I may be wrong about it, but my recollection is that the Senator from New York was present but a very short time, a very small portion of the time while the two Senators to whom I have referred occupied the floor.

Mr. ROOT. Mr. President, the Senator from North Carolina is wise in saying that he may be mistaken about it, for he was not here to see whether the Senator from New York was present or not. He may have an invisible cap or coat, and if he has been present he has worn it, for I hoped very much from the fairness and intellectual integrity of the Senator from North Carolina that the arguments that were being made would produce an effect upon his mind, notwithstanding the arrogant assertion that his party had the votes to pass this bill and would pass it. The Senator from Massachusetts [Mr. LODGE] spoke not more than an hour and a half, and I sat and wished Senators upon the other side might be here to hear him. The fact remains, conceded by the Senator from North Carolina, that the benches were empty except now and then two or three or four. The fact remains that there has been no discussion of this bill, but there has been a conspiracy of silence on the part of the Democratic Party, which "has the votes" to pass the bill; and by a fiction which continues for 10 days the legislative day of January 15 it has been made as hard as possible for the opponents of the bill to discuss it.

Mr. President, this bill is being put through by the pressure of physical weakness. It is being put through by means of making it as exhausting as possible for the opponents of the bill to discuss it.

Mr. REED. Mr. President——

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Missouri?

Mr. ROOT. I will ask the Senator not to interrupt me again. I have been diverted from the line of my remarks and have spent more time upon this phase of the matter than I had intended to.

Sir, there are two objects of discussion in a representative body. One is to convince one's colleagues, to produce an effect upon the minds of one's colleagues. That is the deliberation, the consideration of the representative body. That, sir, does not exist in regard to this bill. No one can deny it. There have been discussions behind closed doors, we are told by the newspapers. There have been discussions in the Democratic caucus, amendments offered and adopted, amendments offered and rejected behind closed doors, but no discussion of this great measure in this representative body.

I am not one, sir, who flouts at caucuses. I think there may well come a time in the course of the progress of legislation when a party shall undertake to act as a unit; but, sir, it ought to be after discussion, and not before discussion or as a substitute for discussion. You are substituting secret discussion in your caucus to the exclusion of that discussion and consideration of this great measure which the Constitution, the spirit of our free American Government, demands.

There is another object of discussion, sir, and that is an object which reminds me of the old phrase, so familiar to some of us, "leading in prayer." When we properly discuss a measure of public importance we not only address ourselves to each other, but we are leading, stimulating, inciting the thought and discussion of the people of the whole country; and that, sir, is after all the great, the all-important, the indispensable function of a public legislative body. Once we begin in the Senate to discuss a new measure, as little attention as may seem to be paid to specific utterances, some get into the press; in all the great newspaper offices there are men whose business it is to read the RECORD; public discussion begins; pertinent conversation among citizens begins; in all the places where American voters meet they begin to discuss, and gradually,

through the press and through letters, telegrams, and conversations comes back to the body a sense of public judgment.

Mr. President, when has there been proposed to the American Congress a measure which required that kind of discussion more plainly than this novel and important measure? Yet it is denied by the continued pressure of a fictitious legislative day, and long hours, and abstention from discussion upon the side of the majority, pressing on the progress of this measure for the purpose of putting it through by brute force and weight of votes before the people of the United States can think about it and discuss it and express their opinion upon it.

Mr. President, the fact that this measure can not have that kind of discussion and be passed at this short session consistently with doing the primary work of the session upon the appropriation bills shows that it ought not to pass at this short session. You can pass it, my friends upon the Democratic side of this Chamber. You can pass the bill. You have it in your power. The Senator from Missouri was right when he said: "We have the votes, and will pass it." You can do it because upon this side of the Chamber are men who have grown old in the public service, and whose physical strength makes it impossible for them to do what their sense of duty would dictate. You can pass it, but you do it at the fearful risk of denying to the people of the United States that consideration and discussion and formation and expression of judgment to which they are entitled.

Mr. President, important as this bill is, I am not sure that the subject I am now discussing is not still more important. The modification of constitutional government by practice is a gradual but resistless process. We are all familiar with the change in our constitutional system which practice has made in regard to the election of a President. The electoral college no longer is at liberty to speak its own mind or to act upon the dictates of its own judgment. Gradual progress has nullified the constitutional provision, and has created a new system. That process has taken place in many a land. When Louis XIV declared himself to be the State, it had become the sole function of the Parliament of Paris to register—not to discuss, but to register his decrees. I have seen national legislative bodies which have reached that point. I have seen them, have been present in them, when no voice was clear enough, no courage high enough, to break away from the custom which accepted and registered the directions of the chief executive. It was the result of a gradual process.

Let us not be too confident that we are proof against such a process. We abandon to-day the performance of our function of so discussing this measure among ourselves that there shall be real deliberation, real consideration, real forming of opinion here, of discussing it so that the people of the country shall follow us in discussing it in forming and expressing their opinion, and we have taken one step further than ever before in the process which will make us a registering body rather than a legislative body.

I do not mean that it will come to-morrow. I do not mean that other bills may not come on which there will be discussion; but I mean that we are taking a step in a process which is fraught with danger and with fatal results to representative government. We can justify our existence as a body only by the performance of our duty.

Oh, sir, the liberties of a free people depend upon the courage and persistency of a minority. They depend upon independence of thought and action on the part of all the members of a legislative body. If we are merely to register, if we are to refrain from discussion, if we are to smother our judgment, we are contributing our part toward a process more fatal to our country than any legislation we can devise, more injurious than any benefit we can render.

Now, Mr. President, let me turn my attention to the bill itself, and what it does.

It is an emergency measure. It puts in the hands of three members of the Cabinet practically $40,000,000, with power to increase the amount for the purpose of entering into the business of ocean transportation on the part of the Government of the United States.

I looked to see what may have prompted the sponsors of the bill, and I find that in the testimony of the protagonist in its behalf, the Secretary of the Treasury, Mr. McAdoo, the emergency character of the bill is clearly and forcibly stated. I read from his testimony taken on the 1st of September, 1914, before the House committee, the hearing of the Committee on Merchant Marine and Fisheries on House bill 18518. He says:

> A great deal of our commodities and our products are dependent and have been dependent for outlet upon some of the foreign bottoms which are now idle, and that, in turn, has, of course, had an injurious reflex action upon our commerce. The immediate problem confronting us is to provide additional facilities for carrying American products in the foreign trade; and in order to do that, we must depend upon either private capital to make these investments in ships to be sailed under our flag or else the Government will have, as an emergency measure, to come to the assistance of the country.

He says also:

> Of course this measure is designed to be an emergency measure. It never was contemplated that this should be a permanent operation on the part of the Government. Still I think the provision for the disposition of these ships is ample in case the necessity for them shall have disappeared. Therefore the bill was drawn with reference to the immediate emergency that is to be met.

He says also:

> You are facing a situation now where you can not measure economy against the interests of the American people, and you must assume also, in the discussion of subsidy, which I am opposed to on principle anyway, you must assume that companies are available to take advantage of any subsidy that would be granted. They are not available, and there is no telling how soon they could be organized. It is only by the Government dealing with this question in double-fisted fashion that relief can be given.

There was something said about South American trade, but manifestly that is not an emergency and not any part of the emergency, for everyone agrees that there is more shipping to transact the South American business than there is business to be transacted for the present, and there is no emergency there.

I said this puts a large amount of money in the hands of these gentlemen. They are at liberty to subscribe for $10,000,000 of stock. They are bound to subscribe for 51 per cent of that. They are to offer the remainder to public subscription; but it is agreed that the business is to be conducted at a certain loss. The Secretary of the Treasury states that with great frankness in the hearing; and therefore it is assumed by him and by other sponsors of the measure that there will be practically no private subscriptions for stock. It is quite evident that no one would from ordinary and proper commercial motives subscribe at par for the minority stock of a measure which is advertised beforehand as a losing measure.

Therefore the Government will subscribe for all the stock under the terms of the bill. They are authorized to sell $30,000,000 of Panama bonds, making $40,000,000. They are authorized to increase the stock indefinitely with the approval of the President.

The newspapers say that in the Democratic caucus an amendment has been adopted which will limit that increase to $10,000,000 more, and I will without dwelling further upon it assume that to be the limit, making $50,000,000. They are to put $50,000,000 into a losing business, the loss upon which will have to be made up from taxation.

Of course, this must be but an emergency measure. Of course, it is only as an emergency measure that anyone would propose to do such a thing at a time when we have had to impose an extraordinary war-revenue tax upon the people of the country because of a deficit in our revenue. Every man who pays his part of that war-revenue tax will be contributing to make up the loss upon the shipping business which is authorized by this bill, and of course it is an emergency measure.

Mr. SIMMONS. Mr. President——

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from North Carolina?

Mr. ROOT. Yes, I yield.

Mr. SIMMONS. I assume that the Senator from New York does not desire to misrepresent the Secretary of the Treasury with reference to the testimony given by him about the first of September. I read that testimony very carefully last night. I think the Senator is in error when he states that the Secretary of the Treasury admitted that this whole business would be operated at a loss. At one stage of his testimony there was something said by the Secretary which might have had that construction, but later the Secretary made the positive statement that while he was satisfied a part of the ships would be operated at a loss, especially that part which were engaged on the new routes for the purpose of building up new trade, he was equally satisfied that other of these ships would be operated at a profit; and there is nowhere, I think, in his testimony anything that could be construed as a statement, taken in connection with the qualifications, that there would be a loss upon the entire operation.

Mr. ROOT. The Secretary of the Treasury says in his testimony:

> It is not only a question of establishing these routes, many of which will undoubtedly have to be operated at a loss for a time in order to establish the necessary trade relationships, but the Government will also have the power to establish rates that will be advantageous to American commerce.

He says:

> I think one of the essential requisites is that the Government shall have the power to establish these lines and see that they are operated in such a way, even at a loss, as to benefit the commerce of this country.

There are other expressions at various points in his testimony which leave no doubt whatever that that is his expectation.

We need not rely solely upon his expectations, but we know that as a matter of fact private enterprise operating American ships has been a losing enterprise. Upon good authority it is stated that there are, or there were a few weeks ago, 2,000,000 tons of shipping engaged in the commerce of the world under foreign flags and owned by American citizens. Why? Because the conditions of foreign commerce under the laws of the United States are such as to make profit practically impossible.

The Senator from Massachusetts [Mr. LODGE] has called my attention to a clause in the President's message where he says:

It—

That is, the Government—

It should take action to make it certain that transportation at reasonable rates will be promptly provided, even where the carriage is not at first profitable; and then, when the carriage has become sufficiently profitable to attract and engage private capital, and engage it in abundance, the Government ought to withdraw.

So the proposal is to go into a losing business, and to go into a losing business at a time when we are making up a deficit by an extraordinary war-revenue tax; and, of course, I say it can be regarded only as an emergency measure.

Now, this bill authorizes the Secretary of the Treasury, the Postmaster General, and the Secretary of Commerce to buy or build ships. How can the emergency be met? Manifestly, not by building ships. The small fleet of ships which could be procured by the use of this $50,000,000 would require from a year to 18 months, as I am advised, to build. So that will not meet the emergency. The emergency is the prevalence of high rates for the carriage of American produce to Europe. There is no emergency anywhere else.

It is true all the steamers in the world that are free are coming in to get the benefit of those high rates, and the ordinary working of economic laws is sure to bring the rates down. But for the moment there is the emergency, and but one emergency, and that is high rates of carriage for American produce to Europe.

It is true our farmers are getting $1.40 for their wheat, so that those high rates are paid not by us but by the purchasers abroad. It is true the export of foodstuffs has been greater within the last few months than ever before in our history. Still, there is an emergency. It is true cotton is bringing 8 cents, and the interposition of Government which was so strenuously demanded here a few months ago in order to save the cotton producers proved to be unnecessary. Still the rates of transportation of cotton are high and there is an emergency. But the emergency can not be met by building ships. We have got to buy them. Now, why?

Mr. SIMMONS. Will the Senator from New York allow me to ask him one more question and then I will not interrupt him again?

Mr. ROOT. Certainly.

Mr. SIMMONS. I have trenched probably rather much upon his patience already.

Mr. ROOT. I yield, Mr. President.

Mr. SIMMONS. The Senator says it is proposed that the Government shall go into a losing business. Does the Senator see any particular difference between the Government going into a losing business and the Government inviting private citizens of this country to go into what is admitted to be a losing business with a guarantee that by subsidies that loss will be made up out of the Treasury of the United States?

Mr. ROOT. Oh, Mr. President, I see many differences, but I am not going to discuss them here to-day. I am speaking upon an entirely different subject. I wish that I could detach the mind of the Senator from North Carolina from certain preconceived ideas which evidently possess it and get him to attend to the subject that I am talking about.

Mr. SIMMONS. The Senator was just talking upon the subject about which I asked the question.

Mr. ROOT. I have been pressing upon the Senate the emergency nature of this bill, and I had passed on to the question as to how the emergency can be met. I was saying you can not meet it by building ships because you can not get them in time to meet the emergency. You have got to buy them. Where are you going to buy them? You meet no emergency by buying ships that are already engaged in transporting our products. You meet no emergency by buying free ships.

A report of a committee of the Chamber of Commerce of New York presented to that body on the 4th of the present month makes an observation on that subject which is very pertinent and it is very good authority. This was a special committee on the American merchant marine in foreign trade appointed by the chamber of commerce of the greatest commercial city of the country. In their report, which I shall hereafter have occasion to bring to the attention of the Senate at large, they say:

Government ownership of ocean lines can not bring to our aid a single vessel except by building. Every steamship in the world is working to-day except those interned in neutral ports. If these can be transferred to our flag without international complications, there will be no difficulty in financing the transfer of those suitable for freight carrying, for their earnings will justify the purchase.

Now, that is high authority of men who know far more than you and I know about the great complicated world-wide business of ocean freight carriage.

There is left, then, to meet the emergency nothing but the purchase of vessels which are prevented by the conditions of war from engaging in the business of transportation now. I therefore was not surprised in reading the testimony of the Secretary of the Treasury to find that he plainly contemplated meeting this emergency by the purchase of vessels which are, to use the common although not very correct expression, interned because of war risks; that is to say, the vessels which are remaining in the ports where they were found at the outbreak of the war, unable or unwilling to put to sea for fear of capture; vessels belonging to one or another of the belligerent powers.

The Senator from Massachusetts [Mr. LODGE] has called attention to the testimony of the Secretary of the Treasury upon this subject; there are but a few words of it, and I wish to call your attention to it again as a part of what I have to say. In this same hearing from which I have quoted this occurred:

Mr. EDMONDS. Will they not be able to get plenty of bottoms when they can make financial arrangements for payment for the cargo?

Secretary MCADOO. I do not think so. An immense number of bottoms have been withdrawn from service.

Mr. EDMONDS. There are still quite a number of idle bottoms in New York Harbor to-day.

Secretary MCADOO. The number of bottoms that are idle in New York Harbor are largely bottoms that can not be put into service now.

Mr. SAUNDERS. How would this bill add to the number of available bottoms when it proposes to make its purchases from existing bottoms? It will not add to the volume of bottoms.

Secretary MCADOO. There is a large number of idle bottoms. They may be purchased.

Mr. SAUNDERS. Chiefly, are not those all German bottoms?

Secretary MCADOO. More of those are idle at the moment than any other.

Mr. SAUNDERS. It has been suggested that there would be grave objection to our undertaking to purchase German bottoms.

Secretary MCADOO. Why?

Mr. SAUNDERS. The newspapers make the statement that objection has come from the nations concerned in this war.

Secretary MCADOO. Of course, I shall not attempt to talk of diplomatic matters.

Mr. SAUNDERS. They say that would be equal to furnishing immediate pecuniary aid—that is, to Germany?

Secretary MCADOO. That is a question altogether aside, I think, from the issue. I believe that it can not be successfully disputed by any individual or any nation that this Government or any Government has a right to buy merchant ships, provided it buys them in good faith and for a neutral purpose, and that is exactly what would be done in this case.

The CHAIRMAN. If we should buy some French ships, too, that would alter the situation. In other words, if they had some, as well as Germany, that objection would not be urged?

Mr. SAUNDERS. We would not buy any French ships, because they are not to be bought.

Secretary MCADOO. I infer from what you tell me, of from what you have read in the papers, that those ships, if purchased, would be purchased from the German Government. I understand that those ships are simply owned by German companies in which German citizens are stockholders. It does not follow that the proceeds of a purchase from a private corporation of that country would be turned over to the Government.

It is quite plain that Secretary McAdoo took the same view of the way in which it would be possible—the only way in which it would be possible—to utilize this legislation for the purpose of meeting this emergency that I take; that is, that the only way is to purchase these idle bottoms, to purchase these ships of belligerents which are unable to go to sea because, if they went to sea, they would be captured. It is perfectly evident that that purchase was in the contemplation of the officer who was to be the head of the shipping board, and who came before the committee of the House to explain the bill. He came, having in mind this bill as a bill which would enable him and his associates, when passed into a law, to buy those ships. In the report in the House which followed this testimony, Report No. 1149, Sixty-third Congress, second session, by Mr. ALEXANDER, submitted September 8, 1914, the committee say:

Fears are expressed that we will involve ourselves in complications with Great Britain and France if we buy German ships. That may be. The bill does not direct the shipping board to buy ships of the subjects of any particular nation. They have the widest discretion in the purchase or construction of vessels. We have no reason to believe they will act otherwise than with the greatest care in whatever they may do.

It is perfectly plain that the committee of Congress which reported the bill did it with the understanding that the bill author-

izes the Secretary of the Treasury, the Secretary of Commerce, and the Postmaster General to buy these ships, and that they were contemplating the purchase of these ships in a situation that can not be met in any other way than by the purchase of these ships.

The Secretary of the Treasury made a speech on this subject in Chicago. It is a speech, the central thought of which is one of the most amazing ever proposed by a responsible officer of the Government of the United States. While it is apart from the line of my discussion, I can not refrain from quoting it. He said:

> The objection that the shipping bill puts the Government in the shipping business is not tenable. Those who urge it seem to forget that it is the duty of the Government to engage in any activities, even of a business nature, which are demanded in the interest of all the people of the country, when it is impossible to engage private capital in such operations.

Do my friends think that that proposition does not need discussion by the Congress of the United States and by the people of the United States, before the man who holds that view has unlimited millions put into his hands with which to put the Government into business?

I will return to the precise line of discussion; and that is the contemplation and the purpose to meet this emergency by the purchase of the belligerent ships that, unless we buy them, can not go to sea without being captured. In this speech the Secretary further said:

> Some timid people have argued that if the Government is interested as a stockholder in a shipping company, and a ship of such company should be seized by a belligerent and brought into a prize court, the sovereignty of the Government would be involved. There is no ground whatever for this view. If the Government operated ships outright, just as it operates the vessels of our Navy, an awkward situation of this character might arise; but where a nation is merely a stockholder, or the sole stockholder, in a private corporation, its sovereignty is not and can not be directly involved if the ships of such a corporation become the subjects of litigation in a prize court concerning any issue which does not involve the Government itself. The Government would stand in relation to such a corporation exactly as any individual stockholder does to a corporation in which he is interested. A suit against the corporation does not necessarily involve the shareholders.

You perceive, sir, whenever this subject is suggested and objection is made to the purchase of these ships, it is met by an argument in favor of the purchase of the ships. This is the last argument which has come to my notice from the Secretary of the Treasury, having been delivered on the 9th of this month, after the pending bill was laid before the Senate—an argument, a lawyer's argument, by the man who is to be the head of the shipping board in favor of the power to buy the ships.

The Secretary of Commerce has said in a speech which I have not before me, delivered last Friday, I believe, at St. Louis, that he contemplated the purchase of British ships. Mr. President, there is no difference in principle, and before I get through I think I will show that there is no difference in the obstacles in the way of purchasing ships of one belligerent as compared with the ships of another belligerent.

I am not talking about this because the ships are German; I am talking about it because they are belligenent ships, and they are liable to be captured on the high seas as belligerents; they are liable to be torpedoed by submarines as belligerents; they are liable to be seized in foreign ports as belligerents; and I am alarmed by the evidences here that the proposed shipping board means to put the Government of the United States in the position of giving the protection of its flag to such ships when they sail out. German, or British, or French, or Austrian, or Russian, or what not, the objection is to the purchase of belligerent ships, and, as I have said, that objection has been met by the argument to which I have referred whenever it has been proposed to the gentlemen whom we are about to endow with these vast powers.

But there is another circumstance more potent in its effect upon my mind than the manifest necessities of the emergency which would require the purchase of belligerent ships, more compelling in my mind than the expressions of the gentlemen who are going to transact the business in favor of the right to purchase belligerent ships, more compelling even than the practical admission that that is what they have in mind, and that is the filing of an opinion by the Solicitor for the State Department in the Senate on the 11th of August last. I do not remember the exact date, but the bill to create the shipping board and to endow it with the power to build or buy ships had just been introduced in the House when, on the 11th of August, a paper was presented by the Senator from New York [Mr. O'GORMAN] in the Senate to be printed, and it was printed as Document No. 563, Sixty-third Congress, second session. That paper contained an opinion by Mr. Cone Johnson, Solicitor for the State Department. In support of the right to buy these ships, he states these conclusions:

> 1. Merchant ships of a belligerent may be transferred to a neutral after the outbreak of hostilities.
> 2. If the sale of the ship is made in good faith, without defeasance or reservation of title or interest in the vendor, without any understanding, expressed or tacit, that the vessel is to be retransferred after hostilities and without the indicia or badges of a collusive or colorable transaction.
> 3. But transfer can not be made of such vessel in a blockaded port or while in transitu.
> 4. The transfer must be allowable under and in conformity to the municipal regulations of the country of the neutral purchaser.
> 5. The declaration of the London convention that transfers of an enemy vessel to a neutral during war will not be valid unless it be shown that the same was not made to evade the consequences to which an enemy vessel, as such, is exposed, if it were controlling of the question, relates only to the good faith of the transfer and not to the ulterior motive of the parties to reap the natural advantages to flow from the operation of the vessel under the flag of a country not at war, while it inverts the burden of proof of the good faith of the transaction.

That opinion was dated August 7, 1914. It was presented in the Senate August 11, four days after, almost coincidentally with the introduction of the bill, and it must stand before us as the opinion upon which this legislation finds its claim of right.

Mr. Johnson is a lawyer of character and position, a lawyer of ability, but he says in the conclusion at the close of the opinion:

> This memorandum is hurriedly struck off, and I have not had time or opportunity to revise it; but it is believed that it correctly presents the status of the question involved.

Why "hurriedly struck off?" What exigency called for haste in the consideration of this vastly important subject? The answer may be found by sending our minds back to the fact that it was announced and publicly reported that it was intended to put this shipping bill through then, last summer, during the last session; and this hurried memorandum—a lawyer's opinion that it is all right to buy these belligerent ships—is the basis upon which the legislation proceeds.

Mr. SIMMONS. Mr. President, will not the Senator permit me to interrupt him once more?

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from North Carolina?

Mr. ROOT. Certainly.

Mr. SIMMONS. I wish to ask the Senator if, at the time that opinion was presented to the Senate, the Senate was not engaged in the consideration of the ship-registry bill, and if it was not with reference to the ship-registry bill that that opinion was expressed?

Mr. ROOT. I do not know. I have not looked to see, and I have not cared to see, what particular thing the Senate was engaged in doing. What I do see is that in great haste, coincidently with the beginning of this movement for the purchase of ships, there is presented to us a lawyer's opinion that we have a right to buy these belligerent ships. Therefore, Mr. President, I have come to the conclusion that the international situation is important, that it is serious, that it is our duty to consider it, and that it is my duty to discuss it.

There are two reasons which press that duty upon me with great weight. One is that I find, according to my own opinion, which is fallible, upon which I do not place, I hope, any greater weight than long experience of many errors leaves in my mind, that in the haste which for some reason or other was imposed upon him the Solicitor for the State Department has failed to consider fully the state of the law regarding which he was writing, and has been led, through the inadvertence of haste, to give radically and seriously incorrect advice upon this important subject.

The other consideration which makes me feel bound to ask for the attention of the Senate to my own views of what is the true state of the law is the fact that it happened to be my duty to give the instructions for the Government of the United States to the delegates to the London conference, and to direct their action during all the earlier part of the existence of that conference by daily cable communication, and afterwards as a member of the Foreign Relations Committee of the Senate to discuss and vote favorably upon the report of the conclusions of that conference, and afterwards, as a member of the Senate, to vote to advise the President to ratify. So, sir, when I see that under the law which I am advised we are about to pass it is the intention of the agents whom we shall constitute to buy these ships; when I see that that purpose has been formed and is liable to be executed under what I believe to be an erroneous opinion as to the state of the law and the international situation which they will meet, I feel bound to give the best I can in the

way of expressing and explaining my views of the true condition of the law.

I am going now to say something which most of you know. Some of you may not have given attention to it, however, and therefore I will state the rudiments of the case.

The London conference was a sequel of the second Hague conference of 1907. At this second Hague conference the delegates of the United States, under the instructions of their Government, pressed strongly for the creation of two judicial tribunals which should pass upon international disputes. One was an international prize court, made up by the representatives of different nations, which should pass upon questions of prize—just such questions as are arising now—so that instead of going to the courts of the captor country, which apply the law of that country, with the disadvantages that a claimant naturally has in going into the country of the captor and arguing his case before a branch of the government that has captured his ship, he would go to an impartial tribunal, selected from the various countries of the world. That court was created by a treaty called "the prize-court treaty." The other court was a general judicial tribunal which should pass upon all justiciable questions arising between nations, to be composed of judges who should devote their entire time to it, and be paid adequate salaries, and be a really judicial tribunal. That court never has been constituted, although provision was made for it.

It was not constituted because there could not be an agreement upon the way of appointing the judges, but the prize-court treaty was signed, and that has been ratified by the United States. That is to say, the Senate has advised and consented to its ratification. But when it came to the ratification of that treaty by European powers, there arose a question as to what law the court would apply, and it seemed to many representatives of different European countries that there was a long list of disputed questions that a prize court would have to pass upon, and that in order to make the court effective there must be some agreement upon the law they were to apply—questions relating to blockade, relating to contraband, relating to continuous voyages, relating to the transformation of merchant ships to warships, relating to the transfer of ships from a belligerent to a neutral flag—and accordingly Great Britain called a meeting of the representatives of the chief commercial powers of the world, to be held in London in December, 1908.

That meeting was attended by the representatives of Great Britain, France, The Netherlands, Germany, Austria, Italy, Spain, Russia, Japan, and the United States. I think I have enumerated them all. There were 10 of them. They discussed these difficult questions. There was long discussion upon the question which is raised by the proposal to buy these belligerent ships—that is, the right of transfer of a vessel from a belligerent flag to a neutral flag. The conclusions to which the conference came upon that subject were stated in these words:

TRANSFER TO A NEUTRAL FLAG. ARTICLE 55.

The transfer of an enemy vessel to a neutral flag, effected before the outbreak of hostilities, is valid, unless it is proved that such transfer was made in order to evade the consequences to which an enemy vessel, as such, is exposed.

Then follows a clause which is not pertinent here, and the article proceeds:

Where the transfer was effected more than 30 days before the outbreak of hostilities, there is an absolute presumption that it is valid if it is unconditional, complete, and in conformity with the laws of the countries concerned, and if its effect is such that neither the control of, nor the profits arising from the employment of, the vessel remain in the same hands as before the transfer.

Then there is a clause not relevant here, and then follows:

ART. 56. The transfer of an enemy vessel to a neutral flag effected after the outbreak of hostilities is void unless it is proved that such transfer was not made in order to evade the consequences to which an enemy vessel, as such, is exposed.

Then follow some clauses not relevant here.

You have there, sir, three situations stated:

First. If the transfer is effected before the beginning of hostilities it is valid unless it is proved that the transfer was made in order to evade the consequences to which the enemy vessel, as such, is exposed.

Second. If the transfer was effected more than 30 days before the opening of hostilities, there is an absolute presumption that it is valid, even though it was made in order to evade the consequences to which an enemy vessel, as such, is exposed, provided it is unconditional, complete, and there is no interest reserved. Of course, the declaration that a transfer more than 30 days before the outbreak of hostilities is valid if it is unconditional, complete, and in conformity with the laws of the countries concerned, neither the control of nor the profits arising from the employment of the vessel remaining in the same hands as before the transfer, carries by necessary implication the declaration that a transfer made less than 30 days before the opening of hostilities is not valid, although all those conditions exist, provided it was made to evade the consequences to which an enemy vessel, as such, is exposed.

The third situation is a transfer after the outbreak of hostilities, where the transfer is void, unless it is proved that it was not to evade the consequences to which an enemy vessel, as such, is exposed.

It is the opinion of the Solicitor, who has given that opinion to the State Department, as it has been communicated to us, that these provisions of the declaration of London do not involve any question as to the motive with which the transfer is made; that when the declaration says the transfer shall be valid before hostilities unless it is proved that it was made in order to evade, and that it shall be invalid after hostilities unless it is proved that it was not made in order to evade, it involves no question of motive. Prima facie, one would say that that is all motive; that there is nothing but motive in that provision. A thing done in order to evade is done with the motive of evading. There would seem to be nothing but motive in this; but the Solicitor does not think so, and he has advised to the contrary.

Now, sir, the question may arise, and naturally would arise, Why should we discuss the declaration of London? Why should the Solicitor have given an opinion upon the declaration of London? It has not been ratified. The Senate has advised and consented to its ratification, but before the documents of ratification were ever deposited the war came, and it never has been ratified. The reason why the declaration of London is subject to consideration although we are not bound by it is that England and France and Russia have adopted it with some modifications not touching this subject as their law for the present conflict.

Let me repeat, for the purpose of making myself clear, we are not bound by the declaration of London because it has not been ratified; that is, we are not bound by it as a convention, as an agreement, whatever effect the steps which led to it may have upon the propriety or wisdom of our conduct. The convention which embodied that agreement has not become a binding convention among the nations of the earth. It receives its importance because England and France and Russia have, by express provision, made it the law of those respective countries, and Germany, in an order to which I shall call your attention later, has in substance done the same thing. Her law for this war in somewhat different phrase, but with the same effect, is made to conform to the terms of the declaration of London which I have read.

It may be fortunate for us, fortunate for all who wish to secure freedom of trade, that this is so, because when the Conference of London met in December, 1908, there was no rule of international law regarding the transfer of a vessel from a belligerent to a neutral flag. International law requires the general acceptance of nations, and there had been no general acceptance of any rule by the nations of the earth.

The first thing that was done in the conference was to call for a statement from the different countries regarding their position upon the various disputed points that the conference sought to settle, and I call your attention now to the rules which were stated by the principal countries concerned in the present war.

I read from the proceedings of the International Naval Conference held in London, December, 1908, to February, 1909, printed by the British Government and called "Miscellaneous No. 5, 1909."

I will say that this report of the proceedings has never been translated from the original French, it is not open to access generally, and I think it must have been that the Solicitor in the haste of preparing his opinion has failed to observe the contents of this report, which gives the proceedings, the discussion, and conclusions reached from time to time by the conference. I am sure that if he had read this attentively he would have come to a different conclusion.

I call your attention now to the rules of national law stated by these different nations at the opening of the conference, for that is the background to which we have to go.

France. The change of nationality of ships of commerce effectuated after the declaration of war is null and of no effect.

Russia. The belligerents have the right not to recognize the neutral character of every ship of commerce purchased by neutral citizens from an enemy's state or one of its nationals unless the new proprietor proves that the acquisition had become definitive before he had knowledge of the commencement of the war.

Germany. The neutral or enemy character of a ship of commerce is determined by the flag that it carries. A ship flying a neutral flag will nevertheless be treated as an enemy ship if up to the opening of hostilities or within the two weeks which have preceded it has carried the enemy flag.

There are France, Germany, and Russia. Great Britain and the United States presented an entirely different rule, the rule of complete transfer and good faith. The Solicitor for the State Department has substantially stated what the American rule has been and what the British rule has been, subject to some modifications which it perhaps was not necessary that he should state.

In the conference these two different views confronted each other, the view of France and Russia and Germany that a transfer after the opening of hostilities was void and the view of Great Britain and the United States that a transfer made complete and in good faith would be recognized.

Mr. President, there being no rule of international law, each country applies its own law in such cases. Indeed, when a capture is made it is always made under the law of the captor. That is our law. Our Supreme Court has decided it. It is the municipal law of the captor that is in force when the capture is made.

The courts of England and America have said that the law of nations is a part of the law of the country, and we enforce the law of nations. But here there was no law of nations because no rule had ever been accepted. So as the law stood when this conference opened, if there had been a transfer of a merchant ship from the flag of a belligerent to the flag of a neutral any time after the opening of hostilities the armed ships of France, of Germany, and Russia would have ignored the transfer and treated the vessel as an enemy vessel, notwithstanding the transfer.

Mr. President, that was the law of France when her navy rendered us a service more memorable than any other that one nation ever rendered to another and held the mouth of the Chesapeake and made the surrender at Yorktown possible. That was the law of France then and for all the century and more that has passed. That was the law of Russia on that never-to-be-forgotten day when her fleet sailed into the harbor of New York during the Civil War. That was the law of Germany, whose ships are lying unable to proceed to sea in the harbors of New York, Boston, Philadelphia, and other ports. There was no escape from the capture of any vessel from one of these belligerents by the cruisers of another belligerent which may chance to meet her, notwithstanding the transfer to the American flag, except to compel these great nations to abandon the law they have held for generations.

Mr. WILLIAMS. I should like to ask the Senator from New York a question, if he will yield for that purpose.

Mr. ROOT. Certainly.

Mr. WILLIAMS. Notwithstanding the fact that this was the law of Russia and of France, and it has been the law of those two nations for a long time, have they not agreed during the present war to adopt the declaration of London as their law?

Mr. ROOT. Mr. President, I have already stated that.

Mr. WILLIAMS. Then if that be true——

Mr. ROOT. I beg the Senator not to draw me on by leading me into a discussion of questions, however interesting they are, which arise in his mind, because if I do what I think I ought I have got to go through a rather complicated subject. As I have already said, the significance of the declaration of London is that these countries who started with these perfectly strict and unyielding rules have adopted the declaration of London as their rule for this war.

Mr. WILLIAMS. And have modified their old position to that extent.

Mr. ROOT. They have modified their old position to that extent. So, although the declaration of London is not binding upon us as a convention, although it was never ratified, if we undertake to protect our flag upon a ship purchased from a belligerent we are driven to the declaration of London as the basis on which we must proceed. The old law was much more strict and unyielding than the declaration is, and that is why the Solicitor for the State Department was quite right in giving his opinion regarding the meaning of this provision of the declaration of London, and that is why I am going on to discuss that meaning. I have taken so much time because I have frequently observed the statement about the declaration of London, that it is not binding; that it was not ratified. If we could not have recourse to that declaration of London, these old rules are the only thing we would meet.

We have then reached this position, that these belligerent powers—England, France, Russia, and Germany—will enforce the provision of the declaration of London, and if we object to their enforcing that we come against still worse rules for neutral trade, that is, the old rules which three of them stated at the beginning of the conference. So their adoption of the declaration of London is an advantage to us of which we must avail ourselves so far as practicable.

When the different countries had stated their position regarding the transfer of the flag there was a statement prepared for the use of the conference which undertook to formulate certain propositions for discussion, basing those propositions upon the varied statements of rules by the different countries, and the basis which was formulated for discussion regarding the transfer of the flag I will now read. This is basis 35:

A ship can not be transferred to a neutral flag in order to escape the consequences which its quality as an enemy ship draws upon it.

36. The transfer effected before the opening of hostilities is valid if it has come about regularly. That is to say if it involves nothing fictitious or irregular which renders it suspicious.

37. After the opening of hostilities there is an absolute presumption of knowledge of the transfer which is effected while the ship is in the course of a voyage.

Upon that they proceeded to a discussion. After the discussion proceeded for a considerable time these statements were made by the representatives of Germany and Great Britain. Mr. Kriege, the very able and experienced adviser of the German Foreign Office, who was the representative of that country at this conference, said:

We are in accord with the authors of the summary upon the principle that a ship can not be transferred to a neutral flag with a view to escape the consequences which its quality as an enemy ship draws on it, but in the point of view of existing rights and for considerations of practical order we wish to see adopted the system of our memorandum which would have the double advantage of facilitating the task of commanders of cruisers and of avoiding consequences to neutral commerce.

Mr Crowe, one of the English delegates, explained the principle that was intended to be expressed in basis 35—that is to say, "that a commercial man subject of a belligerent State ought not to escape the consequences of war while transferring his ships under a neutral flag, but the application of this principle it is difficult to find among the memoranda by a rule precise and generally recognized."

There you see that the German and the English representatives were drawing together upon the rule which looked not so much to what we would call good faith as to the purpose for which the transfer was made.

A short time after Mr. Kriege, the German representative, stated with great lucidity the actual point of difference which had been reached by the conference. I read from page 183 of this publication of the proceedings:

Mr. Kriege exposed the manner in which, according to him, this question ought to be treated in the basis of discussion. This exposé, with the motives which have inspired it, is found treated in Annex 73.

A formal paper which he presented. I call your especial attention to it because it was a formal paper and has a very important bearing upon determining the meaning of this declaration. In this paper he says:

I desire to call the attention of the commission to a divergence which appears to exist between the proposition of the United States of America on the one part, and, upon the other part, the propositions of Great Britain and Germany.

Remember that our representatives and the British representatives had presented a rule which called for good faith in the transfer, and now he says:

This is a question of the meaning of the term "good faith." The propositions are all three, in accord to prescribe that the transfers made during a war or immediately before a war are to be made in good faith.

Only it seems that, in the idea of the delegation of the United States of America, the good faith would exist if the agreement relative to the transfer was genuine and definitive and involved nothing fictitious or irregular. On the other hand the German and Britannic propositions understand by good faith the absence among the motives of the transfer of the intention to withdraw the ship from the effect of the right of capture.

You perceive that is precisely what Mr. Johnson in his opinion says does not exist in the declaration. Let me read it again:

On the other hand the German and British propositions understand by good faith the absence among the motives of transfer of the intention to withdraw the ship from the effect of the right of capture.

In the sense of these propositions as according to the original text of Basis 35 the transfer would be null and without effect from the moment when it should have been induced by the desire of the vendor to put himself under protection from the loss which the confiscation of the ship would inflict upon him. The transfer would be, on the contrary, recognized as valid when there was ground to believe that it would have been effected also if the war had not arisen or had not been imminent at the moment of the conclusion of the contract.

After that presentation of the precise point in difference which had been reached between the delegates of the United States on the one hand and the delegates of these other powers, including England and Germany, on the other hand, the subject was submitted to a drafting committee to endeavor to formulate a rule which would be satisfactory, and I now wish to call your attention to the report of that committee. I will say, in order to indicate the materiality of the report, that it contains the rule which now appears in the declaration. It was presented in the ninth session of the commission—that is, with the con-

ference sitting as in committee of the whole—on the 6th of February, 1909. I read the record of proceedings:

The delegation of the United States of America made a reserve on the subject of the first article of the rule—

Which was reported upon the transfer of a flag, and the committee of the whole, the commission, adopted the report with the understanding that the part to which the American delegates objected, upon which they made their reserve, was to be reconsidered, and not deemed as adopted. That reserve of the American delegates appears on page 290 of these proceedings. By reference to it we find that it related not at all to the transfer of the flag after the opening of hostilities, but related solely to the transfer of the flag before the opening of hostilities. They say:

The American delegation regrets to find itself obliged to make a reserve upon the first article of the regulation relative to the transfer of flag. It considers that a rule which says, "The transfer to a neutral flag of an enemy ship before the opening of hostilities is valid, unless it shall be established that the transfer has been effected with a view to escape the consequences which the enemy character of the ship draws upon it," is not in accord with the spirit of modern rules adopted at The Hague concerning war, which have for their end to guarantee the security of international commerce against the surprises of war and wishing, conformably to modern practice, to protect as much as possible the operations engaged in in good faith and in course of execution before the beginning of hostilities.

The report was reconsidered upon that reserve. You perceive the American delegates accepted the rule which related to transfers after the beginning of hostilities, but objected to the rule relating to transfers before. A compromise was made. Under that compromise a new provision making a distinction between transfers 30 days before and less than 30 days before the opening of hostilities was made. Upon that our delegates agreed; that is to say, they got a rule which made all transfers more than 30 days before the war valid if they were real; they got a rule which made all transfers at any time valid if they were not made with the motive of avoiding the risk of war. Before 30 days they were valid, even though they were made with that motive; after 30 days they were valid unless they had that motive. On that they agreed.

When the drafting committee came to make its report to the committee of the whole, there was a full discussion of the question which Mr. Kriege had brought up by his very lucid statement of the different views as to what constituted good faith. That report leaves no doubt as to the meaning of this regulation, and no doubt whatever that the advice which has been given to the State Department and communicated to us as a basis for this legislation is erroneous. The report says—I read from pages 326 and 327 of the proceedings of the conference, translating, I hope, with substantial correctness.

The report has just stated the rules as I have read them, the rules as they were finally adopted. The report says of those rules:

The validity of the transfer is at the beginning subordinated to the accomplishment of certain judicial conditions, having for their object to show that the proprietor has been divested in a definitive manner and without reserve of his title to the ship over which he should preserve no control. If these conditions have not been fulfilled, for example, if the effect of the transfer has been subordinated to the eventualities of the war, the transfer is presumed to have taken place with the intention of shunning the consequences of the war, and it is declared null.

This is simple.

Behold the difficult point. All the juridical conditions have been fulfilled; but the captor is able to establish that the transfer, regular in substance and in form, has been effected with a view to escaping the consequences which the enemy character entails. Will he be permitted to make this proof in order to arrive at the result of declaring the transfer void, or will the intention of avoiding the consequences of the war result only from the failure to accomplish the juridical conditions? It has appeared doubtful to some. It has been recalled that the condition of good faith was exacted in a distinct manner, independently of juridical conditions, and that so, even if these conditions were fulfilled, one could prove that the sale had been made in bad faith; but how is this to be understood? It is a delicate point. The captor evidently will not view "good faith" in the same manner as the vendor. The vendor will consider that he acts honestly if he divests himself regularly and definitively of his ships, because he does not wish to run the risk of losing them by the exercise of the right of prize. The captor will think that there has not been good faith in wishing to escape from the consequences of war. If one considers the simple juridical interpretation, it seems, indeed, that a prize court, in the presence of the proposition reported above, would hold the transfer valid because the juridical conditions had been fulfilled, and would not place itself in the point of view of the captor in order to consider if there had been good or bad faith.

The majority of the committee did not accept this result, and accordingly, desiring an unequivocal formula, the following has been adopted:

The transfer to the neutral flag of an enemy ship effected before the opening of the hostilities is valid, unless it should be established that the transfer has been effected with a view to escape the consequences which the enemy character entails.

There, Mr. President, is a statement as plain as words can make it, that the terms which are used in the rule embraced in the declaration were substituted for the words "good faith" that our delegates were pressing for, in order that the intention to escape the consequences of the right of capture should be a separate and substantive ground for invalidating the transfer. There is no escape from that. There is no man here who could state with greater certainty and lucidity the purpose of the rule than it is stated in this report by Mr. Renault, the greatest of living teachers of international law, and the official adviser of the French foreign office.

That report of the drafting committee was adopted by the Committee of the Whole; it was made by the Committee of the Whole to the conference in plenary session, and it was adopted by the conference. If the conference could have heard read the advice given to our State Department and laid before the Senate as the basis of this legislation, it could not have controverted the conclusion of that advice in more positive and more unambiguous terms. I can find no words in which to show that the Solicitor for the State Department was wrong in his advice so clear as the words of Mr. Renault in this report.

Mr. SUTHERLAND. Mr. President, will the Senator permit me to ask him a question?

The PRESIDING OFFICER (Mr. POMERENE in the chair). Does the Senator from New York yield to the Senator from Utah?

Mr. ROOT. Certainly.

Mr. SUTHERLAND. I understand the Senator from New York to have shown that in addition to there having been payment in consideration and bona fides, in the usual meaning of that term, it must also appear that the ship was not transferred in order that the capture of it might be avoided. If it should turn out that the vendor transferred it with that desire; that is, that he transferred it in order that it might not be captured, and the vendee did not participate in that intention, would that be sufficient to meet the requirements of the rule, or does it require that there should be a participation on the part of both the vendor and the vendee in the desire to avoid capture?

Mr. ROOT. Clearly, Mr. President, the motive is a motive which is ascribed to the vendor. It is he who is seeking to take his ship out of the danger of capture; it is he who will substitute the valuable consideration that is necessary in place of the vessel that he can not use except at the risk of capture. The vendee prior to the transaction has no motive whatever in regard to the ship. It is the owner of the ship who escapes from the effect that the enemy character of the ship brings upon it.

Mr. WALSH. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Montana?

Mr. ROOT. Certainly.

Mr. WALSH. The distinguished Senator has been giving us the propositions upon this important question submitted by the representatives of the various nations in response to the suggestion of the British Government. As I recall, a statement came from France as well as from Germany. Will the Senator kindly advise us whether the American delegates stated for the benefit of the conference, in response to the invitation, the position of our Government?

Mr. ROOT. Mr. President, the American delegates did not upon this point present any memorandum as to the position of the United States at the outset, but shortly after the discussion began they did present a statement of their views.

Mr. WALSH. They were called upon to make a formal statement of the position taken by their Government, together with the authorities which they desired to submit in support of the view taken. Will the Senator, who then was Secretary of State, advise us as to why our delegates did not comply with that request?

Mr. ROOT. Because the delegates of the United States presented, as the basis of their position upon the whole range of questions the naval war code and discussions of the Naval War College, and it was deemed wiser, as those discussions covered the entire range, not to attempt to commit them to any more definite and precise statement.

Mr. WALSH. Are we to understand the Senator, then, that they did not make a definite statement on any of the seven propositions submitted by the Government of Great Britain?

Mr. ROOT. I do not remember about the others; I have not examined the facts as to them.

Mr. WALSH. Very well. Will the Senator have the kindness to advise us in that connection if the delegates from Austria-Hungary made a statement as to the position of their Government, and, if it is brief, will he give it to us?

Mr. ROOT. They made a statement, and the representatives of various other countries made statements. The delegates of Austria-Hungary made a statement which was much

nearer in its view the position of Great Britain and the United States than it was the position of France and Russia.

Mr. WALSH. My recollection is that the delegates from Austria-Hungary made a statement to the effect that the French doctrine was entirely obsolete and had been disregarded by France.

Mr. ROOT. They did not go so far as that. They said in their statement that it was too strict, and that France had modified it or varied from it in the war of 1870; but we can hardly take the statement of Austria-Hungary regarding the position of France as against the formal official statement of France herself.

Now, I want to give credence to what I have said about what happened in this conference by reading from a distinguished publicist, a professor in the University of Vienna, Prof. von Ferneck, who was one of the Austrian delegates to the conference of London. I read from an article by him in the Handbuch Des Völkerrechts, for 1914. He says, in chapter 5, under the heading "Transfer of the Flag":

It may well be said that this subject, which is perhaps of much less importance to neutrals than that of contraband or of blockade, was the object of extraordinary attention on the part of the conference.

Omitting some irrelevant remarks, he proceeds:

For some time it seemed as though an unanimous solution of this question could not be reached. The reason for this was that the interests in the subject on the part of the powers represented at the conference were of a widely differing character, and that the laws and the customs of different States are dissimilar in important respects. The United States of America, France, Italy, The Netherlands, and Russia recognize without exception the transfer of enemy merchant ships to a neutral flag when the transfer is completed before the outbreak of the war; Germany, France, and Russia declare without exception as null and void any transfer of flag made after the outbreak of the war—these are strict, uncompromising solutions that may indeed be understood from a theoretical point of view, but in practice lead to difficulties.

Several of the powers, among them Great Britain, the American Union, and Germany insisted that in order to be valid in law, the transfer must have been intended in "good faith," and according to the American interpretation "good faith" meant not fictitious, while the other powers understood by "good faith" that the owner himself must not have intended to make it impossible for the opponent to seize the ship.

You will perceive that that answers the question put by the Senator from Utah [Mr. SUTHERLAND], and it states in few words just what Mr. Renault's report says.

The other powers—

Says Prof. von Ferneck—

understood by "good faith" that the owner must not have intended to make it impossible for the opponent to seize the ship.

And so, as Mr. Renault's report said, in order that they might have an unequivocal expression, because there were these two views of "good faith," they put in a rule which states in so many words the second view, according to Prof. von Ferneck, that "the owner must not have intended to make it impossible for the opponent to seize the ship." He proceeds:

By a remarkable argument, the American delegation controverted the idea that the shipowner could not protect himself against the prize law by transferring his ship to a neutral flag.

* * * * * * *

At the second session of the commission, the delegates were evidently eager to reach an agreement that would avoid the harshness of the consequent enforcement of a principle: The transfer of the flag effected before the outbreak of the war should be regarded as valid, the transfer after the outbreak of the war as invalid; in both cases the presumption might be refuted by counter evidence. In the course of the third meeting of the commission the question regarding the elaboration of "special rules regarding the transfer previous and the transfer subsequent to the opening of the hostilities" was referred to the investigating committee. This committee made its report at the ninth session of the commission. The rules which this committee had elaborated met the idea of the agreement, but did not meet with the full approval of the American delegation, for the reason that they did not take into account the thought developed in the declaration referred to above. In order to overcome this difficulty, the representatives of Great Britain proposed at the eleventh session of the commission "in the interest of neutral commerce" to add the following: * * * there shall be absolute presumption of validity, if the transfer was effected more than 30 days before the opening of the hostilities, provided it is in absolute and complete conformity with the laws of the countries interested, and has for its object that the control over the ship and over the earnings resulting from its use does not remain in the same hands that exercised this control before the transfer." To this the American delegation agreed; it yielded in principle, but obtained a practically important concession: The question of "good faith" might be raised only with regard to such ships as were transferred within the last 30 days before the outbreak of the war.

I find, Mr. President, that Italy upon two occasions since the Conference of London has applied the rule. In the Revue Générale de Droit International Public, of September–October, 1913, there is a report of the case of the sailing vessel *Vasilios* and of the sailing vessel *Aghios Georghios*, Greek ships, or ships flying the Greek flag, which had been Turkish vessels at the opening of the war between Italy and Turkey, and had been sold to a Greek citizen, admitted to Greek registry, and were flying the Greek flag. The ships were seized, condemned, and sold. So that we may add Italy to the powers which have adopted this rule of the Declaration of London.

Germany has put herself upon the same basis, in terms which leave no possible doubt. I read from Prize Ordinance of September 30, 1909, published in the Law Gazette of the Empire for 1914, No. 50:

I approve the accompanying prize ordinance, and direct that in the enforcement of the prize law my fleet commanders shall, during the war, proceed in accordance with the provisions of the prize ordinance. In so far as it may be necessary to make exception thereto in special cases, you shall make proposition to that end to me. I empower you to give such interpretation to this ordinance and to make such changes thereto as may be necessary, provided they are not of fundamental importance.

(Signed) WILHELM.

In the absence of the Imperial Counselor.

(Countersigned) v. TIRPITZ.

Dated September 30, 1909. Promulgated at Berlin, August 3, 1914, the date of the beginning of the war.

The ordinance, Section II, is as follows:

Enemy ships and their cargoes.—With the exceptions specified under 6—

Which are not relevant here; they relate to cartel ships, hospital ships, etc.—

With the exceptions specified under 6, enemy ships are subject to capture.

Ships are adjudged enemy or neutral ships by the flag they are entitled to carry.

The flag which a ship is entitled to carry is determined in accordance with the flag law of almost all maritime states from an official document that any merchant ship must have on board.

If the nationality of a ship can not be readily established, and especially if the document required in accordance with the flag law of the respective state is not in evidence, then the ship shall be considered as an enemy ship.

Ships that after the outbreak of the hostilities have been transferred from the enemy to the neutral flag are also to be considered as enemy ships—

(a) If the commander is not convinced that the transfer would have followed, even if war had not broken out, as, for instance, by succession, or by virtue of a construction contract.

(b), (c), and (d) pertain to matters which are not relevant.

That points to the German understanding of the rule; and I will say that in the final report of the London conference, which is printed in this document containing the solicitor's opinion, an illustration is given of the meaning of the rule—that is, for instance, "in case of inheritance."

Applying these illustrations, the rule becomes plain. The ordinary trade in ships is not to be prevented. Trade in the ordinary course of business is not to be prevented. The ordinary devolution of property is not to be interfered with. If the owner of a ship belonging to a belligerent dies, the property may devolve upon a neutral. The rule does not prevent it, and the neutral flag will protect it. If you or I have ordered a ship from a shipyard in Germany or Great Britain, and the ship is constructed, and we take it, if the ship was ordered before the war and the transfer was made after the war that transfer is manifestly in the ordinary course of business, as the German rule says, under a construction contract. But none of these great nations will permit a citizen of an enemy to rob it of its prize by transferring to a neutral the ships it is entitled to capture on the high seas.

Mr. President, we are not bound by that; but that is the state of the law of England, France, Germany, Russia, Italy, and I presume the allies of these countries, and that is what we have to run up against if we buy these belligerent ships; for of course no one will contend for a moment that the Hamburg-American Line or the North German Lloyd Line is selling its ships in the ordinary course of business, or for any reason other than that they can not go out on the ocean and carry on their business, and no one would doubt it if we were to buy a British ship and put it in the Bremen trade or the Hamburg trade. There can be no purchase now of ships that have been lying idle six months, under the conditions of this war, that is not stamped with a purpose that invalidates the transfer under the rule of the declaration of London equally with those old and more severe rules which were presented at the beginning of the conference.

But, Mr. President, I have been considering this subject as if an American citizen were to buy. I have said about that, that we are not bound by the rules of these countries. We are at liberty to say: "Our rule is different, and we insist upon its being applied." I have always believed in that rule, sir. I believe in it now. I instructed our delegates to the Second Hague Conference to urge upon the conference the immunity of all private property at sea in time of war. Our delegates fought loyally for the rule which our courts applied, and which is in furtherance of that beneficent and liberal rule. But there is the law of Europe, and against that we will come; and I repeat, it is their law that will be enforced in the treatment of this subject. We should be left to protest and attempt

to get them or some court of arbitration to abandon their rule and adopt ours. How easy it would be, sir, for us to bring that about through the voluntary action of any country or the action of any court of arbitration, in view of the fact that they have adopted the rule of the declaration of London to which our delegates finally agreed, to which our Government agreed in sending it to the Senate for ratification, and to which the Senate agreed by advising and consenting to the ratification, I shall not discuss.

But, says the Secretary of the Treasury, the Government of the United States could not be involved in any difficulty if it were to buy these ships—that is to say, if this proposed corporation were to buy the ships:

> Some timid people have argued that if the Government is interested as a stockholder in a shipping company, and a ship of such company should be seized by a belligerent and brought into a prize court, the sovereignty of the Government would be involved. There is no ground whatever for this view.

I am sorry to write myself down in the category of timid people, but I must, for I do not agree with the Secretary of the Treasury in the idea that there is no ground whatever for this view, and I am filled with apprehension by the idea of putting these vast powers into the hands of a man who thinks there is no ground whatever for that view.

A question was put to the counselor of the State Department, Mr. Lansing, before the Committee on Naval Affairs of the House. I read from the hearings on Senate bill 5259 and H. R. 5980, dated August 20, 1914:

> Mr. WILLIAMS. The first question that we want information on, as a legal proposition, is the liability that would attach to this Government if the Government itself was operating a line of steamships engaged in the transportation of goods to South America and to European countries compared with the liability of a steamship company or an individual engaged in the same business. Can you give us some information along these lines?
>
> Mr. LANSING. I suppose you refer to neutrality and to the question of contraband?
>
> Mr. WILLIAMS. Yes, sir.
>
> Mr. LANSING. I think that the transportation of contraband to a belligerent port in a public ship of the United States would go much further than the mere matter of liability, and that it would be regarded as an unneutral act.
>
> Mr. WILLIAMS. That the United States transporting goods to English, French, or German ports would be a violation of neutrality?
>
> Mr. LANSING. I think it might be so regarded.

That is what we have to deal with. That is what the Secretary of the Treasury does deal with in the words I have read from him. He says:

> If the Government operated ships outright, just as it operates the vessels of our Navy, an awkward situation of this character might arise; but where a nation is merely a stockholder, or the sole stockholder, in a private corporation, its sovereignty is not and can not be directly involved if the ships of such a corporation become the subjects of litigation in a prize court concerning any issue which does not involve the Government itself. The Government would stand in relation to such a corporation exactly as any individual stockholder does to a corporation in which he is interested. A suit against the corporation does not necessarily involve the shareholders.

Mr. President, that is not the law as it has been understood by the Government of the United States, or as it has been applied. In the Delagoa Bay case our Government went straight through the legal fiction of a Portuguese corporation and asserted and enforced the rights of American citizens who were stockholders of that corporation precisely as if they had been the owners themselves. The British Government did the same thing in the same case. Time and again the rule which was established in that case has been applied to the affairs of these legal fictions which give to the real owners of property the municipal right of succession and limitation of liability and the use of a corporate seal, etc. Of course, Mr. President, it stands to reason that a municipal statute giving to A and B and C rights to sue and be sued in corporate form and to have limitation of liability and to act through a seal are no concern of another Government if A and B and C, through that form, have injured or affected the rights of that other Government. The idea is idle and baseless that the Government of the United States, by the exercise of its vast national power, can wrest enormous funds from its people by taxation, can use those funds to withdraw from Germany's right of capture British ships and from France's and Great Britain's right of capture German ships, and say:

> I can not be called to account because I have made a statute under which I protect myself by a legal fiction, calling myself a trading corporation.

Ah, no! the real and serious affairs of this world are not conducted in that way. Whatever we do through this corporation that we create and own, we do as a government, and are responsible for as a government.

In the case of the *Parlement Belge*, which was referred to the other day by the Senator from Massachusetts [Mr. LODGE], the courts of England were called upon to consider the effects of government ownership. The Government of Belgium owned a boat plying across the channel from Ostend to some British port, much like our municipal ferries, and the question was raised, that being a trading boat engaged solely in trading operations, whether it was to be treated as subject to the laws relating to trading ships or was to have the immunities which pertained to government ships. The court below held that it was subject to the laws relating to trading ships. The court above reversed the decision, and held that, being the property of the Government of Belgium, it was immune from the English laws relating to trading ships. The reality of things, sir, prevents us from escaping by any possibility from responsibility for the use of our national power to withdraw any belligerent ships that we may now purchase from the right of capture on the part of the other belligerents, whether we proceed by the fiction of a corporation or directly.

There is only one possible escape from the condemnation and forfeiture of a prize court for every ship of this kind that is purchased. That is the possible protection of the sovereignty of the United States, preferring to occupy the position of violating neutrality rather than to submit to condemnation.

What is the meaning, sir, of the violation of neutrality? It means taking sides in the controversy. It means helping one belligerent against another. It means that after all our proclamations and our efforts we abandon the attempt to be neutral, and we take sides in the great conflict; and we can not stop. We can not measure the number of steps. One unneutral act by us will lead to acts by others that will compel further acts by us, more acts by others and more by us and more by them, until we are in the thick of the controversy.

Remember, sir, the condition of the world to-day. I am arguing against the Government of the United States buying, not a ship, but an international quarrel with every ship. Somebody said to me: "It is buying a claim, not a ship." No. It is buying a quarrel, not a ship; and I say, remember the condition of the world. Recall to your minds all that you have read during the past six months of the condition of feeling on the part of the people in all these countries—England, Belgium, France, Germany, Russia, Servia, all of them—tense to the highest degree, in that condition of exaltation which holds prudence for naught.

Why, sir, we were ready to fight, from Mason and Dixon's line to Canada, on the instant, when Mason and Slidell were taken from the *Trent*, and Great Britain mobilized her fleet. It was ruin for the North if we fought—certain ruin. We could not stand against the gallant South and against mighty England. Our blockade would be gone; but we were ready to fight, because every heart of the North was full of emotion, and every nature was tense with feeling, and we cared naught for prudence. That is Europe to-day.

If we are going to maintain our neutrality we must hold close to it, and keep out of all needless causes of controversy. And let us remember ourselves. We have kept, hitherto, a united America. We have stood behind the President in his neutrality proclamations. Here and there fault has been found on one side or the other, but we have stood by him; but do not forget that there are here millions of Germans who love their fatherland, and I honor them for it. I should think less of them if their natures were not awakened by the peril and the stress of the land that gave birth to them and their fathers. They are alive and tense. There are millions of men of English blood, born and bred with a love for Anglo-Saxon liberty and the laws that we inherited from England. Do not imagine that they are not thinking and feeling, and if you precipitate this country into a controversy where Europe feels and acts upon the feeling that we have taken sides we will rend ourselves.

No; the only safe course is to keep out of unnecessary controversial questions with as great care and conservatism and caution as possible, for we never can tell where a controversy will lead us.

Mr. President, I deeply regret that any shade of party politics has fallen upon the consideration of this measure. We have in the Senate long felt that it was our duty to lay aside party when we reach the water's edge. We have considered the terms of treaties and advised the President, of whatever party, in accordance with the best of our judgment and our conscience. When we have reached the water's edge we have said we leave party.

This bill proposes a business which is all beyond the water's edge—international in its aspect and in its purpose. It is international at a time of intense emotion and certain controversy. I wish we could have considered it—I wish we could consider it now—as Americans earnest for the peace and prosperity of our country, forgetful of party.

Mr. President and Senators, there is no crime against our country so wicked as the crime of conducting our international relations with a view to party popularity. The two considerations are incompatible and can not exist at the same time in any mind. He who has charge of our foreign affairs must deal with them regardless of the effect upon his political future or his party's advantage or he can not deal with them as the public safety demands. The man who is considering his political future and his party's advantage should keep out of foreign relations. The two can not coexist.

One incident for which I impute blame to no one has recently happened which illustrates what I say. The note that was sent by our State Department to Great Britain a short time ago regarding the search for contraband, endeavoring to remedy serious evils of delay and perhaps indifference in making the search for contraband, which is admittedly the right of belligerents, was a moderate, a reasonable, and a proper note. No one in the world had a right to find fault with it. But before the note was delivered in Great Britain and before it was made public here the newspapers were filled by somebody, I do not know whom, with an account of it, far, far from the truth, with an account of it which pictured the administration as standing up against frightful odds and dreadful danger for a view of American rights which no serious student of international law ever thought of asserting and which the note did not assert. Both this country and England were filled with an erroneous view of that note and that erroneous view persists. It could have been given for no other purpose than a political purpose and it was a crime against the American people and against the peace of the world to misrepresent it.

I will not proceed. I will not specify or illustrate further. I will close what I have to say by expressing the most fervent hope that we may deal both in this great deliberative body and in the executive department of the Government with this serious, grave question as lovers of our country with all the wisdom and experience and ability that we can bring to our country's service.

Mr. WILLIAMS. Mr. President, it is seldom that the Senate of the United States listens to the Senator from New York [Mr. ROOT] without being instructed as well as pleased. I take it for granted, Mr. President, there are none of us here who do not want the Government of the United States to be absolutely and strictly neutral as regards the pending hostilities in Europe. I take it for granted that there is no good American who will not be neutral himself, and I apprehend, as the Senator from New York does, some danger of our being self-rent because of our various European derivations. Back in Washington's administration a traveler from Europe said he "could find no Americans, he found either Frenchmen or Englishmen"; but, notwithstanding that fact, Washington, as President, and Jefferson, as Secretary of State, held the helm firmly and this country escaped being mixed up with the European wars. Just so now, Woodrow Wilson and William J. Bryan will hold the helm of the ship of state steady and firm on an appointed American course and hold us free of European international entanglements.

I find to-day that there are in America so-called German-Americans who are very much more German than they are American, and some so-called French-Americans who are very much more French than they are American, and some American citizens of English and Scotch derivation who, although they do not hyphenate themselves, are yet behaving as though they were very much more English and Scotch than American. But all these do not amount to much. They are merely the negligible fringe. The great body of the people are Americans first, no matter what their original derivation was, and they are going to remain so, and they are going to remain in absolute sympathy with an administration which holds the helm down hard and prevents the American Republic from being mixed up with these troubles. Some of these people are trying to get us into war now. Several newspapers—and I might mention some which are not a thousand miles from here—are writing editorials every now and then in which there seems to be a purpose of dragging the United States Government into trouble with one or the other of the European powers.

All that is very true, Mr. President, but, upon the other hand, Americans have their rights. The rule is that a neutral has a right to trade. The exception is the belligerent's right to interfere. His right to interfere, luckily for us at this time, is based upon express law and agreement. It can not be said by the Senator from New York or by anybody else that if the Government of the United States proceeds to protect its commerce it is thereby unfriendly to anybody anywhere.

Mr. President, the Senator from New York says he is sorry to see, or he would be sorry to see, any partisanship injected into this discussion. In heaven's name, who injected it? The gentlemen upon the other side of the aisle did. The legislation had no sooner been broached than they proceeded to act almost as a solid party against it. Before there had been any discussion or any argument or anything else a little coterie on that side of the Chamber proceeded to declare that we would have to stay here until the 4th of March, or made a similar declaration, if we passed this legislation. It is not our fault. They declared war. They made this a partisan question. They did it in the interest of the present owners of ships.

The Senator from New York has erected a man of straw, as I shall proceed to show after a minute; but, first, before I go to that I want to say a few words about what the Senator said of personal import.

Mr. President, it is lucky that hard words do not break bones, even when the hard words are pronounced ex cathedra by men who are ex-Secretaries of various departments and ex-presidents of conventions, where the business of decreeing by the way of the voice of a so-called "brutal majority" seemed to strike no terror to them.

Ex cathedra, ex-Secretary, or ex-permanent or temporary convention chairman—it is all one—and all embodied in the Senator from New York. They are all exes. All have worked by "decree" of the majority. Witness the Republican convention of 1912.

But to come to the personal issue so unnecessarily raised by the Senator from New York. The Senator from New York accused me of being guilty of "effrontery." Consider that, now! In what consisted my effrontery? In denying and disproving the assertion of the Senator from Michigan that none on the other side of this Chamber had been filibustering, that none of them had been speaking merely to consume time. Of course, the Senator from New York, with all his ex cathedra utterances, knows that I was right and there was no "effrontery" in asserting the truth and in proving it. You have been filibustering. You are filibustering. You have been and are speaking to consume time and not in honest debate.

Besides that, I am not the sort of a man to be guilty of effrontery. It is a sort of thing that never occurs to my mind nor to any other sincere mind concerning me. What self-satisfied complacency of temperament it must take to accuse a man of being guilty of effrontery because he has asserted that you Republicans were filibustering. Not one of you on honor in private conversation will deny it.

Then the Senator from New York accuses me of disrespect to the Senator from Ohio [Mr. BURTON] and the Senator from Massachusetts [Mr. WEEKS] because he says I said "their speeches were not worth listening to." I did not say exactly that. My recollection is that the Senator from New York was not in front of me when I was speaking, anyhow. He is generally out of the Chamber. He was not paying any more attention than a good many of us who were discussing the issue had been paying attention to the speakers who afterwards or before were merely consuming time.

What I meant to say, and what I do say, is that no speech nine hours long is worth listening to, I do not care who made it.

Mr. RANSDELL. Thirteen hours long.

Mr. WILLIAMS. I am informed that one of them was 13 hours long. I thought it was 9 hours. It covers 65 pages of the RECORD. The man who would pretend that he was wise enough to speak intelligently enough to fill 65 pages of the RECORD, and that it was all worth while, would be getting a reputation under false pretenses, because God never made anybody that wise, and I do not suppose He ever will.

I have listened frequently with very much interest and attention to both those Senators. I served with them on the other side and on this side, and I have in my time obtained much information from them; but the minute I find a man piling a whole lot of books on his desk with the idea of taking up all the time he can, then I retreat to the cloakroom, and I have no apology to make for it. Life is too short and art is too long for me to be wasting even my insignificant attention upon perfunctory efforts of that sort.

The Senator from New York seems to be astonished at two things—the unprecedented character of this legislation, and the unprecedented methods to which we are resorting in order to carry it to its consummation. I do not remember whether the Senator from New York was Secretary of War at the time or not, but in an administration where he was in the Cabinet the United States Government proceeded to purchase and to operate a line of steamships between New York and Panama, and the Government of the United States is now operating it, just as we propose to operate these ships, under "the fiction of a corporation," as he calls it, the stock being voted by a man in the War Department. So the measure is not unprecedented.

I do not remember how the Senator from New York voted on the question; I remember how I did; but it has not been long since we authorized the United States Government to buy and operate a railroad up in Alaska—$30,000,000—for a few thousand people. Whether what we are doing is right or wrong it is not unprecedented therefore.

Now, as to the method of meeting your method over there. Is that unprecedented? We are meeting unprecedented talk by unprecedented silence. The Senator from New York quarrels with us because we do not talk. I have heard of men quarreling with others because they did not let them talk, but I never heard them quarrel with a man because he did not talk. If you can not win this debate and impress the country with the solidity of your arguments and the justness of your views when we keep quiet, what sort of fix would you be in if we talked? What would be your fate?

If all that gush by the Senator from New York had not been pronounced solemnly and in the ex cathedra, ex-Cabinet member style, people would have laughed at it; but I did not see a ripple of amusement on either side; I looked around at the time to see if I could. Such is the force of dignity! Such the force of a combinaiton of exes!

The Senator from New York said the Senator from Missouri [Mr. STONE] said, "We have the votes." Yes; but in Heaven's name what good would that do us if we fall into this trap you set of helping you to consume the time between now and the 4th of March? Shall we be forced by solemnity of utterance to be particeps criminis in that crime against time and American commerce!

Is this the first time in the Senate of the United States when the minority wanted to filibuster that the majority passed a self-denial ordinance and kept its month not altogether but comparatively closed? So there is nothing unprecedented in the method, either.

The truth is we on this side have made up our minds to put through certain legislation. Most of you on that side have made up your minds that we shall not do it if you can help it. All we are asking is a vote, and what you are doing is preventing a vote or trying to prevent it. We shall continue to try to force a vote. The Senator from Missouri was justified in saying, "We have the votes," but if you think we have not the votes—and some of your newspapers and treasonable Democratic papers say we have not; they say there is a great disintegration over here—then why not let us have a vote and beat us and be done with it and get through with it now?

I never received as high a compliment in my life, I never heard as high a compliment to this side, and I appreciate it, because I was one of them, as the pathetic appeal of the Senator from New York this morning that we should talk. It is the first time in my life I ever had anybody to indulge in pathos while begging me to talk, and I never heard Republicans pathetic before in my life while begging Democrats to talk.

You do not know what you are doing. We might take you at your word, and if we did, you would be as much punished as we have been here in the last three or four days by long-winded, senseless speeches, and most of you would defend yourselves in the same way that we did—by going into the cloakrooms or over into your offices to dictate letters or do something else, and I can not say that I would blame you very much.

Then the Senator from New York said that after we introduced this bill we brought in a substitute, as he called it, "an entirely new bill." Of course, the Senator from New York knew we had not done that. The Senator from New York took advantage of the letter. Of course, in a parliamentary sense, we did bring in a bill striking out all except the enacting clause, and substituting for it another bill, but of course the Senator from New York knew that the substitute was, nine-tenths of it, a repetition of the original bill, and only in a parliamentary sense could it be said to be a new bill. Yet the effect was sought to be made upon the country that we introduced an entirely new bill; that we knew so little about what we wanted that we introduced one bill, then threw it out—threw it in the wastebasket—and brought in another, a new and a different one. The old bill and the new bill are just as nearly one as the Senator here before me is the same that he was three weeks ago, although in the meantime certain changes have taken place in the color of his hair, his complexion, and the inside blood and muscles in him.

Now, Mr. President, the Senator makes use of a phrase. Those of you who know stupid human nature know how important phrases are in life. He accuses us over here of "a conspiracy of silence." Do you know what the American people would like above all things in the world? I will tell you: That the whole blessed Congress would enter into "a conspiracy of silence"; that is, if the Senator means by that a conspiracy to keep silent more than they do or have done.

But what is this "conspiracy of silence"? From the phraseology of the Senator from New York and from his manner of saying it you would imagine it was a crime of some sort. In other words, the man who does not speak—and, according to the Republican precedents and examples, 13 hours or 9 hours or 7 hours—is guilty of a crime against this august parliamentary body. This body has a reputation of being an exceedingly talkative body, but this is the first time I have ever heard that to keep silent in it was treason to it. But the Senator seems to think so. We are just simply trying to keep from participating, from being particeps criminis, in an attempt to obstruct and delay and hinder the business of this body.

But the Senator from New York is mistaken when he says that no argument has been made upon this side. The Senator in charge of this bill [Mr. FLETCHER] opened it with a statement—and a very clear and a very complete one—accompanied by a very good argument, and thus far it has not been replied to.

As I said the other day, "enough is as good as a feast." If a man could in 10 or 15 minutes make an argument that somebody else can not reply to in 13 hours, why should he consume even 10 or 15 minutes more? Why should his friends add perfume to the violet?

The Senator from New York this morning indulged in some real discussion himself. He says that discussion is "stimulating." Yes; discussion is, if it is real discussion; but discussion merely to consume time is not stimulating. It is sleepifying, somnolent. It is of exactly the opposite effect. No man can be safely stimulated for 13 or 9 or 7 hours without intermission. I have listened a hundred times to the Senators, whom I was not criticizing, but whose consumption of time merely I was criticizing, and have found what they said edifying, interesting, and to me, at any rate, very instructive and pleasing. Whenever they are in earnest they are all that; but a man who has such mental ability that he can handle a great subject in two hours with interest becomes uninteresting and an all-around bore when he occupies 13 hours or 9 hours. Daniel Webster, if he had tried speaking that long on a stretch, would. Patrick Henry could not have done it if he had tried.

Let us talk common sense. We have not deprived you of any opportunity over there. You can talk all you please; we could not keep you from it if we would, and we would not if we could. All we are doing is giving you an hour's extra time every day to talk. We are, indeed, giving you "the morning hour"—two hours nearly—and after a bit we will give you two hours more at night, and then maybe after a while we will give you from breakfast to breakfast; but we are not going to say at any time in this discussion that you shall not talk. On the contrary, the more you say you want to talk the more time we are going to give you to talk in. Nobody can be more indulgent than we. I can imagine nothing more kindly than that. Nobody, moreover, has deprived you of any right of offering any amendment to this bill, or of having it adopted, provided only you let the Senate vote on it and a majority of the Senate votes with you.

Now, Mr. President, to come to some points in the discussion of the question itself. The Senator from New York says that the Secretary of the Treasury "admits that this will be a losing business," if we go into it. The Secretary of the Treasury did say that upon some routes it would be during the period of organization, and for some time, a losing business. But a losing business, Mr. President, to whom? To the Government? Perhaps. To the people of the United States? No; for we are now paying $16,000,000 a month unnecessarily for ocean freight. In four months and seven days we would save enough to the American people upon ocean freights, as they are now, compared with what they formerly were, to pay every dollar of this $40,000,000 back if we lost it all; and nobody contends that we would lose it all. It is not a losing business, even for the Government, to that extent. If it were a losing business, I do not suppose we would lose over 10 per cent or 15 per cent in that time. There are two sorts of losing businesses; one is a loss to the Government and the other is a loss to the people. The idea of any Republican standing up here and talking about not taking over a losing business! There never was a protective tariff passed since the world began that was not predicated upon the assumption and assertion that without the assistance of the taxing power the business protected would be a losing business; and in that case, when it is protected, who loses after it is protected? The people. In this case, if anybody loses it will be the Government, while the people themselves gain manifold that much.

The Senator from New York said that our wheat was selling at such and such a price and our cotton at 8 cents, and when he said cotton was selling at 8 cents he looked as if he thought you

and I were getting rich. It costs about 10 cents to make cotton. The Senator from New York thinks we are getting awfully rich with cotton at 8 cents, and therefore he says all the legislation we try to pass upon this side has proven itself to have been unnecessary. What an encyclopedia of ignorance about cotton is he not the author of?

Mr. President, I will call attention in a few moments to a few things about freight rates; but to take cotton alone, where the freight rates upon cotton prior to the war were 30 and 35 cents a hundred, which would be from a dollar and a half to a dollar and seventy-five cents a bale, the freight rate now is from $13 to $17 a bale.

Yet the Senator from Ohio [Mr. BURTON] spent hours upon this floor trying to prove by affidavits and letters and certificates of interested persons that there was not a shortage of tonnage to carry our frieght. What could have accounted for this immense increase in freight rates except a shortage of tonnage? The very day that the Senator from Ohio was making that speech—the very day and the very day after he made a part of it—the Washington Post's news columns were full of statements of the fact that the railroads going into several ports in the United States had refused to receive any more grain or foodstuffs because the warehouses were full and there was no ocean tonnage to carry them abroad. That was another lesson in the futility of receiving the affidavits and certificates of interested persons, whose testimony can not be relied upon from the very nature of the case.

One thing I want to go into especially. The Senator from New York says that the only ships we can buy are German ships. Why, Mr. President, that is not correct. Norwegian, Swedish, Danish, Dutch ships, and ships from other places are for sale. That is not all. Ships adapted to the foreign trade now engaged in our coastwise trade are for sale. That is not all. Tramp ships are for sale.

The tramp ship is a peculiar thing and has a peculiar utility in the commerce of the world. The great steamship lines can enter into a combination, and sometimes attempt to do it, and approximate what we call a trust; but along comes a tramp ship and says: "I want to be loaded with wheat or cotton at this port." So there never has been an ocean transportation trust. The tramp ship kept it from coming into operation. But when great wars come and danger fields on the ocean come the tramp ship flees the danger zone. Why? Because if a vessel is a part of a great company and is carried into a prize court the company can afford to wait for an adjudication and is not ruined, or if damage occur from a war which has taken place the company can afford to wait until it is paid; but where a man owns a tramp ship, and his entire fortune is in it, holding him up for three months or six months will result in his ruin. So he gets out of that sort of trade as quickly as he can and gets into a trade where it is more safe—follows a safer route. So there are tramp ships for sale, tramp ships leaving our trade and gone to other—perhaps East Indian and Oriental—routes. I will show after a while more specifically where these ships are, or I will insert a list of them in the RECORD.

Mr. President, there is, however, this thought back of all this: In my opinion we shall not need to buy many ships to correct this exploitive oceanic freight-rate evil. The German and Austrian ships have disappeared from the sea; they are interned. Many of the British and French ships have been requisitioned or commandeered. Tramp ships have to a large extent disappeared from the north Atlantic trade, especially that part which goes into the North Sea or the English Channel. The consequence of that is that the great lines have been left in command of the situation. The consequence of that is that the great lines have proceeded to act in a piratical or in an exploitive way. I will take back the word "piratical," because it is but natural that they should take advantage of the situation; but they have proceeded to act in an exploitive way. They have raised freight rates up all the way from 300 per cent to 900 per cent, and in some cases, as I shall show after a while, 1,100 per cent. They know they can carry this trade for less, and they know that their pretense for charging all this high price is the fear of mines and the fear of capture is fictitious—a mere pretense. There is not a mine between us and Liverpool; there is not a mine between us and the west coast of South America or the east coast of South America, either; there is not a mine between San Francisco and the Orient. There is no occasion in the world why either the marine insurance or the freight rates should be enlarged upon any of those routes. There is some occasion why it should be enlarged to Scandinavian ports and the ports reached by going through the English Channel or the North Sea, but they have raised freight rates everywhere; they have taken advantage of the situation; they are cutting the throat of American commerce, not alone in the war zone, but south of us and east of us and southwest of us.

What difference does it make that oats should be selling as high as they now are, for example, when freight rates here are 6 shillings 6 pence per bushel, as one man writes to the Secretary of the Treasury he must agree to pay if he ships at all. That is not a freight rate to Hamburg or Bremen, mind you, but a freight rate to Liverpool. It is prohibitive. Of course the man is not going to ship at all. Besides that, the steamship companies tell him that they do not think they can give him tonnage anywhere, because they are carrying other things which are more profitable to themselves.

This being the situation, it is my opinion that the moment the United States Government steps into this arena, panoplied and armed and ready for war—"red-eyed," as a Senator said here the other day—that that moment the major part of this evil, which makes such an emergency, will disappear. How? These people will voluntarily reduce their freight rates in order to keep the United States Government from continuing permanently a line of business which they think would result in great damage to them.

Mr. WEEKS. Mr. President——

Mr. WILLIAMS. One moment. They will not wait for the actual competition, but they will reduce their rates because of the anticipated competition. Whether I am wrong in that or not is debatable, of course. It is a mere matter of speculation and opinion as to the future, but, at any rate, it is my judgment, or the result of my judgment.

Mr. WEEKS. Mr. President, I understood the Senator from Mississippi to say just now that the rates charged for carrying grain were prohibitive. I should like to know how he sustains that contention?

Mr. WILLIAMS. I did not say that. I said that certain rates here referred to from certain ports to Europe were prohibitive. There are other ports. One of the curious things about this situation is that rates are not the same from different ports.

Mr. WEEKS. I agree with the Senator from Mississippi that the rate on a bushel of oats of 6 shillings and sixpense is prohibitive, but there have been 54,000,000 bushels of grain shipped up to the 15th day of January this year more than were shipped last year. Does not that indicate that there is a considerable amount of shipping available for that purpose?

Mr. WILLIAMS. Yes; it does.

Mr. WEEKS. An ample amount?

Mr. WILLIAMS. No; it does not. If I understood the Senator, he asked me if there was an ample amount of tonnage for grain.

Mr. WEEKS. That was part of the question.

Mr. WILLIAMS. Evidently there is not, or the warehouses and elevators in our cities would not be standing to-day chock full of grain and the railroads would not be giving notice that they did not want to carry any more to certain ports.

Mr. WEEKS. Mr. President, does not the Senator from Mississippi know that the difficulty is that of unloading on the other side of the ocean; that the foreign ports are crowded with shipping and that a great number of ships are waiting to discharge their cargoes in foreign ports, and that that is the reason for the shortage of tonnage?

Mr. WILLIAMS. No; I do not. I yielded for a question. I do not care to argue that. I merely made the statement that they could not get the tonnage and that they are not getting it now.

Mr. MARTINE of New Jersey. Mr. President, will the Senator from Mississippi yield to me for a moment?

The PRESIDING OFFICER (Mr. HUGHES in the chair). Does the Senator from Mississippi yield to the Senator from New Jersey?

Mr. WILLIAMS. No; I can not yield. I will yield to the Senator for a question, but not for anything else.

Mr. MARTINE of New Jersey. I only wanted to assure my friend the Senator from Mississippi that the freight rates were not only high, but——

Mr. WILLIAMS. I beg the Senator's pardon, but if I yield to him except for a question I shall lose the floor, and I do not wish to do that.

Mr. MARTINE of New Jersey. I do not wish to take the Senator off the floor.

Mr. WILLIAMS. Mr. President, the Senator from New York and others have taken the position that about the only ships we could purchase were German ships, and then they have taken the position that we can not purchase German ships. Mr. President, so far as the law is concerned, the Senator from New York need not have taken so long as he did to explain it, because the plain law is in the declaration of London. I differ from the Senator from New York about this. He says the declaration of London is not binding upon us. I

say that it is. I say that it is binding upon us for two reasons: First, because we agreed to it, although the mere formality of the exchange of ratifications had not taken place prior to the war. We are, therefore, morally bound by it.

Then I say that the declaration of London is binding upon us for another reason. Russia, France, and England, all three, have declared it to be the rule by which they shall be guided during this war; and the Senator from New York knows that it is a principle of international law that the captor's law is the law of the war, subject only to a trial in a prize court after seizure, and to such treaties as may exist between the two countries submitting such questions to arbitration.

Mr. SMOOT. Mr. President——

Mr. WILLIAMS. One moment. In this particular case the declaration of London is binding upon us, subject only to differences about the interpretation of it—the construction of it.

Mr. SMOOT. I want simply to say to the Senator from Mississippi that, as I understood the Senator from New York [Mr. ROOT], he said that technically people might say that we were not bound by the London convention or treaty; but I do not think the Senator from New York took the position that morally we were not so bound, for his whole argument was based upon that idea.

Mr. WILLIAMS. I do not know what the Senator from New York *meant*, but he *said* we were not bound by it. He is not here; he is pursuing the advice which I gave to Senators the other day—when they did not expect to be entertained to absent themselves from the Chamber, and he is probably right in that. He left immediately after he concluded his speech.

Mr. SMOOT. I think the Senator is probably at luncheon.

Mr. WILLIAMS. I do not know where he is nor what he meant; I only know what he said; and he said that we were not bound by the treaty of London. It is rather late for luncheon.

Mr. President, the law of the case is very clearly expressed; in brief it is this: That as to the purchase of ships taking place over 30 days before the outbreak of hostilities such purchase is absolutely valid; as to the purchase taking place within 30 days before the outbreak of hostilities it is presumed to be valid, but proof can be introduced by the captors to show that the sale was not to avoid the consequences of war, that is not valid; in other words, the burden of proof is then upon the captor; as to the purchase of ships belonging to belligerents by neutral powers, taking place after the outbreak of hostilities, they are invalid; but that, again, is subject to rebuttal by proof, the burden of proof this time being upon the owner of the ship to prove that the sale was not made to avoid the consequences of war. That, in short, is the entire law; and it is contained in articles 55 and 56 and the first part of article 57 of the declaration of London; and any Senator who will read it will find it there as clearly as if he listened to somebody spend three hours trying to explain what it means. I shall put it in the RECORD right here as a part of my remarks. I do not want to detain the Senate by reading it.

The PRESIDING OFFICER. Without objection, permission is granted.

The matter referred to is as follows:

CHAPTER 5.—TRANSFER TO A NEUTRAL FLAG.

ART. 55. The transfer of an enemy vessel to a neutral flag, effected before the outbreak of hostilities, is valid, unless it is proved that such transfer was made in order to evade the consequences to which an enemy vessel, as such, is exposed. There is, however, a presumption, if the bill of sale is not on board a vessel which has lost her belligerent nationality less than 60 days before the outbreak of hostilities, that the transfer is void. This presumption may be rebutted.

Where the transfer was effected more than 30 days before the outbreak of hostilities there is an absolute presumption that it is valid if it is unconditional, complete, and in conformity with the laws of the countries concerned and if its effect is such that neither the control of nor the profits arising from the employment of the vessel remain in the same hands as before the transfer. If, however, the vessel lost her belligerent nationality less than 60 days before the outbreak of hostilities and if the bill of sale is not on board, the capture of the vessel gives no right to damages.

ART. 56. The transfer of any enemy vessel to a neutral flag, effected after the outbreak of hostilities, is void unless it is proved that such transfer was not made in order to evade the consequences to which an enemy vessel, as such, is exposed.

There, however, is an absolute presumption that a transfer is void:

(1) If the transfer has been made during a voyage or in a blockaded port.

(2) If a right to repurchase or recover the vessel is reserved to the vendor.

(3) If the requirements of the municipal law governing the right to fly the flag under which the vessel is sailing have not been fulfilled.

CHAPTER 6.—ENEMY CHARACTER.

ART. 57. Subject to the provisions respecting transfer to another flag, the neutral or enemy character of a vessel is determined by the flag which she is entitled to fly.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Missouri?

Mr. REED. In the light of the speech of the Senator from New York this morning——

Mr. WILLIAMS. I yield for a question, Mr. President.

The PRESIDING OFFICER. The Senator from Missouri understands——

Mr. REED. I am going to ask a question. In the light of the speech of the Senator from New York this morning, in which he intimated that the Senate could not deliberate when its Members are absent, I desire to ask the Senator from Mississippi whether, in view of the fact that on the Republican side of this Chamber there are just 8 Republicans present and 35 absent, he regards the 35 as deliberating within the definition of the Senator from New York?

Mr. WILLIAMS. Oh, yes——

Mr. SMOOT rose.

Mr. WILLIAMS. I will answer the question. I think they are deliberating; I think they are very sensibly deliberating besides, and I would not have them put to the trouble of being here for $10, and I am a poor man. [Laughter.] I would rather they were absent, or at least those of them who do not wish to listen; and I realize that they are not absent out of any disrespect for me, but because they are tired of this whole business, as most of us are.

Mr. SMOOT. Mr. President, in that connection I should like to suggest to the Senator that he count the number on the Democratic side, and he will find about 12 out of 52. [Laughter.]

Mr. REED. Mr. President, that is very true; but it is also true that we have not been letting out a wail like the one that went up from Jericho because Senators are occasionally out of the Chamber.

Mr. WILLIAMS. Mr. President, as a Member of Congress by the name, I believe, of Cobb, from Alabama, once remarked, I have a little trouble finding "where I am at," these interruptions are so irrelevant; but having discovered it, I go on.

The truth is—dwelling for one moment upon the issue which has been precipitated into the argument of the merits of this case—that Senators could not attend to their business at all if they remained in this Chamber all the time while the Senate was in session to listen to the speeches made. As a consequence, when Senators are interested in a given subject, when they are interested in the manner of handling it, and when they are not bored to death by a filibuster like this or something else, remain in a majority in the Senate, although not altogether; but when a filibuster like this or something else of the long-winded character is boring them to death—tired—they leave, and, heaven knows, I do not blame them. The only men who have been solicitous of their attendance on the floor during this debate have been the men who have been speaking—some of them for 13 hours or 9 hours or 7 hours at a time—and I notice that as soon as even they get through, although they are clamoring for somebody to listen to their discussion, they leave the Senate Chamber to a man, as the Senator from New York, lately clamoring, has lately left.

I myself am willing to listen only to myself now and then, but these gentlemen seem to have adopted that as a usual practice, so that when they themselves are not talking they think it well enough to be absent. I am not quarreling with them; it is perhaps a very wise thing to do.

Now, to get back to the question. The Senator from New York says that he is "filled," "appalled," "with apprehension" lest the sovereignty of the United States shall be brought into question by some capture or international dispute concerning one of the ships contemplated to be operated under this bill. Why, how could it be? The ships are to be the ships of a corporation of the District of Columbia. The Government is not seeking to hide behind the corporate name at all, but, on the contrary, by the very fact that it does incorporate the company, is announcing to the belligerents that the vessels belonging to the proposed corporation will be subject to all the rules and regulations of international law that affect any other vessels belonging to any other corporation or to any private citizen. Yet the Senator from New York went on and spent quite a good deal of time in talking about our "withdrawing ourselves" behind "the fiction of a corporation" and in warning us that we could not withdraw these vessels from international law because of the fact that the corporation contains three Cabinet officers. Whoever thought we could? The very object of incorporating was that we should not do so.

About three or four days after the outbreak of the European war I introduced a bill here for the Government itself to buy ships and to operate them or to charter or to lease them. This

bill is better than the one which I introduced, for the reason that it avoids the very rock upon which we might have split and against whose presence the Senator from New York warns us. This is a very much better bill. The only quarrel I have is that we have waited so long for the relief. We might have had this law five months ago; and if we had had it five months ago we would have saved during that five months up to this good hour $80,000,000 in freights to the American people—twice all the money that is called for under this bill—and now Senators are going on and filibustering against it and delaying it, when it is costing about $16,000,000 a month to the American people. Every day that you delay it you are costing the American commerce one-thirtieth of that amount—about half a million dollars a day. Is your love of talk worth that? Is there a man in the Senate who does not know how he is going to vote on this bill? Is there a man here who has not to his own satisfaction studied it from every facet which it can present or which it has presented to him? What right have you to fine the American people this amount of money—about half a million dollars a day—while you are talking about whether or not I have "effrontery," or whether somebody else ought to talk who has not talked, or consuming time to deny that you are filibustering when you know you are?

Now, one other thing, Mr. President, and I shall sit down, because I do not want to take up much time. Senators who have considered the question as to whether we have a right to buy the ships of belligerents have considered it entirely from the standpoint of law. We have no right to buy ships of belligerents after hostilities wherever those ships are sold for the purpose of evading or escaping the natural consequences of war. There is no more doubt about that than there is doubt about the first elementary definition of what constitutes murder in the statute of any State in the Union, but there might arise a question as to what constituted this evasion—whether sale of interned vessels did.

The Senator from New York says that the belligerent nations are not going to consent that they should not "swoop down upon their prey." That is very true; but a German ship interned in an American port within the 3-mile limit or within the port is not subject to become "the prey" of any belligerent power. What is the consequence of that? Great Britain, the chief maritime power, and France, her ally, if they have anything at heart next to whipping their enemy in this war, have at heart the destruction of the merchant marine of their enemies. Suppose that merchant marine is kept in our ports until the end of the war. What then becomes of it? Why, it goes right back to its German owners, does it not? Or suppose a French ship or a Russian ship is interned here. It would go right back to its French or Russian owners. Suppose in the meanwhile it is sold to us, especially when about a third, maybe, of its value has already been taken up in port and harbor and demurrage charges that must be paid at our ports.

It is not a mere question of law; it is a question of diplomacy as well. Knowing, as I think I do, the wisdom of the Government of Great Britain—and it has been a very wise Government, whatever else may be said of it during all the ages—it seems to me that if proper diplomatic efforts were used, both Great Britain and France would consent, and gladly consent, for us to purchase all the German merchant marine that exists on the earth. So it is not a question merely of law.

Mr. President, in connection with the assertions made by me with regard to freight rates, I wish to insert in the RECORD as part of my remarks a tabulation of letters written to the Secretary of Commerce and to the Secretary of the Treasury by shippers and merchants all over the United States, giving the amount that freight has risen. I do not want to read the whole tabulation, but I want to read a few things from it merely to justify what I have said before.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Nebraska?

Mr. WILLIAMS. I do.

Mr. NORRIS. I want to ask the Senator a question before he leaves the subject of the purchase of ships that might be interned in American ports. I want to say to the Senator that that is one thing that, to me, has been a very serious proposition. I believe that it is one of the serious things to be considered, and I am asking the question not in an unfriendly spirit. Does the Senator believe that any of the belligerent nations would consider it to their advantage if some interned ship of their enemy were sold to the corporation to be created by the pending bill?

Mr. WILLIAMS. I have just dwelt upon that a little. If I were an Englishman and sat in the English cabinet—and you can only judge what other people think by what you would think if you were in their place—I should be very glad to see the entire German merchant marine transferred to American citizens; and if I were a German I would be very glad to see the entire British merchant marine transferred to American citizens, provided only they were transferred when they were interned and could not be captured and when, under these circumstances, at the end of the war they would, if not sold, go back to their original owners. Of course, that does not involve their sale on the high seas, where they might be captured.

Mr. NORRIS. Well, it would involve, as I look at it, the question as to whether they would be captured or not. Of course, they might engage in carrying contraband, when they would be subject, like any other ship, to capture; but I am not speaking of that.

Mr. WILLIAMS. I am not, either.

Mr. NORRIS. I want to take it on this ground alone, whether the Senator thinks the interned ships, if purchased by Americans, if they went out on the sea would not be captured by the enemy of the country under whose flag they had formerly sailed?

Mr. WILLIAMS. Why, Mr. Preisdent, in answer to the Senator's question, just what Washington and Jefferson did to maintain neutrality during the French Republic and Napoleonic eras Wilson and Bryan are doing to maintain neutrality now, and I have no idea that this administration and this corporation acting under its tutelage would be stupid or foolish enough to buy a single interned ship of a single belligerent without previously by diplomacy settling the question that the other belligerent would not object.

Mr. NORRIS. Then, if that is the Senator's idea, would the Senator favor an amendment to the bill that would practically put that statement in the act?

Mr. WILLIAMS. There is no use in it. I would not favor an amendment to the bill saying that we should not buy the ships of any belligerent, because I think by diplomatic procedure we can buy them without any probability of trouble.

Now, let me say another thing while we are upon that subject. So far from endangering our neutrality, this passage of this bill is going to help to maintain it. Now, why? Because it is unthinkable that this corporation will ever carry any contraband, and there will be a certificate, under section 12 of the act, stating just exactly what is loaded upon the ship, and her cargo will not be concealed with that certificate carried by the captain.

Mr. NORRIS. Yes; I understand that; but that is not my question.

Mr. WILLIAMS. The sole reason why our commerce has been bothered so much lately is because some ships will try to carry contraband, and some of them will, even worse, try to carry contraband concealed. It is unthinkable that this corporation, with the Secretary of Commerce and the Secretary of the Treasury a part of it and largely controlling it, would permit anything of that kind.

Mr. NORRIS. I agree with the Senator on that point; but I do not think that has anything to do with the question I propounded. Now, I wish to ask the Senator another question.

Mr. WILLIAMS. I answered the other question. I do not think we are going to buy them unless it is agreeable.

Mr. NORRIS. Yes; I understand. If it is the theory of this legislation, however, that we believe our Government should not buy unless it is agreeable to the other belligerents, it seems to me the way to make it safe is to put it in the law itself.

Mr. WILLIAMS. Oh, I should think not, because——

Mr. NORRIS. But there might be a difference of opinion on that point. Now, I wish to ask the Senator another question.

Mr. WILLIAMS. Let me tell the Senator why I think not—because if you set two people to trading—and diplomacy is international trading—and if in advance you tell one party just how far he can go, there is not much room for him to trade in.

Mr. NORRIS. That is true; but the Senator announces publicly that in his judgment they would not under any circumstances do it unless it was agreeable to the other party. I do not see any difference between having that understanding, if that is to be known, and putting it in the law itself.

Mr. WILLIAMS. There is a very plain difference between expressing my opinion here and putting it in the law and saying to all those countries that unless they consent this can not be done.

Mr. NORRIS. The Senator himself says he believes it would be true.

Mr. WILLIAMS. I do not think it necessary to consult all the belligerents. Of course, in theory, they would all be concerned, but the Senator knows that in practice the only ships involved here are the German ships that are interned.

Mr. NORRIS. I presume that is true.

Mr. WILLIAMS. If Great Britain and France do not object, we can purchase them, and there will be no trouble. Germany could not object.

Mr. NORRIS. Germany could not object. Now, I want to ask the Senator another question. Suppose this bill is passed, and an interned ship is purchased without getting the consent of the other belligerents. Is it not true, as a matter of international law, that that ship is subject to seizure?

Mr. WILLIAMS. Absolutely; and the seizure itself is subject again to a hearing in a prize court.

Mr. NORRIS. Exactly; yes.

Mr. WILLIAMS. Or, if there is a question between the two countries that exceeds that in importance, to the decision of an arbitration commission.

Mr. NORRIS. Still, if any arbitration should come out of it, the arbitration commission probably would not pass on it until after the war was over.

Mr. WILLIAMS. No.

Mr. NORRIS. That would come later.

Mr. WILLIAMS. That is very true. Now, if the Senator will permit me, I should like to proceed.

Mr. NORRIS. I wanted to get the Senator's idea of the legal question involved here.

Mr. WILLIAMS. I have given that.

Mr. NORRIS. The Senator says the matter would go to a prize court.

Mr. WILLIAMS. Yes.

Mr. NORRIS. Of course, in a prize court the very legal question itself would be involved.

Mr. WILLIAMS. That and the construction.

Mr. NORRIS. Yes. In the prize court would not the fact that the ship was interned and the fact that it was purchased after hostilities began be conclusive in favor of the right to seize the ship?

Mr. WILLIAMS. No; it would not.

Mr. NORRIS. Would it not always follow?

Mr. WILLIAMS. I will read to the Senator the exact language of the law:

The transfer of an enemy vessel to a neutral flag, effected after the outbreak of hostilities, is void unless it is proved—

Now, that is, of course, proved by the owner. The burden of proof is upon him.

Mr. NORRIS. Yes.

Mr. WILLIAMS (reading)—

Unless it is proved that such transfer was not made in order to evade the consequences to which an enemy vessel, as such, is exposed.

The interesting question arises right there, when a vessel which is interned, and therefore not liable to capture as long as it remains interned, is sold by its owner, a citizen of a belligerent country, to a corporation or citizen of a neutral country, whether it can be said that is was sold to evade the consequences of capture, because, per contra, it was not liable to capture as long as it lay interned. To give my opinion on that interesting question, if I were a part of the court, I would decide that whether it was interned or not they had to prove more than the fact that it was interned in order to escape this declaration that that transfer was void.

Now, it goes on:

There, however, is an absolute presumption that a transfer is void in these following three cases:

(1) If the transfer has been made during a voyage or in a blockaded port.

That is self-evident.

(2) If a right to repurchase or recover the vessel is reserved to the vendor.

That is self-evident. Of course that would not be in good faith.

(3) If the requirements of the municipal law governing the right to fly the flag under which the vessel is sailing have not been fulfilled.

Those are the exceptions, and that is the law.

Mr. NORRIS. Those are not the exceptions. Those are the cases where there would not be any proof admitted.

Mr. WILLIAMS. They are the exceptions to the right and scope of rebuttal. Now, then, to go ahead, in further reply to the question of the Senator: These vessels are the vessels of a corporation. There is no intent, nor could there possibly be any effect, of withdrawing them in part or in whole from the operation of every principle of international law. They will be just as much subject to condemnation and seizure, and to the same extent subject to it, as a vessel owned by the Senator from Nebraska sailing the high seas or a vessel owned by a corporation doing business from New Orleans to Liverpool. No question of sovereignty of the United States is involved in it to the slightest extent.

In the bill which I introduced I made the United States buy the ships; and I expressed in the bill, first, the pledge of the United States that they would not carry contraband of war, and, secondly, a declaration that the United States would "regard it as an unfriendly act" for any nation to touch one of them. This is wiser legislation, and better in every sense than that proposed by my bill. The very reason why this is a corporation is to escape that very difficulty, which, I frankly confess, I myself at first did not guard against.

When the Senator asks me whether or not these ships would be subject to seizure, of course my reply is that it depends upon what they are doing. If they are doing anything that would subject any other ship to seizure, they will be subject to seizure, and they will have exactly the same right of appeal to a prize court or to arbitration that any other ship would have.

Mr. NORRIS. Now, I should like to ask the Senator if he can give an instance where one of these ships, interned during the war so far, could be sold by its owner with any other object in view than to avoid seizure. The fact that it is interned and that the owner does not take his ship out on the high seas is the best evidence in the world, although it may not be conclusive, that he is afraid of seizure. That is especially true when there is such a demand for ships.

Mr. WILLIAMS. I have already given the Senator my opinion for what little it is worth.

Mr. NORRIS. I wanted the Senator to give me a case, if he could. I am not saying that he could not.

Mr. WILLIAMS. I have already given the Senator my opinion to the best of my ability, which is that if the question were put before me as a judge as to whether the fact that a vessel was interned relieved it from the exemption, I would rule that it did not.

Mr. NORRIS. I think any of us would.

Mr. WILLIAMS. Because, although it could not be seized in a port or within the 3-mile limit, the motive underlying the sale in the mind of the vendor would be to get the use of his ship.

Mr. NORRIS. Yes.

Mr. WILLIAMS. And he could not get the use of his ship on the high seas without the danger of capture. I have stated that twice.

Mr. NORRIS. He has interned his ship with the very object of escaping capture.

Mr. WILLIAMS. I know. I have stated that twice.

Mr. NORRIS. If this bill were passed, and the Senator were in charge of this corporation, and he had the buying of ships by virtue of this law, would he feel that he was justified in buying one of these interned ships without getting in advance the consent of the other belligerents?

Mr. WILLIAMS. I would not.

Mr. NORRIS. That answers it.

Mr. WILLIAMS. In justice to myself, not to be dogmatic about it, I will say that my opinion is worth no more than that of any other lawyer of equal ability, and the opinion of the Solicitor for the State Department seems to be to the contrary; but, as the Senator from New York [Mr. ROOT] showed this morning, I think the solicitor did not have before him a part of these transactions, and I have thought that all the time. But, Mr. President, I have been drawn away from the point somewhat——

Mr. SUTHERLAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Utah?

Mr. WILLIAMS. Just one thing further, please. There is one other point I desire to make, and then I will submit to another interrogation.

The Senator from New York said this morning that where the Government owned stock in a corporation a foreign country would hold that corporation to be the Government. That not only is not justified by the history of the world, but it is denied by it. For example, when the Germans took Paris in the war of 1870-71, they had at their disposal the entire assets of the Bank of France, in which the French Government had more stock and more interest than anybody else in the world; and yet even Bismarck, the very apostle of the doctrine that "might makes right," the man who went further than almost any man ever did in identifying national assets with a government and seizing them when he could, held that the German Government had no right to seize the assets of the Bank of France, and the German Government did not do it, and it was put distinctly upon the ground that it was a private corporation, although the president and the principal officers of the Bank of France were the appointees of the French Government.

Now I yield to the Senator from Utah.

Mr. SUTHERLAND. I wanted to ask the Senator a question in connection with his discussion of article 56 of the Declaration of London, which reads as follows. The Senator has already read it, but I read it again in order to point my question:

The transfer of an enemy vessel to a neutral flag, effected after the outbreak of hostilities, is void unless it is proved that such transfer was not made in order to evade the consequences to which an enemy vessel, as such, is exposed.

If I understand the Senator correctly, he interprets that as though the only consequence to which such a vessel would be exposed would be that of capture.

Mr. WILLIAMS. No; the Senator misunderstood me. I considered that consequence as sufficient in answering the question. Of course, there are other consequences as well.

Mr. SUTHERLAND. Then the Senator concedes what would seem to be the obvious construction of the language, that such a vessel may be exposed to a variety of consequences?

Mr. WILLIAMS. One of which is the consequence of being interned itself.

Mr. SUTHERLAND. Exactly. That is what I was going to ask the Senator.

Mr. WILLIAMS. That is the very reason why, if it were left to my judgment, I would hold that the fact that the ship was interned had nothing to do with it; that it was, notwithstanding that fact, being sold to evade the consequences of being an enemy ship; but better lawyers than I hold to the contrary.

Mr. SUTHERLAND. Then, I will ask the Senator whether, if a vessel is interned in one of our ports, one of the consequences avoided by the sale of that vessel would not be that of having the vessel remain idle in the port, or of going out and being subject to capture?

Mr. WILLIAMS. That is what I say. One of the consequences would be its being interned itself; and of course it follows from that that being interned it can not be earning anything while it is lying idle at the port.

Mr. SUTHERLAND. Then, the transfer of such a vessel, according to the Senator's own view, if I understand it, the mere transfer of such a vessel which has been interned——

Mr. WILLIAMS. Mr. President, I have answered the question which the Senator put to me. Of course I do not think the Senator is asking me the question merely to make me keep the floor, but I have answered that question several times.

Mr. SUTHERLAND. No; I am not doing that.

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). Does the Senator from Mississippi further yield to the Senator from Utah?

Mr. WILLIAMS. Yes; I yield further.

Mr. SUTHERLAND. What I wanted to know—and I am asking the question in perfect good faith—is whether or not it is the view of the Senator, under this language of article 56, that if a vessel belonging to a citizen of a belligerent country is interned, the transfer of that vessel under such circumstances would be in itself a void transfer under the language of article 56?

Mr. WILLIAMS. It would be if the prize court held that such a transfer of an interned vessel of itself constituted "a transfer" for the purpose of "evading the consequences" which would naturally come to it as a vessel of a belligerent country. I have said that if I were on this court and were called upon to decide the question I would hold in the affirmative.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the senior Senator from Utah?

Mr. WILLIAMS. I am ready to yield the floor.

Mr. SMOOT. I wish to ask just one question before the Senator yields the floor.

Mr. WILLIAMS. I have some things here I want to read, and then I want to insert something. Now the Senator can go ahead.

Mr. SMOOT. I was just going to ask a question as to a statement that I understood the Senator to make, namely, that in the war of 1870 the deposits of the Bank of France were held not to be the property of France itself, because it was a corporation. Did I understand the Senator to say that?

Mr. WILLIAMS. Not only the deposits, but all of its assets.

Mr. SMOOT. As I remember, it was held that the deposits did not belong to France; that they belonged to the depositors, and therefore France was not to be held for those deposits. I never heard it stated before, nor did I understand, that it was so held because of the fact that it was a corporation.

Mr. WILLIAMS. Yes; it was held to be a private and not a public concern because it was a corporation.

Mr. SMOOT. That was not what I understood.

Mr. WILLIAMS. The Bank of the United States, in which the Federal Government had a very large share of the stock—I have forgotten how much now—was held to be subject to the private corporation laws of the country.

Mr. President, I do not want to take up the time of the Senate in reading the statements about freight rates, to which I referred a moment ago, to justify or to prove the statements I made. I did intend to read a few of them, but I have been detained upon the floor so long by questions that I shall ask to include them as a part of my remarks.

Mr. JONES. Mr. President——

The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Washington?

Mr. JONES. I rise simply in response to the request of the Senator. I think that information ought to be given to us here in the Senate, and I object to printing it in the RECORD.

Mr. WILLIAMS. Mr. President, I find here a letter from the Garcia & Maggini Co., general commission merchants, San Francisco, Cal., in which they say:

To a great extent these goods have been in New York for a long time, for the reason that our forwarding agents, Messrs. C. B. Richards & Co., could not get any space.

Besides, freight rates have advanced over 300 per cent since the war broke out, and lately, and within 15 days, freights have advanced fully 100 per cent.

This is dated January 5.

I have a letter from William Haas & Sons, who manufacture shovel handles. These other people dealt in dried fruits. William Haas & Sons, manufacturers of shovel handles, say:

For years our entire output has been disposed of abroad, but owing to the present prohibitive tariff in ocean transportation we are unable to deliver our goods; consequently our plant will remain closed down until such rates are established as will enable us to market our goods.

Charles E. Moore, president of the Leaf Tobacco Association, of Baltimore, in a letter of December 28, says:

Some of our exporting members shipping to Holland points have signed contracts with this company, expiring December 31, 1914, for a rate of $3.50 per hogshead of tobacco. This contract has been disregarded entirely, and the rate increased, first, to $5.25; then to $6.85; and to-day a notice that it will be $7.50 until further notice. This, I repeat, in the face of the written contract for $3.50 per hogshead.

Here is a letter from Gano, Moore & Co., who deal in coal, coke, iron, steel, and ores. They say:

The shortage of vessels is so serious now that it is practically stopping the exportation of coal. We have several orders for coal, principally to South American ports, and it is impossible to secure vessels.

Then the Coplay Cement Manufacturing Co., of New York, say:

Before the month of July, 1914, shipments of Portland cement to the Argentine Republic and Uruguay were possible at $2.45 per ton; to Rio de Janeiro, Brazil, $3.60 per ton. These rates were advanced the early part of August 50 per cent, were subsequently reduced so that the advance was equivalent to 25 per cent for the July rates, and these rates have advanced since the latter part of September until now they are $6 per ton to Rio by some lines and $8.50 per ton by other lines; $6 per ton to the Argentine Republic. And notwithstanding these high rates, there is no possibility of obtaining ships, transportation, or accommodation for our product. * * *

Now, remember, this is in the South American trade. There are no mines, no anything else, no question of contraband that can arise at all—no war risk of any description.

Then here is the American Tripoli Co., manufacturers of Tripoli flour. They say:

We have an offer of some orders from Barcelona, Spain, and the first two of the attached letters refer to our efforts to get quoted us a rate from New Orleans to Barcelona; and you will see that the steamship company operating steamers to Barcelona refuse to quote rates at all. In the first letter, the reason given was that other commodities which permit of a higher rate are being carried, so that our material, which must have a lower rate, is not at all desirable, and they even refuse to quote rates at all.

That is on a line between New Orleans and Barcelona, away south of the theater of war. That is the route traveled by those ships.

Here is one from W. B. Cooper & Co., cotton merchants:

Please allow us to indorse the action of the administration in trying to secure boats for the movement of American products.

We are frank to say that as a general proposition we are not anxious to see the United States Government get into too many lines of business, but when 3 cents per pound or more is to be paid freight on cotton across the water against 35 cents per 100 pounds six months ago, it is time something should be done, in our opinion.

Three cents per pound is $15 per bale; 35 cents per hundred pounds, the old rate, is $1.75 per bale. This new rate is $15 per bale, and this is not to a German port but to British ports; Great Britain has control of the sea, and there is no danger of capture.

Then, here is one from Frank F. Fee, president of the Fee-Crayton Hardwood Lumber Co., in which he says:

It is now a serious menace to our business by reason of our inability to get reasonable and in some cases our inability to get any ocean rates on our production of hardwood lumber. We usually ship through the

port of New Orleans to British and continental ports. The writer has been to New Orleans personally and is informed by the steamship agents that they are receiving a tonnage of cotton and wheat and other commodities for the belligerents at such high rates and at such easier loading and unloading that they make tremendous profits for their vessels, and they do not want to take lumber tonnage—

That ought to interest the Senator from Washington, who comes from a lumber State—

We can say that we have before us inquiries for many carloads of lumber which could be shipped immediately, provided reasonable rates could be had. * * * Further, one of the steamship agent's commission for a single month was $25,000.

That is the agent's commission. That shows you what money they are making.

Here is one from M. B. Nelson, general sales manager of the Long-Bell Lumber Co.:

I inclose a quotation from ship brokers issued under date of December 26, showing rates have advanced more than 300 per cent.

Here is one from a provision and packing company:

We are exporters of provisions, etc., to Hamburg, Germany; Rotterdam, Holland; London and Liverpool, England.

Now, mind you—

Early in 1914 we signed contracts covering rates on export freight to London and Liverpool via Atlantic Transport Line and White Star Line from New York, with J. D. Roth, general western freight agent of the above-named lines, in which we are named ocean rate of 20.5 per cent per gross ton. These rates have been raised 10 per cent per gross ton since the beginning of the war.

That is with regard to shipments to Liverpool and London—no German cruisers at sea; no mines on that route.

The Chattanooga Wheelbarrow Co. writes to the same effect.

H. F. Heilman, treasurer of the Levi Smith Co. [Ltd.], lubricating-oil manufacturers at Clarendon, Pa., writes as follows:

Our export business with foreign countries has been quite heavy in past years, and Rotterdam was one of our principal ports and generally made contracts with the Holland-American Line at Baltimore to cover all our shipments to this port during the year. When our contract expired in 1913, we did not think it wise to renew the same at the then high rates, and held back, preferring to ship on the open market; but in March the Holland-American Line insisted on us closing a contract for the year 1914 or else pay the highest open-market rate, making a difference of about 4 cents per hundredweight at that time, and with great reluctance we finally consented to cover our shipments to this port by another contract for the year. * * * Also, inclosed copy herewith of their letter to us dated November 4, notifying us of disregarding that contract and asking an advance of 50 per cent. * * * This contract rate was 22 cents per hundredweight for the year, whereas their latest advice (a few days ago) the rate had advanced for shipments of this commodity to Rotterdam to 70 cents per hundredweight, which is simply outrageous.

Here is one from Brown & Adams, wool commission merchants. They say that the increase has been 150 per cent.

Here is one from Ike Manheimer, engaged in dealing in green and dried apples. He says that they are having much trouble in securing space at all, and that the freight on fresh apples in barrels is equal to the value of the apples.

Here is a letter from the American Vulcanized Fiber Co. That does not make any difference, because that enters into contraband business, I suppose.

Here is one about glue. There is the same complaint there.

Here is one from E. P. McBurney, vice president of the Empire Cotton Oil Co., in which he says that they are experiencing trouble in booking shipments and that inquiries develop that shipowners have restricted their vessels almost exclusively to cotton by charter or at very high rates, because they are getting $15 and $17 a bale. Hereafter you will see that where they ship to Germany they are getting $17.50, and $15 to Great Britain.

The Phoenix Iron & Steel Co., of Galveston, Tex., writes to the same effect.

Stengel & Rothschild, tanners and manufacturers of patent leather, make their shipments to Italy. They say:

We are experiencing considerable difficulties with shipments of our goods to Italy. The normal freight rate for patent leather in cases has been 50s. per ton, with possibly 5 per cent primage, but we have just been asked a rate of 120s. plus 5 per cent for the same class of freight.

That is nearly 150 per cent increase.

L. & E. Frenkel, importers of electrical specialties, write along the same lines.

J. D. Kremelberg & Co., of Baltimore, say that the freight rate on tobacco has been raised from $4 per hogshead to about $27, or nearly 3½ cents a pound, so that tobacco shipments have become out of the question.

R. M. Bryan, eastern manager of the Black Diamond, New York, N. Y., December 30, 1914:

This business—the coal industry—has been almost prostrated by the inability of shippers to secure vessels and upon terms that will permit them to make shipments.

McEwan Lumber Co., Azalea, N. C., December 29, 1914:

Would say that for our part the present rates are practically prohibitive, as they have advanced 10 cents and 15 cents per hundredweight, and in many cases even these rates are not protected except for immediate acceptance and subject to confirmation by steamship lines. * * * It is our information that the steamship companies are giving other tonnage carrying higher freight rates preference, and in some instances are limiting their boats to a certain small amount of lumber tonnage.

Another from Henry Lauts & Co., Baltimore, Md., December 29, 1914:

The present rates charged by this line—the Holland-American Line—are almost prohibitive, and are a decided menace to the tobacco export industry of this country.

V. F. Holmes, estate of Victor Holmes, deceased, exporter of zinc oxide, Boston, Mass., December 28, 1914:

Since the European-war situation developed this business has been very considerably hampered by a number of conditions, among them the scarcity of freight vessels, exceedingly high rates of exchange, and, what is more important, the freight outlook for 1915.

R. R. Dancy & Co. (cotton), Houston, Tex., December 26, 1914:

Last week brokers asked $17 per bale freight to Germany—Bremen. Now $14.

I said a moment ago it was $17.50, I believe; but I was mistaken, it was $17.

Here is a letter from Danforth Geer, president Walter A. Wood Mowing & Reaping Machine Co., Hoosick Falls, N. Y., January 9, 1915, containing a statement that it is very difficult to get tonnage at all, and expressing the hope that some measure may be enacted or some policy created which will relieve the present situation in time to affect their business interests this year.

Here is one from Meyer Hecht, a dealer in skins and hides in New York, who says:

I, too, want to protest that the steamship lines are charging me two or three times as much as formerly and then do not give me room for my shipments.

Dumee, Son & Co., cotton, Philadelphia, Pa., December 29, 1914:

We wish to enter strenuous protest against the prohibitive freight rates being charged by the trans-Atlantic lines on cotton and cotton linters to European ports. * * * One year ago we paid a rate of 45 cents and 50 cents per hundred pounds on compressed and uncompressed cotton linters, respectively, from New York to Rotterdam. To-day we are asked $2.50 and $3 per 100 pounds.

This is a very low quality of cotton, taken off the seed after the cotton is ginned on the plantation. It is taken off at the cotton-oil mill and is worth 2 to 4 cents a pound. Note the freight rate is 2½ to 3 cents a pound—almost fully the value of the product.

Gabriel Nachman, wool stock, New York, N. Y., December 28, 1914:

We are large shippers of woolen rags. * * * Steamship companies have advanced their freight rates from one-fourth cent per pound to $1.10 per hundred pounds, and even at that rate they refuse to take rags; therefore have not been able to ship any for export in over four weeks.

Here is one from C. Stallings & Co., Lynchburg, Va., tobacco exporters.

Here is another from A. P. Husband, secretary Millers' National Federation, Chicago, Ill.

There is attached a tabulated statement of ocean freight rates on flour published by the International Mercantile Marine from several American ports to London, Aberdeen, and Liverpool. You will note that it gives the general freight rates from the named American ports to ports in the United Kingdom—mind you not to Germany or Austria—advanced 100 per cent; not a German cruiser to capture it and not a mine to bother them.

Panama Railroad Co., January 15, 1915. A Government concern, which must have coal to defend the canal and to keep up construction and repair work.

Our stock of coal has been reduced from 90,000 to 40,000 tons, and both the Earn Line and our company are scouring the charter market in the effort to secure sufficient tonnage to carry to the Isthmus the amount of coal it is imperative we should keep there.

Mr. GALLINGER. Will the Senator allow me to ask him a question?

Mr. WILLIAMS. Yes.

Mr. GALLINGER. I have not seen the last draft of the bill—the third edition, I believe it is—but I read that the proposition is that an additional $10,000,000 may be issued, making $30,000,000 in all.

Mr. WILLIAMS. It was unlimited in the first draft. It is limited to $10,000,000 now.

Mr. GALLINGER. Inasmuch as there are hundreds and hundreds of steamships plying the Atlantic, does the Senator think that 25 or 30 steamships would very materially change the rates of transportation?

Mr. WILLIAMS. Yes; I do; but, in addition to that answer, our bill would give many more than 30 ships. Freight ships do not cost a million and a quarter of dollars apiece.

Mr. GALLINGER. England has 12,000 cargo ships, I believe; so the number we propose is negligible.

Mr. WILLIAMS. I have known one tramp steamer that went into the ports of New Orleans and Savannah and lowered the rate of freight on cotton immediately.

Mr. GALLINGER. For the moment.

Mr. WILLIAMS. And then another thing: Do not forget, the shipowners, although in temporary combination, are pretty well frightened by the idea of the United States going into this sort of policy permanently. As far as I am concerned, I hope to heaven it never will; but they are afraid the United States will go into it, and they are going to reduce freight rates and try to prevent it and make the venture upon the part of the Government a losing venture, and, if they do make it a losing venture, then the people will profit by the Government's loss.

Mr. GALLINGER. I have noticed it is the opinion of a distinguished expert that to have ships enough to transport our products to foreign countries and bring back our imports it would take at least $600,000,000 to purchase the ships.

Mr. WILLIAMS. I do not know about that. I have not looked into it satisfactorily, but I have looked into it far enough to be able to state, I think, that it will not take that much. But that has nothing to do with this measure. It would take a large amount of money in comparison with $40,000,000, but not that much. That was one of the statements made by interested parties hostile to this legislation, like a statement made on the same authority by a Senator here on the floor that there was a surplus of tonnage lying all around, from which he inferred that we did not need this legislation. But, Mr. President, I have quoted most of those freight rates, and I have here a summary of the most striking increases which I think would abbreviate the thing very much in the RECORD, and I shall now, if the Senate agrees, insert the summary instead of these items.

Mr. JONES. I would like very much to hear that. This has been very valuable information.

Mr. WILLIAMS. The Senator is not going to hear it at this time. It is a mere matter whether the Senator desires it to go in the RECORD instead of the freight rates which I read, or whether he would rather the longer citation of items I have read should go into the RECORD.

Mr. JONES. I have no objection to whatever the Senator has read going into the RECORD.

Mr. WILLIAMS. I can not read the short one, too.

Mr. JONES. I object to anything being put into the RECORD without reading, because I do not have time to read the RECORD now, with what I have to do, and so I like to hear it on the floor.

Mr. WILLIAMS. All right.

Mr. STONE. Mr. President, it is not my purpose to discuss the merits of the shipping bill. I am assembling some data and authorities upon which I mean to predicate and support some remarks I purpose to make on the bill at an early day. I arise now merely to correct a statement made more than once by the senior Senator from New York [Mr. ROOT], and which he repeated to-day, as to some remarks I made about forcing this bill so as to prevent a fair discussion of it, boasting that we had or thought we had votes enough to pass the bill. The statement as made by the Senator from New York was not in any sense warranted by anything I said, either by the text of what I said or by any construction of it that would not be strained and extremely remote from the facts.

Mr. President, there is not now and there has not been, so far as I know or believe, any purpose on the part of any Senator on this side to restrict a fair, sensible, and even ample discussion of the pending bill. I readily concede that a measure of this importance should be discussed until the attitudes of Senators who are for it and who are against it have been sufficiently made known. But, Mr. President, when we are confronted by a situation clearly showing an organized purpose on the part of Senators on the other side to go much further than is necessary in all reason to amply debate the measure and to carry on a studied course of obstruction under the guise of debate, with the ultimate view of defeating a vote, then I do not hesitate to say that Senators are abusing the privilege they are allowed for freedom of debate under the rules of the Senate.

The Senator from New York [Mr. ROOT] read us, as he is accustomed to do, a lecture on absenteeism, inattention, lack of interest in the debate. Mr. President, I am in sympathy with what the Senator said in that behalf. I wish he could castigate Senators severely enough, particularly Senators on this side of the Chamber, to make them out of a sense of shame, if not of duty, remain here in the Chamber while the public business is being transacted, or at least remain within the immediate call of the Senate.

But I question, Mr. President, whether the Senator from New York would undertake the task of inducing Senators to stay here if he thought he could succeed. I doubt whether he would be delighted if he saw every Democratic Senator in his seat throughout each day, for if that were so less opportunity would be given to filibustering Senators on the other side to take advantage of their absence.

The Senator from New York has not honored his colleagues with his presence overmuch. He complains of the absence of Senators, but he does not set them a good example by being present. He teaches by precept, not by example. Scarcely had he closed his address this morning until he fled the Chamber. His beatific countenance has not beamed upon us since, and probably will not during the remaining tedious hours of this session. Where is he? I can not answer that question. It may be that he is enjoying a well-earned leisure, reflecting upon the honors he won here this morning by his great oratorical outburst. He may have left for New York. He may be now flying to the metropolis to hold discreet converse with some of his constituents, to devise new methods of embarrassing the progress of this legislation. I do not know where he is; perhaps his immediate whereabouts is not a matter of impressive importance.

The senior Senator from Massachusetts [Mr. LODGE] indulged in a like tirade a day or two ago, upbraiding Senators upon this side who did not sit here to listen to the addresses delivered by distinguished Senators such as Senators ROOT, WEEKS, and others he named. Since the 4th day of January the RECORD shows that numerous roll calls have been had.

Mr. REED. Fifty-five.

Mr. STONE. My colleague says 55. The Senator from Massachusetts [Mr. LODGE] voted or was present 36 times and was absent or not voting 19 times. The Senator from New York [Mr. ROOT] was present, as shown by these roll calls, 28 times and away 27 times. The junior Senator from Massachusetts [Mr. WEEKS] was present 27 times and away 28 times; and yet from these sources we hear complaints that we do not sit here to listen to these debates and participate by our presence in the current business of the Senate. That record, Mr. President, shows the utter emptiness and insincerity of these criticisms.

Mr. President, I now come directly to the matter to which I arose to address myself. It will take but a few moments to dispose of it. On the 4th day of January the Senator from New York [Mr. ROOT] said:

> Sir, there has been no discussion here since I have been in this body so imperative in its demands upon the Members of the Senate as the discussion of this bill. There has been no measure going so deep to the basis of our institutions as this bill. It comes here, sir, under circumstances which are repugnant. There was no hearing before the committee of the House on such a measure as we have before us. There was no hearing before the committee of the Senate. The demand for a hearing was refused, and the bill was reported speedily, peremptorily, with but slight opportunity for discussion; and now, sir, the Senator from Missouri [Mr. STONE], in advance, with some show of feeling, which I know was evanescent and which, I trust, does not even now continue, has stigmatized all discussion of this bill on the part of the minority as—what were the words?—"improper and unjustifiable."
>
> The Senator from Florida [Mr. FLETCHER], with that kindliness and fairness which always characterize him, has told us that there was no disposition to interfere with the debate on this bill, but the Senator from Missouri [Mr. STONE] in advance gives notice to the country that the debate on this bill is to be regarded as obstructive, improper, and unjustifiable.

Now, let us see what foundation there is for that. Whatever of foundation there is for it is to be found in a colloquy in which I participated, recorded in the second column of the CONGRESSIONAL RECORD of January 4, at page 906. This colloquy occurred just before the Senator from New York made the speech from which I have quoted. The Senator from New Hampshire [Mr. GALLINGER] had the floor when the Senator from Washington [Mr. JONES] arose and asked recognition. I now quote the colloquy.

> Mr. GALLINGER. I yield the floor.
>
> Mr. JONES. I wish to suggest to the Senator from New Hampshire something of which he is probably aware as indicating the character of argument and the means the other side intend to use to put this bill through. The majority leader of the Senate was quoted as having said immediately after the President's message with reference to this bill, "We have the votes to put it through."
>
> Mr. GALLINGER. I observed that, and I have had it whispered in an ear that always serves me well that, assuming they have the votes, they are going to resort to tactics which will be opposed as strenuously as possible, so far as a few of us are concerned, at least.
>
> Mr. STONE. Mr. President, we have the votes to put it through if ever we can get a chance to vote. Unless Senators on the other side adopt some plan or scheme of inexcusable and unpardonable obstruction we will get to a vote, and we have the votes to pass the bill.
>
> Mr. GALLINGER. If the Senators on this side should resort to the same tactics that the Senator's colleague resorted to on the immigration bill, would he think that that was very much to be condemned?
>
> Mr. STONE. Mr. President, I am not discussing what occurred on other bills or what individual Senators have done. It is rather an impertinent

question for the Senator to propound, and I think an improper one, to ask me to animadvert upon the conduct of any Senator, and particularly on that of my own colleague. I am speaking as to this bill. I am answering the statements made in the form of criticism by the Senator from Washington and the Senator from New Hampshire.

Mr. GALLINGER. The Senator is oversensitive.

Mr. STONE. No; I am not at all.

Mr. GALLINGER. The Senator has on more than one occasion, with a great deal of earnestness and with some acerbity, during the past few months charged this side of the Chamber with unduly and improperly obstructing legislation. Now, Mr. President, for one, I propose to be the judge of my own conduct in this matter, and I shall pursue such a course in the debate on this bill as I think the importance of the measure demands at my hands.

Now, what is there in any statement that I made—and I have read it all—that justifies the Senator from New York or any other Senator asserting and reasserting that I had stated "with some show of feeling" that "the discussion of this bill on the part of the minority would be improper and unjustifiable," or to justify the Senator in saying that I had declared in advance that debate on this bill is to be regarded as obstructive, improper, and unjustifiable? I said no such thing, and I had no such idea in mind when I made the declaration which the Senator misquoted and criticized.

I meant to say then, and I assert now, that I am in favor of full, fair, and free discussion; but when Senators conduct an organized, determined, and practically admitted filibuster to prevent a vote, then I do say that such so-called debate is unjustifiable and improper.

If this be treason, make the most of it.

Mr. President, if there be no particular reason to the contrary, I move that the Senate now proceed to the consideration of executive business.

Mr. SIMMONS. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from North Carolina?

Mr. STONE. I withhold the motion for a moment, in accordance with the wishes of the Senator from North Carolina.

Mr. SIMMONS. Mr. President, I want to make a few observations and a suggestion. I do not wish to unnecessarily delay the motion of the Senator from Missouri, but if I should not do what I have in mind now at this time probably it would be inopportune at some other time.

I want to call the attention not only of the Senate—and that is unnecessary—but I want to call the attention of the country to the fact that when the Senator from New York [Mr. ROOT] rose to address the Senate this morning, and during the entire time that he occupied the floor in addressing the Senate, he had the attention of a full house, both on this side of the Chamber and on the other side of the Chamber. I want to say that, as is known to the Members of the Senate, the Senator from New York never indulges in dilatory discussion; and whenever the Senator from New York or any other Senator on either side of the Chamber on this question or any other question rises here for the purpose of real, genuine, honest discussion he is very apt to get serious attention from both sides of the Chamber. Certainly nothing has developed in this debate that indicates that when a Senator is really discussing a question with the purpose of enlightening the Senate and not for the purpose of consuming time he has not had as good attention on this subject as he had ordinarily upon other questions.

Mr. SMOOT. Mr. President——

The VICE PRESIDENT. Does the Senator from North Carolina yield to the Senator from Utah?

Mr. SIMMONS. If the Senator will pardon me, I am trenching a little upon the purpose of the Senator from Missouri [Mr. STONE], and I would rather not yield.

Mr. SMOOT. I simply rose to ask a question, and perhaps the Senator would like to correct his statement after I have asked it.

Mr. SIMMONS. Probably.

Mr. SMOOT. I simply wanted to ask the Senator if he believes the Senator from Iowa [Mr. CUMMINS] was discussing this question with any intention whatever of a filibuster?

Mr. SIMMONS. The Senator from Iowa had just as good attention in the discussion of this subject as he would have had if he had been discussing any other subject before the Senate.

Mr. SMOOT. That, of course, is another question, Mr. President; but I wanted to say to the Senator——

Mr. SIMMONS. That is the proposition that I laid down—that nothing has occurred in connection with this debate that indicates that a Senator who is engaged in honest discussion will not get as good a hearing upon this question as he ordinarily gets upon any other question.

Mr. SMOOT. I simply want to say that the Senator from Iowa discussed this question for over a couple of hours, and for the greater part of that time there was not to exceed two Senators upon the other side of the Chamber.

Mr. SIMMONS. That does not militate at all against the proposition that I laid down. The suggestion of the Senator from New York was that this side of the Chamber had refused to give a hearing to discussion from the other side of the Chamber; that there was on this side of the Chamber an organized conspiracy of silence; and I am saying now only that when a Senator on the other side rises to discuss this question in the way of honest and fair debate he will get just as good and fair a hearing from this side on this question as he would on any other important question; but on this question or any other question that may come before the Senate, speaking out of my experience since I have been a Member of the Senate—and that has been for 14 years—when it is thoroughly understood in the Chamber that a Senator is speaking merely for the purpose of consuming time, for the purpose of obstructing legislation, Senators on both sides of the Chamber have generally retired to the cloakrooms.

Mr. President, we have had some speeches here from Senators after they had been advertised in the press of the country, after it had been proclaimed in a leading newspaper published in this city that we were to have speeches from certain Senators who had won a reputation for filibustering legislation to death. When those speeches were being made they did not have any greater audience on the other side or on this side than has heretofore been accorded men who it was known were engaged in the purpose and work of obstructing legislation.

The Senator from New York has complained of what he calls the "fiction of the legislative day." He has charged that it has been inaugurated for the purpose of forcing through this legislation by brute force. Why, Mr. President, this is not the first time the Senate has pursued that course of procedure. Repeatedly in recent years, both this side of the Chamber when it was responsible for legislation and the other side of the Chamber when it was responsible for legislation which for any reason it was sought to facilitate or which was threatened with defeat by obstructive tactics have, for the purpose of promoting legislation and securing a vote upon a measure, adopted this legislative-day fiction for the purpose of getting rid of the morning business and saving two hours daily in the discussion.

The Senator says we have adopted this fiction for the purpose of forcing through this legislation by brute force. I want to say to Senators on the other side of the Chamber that I could say with as much plausibility and with as much justification that the course which they are now pursuing has been adopted for the purpose of defeating this legislation by brute force.

Mr. MARTINE of New Jersey. Mr. President——

The VICE PRESIDENT. Does the Senator from North Carolina yield to the Senator from New Jersey?

Mr. SIMMONS. I want to make a suggestion in connection with that, and I wish the Senator would let me do that, and then I will yield to him.

Mr. MARTINE of New Jersey. Very well.

Mr. SIMMONS. If the Senators on the other side agree with the Senator from New York that we have a "conspiracy of silence" on this side of the Chamber, and that that conspiracy of silence grows out of the fact that we are unwilling to debate this question, to meet the arguments made upon the other side—if the Senator has that idea, and if, on the other hand, it is not the purpose of the Senators on that side of the Chamber to filibuster this measure to death, I have a proposition to make to them. It has been stated in the press that it is the deliberate purpose of Senators on the other side of the Chamber to debate this question until the 4th day of March rather than to permit a vote upon it. It has been stated in the press that you have held a caucus and that you have selected 25 Senators on that side who are to keep the floor, if necessary, until this measure is defeated, if it takes until the expiration of the session under the Constitution.

Mr. GALLINGER. Mr. President——

Mr. SIMMONS. Just a minute; let me make my proposition. If that is not the purpose of Senators, if it is not their purpose to filibuster this legislation to death, if Senators want honest debate on this side of the Chamber as well as on that side of the Chamber, I make this proposition to the Senator from New Hampshire, the leader of the other side, and I think it will be acquiesced in by my colleagues:

We will agree right now, if that side of the Chamber will consent, to a rule that this debate shall be continued for 10 calendar days; that the time of debate shall be divided equally between that side of the Chamber and this side of the Chamber, and that we will occupy our part of the time, if you will enter into a unanimous-consent agreement that at the end of that 10 days we may vote upon this measure. We have 7 hours of session each day under the plan we are operating upon.

That will amount to 70 hours of debate, or an hour apiece for 70 speeches or 2 hours apiece for 35 speeches. That ought to be enough for honest and fair and legitimate debate.

Will the Senator agree to that? Or is it the Senator's purpose and the purpose of his party to continue this debate, if it is necessary to prevent a vote, until the 4th day of March next?

Mr. GALLINGER. Before responding to that question I want to ask the Senator what reckless newspaper it was that said that the minority had held a caucus and had selected 25 Senators to make speeches?

Mr. SIMMONS. Probably I should have said that with reference to the first statement I made. If I said a newspaper published the other statement, probably I was mistaken. I have heard that around the Chamber.

Mr. GALLINGER. Mr. President, the majority side of this Chamber has held caucuses day and night. The minority had a little conference, covering about half an hour on one day.

Mr. SIMMONS. I am not objecting to your conference.

Mr. GALLINGER. And they made no such arrangement as the Senator suggests.

Mr. SIMMONS. I am glad to hear the Senator say they have not.

Mr. GALLINGER. They have not.

Mr. SIMMONS. Will the Senator answer me with equal frankness as to whether it is the purpose of himself and his colleagues to continue this debate until the 4th of March, if it is necessary, to prevent a vote upon this question?

Mr. GALLINGER. Mr. President, I hope the majority will see the propriety of taking up the great supply bills of the Government and passing them first.

Mr. SIMMONS. Does the Senator decline to answer that question?

Mr. GALLINGER. No, Mr. President; I never decline to answer questions. I will say to the Senator that I have not occupied any time in this debate. I propose to occupy such time as I think is proper. I shall discuss the question of Government ownership. I shall discuss the question of the merchant marine. I shall discuss the new question that has been projected into this debate by the majority side of invading the domestic commerce of the United States with these foreign ships—a matter that we voted against 2 to 1 at the last session of Congress. I shall discuss those questions in my own time and in my own way and take as much time as I think is proper to present them adequately. I do not speak for any other man on this side of the Chamber.

Mr. SIMMONS. I shall hear the Senator with great pleasure, and as I think probably he will indulge only in honest discussion, I think he will have a pretty good audience; but that does not answer the question I asked.

Mr. GALLINGER. I do not expect an audience; and now, in answer to the Senator's question, I shall object to closing this debate in 10 days.

Mr. SIMMONS. Does the Senator mean by that that it is the purpose of his side of the Chamber to continue this discussion until the 4th of March, if it is necessary, to prevent a vote on this measure?

Mr. GALLINGER. I do not say that, because I do not know it to be the purpose.

Mr. SIMMONS. Does not the Senator think that is the purpose? Has not the Senator reason to believe that that purpose has been agreed upon?

Mr. GALLINGER. I know that it has not been agreed upon.

Mr. SIMMONS. Has not the Senator reason to believe that that is the fixed purpose of that side of the Chamber?

Mr. GALLINGER. I am not a mind reader, and I am not going to judge what my colleagues think about it.

Mr. SIMMONS. The Senator evidently does not desire to answer that question.

Mr. President, I think nobody in the country seriously doubts that it is the purpose of the other side to continue this discussion until the 4th of March if that is necessary to prevent a vote. In those conditions, Mr. President, I hope and I trust that this side of the Chamber will not aid them in that filibuster. If they think 10 days is not enough, then I think we will enlarge that and make it 15 days. If they will agree to that, Mr. President, then we will join in the discussion with them; but as long as the discussion is for the purpose of filibustering this legislation to death, and nothing else, we are not going to help them any further than is necessary in order to put our side of this controversy before the country.

Now, Mr. President, one other matter. The Senator from New York [Mr. ROOT] sought to create the impression that this legislation was for the purpose of enabling the Government to buy these belligerent vessels that are interned in our waters; and in order to support that argument he made the point that contemporaneously, either immediately before or immediately after the introduction of this bill, there was presented to the Senate of the United States a written opinion of the Solicitor for the State Department, Mr. Cone Johnson; that these two documents, so far as concerned ascertaining the purpose of the Senate committee with reference to confining these purchases to interned vessels, were to be read together and the Cone Johnson document taken as a part of the res gestae.

Mr. President, I have taken the pains to look up that matter. I find, as a matter of fact, that this opinion of Mr. Cone Johnson was prepared on the 7th day of August. On the 11th day of August, while we had up for consideration in the Senate what is known as the ship-registry bill, in connection with which a discussion of these questions had been had in the Senate, I presented to the Senate this opinion of Mr. Cone Johnson and had it read into the RECORD. The bill that the Senate now has under consideration was not introduced in the House until the 4th day of September, or nearly a month after Mr. Johnson's opinion was presented to the Senate, and was not introduced in this Chamber until the 9th day of December, as I now recall; so that the two have no relation whatsoever.

Mr. President, the opinion of Mr. Cone Johnson has been assailed. I am not undertaking to say that Mr. Cone Johnson has interpreted the law with absolute accuracy, but I do mean to say, upon the point raised by the Senator from New York, that Mr. Cone Johnson's opinion was only to the point that the London conference had simply changed the former rule so as to throw the burden of proof upon the purchaser in certain cases, whereas theretofore it had been upon the captor. In certain conditions under the old law there was a presumption in favor of the purchaser, but it was a rebuttable presumption. The burden was upon the captor to rebut that presumption. The London conference changed it so as to make it a presumption against the purchaser in certain cases, but only a presumption, and the only change in the rule was that the burden of rebutting the presumption was thrown upon the purchaser instead of upon the captor, as theretofore.

Mr. President, it is attempted in the discussion to-day to get away from the real merits of this controversy, by trying to focus the minds of the Senate and of the country upon the idea that we are seeking to buy interned ships; that the purpose of the Government in presenting this legislation is to get these ships, because possibly they can be purchased at this time at a low price, and that that is the main moving purpose with reference to this legislation.

I wholly repudiate that suggestion. We are not limited to interned ships. We may build ships. We may buy ships from others than the Germans or the Austrians. I think I can say, and I think I can say it truthfully, and I think the country will bear me out in the statement, that when the Senator from New York says that the effect of this legislation will be, not to buy ships, but to buy a quarrel, he impugns the high standards as a friend of peace—peace upon this continent and peace throughout the world—of the man who sits in the White House, and who will have control of this business. He has not received any Nobel prizes as a friend of peace, but his record during the last few months, his record since trouble broke out across the border to the south of us, his record since the Old World was engulfed in war, has been a record of peace, a record of conciliation, the record of a man who so longed to see his countrymen and his country at peace with the world that he would submit to what possibly others not so inclined toward peace would not have submitted to. I am sure no man who is familiar with this man's record, no man who appreciates his purpose and his efforts in behalf of peace, will impute to him any purpose to secure or desire to secure legislation that might result in the purchase of a quarrel. No one will impute to him the purpose, if he has the power to prevent it—and he has the power, under this bill—to do anything in the execution of the powers conferred upon him by this measure that in his judgment would result in embroiling us in war with another country.

No, Mr. President! I join the Senator from Mississippi [Mr. WILLIAMS] in the statement—and the country will believe that statement, because they know who Woodrow Wilson is, because they know his record and his history and his feelings upon this subject—that if this legislation passes, none of those interned vessels will be purchased until it has been first ascertained, in the proper way and through the proper channels, that the purchase of the vessel will not lead to war or to entanglements out of which war might be evolved.

Mr. MARTINE of New Jersey. Mr. President, I feel that the Senator from New York [Mr. ROOT] was rather unfortunate and ungenerous, too, in his charge of absenteeism upon the part

of the Democratic side of the Senate during the discussions of this ship-building bill.

It has been my honor and privilege on a number of occasions, through the graciousness and courtesy of the Vice President, to occupy the Presiding Officer's chair. I will say that I have been quite assiduous in my attendance upon the sessions of the Senate, and I think that will be agreed to by the Senators on the other side, and I believe justly by the Senator from New York. It has been my habit, I will say, while I was occupying that chair, sometimes to jot down various thoughts on various subjects; and this happened on January 20, 1915, during the discussion of the ship-building bill:

Senator BURTON now speaking on the ship-building bill. At this time, 1.45 p. m., there are in the Chamber two Republican Senators and five Democrats. BURTON has now spoken over 3 hours to-day. Yesterday he spoke 6. He seems as fresh as when he started.

[Laughter.]

So, I say to my Republican friends, the archives—the records—will deny your statement. The facts are that the Democrats have been in attendance quite as assiduously as have the Republicans during this debate. I have felt sometimes that the discussion was worthy of a little more liberal attendance, but we were thankful for what we got.

I want to say for myself at this time that I have no particular desire to air my views on this question again, but I hail a ship-building bill with the greatest delight. I have been an advocate of Government transportation for many years of my life, and I hail with delight this opportunity to vote for a ship-building bill. There were many features in the bill originally that I did not like. Thank heaven, they have been eliminated. One of them was the feature that we were to blaze the way and finally transfer these ships to some private corporation. Then, too, I wish, instead of the shipping board, the Government might deal directly with this controversy and buy ships or build ships and run them or sell them.

The Senator from New York this morning made some reference to the matter of profit. It is a horrible thought that the only way to bring a matter home to the Government is through dollar bills and coin. To me it is repulsive. I can not imagine a system whereby the Government should go in it to make money out of the people. I would that the blessings of the Government through transportation as well as in many other channels might be handled by the Government. I believe it would be to the advantage and to the well-being of our whole land.

I believe that this bill is a popular measure and one much needed at this particular time, and I might hope that we may so intrench and establish ourselves that the thought of ever eliminating this from the matters of Government may be in the vague and distant future. I shall vote for this bill with a great deal of relish, hoping that some day the shipping-board feature of it may be eliminated. My friends, I say to you, Republicans and Democrats, this will be one of the most popular measures that has ever been placed on the statute books and future generations will rise up and bless you for this beneficent piece of legislation.

While I am on my feet I will say that I have in my hand an address delivered by Mr. George W. Norris in Philadelphia, December 29, 1914, touching this question, that to me is unanswerable, and I ask without reading that I may have the privilege of presenting it as a part of my remarks in the RECORD.

The VICE PRESIDENT. Is there any objection?

Mr. JONES. Is it an address by our colleague from Nebraska?

Mr. MARTINE of New Jersey. It is not.

Mr. NORRIS. I have just come into the Chamber, and I understood the Senator from Washington to ask a question.

Mr. JONES. I merely wanted to know whether the address referred to by the Senator from New Jersey was delivered by the senior Senator from Nebraska.

Mr. NORRIS. No.

Mr. MARTINE of New Jersey. It is by another gentleman named Norris.

Mr. JONES. Then I object.

Mr. MARTINE of New Jersey. I would be proud if it had been delivered by the senior Senator from Nebraska, but when the time comes and he may have had an opportunity to express himself as the gentleman from Philadelphia did express himself I trust and hope he will do it in more potent terms and make a more indelible impression by voting for the measure.

Mr. JONES. I would be glad to hear the address read, but I do object to having it printed without reading.

Mr. MARTINE of New Jersey. All right; let it go.

The VICE PRESIDENT. There is objection.

Mr. FLETCHER. The Senator from New Hampshire [Mr. GALLINGER], I believe, desires to proceed. I inquire of him whether he would prefer to begin to-morrow morning? I believe there is some executive business that is quite important, and it can be attended to this evening. If the Senator would like, we can postpone hearing him until to-morrow morning.

Mr. GALLINGER. It is quite agreeable to me to have the executive business transacted. I think it is as important.

Mr. FLETCHER. I will say further that it is my purpose to ask this evening that we adjourn to allow a reasonable time to-morrow morning for morning business. I want to go on with this bill just as fast as we can, and unless there is too much time being consumed I probably will not ask to have the Senate take up the bill at once, but will allow some reasonable time for morning business to-morrow morning before making that motion.

Mr. CLARK of Wyoming. I suppose if we adjourn the regular business hour will occur?

Mr. FLETCHER. I know, but it would be in order for me to move to take up the bill before the expiration of the morning hour.

Mr. CLARK of Wyoming. Surely.

Mr. FLETCHER. I think it important to do so with a view of facilitating the public business and accommodating the Senator from New Hampshire.

DISTRICT EXCISE BOARD.

Mr. JONES. Mr. President, in the discussion of the District of Columbia appropriation bill, on page 1700 of the RECORD of January 16, this occurred:

Mr. GALLINGER. Mr. President, with the Senator's permission, I will ask if the President did not appoint two members of that board, and when their characters were called to his attention were the names not withdrawn?

Mr. JONES. He did so very promptly, and I wish he had withdrawn the others. I should say that one of the names was withdrawn not because of the character of the appointee, but because he had been a most open and determined opponent of the law.

That refers, of course, to the members of the excise board. I do not want any injustice done to anyone, and while I would rather not by giving the name of one of the parties, thereby possibly reflect to a certain extent upon the others, I do feel that in justice to one of the gentlemen against whom no charges as to his character were made that his name should be put in the RECORD so as to make that fact clear. The one against whose character no charges were made was Mr. John B. Colpoys.

EXECUTIVE SESSION.

Mr. STONE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 1 hour and 25 minutes spent in executive session the doors were reopened.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House disagrees to the amendments of the Senate to the bill (H. R. 19422) making appropriations for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1916, and for other purposes, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. PAGE of North Carolina, Mr. SISSON, and Mr. DAVIS managers at the conference on the part of the House.

The message also announced that the House agrees to the amendments of the Senate to the bill (H. R. 19076) to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

The message further announced that the House had passed a bill (H. R. 20347) making appropriations for the support of the Army for the fiscal year ending June 30, 1916, in which it requested the concurrence of the Senate.

The message also transmitted to the Senate resolutions of the House on the life, character, and public services of the Hon. ROBERT G. BREMNER, late a Representative from the State of New Jersey.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills:

S. 6121. An act to authorize the construction of a bridge across the Niagara River, in the town of Lewiston, in the county of Niagara and State of New York; and

H. R. 19076. An act to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

PETITIONS AND MEMORIALS.

Mr. ROBINSON presented petitions of sundry citizens of Batesville, Ark., praying that an appropriation be made for the construction of seven locks and dams on the upper White River above Batesville, Ark., which were referred to the Committee on Commerce.

Mr. PERKINS presented petitions of sundry citizens of Los Angeles and Fresno, in the State of California, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented a petition of the Chamber of Commerce of Los Angeles, Cal., praying for an investigation by the United States Reclamation Service of the irrigation project of the Victor Malley Mutual Water & Power Co., which was referred to the Committee on Irrigation and Reclamation of Arid Lands.

He also presented a petition of the Board of Supervisors of Solano County, Cal., praying for the enactment of legislation to grant pensions to civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

He also presented resolutions adopted at the Thirty-fourth Annual Convention of the American Federation of Labor, in Philadelphia, Pa., praying for the enactment of legislation to extend the boiler-inspection laws, which were referred to the Committee on Interstate Commerce.

Mr. WARREN presented a petition of sundry citizens of Burns, Wyo., praying for the enactment of legislation to enable the President to levy an embargo on exports of war materials, which was referred to the Committee on Foreign Relations.

Mr. BRISTOW presented petitions of sundry citizens of Canada, Garden City, Gaylord, Hoxie, White City, Logan, Herington, Stuttgart, Russell, Deerfield, Herkimer, Kansas City, Inman, Lincolnville, Alma, Clay Center, Bremen, Barnes, Hanover, Waterville, Linsborg, Seguin, Linn, Arkansas City, Garden Plain, and Cheney, all in the State of Kansas, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented petitions of sundry citizens of Baldwin, Webster, and Webber, all in the State of Kansas, praying for the enactment of legislation to prohibit the manufacture and sale of intoxicating liquor in the Philippine Islands, which were referred to the Committee on the Philippines.

He also presented petitions of sundry citizens of Lawrence, Topeka, and Newton, all in the State of Kansas, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Kansas City, Kans., praying for the enactment of legislation to grant pensions to civil-service employees, which were referred to the Committee on Civil Service and Retrenchment.

He also presented a memorial of sundry citizens of Galena, Kans., remonstrating against the exclusion of anti-Catholic publications from the mail, which was referred to the Committee on Post Offices and Post Roads.

He also presented sundry papers to accompany the bill (S. 5818) granting a pension to William H. Hayes, which were referred to the Committee on Pensions.

Mr. SHIVELY presented petitions of the Typographical Union of Richmond, the Typographical Union of Elkhart, and the Central Labor Union of Elkhart, all in the State of Indiana, praying for the enactment of legislation to limit the effect of the regulation of interstate commerce between the States in convict-made goods, which were ordered to lie on the table.

He also presented memorials of O. B. Sandifer, G. T. Werner, Lee N. Fanning, and sundry other citizens of North Manchester, Ind., remonstrating against the adoption of a proposed amendment to the Post Office appropriation bill relative to the transmission of obscene matter through the mail, which were referred to the Committee on Post Offices and Post Roads.

He also presented petitions of the Woman's Foreign Missionary Society of the Trinity Methodist Episcopal Church, the South Side Chapel of the Evangelical Church, the Standard Bearers of Trinity Methodist Episcopal Church, the Young People's Association of the South Side Evangelical Church, the Young Woman's Christian Association, the Riverside Christian Church, the Riverside Club, the Thursday Club, the Woman's Franchise League, the Woman's Missionary Society of the First Evangelical Church, and the Missionary Society of the First Congregational Church, all of Elkhart, in the State of Indiana, praying for Federal censorship of motion-picture films, which were referred to the Committee on Education and Labor.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CLARK of Wyoming:

A bill (S. 7363) granting an increase of pension to Arthur Mahar; to the Committee on Pensions.

By Mr. JONES:

A bill (S. 7364) granting an increase of pension to Katherine R. Doolittle;

A bill (S. 7365) granting an increase of pension to Thomas O. Oliver (with accompanying papers);

A bill (S. 7366) granting an increase of pension to James A. Snodgrass (with accompanying papers); and

A bill (S. 7367) granting an increase of pension to Zeruah A. Newell (with accompanying papers); to the Committee on Pensions.

By Mr. BRISTOW:

A bill (S. 7368) granting an increase of pension to Hamilton Rogers (with accompanying papers); and

A bill (S. 7369) granting an increase of pension to Morgan W. Jones (with accompanying papers); to the Committee on Pensions.

By Mr. OLIVER (for Mr. PENROSE):

A bill (S. 7370) granting an increase of pension to Henry Vanderpool (with accompanying papers);

A bill (S. 7371) granting an increase of pension to Charles H. Kirk (with accompanying papers);

A bill (S. 7372) granting an increase of pension to Edward J. Simmons (with accompanying papers);

A bill (S. 7373) granting a pension to John W. Detwiler (with accompanying papers);

A bill (S. 7374) granting an increase of pension to Uriah Fisher (with accompanying papers);

A bill (S. 7375) granting an increase of pension to Philena Harmer (with accompanying papers);

A bill (S. 7376) granting a pension to Elmer Harry Martin;

A bill (S. 7377) granting a pension to Mary Weber;

A bill (S. 7378) granting a pension to Uain A. Bigler;

A bill (S. 7379) granting a pension to Harry L. Wilson;

A bill (S. 7380) granting an increase of pension to Catherine M. Peck;

A bill (S. 7381) granting a pension to George W. Shearer;

A bill (S. 7382) granting a pension to John Williams;

A bill (S. 7383) granting an increase of pension to Alpheus Johnstonbaugh;

A bill (S. 7384) granting an increase of pension to George Weidner;

A bill (S. 7385) granting an increase of pension to George Miller;

A bill (S. 7386) granting a pension to Martha J. Miller;

A bill (S. 7387) granting an increase of pension to Henry M. Means;

A bill (S. 7388) granting an increase of pension to Martin O'Laughlin;

A bill (S. 7389) granting a pension to G. M. Richart;

A bill (S. 7390) granting a pension to Elizabeth Reese;

A bill (S. 7391) granting a pension to Frank E. Lawrence;

A bill (S. 7392) granting a pension to Caroline E. Pahl;

A bill (S. 7393) granting an increase of pension to J. A. Farnham;

A bill (S. 7394) granting an increase of pension to George W. Rauch;

A bill (S. 7395) granting an increase of pension to Harrison Carson;

A bill (S. 7396) granting an increase of pension to M. P. Holter; and

A bill (S. 7397) granting a pension to Alice J. Harris; to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 7398) granting an increase of pension to William H. Terwilliger (with accompanying papers); and

A bill (S. 7399) granting an increase of pension to Joseph Zeimer (with accompanying papers); to the Committee on Pensions.

By Mr. SHIELDS:

A bill (S. 7400) granting a pension to William Manley; to the Committee on Pensions.

By Mr. RANSDELL:

A bill (S. 7401) for the relief of Frank H. Walker and Frank E. Smith; to the Committee on Claims.

AMENDMENT TO INDIAN APPROPRIATION BILL.

Mr. WARREN submitted an amendment proposing to appropriate $45,000 for the extension, enlargement, and construction

of the Le Clair and Riverton ditches for the irrigation of Indian allotments on the north side of the Big Wind River, Wind River Reservation, Wyo., etc., intended to be proposed by him to the Indian appropriation bill (H. R. 20150), which was referred to the Committee on Indian Affairs and ordered to be printed.

PUBLIC PRINTING AND BINDING.

Mr. OLIVER (for Mr. PENROSE) submitted an amendment intended to be proposed to the bill (H. R. 15902) to amend, revise, and codify the laws relating to the public printing and binding and the distribution of Government publications, which was ordered to lie on the table and be printed.

HOUSE BILL REFERRED.

H. R. 20347. An act making appropriations for the support of the Army for the fiscal year ending June 30, 1916, was read twice by its title and referred to the Committee on Military Affairs.

Mr. FLETCHER. I move that the Senate adjourn until to-morrow morning at 11 o'clock.

The motion was agreed to; and (at 6 o'clock and 30 minutes p. m., Monday, January 25, 1915) the Senate adjourned until to-morrow, Tuesday, January 26, 1915, at 11 o'clock a. m.

NOMINATIONS.

SOUTH DAKOTA.

H. J. Hobart, Woonsocket.
Linville Miles, Langford.

TENNESSEE.

Jesse F. Jones, Loudon.
William D. Kyle, Kingsport.

HOUSE OF REPRESENTATIVES.

MONDAY, *January 25, 1915.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We bless Thee, Infinite Spirit, our heavenly Father, for Thy continued care in the manifold blessings Thou are daily bestowing upon us, especially for every great thought, noble impulse, and high aspiration which lifts us into the higher realms of the intellectual, moral, and spiritual life. Continue, we beseech Thee, Thy care, and thus lead us on our way rejoicing to the larger life in Christ Jesus our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

W. R. ELLIS.

Mr. HAWLEY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a very brief clipping from a newspaper article upon the late W. R. Ellis, formerly a Member of this House. He had a long and honorable service in responsible positions in Indiana, as well as a Representative from Oregon.

The SPEAKER. The gentleman from Oregon asks unanimous consent to extend his remarks in the RECORD on the late W. R. Ellis. Is there objection?

There was no objection.

PRINTING SPEECHES IN THE RECORD.

Mr. SAMUEL W. SMITH. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SAMUEL W. SMITH. When a Member gets permission to print in the RECORD the speech of another than his own, is it optional with him to print the whole or a part of the speech?

The SPEAKER. That is owing to the permission he asks for.

Mr. SAMUEL W. SMITH. He asks to print the speech.

The SPEAKER. The Chair thinks that that is within the discretion of the Member.

AGRICULTURAL APPROPRIATION BILL.

Mr. LEVER. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 20415, the Agricultural appropriation bill.

Mr. JOHNSON of Kentucky. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. JOHNSON of Kentucky. Do I understand that there was an agreement reached on Saturday last to set aside District day?

The SPEAKER. No; when unanimous consent was asked to come in at 11 o'clock to-day the gentleman from Illinois [Mr. MANN] objected to meeting at 11 o'clock unless we took up the Agricultural appropriation bill, and the gentleman from South Carolina agreed to make the motion to go into Committee of the Whole House on the state of the Union. The Chair thinks the general idea was to go into Committee of the Whole on that bill. The question is on the motion of the gentleman from South Carolina.

The question was taken, and the motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. HAMLIN in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the further consideration of the bill, of which the Clerk will read the title.

The Clerk read as follows:

A bill (H. R. 20415) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1916.

The CHAIRMAN. The Clerk will proceed with the reading of the bill.

The Clerk read as follows:

For studying methods of clearing off "logged-off" lands with a view to their utilization for agricultural and dairying purposes; for their irrigation; for testing powders in clearing them; and for the utilization of by-products arising in the process of clearing; in cooperation with the States, companies, or individuals, or otherwise, $5,000.

Mr. BOOHER. Mr. Chairman, I move to strike out the last word. I would like to ask if this is not new legislation?

Mr. FOWLER. I reserve a point of order against the paragraph.

Mr. LEVER. The gentleman's inquiry goes to the last paragraph just read?

Mr. BOOHER. Yes.

Mr. LEVER. That paragraph has been carried in the Bureau of Plant Industry, and has been transferred to this place in the bill by the Secretary of Agriculture.

Mr. BOOHER. Last year there was a provision carried for the same thing of $5,000?

Mr. LEVER. There was.

Mr. BOOHER. What section of the country is this logged-off land in?

Mr. LEVER. It is in the extreme western part of the country on the Pacific coast, and the most of the work is done in Oregon. If the gentleman wants more information on the subject, I will yield to the gentleman from Oregon [Mr. HAWLEY].

Mr. BOOHER. I want to ask the gentleman one or two questions first. How many different kinds of powder are there in the country that needs testing by the Agricultural Department, and how long does it take?

Mr. LEVER. The test is to find the best powder adapted to clearing this logged-off land——

Mr. BOOHER. Blowing out stumps?

Mr. LEVER. Yes.

Mr. BOOHER. Does it require an expert to know how much dynamite to put under a stump, or what kind of powder?

Mr. LEVER. The department thinks so, the committee thinks so, and Congress thought so.

Mr. BOOHER. How many tests have been made?

Mr. LEVER. I think this is the third time the item is in the bill.

Mr. BOOHER. Have they not found out of the few kinds of powder we have which is the best?

Mr. LEVER. I will ask the gentleman from Oregon to answer the question.

Mr. BOOHER. One more question first. They also want to know about the utilization of the by-products in the process of clearing. What is the by-product, cordwood?

Mr. LEVER. The stumps and limbs, and in my country the sawdust is a by-product, and we are making a good deal of alcohol out of it.

Mr. BOOHER. In our country we do not need an expert to tell us what to do with sawdust; we pack ice in it and it answers the purpose first-rate.

Mr. LEVER. We do not need an expert to tell us how to pack ice in sawdust.

Mr. BOOHER. Well, you had a great deal of expert assistance in making up the bill.

Mr. LEVER. We did.

Mr. BOOHER. And I think you needed it, too. I would like to have the gentleman tell me why it is that we have to have an expert to go around and tell a man that a limb of a tree will make wood and how we ought to dig the stumps out and plow the land.

Mr. HAWLEY. Will the gentleman from Missouri yield?

Mr. BOOHER. Yes.

Mr. HAWLEY. The purpose of the item is to aid the farmers in sections formerly covered by trees which have been cut over and logged and show how to clear the land up at the least possible expense. The item is made broad enough to cover all possible investigation. I think there will be no further tests of powder except it may be for some incidental purpose. Most of the work will be done in the problem of getting rid of the stumps as they stand in the ground. I have had inquiries from all parts of the United States. A gentleman from North Carolina came to see me and I gave him some information which I derived, in part, from the department, and he said it was just what he desired; he and others had acquired logged-off lands and desired to make them into farms. It is designed to investigate the method of removing the stumps with the least possible expense, which has been a very troublesome problem.

Mr. BOOHER. The gentleman who bought this large body of logged-off lands wants the Government now to tell him how he can clear it of stumps in the cheapest way, so that he can get a big profit out of the men to whom he sells the land, does he not?

Mr. HAWLEY. I do not know whether he wants the Government to tell him, only I think he wants it to be able to tell other people as well as himself how they can clear off their land at the least possible expense, just the same as we tell the farmers in the southern part of this country how they can best rid their lands and their cattle of the cattle tick.

As to the by-products, out in the western section of the country there are thousands of acres of land being logged over every year by the logging corporations, and the lands are left with the tops and the stumps upon them.

Mr. BOOHER. To whom does that land belong?

Mr. HAWLEY. The land that has been logged over belongs to the logging corporations and to individual owners.

Mr. BOOHER. Yes.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAWLEY. I ask unanimous consent that the gentleman from Missouri have five minutes more.

The CHAIRMAN. The gentleman from Oregon asks unanimous consent that the gentleman from Missouri have five minutes more. Is there objection?

There was no objection.

Mr. HAWLEY. There are a number of by-products from the removal of these stumps. The Douglas fir has great branching roots, and when stumps are properly blown out, if powder is used, they make good ships' knees, the very best that can be obtained, much better than can be made by taking a straight stick and bending it.

Mr. BOOHER. I remember when I was a boy my father cleared a lot of pine land at one time, and we pulled the stumps and made stump fences out of them. We did not need an expert to tell us how to do that. I presume on the old farm where I was raised they have some of the stump fences that they had when I was a boy. We did not need anybody to tell us what to do or how to remove stumps.

Mr. HAWLEY. If the gentleman will yield—such stumps were probably 24 to 30 inches in diameter.

Mr. BOOHER. Yes; and some of them larger.

Mr. HAWLEY. Out in our country we have the problem of removing stumps which are from 7 to 14 feet in diameter, and a stump fence made out of such stumps would be some fence.

Mr. BOOHER. Are there not men in your State and in every community who can blow out stumps, and who know just how much dynamite it takes to blow out a stump without any expert from the Agricultural Department to tell them?

Mr. HAWLEY. Mr. Chairman, when the gentleman has completed his question, I should like to take the floor for two or three minutes to make a statement.

Mr. BOOHER. I just want to know why it is necessary to have a Government expert to tell people, especially large corporations, which the gentleman says are logging off their lands, the best way to remove the stumps. Why should the Government go to the expense of sending an expert there to tell them how to do it for the least expense? I do not believe they are doing it for the farmers anywhere. The farmer does not need it. When he wants to blow his stumps out, he buys some dynamite and hires a man at $2 a day to do it.

Mr. COX. Or else does it himself.

Mr. BOOHER. Yes; or else does it himself.

Mr. HAWLEY. The gentleman is proceeding on the theory that this money is to be used for the investigation of powders to be used in blowing out stumps, and probably none of it will be used for that purpose.

Mr. BOOHER. Well, now——

Mr. HAWLEY. If I can get a moment when the gentleman has completed his question, I will tell him.

Mr. BOOHER. What business has the Agricultural Department to be testing powder if it is not to be used for agricultural purposes?

Mr. HAWLEY. Certainly they can make these tests for agricultural purposes, but I say they are not doing it under this item. They have done that. That has been practically determined, as far as that is concerned.

Mr. BOOHER. Then why make another appropriation?

Mr. HAWLEY. The appropriation is to cover all possible questions arising in the removal of stumps, but it was not thought advisable to limit it in any particular, but to make it so general that they could resort to all methods and all investigations, because it is a very great problem. A man goes out and buys 160 acres of the finest kind of land, in the bottoms along the rivers, in the Olympic Peninsula, or elsewhere, where the trees were once 300 feet high and left stumps 10 to 14 feet in diameter. Such lands are found all along the coast and in the alluvial plains of the river valleys. They are the richest lands we have and they grew the finest trees. The trees have been removed and the stumps remain. Now, to blow out one of these stumps by the ordinary method with powder is too expensive. The farmer can not afford it. But there are other methods of removing stumps, and while the work has been done mostly in the State of Washington and not very much of it in my State, I have had information from those who have investigated it so far, and from farmers who have actually seen the work in operation, and they are very enthusiastic about the results.

Mr. BOOHER. Are they using dynamite?

Mr. HAWLEY. If the gentleman will permit me. When they use powder to blow out the stump, if it is good for ships' knees, they can sell it if there is an available market; but if they blow out the stump and leave it on the ground, in two or three great pieces, it takes a donkey engine to handle them. It tears up the ground, and they are in worse condition than they were before, so far as cultivating the land is concerned. Now, there have been several methods devised of burning the stumps in place. The old method of char-pitting will do for small stumps, but not for the large ones. There have been methods devised, one of which is to bore a hole down through the stump to the ground, and then another at an angle, and by that means burn the stump in place. They are working on that problem now.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BOOHER. I ask unanimous consent that the gentleman from Oregon have five minutes.

Mr. HAWLEY. I will move to strike out the last word.

The CHAIRMAN. The gentleman from Oregon moves to strike out the last word and is recognized for five minutes.

Mr. HAWLEY. There are other methods—of boring holes in the stump just above the ground and then extending them at an angle down beneath the surface of the ground and putting in hot coals or red-hot pieces of iron, and by a blast of air forcing the draft down into the holes, and by that means they burn out the stump entirely and get rid of it in place.

There is no great hole blown out in the ground. It is burned out and they then proceed——

Mr. BOOHER. Will the gentleman permit right there?

Mr. HAWLEY. Yes.

Mr. BOOHER. Now, are not people all over the country boring into stumps and filling them with coal oil, boring several holes, saturating them, and then setting them on fire, burning them out and clearing it off down to the ground? They have been practicing that for years.

Mr. HAWLEY. They have on small stumps; yes.

Mr. BOOHER. They have no large stumps out in my country. Now, it does not take quite an expert—it is not necessary, the way I look at this, to have an expert come and tell him that if he bores several holes in a stump and fill it in with coal oil, or kerosene as it is called, it can be saturated, and it then can be set afire and burned out. They do not need to have $5,000 for that.

Mr. HAWLEY. The gentleman from Idaho [Mr. SMITH] calls attention to the other provision here in regard to the several by-products. They can recover turpentine and various other by-products from the stumps when it is possible to do so. There are probably millions of acres now covered with logged-off lands in the West that would make as good lands for farming as there are in that section of the country. They are covered with these stumps. There are plenty of people who want to get them, who are ready to buy them. I know of a colony of 50 or 60 people who have gone into one section, and they are asking for this very information. They do not come from a country where they have stumps, and they do not know how to get them out. Now, there are people in all the Southern States who know how to rid their land of the Texas cattle tick, and if you say because some of them do know, let us not appropriate any more money for the eradication of the cattle tick; there are some people who know about how to get rid of the boll weevil and to circumvent it by raising other crops; we ought not to say because there are some who do, therefore let us not make any appropriation for it. That would cut out a million or more dollars from this bill. But there are problems in this matter of stump eradication that we have not yet solved in great communities. This is a very modest sum and will do an immense amount of good.

Mr. BOOHER. Let me ask the gentleman, Who gets the by-products from these stumps on these logged-off lands? To whom does it belong?

Mr. HAWLEY. To the men who own the land.

Mr. BOOHER. Why do not they take out these stumps and get this by-product without calling on the Government to do it for them?

Mr. HAWLEY. They want the Government to find out what the by-products are now, how they can be saved, and how the stumps can be burned out in place, and there are thousands of other instances in the gentleman's own district and all parts of the United States——

Mr. BOOHER. Not in my district.

Mr. HAWLEY. Where such problems are attempted to be solved.

Mr. BOOHER. Will the gentleman permit another question?

Mr. HAWLEY. I will.

Mr. BOOHER. If you are going to appropriate this money for this purpose, why not appropriate enough so that we can publish a bulletin and send one to every one of these men who want this information? It is now published in a bulletin; all

this information the gentleman is seeking to get here now is published in a bulletin by the Agriculture Department.

Mr. HAWLEY. I beg the gentleman's pardon. There is information we desire in the use of burning machines that is not published in any bulletin that I have seen, and it seems to me that the investigation can be very profitably continued.

Mr. BOOHER. I have read very carefully recently, since this bill was brought in, the bulletin on logged-off land, and it seems to me that that gives all the information that a man could desire if he wanted to read; but if it is necessary for some fellow to tell him, of course he will not read; but perhaps when the immigration bill becomes the law everybody will be able to read the bulletins, and this character of appropriations will cease.

Mr. GORDON. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. A point of order was reserved against it.

Mr. LEVER. Mr. Chairman, I am ready to have the Chair rule upon the point of order, although what the point of order is I have not heard.

The CHAIRMAN. The Chair does not know what the point of order was.

Mr. LEVER. The gentleman reserved it. May I ask the gentleman what the point of order is?

The CHAIRMAN. Does the gentleman from Illinois make the point of order?

Mr. FOWLER. Mr. Chairman, I do not think there is any authorization for this item at all. It is true it is carried in the bill of last year, but that is no authorization. It is a private matter, devoted to private property and private benefit. There is no authorization in the general law giving the right to appropriate money for private purposes or benefit of private individuals.

Mr. HAWLEY. Will the gentleman yield? He is entirely in error in the assumption that any of this money goes to private individuals. Not a dollar of it goes to a private individual, any more than an appropriation for the boll weevil or the cattle tick or the hog cholera.

The CHAIRMAN. Let the Chair understand. Does the gentleman from Illinois make the point of order?

Mr. FOWLER. Mr. Chairman, certainly. The gentleman from Oregon has just said that the benefit of this $5,000 goes to the corporations practically within his territory for the purpose of handling big stumps.

Mr. HAWLEY. Oh, Mr. Chairman, if the gentleman will permit——

Mr. FOWLER. I yield to the gentleman.

Mr. HAWLEY. I think the gentleman misunderstood what I said. I said that there would be people benefited by it in North Carolina, in all sections of the United States, individual farmers, and also those who own large bodies of land.

Mr. FOWLER. Yes; but the gentleman did say that the logged-off land belonged to corporations.

Mr. HAWLEY. Yes; in part.

Mr. FOWLER. And, of course, the corporations would get the benefit of the use of this $5,000.

The CHAIRMAN. If the gentleman will allow the Chair to suggest, the question now before the Chair is the question of the point of order.

Mr. FOWLER. I am aware of that fact.

The CHAIRMAN. And that it might benefit only a few people does not affect the point of order, as the Chair sees it. The Chair will be glad to hear suggestions on the point of order.

Mr. FOWLER. My objection to the paragraph, Mr. Chairman, is that it is not authorized.

The CHAIRMAN. Has the gentleman in charge of the bill anything to say?

Mr. LEVER. Mr. Chairman, I desire to call the attention of the Chair to the fact that the language of the act creating the Department of Agriculture is exceedingly broad, and if the Chair can make any connection between the clearing off of a piece of land and the effect it may have upon its development for agriculture and dairy purposes, then the Chair must hold this proposition in order. You certainly can not cultivate land at all without clearing it. If the Chair does not have the language at hand, I will read it. It is as follows:

> There shall be at the seat of government a Department of Agriculture, the general design and duties of which shall be to acquire and diffuse among the people of the United States useful information on subjects connected with agriculture, in the most general and comprehensive sense of that word, and to procure, propagate, and distribute among the people new and valuable seeds and plants.

Now, it seems to me that when the Chair can make a connection between the purposes of an item in this bill and its relationship to agriculture, in the broadest and most comprehensive sense of that word, the item is bound to be held in order, and the Chair has heretofore ruled that uniformly.

Mr. FOWLER. Mr. Chairman, I beg leave to differ with the distinguished chairman. If this point has ever been ruled upon since its insertion into the Agricultural appropriation bill, I am not aware of it.

Mr. LEVER. If the gentleman will permit, I did not make that statement. I said items of a similar character have been ruled upon.

Mr. FOWLER. I did not so understand the gentleman.

Mr. LEVER. Then I was mistaken in what I said.

Mr. FOWLER. If this paragraph has ever been passed upon by a point of order heretofore, Mr. Chairman, I say that I am not aware of it. Now, certainly, if the language creating the Department of Agriculture is to be construed as broadly as the chairman of this committee intimates, then there would be no end to it—no limitation whatever. He intimates that that which is connected with agriculture, wherever it may be, is a subject for legislation by the Congress. The grinding of an ax is connected with agriculture. We may just as well appropriate $5,000 for expert information for grinding axes, because an ax is one of the most useful instruments in clearing off ground. Mr. Chairman, if we extend this question of the authority of Congress to look into agriculture and legislate for it to the extent that is indicated by the chairman of this committee, then I repeat, Mr. Chairman, there is no limitation on this committee whatever. It might bring in a bill for sharpening axes, or they might bring in a bill for the purpose of inventing a new auger or any other implement that is used on the farm.

Mr. PAGE of North Carolina. Will the gentleman from Illinois allow a suggestion?

Mr. FOWLER. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from North Carolina?

Mr. FOWLER. I yield to him for a question only.

Mr. PAGE of North Carolina. I will put my suggestion in the form of a question if the gentleman insists upon my putting it that way. Is it not possible that the gentleman is using an illustration that is very apt in connection with this appropriation? May it not be that in this appropriation somebody has an "ax to grind"?

Mr. FOWLER. Indeed, Mr. Chairman, I did not desire to go to the extent of impugning the motives of any gentleman on this committee, because in my opinion they are honorable gentlemen, of such high character that it would be very unbecoming in me to make any reflection whatever. But these gentlemen are human; and if there are certain interests in their districts by their constituents, they will work for them, just as I did to get an appropriation to protect Shawneetown and that territory. This is of a character, Mr. Chairman, in my opinion, that leads into endless machinations of any man who might want to get some benefit for his own people.

Mr. Chairman, I do not desire to take up the time of the committee, but I insist on the point of order, and I insist that there is no authorization for this.

Mr. MANN. Mr. Chairman, the point of order raised by my colleague goes practically to almost every item in this bill, and if sustained will probably result in cutting out most of the provisions in the bill. For instance, there is no specific authority for investigation of plant diseases or for the control of diseases of orchards or for the controlling of diseases of forest and ornamental trees and shrubs. I simply read three items in less than one-half page of the bill.

Mr. LEVER. If the gentleman will permit——

Mr. MANN. There is no distinction in principle between studying the diseases of forest trees and studying the methods of removal of forest stumps in order to make the land suitable for agricultural purposes. I yield to the gentleman.

Mr. LEVER. I was about to call the gentleman's attention to the fact that there is no specific authority for the creation of the office of markets. There is no specific authority for the creation of the office of public roads. Practically every item in this bill will go out on the point of order if the Chair sustains this point of order.

Mr. MANN. Every year, I think, since I have been a Member of the House, at the beginning of the consideration of the appropriation bill some man who is opposed to the consideration of the Agricultural appropriation bill, some man who is opposed to the development of the Agricultural Department, like my friend from Illinois [Mr. FOWLER], makes some point of order on some item, denying authority to make an appropriation. Every year we go over the same discussion, gentlemen insisting there is no authority to make these appropriations under the organic act creating the department, and other gentlemen insisting that there is. And every year, in my recollection, the Chair has

overruled the point of order on the strength of this general authority. The organic act creating the Department of Agriculture is in general terms and practically authorizes an appropriation for anything in the way of acquiring or diffusing information for agricultural purposes, considered in their broadest sense.

Now, what is the item? I read:

For studying methods of clearing off "logged-off" lands with a view to their utilization for agricultural and dairying purposes; for their irrigation; for testing powders in clearing them; and for the utilization of by-products arising in the process of clearing.

That is in connection with agriculture and forestry. Those are all the items that are included in this paragraph, and certainly they come within the terms of agriculture in its broadest and most comprehensive sense, because in its broadest and most comprehensive sense the term "agriculture" includes not only agriculture but horticulture, floriculture, forestry, dairying, irrigation, marketing, and all the other terms which come into this bill.

It is true that occasionally a term comes into the bill which is subject to a point of order, where there is no authority. I doubt very much whether the provision in reference to good roads is included in the term "agriculture," even in its broadest sense. I do not recall now whether or not there has been a ruling on that, but if you can provide for methods of constructing roads running through agricultural districts, which certainly are not very closely connected with agriculture, you can provide for preparing the ground for cultivation. That is all this item does.

Mr. GORDON. Mr. Chairman, will the gentleman yield?

Mr. MANN. Yes.

Mr. GORDON. Is there any provision in this bill appropriating money for good roads?

Mr. MANN. Undoubtedly there is, and there is every year.

Mr. GORDON. Whereabouts?

Mr. MANN. Under the roads provision.

The CHAIRMAN. The Chair is ready to rule. The act creating the Department of Agriculture in its first section is as follows:

There shall be at the seat of government a Department of Agriculture, the general design and duties of which shall be to acquire and to diffuse among the people of the United States useful information on subjects connected with agriculture in the most general and comprehensive sense of that word, and to procure, propagate, and distribute among the people new and valuable seeds and plants.

It does not seem to the Chair that it could have been framed in broader and more extensive language, and the Chair is of opinion that, after all is said and done, the Department of Agriculture is largely a department of investigation and experimentation and demonstration.

This provision against which a point of order is made provides for the study of "methods of clearing off logged-off lands with a view to their utilization for agricultural and dairying purposes; for their irrigation; for testing powders in clearing them; and for the utilization of by-products arising in the process of clearing," and so forth. It is pretty clear to the mind of the present occupant of the chair that this has to do with agriculture, and I think the Chair is not without precedents. On April 29, 1902, when the Agricultural appropriation bill was up for consideration, the Hon. Joseph G. Cannon, of Illinois, made a point of order against this provision:

To enable the Secretary of Agriculture to investigate the character of proposed food preservatives and coloring matters, to determine their relation to digestion and to health, and to establish the principles which should guide their use; to enable the Secretary of Agriculture to investigate the character of the chemical and physical tests which are applied to American food products—

And so forth. A point of order was made against that provision, and the then occupant of the chair, quoting the organic act which is above quoted, said:

Now, while this may not be free from some doubt, yet as food products are closely connected with agriculture "in the most comprehensive use of the word," and as this provision in the bill simply permits the Secretary of Agriculture to carry out a regulation having this end in view, the Chair is inclined to believe, and will so rule, that it is not subject to the point of order made by the gentleman from Illinois.

Now, undoubtedly, if the preparation for food of the products of the soil, such as was carried in that bill, was not subject to a point of order by reason of the comprehensiveness of the organic act, the preparation of the land for the growing of these products could not be held to be foreign to the subject of agriculture, and the Chair thinks that the point of order is not well taken, and it is therefore overruled.

Mr. BOOHER. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The gentleman from Missouri moves to strike out the paragraph.

Mr. LEVER. Mr. Chairman, pending that, I ask unanimous consent that all debate on this paragraph and amendments thereto close in six minutes.

Mr. GORDON. I will have to object. I would like to have five minutes.

Mr. LEVER. Make it 17 minutes. I ask unanimous consent, Mr. Chairman, that debate on this paragraph and amendments thereto close in 20 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the debate on this paragraph and amendments thereto close in 20 minutes. Is there objection?

Mr. CARLIN. Mr. Chairman, in view of the fact that so many gentlemen want to speak, I will object at this time.

Mr. BOOHER. Mr. Chairman, I would not move to strike out this paragraph if this was the first time it had appeared in this bill, but it is the third time that we are asked to make an appropriation of $5,000 for this identical purpose.

Now, if the experts of the Department of Agriculture in two years can not determine the strength of powder, can not determine how much it will take to blow out a 9-foot stump or a 6-foot stump or a stump of any other dimensions; if they can not in two years tell what the by-product is good for; if they can not tell a farmer that the limbs will make wood, and that they might sell the stumps for something, in two years' time, they will never get to the point where they will determine it.

Now, they have published an extensive bulletin on logged-off land and its uses; if the people will not get those pamphlets and study them, I do not think this Congress ought year after year to appropriate money to tell people what to do. We are doing it all over the country—instead of letting people support the Government we are trying all we can to have the Government support the people.

Now, why should we continue this appropriation? I can not understand, when people know, or could know from reading a bulletin published at public expense how to do these things, and still refuse to do it, why you should send the experts of the Government around to teach a man how to do that thing. I hope this provision will be stricken out, along with a good many others in this bill.

Mr. GORDON. Mr. Chairman, it seems to me the observations of the gentleman from Missouri [Mr. BOOHER] ought to be conclusive with this committee, for they show the utter foolishness of continuing an appropriation of this sort from year to year. So long as Congress continues to appropriate money the Agricultural Department will continue to take it.

I arose primarily for the purpose of making an observation on the arguments presented by the gentleman from Oregon [Mr. HAWLEY] and the gentleman from Illinois [Mr. MANN], to the effect that this appropriation is analogous to one made for the extermination of hog cholera or pests that infest agriculture. In my judgment, Mr. Chairman, there is absolutely no analogy between the two. The idea of authorizing money year after year in order to instruct the logging companies how they can best log and clear their lands and then compare an appropriation of that sort with an appropriation to exterminate the pests or contagious or infectious diseases among farm animals or among people is to my mind rather far-fetched. If they have to go back to such an appropriation as that to obtain a precedent for the appropriation of this $5,000, it seems to me they are hard put for argument. I submit to the membership of this House that there is absolutely no analogy between the appropriations made to exterminate diseases and such an appropriation as this—absolutely none. To make use of arguments adduced for the purpose of defending laws appropriating money to combat contagious, infectious diseases to support an appropriation for money for such a purpose as this, especially in view of the fact, as stated by the gentleman from Missouri, that for two years in succession the Agricultural Department has received $5,000 for this specific purpose and has thoroughly investigated and published in Farmers' Bulletins its findings and conclusions as to the best methods of exterminating stumps, it seems to me it is time to stop the appropriation, and I think the item should be stricken out.

Mr. HAWLEY. Mr. Chairman, I only want to say a word. I made some remarks a moment ago when the point of order was up. This item is for the benefit of every wooded section of the country. A gentleman from North Carolina, as I stated, came to my office, and others have come from the eastern section, and asked information about clearing up land, because they knew that I had been giving the matter some attention. There are in the Middle West large sections of the country where land has been logged over and left covered with stumps. In our country some of the best of our lands have once grown large timber—large forests—and I have seen them, after re-

duced to cultivation, yield 50 to 70 bushels of wheat to the acre and from 80 to 90 bushels of oats to the acre. This is to cover the entire subject, including their clearing and use for agricultural and dairy purposes.

Mr. GOULDEN. Will the gentleman yield?

Mr. HAWLEY. Certainly.

Mr. GOULDEN. What percentage of land in your section of the country is owned by individual settlers?

Mr. HAWLEY. That I could not tell the gentleman. The lands are cut over by settlers or by companies who own the timber, but the timber companies have little use for the lands after they are cut over, and they offer them for sale in the community at reasonable prices. Sometimes bodies of men form little colonies, buy the land, and work on it together clearing the land. I know of 50 or 60 families going in to work together clearing up land, and they have told me that the stumps are very large and hard to take out; and they want me to tell them of some method of getting rid of them instead of blowing them out—by burning them. The lands are fine agricultural lands.

Mr. GOULDEN. Does the gentleman think that 25 per cent of the lands are owned by individual settlers?

Mr. HAWLEY. Of the lands to be benefited by this investigation, a great deal more than that. I think all the benefit of this appropriation would go to the individual settlers. There might occasionally be a body of men who would get together and clear up land, but it will largely be done by the individual settler who uses his spare time in the winter that otherwise would be lost in clearing the land. I hope, for the benefit of the large body of these men, it will be allowed to remain in the bill.

Mr. PAGE of North Carolina. Will the gentleman yield?

Mr. HAWLEY. With pleasure.

Mr. PAGE of North Carolina. The gentleman has said that somebody in North Carolina who is interested in this matter came to him for information. Will the gentleman state his name?

Mr. HAWLEY. I wish I could remember the gentleman's name, but I can not.

Mr. PAGE of North Carolina. It was not this gentleman of North Carolina.

Mr. HAWLEY. Oh, no; it was not a Member of the House. It was some man who was interested with others in the clearing up of logged-over lands.

Mr. HULINGS. Will the gentleman yield?

Mr. HAWLEY. Certainly.

Mr. HULINGS. It has been stated here that former appropriations for this purpose have resulted in investigations and a conclusive report on this subject. If this is so, there would not seem to be any need of an additional appropriation. What is the fact about it?

Mr. HAWLEY. That is a mistake. The former appropriations of $5,000 have been used, information has been gathered and disseminated, but there are still other problems like removing the big stumps by the burning process. This is to enable the department to get other information. From what I know it has not solved this problem fully. They ought to complete the work already started and they have not done very much in the way of the by-products problem. There will be a use for the $5,000 in completing the work, in carrying out the work already undertaken, and some new phases of the work.

Mr. FOWLER. Mr. Chairman, twice the Agricultural appropriation bill has carried a provision for this purpose, and, as I understand, all that money has been used in the West. Apparently it has been used for the purpose of teaching the people how to clear up logged-off land. In this discussion it has developed that some trees that have been felled are 10 or 15 feet in diameter. These mammoth denizens of the forest require correspondingly large foundations in order that they may maintain themselves. Consequently, immense roots have been sent out into the ground, and it has been learned, through the ingenuity of ship men, that these big roots make fine ship knees; and inasmuch as these large forests are under the domination of the Lumber Trust, it is a very nice proposition to get the United States to blow out these roots for the purpose of making ship knees; and after they are blown out it is a nice thing to make a contract with the shipbuilding company to furnish these big, fine ship knees at a large price. Mr. Chairman, I would not have referred to this had it not come out in the discussion from the gentleman who undoubtedly is the author of this provision of the bill. The sequel of this appropriation is covered up under the guise of preparing land for grazing purposes, in order that milk and butter may be produced in quantities and in order that the Government may examine into powder to see whether powder is explosive or not, and to find out whether, if explosive, it can be exploded in connection with the removal of stumps in the western part of the United States.

The CHAIRMAN. The gentleman has used three minutes. The gentleman from South Carolina is recognized for two minutes.

Mr. LEVER. Mr. Chairman, the main purpose of this item is to study the utilization of by-products of logged-off land. Gentlemen may regard this as a very unimportant little item, but I desire to call attention to some facts. When I was a boy my father burned cotton seed. It was an encumbrance to the farm. We did not know what to do with it. The experts of the country began to study the problem, just as they are studying this problem, with the result that they found that cotton seed contains very valuable food and fertilizer products, which are now valued in the South at nearly $275,000,000 a year. When I was a boy we regarded the sawdust in the lumber yard as an absolute handicap to the work. Scientists and experts, studying from day to day and hour to hour, discovered that out of sawdust you could make alcohol.

Mr. FOWLER. People have known about wood alcohol a long time.

Mr. LEVER. Will the gentleman allow me to proceed? The result is that we have invested in that business hundreds and thousands of dollars. When I was a boy and when the chairman was a boy we did not know that there could be any utilization of pine stumps. The gentleman from North Carolina knows that to-day they are producing hundreds of thousands of dollars worth of turpentine out of pine stumps, all because somebody somewhere was given the authority to investigate these by-products. That is all there is in this item. I hope it will remain in the bill.

The CHAIRMAN. The question is on the motion of the gentleman from Ohio [Mr. GORDON] to strike out the paragraph.

The question being taken, on a division (demanded by Mr. GORDON) there were—ayes 16, noes 42.

Accordingly the motion was rejected.

The Clerk read as follows:

In all, for general expenses, $235,000.

Mr. PAGE of North Carolina. Mr. Chairman, I offer an amendment.

Mr. MANN. Is it an amendment to this paragraph?

Mr. PAGE of North Carolina. Yes; an amendment to this paragraph.

The Clerk read as follows:

At end of line 20, page 4, insert:

"For the fiscal year 1917, and annually thereafter, specific estimates shall be submitted for salaries for all personal services required in the Department of Agriculture at Washington, D. C., and except as specific appropriations may be made thereunder, personal services shall not be employed in that department at Washington, D. C."

Mr. LEVER. Mr. Chairman, I reserve a point of order on that.

The CHAIRMAN. The gentleman from South Carolina reserves a point of order.

Mr. PAGE of North Carolina. Will the gentleman be kind enough to state his point of order?

Mr. MANN. I will make the point of order that it is legislation on an appropriation bill.

Mr. LEVER. There is no doubt that it is legislation.

The CHAIRMAN. There is no doubt about that.

Mr. LEVER. If the Chair will withhold his ruling for a moment, I want to make a statement.

The CHAIRMAN. Will the gentleman withhold his point of order?

Mr. MANN. Yes; I will reserve it.

Mr. LEVER. The matter of these statutory salaries and lump-sum salaries took the committee by surprise on Saturday. We think we gave the real fundamental reasons in the discussion on Saturday, but since that time I have had prepared for me a memorandum for the Secretary of Agriculture himself, sustaining the viewpoint of the committee; but I feel this way about it: If Congress desires this segregation, in the face of the opinion of the best experts of the country to the contrary, the Committee on Agriculture is no more and no less than the servant of the House; and I will suggest to my friend from North Carolina that if he will reserve this amendment and offer it under the miscellaneous items of the bill, near the end of it, I shall be very glad indeed not to make the point of order, so far as I am concerned, and will debate the question thoroughly and let the committee decide it.

Mr. PAGE of North Carolina. In offering the amendment I recognize, of course, that it is legislation and subject to a point of order, and it will be legislation and subject to a point of order at the place he suggests; and, of course, the gentleman can not pledge other Members of the House.

Mr. LEVER. I said to the gentleman that I would not make it if offered at the place in the bill further on. I will make it here, however.

Mr. PAGE of North Carolina. I readily concede the point of order, and I offer another amendment.

The CHAIRMAN. The point of order is sustained, and the gentleman from North Carolina offers another amendment, which the Clerk will report.

The Clerk read as follows:

At the end of line 20, on page 4, insert the following:

"No money appropriated by this act in any lump sum shall be used to pay for any service or class of work in the Department of Agriculture during the fiscal year 1916 in excess of the rate of compensation paid for such service or work in the department December 31, 1914.

Mr. LEVER. I make the point of order on that that it is legislation.

Mr. PAGE of North Carolina. With respect to the point of order, I submit, respectfully, that it is merely a limitation on the appropriation and is not subject to the point of order. I do not care to argue so simple a matter as that to the present occupant of the chair. I think it is clearly in order for that reason and also because of the Holman rule.

Mr. LEVER. It does not on its face show a reduction.

Mr. PAGE of North Carolina. There is a pretty clear inference; but I submit that it is a limitation on the appropriation, and that such an amendment has time and again been held to be in order.

The CHAIRMAN. May the Chair ask the gentleman by what authority has the department been paying salaries out of the lump-sum appropriation?

Mr. PAGE of North Carolina. No; absolutely without authorization of law, as I understand it.

Mr. LEVER. On the contrary, Mr. Chairman, they have been paying salaries in accordance with section 169 of the Revised Statutes.

Mr. PAGE of North Carolina. However that may be, Mr. Chairman, however they have been fixed or paid, this amendment which has just been read from the desk is nothing more or less than a limitation, so far as the rules of the House are concerned, upon the appropriations carried in this bill.

The CHAIRMAN. The Chair will hear the gentleman from South Carolina, if he desires to be heard.

Mr. LEVER. Mr. Chairman, the Secretary of Agriculture under section 169 of the Revised Statutes, which I will read, is authorized to make such employment of clerks and other officials and employees as he desires. The section reads:

Each head of a department is authorized to employ in his department such number of clerks of the several classes recognized by law and such messengers, assistant messengers, copyists, watchmen, laborers, and other employees and at such rates of compensation, respectively, as may be appropriated for by Congress from year to year.

Mr. PAGE of North Carolina. But, if the gentleman will permit, such salaries as are fixed by law and carried in the appropriations.

Mr. LEVER. The statute says "at such rate of compensation, respectively, as may be appropriated for by Congress from year to year."

Mr. PAGE of North Carolina. Of course; but they are not appropriated for except in the lump sum. My amendment seeks to place a limitation upon the salaries, that they shall not be in excess of those sums.

The CHAIRMAN. The Chair is of the opinion that the amendment is clearly a limitation. It provides that no part of this lump-sum appropriation shall be used in the payment of the salaries in excess of the salaries paid during the present current fiscal year. It seems to the Chair that is a limitation on the use of that lump-sum appropriation and is in order. The Chair overrules the point of order.

Mr. PAGE of North Carolina. Mr. Chairman, I want to preface what I desire to say as to the advisability of adopting this amendment by assuring the chairman of the Committee on Agriculture and Members of the Committee of the Whole House on the state of the Union that I have no spirit of antagonism toward the bill or toward the Department of Agriculture. On the other hand, I am entirely friendly to the appropriations carried in this bill for the purpose of investigations by the Agricultural Department, and there is every reason why I should be; but, as I stated here on Saturday in the Committee of the Whole House on the state of the Union, I believe that it is not good practice or that it is not good policy or in the interest of the proper expenditure of our money to appropriate lump sums for the payment of salaries in the executive departments of the Government, and particularly I think it is not wise that these lump sums should go on interminably. The purpose of the amendment I have offered is to give the House, from year to year in the making up of this appropriation and others, some knowledge of the salaries that are paid to the men who are employed other than by the specific direction of Congress and whose salaries are fixed other than by law. I believe it is in the interest not only of good legislation, but I believe it is in the interest of good administration of the Department of Agriculture, and if I did not think so I would not have offered the amendment. I hope it will be adopted.

Mr. LEVER. Mr. Chairman, the proposition proposed by the gentleman from North Carolina has been debated by both officials of the Department of Agriculture and by members of the Committee of Agriculture for 15 years, and we have been trying to work out the best method of handling the scientific force in the Department of Agriculture. The policy of the committee has been to transfer as rapidly as possible to the statutory roll, where we can have our eyes on them, from year to year, such employees as are strictly clerical and as are not merely temporary. I hold in my hand a memorandum furnished me by the Secretary of Agriculture this morning which clearly defines the position of the Department of Agriculture. Not only that, but it clearly defines the position of probably every agricultural thinker in the United States in reference to this matter. I am going to ask that this memorandum be printed in full, but I desire to read only briefly from it at this juncture:

STATEMENT SHOWING THE INADVISABILITY OF MAKING SCIENTIFIC AND TECHNICAL POSITIONS IN THE DEPARTMENT OF AGRICULTURE STATUTORY.

In the light of experience and as the result of extended investigation it is believed that the effect of lump-sum appropriations for salaries for investigational, experimental, and extension work has been to enlarge the scope and usefulness of the Department of Agriculture by enabling the department to undertake new lines of work as authorized and to handle effectively the natural increase of business, and that the effect of prescribing fixed salaries by statutory provision would undoubtedly be to arrest progress by limiting the usefulness and efficiency of the service. In many branches of the Department of Agriculture the volume of business fluctuates greatly during certain seasons, and a force which is sufficient to handle the normal or average amount of work for the year is insufficient to handle it promptly during seasons of great activity.

A system of statutory salaries wherein employees and rates of compensation are definitely fixed by law is workable only in branches of the service whose work is uniform in volume and character and where the force required to handle the work can be estimated a year or more in advance. Obviously such conditions do not obtain in the Department of Agriculture, whose field is steadily extending and diversifying as Congress authorizes and whose work is largely of an investigational or experimental nature.

The experience of the various research institutions throughout the country, including the universities and agricultural experiment stations, shows that work of this character can be most effectively conducted when there is possible a flexibility of compensation sufficient to allow an immediate readjustment of salaries when necessary to meet changed conditions of the work itself or changes in the personnel of the staff.

It is necessary for the head of the Department of Agriculture to have authority to take immediate action to meet efforts which are continuously being made to get investigators to leave the department. In very few cases of this kind is it necessary for the department to pay its employees the amount tendered them by the institutions or commercial organizations, they being willing usualy to remain with the department for much less money than is offered them elsewhere. It is thought that the Secretary ought to have sufficient latitude to handle such cases when they arise and the needs of the service require, otherwise frequently the department would lose the benefit of years of service of an investigator who had not completed the project upon which he was engaged. In a department where the work is largely administrative, regulatory, or routine employees are paid for work completed from day to day, while in the Department of Agriculture a man might not complete a task for a number of years; and if after a service of, say, four or five years, the investigator should receive a tempting offer from an educational institution or a commercial organization it is believed that the department should be in a position to meet the outside offer rather than lose the uncompleted work of such an investigator, for which the department has been paying during the life of the project.

The unavoidable delays in securing specific legislation for employing the technical specialists who may be necessary in the prosecution of work authorized by Congress, or for changing the compensation of those employed, are certain to result in making the work that is of an investigational rather than a regulatory nature more and more stereotyped in character and therefore less useful.

The principal disadvantage in a statutory roll for a scientific force is the lack of flexibility compelling the department to pay higher salaries than is necessary in some cases and preventing it from promptly recognizing its efficient and valuable employees for meritorious service, making it impossible to enlarge the force to meet changing conditions brought about by increased business and new responsibilities, and making it impracticable promptly to take up new lines of agricultural investigation as authorized. The principal advantage of the lump-sum system is that of elasticity, permitting the department to adjust its force to meet the exigencies of the work and to pay such rates of compensaion, within the limit fixed by Congress, as may be necessary to retain the services of efficient employees.

No particular advantage is seen in prescribing by law the number of investigators and experimenters of each grade and class so long as there is a maximum salary limit beyond which the department can not go; on the other hand, it would be a distinct disadvantage and a detriment to the work should Congress prescribe many months in advance a fixed number of employees at specified salaries for each type of investigational work. On some of the projects of the department for a certain period an agronomist would be required, and six or nine months later, in lieu of an agronomist, a pathologist might be needed. Should Congress make a statutory provision for an agronomist the department would be unable to put in that statutory place a pathologist, there being no elasticity to a statutory position.

In the conduct of certain lines of the work of the Department of Agriculture, such as the farmers' cooperative demonstration work, as well as many lines of the investigational and experimental work, the department receives cooperative aid from States, counties, crop-improvement associations, colleges and schools, and various other organizations outside the Federal service, such cooperative aid being applied largely toward the salaries and traveling expenses of the employees engaged in carrying on the work. This cooperative aid, while it amounts to hundreds of thousands of dollars annually, sometimes comes at irregular intervals, the department at times being required to pay the entire salaries of employees engaged on cooperative work, at other times paying part of their salaries only. The work of such employees is at all times under the supervision of officials of the department. To fix by law the salaries of the employees engaged on investigational, experimental, or extension work would render the administration of such work very cumbersome and extravagantly expensive to the Federal Government.

The operation of a statutory system would result in increased cost from lack of flexibility, in that when a vacancy occurred in a higher grade it would likely be filled by promotion from a lower grade, though there might be no one in a lower grade whose services were fully worth the higher salary, or by the appointment of a new man to whom it would not be good policy to pay the higher salary until he had fully demonstrated his value for the work in question.

Some time ago one of the pathologists left the department to go to Cornell University at a greatly increased salary. There was no one available to take his place in the department, and the work was therefore divided among a number of men, his salary being simply credited to the lump-fund appropriation. If his salary had been fixed by law, it would have been thought practically necessary to employ some one who had not yet reached a point where he could earn the salary paid to the gentleman who left the service. The present crop technologist in charge of grain standardization investigations of the department had charge of the work for four years before he reached the salary received by his predecessor in charge of the work. The former plant pathologist in chage of orchard-spraying demonstrations in the Bureau of Plant Industry resigned on January 31, 1912, at which time he received a salary of $2,760 per annum. His successor in charge of orchard-spraying demonstrations, a well-qualified but much younger man, has not yet reached as high a salary, he now receiving but $2,280 per annum. The physiologist formerly in charge of soil bacteriology investigations was receiving a salary of $3,000 per annum when he left our service, and it was six years before his successor reached that salary. The State agent having charge of the farmers' cooperative demonstration work in the State of North Carolina, until a few months ago received a salary of $2,500 per annum, paid entirely by the department, but half his salary, $1,250 per annum, is now paid by a cooperating agency.

The scientific and technical employees in the Government service are paid from lump-sum appropriations in a number of departments, among them being the following: The Reclamation Service, the Geological Survey, the Smithsonian Institution, and the Public Health Service.

The entire funds of the Reclamation Service, Department of the Interior, estimated for the current fiscal year at $9,000,000, out of which all salaries are paid, are lump sum, the salaries being fixed by the Secretary of the Interior.

In the Geological Survey there is appropriated for statutory salaries but $65,240, while in the sundry civil act approved August 1, 1914, there is appropriated for every requisite expense for and incident to the authorized work of the Geological Survey, including, among other things, "personal services within the District of Columbia and in the field," to be expended under the regulations from time to time prescribed by the Secretary of the Interior, $1,240,280. For a tabulated statement showing these several appropriations see attached table. In addition there was appropriated for the Geological Survey, in the deficiency act approved April 6, 1914, $100,000 in lump sum available for the payment of personal services.

An officer who is deemed sufficiently competent and trustworthy to be placed in charge of the Department of Agriculture, or any bureau of it, should not only be held responsible for its proper administration, for the proper expenditure of the appropriations made by Congress, but for securing adequate results as well. In this connection it might be said that while the appropriation act of the Department of Agriculture authorizes lump-sum salaries as high as $4,500 per annum, yet in that department there is not a salary paid from a lump sum that reaches that amount within $500.

The marked efficiency in investigational and demonstrational work which the Department of Agriculture has developed in recent years has been largely due to the fact that as soon as the consideration of a problem has disclosed the lines along which it could most effectively be attacked the department has been able to concentrate all the available funds and efforts upon the problem in the most effective way. It is believed that any serious restriction of its freedom of action in this respect would be distinctly harmful and that it would lessen the efficiency and usefulness of the department.

For every expenditure requisite for and incident to the authorized work of the Geological Survey, including the purchase for field use only of not exceeding four motor-propelled vehicles at a total cost not exceeding $2,800, and not exceeding 16 horse-drawn vehicles at a total cost not exceeding $2,400, and personal services in the District of Columbia and in the field, to be expended under the regulations from time to time prescribed by the Secretary of the Interior and under the following heads:

For pay of skilled laborers and various temporary employees	$20,000
For topographic surveys in various portions of the United States	350,000
For geologic surveys in various portions of the United States	400,000
For chemical and physical researches relating to the geology of the United States, including researches with a view of determining geological conditions favorable to the presence of deposits of potash salts	40,000
For preparation of the illustrations of the Geological Survey	18,280
For preparation of the report of the mineral resources of the United States	75,000
For gauging streams and determining the water supply of the United States, the investigation of underground currents and artesian wells, and the preparation of reports upon the best methods of utilizing the water resources	150,000
For purchase of necessary books for the library, including directories and professional and scientific periodicals needed for statistical purposes, including payment in advance for subscriptions to publications	2,000
For engraving and printing geologic maps	$110,000
For continuation of topographic surveys of the public lands that have been or may hereafter be designated as national forests	75,000
Total	1,240,280

Let me give you a specific instance. We have an outbreak of the foot-and-mouth disease in this country, which threatens the cattle industry. If we did not have the flexibility of a lump-sum appropriation, if we provide for an inflexible, inelastic, unbending statutory roll that would enable the Department of Agriculture to employ only sufficient veterinarians to do the work, the country would be utterly at the mercy of this disease, and the Department of Agriculture would be bound hand and foot, and could not move a peg in arresting it.

Mr. PAGE of North Carolina. Will the gentleman yield?

Mr. LEVER. I will yield.

Mr. PAGE of North Carolina. I would like to ask the gentleman to point out how in the slightest degree the amendment which I have offered would affect the number of people employed?

Mr. LEVER. The amendment pending as proposed, if it is passed, would be one step further in the direction of the adoption of the amendment the gentleman from North Carolina just introduced, and which went out on the point of order. Now, then, you may have a virulent outbreak of cholera among the hogs in a section of the country. We are carrying $350,000 here in a lump sum to cover such a contingency. We believe it is sufficient, but the disease may be of such a violent nature, and may spread so rapidly, that we would have to call upon the lump sums contained in the bill for the Bureau of Animal Industry for additional sums and make a deficit, as we did with the foot-and-mouth disease, to meet the situation. We need veterinarians, experts to control that disease. Suppose we had written into this bill that you could have only 200 experts engaged in that line of work, and it was found, in order to make it effective, we needed 500 to do it. Do you think it is a good policy, gentlemen, to tie the department up in any such fashion? I want to say to my friend from North Carolina that he and I and other Members of this House must learn to trust the good judgment and the discretion and honesty of the head of this great Department of Agriculture.

This department differs in its work, differs in its manner of conduct, from any other department of the Government.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. LEVER. Mr. Chairman, I ask unanimous consent for three minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. LEVER. The work of the Department of Agriculture is in nowise similar to the work in the Post Office Department, for instance. The officials of the Post Office Department can estimate within 10 men the number of postal clerks they will need a year in advance. But the Secretary of Agriculture must be given some discretion, some leeway, some latitude in meeting emergencies and exigencies which arise and which threaten the very life of some of our greatest industries. As far as I am concerned, I am willing to trust the men who for years and years have been studying this question—consecrated, honest, honorable men, men of wise judgment. I am willing to trust their integrity in the enforcement of the law and in the expenditure of these lump-sum appropriations.

I very much hope the amendment will be voted down overwhelmingly. [Applause.]

Mr. McLAUGHLIN. Mr. Chairman, I hope the amendment will not be agreed to. I may not fully understand it, but I do not remember it just exactly as the gentleman from South Carolina [Mr. LEVER] evidently does. I understand that it does not forbid the employment of more men in any line of work. It would forbid the increase of pay to any man whose salary is now fixed by the department or by law.

Mr. MANN. Will the gentleman yield?

Mr. McLAUGHLIN. I will.

Mr. MANN. Did the gentleman carefully scan the amendment?

Mr. McLAUGHLIN. I only heard it read. I have not taken it from the desk to read it myself.

Mr. MANN. It is certainly susceptible to the construction that no more money shall be spent for the work next year than was being spent on December 31.

Mr. LEVER. No matter what the exigency might be.

Mr. PAGE of North Carolina. I beg the gentleman's pardon. If the gentleman will allow——

Mr. McLAUGHLIN. I decline to yield further now. I think if that is true, and I admit it is from the statement made by

the gentleman from Illinois [Mr. MANN] and the gentleman from South Carolina [Mr. LEVER], it is further reason for rejecting the amendment. Now, as to the increase of salaries of men now employed therein, the total number of employees in the Department of Agriculture to-day is at least 14,000, and many of them are paid from the lump sum. A part of them only have their salaries fixed by law and are on what we call the statutory roll. I think it would be unwise for Congress to say by the adoption of this amendment that the Secretary of Agriculture, nor any of the other officials of the department, shall have authority during the year under any circumstances to increase the pay of any man on the lump-sum roll. It would be unwise, it seems to me. Now, certainly, if the amendment is as broad as is suggested, and would forbid the employment of an extra number of men regardless of the emergency or contingency for extra work that might arise, then this amendment ought not to be adopted.

Mr. CANDLER of Mississippi. Mr. Chairman, just a moment.

Mr. GORDON. Does the Chair wish to recognize anyone in favor of the amendment?

The CHAIRMAN. The Chair is only seeking to carry out the usual practice.

Mr. STAFFORD. Mr. Chairman, I would like to inform the Chair that I would like to speak in favor of the amendment.

Mr. GORDON. I am in favor of the amendment. The last two speakers were against it.

The CHAIRMAN. The Chair will recognize the gentleman from Ohio.

Mr. STAFFORD. I wish to be recognized in favor of the amendment.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that debate on this amendment and all amendments thereto close in 40 minutes. That will give us ample time. Then I hope we will go ahead with the reading of the bill.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that debate on this amendment and all amendments thereto close in 40 minutes. Is there objection?

There was no objection.

Mr. CULLOP. Mr. Chairman, I desire to be recognized in support of the amendment.

The CHAIRMAN. The Chair will bear that in mind, but the Chair was proceeding to recognize the gentleman from Ohio [Mr. GORDON].

Mr. STAFFORD. I ask unanimous consent that the amendment be again read for the information of the committee.

The amendment was again reported.

Mr. GORDON. Mr. Chairman, I think the reading of this amendment clearly refutes the contention of the gentleman from Illinois [Mr. MANN] and of the last gentleman who spoke, that the purpose of this amendment is to limit the number of employees. It simply limits the salary. In other words, it attempts to restrict the Department of Agriculture to its constitutional duty and function.

Mr. MANN. Will the gentleman yield for a question?

Mr. GORDON. Yes.

Mr. MANN. Does not the amendment say it restricts the compensation for a class of work?

Mr. GORDON. No; it does not. No official shall receive more than he received on December 31.

Mr. MANN. The gentleman is not as acute as he usually is.

Mr. CANDLER of Mississippi. It says service or class of work.

Mr. GORDON. It certainly does. I think I understand the English language and know what the amendment means.

But so far as I am concerned, I am not especially inclined to delegate to any Secretary of Agriculture or anybody else the constitutional duties imposed upon Congress. If we are not fit to perform these duties, let us amend the Constitution and authorize the Secretary of Agriculture to fix salaries. The Constitution, which we all swore to support here, without equivocation or evasion, provides that no appropriation except for the Army and Navy shall be made for a longer period than one year, I thinks it is.

Now, of course, this is just an indirect way—this thing of appropriating lump sums to some head of a department, and letting him go out and hire people and fix salaries—an indirect way of Congress delegating its functions to some member of the executive department. I am very much surprised that the amendment offered by the gentleman from North Carolina [Mr. PAGE] has not been adopted heretofore. It seems to me clear that it ought to be done.

The last gentleman who spoke, the gentleman from Michigan [Mr. MCLAUGHLIN], seems very willing to concede that the Secretary of Agriculture is very much better qualified than he is to fix these salaries. Well, if he thinks he is not qualified on that subject he ought to resign from the Committee on Agriculture and let somebody be appointed who is willing to take the responsibility.

This appropriation of lump sums to be disbursed at the discretion of executive officers ought not, it seems to me, to be tolerated by Congress. It appears to me, although I am a new Member here, that it is a system of evading responsibility on the part of this House that ought not to be tolerated.

Now, I speak in no spirit of hostility to the distinguished gentleman who is occupying the position of Secretary of Agriculture. But he has not been elected to Congress yet, and this thing of making lump-sum appropriations and allowing the head of a department to raise salaries to suit his own sweet will is, it seems to me, a thing that Congress, when it understands it, ought not to tolerate, and I think the amendment offered by the gentleman from North Carolina is appropriate, necessary, and proper and ought to be adopted. [Applause.]

Mr. STAFFORD rose.

The CHAIRMAN. Is the gentleman from Wisconsin for or against the amendment?

Mr. STAFFORD. I am for the amendment.

The CHAIRMAN. Perhaps the Chair ought to recognize some one who is against it.

Mr. MANN rose.

The CHAIRMAN. Is the gentleman from Illinois opposed to the amendment?

Mr. MANN. Yes; I am opposed to the amendment.

The CHAIRMAN. The Chair will recognize the gentleman.

Mr. MANN. Mr. Chairman, I am not going to take up the time in arguing whether this amendment prevents an increase in the amount appropriated or the amount expended for different classes of work, although that is clearly what the amendment says. However, I do not suppose that is the intention of the author of the amendment. It illustrates, however, the difficulty of preparing an amendment on the floor of the House which will take all the work out of a great department of the Government.

For me, I am in favor of the Department of Agriculture and the development of the work in the Department of Agriculture. I am sorry that so many gentlemen of the House, whenever an agricultural bill comes before the House, make carping criticism of the methods of appropriations for that department, which they forget when appropriations for other departments are up for consideration. First, I believe in making appropriations specifically, and not in lump sums, so far as is possible; but I notice that the great Committee on Appropriations, which holds a membership which can not be excelled or probably equalled in this House, and which very readily criticizes the agricultural bill, which carries a total in the neighborhood of $20,000,000 or $25,000,000—that great committee brings in the sundry civil bill and the legislative bill with lump appropriations galore. Here is a lump-sum appropriation in the sundry civil bill of this year, $2,110,000 in one lump for the Life-Saving Service; $2,350,000 in one lump for the Revenue-Cutter Service; $1,300,000 for salaries, and so forth, in the Bureau of Engraving and Printing; $1,625,000 in a lump sum for the wages of plate printers, and so forth, in the Bureau of Engraving and Printing; $10,150,000 in a lump sum, in a short paragraph, for defraying the expenses of the collection of customs; $2,275,000 in a lump for the Lighthouse Service; $2,649,500 in a lump, in a short paragraph, for the Immigration Service. Why, if such appropriations as those had been included in lump sums by the Committee on Agriculture, not only the gentlemen on the Committee on Appropriations but all the rest of the House would have thrown a fit. But they condone great appropriations in lumps, which ought to be segregated in their own committee, and then they find grievous fault with the Committee on Agriculture.

Mr. Chairman, if this amendment should prevail, it would paralyze the Department of Agriculture. Even if it goes only to the extent that the author desires, what is the situation? The Department of Agriculture picks up young men who wish to take up scientific work. They start them at low salaries and develop them until they become great scientists. It is idle to suppose that you can start a young scientist at a salary of a thousand dollars or twelve hundred and expect him as he remains in the service, developing and growing, to retain that salary, and everyone knows it. These other departments have regular promotions provided by law, but the Department of Agriculture under these lump-sum appropriations does not have the regular promotions provided by law; and if the purpose of the gentleman was to keep from increasing salaries, we all know that it would paralyze the Department of Agriculture; and for me, I am for that department and its great work. [Applause.]

Mr. CULLOP and Mr. STAFFORD rose.

The CHAIRMAN. Is the gentleman from Indiana for or against the amendment?

Mr. CULLOP. I am for the amendment.

The CHAIRMAN. The Chair will recognize the gentleman.

Mr. CULLOP. Mr. Chairman, in order that we may have a clear understanding of the amendment I am going to read it to the committee again. It provides:

No money appropriated by this act in any lump sum shall be used to pay for any service or class of work in the Department of Agriculture during the fiscal year 1916 in excess of the rates of compensation paid for such service or work in the department December 31, 1914.

The amendment does not limit the number of employees, but it does limit the compensation of employees in the class of work for which they are employed and provides that they shall not be paid in excess of the pay they have received this last year. I do not think it is contemplated by the chairman of the committee that the rate of compensation shall be increased, nor would it be necessary under the conditions that it should be; but it is wise legislation to provide now, in the passage of this appropriation bill, that the men who are to be employed in this department for the coming year shall know what the salaries are to be in the class of work or service they are to render. The Secretary of Agriculture, as the head of that department, ought to ask that it be done. Gentlemen say they are for this kind of a law and that this limitation should be fixed by statute. If so, why do they oppose this amendment? That is exactly what it does. Now, I want to say to the distinguished gentleman from South Carolina [Mr. LEVER], the chairman of this committee, that the work done in the foot-and-mouth disease was not satisfactory to the people of this country, especially in the State of Indiana, where this disease existed in some localities; but it was done in such a way as to impose hardship, and in many instances serious charges have been made against the character of work done. The people of that great State sustained great losses because, as some of them assert, of the unfair, unjust, or incompetent handling of this matter. Hardships were imposed on stock feeders and shippers which produced severe and serious criticism and aroused much antipathy against the officials having it in charge.

Mr. LEVER. Will the gentleman yield?

Mr. CULLOP. Certainly.

Mr. LEVER. Did the gentleman vote for the $2,500,000 appropriation carried in the deficiency bill the other day for this work?

Mr. CULLOP. I did; and I advocated the passage of it; but in my judgment the careless work done in this department cost the cattle producers of Indiana twice that sum, a thing which could have been avoided and ought to have been avoided if proper regulations or orders had been promulgated by the department or the official in charge. Stock was jockeyed at stockyards at Indianapolis when there was no reason on earth for it, as well-informed persons assert. If the man in charge of this business from the department had done his duty to the people and the public, it is charged, much would have been saved to stock raisers, and the severe criticisms made in this regard by people who were in position to know would have been avoided; and the stock shippers and the stock producers would not have suffered the loss they have sustained because of the character of work that was performed in this regard in Indiana.

Mr. Chairman, it can not be denied that the manner in which the foot-and-mouth disease has been handled by those in charge of that work has been not only very expensive to the Government but far more so to the farmers in the several States infected. It broke out in a herd of cattle near Niles, Mich., and an official was detailed to examine the herd. He did so, and surely he did not diagnose the disease properly, either because of his incompetency or disregard of duty, because he did not prevent shipments from this herd to be made to different parts of the country, scattering the disease over several States and infecting different sections of the country. It was a serious blunder on some person's part and could have only been the result of either incompetency on his part or a willful neglect of public duty. His conduct in this matter deserves attention from the department he represented, as his acts in this matter were costly and dangerous.

But, sir, it is not only his handling of the disease at Niles, Mich., that deserves criticism, but also in Indiana. The people of that State have suffered immensely because either of his incompetency or his utter disregard of duty. The toll levied upon the stock shippers there because of his want of proper regard for the rights of shippers deserves the severest criticism, they assert, and is receiving it. Because of his failure or inability to properly regulate the matter, stock shippers were "docked" unreasonably in the sale of their stock. He could, if he had been competent and attended properly to his duty, they claim, have prevented this "docking" process in the sale of their stock and prevented the enormous losses many of them sustained. It could have been avoided if he had done his duty in this particular, but it was not done, and whether this failure was the result of incompetency or some other cause I am not advised. It worked a great hardship as well as injustice upon innocent persons, who were in no manner responsible for it or his official position. One thing is clear, however, if he had been competent and done his duty this disease would have been confined to the herd at Niles, Mich., where it first appeared, and would not have been scattered over the country, entailing great loss to both the Government and many cattle producers in several of the States in this Union. That he is receiving public censure does not make reparation to the injured or restore the losses incurred. He deserves further attention, and I hope will receive it. One thing sure, it would seem better attention should be given work of this far-reaching importance in order that a repetition may not occur. Personally I do not know who is to blame, but one thing is apparent, some one is, and whoever it is he should be held responsible.

Mr. Chairman, the amendment does not apply to the class of service or limit the number to be employed in any class or service in the department, but it does limit the compensation of the employees who are to be employed in that service, and provides that it shall not in the coming year exceed what has been paid in the year just closed. I hope the amendment will be adopted.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. Mr. Chairman——

The CHAIRMAN. Is the gentleman from Wisconsin opposed to the amendment?

Mr. STAFFORD. I advised the Chair several times that I am in favor of it, and I have not changed my views.

The CHAIRMAN. The Chair is seeking to divide the time equally between those in favor of the amendment and those opposed to it.

Mr. GORDON. The Chair recognized two gentlemen who were opposed to it.

The CHAIRMAN. The Chair is simply seeking to divide the time equally. The Chair recognizes the gentleman from Wisconsin [Mr. STAFFORD].

Mr. STAFFORD. Mr. Chairman, the only effect of this amendment is to provide that the salaries now paid to employees of any class who are paid out of lump-sum appropriations shall not be increased during the next fiscal year. In private employment to-day it is the policy of every business man, recognizing the business depression that is so general throughout the country, not to increase salaries. From a governmental standpoint where we are paying salaries much in excess of those being paid for similar employment in the world outside, especially in the Agriculture Department, we can well afford, with a deficit facing us for the next fiscal year, to have this restriction placed upon the discretion of the department heads, so that at least for one year the rate of compensation shall not be increased over that paid on December 31, 1914.

It is no new argument for the chairman of this committee to say that the heads of the departments do not wish to be restricted in the expenditure of lump-sum appropriations, as it is invariably true that every head wishes to have free rein in the disbursement of moneys for their bureaus, and from the legislative standpoint this is highly objectionable. There is no bill that so offends in the number of lump-sum appropriations as the Agricultural appropriation bill.

When the Post Office Committee established that great business adjunct of the department, the postal savings bank, did the House grant them unlimited time in which to adjust their salaries? No. Study the legislative appropriation bill and you will find that the salaries of all of these experts are fixed. When we organized the business adjunct of the parcel post, did we place a restriction as to the salaries that we fixed? You will find that we limited the salaries. And that is a business establishment that it might well be argued needed some leeway.

It is for the purpose of placing restrictions upon their discretion, so that they will not waste these moneys that are carried in this bill, that this amendment is offered. Here we have an item carrying $230,000 for farm management. Of that $230,000 the sum of $110,000 is paid for salaries in Washington alone and only $35,000 for salaries without, and the balance for field service. We have another item in this bill for the field investigation of crop estimates. Where in 1914 there were but 15 men receiving salaries of $1,500, in the present estimate they ask for 43 men with salaries of $1,500, another instance of the abuse of lump-sum appropriations. And when we come here trying to restrict the extravagance of this department we are

told that it will interfere with the commendable work that this department is doing in the foot-and-mouth disease and the hog-cholera investigation. We know that that is without merit, for the reason that there will be no salary affected so far as those respective appropriations are concerned. This amendment only provides that the rate of compensation for each individual shall not be increased during the next fiscal year. It places some limitation on increases for the next fiscal year, and I call upon Democrats and Republicans alike who are in favor of retrenchment and the restriction of extravagant appropriations to vote for this commendable amendment.

Mr. CANDLER of Mississippi. Mr. Chairman, this amendment provides that no money shall be used from this lump sum to pay for any service or class of work in the Department of Agriculture during the fiscal year of 1916 in excess of the rate of compensation paid for such service or work in the department December 31, 1914.

Now, it seems that there can be no question as to what construction will be placed on that language. It not only puts a limitation on the amount to be expended for service, but it puts a limitation on the amount to be expended for work, because it says "service or work." The gentleman from Indiana [Mr. CULLOP] says that the amendment proposes to limit the compensation, and nothing else. If it proposes to limit the compensation and nothing else, you will have to change the language of the amendment. I say it is not wise and not best to limit the compensation even, for the reason, as suggested by the gentleman from Illinois [Mr. MANN] a moment ago, that this department employs young men, and having developed them in a line of work of this department, as they grow more useful to the Government of the United States and more beneficial to the people of the United States, it is necessary to pay them an adequate compensation in accordance with their increased efficiency in the labor which they perform. Unless you do pay them adequate compensation private interests will reach out and pluck them from the service in which they have been developed at the expense of the Government and utilize them for their own personal advantage.

Mr. STAFFORD. Will the gentleman yield?

Mr. CANDLER of Mississippi. Yes.

Mr. STAFFORD. Is it not a fact that in the practice of the Agricultural Department, as far as scientific men are employed, when they graduate to a higher class of work they are put to a different class of work and receive a higher compensation, and this amendment does not affect that?

Mr. CANDLER of Mississippi. That is sometimes done where they can be transferred to a higher class of work for which they have been developed by reason of the knowledge that they have acquired in the service that they have performed. Now, the gentleman from Wisconsin [Mr. STAFFORD] says that they fix the salaries in the Post Office Department. There is a wide difference between the services rendered in the Post Office Department and that rendered in the Agricultural Department. The Post Office Department salaries are definitely defined, and the employee works eight hours a day, no more. A scientist in the Agricultural Department is not limited to hours of work, but frequently works all day and oftentimes into the wee small hours of the night.

As I said a moment ago, they are oftentimes taken from the Department of Agriculture and carried out into private enterprises to serve persons in private business. A few years ago, in order to prevent that taking place, Congress authorized, if necessary, a raise in salaries that might be paid to scientists from $4,000 to $4,500. It was necessary to give the department that leeway in order to retain these men in the service. To show that the department is not abusing this discretion that was conferred, they have not raised a single salary above $4,000. That was given as a discretionary power that they might use it when it became necessary, but as it has not become necessary it has not been used. Now, the gentleman stated that private enterprises and business were holding down salaries. Yes; and in the public departments, in the Department of Agriculture we are holding down salaries, because we have not increased salaries in this bill except a few, and they are unimportant and inferior positions, where it was necessary to increase them in order to do justice to the employees who are performing the service. [Applause.]

Mr. PAGE of North Carolina. Mr. Chairman, I regret extremely that a Member of this House in an effort to discharge what he conceives to be his legislative duty can not do so without being held up by members of the Committee on Agriculture and other Members of the House as antagonistic to the Agricultural Department. I also regret extremely that I am censured because I happen to be a member of the Appropriations Committee when I undertake to criticize what I regard to be an unwise legislative practice, or departmental practice, in the bill presented to the House by my friend from South Carolina [Mr. LEVER], and in doing that I regret that I subject to criticism the committee upon which I serve because possibly the same evil has not been corrected in some bills which it handles. Now, I have no antagonism to the Agricultural Department. On the contrary, I am in favor of its encouragement and of making appropriations for the extension of the work that is legitimate. But, on the other hand, I have an abiding conviction that as long as the Congress of the United States, in the Agricultural bill or any other appropriation bill, appropriates money in a lump sum for the payment of personal employment—and without charging anyone who administers that fund with corruption or even with maladministration—it is inevitable that the appropriations will not be used as wisely or salaries fixed as economically as if there was a supervision outside of the Agricultural Department.

I want to call the attention of the committee to the fact that section 5 of the legislative, executive, and judicial appropriation act making appropriations for the fiscal year ending June 30, 1913, reads as follows:

SEC. 5. That any person violating section 4 of the legislative, executive, and judicial appropriation act approved August 5, 1882 (Stat. L., vol. 22, p. 255), shall be summarily removed from office, and may also upon conviction thereof be punished by a fine of not more than $1,000 or by imprisonment for not more than one year.

Now, the statute which that refers to is as follows:

That no civil officer, clerk, draftsman, copyist, messenger, assistant messenger mechanic, watchman, laborer, or other employee shall after the 1st day of October next be employed in any of the executive departments, or subordinate bureaus or offices thereof at the seat of government, except only at such rates and in such numbers, respectively, as may be specifically appropriated for by Congress for such clerical and other personal services for each fiscal year; and no civil officer, clerk, draftsman, copyist, messenger, assistant messenger, mechanic, watchman, laborer, or other employee shall hereafter be employed at the seat of government in any executive department or subordinate bureau or office thereof or be paid from any appropriation made for contingent expenses, or for any specific or general purpose, unless such employment is authorized and payment therefor specifically provided in the law granting the appropriations, and then only for services actually rendered in connection with and for the purposes of the appropriation from which payment is made, and at the rate of compensation usual and proper for such services; and after the 1st day of October next section 172 of the Revised Statutes, and all other laws and parts of laws inconsistent with the provisions of this act, and all laws and parts of laws authorizing the employment of officers, clerks, draftsmen, copyists, messengers, assistant messengers, mechanics, watchmen, laborers, or other employees at a different rate of pay or in excess of the numbers authorized by appropriations made by Congress, be, and they are hereby, repealed; and thereafter all details of civil officers, clerks, or other subordinate employees from places outside of the District of Columbia for duty within the District of Columbia, except temporary details for duty connected with their respective offices, be, and are hereby, prohibited; and thereafter all moneys accruing from lapsed salaries, or from unused appropriations for salaries, shall be covered into the Treasury.

Mr. Chairman, I do not agree with the contention made by the gentleman from Illinois [Mr. MANN] and the gentleman from Mississippi [Mr. CANDLER] that the language of the amendment that I have offered will in the slightest degree affect the amount of money appropriated. It would be asinine, in my judgment, for anybody to pass on it and make such a construction. It says "for compensation or work," the work meaning the service performed, and that construction, I think, would be placed upon it.

I believe it would not do anything except place a limitation on the expenditure of the lump sum for personal employment. It would prevent the lump sums in this act from being used to increase the pay of persons paid from those lump sums over and above the amount paid them on December 31 last.

I ask leave to extend my remarks in the RECORD for the purpose of inserting the remainder of what I read.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina to extend his remarks in the RECORD? [After a pause.] The Chair hears none.

Mr. COOPER. Mr. Chairman, I think that this amendment ought to be adopted. In my judgment, it is susceptible only of the interpretation put upon it by the gentleman who presented it. Fairly interpreted it means that out of this lump-sum appropriation no employee shall receive more compensation for his services than he received last year. I think also that it is extremely unjust to the friends of the amendment to intimate that they are hostile to the Department of Agriculture. I doubt if there be in the House any gentleman more willing to vote reasonable appropriations for the department than I have been. I have always voted for such appropriations and have done my best in every legitimate way to foster the interests of that department. And I consider also that it was very extravagant to say, as was said by a gentleman a few minutes ago, that the adoption of this amendment would paralyze the Department of Agriculture. "Paralyze" was the word he used.

Mr. MOORE. Will the gentleman yield?

Mr. COOPER. I have but a short time, if the gentleman will pardon me.

Mr. MOORE. I desire to ask if the gentleman can tell us whether these employees are continued in the service from year to year or is it a temporary service?

Mr. COOPER. It is my understanding that all of them are regularly in the service from year to year.

The Department of Agriculture sent to the committee which prepared this bill a book of estimates. Here is a copy of that book. It contains a statement—a statement made, remember, by the department itself—showing in detail the number and kind of employees which it desired to have in the bureau and what compensation it proposed that each employee should receive. Why, then, did not this bill make specific, detailed appropriations to cover these specific, detailed estimates for salaries, or for such of them as the committee might deem meritorious? But no; the bill contains nothing of the kind. On the contrary, it puts almost a quarter of a million of dollars into the hands of a bureau chief and tells him to hire men and pay salaries in his discretion.

Now, there is not any use in saying to us who are opposed to lump-sum appropriations based, as this appropriation is based, upon detailed estimates that we are undertaking to paralyze the Department of Agriculture. I know some of these bureau chiefs. All are fine men. But no man ought to be authorized to take $230,000 or more out of the Treasury of the United States and expend it as may please him in paying salaries for employees of the sort listed in this book of estimates. Not even the President of the United States ought to be empowered to expend such a sum in his discretion except to meet a great public emergency.

The gentleman from Illinois said that we ought to make this lump-sum appropriation because, he said, there are young men employed in the department, worthy young men, who must from time to time be promoted and receive more pay or the department can not keep them. Now, if there be any such necessity as this, why did not the book of estimates make reference to this alleged fact and contain an estimate of the amount probably necessary to meet the requirements of the case? The department could easily have told the Committee on Agriculture that there were a certain number of young men in the employ of the department, some of whom were exhibiting much ability, and that it would like so much margin for them. But there is no suggestion of this kind in the estimates. The $230,000 is to be a lump sum for one man to spend in his discretion. The department estimates are not in the slightest degree to bind him. Now, there is no use in attempting to evade the issue. Lump-sum appropriations are bad. The fact strongly urged by the gentleman from Illinois that other bills have contained lump-sum appropriations does not at all justify us in making the lump-sum appropriation in this bill. We ought from session to session of Congress put a stop to such appropriations of the public funds. That previous Congresses have made them affords no reason why we should continue the wrongful practice now. Lump-sum appropriations based on detailed estimates ought to be done away with. [Applause.]

Mr. LEVER. Mr. Chairman, the gentleman from Illinois, who is an exceedingly able lawyer, places upon this amendment one construction. The gentleman from North Carolina [Mr. PAGE], an equally able lawyer, places upon this amendment another construction. My amiable and charming friend, the gentleman from Milwaukee [Mr. STAFFORD], another able lawyer, places upon this amendment one construction. My violent friend from Indiana [Mr. CULLOP], another of the very ablest lawyers in this House, puts upon this amendment another construction. It seems to me that when lawyers differ so radically about the construction of a simple 10-line amendment that it is well for the friends of agriculture to stick to the old line of doing business.

Mr. PAGE of North Carolina. Will the gentleman yield for just one moment in order that I may correct the gentleman? I do not care to be rated in this House as an eminent lawyer when I am not a lawyer at all, and I am the only man who is not a lawyer who has passed upon it.

Mr. LEVER. Well, the gentleman ought to be. The gentleman talks and acts like one. [Laughter.] This proposition to amend and the different constructions that these lawyers place upon it this morning illustrate how dangerous it is to pass a hurriedly drawn amendment which goes to the very vitals of a system that has been growing up for 25 years. I offered this morning, to the gentleman from North Carolina, not to make the point of order on a proposition similar to this if he would offer it at the close of this bill, when we could debate it out, and he would not accept it. I had in my mind a carefully drawn amendment which might do the work so that the committee could pass upon it without any doubt. I intended to oppose my own amendment, but I wanted to know what the committee thought about it.

But the gentleman would not submit to it, and then asked us to pass an amendment upon which no two lawyers in this House can agree. Now, gentlemen, my friend from Wisconsin [Mr. COOPER], who is one of the fairest men in this body, complains because the gentleman from Illinois [Mr. MANN] said that this amendment would paralyze the usefulness and in a measure restrict the activities of the Department of Agriculture. The gentleman from Illinois is absolutely right. I read you from the statement of the distinguished Secretary of Agriculture furnished me this morning:

> The marked efficiency in investigational and demonstrational work which the Department of Agriculture has developed in recent years has been largely due to the fact that as soon as the consideration of a problem has disclosed the lines along which it could most effectively be attacked the department has been able to concentrate all the available funds and efforts upon the problem in the most effective way. It is believed that any serious restriction of its freedom of action in this respect would be distinctly harmful and that it would lessen the efficiency and usefulness of the department.

That is the statement of the head of this department. While I do not and would not accuse the gentleman supporting this amendment of any desire to cripple the Department of Agriculture, I do not hesitate to say that, in my judgment, based upon 12 years of experience on the Agricultural Committee, the adoption of this amendment would work an absolute harmful revolution in the methods of the Department of Agriculture and its great work would suffer immensely. I feel that I have been bred and born, as it were, in the Department of Agriculture. As a Democrat I stood faithfully by that great man, James Wilson, who is so much responsible for building up the department. He stood by this system. I am standing by the distinguished man who is at the head of it now, a learned man, an economist, and a student. He stands by this system, and says that the adoption of an amendment of this character would seriously retard his work. I ask the friends of agriculture to vote down this amendment. [Applause.]

The CHAIRMAN. The time of the gentleman has expired. The question is on the adoption of the amendment offered by the gentleman from North Carolina [Mr. PAGE].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. PAGE of North Carolina. Mr. Chairman, I ask for a division.

The committee divided; and there were—ayes 18, noes 68.

So the amendment was rejected.

The Clerk read as follows:

Total for office of the Secretary of Agriculture, $623,360.

Mr. BOOHER. Mr. Chairman, I move to strike out the last word. I would like to call the attention of the chairman of the committee to the fact that there is an apparent increase in the expense of the office of the Secretary of $283,480 as compared with the bill of last year. I would like to ask the gentleman to explain to the committee why that is.

Mr. LEVER. Twenty-three thousand dollars of the apparent increase is the natural increase carried in the item to investigate and encourage the adoption of new methods of farm practice and farm management, and the other is an increase by way of transfers.

Mr. BOOHER. The balance of that increase, then, is brought about by the rearrangement of the office of the Secretary?

Mr. LEVER. Yes.

Mr. TRIBBLE. Mr. Chairman, I desire to say I followed the chairman of this committee as a friend of agriculture on the question now before the House, and I want to congratulate this House on having the services of such a distinguished and able man, as well as his associates on the committee, Mr. LEE of Georgia and others. But, Mr. Chairman, I want to challenge one statement made by the chairman when he suggested that we should accept the views of the Secretary on agricultural questions.

While I am willing to follow him as a friend of agriculture when he is right and feel that his advice should be sought, still I reserve the right to differ with him when I think he is wrong.

Mr. Chairman, I do not rise to make a lengthy argument at this time on rural credits, but for the purpose of urging immediate action on this the most important economic question now before the American people. When the bill is up for consideration I hope to discuss the issues involved in detail. I have studied the question with much interest, and while I have introduced a bill myself I have no personal ambition to serve and truthfully say what I want is action on rural-credit legislation and the passage of a bill that will add more profit to the farmer and thereby contribute to the happiness of the people on the farm and make more attractive farm life. The Member of this

House who aids in checking the depopulation of the rural districts and stops the overcrowding of towns and cities serves his country well. Let us broaden the field of opportunity of the farmer by giving him long-term loans at reasonable interest rates.

Mr. Chairman, permit me to remind the Democratic Members of the platform pledges at Baltimore to give the farmers rural-credit legislation. The end of this session is near. The needs of a rural-credit banking system in this country are urgent. The commercial banks do short-term business, and in order to meet present-day conditions on the farm and reduce interest on farm loans it is proposed to make farm loans for the purpose of farm improvement. The money advanced by the rural-credit bank must be applied on the farm in such manner as to improve the farm and make farming more profitable. The local associations, being responsible for the return of loans contracted and being the trustees of funds, see that money loaned for farm improvement is properly applied by the person securing the money; and these trustees are personally interested in making no loans to persons who would not take pride in the upbuilding of his farm and community.

There are two schools of thought on farm loans in this House. One favors Government financial aid to the proposed rural-credit banks, while the other is opposed to Government aid, either by the Government loaning directly out of the Treasury or by purchase of stock or bonds of the rural-credit banks. It is generally admitted that the rural-credit banks are a success in European countries without Government aid. There is ready sale for the rural-credit bonds. It is also admitted by both sides that when the various European Governments first established the rural-credit banks the Government gave them financial aid until the bonds were thoroughly established as high-class bonds for investment in the money markets.

Mr. Chairman, the rural banking system has been in operation in some European countries several hundred years, and yet the conditions prevailing in the United States are so different that we can not take the European systems as a safe criterion to follow when enacting legislation to meet our needs. Under European laws it is nearly impossible to sustain loss by a loan should a borrower undertake to default in payment.

Owing to conditions prevailing in Europe the farmers were not dilatory about organizing associations and giving their individual, collective, and mutual obligation to pay all bonds issued; but in this large country of 48 States, with 48 different kinds of collection laws and with our exemption laws and various other laws favorable to borrowers, the environments present difficulties to be overcome. I have seen agricultural financial enterprises operated by farmers for the common good succeed, and I have also seen farmers sustain serious loss by having to assume obligations contracted for the benefit of community participants in financial enterprises promoted for the community uplift.

If we pass a rural credit bill authorizing the organization of rural banks, and call for subscription from the farmer and require his obligation as a member of a rural credit association to guarantee individually, collectively, and mutually the payment of a loan maturing from 5 to 30 years in the future, in my opinion many years will pass before the farmers feel the good effects of such a rural credit bill. The financial gain of those nonborrowing farmers will not be sufficient to induce them readily to guarantee the payment of bonds issued by the association to secure cheap money for a borrowing member of such association. They will hesitate before entering into a surety obligation. The bill I introduced provided that the Government should purchase enough stock to perfect the organization and issue rural credit Government bonds for the purpose of purchasing the bonds issued by the rural credit local banks in sufficient quantity to guarantee the success of the rural credit bank, and as soon as capital seeks these bonds as an investment the Government shall withdraw aid to such banks. If the Government does nothing more than provide a rural credit system and furnishes no Government aid, it will be many years before the farmer receives the much-needed relief. The financial aid of the Government, in my opinion, is absolutely necessary to give confidence in the rural credit banks and assure success to the rural credit system proposed. When the safety as an investment of the rural credit association bonds is established these bonds can be sold as cheaply as Government bonds and funds secured to loan farmers at or near 4 per cent on long-term loans. [Applause.]

Mr. MANN. Mr. Chairman, I want to make an inquiry of the gentleman from South Carolina [Mr. LEVER] in reference to the expense of the office of farm management. Where is the appropriation for the carrying out of the Lever Act?

Mr. LEVER. It is in the State relations service, which you will come to later on in the bill.

Mr. MANN. There is nothing in here that says anything about the Lever Act?

Mr. LEVER. Yes; there is. I will give the gentleman the page in a moment. It is in the State relations service, further on in the bill, and set out specifically.

The Clerk read as follows:

WEATHER BUREAU.

Salaries, Weather Bureau: One chief of bureau, $5,000; 1 assistant chief of bureau, $3,250; 1 chief clerk and executive assistant, $3,000; 1 chief of division of stations and accounts, $2,750; 1 chief of printing division, $2,500; 3 chiefs of division, at $2,000 each; 8 clerks, class 4; 11 clerks, class 3; 23 clerks, class 2; 30 clerks, class 1; 22 clerks, at $1,000 each; 10 clerks, at $900 each; 1 telegraph operator, $1,200; 1 assistant foreman of division, $1,600; 1 chief compositor, $1,400; 1 lithographer, $1,500; 2 lithographers, at $1,200 each; 1 pressman, $1,200; 5 compositors, at $1,250 each; 14 printers, at $1,200 each; 11 printers, at $1,000 each; 4 folders and feeders, at $720 each; 1 chief instrument maker, $1,400; 3 instrument makers, at $1,200 each; 2 skilled mechanics, at $1,200 each; 7 skilled mechanics, at $1,000 each; 1 skilled mechanic, $840; 1 skilled mechanic, $720; 6 skilled artisans, at $840 each; 1 engineer, $1,300; 1 fireman and steam fitter, $840; 4 firemen, at $720 each; 1 captain of the watch, $1,000; 1 electrician, $1,200; 1 gardener, $1,000; 4 repairmen, at $840 each; 6 repairmen, at $720 each; 4 watchmen, at $720 each; 17 messengers, messenger boys, or laborers, at $720 each; 6 messengers, messenger boys, or laborers, at $660 each; 31 messengers, messenger boys, or laborers, at $600 each; 88 messengers, messenger boys, or laborers, at $480 each; 5 messengers, messenger boys, or laborers, at $450 each; 37 messenger boys, at $360 each; 1 charwoman, $360; 3 charwomen, at $240 each; in all, $333,400.

Mr. FOWLER and Mr. PAGE of North Carolina rose.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] is recognized.

Mr. FOWLER. Mr. Chairman, I make the point of order against the provision in line 24, on page 4, "one assistant chief of bureau, $3,250."

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] makes a point of order against the item on line 24, page 4, which reads, "one assistant chief of bureau, $3,250."

Mr. FOWLER. Yes, sir. There is no authorization for this place, Mr. Chairman.

Mr. LEVER. Mr. Chairman, I submit to the Chair that this language from the statute transferring the Weather Bureau Service from the Signal Corps to the Department of Agriculture, section 4, says:

The Weather Bureau shall hereafter consist of one Chief of Weather Bureau and such civilian employees as Congress may annually provide for and as may be necessary to properly perform the duty devolving on said bureau by law.

Mr. FOWLER. Yes; but Congress has not provided for this place.

Mr. LEVER. Congress is doing it now.

Mr. FOWLER. That is my objection.

Mr. LEVER. That is your objection?

Mr. HAWLEY. Will the gentleman from Illinois yield?

Mr. FOWLER. Yes.

Mr. HAWLEY. As I understand the gentleman from Illinois [Mr. FOWLER], he desires to make these salaries specific instead of having them included in the lump-sum appropriation. This assistant chief of the bureau is on the lump-sum roll, and he is paid out of that. If he is transferred, as this proposes to transfer him, it will take him out of the lump-sum and put him on the statutory roll.

Mr. FOWLER. He is the very man that was in league with Willis L. Moore——

Mr. LEVER. Mr. Chairman, I make the point of order that that is not in order.

Mr. FOWLER. The gentleman can not escape the reply——

The CHAIRMAN. The Chair will suggest to the gentleman that he will hear an argument on the point of order.

Mr. FOWLER. I yielded to the gentleman, and he raised the question that the office was an office which was provided for in the lump-sum appropriation. I say, that in the lump sum there is no office provided for, and that is the onus of the lump-sum provision.

Mr. Chairman, the bill did carry some time ago a provision for an assistant, but after the scandalous condition was shown up in the Weather Bureau, when the Executive was compelled to reach out his strong arm in order to stop and cleanse it, this man and this position were dropped.

Mr. LEVER. Mr. Chairman, I would say to the gentleman from Illinois that the provision has not been dropped. The gentleman from Oregon [Mr. HAWLEY] is absolutely right. It has been carried heretofore in the lump sum, and the gentleman whom the gentleman from Illinois is attacking has been in this service for 30 years, and I have no doubt is as honest as the gentleman from Illinois ever had time to be.

Mr. FOWLER. Mr. Chairman, it is queer to me how gentlemen will stand up for men who were turned out of this service——

Mr. LEVER. I do not know the man at all——

Mr. FOWLER. Turned out by the executive department.

Mr. LEVER. The gentleman is absolutely wrong again.

Mr. FOWLER. I repeat, Mr. Chairman, that this provision was carried in the bill some time ago, but after the scandalous conduct in the Weather Bureau and after the President of the United States, with his clean hands, brushed out of this service the unholy and unclean, then this position was dropped, and the man who once held it was taken out of the service. But sometime afterwards he was placed back in the service on the lump-sum cart, and that cart has been hauling him around in the Weather Bureau from time to time for the last year or more.

Now, Mr. Chairman, the appropriation bill for the Department of Agriculture for the year ending June 30, 1914, among other things, provided—and that was when I was making war on the immense increase not only in the number of employees but against the unwarranted increase in the salaries—this provision was adopted and placed practically at the end of that bill, and it reads as follows:

And hereafter every officer and employee of the Department of Agriculture whose rate of compensation is specified herein shall receive compensation at the rate so specified.

The CHAIRMAN. The Chair will state to the gentleman that he is ready to rule, but he will hear the gentleman longer if he has anything more to say.

Mr. FOWLER. At that time, Mr. Chairman—and I hold before me a copy of the law—the provision for the Weather Bureau carried with it a provision for a salary of $6,000 for the chief, and for the assistant $3,250. At the last session of Congress—the last general session of Congress—this position was dropped, and it was dropped because of the fact that there was, as I recollect, such a strong opposition to the man who held that position that he had to be dropped out of the service, and hence the office was discontinued.

Now, Mr. Chairman, there is an effort on the part of the Committee on Agriculture to revive this place for the sole purpose of placing back this discredited man, who ought to have forever forfeited his right to any service in any department of this great Government.

The CHAIRMAN. The Chair will state to the gentleman that there is ample authority for the appointment by the Chief of the Weather Bureau of this assistant. It also appears that it is only a transfer from the lump sum to the statutory roll. The Chair has no knowledge of the man who is to fill the position, and if he had it would not affect the position of the Chair.

Mr. FOWLER. Mr. Chairman, will the Chair permit an interruption?

The CHAIRMAN. Yes.

Mr. FOWLER. There is no transfer of this position from the lump sum, because it was once provided for regularly in the bill and was dropped entirely.

The CHAIRMAN. The Chair has already ruled, and the Clerk will read.

Mr. FOWLER. Mr. Chairman, I desire to be placed on record correctly in the matter.

The CHAIRMAN. The Chair will make this statement—if he is correctly informed on that subject, he will make this suggestion to the gentleman from Illinois: If the item was not in the law for a few years, it would not affect the law now, and it is in order to appropriate.

Mr. FOWLER. It was not affected by the organic law, except by the general law of appropriation.

The CHAIRMAN. The point of order is overruled.

Mr. FOWLER. The rule is that where it is carried the salary of the last appropriation is the correct salary.

The CHAIRMAN. The point of order is overruled.

Mr. PAGE of North Carolina. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from North Carolina [Mr. PAGE] moves to strike out the last word.

Mr. PAGE of North Carolina. I do it for the purpose of asking the chairman of the committee for information. On line 25, at the bottom of page 5, the bill last year carried 27 messenger boys, at $360 each, and I notice this bill carries 37. What is the reason for this increase of 10?

Mr. LEVER. Ten messenger boys last year were carried under the lump-sum appropriation, and that appropriation has been reduced, and they have been transferred here.

Mr. PAGE of North Carolina. That is satisfactory, Mr. Chairman.

While I have a moment remaining, I want to make a little clearer my position and that of my committee when attacked, or when reference was made by the gentleman from Illinois [Mr. MANN] to our carrying lump-sum appropriations from which personal compensation was paid. I desire to call the attention of the committee and of the House to the fact that in the act making appropriations to supply deficiencies in the appropriations for the fiscal year 1912 and for prior years this language occurs in section 7:

SEC. 7. That no part of any money contained herein or hereafter appropriated in lump sum shall be available for the payment of personal services at a rate of compensation in excess of that paid for the same or similar services during the fiscal year 1912; nor shall any person employed at a specific salary be hereafter transferred and hereafter paid from a lump-sum appropriation a rate of compensation greater than such specific salary, and the heads of departments shall cause this provision to be enforced.

Now, Mr. Chairman, in the legislative act for the fiscal year 1913 that section 7 was amended to read as follows:

SEC. 7. That no part of any money contained herein or hereafter appropriated in lump-sum shall be available for the payment of personal services at a rate of compensation in excess of that paid for the same or similar services during the preceding fiscal year; nor shall any person employed at a specific salary be hereafter transferred and hereafter paid from a lump-sum appropriation a rate of compensation greater than such specific salary, and the heads of departments shall cause this provision to be enforced: *Provided*, That this section shall not apply to mechanics, artisans, their helpers and assistants, laborers, or any other employees whose duties are of similar character and required in carrying on the various manufacturing or constructing operations of the Government.

Mr. Chairman, that law applies to every single department of this Government except the Agricultural Department, and the salaries carried in lump sums in other bills, in the sundry civil bill, for instance, for various departments of the Government, are controlled absolutely by the language I have read from the law. In the Agricultural appropriation bill enacted for the year ending June 30, 1914, a specific exception is made to these two provisions of law as they touch the Agricultural Department.

I felt, Mr. Chairman, that I should say this much and place this statement in the RECORD in reply to the statement made by the gentleman from Illinois that the amendment I have offered to this bill might apply to other bills that come from the committee on which I serve. I want to say to him and to the committee that the language I have read, limiting this matter, applies to all those bills except the Agricultural appropriation bill.

Mr. MOORE. Will the gentleman yield for a question?

Mr. PAGE of North Carolina. I yield to the gentleman.

Mr. MOORE. I want to ask the gentleman if this provision that he refers to as being in the legislative, executive, and judicial appropriation bill is not now in force with regard to arsenals, navy yards, and other institutions of that kind where Federal employees are engaged at yearly stipends?

Mr. PAGE of North Carolina. It applies, with the exception made in that later law which I read, which exempts certain classes of employees.

Mr. MOORE. Since that provision is being applied in that way, and is being complained of by those who think it works hardship in certain arsenals, and so forth, why should an exception be made in the Agricultural Department, where they are still permitted, at discretion, to give increased salaries or to pay special compensation?

Mr. PAGE of North Carolina. I do not know how the gentleman from Pennsylvania voted on my amendment awhile ago.

Mr. MOORE. I voted for the gentleman's amendment, for the reason that while I believe in paying fair compensation I do not believe an exception should be made against those who work in the industries and in favor of those who work in the Agricultural Department. It seems to me that they should be treated alike.

Mr. PAGE of North Carolina. My position has been stated in reference to the gentleman's question.

Mr. MANN. Will the gentleman yield for a question?

Mr. PAGE of North Carolina. Certainly.

Mr. MANN. Where is that exception carried for the Agricultural Department?

Mr. PAGE of North Carolina. That exception is carried in the Agricultural bill for the fiscal year ending June 30, 1914.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PAGE of North Carolina. I ask for two minutes more to answer this question.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent to proceed for two minutes. Is there objection?

There was no objection.

Mr. PAGE of North Carolina. In reply to the question of the gentleman from Illinois, I will state that the paragraph making an exception of the Agricultural Department from the operation of the provisions that I read from the deficiency and

legislative acts is carried in the Agricultural appropriation act approved March 4, 1913, on page 20, in the last paragraph of that page.

Mr. MANN. I remember it. I just wanted to get it in the RECORD; that is all.

Mr. PAGE of North Carolina. Mr. Chairman, that is all I desire to say. I wanted merely to let the Committee of the Whole know that there was a provision of law applicable to every other appropriation bill except the one now under consideration. Therefore, what the gentleman has to say about the application of this to the sundry civil bill, which comes from the Appropriations Committee, does not hold, because there is this limitation placed upon it, the exact limitation that I was endeavoring to place upon the Agricultural bill.

Mr. MANN. Mr. Chairman, I move to strike out the last word. The gentleman from North Carolina [Mr. PAGE] and myself are quite in accord in theory upon the subject of lump-sum appropriations. The real distinction between us is that the gentleman from North Carolina opposes lump-sum appropriations in the Agricultural bill, but encourages them in the bills which come from his own committee. I oppose them in both places, and seek to have specific appropriations made in both cases as far as possible, whether it is in the Agricultural bill or the sundry civil bill that comes from the Committee on Appropriations, or the legislative bill that comes from the Committee on Appropriations, or any other bills that come from the committee of which my friend from North Carolina [Mr. PAGE] is an honored and distinguished member. Now, it is no criticism of the gentleman from North Carolina that these items are carried in the sundry civil bill. He has been overpowered in that committee in the past. He went on the committee some years ago, and is growing up nearer to the head of the committee, and doubtless will soon have his way in the committee, when these $10,000,000 lump-sum appropriations and $2,000,000 lump-sum appropriations now carried in the sundry civil bill will disappear. I cordially join with him in the effort to segregate them into separate items.

Mr. PAGE of North Carolina. Will the gentleman yield?

Mr. MANN. I yield to the gentleman.

Mr. PAGE of North Carolina. I think the gentleman ought, at any rate, to accord to me the credit for the effort that has been made, which has been effective so far as the other bills are concerned.

Mr. MANN. I am coming to that. It seems that I can not quite please the gentleman from North Carolina. In the midst of a commendation of the gentleman for his effort he still insists that I am criticizing him. I am not. I am commending him. I want to join with him to abolish these abominable lump-sum appropriations reported from the Committee on Appropriations right along, while they are criticizing such things if any other committee does them.

My friend from North Carolina refers to a provision in the old legislative bill which was repealed, so far as the Agricultural Department was concerned, by a deliberate act of Congress for reasons which seem sufficient to Congress. The Committee on Appropriations, seeing the abuses growing out of lump-sum appropriations, have on several occasions endeavored to correct some of those abuses by legislation, and the provisions in the two laws to which the gentleman has referred were two efforts made by the Committee on Appropriations. But my friend from North Carolina did not cite the last effort made by the Committee on Appropriations, which does not apply to the Agricultural Department. The Committee on Appropriations have three times, by legislation, endeavored to correct these abuses, and each time they admit their efforts are in vain, that they have not learned how, or if they have learned how they have not acted upon the information, to prepare the necessary form of language to cover the case. And yet my distinguished and beloved friend from North Carolina attempted a little while ago to do it on the floor in pencil in a sentence, without a moment's warning, and thought he could accomplish it. In the last sundry civil appropriation bill which was approved last August only the Committee on Appropriations tried its hand again.

[The time of Mr. MANN having expired, by unanimous consent it was extended five minutes.]

This act was passed after the Agriculture Department had been excepted from the provisions of the previous act. This act was designed by the Committee on Appropriations to be put into law without the knowledge of the members of the Committee on Agriculture in order to overcome the exception which members of the Committee on Agriculture had put into the law without the knowledge of the Committee on Appropriations. [Laughter.]

Section 12 provides:

SEC. 12. That it shall not be lawful hereafter to pay to any person, employed in the service of the United States under any general or lump-sum appropriation, any sum additional to the regular compensation received for or attached to any employment held prior to an appointment or designation as acting for or instead of an occupant of any other office or employment. This provision shall not be construed as prohibiting regular and permanent appointments by promotion from lower to higher grades of employments.

This provision put into the law covering the Agricultural Department was designed to accomplish the purpose which the amendment offered by the gentleman from North Carolina this morning was designed to accomplish, according to his statement. But this provision was so clumsily drawn, notwithstanding it passed in both Houses of Congress, that it would take my friend from Philadelphia or some Philadelphia lawyer to unravel it and tell what its effect was. It covered the Agricultural Department. It is a little plainer, in my judgment, than the amendment offered this morning by my friend from North Carolina. Very likely, before the present Agricultural bill becomes a law, there will be a provision inserted excepting the Department of Agriculture from the provisions of this law, and the committee will put into the sundry civil bill another provision covering the Department of Agriculture, and so on ad infinitum.

Mr. PAGE of North Carolina. Will the gentleman yield?

Mr. MANN. Yes.

Mr. PAGE of North Carolina. The gentleman very rarely needs any information as to what has taken place, but as far as my recollection goes the provision in the sundry civil bill was offered from the floor by the gentleman from Massachusetts [Mr. GILLETT].

Mr. MANN. He is a member of the Committee on Appropriations; it came from the Committee on Appropriations. I remember when it was offered that it had the approval of the Committee on Appropriations, who had not dared to report it in the bill for fear that the members of the Committee on Agriculture would discover it, and hence it was offered from the floor when they were not paying attention. I did not object.

Mr. GOULDEN. Mr. Chairman, I move to strike out the last word, for the purpose of asking the chairman of the committee a few questions. On page 5, line 19, it says, "17 messengers, messenger boys, or laborers, at $720 each; 6 messengers, messenger boys, or laborers, at $660 each," and then it goes on and designates in like language—184 messengers, messenger boys, or laborers, in all. What I want to ask is, why can not you separate those and let us know who are the laborers, the messengers, and who are the messenger boys; and, in the second place, why you have so many in the Weather Bureau?

Mr. LEVER. Let me say to the gentleman, first, of course there is employed in the central office at Washington a number of messengers, which will be found in other items in the bill. In addition, we appropriate for 206 Weather Bureau stations in different parts of the country, in which there are a great many messenger boys, who handle messages and the business of the station.

Mr. GOULDEN. What would be the particular duty of a messenger boy in an outlying station?

Mr. LEVER. If a telegram comes in showing an observation or forecast and that forecast is to be sent to the bulletin boards in a city, like the great city of New York, on exchange, the messenger boy would handle that as a part of his duty. Another part of his duty is to learn to be an observer himself. He grows up in the service, as it were, and these messenger boys are really students of meteorology.

Mr. GOULDEN. Have you increased the salaries of these boys from year to year as they grow older in the service and in usefulness? I see that they run all the way from $360 to $720 per year.

Mr. LEVER. We have not increased the salaries this year, but they are graded. Now, as to why we call the messenger boy a laborer. It sometimes happens that one of these boys may be desired not only to do messenger service, but to do a laborer's service as well. The Civil Service Commission has held that in order that that may be done the title shall be such as to permit it, and so the title conforms to the civil-service regulation.

Mr. GOULDEN. Would it be possible to separate this item into so many messengers and so many laborers?

Mr. LEVER. It would be possible, but it would make the service more expensive. Here is a boy acting as a messenger for two or three hours in the day and the balance of the day he is needed as a laborer.

Mr. GOULDEN. What struck me was the large number, and I wanted to know their use and why they could not be

segregated. Mr. Chairman, I withdraw the pro forma amendment.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. LINTHICUM having taken the chair as Speaker pro tempore, a message, in writing, from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills and resolutions of the following titles:

December 28, 1914:

H. R. 6867. An act to increase and fix the compensation of the collector of customs for the customs collection district of Omaha.

January 7, 1915:

H. R. 6939. An act to reimburse Edward B. Kelley for moneys expended while superintendent of the Rosebud Indian Agency in South Dakota.

January 11, 1915:

H. R. 13698. An act for the relief of Charles A. Coulson.

January 14, 1915:

H. J. Res. 257. Joint resolution authorizing the Commissioner of Patents to exchange printed copies of United States patents with the Dominion of Canada.

January 16, 1915:

H. R. 13815. An act to increase the limit of cost for the construction of a public building at Marlin, Tex.

January 21, 1915:

H. J. Res. 234. Joint resolution directing the selection of a site for the erection of a statue in Washington, D. C., to the memory of the late Maj. Gen. George Gordon Meade.

January 25, 1915.

H. R. 5195. An act for the relief of the Atlantic Canning Co.; and

H. R. 20241. An act making appropriations to supply urgent deficiencies in appropriations for the fiscal year 1915 and prior years, and for other purposes.

AGRICULTURAL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

For necessary expenses outside of the city of Washington incident to collecting and disseminating meteorological, climatological, and marine information, and for investigations in meteorology, climatology, seismology, evaporation, and aerology, $1,185,150, including not to exceed $599,660 for salaries, $122,170 for special observations and reports, $279,000 for telegraphing and telephoning.

Mr. LEVER. Mr. Chairman, I offer a committee amendment to correct a typographical error.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Line 12, on page 8, after the comma, following the word "reports," insert the word "and."

The amendment was agreed to.

Mr. POWERS. Mr. Chairman, I move to strike out the last word. I would like to inquire of the chairman of the committee about this $279,000 for telegraphing and telephoning. It seems like an enormous sum of money for that purpose.

Mr. LEVER. It is a large sum of money, as a matter of fact, I will say to the gentleman from Kentucky, but the gentleman must keep in mind that the Weather Bureau service extends to almost every hamlet in this broad land of ours, the West Indies and the like of that. A few years ago this whole question of telephone and telegraph service in the Weather Bureau was investigated by a subcommittee of the Committee on Agriculture, and that subcommittee was very much pleased with the situation as they found it. It is a large sum of money, but it is necessary in promoting the service.

Mr. STAFFORD. Will the gentleman yield?

Mr. LEVER. Yes.

Mr. STAFFORD. The Committee on the Post Office and Post Roads has recently had some hearings on the postalization of the telegraph and telephone service of the country, and I rise to inquire whether the chairman can inform the committee what rate the Government pays for the very liberal use of the telegraph system by the Weather Bureau.

Mr. LEVER. I am sorry to say I do not have that information right at hand. It is in the committee room, but I do not happen to have it among my papers; but, as I say in answer to the gentleman from Kentucky, this matter was looked into pretty thoroughly by a subcommittee of the Committee on Agriculture several years ago, before I was chairman of the committee, and they felt satisfied with the service.

Mr. STAFFORD. There is a general impression that the Government has a special rate of 1 cent a word, and I was wondering whether that rate applies or whether there were lower terms than that, even when a department or bureau uses it in such a large way.

Mr. LEVER. I see that my data shows that they pay the Government rate for miscellaneous messages, namely, administrative and other telegrams from Washington. This rate is 20 cents for 20 words, and so forth, as fixed by the Postmaster General. Circuit weather reports are sent at special rates fixed by the Secretary of Agriculture by agreement with the companies performing the services. All forecasts, and so forth, for distribution to the public are paid for at Weather Bureau special rates.

Mr. POWERS. I would like to inquire of the gentleman if this is about the usual amount carried in the Agricultural bill for this purpose?

Mr. LEVER. Yes; there is no change in it whatever.

Mr. MANN. There is a $4,000 increase.

Mr. LEVER. That is not an actual increase; it is an apparent increase.

Mr. MANN. Yes; it is increased in this item.

Mr. MOORE. Is this telephoning and telegraphing what is known as official work altogether, or does it go to private concerns?

Mr. LEVER. Oh, no; it is entirely official, as I take it.

Mr. MOORE. There are certain institutions of a private nature that are very much interested in having this kind of information. Do they pay the telephone and telegraph charges when they get the information from the bureau?

Mr. LEVER. I should think so; yes. I think so, although that question has never occurred to me before.

Mr. MOORE. There are certain experimental stations conducted by private individuals, large concerns, and I would like to know whether they pay for information they receive by telephone and telegraph. It is important for them to receive it immediately, of course.

Mr. LEVER. I take it, of course, if they are receiving telegrams for their own private information, they would have to pay for the telegrams. This covers the official telegrams of the Weather Bureau Service.

Mr. MOORE. The Department of Commerce has recently required all those who ask for consular reports to pay for them, and has generally begun a system of economizing with regard to all publications. It seems to me if this information which costs the Government $279,000 is sent to private individuals, the question of making them pay for it ought to be considered.

Mr. LEVER. I am satisfied that is what is done now.

Mr. MADDEN. Will the gentleman yield to me right there? Why should any private individual pay for it when it is a public service?

Mr. LEVER. The gentleman from Pennsylvania has in mind some corporation or some big concern that desires it for its own information, and they pay their own telegrams. I rather think that is likely, but I am not sure.

Mr. MADDEN. They would not pay the reply.

Mr. LEVER. I rather think they pay for the reply, but I am not sure.

Mr. MOORE. That is what I wanted to find out, whether in the event a man wants to know about the weather in order to properly protect his cranberry crop or to cover certain orange trees or take care of potato plants—whether in the event of his seeking that information the Government would pay the expense of advising him. Here is a large item and——

Mr. LEVER. That may be proper; but I do not happen to have the information, because I did not anticipate the question, but I will get it for the gentleman to-morrow if he desires.

Mr. MOORE. I will put it this way, so it can be understood readily: I am conducting a large farm, and it is necessary for me to have certain information quickly in order that I may protect my crops or otherwise safeguard my property. I ask the bureau what the condition of the weather is likely to be to-morrow or the next day. Does the bureau furnish that information for nothing?

Mr. LEVER. I would think not, because I do not think they should do it. If a request comes upon the Weather Bureau to furnish the information to a private individual or private individuals in a community, I think they should pay for it.

Mr. MOORE. I asked the question particularly because——

Mr. LEVER. I think that is the rule, although I am not posted on that, because I did not anticipate the question.

Mr. MOORE. I am asking the question particularly because the Department of Commerce—and I did not care to drag that in now—has insisted that those seeking consular reports shall pay for them, and it is a fair question, in view of the large item of $279,000 for telephone and telegraph.

Mr. LEVER. I will get the information and put it in the RECORD if the gentleman desires it.

Mr. MOORE. I will be very much obliged to the gentleman if he will do so.

Mr. LEVER. I will put it in to-morrow.

Where forecasts are requested for private persons, same must be paid for by the party asking for them. Such reports are never furnished at Government expense. The Weather Bureau maintains in operation 443 miles of telegraph and telephone lines in various sections of the country. Of course all weather information passing over such lines is a free service for the general benefit of the public.

Mr. GOULDEN. Will the gentleman yield?

Mr. LEVER. I yield to the gentleman.

Mr. GOULDEN. On page 6, line 19, it says:

For subsistence, care, and purchase of horses and vehicles, the purchase and repair of harness, for official purposes only.

I want to ask what those horses are used for. What particular use would an official have for them in Washington or elsewhere?

Mr. LEVER. We have two horses out at Mount Weather which they are going to dispose of as quickly as they can, and they have a horse and wagon at the central station in this city.

Mr. GOULDEN. My idea was that the bureau ought to be up to date and not use horses and vehicles, but automobiles, and save time and money in the end, besides being more comfortable.

Mr. LEVER. Well, we will come to that automobile item later.

Mr. GOULDEN. Thank you.

Mr. FOWLER. Mr. Chairman, I move to strike out the last two words.

I find that this bill carries in the Weather Bureau a lump sum of $599,660, a very substantial increase in the lump sum over that carried in the last bill, which was $590,000, in round numbers, and which was carried in the previous bill. Lump-sum provisions in appropriation bills have become very numerous in some of the appropriation bills in the House, while in other departments they are scarcely known. For instance, the Post Office Department has provided for the salary of practically all the servants in that department, so that there is no mistake whatever of the amount to be received. I venture to say, Mr. Chairman, that there is not a department, either in this Government or any other, where there is a greater work carried on with more success and satisfaction than is carried on in the Post Office Department. I take it that it is because of the definiteness which surrounds all of the work, and because of the carrying into effect the vast divisions of this work, according to the law which governs it.

Now, we find in this service under the lump-sum proposition men who get $300 a year for their services, and other men getting the large salary of $3,500 a year, with no system, with no regulation, nothing except the opinion of one man.

It is to be regretted that a former Chief of the Weather Bureau so abused this lump sum that it brought disgrace upon the Department of Agriculture. Not only did he bring disgrace upon the Department of Agriculture, but he forfeited the position which he held by his conduct. Not only that, but he carried with him a large number of employees in the service of this bureau down to disgrace. In order to carry out his scheme and plan to be appointed Secretary of Agriculture, he had automatically, if you choose to call it that way, increased the salaries of a large number of employees under him. These men were to become his henchmen in spreading the news throughout the land at the expense of the United States that he, the Chief of the Weather Bureau, was of such superior quality in his make-up of mind and soul, and his knowledge of the Weather Bureau and the Department of Agriculture, that he alone was the only man fit for the duties of that great position. Mr. Chairman, not only that, but he sent these men broadcast throughout the country to work up sentiment, and they held great banquets at certain places for the purpose of getting certain men and organizations, like the Typographical Union, wedded to his cause. Such are the evils of the lump sum, Mr. Chairman, and such will be an opportunity for like evils whenever a lump sum of any magnitude is placed at the disposal of any one man.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

Mr. MOORE. Mr. Chairman, I rise to oppose the motion of the gentleman from Illinois [Mr. FOWLER].

The CHAIRMAN (Mr. SLAYDEN). The gentleman from Pennsylvania is recognized.

Mr. MOORE. Mr. Chairman, on two occasions the gentleman from Illinois, who is soon, I regret to say, to leave the House, has taken occasion to find fault with a former officer of the Government—the Chief of the Weather Bureau. I have no particular reason to defend this officer, although he was a personal friend of mine, but I feel that when a man is not on the floor and has no opportunity to speak in his own behalf it is only fair that one who does know him should at least say a word for him when he is attacked and can not defend himself. Just what the grievance of the gentleman from Illinois [Mr. FOWLER] is I do not know.

Mr. FOWLER. Will the gentleman yield?

Mr. MOORE. Yes.

Mr. FOWLER. I have no grievance, except that he threatened me at one time if I did not withdraw a point of order against his salary when it was sought to increase it from $4,500 to $6,000 without any legal authority.

Mr. MOORE. The gentleman has always tried to be fair in the House with regard to the treatment of laboring men, and, so far as the gentleman whom he criticizes is concerned, and whom he now says threatened him on one occasion, I will say that he made it a rule also to be the friend of the laboring men.

Mr. FOWLER. Will the gentleman yield?

Mr. MOORE. Yes.

Mr. FOWLER. I desire to say to the gentleman that personally I never knew the Chief of the Weather Bureau until he called me out in a council some two years ago after I had made a point of order against the increase of his salary. Personally I have nothing against him, but I resent anything that is done for the purpose of trying to influence Members of Congress in their conduct here on the floor of this House.

Mr. MOORE. But the gentleman——

Mr. FOWLER. Will the gentleman yield?

The CHAIRMAN. Will the gentleman from Illinois yield?

Mr. FOWLER. I desire to say, further, to the gentleman that I have no disposition to rehearse these grievances, except in connection with the appropriation of lump sums, and had it not been for the lump-sum question I would not have raised this question here.

Mr. MOORE. I think I begin to understand the gentleman from Illinois. If I do understand, the gentleman was called out of the House on one occasion by this Chief of the Weather Bureau, and was threatened?

Mr. FOWLER. Yes.

Mr. MOORE. May I inquire in what way the gentleman from Illinois was threatened?

Mr. FOWLER. Well, as the gentleman from Pennsylvania has well said, it is not very proper to make statements in the absence of other men, and I always feel that that is true. Yet I put it to him, if he was going to punish my constituents if I did not come in and withdraw the point of order against the increase of his salary; and he said: "Most certainly I will. That is the most natural thing to do."

Mr. MOORE. Now, Mr. Chairman, I think I understand the gentleman to say that he did not intend to make a personal assault——

Mr. FOWLER. No; I did not——

Mr. MOORE. Upon this former officer of the Government, and he makes that statement. That I understand to be the gentleman's position?

Mr. FOWLER. Well, in so far as the conduct of the late Chief of the Weather Bureau is concerned, prior to my meeting him I know nothing, but since that time I know a great deal that I have not time to relate.

Mr. MOORE. That is an indefinite sort of statement; but the gentleman agrees as to this, that it is not altogether fair to a man who is not present and who has no right to speak on this floor to attack him in his absence.

Mr. FOWLER. It is an unfortunate thing that sometimes such must be the case. It is the only way we can reach matters, and had his case not been made a matter of record by his removal, then probably I would not have said anything about it.

Mr. MOORE. I have always understood the gentleman to be the friend of the downtrodden, the friend of the poor, the friend of the laboring man, particularly the man who worked on the farm, and his purpose has been rather to aid and uplift than——

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. FOWLER. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for five minutes.

Mr. LEVER. Let it be two minutes.

Mr. MOORE. Two minutes will be sufficient.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the gentleman from Pennsylvania may be permitted to proceed for two minutes. Is there objection?

There was no objection.

Mr. MOORE. Now, if the gentleman will not interrupt me, I shall try to conclude in those two minutes. I think the gentleman and I agree that it is not fair, even though we have the privilege as Members of the House under the Constitution, to say what we please about men who are not here. I think the gentleman agrees with me as to that. Now, as to the former bureau chief, Mr. Willis Moore, my information is that he was a very good sort of a Democrat. I do not mean to say that that would influence the gentleman from Illinois in his criticism. But Mr. Moore was a very earnest officer of the Government, and so far as we know was a very efficient one. I think no finger of criticism can be leveled against him in the matter of integrity. I think it will be found that his record was clean so far as the conduct of the business of his bureau was concerned; a very earnest and a very energetic man. Some may think that at times he was ambitious in that he was extremely anxious to make a good record.

If he threatened the gentleman from Illinois in the manner indicated by the gentleman, I would be very much surprised, because the gentleman from Illinois is an able-bodied man, vigorous and strong in body as well as in intellect.

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

Mr. MOORE. Pardon me for a moment. The gentleman is strong in body as well as in intellect, and I am amazed that he should worry over anyone calling him to the door and making any insinuation that he would do him any harm whatever. In such an emergency the gentleman should have notified his friends in the House. I am sure if such a threat was made, and the gentleman had indicated it to us, some of us would have gone out to help him. [Laughter.]

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. FOWLER. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The debate on this amendment has been exhausted.

Mr. MANN. Let the amendment be reported.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Illinois.

The Clerk read as follows:

Page 8, line 14, strike out line 14.

Mr. FOWLER. Mr. Chairman, I desire to say that I would not have the gentleman from Pennsylvania or any other gentleman on the floor of the House misunderstand me with reference to the late Chief of the Weather Bureau. He never threatened to inflict any violence upon my person, but his threat was to inflict punishment upon my constituency, by virtue of his office, if I did not withdraw the point of order against the increase of his salary. I do not want the RECORD to go out without being complete, because it is just to the gentleman that I should state the matter perfectly fairly and right, because he is not present to give his version on the matter.

I withdraw the pro forma amendment, Mr. Chairman.

Mr. MANN. Mr. Chairman, the gentleman can not withdraw the amendment to strike out the paragraph without unanimous consent.

The CHAIRMAN. The question is on the motion of the gentleman from Illinois to strike out line 14 of page 8 of the bill.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

BUREAU OF ANIMAL INDUSTRY.

Salaries, Bureau of Animal Industry: One chief of bureau, $5,000; 1 chief clerk, $2,500; 1 editor and compiler, $2,250; 6 clerks, class 4; 1 clerk, $1,680; 13 clerks, class 3; 2 clerks, at $1,500 each; 23 clerks, class 2; 2 clerks, at $1,380 each; 3 clerks, at $1,320 each; 1 clerk, $1,300; 1 clerk, $1,260; 42 clerks, class 1; 1 clerk, $1,100; 1 clerk, $1,080; 50 clerks, at $1,000 each; 2 clerks, at $960 each; 65 clerks, at $900 each; 1 architect, $2,000; 1 architect, $900; 1 illustrator, $1,400; 1 laboratory helper, $1,200; 1 laboratory helper, $1,020; 2 laboratory helpers, at $840 each; 1 laboratory helper, $720; 1 laboratory helper, $600; 1 laboratory helper, $480; 1 instrument maker, $1,200; 1 carpenter, $1,100; 2 carpenters, at $1,000 each; 1 messenger and custodian, $1,200; 1 messenger and custodian, $1,000; 1 skilled laborer, $1,000; 32 skilled laborers, at $900 each; 11 messengers, skilled laborers, or laborers, at $840 each; 13 messengers, skilled laborers, or laborers, at $720 each; 4 laborers, messengers, or messenger boys, at $660 each; 11 laborers, messengers, or messenger boys, at $600 each; 3 laborers, messengers, or messenger boys, at $540 each; 33 laborers, messengers, or messenger boys, at $480 each; 6 laborers, messengers, or messenger boys, at $360 each; 1 watchman, $720; 1 charwoman, $600; 1 charwoman, $540; 11 charwomen, at $480 each; 4 charwomen, at $360 each; 1 charwoman, $300; 2 charwomen, at $240 each; in all, $353,630.

Mr. BARTLETT. Mr. Chairman, I move to amend, on page 9, line 8, by striking out "$1,000," after the word "custodian," and inserting "$1,200."

Mr. LEVER. I reserve a point of order on that, Mr. Chairman.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Georgia.

The Clerk read as follows:

Amend, page 9, line 8, by striking out "$1,000," after the word "custodian," and inserting in lieu thereof the figures "$1,200."

Mr. BARTLETT. Mr. Chairman, I do not know whether this employee is on the statutory roll or paid from the lump sum. If he is on the statutory roll, my friend's point of order would be good; but if it is paid from the lump sum, it would not be good. I hope my friend will not insist upon his point of order.

There are two men in this particular service. They do exactly the same kind of work. I have seen the Chief of the Bureau of Animal Industry, and I believe that but for the action of some one above him this increase would have been recommended as being deserved by this employee, but on account of the condition of the Treasury no recommendation for increase in salaries have been made by anyone. These two parties—the one who gets $1,200 and the one who gets $1,000—do exactly the same service. The one who gets the $1,000 resides in my district. He was appointed under a civil-service examination, and because of his merit and worth has been advanced from $600 in the Forestry Service and transferred to the Bureau of Animal Industry until now he is paid $1,000. As I say, he is doing the same identical work, in the same room, in the same service, as the man who is paid the $1,200. He is a competent, efficient, and worthy man, has a good record, and does his work well.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. Certainly.

Mr. MANN. This is for one messenger and custodian?

Mr. BARTLETT. Yes.

Mr. MANN. How is it possible to tell whether the two messengers perform the same service?

Mr. BARTLETT. They are in the same room, right together, and work together at the same kind of work.

Mr. MANN. What do they do?

Mr. BARTLETT. I will read to the gentleman a statement prepared for me, which shows what the duties are:

CUSTODIAN OF SUPPLIES, BUREAU OF ANIMAL INDUSTRY.

In addition to the supervision of the supply room, the custodian is called upon to perform other duties, so that the work of the office of custodian of supplies may be reported in two groups; i. e., office work and outside work.

Office work. Supervision of the supply room constitutes the major portion of the duties of the custodian. The various divisions and field stations of the bureau receive their expendable property and such nonexpendable property not ordered direct from manufacturers through this office. During the fiscal year ending June 30, 1914, 5,335 requisitions for supplies were received and purchases aggregating $26,711.03 made. There remained on hand at the close of the fiscal year stock valued at approximately $25,000. Due to the recent epidemic of foot-and-mouth disease throughout the country, the volume of business has been increased very materially, necessitating much overtime work and an increase in the purchase of supplies.

After examination to see that they have been duly approved by the chief of the division and chief clerk of the bureau, supply requisitions are given to the mailing clerks, who carefully fill each item. Should there be any items on a requisition that can not be filled (due to delays in receipt of supplies from contractors), back orders are made and filled upon receipt of such items in stock. Requisitions are invoiced as soon after being filled as practicable and receipts for nonexpendable properties secured from all divisions and field stations.

Bills of lading for all freight shipments are caused to be made, and all express, incoming and outgoing, and foreign-mail shipments are handled through this office. To minimize loss and breakage, thermometers, inspection-service badges, syringes, brass bands, and special supplies for hog-cholera work are sent by registered mail. Our daily outgoing mail approximates 1½ tons.

Records are kept of all serially numbered supplies, including stamps, certificates, and forms used in the meat inspection and quarantine services, padlocks, seals, metal tags, etc. Detailed records are kept of all supplies received and dispensed, which have a twofold purpose. First, the amount of supplies furnished and used by each division and field station may be ascertained, and, second, the amount of stock on hand at any time may be determined at once. It is the duty of the clerk of this office to see that sufficient stock of all supplies is kept on hand and to cause to be ordered all necessary supplies.

Outside work. Charwomen and laborers come under the supervision of the custodian, and a high efficiency of work is always required. Orders for ice for laboratories are made and accounts kept of towels furnished offices and laboratories and those sent laundries.

This man is as much entitled to the $1,200 as the man who works right by him and with him. They perform the same, identical service; both are faithful and efficient, and both have good records in the service.

Mr. McLAUGHLIN. How long has the young man, in whom the gentleman is interested, been employed in the service?

Mr. BARTLETT. I think he has been there for probably six years.

Mr. McLAUGHLIN. Does the gentleman know how long the other man who gets $1,200 has been employed there?

Mr. BARTLETT. I think about the same length of time or longer. I am not positive about that. I would not say for certain.

Mr. McLAUGHLIN. Has the gentleman any information as to the relative efficiency of these two men?

Mr. BARTLETT. I did have a letter from the chief of the bureau on the subject during the last session, which I have not at hand.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BARTLETT. I ask for one minute more.

The CHAIRMAN. The gentleman asks unanimous consent to proceed for one minute. Is there objection?

There was no objection.

Mr. BARTLETT. I have seen Dr. Melvin with reference to both these men, and he says they are both very efficient. I have no question that if the matter was left to him this increase would not be objected to.

Mr. McLAUGHLIN. Has any recommendation been made for an increase?

Mr. BARTLETT. Not by the Secretary of Agriculture. My information is that a recommendation has been made by the chief of the division, but not by the Secretary.

Mr. McLAUGHLIN. I presume the gentleman knows that on account of the condition of the Democratic Treasury at this time, very few, if any, salaries are being increased.

Mr. BARTLETT. I understand the condition of the Treasury.

Mr. McLAUGHLIN. I might say on account of the Democratic condition of the Treasury.

Mr. BARTLETT. That condition has not been caused, however, by increasing the salaries of men who do work like this.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. If I have time, I will yield with pleasure.

Mr. MANN. Does the gentleman know this man who is performing this service?

Mr. BARTLETT. I know him personally and well.

Mr. MANN. Is he from the gentleman's district?

Mr. BARTLETT. He is.

Mr. MANN. Is he a good man?

Mr. BARTLETT. He is.

Mr. MANN. The gentleman from Georgia has made out a pretty good case. He is one of the oldest Members in this House and one of the ablest Members of the House.

Mr. FORDNEY. And one of the nicest Members of the House. [Applause.]

Mr. MANN. He is going out of the House, much to the regret of the House. I hope the gentleman from South Carolina will withhold his point of order and let the House vote on this proposition.

Mr. BARTLETT. Mr. Chairman, I want to thank my friend.

Mr. MANN. It is not much, and the case seems to be a reasonably fair one.

Mr. LEVER. Mr. Chairman, I dislike very much, of course——

Mr. MANN. Let the House settle it.

Mr. BUTLER. Let the House vote on it.

Mr. LEVER. As the gentleman from Illinois says, the gentleman from Georgia [Mr. BARTLETT] is one of the oldest and most honored Members of this House, and is about to quit its service voluntarily. If the House desires to vote this amendment up, I shall not interpose a technical way of preventing it, although I should like to say to the House that the committee reporting this bill has been exceedingly careful to hold down increases in salaries, and I should hate very much to see a precedent set here.

Mr. MANN. This is no precedent.

Mr. LEVER. I should hate to see a precedent established that other gentlemen would endeavor to take advantage of. With the understanding that this is not to be a precedent, I shall let the House vote upon it, although I myself shall vote against it. I withdraw the point of order.

Mr. FOWLER. Will the gentleman yield?

Mr. LEVER. Yes.

Mr. FOWLER. According to the authorization of the Department of Agriculture and the rulings of the Chair heretofore, I do not think it is subject to a point of order.

Mr. LEVER. The gentleman is absolutely mistaken. This is a statutory provision, and the salary was fixed in the bill of 1914. I withdraw the point of order and ask for a vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. BARTLETT].

The amendment was agreed to.

Mr. TRIBBLE. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, the gentleman from Washington has called my attention to a provision in the preceding section, page 9, lines 7 and 8, that instead of having 1 messenger and custodian, at $1,200, and 1 messenger and custodian, at $1,200, they should be put in one clause.

Mr. LEVER. Mr. Chairman, I ask unanimous consent to return to page 9, lines 7 and 8.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to return to page 9, lines 7 and 8. Is there objection?

There was no objection.

Mr. LEVER. Now, Mr. Chairman, I move to amend, on page 9, lines 7 and 8, by striking out the words "1 messenger and custodian, at $1,200; 1 messenger and custodian, at $1,200," and insert "2 messengers and custodians, at $1,200 each."

The CHAIRMAN. The clerk will report the amendment.

The Clerk read as follows:

Strike out, in lines 7 and 8, page 9, the following language: "One messenger and custodian, at $1,200; 1 messenger and custodian, at $1,200," and insert in lieu thereof "2 messengers and custodians, at $1,200 each."

The amendment was agreed to.

Mr. FOWLER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. FOWLER. How will the remainder of this section be read, by paragraphs, or will we wait until the section is concluded?

The CHAIRMAN. The gentleman can offer a motion at the end of any paragraph.

The Clerk read as follows:

For all necessary expenses for the eradication of southern cattle ticks, $398,800, of which sum $50,000 may be used for live-stock demonstration work, in cooperation with the Bureau of Plant Industry, in areas freed of ticks, and of this amount no part shall be used in the purchase of animals for breeding purposes: *Provided, however*, That no part of this appropriation shall be used in the purchase of materials for or in the construction of dipping vats upon land not owned solely by the United States, except at fairs or expositions where the Department of Agriculture makes exhibits or demonstrations; nor shall any part of this appropriation be used in the purchase of materials or mixtures for use in dipping vats except in experimental or demonstration work carried on by the officials or agents of the Bureau of Animal Industry.

Mr. LEVER. Mr. Chairman, I offer the following committee amendment.

The Clerk read as follows:

Amend, in line 6, page 12, by striking out the words "Bureau of Plant Industry" and inserting "States Relations Service."

The amendment was agreed to.

The Clerk read as follows:

For all necessary expenses for the investigation, treatment, and eradication of hog cholera and dourine, $235,000: *Provided*, That of said sum not less than $50,000 shall be available for expenditure in carrying out the provisions of the act approved March 4, 1913, regulating the preparation, sale, barter, exchange, or shipment of any virus, serum, toxin, or analogous product manufactured in the United States and the importation of such products intended for use in the treatment of domestic animals: *And provided further*, That not more than $75,000 of said sum shall be used for the investigation, treatment, and eradication of the disease known as dourine, and of which sum of $75,000 which is hereby appropriated for the investigation, treatment, and eradication of dourine, $25,000 shall be immediately available: *And it is further provided*, That this appropriation of the sum of $235,000 for the investigation, treatment, and eradication of hog cholera and dourine shall not be construed as preventing the expenditure of any unexpended balances from appropriations heretofore made for the same purpose.

Mr. PAGE of North Carolina. Mr. Chairman, I reserve a point of order against the paragraph. I do so for the purpose of getting some information.

Mr. HAUGEN. Mr. Chairman, I have a committee amendment.

Mr. PAGE of North Carolina. Mr. Chairman, I think an amendment can not be offered to a paragraph against which a point of order is reserved.

The CHAIRMAN. Not if the point of order is made.

Mr. PAGE of North Carolina. I do not want to be forced to make the point of order.

Mr. MANN. I am going to make it if the gentleman does not.

Mr. PAGE of North Carolina. I will let the gentleman from Illinois make it. All I wanted was information.

Mr. MANN. I make the point of order against the last proviso.

Mr. PAGE of North Carolina. My purpose was to find out from the chairman whether the paragraph appropriates $235,000 or $470,000.

Mr. LEVER. The paragraph appropriates $235,000, as shown on the face of the bill, and approximately an additional sum of $140,000, which is an unexpended balance from a former appropriation.

Mr. PAGE of North Carolina. That is, $140,000 out of the $235,000?

Mr. LEVER. No; we passed a separate act last session appropriating $600,000 to be used for hog cholera and dourine, $500,000 to be used for hog cholera. We are informed by the department that of that sum we will have on hand the 1st of July $140,000 unexpended, so that the total appropriation by this act will be $235,000 and the unexpended balance of $140,000, making $375,000.

Mr. PAGE of North Carolina. Mr. Chairman, my objection to this is largely what the gentleman from South Carolina has just stated. Here is a reappropriation of an unexpended balance, and while I raised some objection to appropriating a lump sum to pay employees, it seems to me that this reappropriation indirectly of unexpended balances instead of allowing them to go into the Treasury as miscellaneous receipts is a worse practice than the other.

Mr. LEVER. The estimate, I will say to the gentleman, of the department was for $375,000, but the committee thought that it would be better to appropriate $235,000 and let them expend the unexpended balance.

Mr. PAGE of North Carolina. Then there was an estimate submitted for this amount?

Mr. LEVER. There was a supplemental estimate. It was not in the Book of Estimates.

Mr. PAGE of North Carolina. I would like to say, further, that in the second proviso in regard to the $75,000 for the eradication of dourine, you provide that $25,000 of that shall be immediately available. Now, that is a deficiency, and the appropriation should not be carried in this bill.

Mr. LEVER. It is true it is a deficiency. The hog cholera and dourine were not estimated for in the Book of Estimates, because, I assume, that it was understood by the officials of the department that the committee would take the same action this year as it did last, and report a separate bill; but the committee concluded that it would be hard to get a separate bill through on account of the press of business, and hence, put it in this bill, considering that the work was so important that no objection would be raised to it.

Mr. PAGE of North Carolina. At that point I want to ask the gentleman if he does not think it would be better to appropriate directly the amount they ask for than to put in a reappropriation of an unexpended balance?

Mr. LEVER. That might have been wiser, but it seems to me it is the difference between tweedledee and tweedledum.

Mr. PAGE of North Carolina. That is exactly the lesson I am trying to impress upon the chairman of the Committee on Agriculture, that it is not the difference between tweedledee and tweedledum, that there is a great difference in directly appropriating money for an object and this indirect way of reappropriating money that should, under good legislative procedure, be turned back into the Treasury.

Mr. LEVER. The gentleman from South Carolina is a pretty good learner and he is very glad to have these teachings.

Mr. PAGE of North Carolina. Mr. Chairman, I shall not make the point of order.

Mr. MANN. Mr. Chairman, I make the point of order.

Mr. LEVER. Does the gentleman make it on the entire paragraph, or just on the proviso?

Mr. MANN. To the last proviso.

Mr. LEVER. It is subject to a point of order, of course.

Mr. MANN. It is clearly subject to a point of order, and I would like to get some information. It does not mean anything. What does the gentleman hope to accomplish if this stays in the law? What is the purpose of this proviso?

Mr. LEVER. The purpose in the mind of the committee—I do not know that it would accomplish it—was to reappropriate $140,000 of the $600,000 which we appropriated this year for this work.

Mr. MANN. An item to that effect would be in order and would certainly do something, but the item that is in the bill is not in order; and if enacted into law, would not accomplish that purpose. What is the language of it? You first make an appropriation of $235,000 and then say in the proviso:

> That this appropriation of the sum of $235,000 for the investigation, treatment, and eradication of hog cholera and dourine will not be construed as preventing the expenditure of any unexpended balances from appropriations heretofore made for the same purpose.

Well, now, it would not be so construed if this was not in the law; and if this is in the law, it is not a reappropriation of the sum that has already been appropriated; so it does not mean anything. If the gentleman wants to appropriate the unexpended balance of the appropriations, that is in order, and a proper amendment can be made to do it; but this language enacted into law would make a man who looked at it laugh, if it did not hurt him so that he cried, and would not accomplish anything.

Mr. LEVER. I would say to the gentleman that this language was drawn by the Department of Agriculture; and really I do not think the committee gave very much attention to it.

Mr. MANN. And I have no doubt that the clerk who drew this did not give much attention to it.

Mr. LEVER. Does the gentleman have an amendment to suggest in place of that? I concede the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. MANN. I do not think I could suggest an amendment offhand that would probably accomplish it.

Mr. LEVER. I suggest to the gentleman from Illinois that we pass it over temporarily.

Mr. MANN. I am perfectly willing.

Mr. LEVER. Mr. Chairman, I ask unanimous consent to pass over this item temporarily without prejudice.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to pass over this last proviso without prejudice.

Mr. MANN. Ask leave to return to this proviso and offer the amendment later in reference to hog-cholera items.

Mr. LEVER. Mr. Chairman, I ask unanimous consent to return to this item at a later time for the purpose of offering an amendment.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to return to page 14 for the purpose of offering an amendment at a later period. Is there objection? [After a pause.] The Chair hears none.

Mr. HAUGEN. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

> Amendment by Mr. HAUGEN: Page 14, in line 2, after the word "animals," strike out "*And provided further*" and insert "that $150,000 of the sum appropriated shall be set aside and used for the production of antihog cholera serum to be sold and distributed at its approximate cost."

Mr. LEVER. Mr. Chairman, the Chair understood that this was offered as a committee amendment. The Chair misunderstood the gentleman from Iowa.

The CHAIRMAN. The Chair understood it was a committee amendment.

Mr. HAUGEN. Mr. Chairman, it is not offered as a committee amendment. I offered it on my own responsibility, and in support of the amendment, Mr. Chairman, I wish to say that Congress is confronted with a proposition which seems to me is unwise. The proposition is that Congress shall appropriate $235,000, and of that amount $185,000 shall be available for the eradication of hog cholera. The practice of the department is to manufacture or purchase antihog-cholera serum, go into the several counties—I believe 17—in the various States of the Union to furnish the serum, and to administer it without any expense to the people of those various localities. Upon investigation we find that 17 counties are being supplied with this serum and veterinary service without expense, and, of course, at the expense of the 2,483 counties outside. It does not seem to me that it is just to tax the people of the 2,483 counties for the benefit of people in 17 counties, and probably, as suggested by the distinguished gentleman from Kentucky [Mr. SHERLEY] last year, in response to the greatest pull. But be that as it may; besides, according to the statement of the chief of bureau, Dr. Melvin, foot-and-mouth disease is spread through hog-cholera serum manufactured and sold. I read to you from the hearings, so that there may be no mistake about it. I refer you to page 238:

> Mr. MOSS. Is it not true, Dr. Melvin, that the foot-and-mouth disease was sent into Indiana through hog-cholera serum shipped in from Chicago?
>
> Dr. MELVIN. It was shipped in with virus, not serum. There was a plant located adjacent to the stockyards in Chicago which sent out at least one batch of virus quite extensively in Indiana and Ohio and some in Illinois. Of course this virus—not the serum, but the virus—is obtained from hogs that are sick with cholera, and we know now that in this case these hogs were also sick with the foot-and-mouth disease. The hogs did, of course, manifest hog-cholera lesions, but the foot-and-mouth lesions were not noticed, and the virus caused several outbreaks of foot-and-mouth disease. But the virus was traced as quickly as we learned of this, and a great deal of it was obtained and destroyed.

Now, Mr. Chairman, it does not seem right to me that the Federal Government should inspect these factories and O. K. the serum sent out and in that way spread the foot-and-mouth disease in this country.

I believe that we should act upon the suggestion of Dr. Melvin that a certain amount of money be made available for a laboratory that would enable the department to manufacture the serum; at least what it uses in its operations. My amendment is simply to set aside $150,000 of the $235,000 for the production of this serum.

Mr. MOSS of Indiana. Mr. Chairman, while I am in sympathy, in the main, with the position assumed by the gentleman from Iowa [Mr. HAUGEN], yet I should not want his amendment to prevail. I attach considerable importance to my own activities in securing the inauguration of the work of the department in regard to hog-cholera control. Now, this work comprises really two different activities—one is the manufacture of serum and its practical application, to prove that the hog cholera can be controlled by that method; and, second, the question of supervision by the department of private plants that are engaged in the manufacture of serum and the sale of it to the people of this country.

It must be apparent to everyone that we should have pure virus and pure serum if this method of control is to become successful. The department recognizes just as clearly as the gentleman from Iowa does the truth of that proposition; and all over the United States there are springing up private plants to engage in the manufacture and sale of serum to supply the demand which the successful experimentation by the department has created.

The gentleman from Iowa [Mr. HAUGEN] has called attention of the House to the fact that one plant out of this number sold impure virus; but the Department of Agriculture is now undertaking a strict supervision of all these plants so as to make it impossible that there shall be a repetition of this sale of impure serum, and to develop, if possible, through the supervision of the Government and by private initiative, private energy, and private capital, an ample supply of pure serum for all the people of the United States who may desire to employ this method of hog-cholera control.

It should be remembered that this is only the second year in which the Department of Agriculture has attempted a general demonstration in the field to prove the efficacy of the serum treatment. The gentleman's amendment will lessen the ability of the department to go out on the farms of our country and demonstrate under actual farm conditions the efficacy of the serum treatment, and it would at the same time not give to the department the machinery sufficient to supply serum to all the farmers of the United States. It would cripple the present activities without creating effective effort in the new field suggested by his amendment.

Mr. POWERS. Will the gentleman yield?

Mr. MOSS of Indiana. Not at present, please. I will yield in a moment.

Let us carry out this work as it was originally planned. Let us first demonstrate to the farmers of the United States that hog cholera can be controlled by the serum treatment; that it is entirely possible to make the method a commercial sucess. At the same time let us continue this new field of activity—that of supervision over the private manufacturers—and see if it is not possible to supply serum that is reliable to every farmer in the United States by commercial methods of manufacture and sale. I will concede the fact that if supervision fails, if it becomes apparent that it is impossible for pure and potent serum to be sold to the people of the United States by private manufacture, under the supervision of the Government of the United States, there will be no alternative than for the Government to undertake its manufacture and sale. But I submit that in advance of such demonstration there is no necessity for the United States to begin the commercial manufacture and sale of serum. Considering the shortness of time in which this method of control has been brought prominently before the people of the United States—which is only about two years—and that private manufacturers are just entering the field, I think we ought not to make a radical change in the method of dealing with this most important problem. We have a rational method, it seems to me. First, the United States Government is manufacturing a limited amount of serum, and by sending its experts into representative areas and inoculating exposed hogs it is effectively demonstrating both the method and the value of the treatment. At the same time the manufacture of this serum is being engaged in by private manufacturers in all parts of the United States under Government supervision and control. We have here a sure foundation for broad, rational success.

Mr. POWERS. I would like to ask the gentleman the number of manufacturers engaged in the manufacture of serum?

Mr. MOSS of Indiana. I do not know the exact number; I am told there are about 80. I know there are at least 4 or 5 in my own State, and I think you will find them in all the important hog-raising States of the Union. They are springing up very rapidly.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. MOSS of Indiana. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. POWERS. Then, if the gentleman's amendment is adopted it would put the Government of the United States in competition with these private manufacturers of serum?

Mr. HAUGEN. I would like to answer the question.

Mr. MOSS of Indiana. I yield to the gentleman.

Mr. HAUGEN. The proposition is this: Dr. Melvin came before the committee a year ago. He asked for $100,000 for a laboratory, and the committee denied it. They have been asking now for this $100,000 appropriation to enable the department to make serum for its own use, and Dr. Melvin says it is not right to expect them to use the potent serum.

The department says that it gave to 17 counties the foot-and-mouth disease. Are you going to appropriate $185,000 to spread the foot-and-mouth disease? Here is the committee proposing to appropriate $2,500,000 to stamp out the foot-and-mouth disease, and are we to appropriate $185,000 for the purpose of spreading a disease which we are trying to eradicate from the country? That is the proposition, gentlemen.

Mr. MOSS of Indiana. Mr. Chairman, now, referring to the inquiry of my friend from Kentucky [Mr. POWERS] and also to the remarks of my friend from Iowa [Mr. HAUGEN], of course it would place the Government in competition with these private manufacturers, but in such a small way that I do not think that would be the most objectionable feature. In fact, the amount of money proposed to be devoted to the manufacture of serum would produce so small an amount when measured by the total demand as to suggest the utter inadequacy of the gentleman's proposal, if viewed from a friendly viewpoint. The gentleman from Iowa is too well informed on this subject even to contend seriously that the adoption of his amendment would largely increase the output of serum.

The first objection I urge to the amendment is that, having started out on an experiment along lines which everyone must concede are the very best which can be chosen, we have not followed out that work long enough to bring about definite results, and now it is proposed to change this plan radically. It was only the purpose for the Government to manufacture in a limited way, for purposes of demonstration. It was then proposed to make field demonstrations, to show that serum could be applied successfully under actual farm conditions. Having done this, the Government could withdraw from this field and leave it wholly to private initiative and enterprise. In order to make it possible for the Government to retire it is proposed to take supervisory control of private manufacturing operations to insure purity and strength of their output. This is a rational program, and should have the support of this body, as it has been given that of our committee.

Mr. J. M. C. SMITH. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Indiana yield to the gentleman from Michigan?

Mr. MOSS of Indiana. In a moment. Now, in regard to this unfortunate occurrence that there was some impure virus disseminated. Let me call your attention to the fact that impure virus has in times past been disseminated for the cure of smallpox in human beings, so that it is not an unknown occurrence. It is to be remembered that this impure virus was sent out under unusual circumstances and conditions which will probably never again be present. Besides, the work of supervisory control on the part of the Government had just been inaugurated.

Recognizing these facts, the present bill appropriates money to make this supervision by the Government effective, to extend such control over every manufactory in the United States so that it may be demonstrated that it will be possible to manufacture pure virus in private laboratories.

Mr. J. M. C. SMITH. I would like to inquire if the manufacture of serum is in an experimental stage, or if there is any question but that it can be manufactured successfully?

Mr. MOSS of Indiana. I do not wish to pose as an expert in this matter, but I will say that the manufacture has passed entirely beyond the experimental stage; but it is a fact that in order to keep the serum up to its proper standard of potency it requires careful testing and absolute integrity on the part of the manufacturer.

The demand varies widely in different seasons, so that much loss may be sustained by deterioration of product after manufacture which may not be sold. It may therefore develop that its manufacture can not be done on a profitable basis by private capital. That question is yet to be determined. In fact, the

temptation to hold the product too long is one of the main evils to be overcome.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Indiana yield to the gentleman from Pennsylvania?

Mr. MOSS of Indiana. I do.

Mr. MOORE. Is it not a fact that in these large establishments for the manufacture of serum the Government has an inspection system?

Mr. MOSS of Indiana. That is true.

Mr. MOORE. And you say this bill proposes to improve upon that inspection?

Mr. MOSS of Indiana. It proposes to appropriate more money for that purpose.

Mr. MOORE. So that if impure serum has at any time gone out on the market it is owing to the lack of proper administrative control?

Mr. MOSS of Indiana. That was brought out in the hearings. They said that the supervision over the manufacture of serum is a question that will require experience and perhaps a greater degree of thoroughness than they have given it in the past, but the department recognizes that condition and proposes to meet it.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAUGEN. Mr. Chairman, I would like just in a moment to answer the question propounded by the gentleman from Pennsylvania [Mr. MOORE].

Mr. LEVER. Mr. Chairman, will the gentleman yield for a moment?

The CHAIRMAN. Does the gentleman from Iowa yield to the gentleman from South Carolina?

Mr. HAUGEN. Just in a moment. I would like to proceed for one minute.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. HAUGEN. The amendment proposed does not in any way interfere with the inspection of the present plants. The bill provides for $235,000, and $50,000 is set aside for inspection, which leaves $185,000 for the eradication of hog cholera. I propose to set aside $150,000 of the $185,000, which will give the department $150,000 for the production of the serum and $35,000 for eradication, educational, and demonstration work.

Mr. MOORE. Would not the gentleman's amendment put the Government in competition with these manufacturing establishments that are now under Government inspection?

Mr. HAUGEN. Not at all. There are hundreds of thousands of dollars' worth of this serum turned out each year. One hundred and fifty thousand dollars—that is not a drop in the bucket.

Mr. LEVER. I understand, Mr. Chairman, that several gentlemen may desire to speak on this amendment, and I therefore ask unanimous consent that all debate on this paragraph and amendments thereto close in 15 minutes. I do not think that much time will be taken.

The CHAIRMAN. The gentleman from South Carolina [Mr. LEVER] asks unanimous consent that all debate on this paragraph and amendments thereto close in 15 minutes. Is there objection?

There was no objection.

Mr. McLAUGHLIN. Mr. Chairman, the Committee on Agriculture has given a good deal of attention to this matter in the effort to learn what the department has been doing in the effort to control and eradicate hog cholera, and I am sure I am stating the situation correctly when I say that the committee is convinced that the work so far done by the department is not very satisfactory.

I believe the committee could report, also, that the chief difficulty with the entire proposition is in getting potent, pure serum. An appropriation of $50,000 has been made for the purpose of paying the expense of inspection of privately conducted factories where virus and serum are made, but there is nothing clearer in the world than that with such a sum of money this work can not be carried on properly. Inspectors, if they are to inspect factories so critically as to be sure that the serum is proper in every respect, must inspect more closely than is reasonably possible and must put in more time than they can possibly put in, and the employment of more men than such appropriation as we have made will provide for will be necessary.

Mr. BOOHER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Michigan yield to the gentleman from Missouri?

Mr. McLAUGHLIN. Yes.

Mr. BOOHER. I would like to ask the gentleman if he does not think that instead of using any portion of this money for actual demonstration work it ought all to be used in inspection work? I make the inquiry for this reason——

Mr. McLAUGHLIN. You mean the inspection of factories?

Mr. BOOHER. Yes; of factories—the serum.

Mr. McLAUGHLIN. Oh, we shall have to have money for demonstration work, and we shall have to have money for the production of potent, pure serum.

Now, the Department of Agriculture is suspicious of all serum made in this country except that which it makes itself, or serum made at the laboratories in some of the agricultural colleges of the country. Notwithstanding all the inspection that officials of the Bureau of Animal Industry have been able to carry on at these privately conducted and privately owned laboratories, in no case that I remember have they been willing to use serum from such factories. In no case will it recommend its use. In no case will it guarantee the results of its use. In no case will it undertake the work of inspection or assist in the eradication or control of the disease where serum from these private factories is used. That all being true we are brought down to this one proposition, that pure and potent serum must be supplied, and it seems to me it is up to the Federal Government to make some provision for manufacturing it. It will take a lot of money, but that is a work that must be done.

Mr. MOSS of Indiana. The gentleman does not wish his words to be interpreted as saying that none of the serums manufactured by private plants are effective, or that they will not be potent if used?

Mr. McLAUGHLIN. I state that the testimony of the officials from the Department of Agriculture is to the effect that they themselves are unwilling to use any of the serums from private factories; that they are unwilling to recommend serum from private factories; that they are unwilling to work with it; that they are unwilling to recognize the work done by that serum; that they are unwilling to guarantee a cure, or that preventive measures will be effective if serums from the private factories are used.

Mr. MOORE. Does the gentleman mean to say that the Government does not take any of this serum that is privately manufactured?

Mr. McLAUGHLIN. I will not say that they do not take any, but I will say they do not like to take it. They take very little of it. They do not take it unless they are compelled to, and they have very little confidence in it.

Mr. MOORE. If there is an epidemic of some disease amongst the cattle and serum is needed, where does the Government get it?

Mr. McLAUGHLIN. They are making some of it, and they get the rest of it, when they can, from the laboratories of State agricultural colleges, and the serums made by the Government and by the agricultural colleges are the only serums worth using.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE. I ask unanimous consent that the gentleman's time be extended five minutes.

The CHAIRMAN. The time has been limited by unanimous consent.

Mr. BOOHER. Mr. Chairman, I can not agree with all that the gentleman from Michigan [Mr. McLAUGHLIN] says about the privately manufactured serums. If the Government does not use any of them and does not recommend their use, why do we spend so much money in inspecting these plants and inspecting the serums? If they are not good for anything, why do you spend any money on them? I do not know why just as good serum can not be manufactured at the stock yards in this country as can be manufactured at any place by the Government. I can not understand why men who go into the business as a private enterprise can not manufacture serum of just as good quality as can be manufactured at the agricultural colleges. At all the great stock centers in this country they have plants manufacturing this serum. The Government sends inspectors there. They almost take charge of these establishments, and if their inspection is not good for anything, why do we appropriate money for it?

Mr. McLAUGHLIN. Does the gentleman know that from one of these very factories, inspected by the Government, serum was sent out that when used spread broadcast the foot-and-mouth disease over the country and cost this country millions of dollars?

Mr. BOOHER. If they went and inspected that plant and inspected that serum and permitted it to be sent out, and it spread the foot-and-mouth disease, it is a great pity that the inspectors themselves did not get the foot-and-mouth disease, for their inspection must have been absolutely worthless.

Mr. RUBEY. Mr. Chairman, I desire to correct the statement made by the gentleman from Michigan in this, that it was not

serum which was sent out, but virus which was sent out, which caused the spread of the disease.

Mr. BOOHER. There have been epidemics of other diseases affecting animals, and the Government was not so terribly anxious about the serum used. Take the blackleg, which was very prevalent in the West, and very contagious, and killed all the animals infected. A virus was manufactured that was used by the farmers and veterinary surgeons. They applied it, and they got along very well, and it cured that disease and stamped it out entirely. Now, I believe a virus can be found that will relieve the hog-cholera situation. They have not found anything yet that will cure it, but they do prevent it, if used in proper time. I object more to the appropriation here for the experimental work with this serum than to anything else. We are spending too much money for experimental work. Take the States of Iowa, Missouri, Kansas, and Nebraska, from which most of the hogs in this country come. In those great States in one county they have a man doing experimental work with this serum. The farmers living three or four hundred miles away, or even 50 miles away, get no advantage from that experimental work. They can not go there and wait until some man's hogs are attacked with cholera in order to get some advantage of the experimental work.

In every community all over our country there are veterinary surgeons. They know how to administer this serum, and if the Government, by its inspection service, will provide a good serum, something that will do the work it is intended to do, it will be administered by the people themselves. I remember one year ago, when we had the Agricultural bill up for consideration, I read to the committee a statement from a farmer in my district who had vaccinated his own hogs—242 head of them. It cost him a dollar a head. He got proper serum that prevented hog cholera among his hogs, and some of his neighbors also vaccinated their hogs with the same serum. Not one of the vaccinated hogs died, while those who did not use it lost all their hogs. That was good serum, and it was made in the district in which I live. There are four plants in that district, two of them recently established. I do not know whether they have been inspected yet by the Government, but I do know that the serum of the other two has been approved and sold under Government inspection, and I believe it is inspection that we need, rather than so much experimental work.

Mr. LEVER. Mr. Chairman, may I inquire how much time remains?

The CHAIRMAN. Five minutes.

Mr. LEVER. Do gentlemen on the other side desire any further time?

Mr. HAUGEN. I would like two or three minutes and my colleague three or four minutes. I suggest the gentleman ask unanimous consent to extend the time.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the time be extended 15 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that debate be extended 15 minutes. Is there objection?

There was no objection.

Mr. GOOD. Mr. Chairman, I think this is a very important amendment. The great loss our farmers have sustained not only by hog cholera but through foot-and-mouth disease where that disease has been spread by the use of virus, it seems to me, should caution us to be very careful about voting down an amendment of this kind. In Cedar County, in my district, a veterinary surgeon used virus in the vaccination of hogs afflicted with cholera, and that virus afterwards, it turned out, was made from hogs taken from Chicago that had been infected not only with cholera but also with foot-and-mouth disease. And every place that that veterinary surgeon vaccinated hogs with that virus there developed on that farm a case of foot-and-mouth disease. On the Matthews farm in that county the Government will pay about $8,000 for one-half the value of the cattle and hogs destroyed on that farm because of foot-and-mouth disease.

Dr. Melvin at the hearings has asked that at least $100,000 be appropriated for the purpose suggested by the amendment. In this connection we must remember that the other outbreak of foot-and-mouth disease in the United States originated by importing into this country vaccine for the purpose of vaccinating for smallpox. It is very important that the virus and the serum that we use for the control of hog cholera should be absolutely pure if they are to serve the purpose for which they are intended. The Agricultural Department says that they can not recommend virus or serum that is being used and manufactured by private concerns. In the case of the manufacture of virus it is necessary to use a hog that has hog cholera. At the same time it is important to determine also whether that hog has the foot-and-mouth disease. If it has both, then the use of the virus will communicate the foot-and-mouth disease to the animals, not alone to those that have been vaccinated but also to the rest of the animals on the farm.

It only requires about $100,000 to equip a plant and perform this service, and if the Government is to undertake this work it seems to me that a part of this appropriation could be spent just as Dr. Melvin asks that it be spent, to equip a Government plant that will be adequate for the purpose of educating other manufacturers to do their work and turn out a pure serum and a virus in a scientific way. I hope the amendment may prevail. It does not increase the appropriation, and I believe that a good deal of good will result from it.

Mr. BOOHER. Will the gentleman yield?

Mr. GOOD. Yes.

Mr. BOOHER. Can not all that be accomplished by a thorough system of Government inspection?

Mr. GOOD. We have spent a good deal of money this year in inspection, and yet as many cases of the foot-and-mouth disease originated this year in the United States by the use of hog cholera serum as originated in any other way.

Mr. LEVER. The gentleman from Iowa does not want to make a misstatement. The facts are that the shipment of the virus was from 1 establishment out of 81.

Mr. GOOD. I understand; there was only one factory that made a shipment of that kind, but it was this shipment that started the spread of the foot-and-mouth disease to a large extent, at least this is true so far as Iowa was concerned. We would not have had foot-and-mouth disease in the district I represent but for this kind of virus.

Mr. MANN. Will the gentleman yield?

Mr. GOOD. Yes.

Mr. MANN. What is the distinction between virus, serum, and antitoxin?

Mr. GOOD. I do not know that I can give the gentleman the chemical analysis. I only know that as far as serum is concerned it is used to prevent hog cholera. The virus is used for vaccination after the animal is afflicted with hog cholera, and for the cure of the same. I do not know what the antitoxin is used for.

Mr. POWERS. Mr. Chairman, I have not given the same study to this matter as perhaps have the members of the Committee on Agriculture, but it seems, from the arguments on this floor, that the main objection to the use of the serum coming from the private manufacturers' establishments is that they are impure, and that the Government will neither use them nor recommend their use.

If this argument is carried to its logical conclusion, the Government would therefore say to the people all over the United States that no serum can be depended upon except that which the Government itself deals out. Carrying it further, the Government would usurp the power and authority of manufacturing and selling all the serum that is used over the entire country, because it says, both by its words and conduct, that it deals in the only serum that is reliable or can be depended upon.

It has developed that out of 81 private manufacturing establishments engaged in the manufacture of serum only one of the entire number has put out serum that has been detrimental when used. I shall have to oppose the amendment offered by the gentleman from Iowa. I do not believe this Government should enter into the manufacture and exclusive sale and use of the serums to be used by the people in the United States.

Mr. MOSS of Indiana. Mr. Chairman, do not let us make a mistake in regard to this most important matter. There have been several contentions, and we should not become confused regarding them. First, I want to call attention to the claims that impure virus was disseminated from one private plant in Chicago. That is true; but let me call your attention to the fact that the hog must be sick before the virus can be taken from him. It is a fact that impure virus was sent out, but the hog was supposed to be sick from cholera alone. There was no knowledge that foot-and-mouth disease was prevalent in the United States, and hence it was not even suspected that they were afflicted with the foot-and-mouth disease. It happened, however, that the hogs were sick with cholera and afflicted with the foot-and-mouth disease at the same time. It is a condition which can not arise again, and doubtless it is the last time that such unfortunate results will be experienced. This should not cause Congress to make a radical change of policy in dealing with the plague of hog cholera. Let us keep that in our minds. Now, in regard to the Government not using serum from private plants. The Government plans a certain amount of demonstration work. At the same time the Government manufactures a certain amount of serum at their own plant. They so plan it that they will have enough serum from their own plant to do all the demonstration work they are planning,

and naturally prefer to use serum from their own plant. The reputation of the United States Government is way and above that of any private manufacturer in the United States; the department, in their demonstration work, uses every prevention against failure, and that is the reason they prefer to use serum from their own plant. The Government was charged with the duty of making successful demonstrations, and the department is to be commended for taking every precaution, because its failure would mean the abandonment of this method of hog-cholera control. The fact that its methods are successful is the reason that private laboratories are being built and operated. I want to say that serum manufactured in private laboratories has given the best of results in hundreds of instances. There is absolutely no warrant to charge that the manufacture of serum in private laboratories is a failure. I can give the names of hog raisers in my own district whose herds have been saved by such serum.

This result has been achieved not alone in my State but in many other States, as my friend from Missouri [Mr. BOOHER] has said. The manufacture of serum by private plants all over the United States is due to the fact that the United States Government, first by manufacturing serum and then by actual demonstration, has proven that this method of control is absolutely successful.

Mr. STAFFORD. Will the gentleman yield?

Mr. MOSS of Indiana. I will.

Mr. STAFFORD. The gentleman distinguishes between the word "serum" and the word "virus."

Mr. MOSS of Indiana. Yes, sir.

Mr. STAFFORD. Will the gentleman kindly inform the committee what the distinction is?

Mr. MOSS of Indiana. I do not wish to be considered as a scientific expert——

Mr. STAFFORD. But the gentleman is.

Mr. MOSS of Indiana. Thank you. As I understand the terms "virus" and "serum," there is this distinction to be made: Virus is a living microbe which has the power to perpetuate itself or to reproduce itself when injected in the healthy blood of a suitable host. Virus when introduced in the blood of a healthy hog will produce hog cholera. Standing by itself it has no power to give immunity to hogs, but is a destructive agent. It is used in two ways in hog cholera control work. One is to give hogs acute cholera, so as to use them both in testing the potency of serum and to perpetuate the manufacture of serum; it is also used in the "simultaneous" process of immunizing hogs, which I will describe in a moment.

Serum is rather an antitoxin, and has the power to combat and perhaps to destroy—at least to give limited immunity from the microbes of the hog-cholera virus. Serum as used in this control work is secured by selecting a hog which is immune from hog cholera and injecting into its blood a large portion or "dose" of virus. The blood of such a hog is then drawn and constitutes "serum" as we are using the term. This serum when injected into the blood of a healthy hog gives to the animal a large power of resistance or immunity for a limited period. When complete immunity is desired the "simultaneous" treatment is resorted to. This consists in injecting a small portion of virus and also a full portion of serum. Thus the hog is practically given the cholera by the virus and is made immune by the serum. Through this method full immunity is imparted to the treated animal.

Mr. STAFFORD. And what is "toxin"?

Mr. MOSS of Indiana. A toxin is a poison which does not have the power to reproduce itself. It is a destructive agent; but one more word. The Government now is not only demonstrating to the farmers and others that this method of control can be successfully used, but they are in helpful cooperation with private manufacturers in the United States—a friendly cooperation by supervision so as to make their work equally successful. The Department of Agriculture, through cooperation, through demonstration, hopes to make it possible for every hog grower in the United States to gain an accurate knowledge about the serum method of control and to accomplish the equally important achievement of bringing such serum within the reach of every farmer in the United States. This is the first regular Agricultural appropriation bill which has carried an appropriation for this work. This fact emphasizes how new it is, and I do not want this great cooperative experiment that we have started—an experiment designed to demonstrate the efficacy of potent serum when properly used to protect hogs against exposure of hog cholera, and by means of helpful supervision by the United States Government to enable private manufacturers to perfect their methods so as to supply pure serum and virus to farmers, and thereby proving that both the manufacture and the use of serum are successful and profitable—to fail. I do not want it to be possible to break it down in the very first appropriation bill that comes before the United States Congress.

Mr. LEVER. How much time remains?

The CHAIRMAN. Four minutes.

Mr. HAUGEN. I suggest that the gentleman from South Carolina use his time first. I understood gentlemen on the other side had 5 minutes remaining, and that the time was extended for 15 minutes, which would give 10 minutes to me and 10 minutes to the gentleman from South Carolina. Five minutes has been used on this side and 5 on that side, and there now remains 5 minutes to each side.

The CHAIRMAN. The Chair is inclined to think the gentleman is right. The Chair was calculating 15 minutes in all.

Mr. LEVER. I will ask the gentleman to let me conclude.

The CHAIRMAN. There are 9 minutes remaining.

Mr. LEVER. The gentleman from Iowa has 5 minutes and I will have 4.

Mr. HAUGEN. Mr. Chairman, some gentlemen here seem to be much concerned about competition—that the Government is going into the business of producing the serum and selling it in competition with private concerns. There is no such thought. The $150,000 worth of serum is not as much as a drop in the bucket. There are hundreds of thousands of dollars' worth of this serum sold annually. There are about 81 factories in the country, and in offering this amendment I have no intention of interfering with the manufacture of it; nor do I find fault with the inspection of these factories. I believe they are doing the very best they can do. I want to encourage them in every way I can; but here comes the Chief of Bureau of Animal Industry who has this matter in charge, and he asked the Committee on Agriculture to give $100,000 for a plant. In order that there may be no mistake as to the present plant, I read for the information of the House:

> Dr. MELVIN. As it is, our original plant was a very small affair—put up match boards. The floor space was not half the size of this room—
>
> Referring to the committee room—
>
> To provide for this work, we bought some of these portable houses, put them up, and made them into a laboratory.

That is the recommendation and statement of Dr. Melvin, the chief of the bureau. Will we take the advice of the man in charge, the one who discovered this cure or serum, or will we take the suggestion of somebody else? My amendment is simply to set aside $150,000 so that the department may have a suitable place to prepare the serum, and if there is any surplus that it may be sold at its approximate cost. The department will still be left with $35,000 for the eradication of hog cholera and enough money to carry on experiments in, say, two or three counties. I believe that is all I care to say.

Mr. MOORE. Will the gentleman yield if he has the time?

Mr. HAUGEN. Certainly.

Mr. MOORE. I happen to know of a certain establishment, that I know to be well conducted, and which is subject to Government inspection, and the question with me is—the gentleman has answered the question in the matter of competition—whether, when we have these plants inspected by the Government, it is necessary for the Government to engage in the business itself?

Mr. HAUGEN. I will read to the gentleman from the hearings:

> Dr. MELVIN. I do not think we ought to be expected to use serum except that which we feel fully satisfied is all right.
> Mr. HAUGEN. But you have a way of testing it, have you not?
> Dr. MELVIN. Well, it has to be tested in batches.
> Mr. HAUGEN. Yes.
> Dr. MELVIN. And that requires a good deal of work.
> Mr. HAUGEN. Is it not safe to assume that the States will furnish a serum that is properly made?
> Dr. MELVIN. Most of them would. I would be afraid to trust all of them.

They are not buying serum from the private concerns. They buy from the States. I have said at various times I have faith in it. I believe it has some merit. If you will refer to the hearings, you will find that Dr. Dorset, in charge of this work, represented to the committee that in the county of Dallas, in my own State, out of 118,000 hogs Dallas County lost only 9,182. The reports made to some 1,150 bankers in my State show that Dallas County lost 15,954. The assessor's return of that county reports 16,124 hogs lost during the year 1913.

Mr. LEVER. Mr. Chairman, I rise to oppose the amendment offered by the gentleman from Iowa [Mr. HAUGEN]. Three years ago we began the work of undertaking to find a plan for the eradication of hog cholera, or its control, in this country by an appropriation of $75,000. Last year we appropriated

$500,000 for that purpose, and the department expended it upon plans which they themselves drew. I believe they have demonstrated that the control of hog cholera in this country is a possibility. At the same time Dr. Dorset, in immediate charge of the work, before the committee this year convinced me, and I think a majority of the committee, that the department itself had not as yet concluded what the best method of control was. And this item in this bill is inserted for the purpose of permitting the department to continue its investigational work along such lines as will develop a positive and definite plan of control. I will read to you from the hearings:

The CHAIRMAN. Dr. Dorset, let us see if we can not summarize this thing: Your experience has demonstrated, first, that, if you have a potent serum, you can very largely retard the progress of this disease among the hogs. That is the first proposition your experience brings out?

Dr. DORSET. That we can save the hogs from death from the cholera.

The CHAIRMAN. That you can save them from death from hog cholera if you have a potent serum?

Dr. DORSET. Yes, sir.

The CHAIRMAN. The next proposition is that, if you had plenty of money and plenty of potent serum, you could go into a definite area and eradicate hog cholera. Are you willing to say that?

Dr. DORSET. No, sir.

The CHAIRMAN. You are not willing to say that yet? Your experience also has brought you to the conclusion that the projects outlined by the department and adopted by this committee and by the House probably do not indicate the best way of handling this situation?

Dr. DORSET. No, sir; I will not say that.

The CHAIRMAN. You will not say that?

Dr. DORSET. I think that at the present time it is the best. I think we should continue essentially as we have done, with this fund as an appropriation here in such shape that we can use the larger portion of it for one purpose or another, as may be necessary. For instance, we say in this suggested amendment that not less than $50,000 shall be used for inspecting serum plants.

Mr. HAUGEN. Let me interrupt you just there. You have tried this plan for years. What progress have you made? You discovered the serum nine years ago, and you have been working on it and experimenting with it for nine years. How much more do you know now than you did nine years ago? You have followed this plan. I have read the bulletins issued—I think more than nine years ago; but as you say it was 9 years ago, we will accept that: it seems to me that it was 15 years ago. Whenever it was, they said at that time that this whole problem was solved. Now, what progress have you made? I agree that if you have a potent serum it is an absolute preventive. But you have not the potent serum, and you will not get it if you have to depend on the present system of inspection, and the only way you can furnish it is for the States or the Federal Government to do it. In my opinion, the department never can superintend a hundred factories by any means and get potent serum in that way.

The CHAIRMAN. That is just what we are trying to get an opinion from Dr. Dorset about. In your judgment, out of the experience that you have had, do you believe it is possible to control the hog cholera?

Dr. DORSET. I believe, Mr. Chairman, that it is possible to control the losses from the disease. By that I do not mean at present its eradication.

Mr. HAWLEY. May I ask a question there, Mr. Chairman?

The CHAIRMAN. Yes, certainly.

Mr. HAWLEY. Is this a correct statement, Dr. Dorset: That, with your experience and what you believe can be done, the production of hogs in this country can be safely carried on with a certainty of profit to the farmer?

Dr. DORSET. Yes, sir.

The CHAIRMAN. And the production of hogs increased?

Dr. DORSET. Undoubtedly.

Dr. MELVIN. I think these charts show that.

Mr. MOSS. Do you believe, from your experience, that this present work ought to be carried on by the Government, instead of being dropped?

Dr. DORSET. I believe this work should go on. I believe, Mr. Chairman, that we are just beginning to know what we can do, and we do not yet know the best way to accomplish what we have finally in view—the cheapest and most economical way to do the work efficiently.

Now, the Government is conducting a serum plant at Ames, Iowa. Therefore the Government has the means to demonstrate what potent serum means in the control of hog cholera as against an impotent serum. So it is not necessary to go into the building of a large manufacturing plant to give them the means to investigate that phase of the subject. However, the theory of the committee is that inasmuch as the men in charge of this work admit that they have not come to a definite conclusion, that they have not arrived at a state of mind where they can say that any one plan is feasible, so that some conclusion can be reached, the committee thought it wise to give them this appropriation to continue their investigational work, without any regard to the establishment of a manufacturing plant. We think it would be exceedingly unwise at this time to burden ourselves with a big establishment, which we would have trouble in getting rid of in the future.

Mr. Chairman, I ask for a vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. HAUGEN].

The question was taken, and the amendment was agreed to.

Mr. LEVER. Mr. Chairman, a parliamentary inquiry?

The CHAIRMAN. The gentleman will state it.

Mr. LEVER. A moment ago I reserved the right, with the consent of the committee, to return to this item. I find in looking over the act appropriating $600,000 for the control of hog cholera and duorine that it is a continuing appropriation, and that the language to which the gentleman from Illinois made the point of order and which the Chair sustained was not at all necessary. Therefore it is not necessary for us to return to it. I just wanted to bring it to the attention of the Chair.

The CHAIRMAN. Without objection, the unanimous-consent agreement to return to the point indicated will be canceled and the Clerk will read.

The Clerk read as follows:

Meat inspection, Bureau of Animal Industry: For additional expenses in carrying out the provisions of the meat-inspection act of June 30, 1906 (34 Stat. L., p. 674), there is hereby appropriated for the fiscal year ending June 30, 1916, the sum of $375,000: *Provided*, That the provisions of the meat-inspection law may be extended to the inspection of reindeer.

Mr. MANN. Mr. Speaker, I make the point of order against the proviso.

Mr. LEVER. Mr. Chairman, I concede the point of order.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

Mr. CANDLER of Mississippi. Mr. Chairman, I move to strike out the last word for the purpose of putting in the RECORD statistics showing the value of farm animals in this country. These figures show the importance of this industry. I ask unanimous consent to extend my remarks in the RECORD by printing them.

The CHAIRMAN. Is there objection?

There was no objection.

Following is the article referred to:

VALUE OF FARM ANIMALS—ESTIMATED TO BE WORTH $5,969,253,000, SHOWING LARGE INCREASE.

An increase in farm animals in the United States is shown by statistics given out by the Department of Agriculture. January 1 the animals were valued at $5,969,253,000, an increase of $78,024,000, or 1.3 per cent over their value January 1, 1914.

Horses numbered 21,195,000, an increase of 1.1 per cent over last year; were valued at $103.33 per head, and their aggregate value was $2,190,102,000.

Mules numbered 4,479,000, an increase of 0.7 per cent; were valued at $112.36 per head, and aggregated $503,271,000 in value.

Milch cows numbered 21,262,000, an increase of 2.5 per cent; were valued at $55.33 per head, with an aggregate value of $1,176,838,000.

Other cattle numbered 37,067,000, an increase of 3.4 per cent; were valued at $33.38 per head, with an aggregate value of $1,237,376,000.

Sheep numbered 49,956,000, an increase of 0.5 per cent; were valued at $4.50 per head, with an aggregate value of $224,687,000.

Swine numbered 64,618,000, an increase of 9.6 per cent; were valued at $9.87 per head, with an aggregate value of $637,479,000.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

BUREAU OF PLANT INDUSTRY.

Salaries, Bureau of Plant Industry: One physiologist and pathologist, who shall be chief of bureau, $5,000; 1 chief clerk, $3,000; 1 executive assistant in seed distribution, $2,500; 1 officer in charge of publications, $2,250; 1 landscape gardener, $1,800; 1 officer in charge of records, $2,250; 1 superintendent of seed weighing and mailing, $2,000; 1 executive clerk, $2,250; 3 executive clerks, at $1,980 each; 1 assistant superintendent of seed warehouse, $1,400; 1 seed inspector, $1,000; 1 seed warehouseman, $1,400; 1 seed warehouseman, $1,020; 1 seed warehouseman, $1,000; 1 seed warehouseman, $840; 6 clerks, class 4; 12 clerks, class 3; 2 clerks, at $1,500 each; 21 clerks, class 2; 48 clerks, class 1; 1 clerk or draftsman, $1,200; 1 clerk, $1,080; 8 clerks, at $1,020 each; 23 clerks, at $1,000 each; 45 clerks, at $900 each; 1 clerk or draftsman, $900; 21 clerks, at $840 each; 2 clerks, at $720 each; 1 laborer, $780; 42 messengers or laborers, at $720 each; 11 messengers, messenger boys, or laborers, at $660 each; 26 messengers, messenger boys, or laborers, at $600 each; 1 artist, $1,620; 1 clerk or artist, $1,200; 1 photographer, $1,200; 1 photographer, $840; 1 laboratory aid, $1,440; 1 laboratory aid, $1,380; 3 laboratory aids or clerks, at $1,200 each; 1 laboratory aid or clerk, $1,080; 2 laboratory aids or clerks, at $1,020 each; 1 laboratory aid, $900; 5 laboratory aids, at $840 each; 7 laboratory aids, at $720 each; 4 laboratory aids, at $600 each; 1 laboratory apprentice, $720; 1 map tracer, $600; 2 gardeners, at $1,440 each; 4 gardeners, at $1,200 each; 8 gardeners, at $1,100 each; 15 gardeners, at $900 each; 19 gardeners, at $780 each; two skilled laborers, at $960 each; 2 skilled laborers, at $900 each; 3 skilled laborers, at $840 each; 1 assistant in technology, $1,400; 1 assistant in technology, $1,380; 1 mechanical assistant, $1,200; 1 blacksmith, $900; 1 carpenter, $900; 1 painter, $900; 1 teamster, $840; 1 teamster, $600; 21 laborers, at $540 each; 24 laborers, messengers, or messenger boys, at $480 each; 3 laborers or charwomen, at $480 each; 2 laborers or charwomen, at $360 each; 3 laborers or messenger boys, at $420 each; 16 charwomen, at $240 each; 11 messenger boys, at $360 each; 4 messengers boys, at $300 each; in all, $424,150.

Mr. LEVER. Mr. Chairman, I offer a committee amendment to correct a typographical error.

The CHAIRMAN. The gentleman from South Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Line 20, on page 15, after the word "clerk," insert a comma.

The CHAIRMAN. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. PAGE of North Carolina. Mr. Chairman, I move to strike out the last word, for the purpose of asking a question of the chairman.

The CHAIRMAN. The gentleman from North Carolina moves to strike out the last word.

Mr. PAGE of North Carolina. There seems to be a very considerable difference in the number of employees carried in this item from the current law, and I merely wanted to ask the chairman of the committee if all these were transfers of employees formerly paid from the lump-sum appropriation, or are they new employees?

Mr. LEVER. There are absolutely no new employees on this statutory roll. Some of them have been transferred here from the Bureau of Farm Management; others have been transferred from other bureaus here; but there are absolutely no new places.

Mr. PAGE of North Carolina. Many of these were formerly paid from lump-sum appropriations?

Mr. LEVER. Yes; that is correct.

Mr. PAGE of North Carolina. Mr. Chairman, I withdraw the pro forma amendment.

The CHAIRMAN. The pro forma amendment is withdrawn.

Mr. STAFFORD. Mr. Chairman, I rise in opposition to the amendment. I wish to inquire of the chairman of the committee, so far as salaries for administrative work here in Washington are concerned, whether they are all now provided for on the statutory roll or whether any salaries are being paid from the lump-sum appropriation?

Mr. LEVER. I will say to the gentleman that probably, with one or two exceptions, all of the assistant chiefs are carried in the lump-sum appropriation, and they are in a large measure administrative officers. They are a combination of scientific men and administrative officers. Beyond that I think all of the administrative officers are carried on the statutory roll so far as I know.

Mr. STAFFORD. For the fiscal year ending June 30, 1914, there was expended here in Washington out of lump-sum appropriations for administrative work in the Forest Service the amount of $154,000. Has the expense for that administrative work been carried to the statutory roll?

Mr. LEVER. I would prefer, if the gentleman would allow me, to wait until we get to the Forest Service to discuss that particular point, because I do not have my hand on the papers here. But I will explain that fully. It is due to the rearrangement of the Forest Service and a repeal of the 15 per cent provision and the general reorganization of the salary roll of that bureau. The gentleman knows that I can not carry all these things in my mind.

Mr. STAFFORD. Yes; I know that that would be impossible, but I was trying to find out once for all what is the policy of the committee, so far as transferring from the lump-sum appropriation to the statutory roll is concerned, the salaries of officials or employees who are engaged in administrative work here in Washington.

The statement of the expenditures for the fiscal year 1914 shows that here in Washington, in the Bureau of Animal Industry, $12,000 and more was paid for that character of work out of lump-sum appropriations; in the Plant Industry Bureau, $23,000; in the Forest Service, $154,000; in the Bureau of Chemistry, $12,000, and so on.

Now, I would like to inquire if it is the purpose of the committee to eliminate employees from the lump-sum appropriation and carry in the bill proper the salaries of all the employees who are engaged in administrative work or are you going to leave some still in the lump-sum appropriation and carry others on the statutory roll?

Mr. LEVER. I will say to the gentleman from Wisconsin that the policy of the committee—and I will say it again, because I have said it two or three times already—the policy of the committee is to transfer, so far as we know and as far as it is possible for us to do it, all administrative officers from the lump-sum appropriation to the statutory roll; all clerical positions pure and simple, and all positions which in their very nature have become permanent instead of temporary.

That is the general policy on which the committee worked. For instance, a man may be employed for six months in some bureau and at the end of six months he goes out, but it is found subsequently that they need him back, and he comes back, and they employ him for a year. When it is evident to the department that he is needed permanently, we transfer him to the statutory roll.

Mr. STAFFORD. In some cases men may perform administrative work, although it may be of a scientific character, and in such cases they will still be paid out of the lump-sum appropriation?

Mr. LEVER. I say that probably most of the assistant chiefs are carried on the lump-sum roll. Personally, I will say to the gentleman that it is probably better that these men should be carried on the statutory roll. I see no reason why they should not be.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For the control of diseases of forest and ornamental trees and shrubs, including a study of the nature and habits of the parasitic fungi causing the chestnut-tree bark disease, the white-pine blister rust, and other epidemic tree diseases, for the purpose of discovering new methods of control, and by putting into application methods of control already discovered, $47,350.

Mr. LEVER. Mr. Chairman, I offer a committee amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

In line 22, page 17, strike out the word "control." In lines 2, 3, and 4, page 18, strike out the words "and by putting into application methods of control already discovered." In line 4, page 18, strike out "$47,350" and in lieu thereof insert "$57,175."

Mr. LEVER. Mr. Chairman, I desire to call attention to that amendment on line 22, page 17. It should read, "For the investigation." Strike out the word "control" and insert the word "investigation."

The CHAIRMAN. Without objection, the amendment will be modified in accordance with the suggestion of the gentleman from South Carolina.

There was no objection.

Mr. LEVER. Mr. Chairman, I see the gentleman from Illinois [Mr. MANN] wants to know why this ought to be done, as I presume.

Mr. MANN. Of course this very much changes the scope of this appropriation. I would like to know what the reason is for that.

Mr. LEVER. Mr. Chairman, I may say that it was discovered by the committee that in doing chestnut-blight disease work the funds were being used in the work of eradicating the disease—that is, used by plans which involved the cutting down of the trees and the burning of them—and the committee came to the conclusion that this disease, being such a contagious one, easily carried on the feet of birds and in almost any other way, and by the wind, it was foolish to continue that kind of work, and we thought it better to make this language express plainly on its face what the committee expected of that work in the future, namely, that it should be investigational work. That is the view of the committee.

Mr. MANN. Then it is not intended any longer to have the Government go into the forests and destroy the trees?

Mr. LEVER. Not at all.

Mr. MANN. How about the gypsy moth? This was a companion piece to the gypsy-moth item in the first place.

Mr. LEVER. I think, Mr. Chairman, there is a distinct difference between those two items.

Mr. MANN. I was just asking for information, because I did not recollect.

Mr. LEVER. We have not changed our policy in that respect. I think the two propositions are entirely different. The chestnut blight has practically spread all over the country, and I see no hope of ever controlling it unless we discover some resistant varieties of chestnuts; on the other hand, I believe there is a possibility of controlling the browntail and gypsy moths.

Mr. MOORE. Does the gentleman indicate that the department will cease its work of cutting down the trees?

Mr. LEVER. The department will cease its work of cutting down chestnut trees.

Mr. MOORE. That is the purpose of the amendment?

Mr. LEVER. That is the purpose of the amendment.

Mr. MOORE. What success has the department had in its effort to stop the spread of the chestnut blight?

Mr. LEVER. None, I think. The disease is continuing to spread, and I think it will continue to spread. As the gentleman knows, his own State of Pennsylvania appropriated a considerable sum of money at one time to cooperate with the department.

Mr. MOORE. That is correct.

Mr. LEVER. I believe the last item of this kind in the Pennsylvania appropriation was vetoed by the governor of that State, and the State has ceased to appropriate for that purpose.

Mr. MOORE. There was a very large appropriation originally?

Mr. LEVER. Yes.

Mr. MOORE. And I wanted to find out if other States have ceased making appropriations.

Mr. LEVER. The State of Virginia has appropiated $2,500, the State of West Virginia $5,000, the State of North Carolina $500, and the State of Ohio $1,500.

Mr. MOORE. So that the States have practically ceased appropriating for this purpose.

Mr. LEVER. Yes.

Mr. MOORE. Unless the States continue their appropriations for stopping the disease by cutting down and destroying the trees, there will be nothing for the Government to do hereafter, except investigation.

Mr. LEVER. That is all; and I am sure that the experts agree that the idea of trying to stop a disease which has been spread all over the country and which can be carried on the feet of birds is a foolish proposition.

Mr. MOORE. There is no doubt that it spreads very rapidly.

Mr. LEVER. Yes.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. In the current law, for this year, the appropriation for this purpose was $69,510.

Mr. LEVER. Yes.

Mr. MANN. In the bill as reported by the committee they reduced that to $47,350.

Mr. LEVER. Yes.

Mr. MANN. Now you have offered an amendment which eliminates the destruction of the trees and provides only for investigation, but at the same time you propose to increase the appropriation considerably.

Mr. LEVER. Yes.

Mr. MANN. I really can not understand the philosophy or logic of that.

Mr. LEVER. I will explain that to the gentleman. We found that of the $20,000 which the department was estimating for this work of endeavoring to control the chestnut blight, approximately $10,000 was to be used for eradication work, and the other $10,000 was to be used for investigational work. The committee, not knowing the exact situation at the time, inadvertently struck out the entire $20,000. We felt, however, after examining more thoroughly into the question, that it would be well to continue the investigational work, and hence we restore the $10,000.

Mr. MANN. There is no increase in the work, then?

Mr. LEVER. No increase at all.

Mr. MOORE. May I inquire of the gentleman whether, in the event of the disease appearing in Ohio, where, I am just informed, it has appeared, the Government would be in a position, by reason of this appropriation, to cooperate with the State of Ohio?

Mr. LEVER. Yes; if Ohio desired to cooperate.

Mr. MOORE. In furnishing information and such aid as might be given?

Mr. LEVER. Undoubtedly; yes; but the Government would not be in a position to go into the woods and cooperate with the State of Ohio in cutting down the trees and burning them.

Mr. MOORE. I will say that in Pennsylvania the disease has done about the worst it could do. It has swept the State.

Mr. LEVER. Yes.

Mr. SLOAN. Can the gentleman state whether out of this appropriation money is provided for the inspection of chestnut trees which are shipped from the eastern part of the United States to other parts of the United States to discover whether or not they are infected with this chestnut blight?

Mr. LEVER. No; this item does not carry that appropriation, but there is an appropriation in the bill for that purpose. The gentleman remembers the quarantine act which we passed several years ago?

Mr. SLOAN. Yes.

Mr. LEVER. In that item we have an appropriation for that purpose.

Mr. SLOAN. There are ample funds, then, to continue that work?

Mr. LEVER. Ample funds; all that the department asked for.

Mr. SLOAN. I will say to the gentleman that there are numerous cases where chestnut trees are being transplanted throughout the West, being shipped there from the Eastern States, and our people are concerned in maintaining pure and healthy chestnut trees. Of course, out in that country we sometimes deal in chestnuts and sometimes bring them back to Washington. [Laughter.]

The CHAIRMAN. The question is on the committee amendment.

The amendment was agreed to.

The Clerk read as follows:

For the control of diseases of cotton, potatoes, truck crops, forage crops, drug and related plants, $56,000.

Mr. MOORE. Mr. Chairman, I move to strike out the last word. This item—"for the control of diseases of cotton, potatoes, truck crops, forage crops, drug and related plants, $56,000"—induces me to say a word about the potato crop of Maine, which I observe from the report is intended to be covered in part by the appropriation. In Maine they have what is known as the powdery scab.

Mr. LEVER. I will say that the $5,000 increase allowed by the committee is to be used in the study of the potato scab, which is found largely in Maine, but has gone to New York and threatens the potato industry of the whole country. Further on we carry an appropriation of $50,000 for quarantine work.

Mr. MOORE. I was about to ask of that. My information is that the quarantine has been established as against the potatoes of Canada as well as the potatoes from Maine, and that the inspection is in force as against the exportation of pontoes from Maine. That is to say, the Department of Agriculture has agents in the State of Maine, and potatoes are not permitted to go out of the State unless they are entirely free of the powdery scab or wart, or whatever it may be; that they are subject to inspection by the agents of the Department of Agriculture.

Mr. LEVER. That is true of the rest of the districts in which it occurs.

Mr. MOORE. I am informed that the department has allowed for the purpose of inspection $50,000, and that if the shipper desires to get his potatoes out of Maine he can not do so except on the Government's approval. What I want to find out is where the $50,000 to pay for the inspection of potatoes in Maine comes from.

Mr. LEVER. It is carried in an item under the head of "Domestic potato quarantine," in "Miscellaneous expenses," on page 74 of the bill.

Mr. MOORE. Subject to the discretion of the department.

Mr. LEVER. Yes.

Mr. MOORE. The Secretary has the power to take money out of a lump sum to make an inspection in the State of Maine.

Mr. LEVER. On page 74 of the bill the gentleman will find, under the head of "Domestic potato quarantine," an appropriation of $50,000 to enable the Secretary of Agriculture to cooperate with those States in the inspection of Irish potatoes where a quarantine has been or hereafter shall be established by the Secretary of Agriculture prohibiting the movement of such potatoes from any State into any other State, and so forth.

Mr. MOORE. I thank the gentleman for the information, which in part covers my inquiry, but apparently the whole of the $50,000 was used in Maine last year.

Mr. LEVER. I think that is true except the least bit in the State of New York, where this disease recently has appeared.

Mr. MOORE. My information further is that the $50,000 was not sufficient to pay for the inspection in Maine, and it was necessary to make some arrangement with the potato growers by which an additional $50,000 was contributed by them for the purpose of making up a fund of $100,000 in order to get the crop to market. I want to know whether the department stands sponsor for that contribution of what might be a demand for an additional $50,000 on pain of not getting the potatoes out of the State.

Mr. LEVER. The gentleman will recollect that the powdery-scab outbreak occurred late last year. The department then estimated in a Senate amendment for $100,000 for this work. It passed the Senate, and $50,000 was agreed to in conference. The department this year gives us an estimate of $100,000 for the work, but the committee, in its judgment, thought $50,000 adequate. I may say in that connection that when this item was in conference in the Senate there came to the conferees a kind of understanding that the State of Maine would handle a part of this work. The Legislature, however, of the State of Maine has not met since that time, and no arrangement has been made. The shippers have voluntarily agreed to a tax of $2 a carload of potatoes upon themselves to supplement the fund of the Federal department. We think we are contributing amply to this work, which is confined very largely to a comparatively small area.

Mr. MOORE. Mr. Chairman, I am obliged to the chairman of the committee for giving us the information, but it seems to me this is an unusual situation, and one to which the committee ought to give careful attention. Here are farmers, as much so as in any other State in the Union, men who have made a specialty of raising potatoes, and who raise the most wonderful crops to be found anywhere in the country—single tracts of 100 acres of living green. These men have had their difficulties as farmers, and they have to get to market. They must get the potatoes out of the ground, but the department levies upon them a quarantine and tells them that they can not get the product to market unless it meets the Government inspection. This is the product of the soil; it is the result of toil of the man on the farm. The Government appropriates $50,000 for the Secretary of Agriculture to pay the inspectors to say whether the

potatoes, the product of the farmer, shall go to the market; but this is not sufficient to enable them to get the crops out. They must not only stand the espionage or the inspection, but, in addition, they must put their hands into their own pockets and put up an additional sum of $2 per carload in order to take away from the farm the products they have raised by their own toil.

Mr. LEVER. I do not think the gentleman wants to refer to this as espionage. The item in this bill comes at the urgent request of the delegation from Maine, both in the House and the Senate.

Mr. MOORE. If the word is too harsh, and maybe it is, I will retract it, because I do not want to do anything to injure the prospect of the Maine farmer selling this product. But the fact is that the Government has said to the potato raisers of Maine that before they can sell their potatoes they must be inspected. That is a condition that is not imposed against the apple raiser of Arkansas or the cotton grower of any State. That condition is not levied against farmers throughout the country. It applies to the farmer in Maine, who lives up in the extreme northeastern part of the country, where it is harder to get to market than it is for many other farmers. The Maine potato farmer must not only bear his proportion of the expenses of the taxpayer, but he must put his hand in his own pocket and match dollar for dollar the appropriation of the Federal Government in order to get his potatoes out to market. It is an unusual condition.

Mr. ANDERSON. Will the gentleman yield?

Mr. MOORE. Yes.

Mr. ANDERSON. The gentleman overlooks the fact that this potato disease is very infectious, while the diseases of apples and one thing and another are not infectious at all.

Mr. MOORE. We have the chestnut blight, and there are apples which rot in places, as the gentleman well knows.

Mr. ANDERSON. But that does not scatter all over the country as the potato rot does.

Mr. MOORE. But there is a scale that strikes the apple tree and others and passes along just the same. Does the gentleman from Colorado desire to ask me a question? If not, I merely want to say, Mr. Chairman, that it seems to me that it is rather an unfair handicap against the farmers of Maine to compel them to keep their patotoes under control until the Government inspects them and then make them pay for the inspection.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MARTIN. Mr. Chairman, I would like to ask the Chairman upon the item that has been referred to by the gentleman from Pennsylvania. What is done with the money contributed by the farmers in connection with this inspection?

Mr. LEVER. That money is used as a cooperative fund with which to carry on the work provided in this item.

Mr. MARTIN. It does not go into the Federal Treasury?

Mr. LEVER. No; it does not, as I understand it.

Mr. MARTIN. Who expends it, who disburses it, who has charge of it?

Mr. LEVER. There is evidently a cooperative arrangement between the State of Maine, the people in this infected district, and the Federal Government.

Mr. MARTIN. Is that cooperation in the State of Maine a cooperation by the farmer who has a carload of potatoes he wants to sell?

Mr. LEVER. It is a cooperative arrangement, I am pretty sure, though I am not positive, between the Federal Government and the individuals concerned in the area in which the infection occurs. I may be wrong in that statement, but I think not.

Mr. ANDERSON. As I understand it is merely a temporary arrangement to be continued until an appropriation can be made by the State legislature, the intention being later on for the State to cooperate with the Federal Government for maintaining the quarantine.

Mr. LEVER. It is temporary, I am sure.

Mr. MARTIN. I was about to say it seems to me that a system of that sort would be subject to many objections. Of course, if there is to be real cooperation between the Federal Government and the State authorities in connection with the inspection that might be quite permissible, but to allow individuals to cooperate, whose property is to be inspected, to contribute is——

Mr. LEVER. That system would be wrong generally, but the gentleman knows this was a sudden emergency and the department had to do the best it could under the circumstances until the Legislature of Maine met.

Mr. MARTIN. Then the chairman does not understand it is intended to make this system continuing?

Mr. LEVER. Not at all.

Mr. MARTIN. I think there is very serious objection to it.

Mr. LEVER. I agree with the gentleman.

Mr. MOORE. The gentleman understands that there was a contribution made to make up this fund to match the Government fund in order to complete the inspection.

Mr. MARTIN. So I gathered from what has been said.

Mr. MOORE. That is a fact that has not been denied.

Mr. MARTIN. I understand; but I understood the chairman to say that this is but a temporary means to get along until the State of Maine shall make some provision by the State.

Mr. MOORE. The question is, Why should the State of Maine do it?

Mr. MARTIN. Well, it is not unusual that the State and Federal authorities unite in their efforts to suppress any matter of plant disease; but it is extremely unusual that individuals who have property to be inspected should be permitted to contribute to pay the cost of inspection services.

Mr. MOORE. It seemed to me so, and that was the reason I brought it up.

Mr. LEVER. I would like to say the suggestion of cooperation between the State of Maine and the Federal Government came as a suggestion from the people of Maine.

Mr. ANDERSON. The hearings show that.

Mr. SELDOMRIDGE. Mr. Chairman, I move to strike out the last two words. Mr. Chairman, in Weld County, where the potato blight has been raging for the past five years or more, the Government has recently entered into an agreement with an association of farmers in that county to erect an experimental station for the purpose of discovering the causes of the blight and the possible means of prevention. They have not only contributed land, but they have also contributed cash to pay for the construction of the necessary equipment.

Mr. MADDEN. Is that the State government?

Mr. SELDOMRIDGE. The State government not as yet, but the individuals there have contributed in a joint project for the construction and maintenance and operation of this experimental station and the Government is to contribute so much during this fiscal year or during the next fiscal year for its operation.

Mr. MADDEN. Has there been any law passed authorizing that?

Mr. LEVER. I do not know that there is any law; I do not know that there is any law against it.

Mr. SELDOMRIDGE. It is in line with the policy of the Government to investigate these plant diseases and the farmers of that district welcome that opportunity to work together with the Government for a solution of this trouble that has been raging so disastrously and so harmfully there for several years past.

Mr. MARTIN. I would like to ask the gentleman, if he will yield, whether there is not a United States statute prohibiting the acceptance of contributions toward the inspection services of the country, contributions from individuals?

Mr. LEVER. I am not able to inform the gentleman on that. I am no lawyer, as the gentleman knows. I am a farmer.

Mr. ANDERSON. According to my recollection, this bill specifically authorizes that very thing.

The CHAIRMAN. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

Total for Bureau of Animal Industry, $2,545,336.

Mr. SLOAN. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Nebraska moves to strike out the last two words.

Mr. SLOAN. I do so for the purpose of saying a few things about a matter of some interest to the House that I was not able to say by reason of being called from the Chamber when we were discussing the Bureau of Animal Industry a while ago in relation to the expenditures made by the department in eradicating the foot-and-mouth disease.

Criticisms were presented on the floor of the House this afternoon upon the Bureau of Animal Industry and the method of treating that subject, and inasmuch as the Committee on Expenditures in the Department of Agriculture has recently been conducting hearings on that subject, at which the head of the Bureau of Animal Industry appeared and submitted evidence as to what the Government had done and accomplished, I thought it was no more than due to the House that a few facts should be given to show what the department has been doing.

Mr. HAUGEN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Nebraska yield to the gentleman from Iowa?

Mr. HAUGEN. I suggest that possibly the gentleman has been misinformed as to any criticism of the department. I certainly made none.

Mr. SLOAN. No. They were made by the gentleman from Indiana [Mr. CULLOP] stating that the department had not conducted that matter properly in the State of Indiana.

Now, this disease broke out in southern Michigan and northern Indiana. I do not think that Representatives of any of those States where it originated should seriously criticize the Government for immediately taking hold of that matter and going to the expense it has gone in eradicating that disease in a very large part of the infected districts of the United States. It broke out in 20 States of the Union, breaking out originally, as I said, in southern Michigan and spreading immediately to northern Indiana. It broke out at a time, early in the fall, when cattle were being shipped from one part of the country to another quite generally, just at a time when it would make conditions very favorable for its general distribution throughout the United States. It demanded drastic and almost heroic action on the part of the Department of Agriculture, and it was taken. This disease was a menace not only to the cattle, sheep, and hogs of this country, but the disease is transmissible to human beings. Prompt and courageous action was entitled to commendation instead of criticism. Nearly all of the States in the Union cooperated with the Department of Agriculture under their several quarantine laws and regulations.

The head of the Bureau of Animal Industry, appearing before the committee I have named, was able to state that in nearly all of the States of the Union it had been reduced to a very limited area, and had been absolutely done away with in a number of the States; that the States generally met the Government on the basis of one-half of the expenditures; met the Government cheerfully, and met the demands of the Government, as the Government met the demands of the States, so that in only very small areas is the disease a matter of great menace at this time.

I make this statement as due to a public official, Dr. Melvin, who for a great many years has been at the head of the Bureau of Animal Industry and has distinguished himself in meeting large and important problems arising under his particular bureau's jurisdiction, and meeting them successfully.

I am satisfied that the great State of Indiana is not seriously criticizing the Bureau of Animal Industry or the department for the manner in which it conducted that work in that State in the eradication of the foot-and-mouth disease. With the permission of the House, I shall present and have extended in the RECORD a statement of expenditures and work done by the Bureau of Animal Industry in this behalf—a statement which has been presented to the Committee on Expenditures in the Department of Agriculture. [Applause.]

The CHAIRMAN. The gentleman from Nebraska [Mr. SLOAN] asks unanimous consent to extend his remarks in the RECORD by the insertion of the statement referred to. Is there objection?

There was no objection.

Statement showing number and kind of animals slaughtered and the cost of animals, burial, property destroyed, disinfection, and miscellaneous supplies in the various States on account of the foot-and-mouth disease to Dec. 31, 1914, inclusive.

Mr. MOSS of Indiana. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Indiana [Mr. MOSS] moves to strike out the last word.

Mr. MOSS of Indiana. Referring to the remarks of my friend from Nebraska [Mr. SLOAN], I am very glad to say that the State of Indiana has cooperated cordially, and I think effectively, with the Department of Agriculture in the work of maintaining a quarantine in our State against the foot-and-mouth disease.

At the outbreak of the disease in our State we did not happen to have any appropriation available for defense purposes. The Department of Agriculture was generous enough to accept the word of the governor of the State to the effect that when our legislature met he would recommend an appropriation to pay one-half of whatever expense might be incurred in combating the disease. The Department of Agriculture for the time being took over the whole expense of protecting the live-stock interests of the State, and thus prevented the convening of a special session of the Indiana Legislature, which would have been otherwise absolutely necessary. We have a State quarantine division, with Dr. Nelson at the head, which acted in full sympathy with the Department of Agriculture. The governor of our State has given the Department of Agriculture cordial support, and I am confident that the great mass of the farmers of the State of Indiana are feeling that they have received great benefit and prompt protection. The whole live-stock industry of the State of Indiana was for the moment at risk, and only the fact that we have had an effective quarantine has made it possible to continue animal husbandry as a profitable branch of industry.

Doubtless there have been criticisms by individuals; in this free American country of ours all restrictive measures are apt

to meet with some opposition. It is a tendency of the American people to criticize restrictive measures, and it is therefore a difficult task for the Government to deal with such a situation as comes up in a quarantine. A portion of my district was in the quarantined area, and it had not a single case of foot-and-mouth disease; yet I feel that the Department of Agriculture was fully and wholly justified in taking the precautionary measures that it did to protect the live-stock industry of our State.

Mr. COX. Mr. Chairman, will my colleague yield there?

Mr. MOSS of Indiana. Certainly.

Mr. COX. How much money will it take to compensate for the loss of cattle killed out in Indiana as the result of this work?

Mr. MOSS of Indiana. I can not say exactly, but I should think it would approach $100,000, or go beyond that.

Mr. COX. Can the gentleman give the committee any idea as to the total value of the cattle in Indiana that would have been affected if this emergency had not been met and this action had not been taken?

Mr. MOSS of Indiana. In 1910 the aggregate value of our cattle approximated $40,000,000; at the present moment I should place the value close to $50,000,000.

Mr. SLOAN. Will the gentleman yield?

Mr. MOSS of Indiana. Certainly.

Mr. SLOAN. Answering the inquiry of the gentleman from Indiana, I will say that the figures were $80,000 up to the first of this year.

Mr. MOSS of Indiana. There have been some additional losses since then, so that my approximation of $100,000 is very nearly correct. Now, I want to call the attention of the House to the fact that in Indiana the cattle industry has been one of our disappearing industries. We have a million more hogs in Indiana now than we had 10 years ago. We have 12,000 more dairy cattle than we had 10 years ago, but during the last five years our beef cattle have declined in numbers from 729,000 in 1910 to 693,000 in 1915. We can not afford to lose any more ground in this direction. We must exert every effort to replace our former splendid herds of beef cattle and to fill our half empty feed lots. For this reason I desire to go on record that I not only approve heartily of what the Department of Agriculture has done in Indiana to meet this supreme crisis, but I believe that the Indiana farmers owe it a great debt of gratitude. Indeed, I may go further and say that the citizenship of our State, without regard to occupation, are under obligations to the Department of Agriculture for the way they came to the relief of the live-stock industry in the State of Indiana, and I feel perfectly confident that this feeling generally prevails throughout the State.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For soil-bacteriology and plant-nutrition investigations, including the testing of samples, procured in the open market, of cultures for inoculating legumes, and hereafter if any such samples are found to be impure, nonviable, or misbranded, the results of the tests may be published, together with the names of the manufacturers and of the persons by whom the cultures were offered for sale, $42,000.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph just read. I notice the committee has introduced some new phraseology in the paragraph, from line 9 to 15, inclusive. I wish to inquire what is the special work that is intended to be performed by the department, particularly as to the investigation of private establishments and the publication of those investigations with the names of the manufacturers when they are proven not to be up to the standard?

Mr. LEVER. The gentleman knows, of course, that in recent years a great many companies are manufacturing various kinds of inoculating cultures for leguminous plants; that many soils require this bacteria before leguminous plants can grow at all. It has been discovered that a great deal of misbranded and impure inoculating material is being sent out, and the department requires authority here to do with this as we do with misbranded and mixed seeds, publish the name of the party, so that we can get a better brand.

Mr. STAFFORD. Is the private manufacturer, who is engaged in the manufacture of these legumes, to have no voice whatever in determining whether his product is up to the standard as prescribed by the Agricultural Department?

Mr. LEVER. Well, they would not publish anything against the private manufacturer without a hearing.

Mr. STAFFORD. This phraseology gives the department absolute authority to ruin the established business of a manufacturer without even a hearing.

Mr. LEVER. This language is identical with the language carried as to misbranded seed. The department does not publish the names of the parties handling misbranded seeds without first giving them an opportunity to be heard. It is a very bad thing to have a farmer send and get some of this inoculating material for clover, for instance, and then find it does not do the work. And we are trying to stop this abuse, and we thought it was the quickest way to do it, by providing for it in this appropriation bill.

Mr. STAFFORD. I quite agree with the purpose of the provision. However, I can see how this might work in the hands of some subordinate official to the great detriment of some manufacturer who may not have been granted a hearing, and just because his manufactured output might not conform to the standard set up by one of these subordinate officials. We want to throw safeguards around the consumers of this country, but we also want to take into consideration not to surrender the rights of private manufacturers in the disposal of their own products.

Mr. LEVER. I will say to the gentleman that we have not heard of any protest in regard to misbranded seed distributers being published without notice to them, and I think we can trust to the good discretion and judgment of the department in this matter. It is a small matter, and yet it is a large matter, and I think the quicker we get it into the law the better.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent for three minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. STAFFORD. The chairman just proposed that if this is found not to be workable, it might be open to amendment next year. I call attention to the fact that we are now amending the law, which becomes a permanent law by the very phraseology here carried, without any consideration of its effect by the committee. The hearings do not contain a line as to the protection of the public or protection to the manufacturer.

Mr. LEVER. The committee did not need any consideration of this. It was such a small matter that——

Mr. STAFFORD. Will the gentleman be willing to eliminate the word "hereafter"?

Mr. LEVER. I was about to suggest that.

Mr. STAFFORD. I withdraw the reservation of the point of order.

Mr. LEVER. Mr. Chairman, I move to amend that item, on page 18, line 11, after the word "and," by striking out the word "hereafter."

The CHAIRMAN. The gentleman from Wisconsin withdraws the point of order, and the gentleman from South Carolina [Mr. LEVER] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 18, line 11, strike out the word "hereafter."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

For crop technological and fiber plan investigations, $19,770.

Mr. LEVER. Mr. Chairman, I offer an amendment correcting a typographical error.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 19, line 5, strike out the word "plan" and in lieu thereof insert the word "plant."

The amendment was agreed to.

The Clerk read as follows:

For investigating the handling, grading, and transportation of grain, and the fixing of definite grades thereof, $72,920.

Mr. MOORE. Mr. Chairman, I move to strike out the paragraph—lines 7, 8, and 9. This appears to be a new item.

Mr. HAUGEN. Oh, no.

Mr. LEVER. This item has been carried in the bill for 10 years, I presume.

Mr. MOORE. Then I withdraw the motion and move to strike out the last word.

The CHAIRMAN. The gentleman from Pennsylvania moves to strike out the last word, and is recognized for five minutes.

Mr. MOORE. Mr. Chairman, on January 4 the House passed a bill known as the grain grades bill. We have had considerable grain legislation, and in each instance appropriations have been provided; but the bill passed on January 4 carried an appropriation of $125,000 for a purpose which seems to be entirely analogous to this. If this item of $72,920 stands, I would like to know why we are to appropriate $125,000 in the grain grades act.

Mr. LEVER. If the gentleman from Pennsylvania will permit me, I think I can answer that very quickly, and get along with the bill.

Mr. MOORE. I do not rise for the purpose of delay. I want the gentleman to understand that.

Mr. LEVER. I thoroughly understand that the gentleman is seeking information. The committee discussed the very matter which the gentleman is speaking about, and I think if the Moss bill had become a law when this bill was being framed, probably there would have been some change in this item; but the Moss bill has not yet become a law, and it is very necessary that we carry on this work of standardization until we know that it is provided for somewhere else. And I will say to the gentleman from Pennsylvania that we reduced the appropriation in the Moss bill considerably.

Mr. MOORE. The gentleman from South Carolina [Mr. LEVER] or the gentleman from Iowa [Mr. HAUGEN] may answer the question which I wish to ask. Why should we anticipate the passage of the law proposed in the Moss bill, which is the grain-grades act, providing for $125,000, by making an appropriation to accomplish the same thing in this bill at the sum of $72,920?

Mr. LEVER. My answer to that is this: The department has been endeavoring for a good many years—6 or 8 or 10 years probably—to establish grain grades. There has been no effort made until recently to make these grain grades compulsory when established. The original theory of this item was to establish the grades, and if the trade desired to accept them, very good; if not, there was no compulsion about it. We have not as yet completed the work covered by this item. The corn grades have been promulgated. Now we are working on wheat and oats and other grain, and we hope to have the wheat grades promulgated, as suggested by the gentleman from Missouri [Mr. RUBEY], in time for the next wheat crop.

Mr. MOORE. If it is to be done at all, I rather hope that will be the case.

Mr. LEVER. But that leaves considerable work to be done still under this item.

Mr. MOORE. But the very purpose of the Moss grain-grades bill was to consolidate the powers of the Secretary of Agriculture with regard to grain inspection, grain grading, standardization, and so forth, so that he might then proceed without question under the law.

Mr. LEVER. The gentleman from Indiana [Mr. Moss] will answer for himself on that proposition

Mr. MOORE. Now, before the law is passed you are apparently making provision to enable the Secretary to go ahead, anyhow. That is what I am trying to find out about.

Mr. MOSS of Indiana. Mr. Chairman, I move to strike out the last two words; and in reply to the gentleman from Pennsylvania [Mr. MOORE] I should like to say that this item has been carried in the Agricultural appropriation bill for the last 8 or 10 years at the express request of the grain men themselves. There has been a voluntary effort by the grain people themselves to come to uniform grain standardization by resolution and concerted action. They have asked the Government to assist them in this work, the various grain organizations and farmers' organizations all recognizing the fact that it was desirable to have uniform standards, and that before uniform standards are possible there must be certain scientific information gathered. The Government undertook to gather that information, and the various organizations by coordinate action undertook to place this standardization into effect. Now, these various organizations admit that, while the desirability of this action is just as great as it ever was, they have not been able by voluntary action to secure the universal adoption of uniform grades or standards. So the grain-grades bill goes a little further than this appropriation and aims to make the standards compulsory when they shall have been promulgated by the department. This is one step which this provision does not contain, but the cooperation between the Government and these various organizations will proceed under this item.

Mr. MOORE. Will the gentleman tell us whether we are making two appropriations here for the same purpose? I do not want to discuss the merits of the grain inspection or standardization bill, but I want to know whether we are appropriating two sums of money for one purpose—$72,920 for investigating the handling, grading, and transportation of grain, and in the Moss bill $125,000 for the same purpose.

Mr. MOSS of Indiana. No, Mr. Chairman, we are not. The estimate that the Department of Agriculture furnished to the Committee on Agriculture for the grain grades act was $375,000, which sum would be necessary in order to carry out the work that was contemplated in the grain grades act. But out of that sum they suggested that there should be deducted the amount carried in this bill. We passed the warehouse act, carrying an appropriation of $100,000, and that is a part of the work which was comprehended in the original scope of the grain act; we therefore reduced the amount appropriated for grain standardization to $125,000. All this work will be correlated and bring about a common result.

Mr. MOORE. The gentleman mentions $375,000. The grading act appropriated $125,000.

Mr. MOSS of Indiana. That was as it passed the House; but the estimates were for $375,000.

Mr. MOORE. But the $375,000 has nothing to do with the present discussion.

Mr. MOSS of Indiana. It had something to do with the question that the gentleman asked.

Mr. MOORE. Then that would make a third item of expense.

Mr. MOSS of Indiana. With this appropriation it is proposed to carry on the voluntary cooperative work between the Government and the various grain organizations in the United States and to complete at an early day the work of establishing definite and uniform commercial grades for the principal grains of the United States.

The CHAIRMAN. The pro forma amendment is withdrawn, and the Clerk will read.

The Clerk read as follows:

For testing and breeding fibrous plants, including the the testing of flax straw, in cooperation with the North Dakota Agricultural College, which may be used for paper making, $10,840.

Mr. LEVER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 20, line 5, after the word "including," strike out the word "the."

The amendment was agreed to.

Mr. MADDEN. Mr. Chairman, I move to strike out the last word. I would like to ask the gentleman from South Carolina what progress has been made in the matter of developing paper-making qualities of the fibrous plants for which this experimental appropriation of $10,840 is made. It has been carried in the bill for a long time.

Mr. LEVER. If the gentleman will give me one moment to put my hand on the facts, I think I can give him an intelligible answer. But, in a general way, I can say to the gentleman from Illinois that as far as my information goes, and I made some inquiry about it in the hearings last year, although I have not this year, they are still studying and considering questions as to whether or not they can ever develop a plan by which we can manufacture paper out of flax straw. I understand that flax straw is a great by-product in the northwest country, and while the item has been in the bill a long time and perhaps money has been wasted, counting in dollars and cents, the committee feels that although they might spend a million dollars, apparently wasted, if we finally reach the discovery that solves it, we have not in fact wasted any money.

Mr. MADDEN. The bill has in the past carried appropriations for experimenting as to whether or not cornstalks could be used for making paper. What progress has been made in that direction?

Mr. LEVER. The department finally abandoned that item, and although it is studying it some under other items it is not extensive.

Mr. MADDEN. So they have concluded that paper can not be made of cornstalks?

Mr. LEVER. They can make paper from cornstalks, but the assembling of the cornstalks is so expensive as to make it prohibitive as a commercial proposition.

Mr. MADDEN. How much more costly is it to assemble cornstalks than flax straw? Is there a greater area of flax straw in the United States than cornstalks?

Mr. LEVER. Oh, of course not.

Mr. MADDEN. Is it more economical to assemble flax straw?

Mr. LEVER. I do not know; I never saw any flax straw in my life.

Mr. MANN. Flax straw makes a higher grade of paper.

Mr. MARTIN. And it costs less to assemble it.

Mr. MADDEN. I am asking entirely for information. The query occurred to me whether, if the department has found it unwise to continue the experiments in the cornstalk paper, they still believed it was wise to continue the experiments in the flax-straw proposition for paper making.

Mr. LEVER. The best answer to the gentleman's question is that the department has ceased to estimate for cornstalk work, but it has continued to estimate for flax-straw work.

Mr. BARTLETT. What do the gentlemen from the flax-straw country say as to the wisdom of continuing this appropriation?

Mr. MARTIN. Mr. Chairman, I am not posing as an expert on the question of flax straw, but on the question of assembling it, it is almost unnecessary to say that it is cheaper to assemble it than it is cornstalks. It is unnecessary to assemble, so far as a particular field is concerned, for it is assembled when it is thrashed, whereas corn is used in the field. If you had to assemble the cornstalks at the factory it would be very expensive.

Mr. MADDEN. The same thing would be true of cornstalks; you can husk it by machinery and shred it by machinery, and when you are shredding it you can make a stack of it as easily as you could of flax straw.

Mr. MARTIN. Well, it is not the usual method at all, and probably very expensive to adopt. On the other hand, every field of flax is all thrashed in a body, and the straw remains all close together, assembled; but, of course, it would have to find its way to market for manufacture.

Mr. MANN. If the gentleman will permit me to suggest, neither flax straw nor cornstalks are assembled so as to be enabled to run a paper mill without very great expense.

Mr. MARTIN. I think that is correct.

Mr. MANN. They are only assembled at the thrashing machine now, and it takes a great deal of flax straw to run a paper mill during the course of a year.

Mr. McLAUGHLIN. Mr. Chairman, I will say to the gentleman the last report made to the committee from the officials of the department having charge of these matters——

The CHAIRMAN. The time of the gentleman has expired.

Mr. McLAUGHLIN. Mr. Chairman, I move to strike out the last word. The last report was to the effect that paper can be made from cornstalks—can be made successfully as a commercial proposition. That was their report, and they ceased their investigation for that reason. Now, whether their reason was right or not, or whether the conclusions they reached were right or not, I do not know. That came in in connection with the proposition offered by the gentleman from Kentucky [Mr. STANLEY], when he was a member of the committee, for a considerable appropriation for the construction of an experimental mill in his district in Kentucky, and the department made an unfavorable report on his suggestion, and the appropriation was not made, the department justifying its position on the ground that it had completed its investigation and found that paper can be made from cornstalks and that it can be made successfully and profitably as a commercial proposition.

Mr. MANN. Well, you can make paper out of any plant that has fiber.

Mr. McLAUGHLIN. You can make it out of anything that has fiber, but their conclusion was it can be made successfully and the business can be carried on successfully as a commercial proposition.

Mr. LEVER. I am not sure the gentleman is quite right in reference to that, but I will put in the RECORD the answer of Dr. Taylor on this proposition. Dr. Taylor, in the hearings last year, said:

> Dr. TAYLOR. It has been found possible to make excellent paper from several crop products, especially from cornstalks, but in competition with wood-pulp paper stock, as now available, the department is not able to hold out hope, under present economic conditions, of the profitable production of paper from any of these crop plants.

Mr. MANN. Now, flax makes a high-grade paper. Cornstalks make a low-grade paper and comes in competition with the paper made from wood pulp. The cost of assembling cornstalks is more than the cost of making paper other than paper out of wood pulp.

Mr. McLAUGHLIN. Several of these propositions last year came up together. The bill had carried an appropriation for investigating the making of paper out of cornstalks, had carried an appropriation for the investigation of making paper out of flax, had carried an appropriation for investigating the diseases of the sugar beet. The department made several recommendations; one that the appropriation for the investigation of the making of paper out of cornstalks be abandoned, another that the appropriation for the testing of the value of flax for paper be eliminated, because, by the change in the tariff law, paper was to be admitted free, and still another the elimination of the appropriation for investigating diseases of the sugar beet, because the duty on sugar was to be taken off and sugar was later to come in free. And then there followed the recommendation that $50,000 be appropriated for work in Louisiana, where the manufacturers of sugar cane will be impoverished by the removal of the tariff and they must be taught other lines of industry, other lines of agriculture.

Mr. MADDEN. That was $100,000.

Mr. McLAUGHLIN. Well, it was made $100,000 by the Senate, and by a compromise with the House the amount was fixed at $60,000; a similar amount is carried in this bill. The Democrats told us that the people were to be saved an immense amount of money by the taking off of the duty on sugar; but sugar has not been reduced in price, and the entire sugar industry of the country has been destroyed, and it is necessary for the department to ask for an appropriation, and an appropriation is carried in this bill for establishing an experimental farm in Louisiana to provide and encourage lines of agriculture different from the cane-sugar industry, so as to give the people down there something to do and to save them from poverty as a result of the tariff legislation of this Congress.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LEVER. Mr. Chairman, the gentleman from Michigan, as usual, has injected into this bill a discussion of the tariff for political purposes. Although I have been a member of the committee for 12 years I have never done so, because of all things on earth we want to do it is to keep the Agricultural Department of this Government nonpartisan and nonpolitical. [Applause.]

Now, the gentleman from Michigan asserts as a positive statement that in the last year's estimates this item for breeding fibrous plants, including flax straw, in cooperation with the North Dakota agricultural college, which may be used for making paper, and so on, was dropped because the officials of the department said that on account of the duty being taken off paper that none of these plants could compete with foreign importation.

Now, the facts are—and I am sure the gentleman from Michigan will admit it when his memory is refreshed—that Dr. Taylor testified before the committee last year:

> The CHAIRMAN. Let me ask you, Dr. Taylor, if you please, has anybody been growing flax in North Dakota for the purpose of making paper out of it?
>
> Dr. TAYLOR. The flax straw, Mr. Chairman, is a by-product—flax is grown for seed. It has been utilized as paper stock, but there are manufacturing difficulties which have not been overcome and which we do not see a reasonable prospect of overcoming on an economic basis.

So that the impression sought to be created by the gentleman in this regard is not borne out by the testimony before the committee. The gentleman has harped upon the Louisiana item in this bill in season and almost out of season, saying it is the result of the Democratic tariff act. I want to say to the gentleman that if the Democratic tariff act destroyed the cane-sugar industry, the cane-growing industry of Louisiana, if that industry did not have a right to exist, if it was necessary to hothouse it, if it was necessary to feed it out on a silver spoon, all the time out of the pockets of the taxpayers, then I, as one Democrat, have no apology for the result of that tariff act. The Democratic Party stands against the special privileges which have grown up under the Republican tariff system. You had as well, according to the statements of experts, attempt to grow sugar cane in Louisiana in competition with the world—it will cost as much to do it—as, to quote a distinguished ex-Member of this body, to grow oranges in competition with the world in the State of Maine. And I want to say to the gentleman once and for all on this one item that if all these facts are true, and the country knows the facts as they are in reference to the growing of sugar cane in Louisiana in competition with the world, I am satisfied the people will realize that they are being taxed to hothouse an industry which has no legitimate right for existence in this country, and will not blame the Democratic Party for anything that may happen to it.

Mr. McLAUGHLIN. Mr. Chairman, I move to strike out the paragraph.

I have made no charges against these appropriations. I was simply offering to explain some of them, an explanation requested by other gentlemen on the floor, and I thought it was due to them that some member of the committee make such explanation as can be made. Now, it is a fact, whether the chairman of the committee is willing to admit it or not, that these changes in appropriations were suggested to the committee, and as it appears in the Book of Estimates and as it appears by the statement of the officials of the department who appeared before the committee, on account of changed economic conditions. When we asked officials of the department who appeared before us to tell what those changed economic conditions were they were loath to do it, and the truth was drawn from them as with a corkscrew, that the changed conditions grew out of the Underwood tariff law and the conditions resulting from tariff legislation by this Democratic Congress. So, if there is an question about the effect of the tariff legislation on the cane-growing industry in the South, we can justify the charge against that tariff law by statements of the men from that very section of the country, because the men who are the most insistent upon the appropriation for the benefit of those engaged in the sugar-cane industry in the South are the men from Louisiana.

The distinguished gentleman from Louisiana [Mr. BROUSSARD] appeared before our committee several times and told us that the people down there are to be impoverished, that the sugar factories are abandoned and are falling into decay, and that something must be done for the relief of the people and to help them to engage in some other line of work; and it was on his insistent demand, supported by the gentlemen from the Agricultural Department themselves, a part of the administration

that had framed and put through Congress that very tariff law, that these appropriations were made. We have not talked very much politics in the Committee on Agriculture, but when the Book of Estimates contains a statement that a number of these appropriations are to be made and a number of the appropriations formerly carried are to be dropped on account of changed economic conditions, it is perfectly proper, it seems to me, for us to inquire what those economic conditions are and whether or not the officials making those suggestions are ready with the correct answer. And when gentlemen arise in their places on this floor and ask the real reason or true inwardness of items appearing in this bill, and why certain of them have been eliminated, it seems to me it is perfectly proper for us to give the real facts, even if they do involve some partisan politics.

In regard to calling the sugar industry a hothouse industry, if there had been a reasonable protection to the domestic production of beet sugar, if there could have been protection or assurance to those who were inclined to engage in that industry, that there would be protection for a reasonable time, free from the constant threat of unfriendly Democratic legislation, the increase in the production of sugar by the cane-sugar manufacturers and the beet-sugar manufacturers in this country would to-day very nearly supply the sugar consumed by our people.

The former Secretary of Agriculture, Hon. James Wilson, reported only a few years ago that there is, as far as he had investigated, land enough in this country suitable for the growing of sugar beets so that one year's production of sugar, at the rate it is now produced in this country, would supply sugar enough "to meet the demands of the entire world from the birth of Christ to the present time." [Applause on the Republican side.] And now to call it a "hothouse industry" is ridiculous.

Mr. LEVER. Mr. Chairman, the gentleman is mistaken in saying that I said the sugar-beet industry. I said the cane-sugar industry.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. LEVER. Mr. Chairman, there is a motion pending to strike out.

Mr. McLAUGHLIN. Mr. Chairman, I withdraw the pro forma amendment unless some gentleman desires to speak to it.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

Mr. MANN. I move to strike out the last two words, Mr. Chairman.

Mr. LEVER. A motion to strike out is already pending. Did the gentleman from Michigan [Mr. McLAUGHLIN] withdraw it?

Mr. McLAUGHLIN. Yes; I withdrew it unless somebody wanted to speak to it.

Mr. MANN. I understood the Chair as saying the gentleman withdrew it.

Mr. FOWLER. Mr. Chairman, a gentleman can not withdraw an amendment here without unanimous consent.

Mr. MANN. The Chairman said without objection it would be withdrawn.

Mr. FOWLER. Then I object.

The CHAIRMAN. The question is on the motion of the gentleman from Michigan to strike out the last word of the paragraph.

The question was taken, and the amendment was rejected.

Mr. MANN. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last two words.

Mr. MANN. Mr. Chairman, the very able and genial gentleman from South Carolina [Mr. LEVER], whom we all respect and love, referred just now to the tariff as a matter of special privilege. The question of special privilege is not always easy to define. The whole Agricultural appropriation bill, in the main, is a matter of granting special privilege to some one. I notice that in the last monthly report of the publications issued by the Department of Agriculture, under date of December 31, 1914, they have a list of special circulars. It is stated, "By direction of the Secretary the following 'Special Circulars' have been prepared in certain bureaus for distribution among farmers in the cotton belt who desire to diversify their farming operations." At least this goes to the extent of being special. It is quite a special circular. Here is the list of special bulletins issued for the benefit of special portions of the country. I do not criticize it. I read:

By the Bureau of Animal Industry:
- Feeding Farm Cows in the South.
- Advantages of Dairying in the South.
- The Feeding and Care of Dairy Calves.
- Marketing Butter and Cream in the South.
- How Southern Farmers May Get a Start in Pig Raising.
- Horse and Mule Raising in the South.
- Producing Sheep on Southern Farms.
- Suggestions on Poultry Raising for the Southern Farmer.
- Making Farm Butter in the South.
- Shall Southern Farmers Build Creameries?
- Do You Keep a Cow?
- The Production and Care of Milk and Cream.
- Conveniences for Handling the Farm Cow and Her Products.

By the Bureau of Plant Industry:
- Permanent Pastures for the Cotton Belt.
- Sorghum for Forage in the Cotton Belt.
- Rye in the Cotton Belt.
- Winter Wheat in the Cotton Belt.
- Winter Oats in the Cotton Belt.
- Rape as a Forage Crop in the Cotton Belt.
- Hairy Vetch for the Cotton Belt.
- Soy Bean in the Cotton Belt.

I suppose no one would charge that these should be discontinued because they are matters of special privilege. I commend the Department of Agriculture for issuing these special circulars, all described in one bulletin as being publications for a special purpose, that of giving special consideration to farmers in the cotton belt in the South. I would not say that because it is special privilege it ought to be discontinued. But when this morning I noticed so many gentlemen voting against a mild appropriation of $5,000 for the Northwest, I wondered whether they differentiated between the North and the South, and thought that a whole lot of special work for the South was in order but that a little work for the Northwest was improper.

Mr. LEVER. Mr. Chairman, will the gentleman yield for one question?

The CHAIRMAN. Does the gentleman from Illinois yield?

Mr. MANN. Yes.

Mr. LEVER. The statement has been made several times on the floor of the House carrying inferences that there was some sectionalism in this bill in the expenditure of the money carried by it. In order that the country may have the facts, I want to ask unanimous consent in this connection to publish some figures issued by the Department of Agriculture showing the expenditure of funds by sections (see p. 2266). I would not have done this except for the fact that the gentleman from Illinois [Mr. MANN], who is usually so broad-minded and so liberal to me and my people, too, has rather intimated that there might be something in that proposition.

Mr. MANN. I have not intimated anything of the kind. I commended the Department of Agriculture. My criticism is leveled against gentlemen who take these things for themselves and then complain because somebody else, with a proposition equally meritorious, tries to get something for his section. I have no criticism for the department for doing this. I am glad they are trying to help the farmers in the cotton belt. I believe it is the right thing to do.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. LEVER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LEVER. Some one has said that there is a special order of the House to rise at 5 o'clock until 8.

Mr. MANN. There is.

Mr. LEVER. That being true, we are within a few minutes of the time.

Mr. MANN. We had better rise.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

Mr. STAFFORD. Will the gentleman withhold that motion a moment?

Mr. LEVER. Certainly.

Mr. STAFFORD. Did the gentleman obtain unanimous consent to print the data that he said he wished to print, showing the distribution of these various appropriations?

The CHAIRMAN. The Chair did not understand the gentleman to ask unanimous consent.

Mr. LEVER. I beg the pardon of the Chair. I did ask it.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to print certain data which he mentions. Is there objection?

Mr. MADDEN. Reserving the right to object, Mr. Chairman, I want to ask the gentleman from South Carolina how the divisions referred to, in which this money is to be distributed, will be made.

Mr. LEVER. They are divided by sections of the country, groups of States.

Mr. MADDEN. Not by States?

Mr. LEVER. No; not by States. I think the information is very valuable.

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from South Carolina moves that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the State of the Union, reported that that committee had had under consideration the bill (H. R. 20415) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1916, and had come to no resolution thereon.

Statement showing geographic distribution of funds expended by the Department of Agriculture during the fiscal year 1914.

Bureau, division, or office.	New England Division—Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut.	Middle Atlantic Division—New York, New Jersey, Pennsylvania. ORDER OF BUSINESS.

Mr. MANN. Mr. Speaker, there is an order to take a recess at 5 o'clock until 8 o'clock. I ask unanimous consent that that order be vacated, and that it be in order now to proceed with the consideration of the two pension bills which were made in order for to-night.

The SPEAKER. The gentleman from Illinois [Mr. MANN] asks unanimous consent that the order for a session to-night be vacated, and that the pension bills be taken up and considered now. Is there objection?

Mr. HAMLIN. Mr. Speaker, reserving the right to object, I want to say that the possibilities are that it will require a quorum to pass those bills. I just want to give notice of the fact that I am inclined to think it will require a quorum.

The SPEAKER. To pass what bills?

Mr. HAMLIN. The pension bills.

Mr. COOPER. Reserving the right to object, I want to say that, in my judgment, after an order has been made, that there shall be a recess from 5 o'clock until 8, of which order practically a majority of the House are aware, many Members having gone home with the understanding that that is to be the order of business, it may be that some of them have objections to some features of the bill, and to take up the bill now instead

of at 8 o'clock would be unjust to them; and for that reason I object.

The SPEAKER. The gentleman from Wisconsin objects.

PENSION APPROPRIATIONS.

Mr. BARTLETT, by direction of the Committee on Appropriations, reported a bill (H. R. 21161) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1916, and for other purposes, which was read a first and second time, referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report (No. 1320), ordered to be printed.

Mr. MANN. I reserve all points of order on the bill.

The SPEAKER. The gentleman from Illinois [Mr. MANN] reserves all points of order on the bill.

Mr. BARTLETT. Mr. Speaker, I desire to give notice that I shall call up this bill at the first opportunity, following the Agricultural appropriation bill if possible.

PANAMA RAILROAD CO. (H. DOC. NO. 1520).

The SPEAKER laid before the House the following message from the President of the United States, which, with the accompanying documents, was ordered to be printed and referred to the Committee on Interstate and Foreign Commerce:

To the Senate and House of Representatives:

I transmit herewith, for the information of the Congress, the Sixty-fifth Annual Report of the Board of Directors of the Panama Railroad Co. for the fiscal year ended June 30, 1914.

WOODROW WILSON.

THE WHITE HOUSE, *January 25, 1915.*

LEAVE TO EXTEND REMARKS.

Mr. DIES. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting an excerpt from the recent message of Gov. Ferguson to the Texas Legislature.

The SPEAKER. The gentleman from Texas asks unanimous consent to extend his remarks by inserting an excerpt from the first message of Gov. Ferguson to the Texas Legislature. Is there objection?

There was no objection.

SPEAKER PRO TEMPORE AT EVENING SESSION.

The SPEAKER. The Chair designates the gentleman from Oklahoma [Mr. MURRAY] to preside at the session to-night.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 2337. An act to create the coast guard by combining therein the existing Life-Saving Service and Revenue-Cutter Service.

HOUR OF MEETING TO-MORROW.

Mr. LEVER. Mr. Speaker, I ask unanimous consent that when the House adjourns to-night it adjourn to meet to-morrow morning at 11 o'clock.

The SPEAKER. The gentleman from South Carolina asks unanimous consent that when the House adjourns to-night it adjourn to meet to-morrow at 11 o'clock a. m. Is there objection?

There was no objection.

RECESS.

The SPEAKER. Under the order the House stands in recess until 8 o'clock to-night.

Accordingly (at 5 o'clock p. m.) the House took a recess until 8 o'clock p. m.

EVENING SESSION.

The recess having expired, at 8 o'clock p. m. the House resumed its session, with Mr. MURRAY in the chair as Speaker pro tempore.

Mr. BURKE of Wisconsin. Mr. Speaker, under the previous unanimous-consent agreement this evening session was set aside for the consideration of pension bills, and I ask unanimous consent that the bill H. R. 21037 may be considered in the House as in Committee of the Whole.

Mr. CALLAWAY. Mr. Speaker, I object.

Mr. BURKE of Wisconsin. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 21037.

Mr. CALLAWAY. I make the point of no quorum.

The SPEAKER pro tempore. Evidently there is no quorum. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll. All those in favor of the motion of the gentleman from Wisconsin will answer "aye" and those opposed will answer "no."

The question was taken; and there were—yeas 192, nays 3, answered "present" 1, not voting 229, as follows:

During the calling of the roll the following occurred.

Mr. CALLAWAY. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman from Texas rise?

Mr. CALLAWAY. Mr. Speaker, I move to adjourn.

The SPEAKER pro tempore. That motion requires a second of a majority of those present. As many as favor seconding the motion will rise and stand until they are counted. Evidently not a sufficient number.

Mr. CALLAWAY. The other side, Mr. Speaker.

The SPEAKER pro tempore. There is no other side.

The SPEAKER. The Clerk will call my name.

The Clerk called the name of Mr. CLARK of Missouri, and he answered "Present," as above recorded.

Mr. BURKE of Wisconsin. Mr. Speaker, I understand that the roll call discloses that we are nearly 60 short of a quorum. I therefore move you that the necessary warrants be issued and the absentee Members be arrested and brought before the House.

Mr. CALLAWAY. Mr. Speaker, I make the point of order of no quorum on that.

The SPEAKER pro tempore. What is the inquiry of the gentleman from Texas?

Mr. LANGLEY. The gentleman made an untenable point of order, Mr. Speaker.

Mr. CALLAWAY. I made a point of order of no quorum.

The SPEAKER pro tempore. The Constitution fixes that, and the point is overruled.

The motion was agreed to.

ADJOURNMENT.

Mr. BURKE of Wisconsin. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER. The gentleman from Wisconsin moves that the House adjourn. Those in favor of seconding the motion to adjourn will rise and stand until the Chair can count them. [After counting.] Seventy-five gentlemen have risen to second the motion, and there are 140 Members present. Those in favor of adjournment will say "aye"; those opposed will say "no."

The question was taken, and the motion to adjourn was agreed to.

Accordingly (at 10 o'clock and 6 minutes p. m.) the House adjourned, pursuant to the order previously made, until to-morrow, Tuesday, January 26, 1915, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. Letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of the Interior submitting an estimate of deficiency in the appropriation for public printing and binding for the Patent Office for the service of the fiscal year ending June 30, 1915 (H. Doc. No. 1516); to the Committee on Appropriations and ordered to be printed.

2. Letter from the Secretary of War, transmitting an item of legislation suggesting that it be inserted in the sundry civil appropriation bill for 1916 under the headings "Arsenal" and "Rock Island Arsenal, Rock Island, Ill." (H. Doc. No. 1517); to the Committee on Appropriations and ordered to be printed.

3. Letter from the Secretary of War, transmitting letter from the Chief of Engineers, with a statement prepared from data received from officers in charge of the different engineering districts, showing the name of each civilian engineer employed between July 1, 1913, and June 30, 1914, in the work of improving rivers and harbors, the term so employed, the compensation, and the place at which employed (H. Doc. No. 1518); to the Committee on Rivers and Harbors and ordered to be printed.

4. Letter from the Secretary of Commerce, transmitting communication from the Commissioner of Fisheries submitting a report on the otter trawl fishery, in compliance with items in the sundry civil appropriation acts, approved August 24, 1912, and June 23, 1913 (H. Doc. No. 1519); to the Committee on the Merchant Marine and Fisheries and ordered to be printed, with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. OLDFIELD, from the Committee on Patents, to which was referred the bill (H. R. 21137) to amend section 23 of the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909, reported the same without amendment, accompanied by a report (No. 1314), which said bill and report were referred to the House Calendar.

Mr. MILLER, from the Committee on Indian Affairs, to which was referred the bill (H. R. 20193) providing for the payment of assessments on Indian allotments benefited by the construction of State rural highways in the State of Minnesota, reported the same without amendment, accompanied by a report (No. 1319), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. DIES, from the Committee on Claims, to which was referred the bill (H. R. 15168) for the relief of Lyman D. Drake, jr., reported the same with amendment, accompanied by a report (No. 1315), which said bill and report were referred to the Private Calendar.

Mr. POU, from the Committee on Claims, to which was referred the bill (S. 926) for the relief of the Georgia Railroad & Banking Co., reported the same without amendment, accompanied by a report (No. 1316), which said bill and report were referred to the Private Calendar.

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (S. 5695) for the relief of the Southern Transportation Co., reported the same without amendment, accompanied by a report (No. 1317), which said bill and report were referred to the Private Calendar.

Mr. DIES, from the Committee on Claims, to which was referred the bill (S. 3525) for the relief of Pay Inspector F. T. Arms, United States Navy, reported the same without amendment, accompanied by a report (No. 1318), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 21133) granting a pension to Ryan V. Eichelberger; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 21134) granting an increase of pension to John Campbell; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. TALCOTT of New York: A bill (H. R. 21156) to increase the number of the corps of cadets at the Military Academy; to the Committee on Military Affairs.

By Mr. PARK: A bill (H. R. 21157) to place Thomas County, Ga., in the southwestern division of the southern district of Georgia; to the Committee on the Judiciary.

By Mr. BRITTEN: A bill (H. R. 21158) to repeal the act entitled "An act to increase the internal revenue, and for other purposes," approved October 22, 1914; to the Committee on Ways and Means.

By Mr. PALMER: A bill (H. R. 21159) to amend section 4 of the act of April 21, 1910, entitled "An act to protect the seal fisheries of Alaska, and for other purposes"; to the Committee on Ways and Means.

By Mr. HELM: A bill (H. R. 21160) to incorporate the Pan-American Bank; to the Committee on Banking and Currency.

By Mr. BARTLETT: A bill (H. R. 21161) making appropriations for the payment of invalid and other pensions of the

United States for the fiscal year ending June 30, 1916, and for other purposes; to the Committee on the Whole House on the state of the Union.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BRUMBAUGH: A bill (H. R. 21162) granting an increase of pension to Edwin C. Beall; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21163) granting a pension to Peter Francesco; to the Committee on Pensions.

Also, a bill (H. R. 21164) granting an increase of pension to Brinkley Trout; to the Committee on Invalid Pensions.

By Mr. BURKE of Wisconsin: A bill (H. R. 21165) granting an increase of pension to Lodemia E. Kingsley; to the Committee on Invalid Pensions.

By Mr. CLINE: A bill (H. R. 21166) granting an increase of pension to John P. Jackson; to the Committee on Invalid Pensions.

By Mr. CRAMTON: A bill (H. R. 21167) granting a pension to Mary B. Cooley; to the Committee on Invalid Pensions.

By Mr. FAIRCHILD: A bill (H. R. 21168) granting an increase of pension to Emily Thorn; to the Committee on Invalid Pensions.

By Mr. GRIEST: A bill (H. R. 21169) granting a pension to Lydia B. Coover; to the Committee on Invalid Pensions.

By Mr. KELLY of Pennsylvania: A bill (H. R. 21170) for the relief of William H. Hackett; to the Committee on Military Affairs.

Also, a bill (H. R. 21171) for the relief of Revilow N. Spohn; to the Committee on Claims.

By Mr. LANGLEY: A bill (H. R. 21172) granting an increase of pension to Abraham Gibbs; to the Committee on Invalid Pensions.

By Mr. MAHAN: A bill (H. R. 21173) granting a pension to Charles C. Dougherty; to the Committee on Pensions.

By Mr. MOSS of West Virginia: A bill (H. R. 21174) granting an increase of pension to A. T. Kreps; to the Committee on Invalid Pensions.

By Mr. SIMS: A bill (H. R. 21175) for the relief of William F. Still; to the Committee on War Claims.

Also, a bill (H. R. 21176) for the relief of the legal representatives of William Vantreese, deceased; to the Committee on War Claims.

Also, a bill (H. R. 21177) for the relief of the legal representatives of O. F. Hendrick, deceased; to the Committee on War Claims.

Also, a bill (H. R. 21178) for the relief of the legal representatives of Nathaniel T. Newbill, deceased; to the Committee on War Claims.

Also, a bill (H. R. 21179) for the relief of the legal representatives of William Goad, deceased; to the Committee on War Claims.

Also, a bill (H. R. 21180) for the relief of the legal representatives of A. Meeks, deceased; to the Committee on War Claims.

By Mr. TOWNSEND: A bill (H. R. 21181) for the relief of the Twelfth Ward Building & Loan Association, of Newark, N. J.; to the Committee on Claims.

By Mr. YOUNG of North Dakota: A bill (H. R. 21182) granting a pension to George W. Widener; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of citizens of New Melle, Mo., favoring bill to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. ADAMSON: Petition of sundry citizens of Troup County, Ga., protesting against the passage of House bill 20644, relative to curtailing the freedom of the press; to the Committee on the Post Office and Post Roads.

By Mr. BAILEY: Memorial of 500 members of Patriotic Order Sons of America of Altoona, Pa., favoring passage of the Vollmer-Bartholdt resolution relative to export of war material; to the Committee on Foreign Affairs.

Also, petitions of D. J. Bolger, of Barnesboro; Rev. F. P. Corcoran, John S. Douglass, V. J. Kirkpatrick, F. C. Lantzy, Pius A. Lantzy, William Meehan, Henry Nagle, R. S. Sharbaugh, J. E. Weakland, Leo Whalan, John J. Whalan, Thomas Whalan, Richard Wilkins, Michael Byrne, and Albert P. Whyland, of Spangler, all in the State of Pennsylvania, protesting against the circulation through the mails of certain slanderous and defamatory publications relating to the Catholic Church; to the Committee on the Post Office and Post Roads.

By Mr. BALTZ: Petition of sundry citizens of St. Clair County, Ill., protesting against the passage of Senate bill No. 6865, for prohibition in the District of Columbia; to the Committee on the District of Columbia.

By Mr. BELL of California: Petitions of Gustav Brandt, of Pasadena, and 633 citizens of Alhambra, South Pasadena, Vernon, San Gabriel, Los Angeles, Huntington Park, Glendale, El Monte, Long Beach, Eagle Rock, and San Pedro, all of California, favoring the passage of House joint resolution 377, prohibiting the export of arms, ammunition, and munitions of war from the territory or any seaport of the United States; to the Committee on Foreign Affairs.

Also petition of Seventy-ninth and Castro Gymnasium Club (100 members), of San Francisco, Cal.; Pacific Association of Amateur Athletic Union of California and Nevada; board of supervisors of Solano County, Cal., favoring Hamill civil-service bill; to the Committee on Reform in the Civil Service.

Also, petition of citizens of Pasadena (Cal.) Audubon Society, against shipment of American horses to Europe for use in war; to the Committee on Foreign Affairs.

By Mr. BORCHERS: Petition of citizens of Decatur, Ill., favoring passage of House joint resolution 377, prohibiting export of war material; to the Committee on Foreign Affairs.

By Mr. BURGESS: Memorial of citizens of De Witt County and of Victoria, Tex., relative to strict neutrality of the United States; to the Committee on Foreign Affairs.

By Mr. BURKE of Wisconsin: Petition of Rev. Edmund Huebner and 132 other citizens of Random Lake and vicinity, and 22 other citizens of Mayville, Wis., asking for the passage of S. 6688, or any similar measure to levy an embargo on all material useful in war, save foodstuffs and wearing apparel and surgical supplies; to the Committee on Foreign Affairs.

By Mr. CARR: Resolutions adopted by Elenander Stokoski, Boswell; F. Mikolayek, Everson; Antoni Tiolkowski, Boswell; and St. Michaels Society, of Connellsville, Pa., protesting against the Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

Also, petition of Italian Protective Association of Greensburg, Westmoreland County, Pa., protesting against the enactment of the proposed immigration restrictions requiring educations tests; to the Committee on Immigration and Naturalization.

By Mr. CARY: Petition of Jacob Jaky, Rev. M. Plass, John A. Davitz, and 10 others, all residents of Oakwood, Wis., urging the passage of House joint resolution 377; to the Committee on Foreign Affairs.

By Mr. COPLEY: Memorial of German Athletic Society of Elgin and citizens of Mankato, Ill., and vicinity, favoring passage of bill to prohibit export of war material; to the Committee on Foreign Affairs.

Also, memorial of the Polish Alma Mater of Joliet, Ill., protesting against literacy test in the immigration bill; to the Committee on Immigration and Naturalization.

By Mr. CRAMTON: Memorial of Joint Penology Commission of Michigan, protesting against passage of the proposed law as to interstate shipment of prison-made goods; to the Committee on Interstate and Foreign Commerce.

By Mr. DALE: Memorial of the American Mining Congress, favoring the passage of H. R. 15869; to the Committee on Mines and Mining.

Also, memorial of St. John the Baptist Polish Society of New York City, protesting against the literacy test in the immigration bill; to the Committee on Immigration and Naturalization.

Also, memorial of the National Association of Vicksburg Veterans, relative to an appropriation for celebration of veterans at Vicksburg, Miss.; to the Committee on Appropriations.

By Mr. DONOVAN: Petition of citizens of Danbury, Conn., favoring House joint resolution 377, to forbid export of arms; to the Committee on Foreign Affairs.

By Mr. EVANS: Petition of citizens of Deer Lodge, Mont., favoring increase in railroad rates; to the Committee on Interstate and Foreign Commerce.

By Mr. GILMORE: Memorial of citizens of Mankato and vicinity, favoring passage of bill to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. GOEKE: Petitions of John H. Holsapple and 65 other citizens and D. O. Heeter and 13 other citizens of Darke County, Ohio, favoring passage of House joint resolution 377, to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. GORMAN: Memorial of St. Joseph's Men's Society, of St. Martin's Parish, and 19 other societies of the third congressional district of Illinois, favoring passage of bill to prohibit export of war material; to the Committee on Foreign Affairs.

Also, petition of the Chicago (Ill.) Teachers' Choir and Rev. M. P. F. Dovermann and 36 others, citizens of the third congressional district of Illinois, favoring passage of House joint resolution 377, to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. GRAHAM of Pennsylvania: Memorial of Italian Protective Association of Westmoreland County, Pa., protesting against the immigration bill in its present form; to the Committee on Immigration and Naturalization.

Also, memorial of citizens of Mankato and vicinity, favoring bill to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. GRAY: Petition of Thomas L. Walker and 107 others, of Hancock County, Ind., relative to the freedom of the press; to the Committee on the Post Office and Post Roads.

By Mr. HENSLEY: Petitions of sundry citizens of Longtown, and J. L. Diffenbaugh and others, of Chilton, Mo., favoring passage of bill to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. IGOE: Petitions and letters filed by George M. Burkarth, Gerhard Wellman, John Hofses, B. Fahrenhorst, Henry Lorenz, Joseph Reb, John Ollinger, Dr. G. L. Mueller, Dr. G. Moser, the German Theater Society, and others, favoring the Vollmer and all similar resolutions which would prohibit the exportation of arms and munitions of war to belligerent nations during the pending and future wars; to the Committee on Foreign Affairs.

By Mr. KELLY of Pennsylvania: Petition of citizens of Allegheny County, Pa., protesting against interference with freedom of the press; to the Committee on the Post Office and Post Roads.

By Mr. KENNEDY of Rhode Island: Petitions of Joseph E. Donahoe and James R. Walsh, of Providence, R. I., protesting against the treatment of Catholics in Mexico; to the Committee on Foreign Affairs.

By Mr. McCLELLAN: Petition of Charles E. Everett and 65 others, protesting against exportation of war material from United States; to the Committee on Foreign Affairs.

By Mr. MAHAN: Petitions of citizens of Norwich, Conn., and vicinity, favoring passage of bill to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. MOORE: Memorial of Italian Protective Association, of Westmoreland County, Pa., protesting against the Burnett-Dillingham immigration bill (H. R. 6060); to the Committee on Immigration and Naturalization.

By Mr. PAIGE of Massachusetts: Evidence in support of House bill 21135, for the relief of Sarah A. Foss Farnsworth; to the Committee on Invalid Pensions.

By Mr. REILLY of Connecticut: Memorial of St. Kazimiers Society, No. 389, of Meriden, Conn., protesting against the passage of the immigration bill in its present form; to the Committee on Immigration and Naturalization.

Also, petitions of Lyric Singing Society and German-American Alliance, of Meriden, Conn., favoring passage of bill to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. SABATH: Memorial of Polish National Alliance Associations of Chicago, Ill., protesting against the passage of the Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. J. M. C. SMITH: Protest of L. C. Cutler and 224 citizens of Bloomingdale, Mich., against Fitzgerald amendment to Post Office appropriation bill; to the Committee on the Post Office and Post Roads.

Also, protest of George H. Abell and 19 citizens of Battle Creek; Charles R. Gorman, of Kinderhook; Mrs. Golda F. Hume, of Eaton Rapids; S. H. Dolph, of Litchfield; Elmer Losey, of Waldron; J. F. Bradley, of Hillsdale; E. E. Baughman, of Vicksburg; Nelson H. Barber and 61 citizens of Kalamazoo, all in the State of Michigan, against Fitzgerald amendment to Post Office appropriation bill; to the Committee on the Post Office and Post Roads.

By Mr. VOLLMER: Petitions of 1,224 American citizens, favoring House joint resolution 377, to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. WALLIN: Petitions of Staatsverbund, of Schenectady, and citizens of Amsterdam, N. Y., favoring bill to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. YOUNG of North Dakota: Petition of St. John's Benevolent Society, of Wahpeton, N. Dak., against export of arms; to the Committee on Foreign Affairs.

SENATE.

TUESDAY, *January 26, 1915.*

The Senate met at 11 o'clock a. m.

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, Thou are the one God whose glory filleth all the earth. Thou dost from Thy throne behold all the dwellers upon earth. Thou dost fashion their hearts alike. We thank Thee that beneath all the storm and stress of time there is in the great human heart the common interest and passion of the common brotherhood, for Thou dost link us all together by the common interests of life. Thou dost speak to us not only from sea to sea but through all the spaces of all the ages. Through all the immense range of God's eternal kingdom Thou dost speak to Thy children upon earth. Thou dost bid us come into harmony with Thyself. Thou dost covenant with us and lead into peace and into eternal happiness.

Grant us grace to follow Thy divine commandments. May Thy presence go up with us this day into the duties that are before us. May Thy blessing abide with us and with all the people. For Christ's sake. Amen.

Mr. CLAPP. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gronna	Norris	Smith, Ga.
Borah	Hardwick	O'Gorman	Smoot
Brady	Hitchcock	Oliver	Stephenson
Bristow	Hollis	Overman	Sterling
Bryan	James	Page	Stone
Burleigh	Johnson	Perkins	Sutherland
Burton	Jones	Pomerene	Swanson
Catron	Kenyon	Ransdell	Thomas
Chamberlain	Kern	Reed	Thompson
Chilton	La Follette	Robinson	Thornton
Clapp	Lee, Md.	Saulsbury	Tillman
Clark, Wyo.	Lodge	Shafroth	Townsend
Culberson	McCumber	Sheppard	Vardaman
Cummins	McLean	Sherman	Walsh
Dillingham	Martin, Va.	Shields	Weeks
du Pont	Martine, N. J.	Shively	White
Fletcher	Myers	Simmons	Williams
Gallinger	Nelson	Smith, Ariz.	Works

Mr. CHILTON. I wish to announce that the Senator from New Mexico [Mr. FALL] is detained by serious illness in his family. I will let this announcement stand for the day.

The VICE PRESIDENT. Seventy-two Senators have answered to the roll call. There is a quorum present. The Senate will receive a message from the House of Representatives.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the Speaker of the House had signed the enrolled bill (S. 2337) to create the Coast Guard by combining therein the existing Life-Saving Service and Revenue-Cutter Service, and it was thereupon signed by the Vice President.

THE JOURNAL.

The VICE PRESIDENT. The Secretary will read the Journal of the proceedings of the preceding session.

The Secretary proceeded to read the Journal of the proceedings of the legislative day of Friday, January 15, 1915.

Mr. FLETCHER. I ask unanimous consent that the reading of the Journal be dispensed with.

Mr. GALLINGER. I object.

The VICE PRESIDENT. There is objection. The Secretary will read the Journal.

The Secretary resumed the reading of the Journal, and after having read for some time,

Mr. LODGE. Let the Journal be read. I ask that the Journal be read.

The VICE PRESIDENT. The Chair supposed the Secretary was reading the Journal.

The Secretary resumed the reading of the Journal, and after having read for some time,

Mr. STONE. Mr. President, if it is in order, to avoid further waste of the valuable time of the Senate, when it is especially desired to transact morning business, I ask that the further reading of the Journal be dispensed with.

Mr. GALLINGER. This is formal morning business, and I object.

Mr. STONE. I simply wanted to test the filibustering spirit of the other side.

The Secretary resumed and concluded the reading of the Journal, and it was approved.

CREDENTIALS.

Mr. BORAH presented the credentials of JAMES H. BRADY, chosen by the electors of the State of Idaho a Senator from that State for the term beginning March 4, 1915, which were read and referred to the Committee on Privileges and Elections.

ENROLLED BILLS SIGNED.

The VICE PRESIDENT announced his signature to the following enrolled bills, which had previously been signed by the Speaker of the House:

S. 6121. An act to authorize the construction of a bridge across the Niagara River, in the town of Lewiston, in the county of Niagara and State of New York; and

H. R. 19076. An act to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

DISTRICT OF COLUMBIA APPROPRIATIONS.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 19422) making appropriations for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1916, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. MARTIN of Virginia. I move that the Senate insist upon its amendments, agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice President appointed Mr. SMITH of Maryland, Mr. LEA of Tennessee, and Mr. GALLINGER conferees on the part of the Senate.

REPORT OF PANAMA RAILROAD CO. (H. DOC. NO. 1520).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read:

To the Senate and House of Representatives:

I transmit herewith, for the information of the Congress, the Sixty-fifth Annual Report of the Board of Directors of the Panama Railroad Co., for the fiscal year ended June 30, 1914.

WOODROW WILSON.

THE WHITE HOUSE, *January 25, 1915.*

Mr. BURTON. May I ask what disposition is to be made of that report? Is it to be printed?

The VICE PRESIDENT. It appears that it has been printed.

Mr. BURTON. It has already been printed?

The VICE PRESIDENT. And the Chair presumes it will be referred to the Committee on Interoceanic Canals.

Mr. BURTON. So that copies will be available for Members of the Senate?

The VICE PRESIDENT. That is a query that the Chair can not answer. It ought to go to the Committee on Interoceanic Canals, and if there are no copies and it is desirable to have them a report to that effect can come from the committee.

The copy submitted seems to have been printed in New York.

Mr. BURTON. I trust a sufficient number will be available for the use of Members of the Senate.

Mr. NORRIS. Mr. President, let me make a suggestion to the Senator from Ohio. This print has not been made by order of the Senate, and Members of Congress will not be able to get copies of it unless they can get them from the corporation in New York. If Senators desire it to be printed, it ought to be ordered printed. I would suggest that in addition to referring the report to the committee that it be ordered printed, so that copies of it may be available.

The VICE PRESIDENT. The Chair does not think the Chair has authority to order the report printed.

Mr. SMOOT. I will state, Mr. President, that under the law the committee has the right to have printed a thousand copies. If more than a thousand copies are desired, of course there can be an order of the Senate to that effect.

Mr. NORRIS. There is not any doubt but that a thousand copies will be sufficient; but the committee will not have authority to make that order unless some step is taken by the Senate.

Mr. SMOOT. Oh, yes; under the law they have the right to have printed a thousand copies.

Mr. NORRIS. Of the Panama Railroad Co.'s report?

Mr. SMOOT. Of any document that they desire, when it is for the use of the committee.

Mr. NORRIS. But this is not a Senate document.

Mr. SMOOT. I am perfectly aware of that.

Mr. NORRIS. It is not a public document. It is simply the report of the Panama Railroad Co., like the report of any other corporation.

Mr. SMOOT. It is not a Senate document, but it is a public document.

Mr. NORRIS. No; I beg the Senator's pardon.

The VICE PRESIDENT. The Chair would suppose that, like every other document, it would go to the committee, and if they want to have it printed they can order it.

Mr. FLETCHER. Mr. President, last year the report was referred to the Committee on Printing, and it was reported favorably and ordered printed as a Senate document. I quite agree that the committee to which the report is referred can order it printed, if it desires, up to a thousand copies; but the practice has been, I think, for the Senate to order it printed as a public document. I know that was done last year.

The VICE PRESIDENT. Perhaps the Chair can settle this matter, if agreeable to the Senators. This report contains illustrations. The communication and accompanying report will be referred to the Committee on Printing. If there is no objection, it will be so ordered.

THE AMERICAN EPHEMERIS.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Navy, transmitting, in response to a resolution of July 17, 1914, a supplementary report of the cost of preparing the American Ephemeris and Nautical Almanac, which, on motion of Mr. JONES, was referred to the Committee on Appropriations and ordered to be printed.

DISPOSITION OF USELESS PAPERS.

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Secretary of Labor requesting, pursuant to law, that authority be granted for the disposition of an accumulation of papers which are not needed or useful in the transaction of current business of the Department of Labor and which have no permanent value or historical interest. The communication will be referred to the Joint Select Committee on the Disposition of Useless Papers in the Executive Departments, and the Chair appoints the Senator from Vermont [Mr. PAGE] and the Senator from Oregon [Mr. LANE] members of the joint committee on the part of the Senate. The Secretary will notify the House of Representatives of the appointment thereof.

The Chair lays before the Senate a communication from the Secretary of Commerce, transmitting, pursuant to law, a list of papers and documents which are not needed or useful in the transaction of current business of the Department of Commerce and have no permanent value or historical interest. The communication and accompanying paper will be refered to the Joint Select Committee on the Disposition of Useless Papers in the Executive Departments, and the Chair appoints the Senator from Vermont [Mr. PAGE] and the Senator from Oregon [Mr. LANE] members of the joint committee on the part of the Senate. The Secretary will notify the House of Representatives of the appointment thereof.

MILITARY ESTIMATES (S. DOC. NO. 718).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting, in response to a resolution of the 11th instant, a report on the estimate prepared by the General Staff of the Army before the European war on the equipment requisite for a mobile army of approximately 460,000 men in time of war, which, on motion of Mr. LODGE, was, with the accompanying papers, referred to the Committee on Military Affairs and ordered to be printed.

OCEAN TRANSPORTATION RATES.

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of December 18, 1914, a further statement relative to the increase in rates for ocean transportation since July 1, 1914, and other facts relating to ocean transportation which adversely affect American commerce.

Mr. FLETCHER. Mr. President, I move that the communication and accompanying statement be printed in the RECORD and that it also be printed as Part 2 of Senate Document 673, to the limit of $500, for the use of the Senate document room. I do not know how many volumes that would give, but that is the limit the Senate can provide by resolution, and I think perhaps that will supply the number required. I do not know positively.

Mr. SMOOT. May I ask the Senator what is the subject matter of the letter?

Mr. FLETCHER. It is a letter from the Secretary of the Treasury and the Secretary of Commerce in response to a

Senate resolution. I should like to have the Secretary state what it is.

The Secretary read as follows:

On the 26th of December we transmitted to the Senate, in pursuance of its resolution of December 18, 1914, a preliminary report concerning the increases in rates for ocean transportation since July 1, 1914, and other facts. We now have the privilege of submitting a further statement, as then promised.

Mr. FLETCHER. The report is made in pursuance of a Senate resolution dated December 18, which I can read if the Senator desires.

Mr. SMOOT. No; I do not wish to take up the time of the Senate. I simply wanted to ask the Senator whether it would be necessary to put all the matter in the RECORD and also to have it printed as a public document.

Mr. FLETCHER. I think it is. It is very important. It comes from official sources and gives information on matter pending before the Senate. I think it ought to be accessible to all Senators, and for that reason I think it ought to go into the RECORD and also to be printed as a document.

Mr. SMOOT. If it were printed as a public document, every Senator could get it, and get it easier and handle it easier than to have it in the RECORD. I do not see why it should be printed in the RECORD and also as a public document.

Mr. FLETCHER. I think it ought to be printed in the RECORD, not only for the benefit of Senators but because it is information of great public interest and importance.

Mr. SMOOT. Of course it is on the pending legislation, and therefore I shall not object to the request of the Senator; but I do not believe it is a good thing, and I do not think it ought to be done.

The VICE PRESIDENT. Without objection, it will be so ordered.

The matter is as follows:

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, January 25, 1915.

To the PRESIDENT OF THE SENATE.

SIR: On the 26th of December, 1914, we transmitted to the Senate, in pursuance to its resolution of December 18, 1914, a preliminary report concerning the increases in rates for ocean transportation since July 1, 1914, and other facts relating to ocean transportation which adversely affect American commerce. We now have the privilege of submitting a further statement, as then promised.

Since our previous report numerous letters have been received by the Treasury Department and the Department of Commerce from American business men and manufacturers engaged in the export trade, which show clearly the extraordinary increase in ocean freight rates since the outbreak of the European war, the scarcity of tonnage now prevailing, and the serious effects of the high freight rates and scarcity of tonnage upon our export trade.

SERIOUS COMPLAINTS OF AMERICAN EXPORTERS AND MANUFACTURERS.

The following excerpts are made from said letters, the originals being attached hereto and marked "Exhibits 3 to 74":

Garcia & Maggini Co., general commission merchants, San Francisco, Cal., January 5, 1915:

"We beg to say that we ourselves have shipped in the last two months 500 or 600 tons of dried fruit to New York, through the canal of Panama, for reshipment to Scandinavian ports and also to Holland.

"To a great extent, these goods have been in New York for a long time, for the reason that our forwarding agents, Messrs. C. B. Richards & Co., could not get any space.

"Besides, freight rates have advanced over 300 per cent since the war broke out, and lately, and within 15 days, freights have advanced fully 100 per cent.

"It seems that whenever the Scandinavian American Line are asking higher freight rates, other lines do so too, and now even the Holland American Line is asking 100 shillings per 2,240 pounds, while only a few days ago this company asked 45 shillings per 2,240 pounds.

"These advances in freight rates are made without notice, and even previous engagements have not been protected, so that the shippers instead of making a small profit on their sales to European countries are losing money."

William Hans & Sons, manufacturers and exporters of "D" shovel handles, Houston Heights, Tex., December 28, 1914:

"For years our entire output has been disposed of abroad, but owing to the present prohibitive tariffs in ocean transportation we are unable to deliver our goods, consequently our plant will remain closed down until such rates are established as will enable us to market our goods. * * * In our judgment a Government merchant marine will solve the problem."

Charles E. Moore, president, Leaf Tobacco Association, Baltimore, Md., December 28, 1914:

"* * * I desire to file with your department an urgent protest against the unwarranted advance in freight rates on tobacco as recently established by the Holland American Line. Some of our exporting members shipping to Holland points have signed contracts with this company, expiring December 31, 1914, for a rate of $3.50 per hogshead of tobacco. This contract has been disregarded entirely and the rate increased first to $5.25, then to $6.85, and to-day a notice that it will be $7.50 until further notice. This, I repeat, in the face of the written contract for $3.50 per hogshead."

Gano, Moore & Co., coal, coke, iron, steel ores, Philadelphia, Pa., December 28, 1914:

"The shortage of vessels is so serious now that it is practically stopping the exportation of coal. We have several orders for coal, principally to South American ports, and it is impossible to secure vessels."

Coplay Cement Manufacturing Co., manufacturers of Saylor's Portland cement, New York, N. Y., December 28, 1914:

"* * * It has been our experience that the rates have advanced so rapidly that our shipments have been practically suspended, due to the two facts above mentioned—scarcity of ships and increase in freight rates.

"Before the month of July, 1914, shipments of Portland cement to the Argentine Republic and Uruguay were possible at $2.45 per ton; to Rio de Janeiro, Brazil, $3.60 per ton. These rates were advanced the early part of August 50 per cent, were subsequently reduced so that the advance was equivalent to 25 per cent for the July rates, and these rates have advanced since the latter part of September until now they are $6 per ton to Rio by some lines and $8.50 per ton by other lines; $6 per ton to the Argentine Republic; and notwithstanding these high rates there is no possibility of obtaining ships, transportation, or accommodation for our product. * * *

"We have experienced a great deal of trouble with the steamship companies in arranging freights, all of them claiming they do not want to carry cement at any price."

American Tripoli Co., "Tripoli" flour, Seneca, Mo., December 28, 1914:

"We have an offer of some orders from Barcelona, Spain, and the first two of the attached letters refer to our effort to get quoted us a rate from New Orleans to Barcelona; and you will see that the steamship company operating steamers to Barcelona refused to quote rates at all. In the first letter the reason given was that other commodities which permit of a higher rate are being carried, so that our material, which must have a lower rate, is not at all desirable, and they even refuse to quote rates at all. * * * The fourth letter, dated December 18, quotes us a rate of 49 cents per 100 pounds from New Orleans to Havre, France, and for comparison, will say that just previous to the European war, on July 3, 1914, we made a shipment at the rate of 18 cents per 100 pounds, a little more than one-third of the rate now asked. This high rate is, of course, prohibitive on a commodity such as ours."

David C. Reid, ship broker, New York, N. Y., January 4, 1915:

"* * * * The question of getting tonnage at the present time for transatlantic business is practically impossible. I have offered by cablegram up to 10/3 Government form per dead-weight ton and was refused by my London correspondents, who state that much higher offers must be made before tonnage can be procured. Under ordinary circumstances, these tramp steamers I made the offers for in good faith, could be secured at 3 shillings per dead-weight ton. Conditions with us are almost impossible. Tonnage is unprocurable at almost any, except the most extraordinary and prohibitive terms. I speak now of the cargo steamer for the general carrying tramp-steamer trade."

Strohmeyer & Arpe Co., importers and commission merchants, New York, N. Y., December 26, 1914:

"A short time ago we shipped some powdered cocoa to our friends in Denmark. When again, a short time thereafter, we had occasion to ship the same commodity, the freight charges amounted to about 280 per cent higher, and upon remonstration with the steamship company, we were told that this was the lowest rate that could be figured, and since then the steamship company has notified us that the next shipment will be charged a higher rate of freight."

Inman, Akers & Inman, Atlanta, Ga., December 28, 1914:

"We are paying ocean freight from Savannah to Rotterdam and to Bremen of $2, $2.25, to $3 per hundredweight. Formerly the rates to these places were about 35 cents per hundredweight on cotton."

W. B. Cooper & Co., cotton merchants, Wilmington, N. C., December 31, 1914:

"Please allow us to indorse the action of the administration in trying to secure boats for the movement of American products. We are frank to say that as a general proposition we are not anxious to see the United States Government get into too many lines of business, but when 3 cents per pound or more is to be paid freight on cotton across the water against 35 cents per hundred pounds six months ago, it is time something should be done, in our opinion."

(3 cents per pound equals $15 per bale; 35 cents per hundredweight equals $1.75 per bale.)

H. Frank Darrow, New York, N. Y., December 29, 1914:

"* * * I am a large exporter of grass seed, and in former seasons I have paid from 35 to 50 cents per 100 pounds on the French Line sailing from New York to Havre, while on steamship *Chicago*, sailing tomorrow, the 29th instant, I have been compelled to pay $1.50 per 100 pounds ocean freight, which I consider is prohibitive to the export trade."

Frank F. Fee, president Fee-Crayton Hardwood Lumber Co., Dermott, Ark., December 28, 1914:

"* * * It is now a serious menace to our business by reason of our inability to get reasonable and in some cases our inability to get any ocean rates on our production of hardwood lumber. We usually ship through the port of New Orleans to British and continental ports. The writer has been to New Orleans personally and is informed by the steamship agents that they are receiving a tonnage of cotton and wheat and other commodities for the belligerents at such high rates and at such easier loading and unloading that they make tremendous profits for their vessels, and they do not want to take lumber tonnage. We can say that we have before us inquiries for many carloads of lumber which could be shipped immediately provided reasonable rates could be had. * * * Further, one of the steamship agent's commission for a single month was $25,000 for the month. We trust that there is some way in which our National Government can arrange whereby lumber traffic can be resumed at something like a reasonable rate."

T. F. Jenings, hardwood manufacturer, Marianna, Fla., December 28, 1914:

"I am exporting hickory lumber in bundles to Christiania, Norway, and freight rates have become so exorbitant that it is almost out of the question to ship. * * * Now I am compelled, under the circumstances, to shut down my business if this can not be rectified."

Funch, Edye & Co., steamship agents and ship brokers, in a letter to T. F. Jenings, Marianna, Fla., December 14, 1914, state: "We have no room to offer prior to the steamship *United States*, March 11."

J. McD. Price, secretary National Lumber Exporters' Association, Baltimore, Md., December 30, 1914:

"* * * I take the liberty of calling your attention to the enormous and what appear to be unreasonable increases in ocean rates on lumber and other forest products which have been made by the steamship companies since the outbreak of war. * * * To many of the ports steamship lines refuse to quote rates at all, as they claim that more tonnage is being offered than they can take care of."

M. B. Nelson, general sales manager, the Long-Bell Lumber Co., Kansas City, Mo., December 29, 1914:

"I inclose a quotation from ship brokers issued under date of December 26, showing rates have advanced more than 300 per cent. * * * We now have in pile at port a little over 9,000,000 feet of lumber, or an approximate value of $280,000, all of which is deteriorating and could be disposed of if shipping facilities would permit.

"There are many others in the same condition as ourselves, and we sincerely hope you can do something to relieve the situation."

Alphonse Weil & Bros., New York, N. Y., December 26, 1914:

"We intended to ship a large quantity of oats to the other side, but were prevented from doing so on account of the rate of freight advancing from 4s. per bushel to 6s. 6d. We are told that the reason of this advance is due to the fact that there are very few vessels available at the present time."

Pittsburgh Provision & Packing Co., Pittsburgh, Pa., December 30, 1914:

"We are exporters of provisions, etc., to Hamburg, Germany, Rotterdam, Holland, London and Liverpool, England. Early in 1914 we signed contracts covering rates on export freight to London and Liverpool, via Atlantic Transport Line and White Star Line from New York, with J. D. Roth, general western freight agent of the above-named lines, in which we are named ocean rate of 20s. less 5 per cent per gross ton. These rates have been raised 10s. per gross ton since the beginning of the war, they claiming that their steamers are operating under greatly increased expenses. * * * At present it is almost impossible to obtain booking for London and Liverpool, the steamship company claiming that they are booked ahead."

Chattanooga Wheelbarrow Co., Chattanooga, Tenn., December 26, 1914:

"We have been endeavoring for about a month to get a shipment through some of the Atlantic or Gulf ports for shipment to Bristol or Liverpool. * * * We are still holding this carload trying to get booking through some of the various steamship companies, and in this connection would state, we have three more cars which we want to get out early in the year, provided we can get them handled from port."

H. F. Heilman, Treasurer, Levi Smith (Ltd.), Clarendon, Pa., December 31, 1914:

"We have had 390 barrels lubricating oil at Baltimore since last week in September and first week in October for immediate shipment, which are just now loading. We can not prosper and retain our patronage when shipments are held up three months before forwarding, besides the steamship company presented a bill the other day of $51.96 for demurrage charges accruing on this shipment while lying at Baltimore pier, which is a gross injustice. We have not been at fault in the least that goods have not gone forward. * * * Our export business with foreign countries has been quite heavy in past years, and Rotterdam was one of our principal ports, and generally made contracts with the Holland-American Line, at Baltimore, to cover all our shipments to this port during the year. When our contract expired in 1913 we did not think it wise to renew same at the then high rates, and held back, preferring to ship on the open market, but in March the Holland-American Line insisted on us closing a contract for the year 1914, or else pay the highest open market rate, making a difference of about 4 cents per hundredweight at that time, and, with great reluctance, we finally consented to cover our shipments to this port by another contract for the year. * * * Also, inclose copy herewith of their letter to us, dated November 4, notifying us of disregarding that contract and asking an advance of 50 per cent. * * * This contract rate was 22 cents per hundredweight for the year, whereas their latest advice (a few days ago) the rate had advanced for shipments of this commodity to Rotterdam to 70 cents per hundredweight, which is simply outrageous."

Brown & Adams, wool commission merchants, Boston, Mass., December 30, 1914:

"We have been unable to make shipments wool from Buenos Aires to Boston or New York since December 15. Very little chance securing freight room for next 30 days account scarcity of vessels. Have over $6,000 worth waiting shipment already paid for. Freight rates when available about 150 per cent increase over last year."

Ike Manheimer, green and dried apples, Rochester, N. Y., December 28, 1914:

"In connection with the Scandinavian American Line out of New York (Messrs. Funch, Edye & Co., agents), I have had so much trouble in securing space to Copenhagen and in getting the goods on board steamer, even after the space had been promised, that I was compelled to stop selling goods to Copenhagen. * * * The freight on fresh apples in barrels is almost equal to the value of the apples, and practically prohibitive.

"The Norwegian American Line (Messrs. Benham & Boyesen, agents) has until recently given me very satisfactory service out of New York to points in Norway, * * * but has now also advanced the rates to the above maximum quotations and notified me within a short time that no space is available until next April."

American Vulcanized Fiber Co., Wilmington, Del., December 28, 1914:

"* * * We have been experiencing considerable trouble in obtaining space on steamers going to Scandinavian countries. For example, we have been informed by the Scandinavian American Line that no space can be had on any of their steamers until the middle of March and April. * * * It seems to us that the shipping interests are taking advantage of the present disturbed times, which naturally will tend to hurt the American foreign trade."

American Glue Co., Boston, Mass., December 30, 1914:

"Within the past few days, having a shipment of merchandise to export from this port to Liverpool, we were informed by the carriers that they could not handle same at all, on account of having more freight than they could handle."

E. P. McBurney, vice president Empire Cotton Oil Co., Atlanta, Ga., December 28, 1914:

"* * * This company is experiencing considerable trouble in booking shipments of cotton-seed meal, cake, and linters to foreign ports. * * * In fact, the result of our inquiries along this line principally develops that shipowners have restricted their vessels, almost exclusively, to cotton by charter or at very high rates, one of my informants placing the charter price at $12 per bale."

Phoenix Iron & Steel Co., Galveston, Tex., December 26, 1914:

"* * * We are shippers of old rails and scrap iron and steel. * * * Steamship companies now either quote abnormal freights or refuse to quote at all, so it is impossible to ship any material, as the freights in some cases amount to three-fourths of the delivered price of the commodity."

Stengel & Rothschild, tanners and manufacturers of patent leather, Newark, N. J., December 29, 1914:

"* * * We are experiencing considerable difficulties with shipments of our goods to Italy. * * * The normal freight rate for patent leather in cases has been 50s. per ton, with possibly 5 per cent primage, but we have just been asked a rate of 120s. plus 5 per cent for the same class of freight. This certainly appears to be an exorbitant rate, and anything that can be done to get better shipping facilities will be highly appreciated by the business interests of this country."

L. & E. Frenkel, importers of electric specialties, New York, N. Y., December 31, 1914:

"We procured orders to ship gas coal to Italy, but on account of the high shipping rates we can not ship them."

J. D. Kremelberg & Co., Baltimore, Md., December 26, 1914:

"We are shippers of Maryland, Ohio, Kentucky, and Virginia tobacco to Europe, and most of our shipments are consigned to Holland, Germany, Austria, Italy, Norway, and Belgium. At present only shipments to Holland, Italy, and Norway are possible at prohibitive rates. In fact, the latter have become so high that now cable orders, 'Stop buying,' have been received.

"Although we have made a yearly contract with the Holland American Line—the only shipping opportunity from here to Holland—as per copy inclosed, this line has arbitrarily raised its rates 100 to 300 per cent, and even at the raised rates shipments can be booked for only 'for first available room.'

"Rates to Italy also have become entirely too high, i. e., from $4 per hogshead of Maryland tobacco to about $27, or nearly 3½ cents a pound, so that tobacco shipments have become out of question."

R. M. Bryan, eastern manager of the Black Diamond, New York, December 30, 1914:

"This business (coal industry) has been almost prostrated by the inability of shippers to secure vessels and upon terms that will permit them to make shipments."

McEwen Lumber Co., Azalea, N. C., December 29, 1914:

"Would say that for our part the present rates are practically prohibitive, as they have advanced 10 cents and 15 cents per hundredweight, and in many cases even these rates are not protected except for immediate acceptance and subject to confirmation by steamship lines. * * * It is our information that the steamship companies are giving other tonnage carrying higher freight rates preference, and in some instances are limiting their boats to a certain small amount of lumber tonnage."

Henry Lauts & Co., Baltimore, Md., December 29, 1914:

"The present rates charged by this line (Holland-American Line) are almost prohibitive and are a decided menace to the tobacco export industry of this country."

V. F. Holmes, estate of Victor Holmes, deceased, exporter of zinc oxide, Boston, Mass., December 28, 1914:

"Since the European war situation developed, this business has been very considerably hampered by a number of conditions. Among them the scarcity of freight vessels, exceedingly high rates of exchange, and what is more important, the freight outlook for 1915."

R. R. Dancy & Co., cotton, Houston, Tex., December 26, 1914:

"Last week brokers asked $17 per bale, freight to Germany (Bremen). Now $14."

John F. Bush, vice president, Hooker Electrochemical Co., New York, December 28, 1914:

"We have been endeavoring for the past three years to build up an export business on caustic soda. * * * Within the past month we have found a growing impossibility to procure rates which will permit of our moving our product to foreign ports in competition with the English transportation rates. We can not urge too strongly the necessity of procuring proper tonnage to carry commodities seeking a foreign outlet, and this tonnage should be available at once in order to benefit the United States manufacturer."

Industrial Lumber Co., Elizabeth, La., January 5, 1915:

"We have in the past exported considerable lumber to England, Holland, Germany, and some to France. Since the war, however, we have been unable to make any shipments, primarily because of the uncertainty of securing vessels; also on account of the excessive freight rates."

Danforth Geer, president, Walter A. Wood Mowing & Reaping Machine Co., Hoosick Falls, N. Y., January 9, 1915:

"We find, however, that the cost of getting goods to foreign ports and the uncertainty of proper shipping facilities is becoming a great menace, and will have a very serious effect on the business that we have in hand and wish to protect.

"* * * We can not but feel that the steamship companies are taking advantage of present conditions to exact rates which are all out of reason, and which are unjust and unfair.

"* * * It would appear to us that there never was a more opportune time for this country, either under legislative action or private capital, to create a merchant marine, for lack of which, in our judgment, this country has suffered for many years. We can only hope that some measures may be enacted, or some policy created, which will relieve the present situation, and in time to affect our business interests this year."

Meyer Hecht, commission merchant, dealing in skins and hides, New York, December 26, 1914:

"I, too, want to protest that they (steamship lines) are charging me two or three times as much as formerly, and then do not give me room for my shipments."

Dumee, Son & Co., cotton, Philadelphia, Pa., December 29, 1914:

"We wish to enter strenuous protest against the prohibitive freight rates being charged by the trans-Atlantic lines on cotton and cotton linters to European ports. * * * One year ago we paid a rate of 45 and 50 cents per 100 pounds on compressed and uncompressed cotton linters, respectively, from New York to Rotterdam. To-day we are asked $2.50 and $3 per 100 pounds."

Justus Ruperti, New York City, January 5, 1915:

"There is lack of freight room, both to and from South America. * * * There are not sufficient neutral steamers in the trade in spite of the high rates of freight to take the cargo from this country and bring it here, and we have constant complaints on that score from our customers in South America."

A. Gross & Co., stearic acid, candles, red oil, and glycerine, New York, December 26, 1914:

"Permit us, please, to lay before you our complaint against the scarcity of ships and the exorbitant rate of freight * * * which seriously handicaps our business. We therefore feel that something should be done by our Government to relieve the present situation."

Gabriel Nachman, wool stock, New York, December 28, 1914:

"We are large shippers of woolen rags * * * steamship companies have advanced their freight rates ¼ cent per pound to $1.10

per 100 pounds; and even at that rate they refuse to take rags; therefore have not been able to ship any for export in over four weeks."

G. Stallings & Co., Lynchburg, Va., tobacco exporters, December 28, 1914:

"There is a considerable scarcity of steamers flying the American or neutral flags, and unless more ships can be put at the disposal of shippers causing a general reduction of ocean freight rates, which are now unreasonable, excessive, and almost prohibitive, the export business of this country is bound to suffer greatly."

A. P. Husband, secretary Millers' National Federation, Chicago, Ill., December 29, 1914:

"We are attaching hereto a tabulated statement of ocean freight rates on flour, published by International Mercantile Marine, from several American ports to London, Aberdeen, and Liverpool. You will note that from July 18 to December 19 the ocean freight rates from all named American ports to ports in United Kingdom advanced over 100 per cent. * * * The sharp advances in ocean freight rates on flour have not been confined to the International Mercantile Marine, however. The Holland-American Line, controlling, as it does, the only available means of transportation to Holland, has increased its rates on flour to a point where it is interfering seriously with the ability of American millers to compete for business in Holland against British millers (who are grinding American wheat). * * * As you are aware the Government of the Netherlands recently reserved to itself a practical monopoly in all foodstuffs. Since that time (in November) a sharp and unprecedented advance in ocean freights will be noted. Not only has this company declined to give millers option on ocean space at a quoted rate when the miller has a bid from Holland, but has, in some instances, advanced the rate to the miller overnight, and the miller, having accepted business at the rate quoted the day before, is forced to take a loss, owing to this arbitrary attitude of the Holland-American Line, which, by the way, is contrary to all precedents, as a miller must have extended to him an option on ocean freight room at a given quotation for a time sufficiently long to cable his foreign correspondent and get a reply.

"Before the creation of a monopoly on foodstuffs by the Government of the Netherlands, however, the Holland-American Line declined to carry flour for which it had contracted (in some instances before the war), and millers were unable to get that company to move large shipments of flour which had been made by millers in good faith."

Markt & Hammacher Co., export agents, New York, N. Y., January 5, 1915:

"We admit and believe that it is necessary under the present trying conditions for the steamship companies to advance their rates to a certain extent, say, 25 per cent or even 50 per cent over normal rates, but when steamship companies are quoting and charging three times the normal rates, and in some instances even four times the normal rates, we feel that it is absolutely an imposition on the part of the steamship companies to demand such freight rates."

Panama Railroad Co., January 15, 1915:

"Our stock (of coal) has been reduced from 90,000 to 40,000 tons, and both the Earn Line and our company are scouring the charter market in the effort to secure sufficient tonnage to carry to the Isthmus the amount of coal it is imperative we should keep there."

ANALYSIS OF COMPLAINTS.

It appears from these statements of our business men and shippers that:

1. Ocean freight rates have been arbitrarily increased to an unparalleled height without regard to the interests of American trade.

(See letters of T. F. Jennings (hardwood manufacturer), Marianna, Fla., Exhibit 10; Fee-Crayton Hardwood Lumber Co., Dermott, Ark, Exhibit 18; Phoenix Iron & Steel Co., Galveston, Tex., Exhibit 21; L. & E. Frenkel (gas coal), New York, Exhibit 23; McEwen Lumber Co., Azalea, N. C. Exhibit 28; Walter A. Wood Mowing & Reaping Machine Co., Hoosick Falls, N. Y., Exhibit 34; H. Frank Darrow (grass seed), New York, Exhibit 36; Stengel & Rothschild (leather), Newark, N. J., Exhibit 39; Garcia & Maggini Co. (fruits), San Francisco, Cal., Exhibit 42; William Haas & Sons (shovel handles), Houston Heights, Tex., Exhibit 43; Coplay Cement Manufacturing Co., New York, Exhibit 44; American Tripoli Co. (flour), Seneca, Mo., Exhibit 45; Charles E. Moore (tobacco), Baltimore, Exhibit 48; J. D. Kremelberg & Co., Baltimore (tobacco), Exhibit 57; G. Stallings & Co., Lynchburg, Va. (tobacco), Exhibit 60; Millers' National Federation, Exhibit 62; Henry Lauts & Co., Baltimore (tobacco), Exhibit 63.)

2. High rates are not only restricting the general volume of our export trade but are actually stopping exportations in some lines. Some business plants have been shut down as a result of the exorbitant rates.

(See letters of Fee-Crayton Hardwood Lumber Co., Exhibit 18; American Tripoli Co. (flour), Seneca, Mo., Exhibit 45; Gano, Moore & Co. (coal), Philadelphia, Exhibit 5.)

3. Shipowners in some instances are taking only those goods or commodities which will pay the highest rates of freight and are easily unloaded, and are declining to accept shipments of other commodities (such, for instance, as lumber) because the character of the shipments and the rates obtainable thereon make it more to the interest of the steamship owner to accept one class of goods than another. Such discriminations against different classes of American products and against certain lines of American business are both arbitrary and hurtful. If common carriers on land were to practice such discriminations against shippers, and adopt such arbitrary methods, they would be subject to criminal prosecution.

(See letters from Fee-Crayton Hardwood Lumber Co., Dermott, Ark., Exhibit 18; McEwen Lumber Co., Azalea, N. C., Exhibit 28; Coplay Cement Manufacturing Co., Exhibit 44; American Tripoli Co. (flour), Seneca, Mo., Exhibit 45.)

4. Despite claims that there is ample tonnage for the South American trade, there are letters to show that rates to South America have been greatly increased and there is a shortage of tonnage both to and from South America.

(See letters of Gano, Moore & Co. (coal), Philadelphia, Exhibit 5; Coplay Cement Manufacturing Co., New York, Exhibit 44; Brown & Adams (wool), Boston, Exhibit 4; Justus Ruperti, New York, Exhibit 70.)

In this connection attention is invited to letter of January 15, 1915, from the Panama Railroad Co. (attached as Exhibit 77), showing the inability to get coal to the Canal Zone for the use of the Panama Canal.

5. The direct charge is made that the Holland-American Line has repudiated written contracts with American shippers and has increased freight charges without regard to their rights.

(See letters of Charles E. Moore, Baltimore (tobacco), Exhibit 48; Levi Smith (Ltd.), Clarendon, Pa. (petroleum products), Exhibit 3; J. D. Kremelberg & Co., Baltimore (tobacco), Exhibit 57; Henry Lauts & Co., Baltimore (tobacco), Exhibit 63.)

ENORMOUS INCREASES IN RATES.

In order that the increase in ocean freight rates since July, 1914, may be more fully appreciated, the following tables, made by the Actuary of the Treasury Department, and based upon the best obtainable information, are submitted:

Freight rates, New York to European ports.

	1914, July 1.	1915, Jan. 19.	Increase.
Grain (per bushel):			*Per cent.*
Liverpool	$0.05	$0.20	300
Rotterdam	.06	.60	900
Havre	.06		
Bremen	.0714		
Mediterranean	.0825		
Flour (per 100 pounds):			
Liverpool	.10	.40	300
Rotterdam	.10	.60	500
Havre	.18	.47	161
Cotton (per bale):			
Liverpool	1.00	5.00	400
Rotterdam	1.25	10.00	700
Havre	1.25	5.00	300
Meat and lard (per 100 pounds):			
Liverpool	.24	.36	50
Rotterdam	.28	.75	168
Havre	.30	.60	100

Freight rates—Baltimore.

	1914, July 1.	1915, Jan. 20.	Increase.
Grain (per bushel):			*Per cent.*
European ports	$0.03	$0.30	900
Mediterranean	[1] .05½	.32½	473
Flour (per 100 pounds):			
European ports	.14	.65	364
Mediterranean			
Cotton (per bale):			
European ports	1.75	12.50	614
Mediterranean			
Meats and lard (per 100 pounds):			
European ports	.27		
Mediterranean			

[1] September 1.

Freight rates—Philadelphia.

	1914, July 1.	1915, Jan. 21.	Increase.
Grain (per bushel):			*Per cent.*
European ports	$0.04	$0.20	400
Mediterranean ports	.06¼	.28½	318
Flour (per 100 pounds):			
European ports	.14	.41	192
Mediterranean ports	.187	.75	301
Cotton (per bale):			
European ports	1.15	5.00	335
Mediterranean ports	1.25	6.25	400
Provisions (per 100 pounds):			
European ports	.22½	.3937	75
Mediterranean ports	.321	.9640	200

Freight rates—Norfolk, Va.

	1914, July 1.	1915, Jan. 20.	Increase.
Grain (per bushel):			*Per cent.*

Genoa	1.90	10.00	426
Bremen	1.40	16.25 to 17.50	1,061 to 1,150

No flour, meats, or lard now moving from Galveston.

MAXIMUM NOT IN SIGHT.

While this report is being written, information is received that rates are higher than those given in some of the tables herein presented, and that even at these extraordinary figures it is difficult to obtain cargo space for earlier sailings than March and April.

SUMMARY OF THE MOST STRIKING INCREASES.

From the foregoing tables it will be observed that ocean freight rates on grain from New York to Rotterdam have been increased since the outbreak of the war 900 per cent; on flour 500 per cent; on cotton 700 per cent.

From New York to Liverpool the rates on the same commodities have increased from 300 to 500 per cent.

From Baltimore to European ports (excepting German) rates have been increased on grain 900 per cent; on flour 364 per cent; on cotton 614 per cent.

From Norfolk to Liverpool rates on grain have been increased from 157 to 200 per cent; on cotton 186 per cent.

From Norfolk to Rotterdam the rates on cotton have been increased 471 per cent; to Bremen the rates have increased on cotton 1,100 per cent, namely, from $1.25 per bale to $15 per bale.

From Savannah to Liverpool the rates have been increased on cotton 250 per cent; to Bremen the rates have been increased on cotton 900 per cent.

From Galveston to Liverpool the rates have been increased on grain 174 per cent; on cotton 361 per cent; to Bremen the rates have been increased on cotton 1,061 to 1,150 per cent.

CONTROL OF RATE SITUATION BY STEAMSHIP INTERESTS.

Ocean freight rates are still rising and are limited only by the greed of the steamship owners on the one hand and by what the traffic can stand on the other.

The Government has no power to control or regulate ocean freight rates; it can not, under existing law, protect our foreign trade against these extortionate and hurtful charges. The steamship owners can increase rates without notice and upon the instant, and our business men are helpless. The steamship companies are their own masters and do as they please with the transportation of our exports. As already shown, they are seriously checking our foreign trade, and in some cases, such as lumber and coal, are stopping it altogether.

(See letters of William Haas & Sons, Exhibit 43; Gano, Moore & Co., of Philadelphia, Exhibit 5; American Tripoli Co. (flour), Seneca, Mo., Exhibit 45.)

SCARCITY OF TONNAGE.

The scarcity of steamship tonnage is notoriously true. Every daily paper which publishes shipping news testifies to this incontrovertible fact. Attention is called to attached clippings from the New York Journal of Commerce of January 2, 1915, and the Wall Street Journal of January 1, 1915 (Exhibits 78 and 79), which show clearly the scarcity of tonnage.

But the conclusive evidence of the shortage of tonnage is the excessive and unparalleled ocean freight rates now prevailing. Such rates could not be maintained if tonnage was abundant.

BURDEN UPON AMERICAN BUSINESS.

Annexed hereto as Exhibit 1 is a summary of our sea trade and the estimated freight cost of handling it, from July to December, 1914, inclusive, prepared by the actuary of the Treasury Department.

From this it appears that our total exports by sea for July, 1914 (before the war), were $139,225,479, and the ocean freight cost was $7,833,482, or 5.63 per cent; the total of such exports for December, 1914, were $226,000,000 (estimated), and the ocean freight cost was $30,742,500, or 13.6 per cent—an increase over July of 141 per cent.

If the ocean freight cost on December exports had been at the same rate as July, viz, 5.63 per cent, the total freight charge on our exports for December would have been $12,723,800 instead of $30,742,500. In other words, the increased ocean freight tax arbitrarily imposed upon our farmers and business men for the month of December, 1914, only, was $18,018,700. If exports by sea continue for the 12 months of 1915 at the December, 1914, rate and the ocean freight charges are the same as for December, 1914, the American farmers and business men will pay to shipowners (principally foreign) increased freight charges above the normal rates, of $216,224,400, or more than five times the $40,000,000 which the Government proposes by the shipping bill to put into American ships for the protection of our foreign commerce.

In two months and seven days the increased ocean freight charges (above the normal rates prevailing in July, 1914) exacted on our foreign trade at the December, 1914, rate, would amount to $40,241,761, or more than the total amount, viz, $40,000,000, which the shipping bill authorizes for investment in an American merchant marine.

In 12 months, as before stated, the total increase in the freight tax levied by steamship owners, mostly foreign, upon our export trade, at the December, 1914, rate, would amount to the sum of $216,224,400. If the same be applied to our import trade, there would be an additional increase of $95,640,000, or a total increased ocean freight charge on exports and imports by sea in one year of $311,864,400, or 141.6 per cent over the usual cost. (See Exhibit 2.)

Thus far we have been dealing only with the increased ocean freight charges over and above the normal rates prevailing in July, 1914. Including these normal rates, and assuming that the December, 1914, total ocean freight charges, viz, $44,342,500, represent an average for each month of 1915, the total ocean freight charges on American import and export trade by sea for the year 1915 would amount to the enormous total of $532,110,000. (See Exhibit 1.) Almost the whole of this huge sum would be paid to foreign steamship owners and would have an important bearing upon our foreign trade balances; it might, in fact, turn these balances against us.

EFFECT OF HIGH OCEAN FREIGHT RATES ON AMERICAN FARMER.

It will be observed that the greatest increases in rates and the heaviest tax has been imposed upon the products in which the American farmer is most concerned, namely, grain and cotton. These commodities constitute the great bulk of our export trade and have the largest influence in throwing the balance of foreign trade in favor of this country.

While the steamship companies have imposed conscienceless taxes in the form of increased rates on grain, amounting, as already shown, to as much as 900 per cent to some ports, they have placed an even heavier burden upon cotton, where the increase in rates to some ports is as high as 1,100 per cent. This increase is particularly onerous upon the cotton producers of the South, because it comes at a time when the effects of the war have greatly reduced the value of cotton and when the southern farmers are least able to bear additional burdens.

Grain, cotton, and other commodities are usually sold "delivered" at the port of destination. When steamship companies raise the cost of delivery of grain from 6 cents to 60 cents per bushel, it makes a vast difference in the price the farmer receives for his product; and when ocean freight charges on cotton are raised from $1.25 to $15 per bale, the price at which the farmer sells his cotton is seriously reduced.

To show what the burden imposed on the farmers by these high ocean freight rates means, it is necessary only to bring out the fact that while the total freight cost on our exports by sea for December, 1914, was $30,742,500, the great commodities of grain, cotton, and flour bore $11,782,250 of this charge—or more than 36 per cent of the entire freight cost on all exports by sea for December, 1914.

AMERICAN PRIVATE CAPITAL INVESTED IN MERCHANT MARINE.

The Bureau of Navigation of the Department of Commerce estimates the total value of all our ships in the foreign and domestic trade, and on the Great Lakes, including sail vessels, steam vessels, motor boats, canal boats, barges, etc., to be about $600,000,000. The Bureau of Navigation states that the approximate value of American ships engaged in the foreign trade, including steam and sail tonnage, is only $69,000,000.

It is argued by some that the Government should not do anything for the relief of our foreign commerce that will cause competition with this $69,000,000 of private capital invested in ships engaged in the foreign trade, but that it is a paramount duty of the Government to protect this shipping interest against competition even though by so doing we leave our foreign trade entirely at the mercy of foreign ship interests and the relatively small amount of American capital invested in ships engaged in the foreign trade.

Let us compare the actual amount or value of our export trade by sea with the value of our ships engaged in the foreign trade, and we find that the total amount of such trade for the fiscal year ended June 30, 1914, was $2,047,755,872, while the total value of American ships engaged in the foreign trade is $69,000,000. Our combined imports and exports by sea for the same year were $3,785,404,525.

It is pertinent to ask which of these interests is entitled to the superior consideration of the Government, the farmers and producers of the great grain States of the West and the farmers and producers of the great cotton and tobacco States of the South, the merchants, manufacturers, and business men throughout the entire country, whose combined activities represent our vast export trade, amounting for the last fiscal year to $2,047,755,872; or the owners of the comparatively few American steamships engaged in the foreign trade, whose aggregate investment is approximately only $69,000,000.

There would seem to be but one answer, and that is that our farmers, merchants, manufacturers, and business men, whose activities produce our great export trade, are entitled to first consideration, and that it would pay us many times over to invest the $40,000,000, as provided in the shipping bill, in an American merchant marine, and bring about as quickly as possible a restoration of normal ocean freight rates, with a saving to American business of more than $200,000,000 per annum.

In order to protect this $69,000,000 against competition, as suggested by the arguments of the opponents of the shipping bill, the Government would have to permit the owners of American vessels, as well as the owners of foreign vessels, which do the great bulk of our ocean-carrying trade, to continue to levy such taxes in the form of increased freight charges upon the $2,047,755,872 of our export trade, as these foreign and American steamship owners may determine.

Of course no one wants to injure or treat unjustly the owners of the $29,000,000 invested in American vessels engaged in the foreign trade. As we understand it the purpose is not to put the vessels that may be purchased under the shipping bill into any service where American vessels are furnishing sufficient facilities at reasonable rates.

OBTAINABLE TONNAGE.

It has been stated that if the shipping bill is passed additional tonnage for our foreign trade can not be quickly obtained. This is incorrect. While we have made no effort to test the market for ship offerings, we have been assured by no less an authority than Mr. Bernard N. Baker, of Baltimore, a man of the best character and standing, who developed to a high degree of prosperity the American Transport Line, of which he was for many years president, and who is thoroughly familiar with the shipping trade, that many suitable and admirable ships for the purpose can be promptly secured.

Some of these ships are already completed and can be had immediately, some are partially built and can be finished in a few months, and others can be bought and transferred from steamship lanes or routes where the demand for accommodations is not so great to the service of American commerce. Others can be secured in a reasonable time from American shipyards, which are well equipped to fill orders promptly.

It is not true, as alleged in some quarters, that only ships of German registry can be purchased. We do not know whether any of the German vessels interned in our ports can be secured or that they would be desirable, but we are convinced that suitable ships of various foreign registry are available if the means for purchasing them are provided. There is attached to this report as Exhibit 76 a list of ships offered by the Merchant Marine Agency, J. V. McCarthy, manager, Boston, Mass., from which it will be seen that there are 15 ships of English registry and 7 of German registry which he proposes to sell. Attention also is invited to Exhibit 75 showing that other ships are obtainable.

We are convinced that within a reasonable time after the shipping bill is passed enough ships can be secured to greatly relieve and assist our foreign trade.

PANAMA STEAMSHIPS.

In the course of our inquiries we have had occasion to look into the operation of the Panama Railroad & Steamship Co., in which the Government is the owner of the entire capital stock, because here is an instance where the Government has long been directly in the shipping business and has made it successful. The operations of the ships of this company offer no justification for the charge of "administrative and executive inefficiency," any more than the construction of the Panama Canal itself.

Reference to the annual report of the board of directors of the Panama Railroad Co., soon to be issued, for the fiscal year ended June 30, 1914, and to Exhibit A connected therewith, and also to Exhibit V in a supplemental report carrying the results of operation down to the 31st of October, 1914, shows that:

In the fiscal year ended June 30, 1914, there was a net revenue from the steamship line alone of $314,296.36, and in the four months ended October 31, 1914, there was a net revenue from the steamship line alone of $84,294.16.

These net revenues are truly net; that is to say, they are net after maintenance and depreciation, including extraordinary repairs, are charged against the property. This depreciation on the ships owned by the company is 6 per cent per annum, which is the practice of the best private lines and is in excess of the depreciation charged by many privately owned lines.

The Panama Railroad & Steamship Line is a conspicuous instance of successful conduct, under the supervision of the Government, of so-called "private business."

SHIPPING SITUATION HAMPERS EXPORT TRADE.

While it is true that there has been a great growth of our export trade in recent months, we are satisfied that this growth would have been much greater if there had been ample steamship tonnage and if ocean freight rates had been maintained at a reasonable level. We are satisfied that the removal of the oppressive restraints now exercised by foreign steamship companies upon our export trade will give it an extraordinary impetus, and bring to our country a period of enlarged and unexampled prosperity.

We are the one great agricultural, industrial, and mineral producing nation which is not only at peace, but is far from the menace of war. We are the only market in which orders can be placed with expectation that they will be filled in reasonable time. The leading nations of the earth are turning to us now as the most reliable source of supply.

The fact that our expanding trade shows, at the moment, favorable balances is no argument that our commerce moves freely and without injury or undue burdens. On the contrary, it is a fact that through scarcity of tonnage and the extortionate freight rates imposed upon our commerce by foreign-owned and domestic steamship companies our export trade is greatly hampered, and the most wonderful business opportunity ever presented to any country is put in needless jeopardy. We believe that the favorable trade balance in December of over $100,000,000 might have been doubled in January if sufficient ships had been available at reasonable rates, so that the orders which are pouring in upon us from every source could have been promptly filled.

The Treasury Department and the Department of Commerce are continuing to receive information about the shipping situation, and we assume that the Senate desires to have us submit further reports upon the subject of the Senate resolution if additional facts come to us while the shipping bill is under consideration by the Senate. We shall, therefore, take the liberty of communicating again to the Senate any other facts that may come to us which seem of sufficient importance to merit the attention of the Senate.

In the absence of the Secretary of Commerce, his signature, with his approval, is attached to this report by the Secretary of the Treasury.

Respectfully,

W. G. McADOO,
Secretary of the Treasury.
WILLIAM C. REDFIELD,
Secretary of Commerce.

EXHIBIT 1.

WASHINGTON, *January 21, 1915.*

The honorable the SECRETARY OF THE TREASURY.

SIR: The following tables show the sea trade of the United States, together with the estimated freight cost, by months, July to December, 1914, inclusive:

SUMMARY.

United States sea trade and estimated freight cost, July to December, 1914, inclusive.

Exports to Europe.	July.	August.	September.	October.	November.	December (estimated).
Grain:						
Value	$19,027,744	$18,167,176	$33,383,176	$27,843,882	$29,976,000	$36,700,000
Freight cost	1,273,285	1,148,543	2,777,327	2,498,643	4,884,075	6,758,000
Per cent	6.7	6.3	8.3	9	16.3	18.4
Flour:						
Value	$1,634,244	$1,565,279	$3,769,548	$5,009,609	$5,915,170	$6,000,000
Freight cost	76,813	78,094	301,882	506,508	563,375	845,000
Per cent	4.7	5	8	10.1	9.5	14.1
Cotton:						
Value	$6,197,348	$1,019,681	$4,538,685	$16,421,278	$27,168,987	$35,709,000
Freight cost	140,958	18,232	126,308	861,834	2,222,391	3,979,250
Per cent	2.3	1.8	2.8	5.2	8.2	11.1
Meats:						
Value	$2,964,808	$2,925,566	$3,627,610	$3,098,068	$4,086,733	$4,500,000
Freight cost	54,528	48,763	92,051	79,988	106,964	115,550
Per cent	1.8	1.7	2.5	2.6	2.6	2.6
Lard:						
Value	$2,037,073	$2,149,061	$2,288,640	$5,265,928	$4,556,234	$5,300,000
Freight cost	48,986	49,976	79,283	186,050	165,289	201,700
Per cent	2.4	2.3	3.5	3.5	3.6	3.8
Other articles:						
Value	$58,829,308	$23,048,460	$41,920,425	$73,215,532	$73,034,655	$89,800,000
Freight cost	2,941,465	1,198,521	2,934,430	5,308,126	8,033,812	12,124,000
Per cent	5	5.2	7	7.2	11	13.5
Exports elsewhere:						
Value	$48,534,954	$30,445,543	$46,283,262	$43,548,618	$37,535,067	$48,000,000
Freight cost	3,397,447	2,131,258	3,471,244	3,483,889	4,504,208	6,720,000
Per cent	7	7	7.5	8	12	14
Total exports by sea:						
Value	$139,225,479	$79,321,775	$135,811,346	$174,402,915	$182,272,846	$223,900,000
Freight cost	7,833,482	4,673,983	9,782,525	12,925,231	20,489,031	30,742,500
Per cent	5.63	5.89	7.2	7.4	11.2	13.6
Total imports by sea:						
Value	$147,533,541	$115,823,908	$127,904,688	$124,721,414	$113,204,516	$100,000,000
Freight cost	8,305,307	6,822,204	9,209,138	9,242,231	12,678,905	13,500,000
Per cent	5.63	5.89	7.2	7.4	11.2	13.6
Total sea trade:						
Value	$286,762,020	$195,148,683	$263,716,034	$299,129,379	$295,477,362	$323,900,000
Freight cost	16,139,789	11,496,190	18,991,663	22,167,269	33,158,940	44,342,500
Per cent	5.63	5.89	7.2	7.4	11.2	13.6

EXHIBIT 2.

United States sea trade, freight cost, based upon the average ad valorem freight rate for July, 1914, as compared with that for December, 1914.

	Month of December.	12 months' period.
Exports:		
On December basis, 13.6 per cent, as shown in Exhibit 1	$30,742,500	$368,910,000
On July basis, 5.63 per cent, as shown in Exhibit 1	12,723,800	152,685,600
Additional cost to shippers	18,018,700	216,224,400
Imports:		
On December basis, 13.6 per cent, as shown in Exhibit 1	13,600,000	163,200,000
On July basis, 5.63 per cent, as shown in Exhibit 1	5,630,000	67,560,000
Additional cost to shippers	7,970,000	95,640,000
Total sea trade:		
On December basis, 13.6 per cent, as shown in Exhibit 1	44,342,500	532,110,000
On July basis, 5.63 per cent, as shown in Exhibit 1	18,353,800	220,245,600
Additional cost to shippers	25,988,700	311,864,400

An increase cost of 141.6 per cent.

That is, assuming that the total ocean freight charges for December, 1914, viz, $44,342,500, will be the average for each month of 1915, the total ocean freight charges on American import and export trade for the year 1915 will amount to $532,110,000.

Assuming that no state of war existed, and that the normal freight rates in force last July had remained in force in December last, and that the December freight cost, upon this basis, viz, $18,353,800, would have been the average for each month of 1915, the total ocean freight charges on American import and export trade for the year 1915 would have been $220,245,600, or $311,864,400 less than under existing conditions.

The basis of these tables are, first, the actual exports and imports of the United States as given in the Monthly Summary of Foreign Commerce, issued by the Department of Commerce; second, the country of destination of the exports where shown, and where not shown the most probable country of destination; third, the port of the United States exporting these goods, based where obtainable upon the actual export figures, otherwise estimated. The freight rates used are based upon the actual rates of contracts for carrying goods from certain United States ports to certain European ports, where at hand; otherwise, the rates are estimates based upon daily quoted rates in the New York shipping papers. The computations relating to the month of December are estimates.

After the average ad valorem freight cost of the enumerated articles is computed, it is assumed that the cost of shipping the other goods exported to Europe will be about the same ad valorem. It is known that the freight on general cargoes is practically the same as on provisions, with a rather low ad valorem, while that on bulky, low-priced goods is a higher ad valorem, making the average for the last six months very close to the average of the articles enumerated. The freight cost from the Atlantic seaboard to the Far East, Australia, and South America is higher than the trans-Atlantic cost, while that to Cuba, the West Indies, Mexico, and west coast of Canada is somewhat lower.

It is also assumed that the freight cost for our imports is about the same as for our exports.

Two factors modify the ad valorem freight cost—the unit value of the article and the unit freight rate. Since June both these values have fluctuated, the latter very much, as is shown in the following table. Freight rates are still advancing.

Increase in freight rates—Average for United States to Europe.

	Grain, per bushel.	Flour, per 100 pounds.	Cotton, per bale.	Meat, per 100 pounds.	Lard, per 100 pounds.
Estimated average:	*Cents.*	*Cents.*		*Cents.*	*Cents*
July	5.6	11.5	$1.15	25	25
August	5.7	13.6	1.15	24.2	25
September	7.7	22.3	1.26	36	36
October	8.7	26	2.10	36.7	38.4
November	16.1	26	3.39	37	38.8
December	22.1	35	4.57	37	39.1
Increase, July to December, per cent	294	204	297	48	56

The export price of wheat has increased from 91 cents per bushel in July to about $1.20 in December. Flour from $4.58 per barrel in July to about $5.30 in December. Cotton decreased from 12.4 cents per pound in July to 7.8 cents in October, since which time it has increased somewhat. Certain meats have increased from 13.9 cents per pound in July to over 15 cents in December. Lard has increased from 10.9 cents in July to nearly 12 cents in December. These fluctuations explain why the ad valorem and unit freight cost increase in different ratios.

Respectfully,

JOS. S. MCCOY,
Government Actuary.

CLARENDON, PA., *December 31, 1914.*

Hon. W. G. MCADOO,
Secretary of the Treasury, Washington, D. C.

MY DEAR SIR: Having noticed in the paper last night that you are gathering information from American exporters and manufacturers as to the advisability of the United States establishing their own steamship lines, wish to be put on record that we are most heartily in favor of such a proposition, as before the war we had a big export trade and have orders on our books for lots of goods, but parties have cabled us some time ago to defer shipments, as the excessive marine freight rates barred them from using the goods; besides steamers are not available to ship goods.

We have been in the oil-refining business for about 30 years, and before the war we could get about weekly steamers for Rotterdam, whereas at present we can not get a steamer once a month. We have had 390 barrels lubricating oil at Baltimore since last week in September and first week in October for immediate shipment which are just now loading. Shipment was consigned for Rotterdam, and while it was held up for a short time to comply with the shipping regulations for that port in getting a Netherland Government permit, this permit has been in the hands of the Holland-American Line since November 19 or 20, and have repeatedly urged forwarding this shipment, but the Baltimore agents claimed they had no steamers. We can not prosper and retain our patronage when shipments are held up three months before forwarding; besides the steamship company presented a bill the other day of $51.96 for demurrage charges accruing on this shipment while lying at Baltimore pier, which is a gross injustice, as we have not been at fault in the least that goods have not gone forward. Aside from this, the foreign steamship lines have such a monopoly of the business that they disregard all rights belonging to the American shippers and just fix matters to suit themselves. We know of but two lines from Baltimore, Philadelphia, and New York for Rotterdam, which are Holland-American Line and Atlantic Transport Co., and they are practically one, as there is no competition between these two lines. As mentioned above, our export business with foreign countries has been quite heavy in past years, and Rotterdam was one of our principal ports and generally made contracts with the Holland-American Line at Baltimore to cover all of our shipments to this port during the year. When our contract expired in 1913, we did not think it wise to renew same at the then high rates and held back, preferring to ship on the open market, but in March the Holland-American Line insisted on us closing a contract for the year 1914 or else pay the highest open market rate, making a difference of about 4 cents per hundredweight at that time, and with great reluctance we finally consented to cover our shipments to this port by another contract for the year. Inclose copy herewith.

Also, inclose copy herewith of their letter to us dated November 4, notifying us of disregarding that contract and asking an advance of 50 per cent, and a copy of one of our letters of protest, dated November 10, but all without avail as they would not move the 390 barrels lubricating oil mentioned above without 33 cents per hundredweight, paid in advance, which we paid under protest some time last month. This contract rate was 22 cents per hundredweight for the year, whereas their lastest advice (a few days ago) the rate had advanced for shipments of this commodity to Rotterdam to 70 cents per hundredweight, which is simply outrageous.

Glad to favor you with original contract and letters if desired. Can give you other incidents of unfairness from steamship lines if desired. Have we no redress on Holland-American Line to compel them to refund amount overpaid against contract rate?

Very respectfully,

LEVI SMITH (LTD.),
H. F. HEILMAN, *Treasurer.*

EXHIBIT 3A.

[Levi Smith Ltd., refiner of Pennsylvania petroleum products, Clarendon, Pa.]

Baltimore freight contract No. 178, between Mr. Levi Smith, Clarendon, Pa., party of the first part, and the Holland America Line, parties of the second part, the following has been agreed upon:

1. The party of the first part agrees to forward all shipments of lubricating oil that he controls from Baltimore to Rotterdam during the period from January 1, 1914, to December 31, 1914.

2. The parties of the second part agree to carry such shipments from Baltimore to Rotterdam during the above-mentioned period at an ocean rate of 22 cents per 100 pounds.

3. It is understood and agreed that this contract is to be carried out under the terms and conditions of the bills of lading of the line. Steamers reserve the right to take grain in excess of their net register tonnage.

CLARENDON, PA., *December 18, 1914.*

[Copies of our letter, Nov. 10, 1914.]

Messrs. DRESEL, RAUSCHENBERG & Co.,
Baltimore, Md.

GENTLEMEN: We acknowledge receipt of your letter dated November 7 (likely intended for the 9th), explaining that your people found it necessary to raise the contract rate 50 per cent owing to the enormous expense at which steamship lines were operating at the present time, and while it may not feel very good to do business at a loss, nevertheless your people invited those chances to gain or lose when you insisted on signing a contract or else pay the higher open rate.

We have sold a whole lot of goods on this contract rate of 22 cents per hundredweight, and you would certainly not consider it a fair proposition that we should pay this 50 per cent additional rate out of our own pocket. If the present earnings don't keep the profits on the right side of the ledger with your people, your line is not bankrupt, and will simply have to do like other people when they make bad contracts—charge it up to "profit and loss." We are not inviting any contracts, as we find it too much of a gamble, and quite frequently the other fellow likes to squeal when he gets hit; but we remember of some contracts we had made in the past years, on which we lost $1,000 per month toward the close. Well, we could not do business on that basis, but simply had to stand it and take it out of previous years' earnings.

We are not hard-hearted, but, as explained before, we can not pay the 50 per cent increased rate out of our own pocket, when we closed the deals with our customer on this 1914 contract rate with your people, and we simply have to ask you to carry out the contract between us, and entered into last spring.

Kindly advise your present sailing dates for Rotterdam covering a period of the next three weeks, and whether you can arrange to take two or three carloads on each steamer.

An early response will much oblige.

Yours, very truly,

LEVI SMITH (LTD.),
H. F. HEILMAN.

EXHIBIT 3C.

[Levi Smith (Ltd.), refiner of Pennsylvania petroleum products.]

CLARENDON, PA., *November 4, 1914.*

Messrs. LEVI SMITH (Ltd.),
Clarendon, Pa.

GENTLEMEN: We duly received your favor of the 31st ultimo regarding four cars of mineral colza oil that you wish to ship to Rotterdam under your freight contract with us.

We have no objection to taking this oil, provided, of course, we receive necessary permit from the Dutch Government through our New York office to do so, and we can not make any definite booking until this permit has been received.

As regards the rate of freight, please note that we have been instructed by our principals to advance all contract rates 50 per cent, so that the lowest rate that we can accept on any of your shipments now is 33 cents per 100 pounds. This is a general rule that has been put into effect at all ports and from which we can not deviate.

Our present sailings are as follows: Steamships *Socatdyk*, November 15; *Westerdyk*, November 21; *Randwyk*, November late—early December.

As regards the question of war risk, this is changing from time to time, and we think you would do better by waiting until the shipment is ready to go forward before obtaining any insurance figures.

Yours, very truly,

(Signed) DRESEL, RAUSCHENBERG & Co.,
Agents Holland-American Line, Baltimore, Md.

EXHIBIT 4.

[Telegram.]

BOSTON, MASS., *December 30, 1914.*

WILLIAM G. MCADOO,
Secretary of Treasury, Washington, D. C.:

We have been unable to make shipments wool from Buenos Aires to Boston or New York since December 15. Very little chance securing freight room for next 30 days account scarcity vessels. Have over $600,000 worth waiting shipment already paid for. Freight rates when available about 150 per cent increase over last year. Have difficulty getting marine insurance on sailing vessels at reasonable rates. Have placed $250,000 on American bark *Pilgrim*, 90 cents net. This is

a fair rate, but can not place more under $1.75 up to $2.25, which is extortionate. Of course, foreign companies not keen to assist movement American bottoms.

BROWN & ADAMS.

EXHIBIT 4A.

[Brown & Adams, wool commission merchants.]

BOSTON, MASS., *December 30, 1914.*

Hon. WILLIAM G. MCADOO,
Secretary of the Treasury, Washington, D. C.

DEAR SIR: We wired you to-day as per confirmation inclosed, for the situation regarding shipments from Buenos Aires to New York or Boston is a most difficult one. Space by steamer is practically unobtainable at present. There is one Norwegian steamer, the *Sark*, which is expected to sail from Buenos Aires for New York or Boston about the middle of January. Our Buenos Aires representative cables us that he will be unable to ship anything during January except the small quantity, space for which he has reserved on this vessel, and whereas last year we paid freight at the rate of $4.50 per ton on steamers from Buenos Aires to Boston, the rate we shall have to pay per steamship *Sark* is $12 per ton. We chartered the American bark *Pilgrim* and sent her to Buenos Aires, owing to the fact that we thought some trouble of this sort might arise. Her capacity is 3,000 bales of wool—value, say, $750,000. We have been able to place marine insurance on this vessel to the extent of $250,000, at 90 cents net, but for additional amount the best quotations we can secure run from $1.75 to $2.25. As wired you, we have about $600,000 worth of wool paid for, waiting in Buenos Aires for shipment, and apparently very small chance of shipping within a reasonable time by steamer. When it comes to shipping under the American flag, we have to ship by sailing vessel, and the insurance companies charge a premium which is all out of reason.

Submitting the above situation to your consideration, we are,

Yours, truly,

BROWN & ADAMS.

EXHIBIT 5.

[Gano, Moore & Co. (Inc.), coal, coke, iron, steel, ores.]

PHILADELPHIA, PA., *December 28, 1914.*

SECRETARY OF THE TREASURY DEPARTMENT,
Washington, D. C.

DEAR SIR: We note in the newspapers considerable comment on the shortage of vessels to make shipments by American firms, and if there is any information that we can furnish you regarding this we shall be glad to do so.

The shortage of vessels is so serious now that it is practically stopping the exportation of coal. We have several orders for coal, principally to South American ports, and it is impossible to secure vessels, and coal firms who specialize in the exportation of coal have found it impossible to secure vessels of any description in which to make their shipments. Coal being an article which is always exported in large quantities, in full cargo shipments, the present situation is a very serious one for the coal firms, and if there is any assistance that you can give us, it will certainly be appreciated, not only by us, but by all exporters of coal.

Yours, very truly,

GANO, MOORE & CO. (INC.).

EXHIBIT 6.

[Strohmeyer & Arpe Co., importers and commission merchants.]

NEW YORK, *December 26, 1914.*

Hon. SECRETARY OF THE TREASURY,
Washington, D. C.

SIR: According to the article published in to-day's Journal of Commerce, you are calling upon the shippers for statements where freight charges are so high that American foreign trade is handicapped.

Just to show one instance, we respectfully beg to refer to the inclosed statement. A short time ago we shipped some powdered cocoa to our friends in Denmark. When again, a short time thereafter, we had occasion to ship the same commodity, the freight charges amounted to about 280 per cent higher, and upon remonstration with the steamship company we were told that this was the lowest rate that could be figured, and since then the steamship company has notified us that the next shipment will be charged a higher rate of freight. This naturally handicaps the export trade very seriously. It seems to us that this advance is absolutely out of proportion and out of all reason.

We merely write this, complying with your request to be furnished with such statements of overcharge in freight.

We beg to remain,

Most respectfully, yours,

STROHMEYER & ARPE CO.,
G. ROGERS, *Secretary.*

EXHIBIT 7.

[Inman, Akers & Inman.]

ATLANTA, GA., *December 28, 1914.*

Hon. WILLIAM G. MCADOO,
Secretary of the Treasury, Washington, D. C.

SIR: We notice through the papers request for information on the subject of foreign freights, and whereas you have doubtless received information from others confirmatory of this, we think it wise to add our mite to the general fund.

We are paying ocean freight from Savannah to Rotterdam and to Bremen of $2, $2.25, to $3 per hundredweight. Formerly the rates to these places were about 35 cents per hundredweight on cotton.

Coastwise steamers of the Mallory Line and Ocean Steamship Line are being offered for foreign freight service, induced by the extremely high rates prevailing.

Yours, truly,

INMAN, AKERS & INMAN,
By J. T. AKERS.

EXHIBIT 8.

[W. B. Cooper & Co., cotton merchants, owners Cooper Compress and Warehouse Co.]

WILMINGTON, N. C., *December 31, 1914.*

Hon. W. G. MCADOO,
Secretary of the Treasury, Washington, D. C.

MY DEAR SIR: Please allow us to indorse the action of the administration in trying to secure boats for the movement of American products. We are frank to say that as a general proposition we are not anxious to see the United States Government get into too many lines of business, but when 3 cents per pound, or more, is to be paid freight on cotton across the water against 35 cents per 100 pounds six months ago, it is time something should be done in our opinion.

Yours, very truly,

W. B. COOPER & CO.

EXHIBIT 9.

[Lesser-Goldman Cotton Co., cotton buyers.]

ST. LOUIS, MO., *December 30, 1914.*

Hon. WM. G. MCADOO,
Secretary of the Treasury, Washington, D. C.

DEAR SIR: From a newspaper clipping we note that facts are desired in regard to high ocean rates and scarcity of vessels to transport cotton and other products abroad.

The undersigned, the Lesser-Goldman Cotton Co., having been in the business of buying and exporting cotton for the last 40 years, are well able to express an opinion on this question, and we beg to submit the following:

Owing to the war, a great many steamers have been withdrawn from the carrying trade between North America and Great Britain and other ports in Europe, and freights for cotton have advanced steadily ever since the cotton season opened and have reached a point now where they compare very unfavorably with rates paid in former seasons.

We are giving you herewith a statement showing freights to various European ports from New Orleans and other Gulf ports, viz:

Freight on cotton per 100 pounds gross.

	September, October, November, 1914.	Present rates.	1913	1912
	Cents.		*Cents.*	*Cents.*
To Bremen, Germany			37	49
Liverpool-Manchester	57	$1.00	32	45
Havre, France		1.25	55	66
Genoa, Italy	86	1.25	46	56
Gottenborg, Sweden	90	2.00	80	80

In other words, for a bale of cotton weighing approximately 500 pounds the freight to Liverpool, at the present rate, would be $5 as against about $2.25 two years ago, and for freight to Gothenburg the present rate per bale is $10 per bale as against $4 per bale during the last two seasons. The rates mentioned above for the previous two seasons are average rates, as freight rates fluctuate like all other commodities and are subject to changes from day to day. However, the figures given above show the difference between freights paid on cotton exported to Europe in former years, when conditions of trade were normal, compared to present times.

As the quantity of cotton exported from the South runs into the millions of bales, the difference in freights on the volume of cotton exported is quite considerable and affects the price paid to the producer in the South to the amount of many millions of dollars.

In mentioning the freight rates from Gulf ports we will say that these rates are regulated by freight conditions in other ports from which exports of cotton are possible, and what we say about Gulf ports refers in equal manner to the Atlantic ports.

We trust that these data may be useful for whatever purpose this inquiry has been instituted, and the Lesser-Goldman Cotton Co. will be pleased to furnish any further information that might be desired by your department.

In addition, we will say that freight rates during 1912 and 1913 were comparatively high as against rates during prior seasons—in fact, previous to 1912 freight rates on cotton were as low as 30 cents and below per hundred pounds to Liverpool, and to other ports in proportion. Therefore, if comparisons are made of present conditions with those obtaining for a number of years prior to 1912, the losses which the producers suffer through the high freight rates amount to still greater sums than if we take only the last few seasons into consideration.

We take the liberty of inclosing herewith a copy of our letter addressed to the Hon. William J. Bryan, Secretary of State, touching upon the matter of delay in cables, as this matter also affects the export of cotton and therefore works to the disadvantage of the producers in this country. You will see from the contents of that letter that cables exchanged by us with neutral countries are subject to serious irregularities, and a great number of them are not delivered at all, probably owing to the action of the censors in foreign countries.

Yours, very truly,

LESSER-GOLDMAN COTTON CO.,
Per J. D. GOLDMAN, *President.*

[T. F. Jenings, hardwood manufacturer, "Switch Bud" brand, toughest on the market, second growth white hickory, oak, and ash, dimension stock a specialty.]

MARIANNA, FLA., *December 28, 1914.*

Secretary MCADOO, *Washington, D. C.*

DEAR SIR: Having noticed in a newspaper that data is requested of parties who are interested in the great advancement in rates on material exported to a neutral country, can give you the following information:

I am exporting hickory lumber in bundles to Christiania, Norway, and freight rates have become so exorbitant that it is almost out of the question to ship—for instance, a shipment I made on October 15 via Scandanavian from New York was 37s. per ton of 2,240 pounds, 5 per cent primage.

Inclosed please find two letters from the agents of this line which speak for themselves. The regular rate on this material before the war was around 30s., the rate on October 15 was 37s., their letter of November 24 runs it up to 75s. Within three weeks they again run this up as per their letter of December 14 to 100s.

Now I am compelled under the circumstances to shut down my business if this can not be rectified. Business is bad anyhow, but just such exorbitant charges as these are what is putting a stop to lots of business in this country.

I realize that steamers flying the American flag may be hard to get, but it seems to me that some arrangement should be made to protect such business as I am doing that is a benefit to this country and supplying labor with help during these difficult times.

I trust that you will be able to take such measures as will be necessary to alter these conditions, which appear to me to be caused by the steamship companies overstepping their rights.

Kindly give me what information you can, and when you are through with them, return the two letters I inclose.

If there is any other information you want that I can give, will be glad to do so.

Yours, truly,

T. F. JENINGS.

EXHIBIT 10A.

[Funch, Edye & Co., steamship agents and ship brokers, Maritime Building, 8–10 Bridge Street.]

NEW YORK, *November 24, 1914.*

Mr. T. F. JENINGS,
Marianna, Fla.

DEAR SIR: Your favor of the 19th instant duly received, and wish to advise that freight room has become very scarce and steamers hard to obtain. Our rate has been advanced on hickory lumber to 75/— and 5 per cent per 2,240 pounds, and we would be pleased to accommodate your shipment in the steamship *Hellig Olav* December 9. We will probably have a sailing between December 9 and January 2, but can not definitely state at present.

Kindly advise whether we should book your one car, and awaiting your further favors, we are,

Yours very truly,

FUNCH, EDYE & CO.,
Per J. M. SALZMANN.

EXHIBIT 10B.

[Funch, Edye & Co., steamship agents and ship brokers, Maritime Building, 8–10 Bridge Street.]

NEW YORK, *December 14, 1914.*

Mr. T. F. JENINGS,
Marianna, Fla.

DEAR SIR: Your favor of the 8th instant received, and in reply wish to inform you the present rate on hickory lumber from New York to Christiania, Norway, is 100 and 5 per cent per 2,240 pounds.

We have no room to offer prior to the steamship *United States*, March 11.

Yours, very truly,

FUNCH, EDYE & CO.,
Per W. A. SALZMANN.

EXHIBIT 11.

[The Long-Bell Lumber Co.]

KANSAS CITY, MO., *December 29, 1914.*

Mr. WILLIAM G. MCADOO,
Secretary of the Treasury, Washington, D. C.

HONORABLE SIR: In keeping with request made in the attached clipping from the Kansas City Times, I inclose you herewith a statement of our export orders now on file, showing name of customer where possible, stock, time of shipment, and port of sale. All of the stock is ready for loading, and in most cases the customer has needed the stock at the time it was purchased, but owing to their inability to secure tonnage the material is still at port deteriorating.

Just before the declaration of war we were able to charter vessels that would make a net rate equal to $7 per 1,000 feet to practically all of the European ports.

Also, for your information, I inclose a quotation from ship brokers issued under date of December 26, showing rates have advanced more than 300 per cent. For instance, the rate to Rotterdam before the war was 60 shillings per St. Petersburg standard; it is now 300 shillings. And it is almost impossible to get a small or parcel shipment of lumber to any port at any reasonable price. The prices now being demanded by the steamship companies are, in many cases, more than double anything I have ever heard of their making in the past, and I think the records will show that their present rates have never been equaled in the past half century at lease.

We have been advised by our representatives in England, Holland, Italy, and Germany that large volumes of orders for our lumber could be had at acceptable prices if we would quote c. i. f., but owing to the present condition of transportation facilities we are unable to make c. i. f. prices, and people who are buying from us f. a. s. our ports are unable to secure the lumber.

We now have in pile at port a little over 9,000,000 feet of lumber, or an approximate value of $280,000, all of which is deteriorating, and could be disposed of if shipping facilities would permit.

There are many others in the same condition as ourselves, and we sincerely hope you can do something to relieve the situation.

We also attach hereto a clipping from our representative in England, which will indicate to some extent the enormous profit being made by the British shipowners.

Yours, respectfully,

M. B. NELSON,
General Sales Manager.

Care of Mr. Ludwig Haymann, Hamburg, Germany; Mr. L. L. Chipman, Liverpool, England.

[From the Liverpool Observer, Sunday, December 13, 1914.]

THE BOOM IN SHIPPING—RECORD PROFITS—HUGE SUMS MADE BY SHIPOWNERS—NOT EQUALED IN ANY PREVIOUS WAR.

[From a special correspondent.]

The British shipowning industry is to-day prospering as it has never done before. In every direction rates of freight have reached a level dreamed of only by the most sanguine.

At the outbreak of the war the outlook was not propitious. A strike of engineers—speedily settled in order to cause no embarrassment to the authorities—had resulted in a large number of steamers being hung up in our ports without employment. The attitude of Turkey over the closing of the Dardanelles rendered further trading in the Black Sea impossible, in addition to which Russia prohibited the export of grain. This market alone normally gives employment to a sixth of the vessels owned in Great Britain. There was thus a large quantity of shipping available for the transport of grain from the west, to which direction the belligerents turned for the supply of grain and other commodities. Canada and the United States were rejoicing in a bumper crop of wheat, and it was soon seen that they would have sufficient to supply all the wants of the allies

A large number of vessels were therefore sent across to America seeking for freights. Rates at first rose, mainly on account of the high war-risk insurance under the Government scheme. But the rush of steamers all into the same market, as might have been foreseen, gave rise to a congestion of shipping which resulted in an absolute slump. Rates of freight fell to as low as 2s. 6d. per quarter for the conveyance of wheat from North America to the United Kingdom or France. This could have been anything but a paying proposition to a shipowner whose insurance for war risk was so high under the Government scheme (which was then in its embryonic stage) and whose bunkers and stores were much enhanced in price.

The export of coal from this country had also been brought practically to a standstill owing to the "triple bond" which was established. This meant that the shipper had to deposit three times the value of each coal cargo exported as a bond that such cargo would not be sent to any other than the declared destination. There were other stringent regulations which bore even more hardly upon him, and great efforts were made to have all these disabilities removed.

THE RECOVERY.

The bond was finally withdrawn, and a demand sprang up for vessels to carry coals to the Mediterranean. This may be said to have been the point at which a general, though gradual, rise in freights had its inception.

Italy now came upon the scene with huge orders for coals for the Italian State railways. Her mobilization, though partial, was on a large scale, and large stocks of coal were essential. The outbreak of war almost seems to have caught her napping, for her supplies of coal and grain were very low indeed. She at once set about remedying the deficiency, and the resultant demand for steamers set up a competition with America. Rates of freight rose in September and October from 7s. 6d. to 11s. 6d. per ton, and many steamers were found whose owners considered it more profitable to run them out to Italy and home in ballast at this rate rather than run the risk of a loss in the American market.

Up to September and October shipments of grain from the Argentine were practically limited to maize, the wheat having been nearly all previously shipped. There was thus not much competition from this direction.

GERMANY OFF THE SEAS.

America by this time was beginning to feel the effects of the additional avenues of employment which were being opened up, and about the end of October a distinct scarcity of steamers was beginning to be manifest. It must not be overlooked that the German mercantile navy was nonexistent. In normal times their liners and "tramp" steamers did a large trade with America, which now reverted to British vessels. In addition, the British Admiralty were largely employing colliers and transports, so much so that at the present time they have over 1,500 vessels under charter, at a cost to the country of something like £2,500,000 per month.

The feature of the boom which has set in is the demand for grain and coal for Italy. To this may be directly traced the rise in freights which has reached such proportions to-day. It is difficult to say what it portends. While hundreds of thousands of quarters of wheat and oats have been bought and shipped for the use of the allies, the insistent demand for steamers to convey these commodities to Italy has resulted in the forcing up of rates of freight from the 2s. 6d. per quarter which has already been mentioned to 7s. 6d. per quarter for France and 6s. 6d. per quarter to the United Kingdom. For Italy the rates have risen from 3s. per quarter in October to 8s. 6d. to-day.

HUGE PROFITS.

The significance of these figures to the British shipowner may be grasped when it is pointed out that a steamer with a capacity of 6,000 tons before the rise made a gross freight of nearly £4,000, while now she would earn over £11,000. To Italy she would make a gross amount of nearly £13,000. Before the rise she would be barely paying her expenses, but with rates at their present level a 6,000 tonner is making a profit for her owner of £7,000 to £8,000 on every trans-Atlantic voyage. Such a steamer can make about five such voyages a year, so that at the present rates the owner will be making from £35,000 to £40,000 per annum. And the end of the boom is not yet. There is bound to be a huge demand for steamers to carry cotton. It is stated that America is this year in possession of the largest cotton crop she has ever grown, and already vessels are being chartered at rates which greatly exceed any previous records.

From Argentina the principal grain export consists of maize between May and November. Consequently, as Europe depends upon wheat for sustenance, the commencement of the war did not see a great amount of chartering from South America.

THE WHEAT SHIPMENTS.

The shipment of wheat commences from the end of December, however, and already many vessels have been chartered, the rates of freight for steamers which will be ready to load in January and early February rising within the last month or two from 20s. per ton to 37s. 6d. It is generally reckoned that a steamer carrying about 5,000 tons of cargo can pay expenses if her outward freight from this country and home from South America together amount to about 25s. The freight out from Cardiff to-day is about 16s., so that the gross freight of such a steamer would amount to 53s. 6d. Thus, on a round voyage, about 28s. 6d., or nearly £7,200, will be net profit. A steamer of this type could make about four voyages per annum, so that, running in this trade, the owner would net something like £28,000 to £29,000 a year.

The beginning of the season has not seen a large number of steamers chartered to Italy, but it is now stated that, in addition to the enormous quantities which are being imported from North America, the Italian Government has purchased some 400,000 tons of wheat and oats from the Argentine Republic for shipment from the River Plate.

STILL HIGHER FREIGHTS COMING.

This will require something like 80 steamers to transport and is bound to result in still higher freights for the shipowners. The demand for steamers to fill these additional requirements will draw vessels away from North America, which will cause freights from that direction also to rise. Further vessels will be required to carry coals to the Mediterranean, and the competition of these other markets will doubtless result in coal shippers having to pay still larger rates of freight to attract steamers in their direction.

Another remarkable aspect of the present boom has been the demand on the part of Italy for coal. She has not been content to import this commodity from this country alone, but has drawn largely upon North America. She has had to compete with the enormous freights which are being paid for grain; 8s. 6d. per quarter for grain is equivalent to about 39s. per ton. The rates paid for the shipment of coal from North America to Italy have risen from 13s. in September to the equivalent of 40s. per ton at the present time.

400 PER CENT RISE.

The most recent instance was the case of a steamer which has been chartered at 20s. per ton on the steamer's dead-weight carrying capacity for the trip across. This is known as "time charter" and is equivalent to the hiring of a cab by the hour. The charterers pay the entire expense of running the steamer and run all the risk of any delay which may arise in her loading and discharging. The normal rate for the chartering of a steamer for such a trip on this basis is 5s. per ton dead-weight—a clear rise of 400 per cent.

Coal rates from Cardiff to the Mediterranean have risen from about 7s. 6d. to 16s. 3d. per ton freight. An owner can pay the expenses of his steamer in this direction when he makes 8s. per ton. He can thus afford to run his steamer out with cargo and back in ballast, and at 16s. 3d. he will make about 8s. per ton profit. The round voyage occupies about a month. Thus, the owner of a 6,000-tonner running in this trade can make something like £34,000 per annum profit.

SHIPBUILDERS BUSY, TOO.

In every direction it will be seen that huge profits are to be made in the shipping industry. Nor are shipowners the only ones to feel the boom. The prosperity has created a demand for more ships. The price of steamers is rising daily, and shipbuilders are booking so many orders that their yards will be full for some years to come. Many shipowners also are selling off their old tonnage at prices which they never dreamed of before the outbreak of war.

Investigation goes to show that the present boom has been of a much greater nature than during other wars. After the Franco-Prussian war, for instance, the boom did not set in until some 12 months after the declaration of peace. By this time the nations had time to turn round, and finance was readjusted. And then the rise in freights was more gradual. It was not until 1882 that the top of the rise appeared.

It is interesting to note that the only rate approximating to present figures was paid to the Ben Nevis, a steamer with a carrying capacity of 7,500 quarters, or about 1,500 tons, which obtained 8s. 3d. per quarter from New Orleans to Rouen. So much have "tramp" steamers increased in size that anything nowadays with a capacity of under 25,000 quarters, or about 5,000 tons, is considered a small steamer, and a 1,500-tonner is thought to be far too small to cross the Atlantic.

EXHIBIT 11C.

[George Gerdes & Co., foreign freight brokers and forwarding agents.]

NEW ORLEANS, LA., *December 26, 1914.*

Since our circular last week our freight market remains practically unchanged. For some ports the scarcity of tonnage continues, and at the present time, January, room for nearly all ports have been filled.

All rates subject to confirmation before booking.

Rates quoted in cents per hundred pounds, shillings per standard, and dollars per thousand superficial feet.

Liverpool: Harrison and Leyland lines are not quoting at present. Elder Dempster for February are quoting 55 cents, on hardwood lumber.

Glasgow: Maclay Prentice Line, January-February, quote hardwoods, 50 cents; softwoods, 53 cents; cottonwood, 57 cents; pine, $20.

Dublin: Head Line, February-March, hardwood, 51 cents; medium woods, 54 cents; cottonwood, 58 cents; pine, $21.50.

Havre: February, French Line, freight prepaid, hardwoods, 70 cents; cottonwood and tupelo, 75 cents; pine, 19 cents.

Rotterdam: February-March, agents' option Holland-American Line prepaid, hardwoods, 95 cents; cottonwood and tupelo, 100 cents; pine, 300s.

Amsterdam: February-March, agents' option Holland-Amsterdam Line prepaid, hardwoods, 97 cents; cottonwood and tupelo, 102 cents; pine, 315s.

Genoa: Creole Line, February, hardwoods, 82 cents; cottonwood and tupelo, 87 cents; pine, 225s.

Christiana, Gothenburg: February, hardwood, 90 cents; softwoods, 95 cents; prepaid.

Yours, truly,

GEO. GERDES & CO.

Belfast: Head Line, February-March, agents' option hardwoods, 50 cents; medium woods, 53 cents; cottonwood, 57 cents; pine, $20.

EXHIBIT 12.

[Alphonse Weil & Bros.]

NEW YORK, *December 26, 1914.*

Hon. WILLIAM G. MCADOO,
Secretary of Treasury, Washington, D. C.

SIR: We notice in this morning's New York Times that you would like to be informed with regard to advances in ocean-freight charges. We intended to ship a large quantity of oats to the other side, but were prevented from doing so on account of the rate of freight advancing from 4s. per bushel to 6s. 6d. We are told that the reason of this advance is due to the fact that there are very few vessels available at the present time.

Yours, respectfully,

ALPHONSE WEIL & BROS.

EXHIBIT 13.

[Pittsburgh Provision & Packing Co., beef and pork packers, Union Stock Yards.]

PITTSBURGH, PA., *December 30, 1914.*

HON. WILLIAM G. MCADOO,
Secretary of the Treasury, Washington, D. C.

DEAR SIR: We are advised that a statement has been issued by you calling upon all shippers who have been affected by high ocean rates and scarcity of vessels to send facts to the Treasury or Commerce Departments.

We are exporters of provisions, etc., to Mamburg, Germany; Rotterdam, Holland; London and Liverpool, England. Early in 1914 we signed contracts covering rates on export freight to London and Liverpool, via Atlantic Transport Line and White Star Line from New York, with J. D. Roth, general western freight agent of the above named lines, in which we were named ocean rate of 20 shillings—5 per cent per gross ton. These rates have been raised 10 shillings per gross ton since the beginning of the war, they claiming that their steamers are operating under greatly increased expenses, such as coaling for the round trip and the high premiums asked in the matter of war insurance, etc., also claiming that a great number of their steamers have been requisitioned by the British Government. It is also necessary for us to obtain confirmation of space on a given steamer should we desire to ship for a special sailing. At present, it is almost impossible to obtain booking for London and Liverpool, the steamship company claiming that they are booked ahead.

On December 20 we endeavored to reserve space via the Holland-American Line for shipment of 75 tcs. oleo oil to Rotterdam, Holland, and received advice on the 26th inst. that there was no available room on Holland-American Line steamer clearing from New York on January 7, and that they were booked up to the latter part of January.

Several of our shipments via the Holland-American Line, consigned to Daniel Loeb, Rotterdam, Holland, have been held up by the British Government for a period, which has resulted in considerable delay in the goods reaching destination, although they were consigned to a neutral country.

As our goods are sold on an f. o. b. Pittsburgh basis we are not affected to any great extent by the increase in ocean rates, but are seriously handicapped by our inability to secure booking and by the requirements of the British and French Governments in reference to consignments to private individuals in Holland, a neutral country.

Yours, very truly,

PITTSBURGH PROVISION & PACKING CO.

EXHIBIT 14.

[The Fenton Art Glass Co., manufacturers and decorators of tableware and novelties.]

WILLIAMSTOWN, W. VA., *December 28, 1914.*

The Hon. WM. G. MCADOO,
Secretary of Treasury, Washington, D. C.

SIR: We are just advised by one of our large customers in England that in trying to fix up a contract for ocean freight rate from Philadelphia to England for the year 1915, that he has received a cable from Philadelphia quoting him a rate that is 60 per cent higher than the contract he had for 1914.

We sell this customer from $25,000 to $40,000 worth of goods per year of a cheap line of ware that sells in England in the same class of stores as our American 10-cent stores are, so that if the rates are advanced to this extent it will practically take our ware out of that market.

Will you kindly do whatever you can to keep the rates down and within reason, and if there is any information we can give you along this line, we should be glad to have you call upon us.

Yours, very truly,

THE FENTON ART GLASS CO.
F. L. FENTON,
President and Treasurer.

EXHIBIT 15.

[Chattanooga Wheelbarrow Co.]

CHATTANOOGA, TENN., *December 26, 1914.*

W. G. MCADOO,
Treasurer, Washington, D. C.

DEAR SIR: We see by press notice that you wish information from shippers who have been handicapped on account of high ocean rates and scarcity of vessels. This has affected us very considerably in getting shipments to England.

On November 17 we made carload shipment to Savannah for forwarding to Liverpool by the Strachan Line. Our customers, we understand, contracted on this for a 7½ cents per cubic foot rate. The boat on which space had been engaged was diverted from Liverpool to London and shipment was held until December 9 and our customers were forced to pay rate of 10 cents before they would agree to handle same at that time.

We expect to have a regular monthly movement to Liverpool to this particular customer. We have been endeavoring for about a month to get a shipment through some of the Atlantic or Gulf ports for shipment to Bristol or Liverpool. Customer originally had arrangements made to ship through Savannah by the Strachan Line on a 10 cents per cubic foot rate, but this was canceled. We then took the matter up and were quoted rate of 60 cents per 100 pounds by steamer *Adelina*, Spanish flag, from Pensacola, this 60 cents including transshipment from Liverpool to Bristol.

This data was given to our customers, but when it came to signing for space they refused to honor the rate quoted. We are still holding this carload trying to get booking through some of the various steamship companies, and in this connection would state we have three more cars which we want to get out early in the year, provided we can get them handled from port. The Head Line Steamship Co. from New Orleans are quoting February sailing of $1.25 per 100 pounds for Bristol. It is almost imperative for us to forward these through some of the southern ports owing to the fact that we are at such a disadvantage on inland rates to New York.

If you can give us any assistance or furnish us with any data as to the best manner in which to handle this with the various steamship lines operating out of Atlantic or Gulf ports, we will appreciate it very much indeed.

Yours, very truly,

CHATTANOOGA WHEELBARROW CO.,
By H. W. LONGGLEY, *Secretary.*

EXHIBIT 16.

[American Vulcanized Fibre Co.]

WILMINGTON, DEL., *December 28, 1914.*

Hon. W. G. MCADOO,
Secretary of the Treasury, Washington, D. C.

DEAR SIR: We have seen from newspaper reports that a statement was issued calling upon all shippers who have been affected by high ocean freight rates and scarcity of vessels to communicate such information to the Treasury.

We are now taking the liberty to inform you that we have been experiencing considerable trouble in obtaining space on steamers going to Scandinavian countries. For example, we have been informed by the Scandinavian-American Line that no space can be had on any of their steamers until the middle of March and April. Shipments via other lines are also very scarce, and no space can be had for a considerable time. The freight rates are also very high, and have been raised from 40 shillings to 65 and 70 shillings for shipments to Copenhagen.

While we are not experiencing any particular trouble with reference to shipping to England, we wish to state, however, that we have been informed a few days ago that the freight rate for vulcanized fiber from Philadelphia to London has been raised from 15 shillings to 30 shillings per ton. This is a raise of 100 per cent and, in our opinion, is not entirely justified. It seems to us that the shipping interests are taking advantage of the present disturbed times, which naturally will tend to hurt the American foreign trade.

If the Treasury Department could enlighten us in some of these points, we would indeed greatly appreciate it. We furthermore would be very thankful to the Treasury Department for any help which it may be able to give in connection with the adjustment of freight rates and shipping facilities.

All the aforesaid points make it very difficult indeed to keep up the established business relations with customers in neutral countries, and any action which would further the facilities of conditions necessary for the keeping up of the good relations between neutral customers and American manufacturers would be heartily indorsed by us.

If you have any information on the foregoing subject, we would indeed be glad to hear from you.

Very truly, yours,

AMERICAN VULCANIZED FIBRE CO.,
T. W. CAMPBELL, *Vice President.*

EXHIBIT 17.

[A. Gross & Co. (Inc.), stearic acid, candles, red oil, and glycerin.]

NEW YORK, *December 26, 1914.*

Hon. WILLIAM G. MCADOO,
Secretary of Treasury, Washington, D. C.

HONORABLE AND DEAR SIR: Permit us, please, to lay before you our complaint against the scarcity of ships and the exorbitant rate of freight now being charged on shipments of our commodities to the various foreign ports, which seriously handicaps our business.

We therefore feel that something should be done by our Government to relieve the present situation, since it so seriously interferes with our foreign business.

Trusting that you may be able to take prompt steps to remedy this condition, we beg to remain,

Very truly, yours,

A. GROSS & CO.,
J. A. BURNS, *Secretary.*

EXHIBIT 18.

[Fee-Crayton Hardwood Lumber Co., makers and exporters of quartered and plain oak, hickory, ash, and walnut.]

DERMOTT, ARK., *December 28, 1914.*

The SECRETARY OF THE TREASURY,
Washington, D. C.

DEAR SIR: Inasmuch as we have been seriously affected and our business very much handicapped by the high ocean rates on our shipments of harwood lumber, we are glad of an opportunity of coming to our big and benevolent policeman who is our Secretary of the Treasury.

We have had a good business with all these belligerent nations outside of Russia, and our trade has extended over a period of a quarter of a century, and we can say that it is now a serious menace to our business by reason of our inability to get reasonable and, in some cases our inability to get any, ocean rates on our production of hardwood lumber. We usually ship through the port of New Orleans to British and continental ports. The writer has been to New Orleans personally and is informed by the steamship agents that they are receiving a tonnage of cotton and wheat and other commodities for the belligerents at such high rates and at such easier loading and unloading that they make tremendous profits for their vessels, and they do not want to take lumber tonnage. We can say that we have before us inquiries for many carloads of lumber which could be shipped immediately provided reasonable rates could be had.

We had contracts last year for tonnage to Liverpool, London, Glasgow, Belfast, etc., ranging from 22 to 30 cents per hundred weight, and now on some of these ports the rates are from 50 to 50 cents and lumber values make these rates absolutely impossible. Steamship agents tell me that their bottoms are filled with grain, cotton, etc., for months to come. We are told that cotton brings $2 per hundred weight to Rotterdam, whereas rates last year were a maximum of 46 cents per hundredweight. Further, one of the steamship agent's commission for a single month was $25,000 for the month.

We trust that there is some way in which our National Government can arrange whereby lumber traffic can be resumed at something like a reasonable rate. We will be glad to receive information that will point out anything that we can do that will have a tendency to help us out.

Yours, very truly,

FEE-CRAYTON HARDWOOD LUMBER CO.,
FRANK F. FEE, *President.*

EXHIBIT 19.

[National Lumber Exporters Association.]

BALTIMORE, MD., *December 30, 1914.*

The SECRETARY OF THE TREASURY,
Washington, D. C.

DEAR SIR: I notice from press reports that you, in connection with the Department of Commerce, are investigating the matter of ocean freight rates, and I take the liberty of calling your attention to the enormous, and what appear to be unreasonable, increases in ocean rates on lumber and other forest products which have been made by the steamship companies since the outbreak of war. For your information I give you below rates from various United States ports to foreign ports that were in effect prior to the war and rates that are now being asked:

FROM NEW ORLEANS.

	July, 1914.	December, 1914.
	Cents.	*Cents.*
Amsterdam	25	97
Belfast	28	50
Christiania	33	90
Dublin	29	46
Genoa	30	82
Glasgow	29	50
Gottenborg	33	90
Havre	27	65
Liverpool	25	55
London	26	65
Rotterdam	23	95

FROM NEW YORK.

Aberdeen	22½	31
Glasgow	17	28
Havre	21	40
Hull	17	28
Liverpool	13	25
London	17½	27½

FROM BALTIMORE.

Belfast	22	35
Dublin	23	36
Glasgow	20	30
Liverpool	16	28
London	21½	30½

To many of the ports steamship lines refuse to quote rates at all, as they claim that more tonnage is being offered than they can take care of.

You will note from the above that the advance in rates from New Orleans is much more pronounced than from North Atlantic ports and, as a matter of fact, the New Orleans rates being asked are practically prohibitory.

If there is any further information you would like to have on this subject, I should be pleased, if possible, to give it to you.

Yours, very truly,

J. MCD. PRICE, *Secretary.*

EXHIBIT 20.

[Empire Cotton Oil Co.]

ATLANTA, GA., *December 28, 1914.*

Mr. W. G. MCADOO, *Secretary of Treasury,*
Washington, D. C.

DEAR SIR: Agreeable to Governmental request, beg to advise that this company is experiencing considerable trouble in booking shipments of cottonseed meal, cake, and linters to foreign ports. In fact, we have been endeavoring since the 19th instant to find space for cottonseed meal and cake of approximately 3,000 tons to Liverpool and London, and the very best offer received up to the 24th instant was $8.50 per ton from Savannah to Liverpool, January-February sailing, and not exceeding 1,000 tons at that. However, in endeavoring to book this

lot to-day, the Strachan Shipping Co., agents, Savannah, have just wired as follows:

"Regret can not confirm thousand meal Liverpool eight fifty. Freight market advancing on firm offer to-day nine dollars. Feel sure can place January-February shipment."

To which the following is our reply:

"Your wire date. Best we can stand is eight fifty. Will book one thousand tons at that. Advise."

Further, it appears that the Strachan Shipping Co. are the only ones that have any space at all in sight for January-February for commodities other than cotton, they advising us on the 21st instant they are unable, at the moment, to quote a rate on meal or cake from either Charleston or Jacksonville and have but limited room from Savannah and Brunswick, going on to say that they can not assure us of January room from either of these ports at present. Also that the tonnage market is exceedingly strong and steamers scarce. Therefore, they are experiencing the greatest difficulty in securing boats to cover their actual January commitments, consequently would not care, at the moment, to quote a guaranteed shipment that month.

We are also advised by the Churchill Line, also by the J. H. W. Steele Co., of Savannah, as well as Street Bros., of Charleston, S. C., that they have no space at all, and to the further effect that just now tonnage, especially as regards neutral boats, is scarce and rates high.

In fact, the result of our inquiries along this line principally develops that shipowners have restricted their vessels almost exclusively to cotton by charter or at very high rates, one of my informants placing the charter price at $12 per bale.

The best quotation we have had from Norfolk is $8 per short ton, while the rates quoted us from Savannah, above mentioned, are for ton of 2,240 pounds.

So far we have been unable to secure quotations to London, Rotterdam, or any ports other than Liverpool.

Yours, very truly,

E. P. McBURNEY, *Vice President.*

EXHIBIT 21.

[Phoenix Iron & Steel Co. (Inc.), iron and steel, railway supplies.]

GALVESTON, TEX., *December 26, 1914.*

Secretary McADOO,
Washington, D. C.

DEAR SIR: Referring to your call for information from shippers who have been affected by high ocean freights, beg to advise we are shippers of old rails and scrap iron and steel.

We have in the past paid various rates of freight, from 12s. to 18s. per ton; however, steamship companies now either quote abnormal freights or refuse to quote at all, so it is impossible to ship any material, as the freights in some cases amount to three-fourths of the delivered price of the commodity.

The Texas Transport & Terminal Co. have carried practically all of our material from New Orleans and Galveston to Genoa, Italy. This steamship company has now asked us 45s. per ton for January, February, and March, and the material itself is only worth about 60s. per ton delivered.

The above facts are given for your information, and in case you can suggest some remedy, or possibly would like to see the writer regarding other details of this matter, he would take great pleasure in seeing you in Washington at any time you may state.

Yours, very truly,

PHOENIX IRON & STEEL CO.,
LEONARD JOSEPHS, *President.*

EXHIBIT 22.

[Newburger Cotton Co., producers, buyers, and exporters of cotton.]

MEMPHIS, TENN., *December 7, 1914.*

Hon. WILLIAM G. McADOO,
Secretary of the Treasury, Washington, D. C.

DEAR SIR: The cotton pool, raising money for the farmer to carry his cotton, is a splendid idea and has everyone's indorsement; but the real thing you want to do is to make a market for the farmers' cotton, so as he can sell it if he so desires.

I have on my desk several very important inquiries for cotton for Germany and feel satisfied that at least a million bales of cotton could be sold to Germany and Austria at once if freight room at a reasonable price could be secured and, above all, that the "war risk" would cover the shipments absolutely.

Now, can not you find a way for the Government to furnish us ships and guaranteeing the delivery of the cotton either at Gottenborg, Rotterdam, or Copenhagen? The importance of this move you can realize in a moment when you think that every bale of cotton that is held over and not spun becomes a weight on the market and reduces the chances of an advance later on that much. You can not grind the mill with the water that has passed, and when a spindle stops operating and the cotton is not being used it becomes a dead weight on the market, it matters not how much you advance against it.

Now, what we want is open markets and a chance to ship our cotton. If this can be done the cotton pool will only be used limitedly. The rate from New Orleans to-day to Gottenborg is $1.50 per hundredweight; and to Rotterdam $2 per hundredweight. This is three and four times the regular rate. Suppose a rate of $1 was effected and with a "war risk" of not over 50 cents per bale, this would enable you at once to take a million bales of cotton off of the market. Can't you suggest some outlet for these conditions?

A steamship loaded with 10,000 bales of cotton at $3 per hundredweight, or $15 per bale, realizes, gross, $150,000 for the cargo, when the vessel itself is not worth exceeding $125,000. For such conditions there certainly should be some remedy.

Yours, very truly,

JOS. NEWBURGER.

EXHIBIT 23.

[L. & E. Frenkel, importers of electric specialties.]

NEW YORK, *December 31, 1914.*

SECRETARY OF THE TREASURY McADOO,
Washington, D. C.

HONORABLE SIR: We notice in the papers that you would like to have some information regarding freight rates, and we herewith have much plasure in relating to you some experience we had lately.

We procured orders to ship gas coal to Italy, but on account of the high shipping rates we can not ship same. As you know, America has large, rich, coal mines; nevertheless, American gas coal could not be sold in Europe, owing to the fact that shipping from England is cheaper during time of peace. Through the war, England has raised the price of gas coal, and now Italy and France are asking for American coal, which gives America a good chance to introduce its coal on the European market, but the shipping rates have been raised from 11 shillings to 38 shillings, which is the approximate rate asked to-day; therefore, it is impossible to compete even with the high price of English coal.

The cause of these rates being augmented so is, to our belief, that England is protecting her coal business; therefore instructed shipowners to raise the freight rates.

The only way to compete with these high rates is to allow exporters of coal the privilege of engaging United States colliers at, say, a cost price, by guaranteeing with a certificate that the coal is for a neutral country. We know the United States is spending money to study why American coal can not be sold abroad, and we think this is the only way to help out the exporters and at the same time introduce American gas coal in Europe.

We are willing to engage any steamer at a moment's notice for twice the amount the gas coal is worth in America.

Trusting that something will be done in this matter soon, we are

Very respectfully,

L. & E. FRENKEL,
E. FRENKEL.

EXHIBIT 24.

[Klomatia Planter's Co. (Unincorporated), successors to S. J. Wright.]

KIOMATIA, RED RIVER COUNTY, TEX., *December 27, 1914.*

Hon. WILLIAM McADOO,
Secretary Treasury, Washington, D. C.

DEAR SIR: I notice from the press reports that you expressed a desire to learn something of the excessive ocean freight rates which are now being charged to foreign ports.

I have been requested to act as chairman of a marketing committee of the Northeast Texas District Farmers' Union, to try and market some of our cotton direct from the farmers to European spinners, and we would like to reach Germany and Austria with some cotton. The ordinary rate from Gulf ports to these points is about 50 cents per hundred pounds, but I have been informed that as much as $3 per hundred pounds has been charged on cotton.

We also find it will be difficult to secure a steamer.

I am advised that the United States Government has a number of transports which might be used as cotton carriers, and I am also advised that there are some German ships which could be purchased in some Gulf ports.

Is it possible for you to arrange so that we can secure a ship, and pay only a reasonable freight rate from here to Germany and Austria?

I would like this information as early as possible, as we will have to make arrangements to concentrate this cotton in either Galveston or New Orleans, and our ability to finance it will determine which port we will use.

I wish to state in advance this will be a transaction for and in behalf of the farmers who have been able to hold their cotton and not forced to sacrifice it at beggarly prices, which has been the fate of thousands of farmers in our State.

Awaiting your prompt advices, I am, yours, very respectfully,

R. D. BOWEN.

EXHIBIT 25.

[E. K. Victor & Co., leaf tobacco, strips, stems, and scraps.]

RICHMOND, VA., *December 28, 1914.*

His Excellency WILLIAM GIBBS McADOO,
Secretary of the Treasury, Washington, D. C.

SIR: We have seen in the Times-Dispatch, published in this city, that your excellency is requesting information regarding rates of freight which have been advanced since the European war started, and we take, therefore, the liberty to comply with this request. Our business, which is almost entirely export, has been greatly hampered owing to the advance in rates of freight as well as to the high rates of war insurance. Formerly we used to pay about 20 to 30 cents per 100 on leaf tobacco and tobacco stems ocean freight to Rotterdam; these have now been advanced to $1. We have orders to ship a lot of tobacco stems for Germany via Genoa, and we are asked a rate of freight of $1.50 per 100 from New York to that port, which is more than the value of the goods.

We have not made any shipments to Great Britain since the war started, but have kept our tobacco here. We understand, however, from one of our friends, that the rate of freight to Great Britain now is 1 cent per pound, against about 20 cents per 100 pounds in normal times.

We were charged 5 per cent war insurance from New York to Christiania, Norway. Our correspondent in Norway writes us that he is not willing to pay this, as he can cover the insurance there for 1½ per cent, and he has charged us with the difference; this insurance was covered in the Boston Insurance Co.

We have been trying, through the Richmond Chamber of Commerce, to get a statement from the French Government that they, as well as the British Government, would not interfere with shipments of tobacco nor tobacco stems in neutral vessels to neutral ports. So far we have been unable to obtain any such assurance.

We understand that the British ambassador has given assurance in Washington that his country would not interfere with such shipments of tobacco, but we hear now from our forwarding agent at New York, as well as from one of the steamship lines, with whom we are negotiating for freight, that we have to make out an affidavit that the tobacco or tobacco stems which we are shipping to Italy will not be reexported from there to any other country.

If we should make such an affidavit the Italian consul would know perfectly well that we were making a misstatement and the British consul would know also, as there is a tobacco monopoly in Italy and no tobacco can be shipped there unless it be consigned to the Italian Government or it be wanted for reexportation to some other country.

If it is true that no interference with tobacco or tobacco stems will be made it does not look reasonable that we should be compelled to make such an affidavit before the Italian and British consuls.

We are greatly hampered in our business, not only because the banks here do not seem to be disposed to loan out money in order to move the tobacco crop, but owing to these various restrictions and the almost prohibitive rates of freight, also the inability of selling foreign exchange.

Yours, respectfully,

E. K. VIETOR & CO.

EXHIBIT 26.

[Smokeless Fuel Co., miners and shippers New River and Pocahontas smokeless coal.]

NEW YORK, *December 29, 1914.*

Hon. WILLIAM G. MCADOO,
Secretary of the Treasury, Washington.

SIR: As a matter of consideration at the forthcoming conference in relation to American shipping, it strikes us that, while waiving for the time the inability, insufficiency, and lack of desire of American shipping to cooperate with shippers of American coal to South American ports in competition with Cardiff, particularly—competition being almost solely a matter of transportation—it would be well to note the fact that our west coast is now open to and is already trading with Cardiff shippers under relatively favorable transportation rates, notwithstanding the haul is one and a half times that from Hampton Roads to, say, San Francisco. American shippers (not the United States Government) are prohibited the use of the advantage of competition of foreign-flag ships in the movement from the east to the west coast. It would appear that if American shippers are prohibited from availing themselves of the same character of competition that is enjoyed by the United States Government under similar conditions that some provision should be made for the protection of American shipping interests, that they may enjoy the willing trade of their compatriots, instead of using the canal to open up markets of the United States to Cardiff coal. Since American shippers of coal are willing and do make a decidedly lower price for their product than English competitors on similar grades of coal, it must be clear that the matter of transportation is "a nut to crack."

Respectfully,

J. A. RENAHAN.

EXHIBIT 27.

[The Black Diamond.]

NEW YORK, *December 30, 1914.*

Hon. W. G. MCADOO,
Secretary of the Treasury, Washington, D. C.

DEAR SIR: Noting the investigation being made by your department into the vessel and freight rate situation, the writer believes that you can obtain some very pertinent information on this question from some of the principal coal companies who are now engaged in exporting coal. This business has been almost prostrated by the inability of shippers to secure vessels and upon terms that will permit them to make shipments.

Under separate cover we are mailing you two copies of The Black Diamond of the issues of December 12 and 26.

In these two numbers you will find several marked articles that we believe would be of interest to you, inasmuch as they deal with transportation questions.

Very truly, yours,

THE BLACK DIAMOND,
R. M. BRYAN, *Eastern Manager.*

EXHIBIT 28.

[McEwen Lumber Co., manufacturers and dealers in hardwood and white pine lumber, hardwood flooring.]

AZALEA, N. C., *December 29, 1914.*

Hon. WILLIAM G. MCADOO,
Secretary of the Treasury, Washington, D. C.

DEAR SIR: Referring to item in New York Herald indicating your desire for information concerning the effect of the present ocean rates upon business, would say that for our part the present rates are practically prohibitive, as they have advanced 10 and 15 cents per hundredweight, and in many cases even these rates are not protected, except for immediate acceptance and subject to confirmation by steamship lines, thus making it impossible for shipper to quote delivered prices with any certainty that the rates on which he bases his quotations would be confirmed. Further than this, it is our information that the steamship companies are giving other tonnage carrying higher freight rates preference, and in some instances are limiting their boats to a certain small amount of lumber tonnage. There is certainly a need of more boats and some method of obtaining reasonable and dependable rates which shall be protected long enough at least that we might be able to get quotations by mail to our customer on the other side and his reply.

As illustrative of the present situation, we quote you below from letters received from the Virginia Line, operating from Norfolk and Newport News, upon whom we are dependent for the larger amount of our export business:

"We further beg to advise that we will only be able to make contracts for a specific number of cars for shipment by one steamer. In other words, we will not be able to make contracts for a maximum and minimum number of cars for shipment over a period of time.

"You must not feel that this is an arbitrary position which we are taking, as such is not the case, and it is due entirely to circumstances over which we have no control. So many of our steamers have been requisitioned by the admiralty that we have not enough steamers to go around, and if you are at all familiar with the vessel situation you will know that there is an extreme shortage in vessel tonnage due to the fact that the British Admiralty has requisitioned about 25 per cent of the vessels under the British flag, and the further fact that all of the German and Austrian steamers are laid up. If conditions were normal we would have plenty of vessels to take care of all tonnage offering and would be only too glad to place the room at the disposal of our friends, but as our available tonnage has been reduced more than 50 per cent, it is simply a question of doing the best we can and apportioning our room as equitably as possible."

You will see from the above that we have no certain assurance of being able to forward our lumber, and all the charges, storage, trackage, etc., that might accumulate at seaport owing to the steamship lines' failure or inability to take the lumber would be at our expense.

Trusting that this letter may be of service to you, and that some relief may be obtained, we remain,

Yours, very truly,

McEWEN LUMBER CO.,

W. B. MCEWEN, *President.*

EXHIBIT 29.

[McEwen Lumber Co., manufacturers and dealers in hardwood and white-pine lumber, hardwood flooring.]

AZALEA, N. C., *January 8, 1915.*

Mr. A. J. PETERS,
Assistant Secretary of the Treasury, Washington, D. C.

DEAR SIR: Acknowledging yours of the 5th instant and supplementing our letter of the 29th ultimo, we beg to quote below letter dated December 30 from Lunham & Moore, export freight brokers, Produce Exchange, New York City, written to us in response to our application for rates to Copenhagen:

"Your favor of the 28th instant to hand. Lumber rates are not very encouraging, and the best we can quote you to-day is as follows, which apply from New York only to both Copenhagen and Christiania: Oak lumber, 100 shillings and 5 per cent per 2,240 pounds; poplar lumber, 102 shillings 6 pence and 5 per cent per 2,240 pounds.

"All freight to be prepaid. *We quite realize that these rates are entirely too high to enable you to make shipments.* No room until March–April steamship agents' option."

From the above you will note the high rates asked for movement of freight. These rates amount on oak lumber to about $45 per 1,000 feet. On poplar lumber to about $35 per 1,000 feet.

Our last quotation on lumber moving from New York City to Copenhagen and Christiania just prior to the outbreak of the war was 31 cents per 100 pounds, as against the rate named above, which is equivalent to $1.14 per 100 pounds on oak lumber. Poplar in proportion. We mention this for your information, and if there is anything further that you wish to know along this line we will be glad to communicate further with you.

Yours, very truly,

MCEWEN LUMBER CO.

EXHIBIT 30.

[Hooker Electrochemical Co.]

NEW YORK, *December 28, 1914.*

Hon. WM. G. MCADOO,
Secretary of the Treasury, Washington, D. C.

SIR: We notice by the press that the Government desires information in reference to export rates and the difficulties which business is meeting with in regard to foreign trade.

We are manufacturers of caustic soda, with one of the largest electrolytic plants in this country, located at Niagara Falls, N. Y. We have been endeavoring for the past three years to build up an export business on caustic soda. Our main competitors are Brunner Mond & Co., and United Alkali Co., of England. Germany, also, just prior to the war, was exporting caustic soda. There is about 20 per cent overproduction of caustic soda in the United States which is seeking foreign markets. We have been gradually building up trade with Mexico, Cuba, Japan, and South America.

Within the past month we have found a growing impossibility to procure rates which will permit of our moving our product to foreign ports in competition with the English transportation rates. This applies especially to European ports, where rates have increased from 200 to 300 per cent since November 1, and even at these exorbitant rates it is impossible to get room for prompt shipment.

We can not urge too strongly the necessity of procuring proper tonnage to carry commodities seeking a foreign outlet and this tonnage should be available at once in order to benefit the United States manufacturer. If we are to take a position which we have never heretofore occupied in the markets of the world, we should do so immediately and this does not permit of delays necessary to build and construct vessels of considerable size to carry this tonnage.

It seems to us the only solution of the present difficulty would be for this Government to lease or purchase if possible, sufficient tonnage to relieve the present situation, or it might be possible for the Government to use a number of its transports and colliers in handling commercial freight.

We are in position to compete actively with British manufacturers of caustic soda on quality, price, and terms of payment to foreign buyers, but notwithstanding this position on our part and in spite of persistent and intelligent effort, we find our export business seriously limited by this lack of bottoms.

Anything this Government can do to increase the supply of vessels engaged in ocean transportation would be a help to us and to hundreds of other manufacturers in the same position as ourselves.

Respectfully, yours,

JOHN F. BUSH,
Vice President.

EXHIBIT 31.

[Industrial Lumber Co., Calcasieu long-leaf yellow-pine lumber.]

ELIZABETH, LA., *January 5, 1915.*

Mr. WILLIAM G. MCADOO,
Secretary of the Treasury, Washington, D. C.

HONORABLE SIR: We have recently noticed a dispatch in one of the newspapers to the effect that you desire information from shippers as to freight rates and scarcity of vessels for export shipments since the opening of the European war.

We have in the past exported considerable lumber to England, Holland, Germany, and some to France. Since the war, however, we have been unable to make any shipments, primarily because of the uncertainty of securing vessels; also on account of the excessive freight rates.

Formerly the freight rate on this character of shipment was about $8 per 1,000 feet, board measure. The best information we can secure now is that the vessels are asking from $18 to $20 per 1,000 feet, board measure. We have some small parcels of lumber at our port now ready for shipment, but are unable to make a sale, owing to the above-mentioned conditions. Some few cargoes have been forwarded

by other parties, but so far we have been unsuccessful in making sales under existing conditions.

We appreciate your efforts along these lines and sincerely hope that you will be able to bring about some relief to exporters.

Yours, very truly,

INDUSTRIAL LUMBER CO.,
R. M. HALLOWELL,
Vice President and General Manager.

EXHIBIT 32.

[Markt & Hammacher Co., American manufacturers' export agents.]

NEW YORK, *January 5, 1915.*

The honorable SECRETARY OF THE TREASURY,
Washington, D. C.

Freight Charges to European Ports.

DEAR SIR: We notice in the daily press many articles concerning the exorbitant freight rates now charged by steamship companies taking cargo to the European countries, especially the neutral markets.

We further understand that it is the desire of your department to take up this matter in a very serious manner, investigating these conditions, which we personally believe are entirely uncalled for.

We admit and believe that it is necessary under the present trying conditions for the steamship companies to advance their rates over normal rates to a certain extent, say 25 per cent or even 50 per cent over normal rates, but when steamship companies are quoting and charging three times the normal rates, and in some instances even four times the normal rates, we feel that it is absolutely an imposition on the part of the steamship companies to demand such freight rates.

For instance, to cite one case, on ice-cream freezers our freight rates to either Naples or Genoa are 25s. plus 5 per cent per 40 cubic feet, or 2,240 pounds. To-day, upon application to one of the steamship companies for freight reservation on steamer sailing the early part of this month to Genoa, we are quoted on the same commodity a rate of 75s. plus 5 per cent primage per 40 cubic feet, or 2,240 pounds.

We submit the above to you, as we believe you are interested in knowing from actual shippers the rates now quoted and charged by the steamship companies, and hope that you will use your good offices in bringing about a fair ocean freight rate to the various ports of Europe, notably, of course, the neutral ports.

We are very large shippers of American industrial products to the Continent of Europe, and ship annually several thousand tons of goods to Europe. Owing to the war, however, our shipments have been considerably reduced, and we stand ready to give you any further information that you may require from time to time.

Thanking you in advance for ourselves and in behalf of our other friends in a similar line of business for any efforts that you will make, we are,

Yours, respectively,

MARKT & HAMMACHER CO.,
J. TINTSCHGER.

EXHIBIT 33.

[The Tuemler Co. (Inc.), exporters of lumber and timber.]

PENSACOLA, FLA., *Saturday, January 2, 1915.*

Hon. WILLIAM G. MCADOO,
Secretary of the Treasury, Washington, D. C.

SIR: Our attention has been called to a newspaper article wherein it is stated that you have invited shippers for an expression as to the increase in freight rates demanded for ocean traffic, with facts and figures.

We shall confine ourselves to freight rates from the Gulf, and on pitch pine wood goods especially, as we are exporters who deal in principally such lumber.

We have compiled from freight reports a list of steam and sail tonnage fixtures, which proves that freight rates at normal times, in July, were about 70s. to 75s. to the United Kingdom and 90s. to Italy for steamships. There were practically no charters made in August for prompt loading, as shippers were unable to sell owing to pending credit arrangements, which were necessary on account of the war. Deck loads can not be shipped to Great Britain from the Gulf for arrival after the 15th of October, and rates increased some 20 to 25 per cent, which is not unreasonable, as owners should be recompensated for the reason that deck loads to other countries, as in time of peace to Holland and Germany, were not available, owing to the European war. However, freights rose from 100s. to Great Britain late in September to 180s. and higher, which owners are asking for prompt loading to Great Britain, and 200s. to Italy; and even at these figures it is difficult to charter, as cotton and grain cargoes appear to be more desirable from the viewpoint of the owners.

The rates for full cargo steam tonnage are based on a certain form of charter—the Pixpinus charter.

Liners are asking 200s. from New Orleans and Mobile to Liverpool for lumber on liner bill of lading, which is equivalent to about 220s. on Pixpinus form.

Sail tonnage, late November, was about 100s. to the United Kingdom on basis of a charter called the "$2 form," and the last fixtures, late December, were at 150s. to the same destination and on the same charter form for vessels in the same position.

The increase in rates is said to be due to the elimination of the German and Austrian tonnage and part of the British mercantile fleet, which is being held at the disposition of the British Government. However, in our opinion, the enormous advance is not in line with the elimination of this tonnage; the list which we are inclosing shows that at the beginning of the war the increase in freights was only slight, even though at that time all the German and Austrian tonnage was practically eliminated; war risk can be covered at a reasonable figure, and could not be the cause for an increase in rates beyond a reasonable figure.

From our viewpoint it is hard to account for the exorbitant freight rates, which have proven such a handicap to exporters, especially to those in our line of business, and we are heartily in favor of Federal legislation which would encourage American capital to own vessels under the American flag and enable them to compete successfully with foreign owners.

Yours, truly,

THE TUEMLER CO. (INC.),
ROBERT TUEMLER, *President.*

EXHIBIT 34.

[Walter A. Wood Mowing & Reaping Machine Co., general offices and works, Hoosick Falls, N. Y., U. S. A.]

HOOSICK FALLS, N. Y., *January 9, 1915.*

The honorable SECRETARY OF THE TREASURY,
Washington, D. C.

SIR: I have noticed recently articles appearing in some of the New York papers in regard to the difficulty experienced by certain manufacturers who have orders for goods to be shipped abroad in making proper arrangements for such shipment under reasonable protection. I feel justified in writing you in regard to the situation of our company in connection with the handling of our foreign trade this season.

The Wood Co. has enjoyed for a great many years a very satisfactory foreign trade. We have had an office under our own management in London since 1857 and in Berlin since 1875, and have located in the different continental countries many agents, who have been selling Walter A. Wood machines from 30 to 40 years, and even, in some cases, 50 years. Quite considerably more than half, therefore, of our entire business is foreign. Of this foreign trade quite a large proportion comes from Russia, Germany, Austria and Hungary, and France, or countries within the war zone.

You can readily appreciate that the unfortunate war has had quite a serious effect upon our business this year. We can hope for very little, if any, business from Russia, Germany, Austria, or Hungary. It is quite probable, however, we may have some business with France. We have already received requisitions and orders for our product from our London office, which controls the trade in the United Kingdom, and also certain trade with Spain and South Africa, which is controlled from that office. We have also received orders from our Scandinavian agents, all of whom have been representing our company for from 35 to 40 years. Orders have also been received from our Italian agents and from certain South African agents who are dealt with direct from our home office.

Naturally we are anxious to protect these orders, and in such a way that we will at the same time best protect the interests of our agents and the trade controlled by our London office. We find, however, that the cost of getting goods to foreign ports and the uncertainty of proper shipping facilities is becoming a great menace, and will have a very serious effect on the business that we have in hand and wish to protect. At this time it is a serious question how we are going to be able to handle the orders which we have received from our Scandinavian agents. The freight rates to Scandinavian ports have been advanced enormously, from 2 to 250 per cent as compared with last year. Insurance rates are also very excessive; competition in our line in Scandinavia is very keen, for there are quite a few

manufacturers building harvesting machines and agricultural implements located in the three Scandinavian countries with whom our agents have to compete. The margin of profit at best is small. Under our contracts with these agents prices are based upon delivery f. o. b. New York City, so that the agents have to pay the cost of getting the goods from New York to their respective ports. If we are compelled to ship under the present freight rates to Scandinavian ports, plus the abnormal insurance rates, the increased cost to our agents will, we know, wipe out all the profit that they would hope to enjoy on the machines which they would have ordered of us this season.

This same situation affects, although not to so great an extent perhaps, shipments to other ports. All freight rates to United Kingdom ports have been considerably advanced. While it is possible to make contracts covering the next three months, the rates are all much higher than last year. If contract is not made and you ship only under the open rate, the difference between the open rates and the rates of last year is very great. To illustrate, under the best contract that we can now make on shipments to Liverpool and London, the freight rate on our different machines increases the cost of getting the machines or implements from New York to Liverpool and London $1.50 to $2 on mowers, $3 to $4 on reapers, $5 to $6 on binders. While there is some reason, perhaps, why insurance rates should be abnormally high, still we can not but feel that the steamship companies are taking advantage of present conditions to exact rates which are all out of reason and which are unjust and unfair. We know that unless something occurs to improve the present situation the result of our particular business will be that we will run the risk of having certain orders canceled from some of our foreign agents, and we will be subjected to additional expense in handling shipments to other agents and to trade controlled from our London office, which will practically take away all of the profit which we hope to enjoy. At very best, with a limited output, as compared with the average of the last few years, due to the war, to have to do what business can be secured under conditions which make such business hardly profitable, it seems a greater burden than we should be called upon to bear.

It would appear to us that there never was a more opportune time for this country, either under legislative action or private capital, to create a merchant marine, for lack of which, in our judgment, this country has suffered for many years. We can only hope that some measures may be enacted or some policy created which will relieve the present situation, and in time to affect our business interests this year.

I trust you will pardon, perhaps, the length of this letter, but it is difficult to put the situation as it affects us before you in any other way, and even now we have only treated with it in a very general way.

We are inclosing a short, rather concise memorandum, showing the comparison of rates to certain ports, which will illustrate to a small extent, at least, the effect on shipments that we have to these ports, and there are many others which are not included in the list.

Respectfully,

DANFORTH GEER, *President.*

Since dictating this, have received a cable from our Paris agents canceling orders on account of excessive freight rates.

EXHIBIT 34A.

[Memorandum in regard to foreign rates and shipping facilities under war conditions.]

All ocean freight rates have been largely increased, the increase ranging from 15 per cent in the case of certain United Kingdom ports to 400 per cent for certain eastern Mediterranean ports.

The following comparisons of rates will serve as examples:

	1914	Present rates.
Glasgow	15s. and 5 per cent.	17s. 6d. and 5 per cent.
Bristol	do	20s. and 5 per cent.
Liverpool	11s. 3d. and 5 per cent.	30s. and 5 per cent.
Rotterdam	6 cents per cubic foot.	20 cents per cubic foot.
Copenhagen	13s. 9d. and 5 per cent.	40s. and 5 per cent.
Stockholm	18s. 3d. and 5 per cent.	41s. 3d. and 5 per cent.
Bilbao (and other Spanish ports)	20s. and 5 per cent.	40s. and 5 per cent.
Havre	$2.25 net per 40 cubic feet.	$12 and 5 per cent.
Bordeaux	$2.90 net per 40 cubic feet.	$11 and 5 per cent.

NOTE.—Unless otherwise indicated rates are shown in shillings per 40 cubic feet.

There are comparatively few ships available to the ports listed above, and if we were shipping a normal amount of cargo, great difficulty would be experienced in securing space for it. As it is, our shipments frequently fail to make the steamer for which they are engaged, although no notification is sent to us until after the steamer has sailed. Sailing dates are irregular. The date on which a boat actually sails is from a week to six weeks after the original published sailing date.

(Signed) W. H. C.

JANUARY 5, 1915.

EXHIBIT 35.

ST. LOUIS, MO., *January 13, 1915.*

Hon. W. G. MCADOO.

DEAR SIR: I had consigned to my order some freight to France the first week in November last and the rate was 52 cents a hundred pounds from St. Louis. I am paying now 98 cents a hundred pounds for same shipment. I have just returned from abroad. It does seem to me that this unheard-of advance in ocean freight rates should be investigated.

Yours, truly,

B. C. EDMUNDS.

EXHIBIT 36.

[H. Frank Darrow, wholesale importer of nursery stocks, hothouse plants, bulbs, seeds, rafia.]

NEW YORK, *December 29, 1914.*

Hon. SECRETARY OF THE TREASURY,
Washington, D. C.

DEAR SIR: Referring to your request in regard to exporters making statements of overcharges on ocean freight rates to Europe, would say that I am a large exporter of grass seed, and in former seasons I have paid from 35 to 50 cents per 100 pounds on the French Line sailing from New York to Havre, while on steamship *Chicago* sailing to-morrow, the 29th instant, I have been compelled to pay $1.50 per 100 pounds ocean freight, which I consider is prohibited to the export trade, and I should therefore be very glad to have your assistance to relieve us from any further exorbitant charges of this kind if possible.

Thanking you in advance for the courtesy of a reply, I remain

Yours, respectfully,

H. FRANK DARROW.

EXHIBIT 37.

[The Wysham Co., manufacturers and importers baskets, woodenware.]

BALTIMORE, *December 28, 1914.*

SECRETARY OF THE TREASURY OF UNITED STATES,
Washington, D. C.

DEAR SIR: We beg to call your attention to the excessive freight charges we were compelled to pay on last two shipments we received from Rotterdam. The Holland-American Line were the carriers. They advanced freights twice; the first advance was heavy but the second is very excessive.

Yours, etc.,

THE WYSHAM CO.
J. KEMP WYSHAM.

EXHIBIT 38.

[Ike Mannheimer, green and dried apples.]

ROCHESTER, N. Y., *December 28, 1914.*

SECRETARY OF THE TREASURY,
Washington, D. C.

DEAR SIR: I refer to inclosed newspaper clipping, and am glad to see that you will investigate the high ocean rates and the scarcity of vessels. In connection with the Scandinavian-American Line out of New York (Messrs. Funch, Edye & Co., agents), I have had so much trouble in securing space to Copenhagen and in getting the goods on board steamer even after the space had been promised that I was compelled to stop selling goods to Copenhagen. From last year's rate of 35 cents per 100 pounds on dried apples and of $1 per barrel on fresh apples, this line advanced to 53 cents, then to $1, per 100 pounds on dried apples and to $1.50, and after that to $2 per barrel on fresh apples, so that the freight on fresh apples in barrels is almost equal to the value of the apples and practically prohibitive.

The Norwegian-American Line (Messrs. Benham & Boyesen, agents) has until recently given me very satisfactory service out of New York for points in Norway, such as Christiania, Bergen, Stavanger, Aalesund, etc., but has now also advanced the rates to the above maximum quotations and notified me within a short time that no space is available until next April. Hope that you will succeed in getting better and cheaper facilities, and I shall be glad to get notice from you to that effect in the near future.

Respectfully, yours,

IKE MANNHEIMER.

EXHIBIT 39.

[Stengel & Rothschild, tanners and manufacturers of patent enameled and fancy leather.]

NEWARK, N. J., *December 29, 1914.*

SECRETARY OF THE TREASURY,
Washington, D. C.

DEAR SIR: We notice in the Journal of Commerce of December 26, that you ask for information regarding export shipping difficulties and high freight rates from American shippers, and we take this opportunity to inform you that we are experiencing considerable difficulties with shipments of our goods to Italy. We have been shipping these same goods to Italian clients for a number of years, and they are being shipped in regular order of business. We have, however, to obtain permission from the Italian consul against declaration made that the goods are for home consumption, and which declaration has to be approved by the British consul in New York. It is further necessary for the consignee in Italy to make another declaration to the same effect, which has to be approved by the British ambassador at Rome and forwarded to Gibraltar before arrival of steamer carrying the goods at that port.

It is very difficult to get shipping accommodation at all, the Italian steamers seem to be crowded with freight and the rates now demanded are exorbitant. For instance, the normal freight rate for patent leather in cases has been 50 shillings per ton with possibly 5 per cent primage, but we have just been asked a rate of 120 shillings plus 5 per cent for the same class of freight. This certainly appears to be an exorbitant rate and anything that can be done to get better shipping facilities will be highly appreciated by the business interests of this country.

Respectfully submitted,

STENGEL & ROTHSCHILD.

EXHIBIT 40.

[Extract from letter to Secretary of the Treasury from R. R. Dancy, cotton and cotton linters, Houston, Tex., dated Dec. 26, 1914.]

Last week brokers asked $17 per bale freight to Germany (Bremen), now $14. Surely the United States Government can and should control the situation and shipping and insurance to such extent that if only one steamer could be had her charter or freight charge should be in the limit of reason, controlled by the Government and not by sharks and sharps. Needs no probe, but action in distress.

EXHIBIT 41.

[California Fig Syrup Co.]

LOUISVILLE, KY., *January 15, 1915.*

Hon. W. G. MCADOO,
Secretary of the Treasury, Washington, D. C.

DEAR MR. MCADOO: We beg to advise you that we do considerable foreign shipping to London, England, and Sydney, Australia, and it has recently come to our notice that the ocean freight rates now charged by the steamship lines to various ports have increased some 200 per cent. It was our understanding that there were sufficient vessels to carry cargo that was offered for shipment, and we are at a loss to understand why these excessive freight rates should be charged by the

various lines. We therefore wish to file a protest against the exhorbitant rates now made, and would very much appreciate your views on the subject and the reasons for these excessive rates.

Yours, very truly,

CALIFORNIA FIG SYRUP CO.,
H. H. AINSLIE.

EXHIBIT 42.

[Garcia & Maggini Co., importers and exporters of tropical and California fruits, general commission merchants, packers of dried fruits, nuts, dates, honey, beans, etc.]

SAN FRANCISCO, CAL., *January 5, 1915.*

The SECRETARY OF COMMERCE,
Washington, D. C.

DEAR SIR: We read in the New York Times a special to that paper from Washington, in which it is said that your department would be glad to be informed regarding the difficulties the exporters are meeting for lack of space to European neutral countries.

We beg to say that we ourselves have shipped in the last two months five or six hundred tons of dried fruit to New York through the canal of Panama for reshipment to Scandinavian ports and also to Holland.

To a great extent, these goods have been in New York for a long time, for the reason that our forwarding agents, Messrs. C. B. Richards & Co., could not get any space.

Besides freight rates have advanced over 300 per cent since the war broke out, and lately, and within 15 days, freights have advanced fully 100 per cent.

It seems that whenever the Scandinavian-American Line are asking higher freight rates other lines do so too, and now even the Holland-American Line is asking 100s. per 2,240 pounds, while only a few days ago this company asked 45s. per 2,240 pounds.

These advances in freight rates are made without notice, and even previous engagements have not been protected, so that the shippers instead of making a small profit on their sales to European countries are losing money.

At the present time the freight rates from New York are so high that business will suffer a good deal through these high freight rates, at least as far as goods from this coast are concerned.

To England and France freight rates have not advanced to such an extent, but unfortunately British and French steamers seem to be unavailable for other countries than England or France.

It is greatly to be regretted that American steamers could not be had, because we think if only one regular line to Scandinavia could be established with American steamers at reasonable freight rates the situation would become more normal.

We beg to remain,

Yours, very truly,

GARCIA & MAGGINI CO.,
Per A. ASHER.

EXHIBIT 43.

[William Haas & Sons, manufacturers and exporters of "D" shovel handles.]

HOUSTON HEIGHTS, TEX., *December 28, 1914.*

UNITED STATES COMMERCE DEPARTMENT,
Washington, D. C.

GENTLEMEN: We respectfully call your attention to the paralysis of our business due to the exorbitant ocean freight rates now being imposed upon the manufacturers and producers of this country. For years our entire output has been disposed of abroad, but owing to the present prohibitive tariffs in ocean transportation we are unable to deliver our goods, consequently our plant will remain closed down until such rates are established as will enable us to market our goods. The majority of our shipments have hereofore gone via Liverpool and Manchester.

In our judgment a Government merchant marine will solve the problem.

Very truly,

WM. HAAS & SONS,
By WILLIAM HAAS, Sr.

EXHIBIT 44.

[Coplay Cement Manufacturing Co., manufacturers of Saylor's Portland cement.]

NEW YORK, *December 28, 1914.*

SECRETARY OF COMMERCE,
Department of Commerce, Washington, D. C.

DEAR SIR: The newspapers of our city advise that the Treasury Department are seeking information regarding the abnormal increase in ocean transportation rates and the scarcity of ships to accommodate export business.

While we are not direct shippers, and do the main part of our export business through commission firms of this and other cities, we are constantly thrown into relationship with the steamship lines, and it has been our experience that the shipping rates have advanced so rapidly that our shipments have been practically suspended, due to the two facts above mentioned, scarcity of ships and increase in freight rates.

Before the month of July, 1914, shipments of Portland cement to the Argentine Republic and Uruguay were possible at $2.45 per ton; to Rio de Janeiro, Brazil, $3.60 per ton. These rates were advanced the early part of August 50 per cent; were subsequently reduced, so that the advance was equivalent to 25 per cent for the July rates, and these rates have advanced since the latter part of September until now they are $6 per ton to Rio by some lines and $8.50 per ton by other lines; $6 per ton to the Argentine Republic; and notwithstanding these high rates there is no possibility of obtaining ships, transportation, or accommodation for our product.

Among those who are able to give you direct information regarding the scarcity of ships and freight rates are: Mr. Connors, freight transportation manager, Paul Gerhardt & Co., 10 Bridge Street, New York City; Mr. William Gene, Lamport & Holt Line; Busk & Daniels, agents, Produce Exchange, New York City; Mr. P. Thield, Houlder, Wear & Boyd (Inc.), 24 State Street, New York City; Mr. Betz, Funch, Edey & Co., 10 Bridge Street, New York.

The scarcity of shipping seems to be directly due to the fact that the tempting charter rates furnished to the steamship lines to divert their steamers from the channels which they have followed has resulted in withdrawing a great number of their steamers from the South American trade to the European.

From all information that I can obtain there seems to be ample cargo furnished to more than take care of a very much larger amount of tonnage than is now being used in the South American trade. However, before the outbreak of the European war American business men were compelled to submit to the steamship freight rates which were arranged by committees in London or other foreign ports and forwarded to their agents in America. Now that the European war is going on, some steamship lines, probably acting upon orders from their English and other foreign owners, have diverted their steamers, one by one, so that they are at this moment practically unable to give any definite idea of their sailing dates.

I have heard that the charter rates are being advanced considerably. This is probably due to the danger ships encounter in mined fields and to the great demand for ships to carry supplies for the troops now in action abroad. Whatever the cause is, American business men and shippers for export in all lines of goods have been made to suffer. While I am personally unable to more than give you this information from conversations had with some of my customers who in turn have the information more direct from the companies themselves; also, some of my information, but not a great deal of it, does come from the shippers, the parties whose names I have mentioned can give you valuable information regarding the increase in ocean freight rates of the South American trade.

Yours, very truly,

ALBERT FARJEON,
Export Manager.

P. S.—I have heard that subsidies have been granted to some of the foreign steamship lines, one of the conditions being that one-third of the cargo would have to be heavy-weight material, such as cement, iron, etc. The steamship companies were therefore obliged to carry heavy cargo. We have experienced a great deal of trouble with the steamship companies in arranging freights, all of them claiming they do not want to carry cement at any price.

A. F.

EXHIBIT 45.

[American Tripoli Co.]

SENECA, MO., *December 28, 1914.*

DEPARTMENT OF COMMERCE AND LABOR,
Washington, D. C.

GENTLEMEN: We clipped the attached item from the St. Louis Globe-Democrat, and although our export business is very small compared with the larger concerns of the country and alone would hardly count in the grand total of the country's exports, yet we believe that there are a great many small exporters like ourselves, whose total business would be quite an item in the total for the year; and we believe also that small concerns like ourselves are probably worse hurt by any and all adverse conditions, for the very reason that our business being small we do not get the consideration that a very large concern, whose business would be a large item in the business of any steamship line, would receive for two reasons: First, the business itself because of its small volume is not so desirable, and second because being small concerns the steamship company would feel that any complaint that we might make would receive but small attention.

This last may even be true in this case; but we believe that if all the small exporters whose business is very greatly affected by the present prevailing conditions would write to your department, their great numbers and the greater cause for complaint which the small shippers probably have would demand attention.

We attach four letters that we have recently received from the J. H. W. Steele Co., of New Orleans, who attend to the forwarding of our export shipments, and through whom we get quotations of rates, make contracts with the steamship companies for the transportation of shipments, etc.

We have an offer of some orders from Barcelona, Spain, and the first two of the attached letters refer to our effort to get quoted us a rate from New Orleans to Barcelona; and you will see that the steamship company operating steamers to Barcelona refused to quote rates at all. In the first letter the reason given was that other commodities which permit of a higher rate are being carried so that our material, which must have a lower rate, is not at all desirable, and they even refuse to quote rates at all. Thus we are not able to quote prices to the firm in Barcelona, even though conditions might be such that we could even pay a high rate of freight and still do business.

The letter dated December 10 refers to an effort to make a contract with the Harrison or Leyland Line covering our shipments for a period to Liverpool, so that we would be able in turn to make a contract with our English friends for a like term at a specified price. You will note that they had inclosed with this letter one from the Harrison Line indicating that "They are not inclined to make a contract at present." Not being able to make a contract with the steamship company operating to Liverpool, of course we can not make a contract with our English friends to supply them with our material.

The fourth letter, dated December 18, quotes us a rate of 49 cents per 100 pounds from New Orleans to Havre, France, and for comparison, will say that just previous to the European war, on July 3, 1914, we made a shipment at the rate of 18 cents per 100 pounds, a little more than one-third of the rate now asked. This high rate is, of course, prohibitive on a commodity such as ours.

This letter also replies to our inquiry regarding war insurance, and also states that "Further, rates are quoted to become effective within two weeks, and agents, therefore, would not quote rates on shipments moving in the middle or latter part of January." We take it that this clause means that rates are only quoted for two weeks in advance, and since it takes approximately 24 days to send a letter to Paris and get a reply back here, the rate would be ineffective before we could possibly quote prices to Paris, and get an order in reply, even though these high rates were not prohibitive.

The last clause of this letter again states that they are unable to get a rate quoted to Barcelona, though there are steamers making regular sailings for that port.

We hope that our testimony herein contained, together with all the other from larger shippers, will be such that some measure can be taken that will relieve shippers of these unprecedented and impossible conditions.

Kindly see that the attached letters are returned to us.

Yours, sincerely,

AMERICAN TRIPOLI CO.,
Per ROBT. ORNDUFF, *Treasurer.*

EXHIBIT 46.

[Extract from a letter to the Secretary of Commerce from David C. Reid, 18 Broadway, New York, dated January 2, 1915.]

For your information and guidance, the question of getting tonnage at the present time for trans-Atlantic business is practically impossible. I have offered by cablegram up to 10s. 3d., Government form per deadweight ton and was refused by my London correspondents, who state that much higher offers must be made before tonnage can be procured. Under ordinary circumstances these tramp steamers I made the offers for in good faith could be secured at 3s. per deadweight ton. Conditions with us are almost impossible. Tonnage is unprocurable at almost any except the most extraordinary and prohibitive terms. I speak now of the cargo steamer for the general carrying tramp steamer trade. Anything that can be done to put tonnage in the market should be done.

EXHIBIT 47.

[David C. Reid, broker for the sale and charter of American and foreign ships.]

NEW YORK, *January 4, 1915.*

HON. W. C. REDFIELD,
Secretary, Department of Commerce, Washington, D. C.

DEAR MR. REDFIELD: Many thanks for your kind telegram. 45s. per ton was asked for coal freight to Italy this morning from Norfolk; London refused 10s. 3d. per month, time charter, on Saturday, and 13s. was bid this morning which, I believe, will also be refused on tramp tonnage Government form.

Conditions here are indescribable; everything possible should be done to get tonnage moving.

Ordinary tramp rates about 3s. What are the poor people in Europe to do? How are they to live?

EXHIBIT 48.

[W. H. Moore & Co.]

BALTIMORE, MD., *December 28, 1914.*

DEPARTMENT COMMERCE, *Washington, D. C.*

GENTLEMEN: In the name of the Leaf Tobacco Association of Baltimore City, of which I am president, I desire to file with your department an urgent protest against the unwarranted advance in freight rates on tobacco as recently established by the Holland-American Line. Some of our exporting members shipping to Holland points have signed contracts with this company expiring December 31, 1914, for a rate of $3.50 per hogshead of tobacco. This contract has been disregarded entirely and the rate increased first to $5.25, then to $6.85, and to-day a notice that it will be $7.50 until further notice. This, I repeat, in the face of the written contract for $3.50 per hogshead.

Their explanation is the war conditions, claiming a war clause which some of our members claim is not in their contract. In any event, there is no war between the nations whose subjects are signers of the contracts, and we wish for your department to take some action to adjust this if possible; and we shall gladly furnish you with any further information which your department might wish to have.

Very respectfully, yours,

CHAS. E. MOORE.
President of Leaf Tobacco Association, Baltimore, Md.

EXHIBIT 49.

[Dumee, Son & Co., cotton.]

PHILADELPHIA, PA., *December 29, 1914.*

DEPARTMENT OF STATE,
Washington, D. C.

DEAR SIRS: We wish to enter strenuous protest against the prohibitive freight rates being charged by the trans-Atlantic lines on cotton and cotton linters to European ports. This time one year ago we paid a rate of 45 and 50 cents per 100 pounds on compressed and uncompressed cotton linters, respectively, from New York to Rotterdam. To-day we are asked $2.50 and $3 per 100 pounds for compressed and uncompressed cotton linters, respectively, shipment between these two points. We should advise that all the freight rates from points on the eastern seaboard to other European ports have been advanced in proportion to the increase cited above. We feel that some relief should be arranged for the American exporters by your department.

Yours, very truly,

DUMEE, SON & CO.

EXHIBIT 50.

[W. W. Battle & Co.'s coal trade freight report.]

NEW YORK, *January 4, 1915.*

The freight market continues to advance, and, although a few steamers were chartered for export coal at high rates during the past week, none of these fixtures have been reported.

Occasionally we have steamers proposed for export coal that are willing to accept less than current market rates, and, consequently, we think it well for you to communicate directly with us whenever you have any inquiries for export coal, as the rates quoted below, under present conditions, are bound to be more or less uncertain.

We would quote freight rates on coal by steamer as follows: About $2 to Habana; about $2.50 to Cardenas or Sagua; about $2.50 to Cienfuegos; $2.75 to $3 to Port of Spain, Trinidad; $2.50 to $3 to St. Lucia; about $2.50 to St. Thomas; $2.75 to $3 to Barbados; about $2.50 to Kingston (small boats to Kingston $2.50 to $2.75); $2.25 to $2.50 and p. c. to Curacao; $2.50 to $2.75 to Santiago; $2.50 to $2.75 to Guantanamo; about $4.50 to Demerara; $2.40 to $2.50 to Bermuda; about $2.50 to Vera Cruz; about $2.50 to Tampico; 25s. to 30s. to Rio; about 25s. to Montevideo, Buenos Aires, or La Plata; about 40s. to a direct port in the Mediterranean not east of the west coast of Italy, Spain excluded, and about 20s. to Valparaiso.

EXHIBIT 51.

[John M. Harper & Co.]

PHILADELPHIA, *December 28, 1914.*

DEPARTMENT OF COMMERCE AND LABOR,
Washington, D. C.

DEAR SIRS: We notice, according to the Journal of Commerce, of December 26, that the Secretary of the Treasury asked those shippers who had been obliged to pay high ocean freights to communicate with the Department of Commerce.

One of the lines which we handle is goatskins; the rate of freight on same, per the Philadelphia-Trans-Atlantic Line, from London to Philadelphia in June, 1914, was 35s. per ton, net; by the same line we have been obliged to pay this month 54s. 9d. and 10 per cent, which is equivalent to about 75 per cent increase.

The rates of freight from South Africa to American Atlantic ports in October had advanced 25 per cent, and we understand those rates have still farther advanced.

The rate from the west coast of Africa was 37s. 6d. per ton, now 55s.

The latest reports we had from China, freight rates had advanced 25s. (30 per cent).

We are safe in saying that the freight rates from the different ports of origin have advanced over last June from 25 up to 75 per cent. We can give you more definite information a little later on, if you desire, but you could get more positive information by appointing someone specially from your department and sending them to the Philadelphia and also New York customhouses, and look over the bills of lading of last June and July and the bills of lading recently to hand for similar goods. We might further add these increased freight rates, together with war risks and high premiums for insurance which the American importers are obliged to pay, it making business almost prohibitive in some lines.

Yours, respectfully,

JOHN M. HARPER & CO.

EXHIBIT 52.

[Meyer Hecht, commission merchant, dealer in deer, goat, sheep skins, hides and calfskins.]

NEW YORK, *December 26, 1914.*

THE SECRETARY OF COMMERCE AND LABOR,
Washington, D. C.

SIR: I have read that your attention has been called by exporters to the way the different steamship lines are treating the exporters. I, too, want to protest that they are charging me two or three times as much as formerly and then do not give me room for my shipments, which hinders my business considerably. I hope that you will be able to do something in this matter.

Very respectfully,

MEYER HECHT.

EXHIBIT 53.

[American Glue Co.]

BOSTON, *December 30, 1914.*

THE SECRETARY OF COMMERCE,
Washington, D. C.

DEAR SIR: Our attention has been called to a request of the Senate that your department supply that body with information as to increased ocean freights due to scarcity of tonnage, and that data on these points is desired. Accordingly, we beg to report as follows:

On merchandise imported by us from Italy, rates in September and October were advanced 25 per cent. Since then, however, they have been restored to the normal figure.

On merchandise imported by us from the United Kingdom of Great Britain the rates have been increased 50 per cent and no immmediate likelihood of reduction.

Within the past few days, having a shipment of merchandise to export from this port to Liverpool, we were informed by the carriers that they could not handle same at all on account of having more freight than they could handle.

We certainly feel that we have been not only handicapped by lack of service, but also overcharged, all of which is a detriment to our commerce.

Yours, respectfully,

AMERICAN GLUE CO.,
J. D. HASHAGEN.

EXHIBIT 54.

[Minot, Hooper & Co., Manufacturers' Agents.]

NEW YORK, *December 30, 1914.*

Mr. WILLIAM C. REDFIELD,
Secretary Department of Commerce, Washington, D. C.

DEAR SIR: In view of the fact that you are to submit evidence before the Senate committee regarding increases in ocean freight rates since July 1, we beg to inform you as follows:

We are now paying on a shipment to Piraeus, via the Cunard Line, 100s. per ton of 40 cubic feet. The rate July 1 was 32s. 6d., and about two years ago we secured as low as 15s. and 20s. per ton on the Cunard and other lines. We engaged space on the Cunard steamship *Carpathia*, sailing to Piraeus January 5, 1915, at 75s. per ton. A week later, when we endeavored to engage more space, the rate had advanced to 100s. for the same character of goods. We tried to secure space on the Cunard steamship *Panonia*, sailing to Piraeus January 30, and were advised that the rate was 100s. per ton, all plus 5 per cent for primage. We gave the matter into the hands of our freight broker, who, upon informing the Cunard Line that the Hellenic-Transatlantic S. N. Co. would accept freight for March sailing at the rate of 80s., was told by them that they would meet the competition of the "Greek line" and give us an 80s. rate.

What we want to know is whether there is any redress to be had for having to pay these exorbitant rates, or must we pacifically submit to such "extortion." While we ourselves do not bear the cost of freight on our shipments—the customer assuming that burden—our export business is directly and materially affected, inasmuch as the uncertainty and increase of expense and hazard to our customer have a tendency to make him cautious and reduce or altogether terminate his orders.

Yours, very truly,

MINOT, HOOPER & CO.
E. T. PICKARD.

EXHIBIT 55.

[Gabriel Nachman, wool stock.]

NEW YORK, *December 28, 1914.*

SECRETARY OF COMMERCE,
Department of Commerce, Washington, D. C.

DEAR SIR: We are large shippers of woolen rags to foreign ports, and find that the steamship companies have increased their freight rates from one-fourth cent per pound to $1.10 per 100 pounds; and even at that rate they refuse to take rags; therefore have not been able to ship any for export in over four weeks, and as yet don't know when they will take stock. They claim they are booked ahead on the same.

If there is anything that you can do to relieve the situation, would consider it a favor.

Yours, very truly, GABRIEL NACHMAN.

EXHIBIT 56.

[Gabriel Nachman, wool stock.]

NEW YORK, *January 6, 1915.*

WILLIAM C. REDFIELD,
Secretary Department of Commerce, Washington, D. C.

DEAR SIR: Replying to yours of the 30th ultimo, I find conditions just as bad regarding shipments to Europe. The fact is, I can not ship any stock, as some of the lines claim they have information from England not to take any rags.

You know it is impossible to ship rags on sailing vessels. Whenever you find that things look brighter, will be pleased to hear what can be done in the matter.

Yours, very truly,

GABRIEL NACHMAN.

EXHIBIT 57.

BALTIMORE, MD., *December 26, 1914.*

The DEPARTMENT OF COMMERCE,
Washington, D. C.

GENTLEMEN: Responding to your request for proofs of how shipments of American goods to Europe are handicapped or made entirely prohibitive on account of high ocean freight rates, we beg to submit the following:

We are shippers of Maryland, Ohio, Kentucky, and Virginia tobacco to Europe, and most of our shipments are consigned to Holland, Germany, Austria, Italy, Norway, and Belgium. At present only shipments to Holland, Italy, and Norway are possible at prohibitive rates. In fact, the latter have become so high that now cable orders "Stop buying" have been received.

Although we have made a yearly contract with the Holland-America Line—the only shipping opportunity from here to Holland—as per copy inclosed, this line has arbitrarily raised its rates 100 to 300 per cent, and even at the raised rates shipments can be booked only "for first available room."

Rates to Italy also have become entirely too high—i. e., from $4 per hogshead of Maryland tobacco to about $27, or nearly 3¼ cents a pound—so that tobacco shipments have become out of question.

The Holland-America Line, which raised the rates on December 7, 1914, has now again suspended them, indicating another raise.

Trusting that the aforegoing statement will interest you, we are, dear sirs,

Very respectfully, J. D. KREMELBERG & Co.

P. S.—The freight rates from Baltimore to Rotterdam were:

	On Maryland and Ohio tobaccos (per hogshead).	On Virginia and Kentucky tobaccos (cents per 100 pounds).
Aug. 1, 1914	$3.50	30
Dec. 1, 1914	5.25	82
Dec. 9, 1914	6.85	102

A hogshead of Maryland or Ohio tobacco weighs on an average about 800 pounds gross, and a Virginia or Kentucky hogshead about 1,650 pounds.

EXHIBIT 58.

NEW YORK, *December 28, 1914.*

SECRETARY OF TREASURY DEPARTMENT,
Washington, D. C.

SIR: We herewith beg to state that our business as exporters of American tobacco is seriously affected by the present high ocean freight rates.

We are large shippers of Kentucky tobacco via New Orleans to Rotterdam, Holland, for which the ocean freight rate was 35 cents per 100 pounds before the war. Now $2.55 per 100 pounds is asked, which is practically prohibitive, particularly for the low-priced grades of tobacco.

The ocean freight rate from New York to Rotterdam was 25 cents per 100 pounds before the war; now $1.60 per 100 pounds is demanded.

The situation is all the more deplorable since prices for export tobacco have declined since the outbreak of the war, resulting in a corresponding loss to the growers in this country, but as the rise in freight rates more than offsets the decline in the prices of tobacco, the resumption of the export tobacco business, which business has been almost completely paralyzed since the outbreak of the European war, is seriously handicapped by the ocean freight situation.

Trusting that with Government aid the present abnormal situation referred to may be relieved, we remain,

Respectfully, yours, KREMELBERG & Co.

EXHIBIT 58A.

TOBACCO CONTRACT.

In consideration of the reduced rate of freight hereinafter mentioned, it is hereby agreed between the Holland-America Line of Rotterdam, Holland, running steamers between Rotterdam and Baltimore, parties of the first part, and Messrs. J. D. Kremelberg & Co., parties of the second part, to wit:

(1) That parties of the first part are to maintain from Baltimore to Rotterdam a service of steamers of the grade of 100 A–1 British Lloyds or equivalent, to sail weekly if possible, but not less than semimonthly.

(2) That the rate of freight on tobacco of the present approximate standard as to size and weight is to be as per rates on reverse side, United States gold, per hogshead to Rotterdam or Amsterdam.

(3) That the terms of this contract shall be from January 1, 1914, until December 31, 1914.

(4) That the parties of the second part herewith agree to above terms, and covenant, contract, and agree to ship all of the tobacco that they control by steamers of the Holland-America Line at the rate specified on reverse side.

(5) That if sailings are less than semimonthly—barring a reasonable delay caused by unavoidable accidents or dangers of the sea or other causes usually expected in contracts embracing carriage of goods by steamers—then the parties of the second part have the privilege of shipping by any other line, but the Holland-America Line shall not be liable for the difference in amount of freight charged by such other line.

(6) Penalty for nonperformance of this contract estimated amount of freight.

Signed at Baltimore in duplicate this 15th day of December, 1913, in behalf of the contracting parties.

Witness to signature of—

DRESEL, RAUSCHENBERG & Co., [SEAL.]
Agents Holland-America Line.
JOHN SONDERMAN.

[J. D. Kremelberg & Co., 313 South Charles Street.]

BALTIMORE, MD., *December 29, 1914.*

DEPARTMENT OF COMMERCE, *Washington, D. C.*

GENTLEMEN: Referring to your esteemed letter of the 28th instant, we beg to report that since our last letter to you of the 26th instant the Holland-America Line has again raised its freight rates.

We inclose a statement showing the freight rates prevailing on August 1, 1914, and December 28, 1914, respectively, for tobacco, raw leaf and stems, which we trust will be of interest to you for your report to be made about January 10, 1915.

We are, dear sirs, very respectfully,

J. D. KREMELBERG & Co.

EXHIBIT 59A.

Ocean freight rates on tobacco, raw leaf and stems, from Baltimore, Md., to Rotterdam, Holland, as quoted by the Baltimore agency of the Holland-American Line, of Rotterdam.

Kind of tobacco.	Open freight rates prevailing—	
	Aug. 1, 1914.	Dec. 28, 1914.
Virginia, Kentucky, Burley, and North Carolina tobacco.	30 cents per 100 pounds	$1.25 per 100 pounds.
Maryland, Ohio, and Bay tobacco.	$3.50 per hogshead	$8.25 per hogshead.
Virginia stems	$5.06 per hogshead	$16 per hogshead.
Seed-leaf tobacco, in cases	$1.50 per case	$4 per case.
Loose-leaf tobacco, in burlap	$0.40 per 100 pounds	$1.25 per 100 pounds.

EXHIBIT 60.

LYNCHBURG, VA., *December 28, 1914.*

The SECRETARY OF COMMERCE,
Washington, D. C.

SIR: Having seen in the newspapers that the Department of Commerce wishes to be informed about difficulties which shippers in the export trade experience as to making satisfactory freight engagements for shipments of merchandise to foreign countries, we beg to say that the different steamship lines having steamers running between home ports and neutral countries in Europe seem to be taking advantage of the fact that the number of steamers is not near sufficient to take care of the ordinary legitimate business with foreign countries and are constantly advancing freight rates, which now have reached such high figures as to be almost prohibitive to shippers as well as to producers (farmers). Our business is the buying of leaf tobacco direct from farmers and putting it in proper shape for export. Freight rates on leaf tobacco to Rotterdam, Holland, before outbreak of the war have been 30 cents per 100 pounds, and shortly thereafter the rate was raised to 45 cents; in November the same was advanced to 82 cents, beginning of December to $1.02, and now to $1.25 per 100 pounds. Rates to Liverpool are now quoted at $1 per 100 pounds, where we have been shipping before the war at about 25 cents per 100 pounds. Freight rates to Genoa, which is the port for shipments of leaf tobacco to Switzerland, have been about $5 to $6 a hogshead before the war, and have now advanced to about $25 a hogshead. We have been shipping some tobacco to Christiania, Norway, before the war at freight rates of about 40 cents per 100 pounds; during latter part of August we made a shipment at 65 cents per 100 pounds, and the same manufacturer now wants another lot shipped and we have not been able to secure a freight engagement so far, nor even a quotation at which this tobacco will be taken. Have just received quotation of $1.50 per 100 pounds.

There is a considerable scarcity of steamers flying the American or neutral flags, and unless more ships can be put at the disposal of shippers, causing a general reduction of ocean freight rates, which are now unreasonable, excessive, and almost prohibitive, the export business in this country is bound to suffer greatly.

Respectfully,

G. STALLING & Co.

EXHIBIT 61.

LYNCHBURG, VA., *December 31, 1914.*

SECRETARY OF COMMERCE,
Washington, D. C.

SIR: I am in receipt of your communication of the 30th instant and beg to thank you for interest you are taking in finding means of transportation to Europe at reasonable rates.

Shipments of leaf tobacco are usually made in small lots of 10 to 20 hogsheads and seldom exceeding 100 hogsheads, and therefore it would require a combination of a good many shippers to charter a steamer and to secure enough tobacco to fill same.

If there are any steamers open for charter in Boston, they are either held at prohibitive rates or are not in good seaworthy condition. There are such demands for steamer room that it would not take long to fill same. I have now some 75 hogsheads of leaf tobacco in Baltimore, for which place has been engaged for shipment to Rotterdam about a month ago, and, though three or four steamers have sailed since that time for that port, the steamship agents have not been able to forward my tobacco, nor have they even made promises

when they will forward same, saying that they have a good deal of merchandise for which space has been engaged in November and which has not been forwarded. I have 120 hogsheads leaf tobacco in Norfolk also for shipment to Rotterdam, which I have been holding since middle of November and which has not yet been shipped, though I have promises that at least part of the tobacco will go forward very shortly. I have also tobacco in New York, for which place has been engaged in November to be shipped to Genoa, Italy, and thence to Switzerland, and I have at last received a promise that same may go forward by steamer sailing next week.

I have a shipment for Christiania, Norway, and the earliest sailing that has been promised me from New York will be some time in February, at a rate of $1.50 per 100 pounds, which is about $24 to $25 a hogshead, against the usual rate of about $5 a hogshead.

Such delays in shipment of merchandise to Europe are certainly a very serious handicap, and the only remedy I know of is to secure more ships, but an individual small shipper can, of course, do very little in that respect, and he is completely at the mercy of the big foreign steamship companies.

Very respectfully,

G. STALLING,
Of G. STALLING & Co.

EXHIBIT 62.

[Millers' National Federation.]

CHICAGO, *December 29, 1914.*

HON. WILLIAM C. REDFIELD,
Secretary of Commerce, Washington, D. C.

DEAR SIR: We note that the Senate, in discussing the ship-purchase bill, on December 18 asked that the Secretary of Commerce and the Secretary of the Treasury lay before it all available information regarding increases in ocean freight rates which have occurred since July 1, as well as all facts within their knowledge which may adversely affect American commerce.

We trust that in submitting this information to the Senate the sharp increase in ocean rates on flour will be given attention. We are attaching hereto a tabulated statement of ocean freight rates on flour, published by International Mercantille Marine, from several American ports to London, Aberdeen, and Liverpool. You will note that from July 18 to December 19 the ocean freight rates from all named American ports to ports in United Kingdom advanced over 100 per cent.

With splendid prospects for a revival of export flour business at the beginning of the present crop year, the American miller was encouraged to believe that the export flour business would speedily be developed again to its former basis; throughout this crop year, however, he has been handicapped by the differential between ocean rates on wheat and flour, in favor of the former. Unfortunately no ocean freight rates for wheat are published, each shipment being booked as a separate transaction, and we are inclined to believe that these ocean freight rates on wheat are subject to negotiation between the shipper and steamship company in each case, whereas rates on flour are "firm."

The effects of the differential in ocean freight rates as between wheat and flour, in favor of the former, is reflected in the exports of wheat and flour from the United States for 11 months ending November, 1914, as published in Department of Commerce Bulletin No. 5, series 1914–15. You will note by reference to page 2 of this bulletin that exports of wheat from the United States for 11 months ending November, 1914, were 144,371,088 bushels, as compared with 93,636,251 bushels for the same period of 1913. The exports of flour from the United States for 11 months ending November, 1914, were 10,806,818 barrels, as compared with 11,137,275 barrels for the same period of 1913.

This indicates that with conditions abroad that warranted an unprecedented demand for prepared foodstuffs the increase in the exports of wheat was sufficient to produce more than 10,000,000 barrels of flour, while exports of flour declined 330,457 barrels during that period. Unfortunately for the American miller, much of the wheat thus exported—under a low ocean rate—is purchased by millers abroad, who are thus placed in position to use the same wheat used by American millers, grown in America, and successfully sell flour in competition with American millers, with results as indicated above.

Perhaps it is pertinent to the subject to point out to you that in thus changing the character of the foodstuffs exported from finished product, flour, to raw material, wheat, that not only is there lost to American workmen the labor to manufacture the wheat into flour, but the loss is also felt by the industries allied to the milling business, the sack manufacturers, thus reducing our domestic use of cotton; the manufacturers of milling machinery, as production is curtailed, etc.; a very important factor is the loss to the country of the feed resulting from milling this wheat, which, if retained in this country, would be an important factor in increasing the raising of cattle; the loss of fertilizer resulting from a decrease in the number of cattle raised should not be overlooked, the whole subject having a bearing on the cost of living in this country.

The sharp advances in ocean freight rates on flour have not been confined to the International Mercantile Marine, however; the Holland-American Line, controlling, as it does, the only available means of transportation to Holland, has increased its rates on flour to a point where it is interfering seriously with the ability of American millers to compete for business in Holland against British millers, who are grinding American wheat. We are indebted to one of our members for the following quotations on flour (per 100 pounds), quoted by Holland-American Line for shipment to Rotterdam, Holland, from Newport News, Va.:

	Rate per 100 pounds.
Oct. 10, 1914	$0.27
Oct. 24, 1914	.27
Oct. 31, 1914	.27
Nov. 7, 1914	.29
Nov. 14, 1914	.32
Nov. 21, 1914	.34
Nov. 28, 1914	.34
Dec. 5, 1914	.43
Dec. 8, 1914	.53
Dec. 12, 1914	.58

As you are aware, the Government of the Netherlands recently reserved to itself a practical monopoly in all foodstuffs. Since that time (in November) a sharp and unprecedented advance in ocean freights will be noted. Not only has this company declined to give millers option on ocean space at a quoted rate, when the miller has a bid from Holland, but has, in some instances, advanced the rate to the miller overnight; and the miller, having accepted business at the rate quoted the day before, is forced to take a loss, owing to this arbitrary attitude of the Holland-American Line, which, by the way, is contrary to all precedents, as a miller must have extended to him an option on ocean-freight room at a given quotation for a time sufficiently long to cable his foreign correspondent and get a reply.

Before the creation of a monopoly on foodstuffs by the Government of the Netherlands, however, the Holland-America Line declined to carry flour for which it had contracted—in some instances before the war—and millers were unable to get that company to move large shipments of flour which had been made by millers in good faith. The situation became so acute that a committee representing the Millers' National Federation, waited upon Acting Secretary of State Lansing on November 7 and presented to him our complaints. Subsequent to this interview we submitted to the State Department details of shipments aggregating 90,000 sacks of flour of 50 kilos (110 pounds) each, a large proportion of which had been at seaboard for weeks, and had been declined by Holland-America Line, although ocean freight room had been contracted for in regular form when sales were made. Thanks to the good offices of the State Department nearly all this flour has now been shipped, but we submit that we should not have been compelled to bring pressure to bear from the Government in order to have this company live up to its contracts with our members.

The quotations on ocean freight room given herewith can easily be confirmed by your department, and we respectfully suggest that you secure the ocean rates under which wheat was carried on or about the same dates on which rates on flour are given; we think a comparison of these rates on wheat and flour will suggest to you that they greatly favor the port millers of Great Britain and foreign millers generally, placing them in a position to render it almost impossible for the American miller to extend his export trade, much as he desires to do so. We feel like tendering an apology for this lengthy letter, but it was necessary to give you some idea of the difficulties under which the American miller is laboring in his laudable efforts to increase the export flour business of the United States. We sincerely trust that something may be done to put us on a competitive basis.

Very truly, yours,

A. P. HUSBAND, *Secretary.*

EXHIBIT 63.

[Henry Lauts & Co.]

BALTIMORE, MD., *December 29, 1914.*

Hon. WILLIAM C. REDFIELD,
Secretary of Commerce, Washington, D. C.

DEAR SIR: Having heard that an investigation is in progres at Washington over the shortage of ships to carry American products abroad and the excessive charges recently made by the steamship companies in forwarding such products to European ports we beg to inform you—

First. That the undersigned firm of Henry Lauts & Co. has a contract with the Holland-America Line for shipment of tobacco to Rotterdam and Amsterdam during the year 1914 at the following rates: Three dollars and fifty cents per hogshead for Maryland and Ohio tobacco, $5.06 per hogshead for tobacco stems, and 30 cents per 100 pounds for Kentucky and Virginia tobacco.

Since the outbreak of the European conflict now raging the line in question has raised its rates on three different occasions, and they are at present as follows: Seven dollars and fifty cents per hogshead for Maryland and Ohio tobacco, $15 per hogshead for tobacco stems, and $1.25 per 100 pounds for Kentucky and Virginia tobacco, although there is no clause in our contract justifying a change of rates on account of war and Holland is not at war.

The present rates charged by this line are almost prohibitive, and are a decided menace to the tobacco export industry of this country.

Second. That under our contract this company obligates itself to provide at least two steamers per month sailing from this port, which has not been done. During the current month we have only been able to ship 150 hogsheads of tobacco, whilst we have over 1,177 hogsheads awaiting shipment. By this great lack of facilities for shipping tobacco we are naturally subjected to serious inconvenience and loss.

If any relief to this unfortunate situation with reference to American shipping interests can be afforded by the Government, it will be greatly appreciated.

We have the honor to be, very respectfully, yours,

HENRY LAUTS & Co.

EXHIBIT 64.

[W. T. Selbels & Co., fruits and produce.]

NEW YORK, *January 14, 1915.*

SECRETARY OF DEPARTMENT OF COMMERCE AND LABOR,
Washington, D. C.

DEAR SIR: Regarding excessive through rate on barreled apples from New York to London via Liverpool on White Star Line:

On December 30 we forwarded by White Star liner *Adriatic* 400 barrels of apples to Messrs. Ridley, Houlding & Co., London, upon quotation of rate furnished by Lunham & Moore, ship brokers, Produce Ex-

change Building, New York, which quotation was 3s. 6d. per barrel to Liverpool. We and they both assumed that the customary land charge of about 2s. per barrel from Liverpool to London would be added to make up the through rate, and Lunham & Moore are positive that no intimation had been given them theretofore that the through rate would be figured on any other basis.

However, when shipment arrived in London a few days ago I received cablegram from Ridley, Houlding & Co. advising that the White Star Line had charged 8s. 5d. per barrel, being 2s. 11d., which is practically 75 cents per barrel, more than the amount should be.

Upon taking this matter up with Mr. Ryan, of the White Star Line here, their only excuse given for making this advanced rate is that they do not want to handle London business via Liverpool, and they refused to adjust it. Yet there would have been no question about billing these apples to Liverpool on the rate of 3s. 6d. per barrel, and then rebilling to London on the ordinary railroad rate. As a matter of fact, there were something over 50 barrels of the same mark of apples in the same shipment on the *Adriatic* which were sent as a sample under separate billing to a firm in Liverpool and which lot was forwarded at the rate of 3s. 6d. without question.

I am writing to you in the hope you may be able to offer some suggestion how we may secure redress against this high-handed practice and get the rate adjusted without having to go into court. These steamship lines seem to be a law unto themselves, and have taken advantage of nearly every opportunity brought about by reason of the European war to subject those handling export trade to all kinds of trouble and inconvenience.

While the amount involved in this transaction is only about $300, it will be a real hardship upon the writer to shoulder the loss involved by reason of the arbitrary, unreasonable through rate on this shipment, and in view of the fact that no notice or intimation had been given beforehand it would seem that some way ought to be open to force the White Star Line to bring their through rate in line with the sum of the ocean rate plus the land rate as above referred to.

For your information, will say that the reason shipment in question was billed via Liverpool was simply because we could get no space whatever on Atlantic Transport Line, running to London direct, during the week shipment in question was made. Shipment was billed order notify, bill of lading being handled through a New York bank. The writer did not examine the bill of lading to see what rate was specified, for it was not issued until nearly time for the steamer to sail and had to be rushed to get in the mail.

It is not our purpose to burden you with personal grievances, but the writer believes a transaction of this kind possesses elements which must commend itself to your consideration, and he hopes you may be able to offer some suggestion, not alone for our relief but to save other exporters from suffering by reason of such practice at the hands of these steamship people.

Awaiting a reply at your earliest convenience, and assuring you we shall be under lasting obligations for any suggestions or assistance you may be able to give, we are.

Yours, very truly,

W. T. SEIBELS & Co.,
By W. T. S.

EXHIBIT 65.

[W. T. Seibels & Co., fruits and produce.]

NEW YORK, *January 15, 1914.*

SECRETARY OF DEPARTMENT OF COMMERCE AND LABOR,
Washington, D. C.

DEAR SIR: Referring further to excessive through rate on barreled apples from New York to London via Liverpool on White Star Line:

When writing you under date of January 14 we neglected to state that the through rate on apples to London direct on Atlantic Transport boats figures out 4s. 6d. per barrel; that is, the rate has been 4s. 6d. up until now. But we have just received advice that beginning February 1 Atlantic Transport Line is advancing their rates so that apples, ordinary, will pay 6s. per barrel. As a matter of fact, this line is endeavoring to exclude fruit shipments entirely, and it would seem that unless some efforts are made shortly we will be practically without shipping facilities for exporting fruit, except under rates that are absolutely prohibitory.

Yours, very truly,

W. T. SEIBELS & Co.,
By W. T. S.

EXHIBIT 66.

[Estate of Victor Holmes, deceased, exporter of zinc oxide.]

BOSTON, MASS., *December 28, 1914.*

SECRETARY DEPARTMENT OF COMMERCE AND LABOR,
Washington, D. C.

DEAR SIR: I have noticed in public prints that the Treasury Department has issued a statement asking all shippers who have been affected by high freight rates and scarcity of vessels to communicate with your department.

For the last 20 years Victor Holmes, and since his death his estate, has been engaged in the exportation of American zinc oxide to the Scandinavian countries.

Since the European war situation developed this business has been very considerably hampered by a number of conditions, among them the scarcity of freight vessels, exceedingly high rates of exchange, and, what is more important, the freight outlook for 1915.

In the year 1912 we were paying Funk-Edye & Co., freight agents for the Scandinavian-American Line, 17s. 6d. and 5 per cent primage for a long ton. During 1913 and 1914 this rate was increased to 21s. 3d. and 5 per cent, which is an extremely high rate for a commodity.

In view of the scarcity of vessels, we were obliged to stand this increase, and our freight brokers have been notified by Funk-Edye & Co. that the price for 1915 will be 50s. and 5 per cent, which rate of freight will entirely kill the business.

There is no competing line for this business to Copenhagen, to which point all of our shipments are made.

Since the outbreak of the war, however, several Danish shipping concerns have been sending steamers to New York and other American ports to take goods to Copenhagen. These have been more in the nature of charters, however, than catering for general cargo, and we have not been able to derive any benefit therefrom.

Funk-Edye & Co. have not refused to take any goods at our contract price of 21s. 3d. for this year, but we can cite one instance to you of where they have refused to accept contract goods and taken non-contract goods from us at higher rates.

On September 19 we asked for a shipment of zinc oxide to be made on September 23, or on the first sailing, which would have been either October 8 or 15. We were advised that these ships were full, but they would book the shipment for a chartered steamer, the *Bra Kar*, which was scheduled to sail about October 10. This steamer left October 22.

On September 24 we had an order for some dry white lead upon which we had no freight contract, and asked that it be carried on our regular zinc oxide contract, as it is less bulky, packed in larger packages and also stronger packages. We were told this could not be done, but that they would ship on October 15 or on one of the regular steamers at a price of 28s. 9d. plus 5 per cent primage, which was done.

From the above you will see we were able to get a later shipment made on an earlier steamer by paying a higher rate on a commodity which should have taken a lower rate.

I trust these facts will be of some service to you in your investigation.

Very truly, yours,

ESTATE OF VICTOR HOLMES.
By V. F. HOLMES, *Executor.*

EXHIBIT 67.

[Estate of Victor Holmes, deceased, exporter of zinc oxide.]

BOSTON, MASS., *January 6, 1915.*

Hon. WILLIAM C. REDFIELD,
Secretary Department of Commerce, Washington, D. C.

DEAR SIR: In further reference to my letter to you of December 28, and your reply of the 29th, would advise that I have just had occasion to get a freight-rate quotation on Copenhagen, and we are advised that Funk-Edye & Co. are asking $1 per 100 pounds on dry white lead to Copenhagen.

This is equivalent to $22.40 per ton, and with the ordinary rate of between $3.75 and $4.50, you will readily appreciate the absurdity of it.

Such a rate is, of course, entirely prohibitive, and we are unable to supply our Copenhagen customers on this account.

Very truly, yours,

ESTATE OF VICTOR HOLMES, DECEASED.
By V. F. HOLMES, *Executor.*

EXHIBIT 68.

[Farmers & Spinners' Cotton Co., cotton.]

CHARLESTON, S. C., *December 11, 1914.*

E. E. PROTT, Esq.,
Chief of Bureau, Washington, D. C.

DEAR SIR: Your circular of the 5th has been handed to us in regard to shipments to Germany and asking us to state the nature of difficulties. The great difficulty in combining business, even with shipments to Gottenborg and Amsterdam, is the enormous increase in the freight rates demanded by the steamship lines. We consider this advance out of all reason and actually in restraint of trade. Within the last 10 days freights have more than doubled themselves, and where we formerly paid 85 cents per 100 the steamship lines are now demanding $2 to $2.50 for 100 pounds.

We think some attention should be given this matter, as it is seriously hampering the export of cotton.

Yours, truly,

FARMERS & SPINNERS' COTTON CO.,
CHAS. F. MIDDLETON, *President.*

EXHIBIT 69.

[Florida Power Co.]

OCALA, FLA., *January 9, 1915.*

Hon. WILLIAM C. REDFIELD,
Secretary of Commerce, Washington, D. C.

DEAR SIR: I wish to place on file with you the name of Camp Phosphate Co., of Ocala, Fla. This company is very desirous of shipping phosphate to Rotterdam, Holland, as soon as they can secure ships for this purpose. The Camp Phosphate Co. has on hand a large tonnage of phosphate and also contracts. Our buyers are very anxious to get this phosphate, but on account of the high ocean freight rates we have not been able to get a ship up to date.

I take pleasure in referring you to my personal friend Hon. DUNCAN U. FLETCHER, United States Senator.

Yours, very truly,

R. C. CAMP.

EXHIBIT 70.

[G. Amsinck & Co., New York.]

NEW YORK, *January 5, 1915.*

Mr. CHARLES FERGUSON,
15 Grammercy Park, New York City.

DEAR MR. FERGUSON: In pursuance of your request made to me verbally yesterday, I am very glad to give you in writing the opinions expressed to you during our interview.

I think it is of the utmost importance that the United States should acquire at the present time steamers for our trade with the neutral countries. While I am not on principle in favor of Government-owned steamship lines, I believe in the present crisis only the Government is able to acquire a sufficient amount of steamers without much difficulty, and I see no reason why, after reestablishment of peace, the Government should not resell these steamers to American companies.

I shall take up first the South American field, because I believe it is to the greatest interest of this country to make use of this opportunity to secure as much of that trade as possible. There is a lack of freight room both to and from South America. The German steamers have naturally been withdrawn and the English steamers are being avoided as much as possible, both by shippers in South America as well as here, because their sailings are irregular, the higher rate of insurance, and because there is a feeling of uncertainty that all, or some of them, may be withdrawn at any time from the trade. There are not sufficient neutral steamers in the trade, in spite of the high rates of freight, to take the cargo from this country and bring it here, and we have constant complaints on that score from our customers in South America.

Of course it will be desirable, as pointed out by you, to acquire an entire going steamship line, with its perfect organization, but I do not consider this absolutely necessary as long as competent managers who have an experience in that trade are obtained for that line, and who

could, no doubt, at present engage sufficient experienced help to fill out their office and outside staff, while there is, as far as I know, no difficulty in obtaining competent agents in all the ports of South America, who would obtain cargo and give good advice on the subject of the line in their special territory.

A start should be made on a line running to Pernambuco, Rio, and Santos, in Brazil, and to the Argentine Republic. For the present only cargo boats could probably be obtained, and such should be acquired wherever possible. If the English are unwilling to sell their boats, as I understand, the United States should buy them wherever they can, and, if necessary, acquire German boats, even if there is English opposition, as long as the English are not willing to furnish the boats themselves, because it is absolutely essential, in my opinion, to make a start now. Later on it will be desirable to have a passenger and mail line from here to Rio and Buenos Aires, which could be profitably combined with the cargo of frozen meat from the River Plata, as this is a trade which is of vital importance to the United States, and will develop more and more; but such boats can not readily be acquired by purchase, but should be built.

I see no great urgent necessity of establishing a Government line to the West Indies, Venezuela, Colombia, and Central America, as sufficient American and neutral steamers are running there at present to fill the most urgent need.

There also seems to be no urgent need for an American line on the west coast of South America at present, since for cargo the merchant line is now under the American flag, and mails are carried by the Peruvian and Chilean steamships from Panama, both of which are under neutral flags.

A line to Italy does not seem necessary, as the Italian Government has sufficient steamers, if only the United States Government will stand together with the Italian to protect these steamers from constant and in many cases unnecessary interference and delay.

For Denmark, Norway, and Holland there is at present also not sufficient freight open, but there should be enough steamers of those countries—which have fleets of their own—to insure a sufficient traffic, if the United States will assist those countries also in maintaining a service which is not unnecessarily hampered and interfered with by the warring nations, as is done at present, where a great many commercial transactions for supplying those neutral countries with their requirements, and which are in no way affected by any articles of contraband of war or supplies for the fighting nations, are hampered and stopped.

Conditions in South America are rapidly improving, and with few exceptions merchants are paying regularly their bills to exporters from this country, according to our experience. It is, therefore, a splendid opportunity for the United States to obtain, during the disturbed conditions in Europe, a considerably larger share of the South American trade; but this can only be done by the immediate acquisition of at least 8 or 10 steamers to be put under the American flag.

Should you wish any further information I shall be glad to give it to you, and remain, dear Mr. Ferguson,

Yours, very sincerely,

JUSTUS RUPERTI.

EXHIBIT 71.

NEW YORK, *January 9, 1915.*

MR. S. C. MEAD,
Secretary Merchants' Association of New York,
Woolworth Building, New York City.

MY DEAR MR. MEAD: I have been requested by the traffic department to write to you on the subject of a report by the chamber of commerce in regard to a bill for acquiring steamers for the American Government now pending before Congress.

According to the report in the papers, the chamber of commerce finds that there is no lack of steamship facilities to South America. If the newspaper reports are correct, they arrive at this surprising result by consulting the steamship agents in New York City. It seems to me very queer to ask the steamship agents here if they would be anxious to have a new competing line, which might reduce freight rates. Wouldn't it be natural for any sensible person, making such an investigation, to consult the exporters and importers in New York, who would be the ones to benefit from any improvement in the shipping facilities? I have consulted, by telephone, with a number of large exporters and importers yesterday morning, and find that none of them have been consulted, and they seem to be just as indignant about the report as I am.

I inclose you copy of a letter which I have written at the request of a representative of the Department of Commerce and Labor, who came to see me, and, in addition, I wish to state that, without consulting anybody, the chamber of commerce could easily have found out that the tremendous advance of freight rates to Brazil and the Argentine Republic shows unquestionably a lack of freight room, because anybody is aware that the freight rates are governed by the rule of supply and demand. Anybody familiar with shipping will know that the withdrawal of the German tonnage all over the world, as well as the commandeering of a large amount of English tonnage by the British Government, has created a shortage all over the world.

But in regard to the American situation the position is rather curious, as I will explain to you herewith:

All shipments to Central America and Colombia are made by the United Fruit Co. or the Panama Railway Co., which are both now under the American flag, and since the outbreak of the war freights have not been advanced by these lines

The shipments to Venezuela are made by the Red D Line, also running under the American flag, and these rates have also not been advanced.

Shipments to the west coast of South and Central America are made from Panama by the Pacific Mail and the Peruvian and Chilean lines, also from here direct through the Panama Canal by the Merchants' Line under the American flag. On all these routes the freight rates have not been advanced.

To Santo Domingo, the Clyde Line, under the American flag, has also not advanced its freight rates, while the Dutch line, running to Haiti, Venezuela, and Surinam, advanced its freight rates at the beginning of the war 50 per cent, but finding that the American lines had made no advance, reduced it again to 25 per cent above the rates before the war.

In great contrast to these are the freight rates to Brazil and the River Plate, where there is only one American line running, which forms only a very small percentage of the steamers running to these countries, and this line is under the control of the United States Steel Corporation.

Freight rates to the Argentine Republic have advanced as follows: Turpentine was 25 cents case net, now 30 cents plus 25 per cent surtax; kerosene was 17 cents case net, now 21 cents case net; white pine was $10.50 per 1,000 feet net, now $12 plus 25 per cent per 1,000 feet; all other rates 25 per cent surtax.

And for lumber cargoes, which form one of the principal exports from this country to the Argentine Republic, the freight has advanced over 100 per cent. For instance, for pitch pine, steamers from the Gulf to the River Plate, would have been a few months ago 100s., while at present 225s. has been refused by the steamers.

We have received repeated complaints from our customers that they were unable to ship the freight contracted for in Brazil for this country on account of lack of space. I have no doubt that shippers on both sides avoid the English steamers as much as possible for fear of their withdrawal from the market.

I inclose a statement showing the advance of the rates in the trade to Brazil on different articles from June, 1914, to the present date.

Perhaps all these informations will interest you sufficiently to take up the matter with the different exporters and importers and present a report which differs from the one of the chamber of commerce and which may be of some interest to the Government in Washington.

Thanking you for your attention to this matter, I remain, dear Mr. Mead,

Yours, very truly,

JUSTUS RUPERT.

THOMSEN & CO.,
New York, January 11, 1915.

MR. CHARLES FERGUSON,
Commercial Agent, Department of Commerce,
15 Gramercy Park, New York, N. Y.

DEAR SIR: Referring to our interview of last week, I gladly avail myself of the opportunity to express to you in writing my opinion in regard to the condition of our present shipping facilities, particularly to the east coast of South America. The business which has been diverted to this country in consequence of the European war is of such magnitude, or rather the opportunities offered are so far-reaching, that extraordinary measures should be taken at once to supply the necessary tonnage in order to develop a trade which may be of lasting benefit to our country. With the elimination of the German lines during the continuance of the war and the irregular sailings of the English steamers the export trade is greatly hampered, and I believe that under present abnormal conditions only energetic measures can be of any assistance. Although I do not indorse a permanent policy of ownership by the Government, I do believe that during the present critical situation only the Government can assist the development of the business by purchasing steamers suitable for the trade. With quick action the present difficulties can be overcome, as only increased freight room in neutral steamers is needed to increase the business, as shipments are now delayed from four to six weeks in consequence of the scarcity of freight room. A further advantage would be gained by the fact that shippers would be able to ship by American steamers, which being neutral would not be apt to be withdrawn or postponed and insure at lower war premiums than the English boats. Neutral freight room is exceedingly scarce in spite of the very high rates of freight both ways—from and to South America—and the irregular and insufficient service of the existing lines does a great deal of harm to the development of a new outlet of American goods.

I believe there are enough idle steamers at present which the Government could buy, put them under the American flag, and start at the shortest possible time a service which the exporters need so badly. We have a number of able shipping men in New York who are conversant with the South American trade, and under their advice and management a service could be inaugurated within a short period which would certainly be of immense benefit to the future of our export trade. I am not speaking of a steamer service to carry passengers, but solely to carry cargo; and there is no doubt in my mind that it would be easy to buy a sufficient number of suitable boats for that purpose and start with a line for the principal ports, say, Pernambuco, Rio, Santos,

Montevideo, and Buenos Aires. The west coast is fairly well covered by steamers under the American flag, and some neutral steamers.

Shipping conditions to Europe are, of course, unsatisfactory, on account of England's interference with the free movement of all neutral steamers, and the consequent delay of these boats in English ports has created a shortage of tonnage, which led to a considerable increase in the freight rates. Under ordinary conditions and after peace has been reestablished there are enough steamers to take care of the needs of commerce between here and Europe, but the growing trade to and from Brazil and the River Plate demands better facilities, and I hope that the Government will embrace the present opportunity and help the merchants now to increase the South American trade, a large part of which would surely remain with us after the war, provided sufficient shipping facilities are offered.

I remain, dear sir,

Yours, very truly, H. J. RIEDEL.

DEPARTMENT OF COMMERCE AND LABOR,
Washington, January 2, 1915.

BOSTON MARITIME ASSOCIATION,
156 State Street, Boston, Mass.:

If any insurable American vessel available for charter carrying cotton Germany or Austria communicate Texas-Oklahoma Cotton Co., Fort Worth, Tex., immediately. These parties state unable to secure insurable American bottom.

WILLIAM C. REDFIELD,
Secretary of Commerce.

EXHIBIT 73A.

JANUARY 2, 1915.

MY DEAR SIR: Your favor of the 31st ultimo is received.

Is it not the fact that the *Malden, Melrose,* and the *Everett* are colliers, taking coal from Norfolk to Boston? On what terms and how soon are they ready for charter for the foreign trade, and is insurance available for them in that trade to northern European points during the winter?

Is it not the fact that the *Peter H. Crowell* and the *Lewis K. Thurlow* have charters to carry lumber from the Pacific coast through the Panama Canal to the Atlantic coast? If so, when do these charters expire?

Is it not the fact that the *Middlesex, Suffolk, Hampden, Transportation, Coastwise,* and *Norfolk* are colliers for the coastwise trade? Are they running in that trade now? If not, on what terms are they open for charter, and is insurance available for them to northern European ports at this season?

Where are the steamships *F. J. Lisman, M. E. Harper, Seaconnet,* and *Penobscot* now, and on what terms are they available?

I have before me both letters and telegrams of the most urgent character, from which I quote this: "No insurable American bottom procurable for transporting cotton." And another: "Find it impossible to charter American steamer acceptable to marine underwriters. Can be big business, provided ships available."

If the vessels you mention are available for charter, as you say, how is it they are not taken at a time when anxious shippers are searching everywhere for bottoms?

Kindly let your letter be as detailed as practicable.

I have wired you to-day, as per inclosed copy. Please advise me the reply you make to the Texas-Oklahoma Cotton Co.

Yours, very truly,

(Signed) WILLIAM C. REDFIELD, *Secretary.*

MR. R. R. FREEMAN,
Corresponding Secretary Boston Maritime Association,
156 State Street, Boston.

EXHIBIT 73B.

[Boston Maritime Association.]

BOSTON, MASS., *January 4, 1915.*

Hon. WILLIAM C. REDFIELD,
Secretary Department of Commerce, Washington, D. C.

DEAR SIR: Your telegram and letter of the 2d instant duly received. The following is the present disposition of steamers named in our list of December 9: *George Hawley,* left Falmouth Saturday for Copenhagen after detention of over a month; *Edison Light,* was at Shields, England, 31st, being bound from New York to Gothenberg with cotton; *L. V. Stoddard,* left New York 3d for North Sea port with cotton; *George E. Warren,* at Portland, goes to New York to load for Rotterdam; *Edward Pierce,* at Gothenberg or Copenhagen, with general cargoes from New York.

These steamers will probably go abroad again on their return. The *Peter H. Crowell* and *Lewis K. Thurlow* are under charter for Pacific trade, via Panama Canal, and charterers have option of about nine months more charter. The owners of last three steamers named have already contracted for a new 7,000-ton boat to be delivered in 10 months. The *Malden, Melrose, Newton,* and *Everett,* owned by the New England Coal & Coke Co., are used by them in supplying their coal trade. They have been open for charter from northern port to Europe, but so far owners have been unable to obtain conditions that would warrant them sending them to North Sea ports. The *Pacific* and *Atlantic* are still on the Pacific route, and I understand are in market for sale. The *Amalco* has been recently tanked and now engaged in oil trade. The *Middlesex, Suffolk, Hampden, Transportation,* and *Coastwise* are still running in the coal trade, but open for charter when conditions warrant. The *Lisman, Penobscot, Seaconnet,* and *M. E. Harper* are running coal under charters running for short periods.

None of the owners would consider sending their vessels to Gulf to load with nearly equivalent rates quoted from New York. The American iron ship *Vincent* was, I understand, sold to cotton people Saturday.

The insurance on all of the above steamers is largely placed in British and German companies, and for ports between Eastport and Rio, to go abroad, requires arrangements made to cover extra risk, and in nearly every case inquired into large amounts have been canceled, calling for placing of risks canceled in new companies and extra premiums. To obtain new insurance to cover steamer has been almost impossible, while extra premium and war risk becomes almost prohibitive. This in one steamer now in Europe amounted to $25,000, and she went to a neutral port in North Sea. On seven of the steamers quoted in our list the extra premium and war risk on hull alone amounts to about $40,000 per ship if bound to a German port. One of our largest shipping concerns have had their representative in England for a month with orders to buy a steamer. He can find none ready and could contract for none earlier than 1916 delivery.

I am sending the following telegram to-day to the Texas-Oklahoma Cotton Co., Fort Worth, Tex.:

"No Boston steamers offering Texas loading. Would you purchase new American steamer now due here, about 15,000-bale capacity, $600,000?

Yours, very truly, R. R. FREEMAN,
Corresponding Secretary.

BOSTON, MASS., *January 5, 1915.*

Hon. WILLIAM C. REDFIELD,
Secretary Department of Commerce, Washington, D. C.

DEAR SIR: The Texas-Oklahoma Cotton Co., by wire, advise that they could not consider a steamer of size named them, requiring smaller tonnage, insurance available being limited.

Since writing you yesterday one of the large steamers named in my memoranda has been closed for Europe from New York, and others are considering charter there.

Yours, truly, R. R. FREEMAN,
Corresponding Secretary.

EXHIBIT 74.

[Rumsey & Co. (Ltd.), Seneca Falls Pump & Fire Engine Works.]

SENECA FALLS, N. Y., *January 8, 1915.*

The DEPARTMENT OF COMMERCE AND LABOR,
Bureau of Foreign and Domestic Commerce,
Washington, D. C.

GENTLEMEN: It seems to us a shame that while a great many public-spirited concerns are doing their utmost to put our country ahead of the individual and to do all they can to help our country to get in strong commercially during this juncture, that some of the steamship companies should be taking exactly the opposite course and exacting the utmost that they can get in the way of rates, regardless of the effect that it has upon the future of the country. A comparison of freight rates prevailing before the war and those which are being asked at present shows many instances where the present rate is over twice what was previously asked, and the vessels leaving with all they can possibly carry. If we or any other manufacturer get in touch with a merchant, we will say, in Italy, who has been buying German goods, and he is now half inclined to buy the same goods from the United States, how great an obstacle steamship companies throw in the way of our inducing them to make the change, by their exorbitant rates. Can't the steamship companies be made to look at this matter in a broader way and do their part to help the country to win new customers and new markets instead of striving to exact the utmost toll simply because they have got for the moment the strangle hold?

Yours, very truly, RUMSEY & CO. (LTD.),
Per HAMILTON GAINNY.

BERNARD N. BAKER,
Baltimore, Md., U. S. A.

EXHIBIT 75C.

LONDON, *December 23, 1914.*

B. N. BAKER, Esq.,
Baltimore, Md., U. S. A.

DEAR BERNARD: I confirm cable sent to-night, offering you the three boats, particulars of which I mailed you yesterday.

As stated in my letter yesterday, all available tonnage is in great demand here at present, and up to this evening I have been unable to get anything else to offer. At the same time, I shall continue my search.

I included in my cable an inquiry as to whether five 8,000-ton, 10-knot boats would interest you.

I know of five boats of these dimensions, which are being built for one company.

The first one is just completing, and they say all five of them will be completed within six months.

The builders inform me that they think they could get the owners to sell them for £75,000 each, and it occurred to me that possibly five sister boats, though they were 2,000 tons below the capacity you want, might be attractive to you, and I await your reply before further considering them.

Unfortunately, I learn that the steamer *Andreas* has already left New York, returning from her maiden voyage. She belongs to a Greek, who is simply willing to sell her for cash at something more than he paid for her. She, of course, is a new steamer, completed in November.

I was very much in hopes you could see her while she was in New York, but the owner has just informed me that she has left New York. She could be delivered on this side, however, in February, or possibly sooner, if she has finished discharging.

If you must have 10,000 tonners, she strikes me as being a suitable boat. She was built by Doxford & Sons, of Sunderland.

The two steamers which I offer you built at St. Nazaire ought to be attractive to you. They are not dear at £90,000.

The first one is about ready for delivery, and has been named *Ohio.* Her sister ship, they say, will be ready in about six or eight months.

There were three contracted for before the war. The contractor has failed, and the builder is offering them at a slight profit over the contract price.

The builders, Chantiers & Atteliers, are reputable people.

I hope in your letter you will give me some definite information as to what the ships are wanted for.

If they wanted to run from New York to Frisco, I think the Government here could easily be induced to allow them to go under the American flag. While if they are intended for regular tramp business, and possibly to carry cargo to belligerent countries, they might possibly place some difficulties in the way of the builders exporting them to a neutral country. At the same time I believe this difficulty might be overcome.

The possibility of this difficulty, of course, would not arise with either the French or the Greek boats.

I believe I can offer you any available boats to be had, and sincerely hope we may be able to do some business.

Of course, when it comes to final business, all of these prices might be subject to counter offers.

Owing to the condition of the market, however, owners will not make firm offers until they are satisfied it means business.

Yours, sincerely,

THOMAS L. FEILD.

EXHIBIT 76.

STEAMERS FOR SALE BY MERCHANT MARINE AGENCY, 1123 OLD SOUTH BUILDING, BOSTON, MASS., J. V. M'CARTHY, MANAGER.

[We can not make the prices or offers of the steamers as firm offers; they are subject only to being still available on receipt of your reply. We will not be responsible for errors in description.]

No. 1.—8,880 tons dead-weight, including bunkers, on 26½ feet draft. Built 1912 of steel, 100 A1 Lloyd's; dimensions, 412 by 52 by 30½ feet; molded, cubic capacity, 535,000 cubic feet; 11¼ knots on a moderate consumption; triple engines, cylinders 28 inches, 46½ inches, 78 inches, by 54-inch stroke; 3 boilers, 200 pounds working pressure; water ballast in cellular bottom, peaks, and deep tank; 6 hatches; 11 winches; steam steering gear; 'tween decks, 9 feet high; bronze propeller; electric light; two decks laid, with complete shelter deck above same. Accommodations for a few first-class passengers. Bilge keels 170 feet amidships; Crompton's ash hoist; ventilators to each hold. Gross register, 4,863; net register, 3,109. Price, $420,000.

No. 2.—7,800 tons dead-weight, including bunkers, on 23½ feet draft. Built 1913 of steel, 100 A1 Lloyd's; dimensions, 390 by 50.6 by 30.4 feet; molded, large cubic capacity; 10½ knots on 31 tons' consumption; triple engines, cylinders 26 inches, 43 inches, 71 inches, by 48-inch stroke; 3 boilers, 180 pounds' working pressure; water ballast in cellular bottom and peaks; 6 hatches; 10 winches; steam steering gear; 'tween decks, 8¾ feet high; powerful derricks; very complete specifications; 4 ventilators to each hold; telescopic topmasts, and special ventilators for perishable cargoes; two decks laid, with poop, bridge, and forecastle. Accommodations for a few first-class passengers. Gross register, 4,814; net register, 3,021. Price, $390,000.

No. 3.—7,300 tons dead-weight, including bunkers, on 23 feet draft. Built 1913 of steel, British corporation; dimensions 376 by 52 by 28 feet; molded, large cubic capacity; 10½ knots on 26 tons' consumption; triple engines, cylinders 25 inches, 41 inches, 68 inches, by 48-inch stroke; 3 boilers, 180 pounds' working pressure; water ballast in cellular bottom, peaks, and deep tank; 6 hatches; 10 winches; steam steering gear; shafting in excess of Lloyd's; exceptionally full specifications; 'tween decks, 8 feet high; powerful derricks; bronze propeller, electric lights, clear holds, deep bulb angle frames; two decks laid, with poop, bridge, and topgallant forecastle. Gross register, 4,411; net register, 2,834. Price, $350,000.

Above boats are under British registry.

No. 4 (withdrawn).—8,200 tons deadweight, including bunkers, on 24.6 feet draft. Built, 1914, of steel; 100 A1 Lloyd's; dimensions, 400 by 52 by 30 feet; molded; cubic capacity, 440,839 cubic feet; 10½ knots on a moderate consumption; triple engines; cylinders, 26 inches, 42 inches, 70 inches by 48-inch stroke; 3 boilers, 180 pounds working pressure; water ballast; 1,222 t.; 5 hatches; 10 winches; 2 decks; steam heating amidship; ice room; steam ash hoist; winch condenser. Gross register, 4,985; net register, 3,144. Price, $342,500.

No. 5.—8,700 tons deadweight, including bunkers, on 26.8 feet draft. Built, 1912, of steel; 100 A1 Lloyd's; dimensions, 423.6 by 52 by 30.6 feet; molded; cubic capacity, 535,090 cubic feet; 12½ knots on a moderate consumption; triple engines; cylinders, 28 inches, 46½ inches, 78 inches by 54-inch stroke; 3 boilers, 200 pounds working pressure; water ballast in cellular bottom, peaks, and deep tank; 6 hatches; 10 winches; steam steering gear; 'tween decks, 10.1 feet high; bronze propeller; electric light; three decks laid; shelter deck. Telescopic topmast. Net register, 3,095. Price, $350,000.

No. 6 (two steamers, duplicates).—9,000 tons deadweight, including bunkers, on 24.11 feet draft. Built, 1912, of steel; 100 A1 Lloyd's; dimensions, 420.2 by 54 by 28.5 feet; molded; 531,630 cubic feet capacity; grain; 10½ knots on a moderate consumption; triple engines; cylinders, 26 inches, 43 inches, 70 inches by 48-inch stroke; 2 double-end boilers, 180 pounds working pressure; water ballast 2,397 t. in cellular bottom, peaks, and deep tank; 5 hatches; 10 steam winches; 'tween decks, 8 feet beam; bronze propeller; wireless; 1 derrick for 3 t.; 10 derricks; 7-inch gun-metal liner on shaft; nautical draft-plate keel; 3 decks laid; shelter deck 8 feet high; steam steering gear. Two staterooms for 4 or 6 passengers. Net register, 3,173. Price, $375,000.

No. 7.—11,780 tons deadweight, including bunkers, on 28.3 feet draft. Built, 1913, of steel; 100 A1 Lloyd's; dimensions, 470.4 by 58 by 34.10 feet; molded; cubic capacity, 645,000 cubic-feet bales; 12 knots on a moderate consumption; triple engines, amidship; cylinders, 26½ inches, 45 inches, 75 inches by 48-inch stroke; 2 boilers, D. E. tubular, 200 pounds working pressure; water ballast in cellular bottom 2,939 t., also in peaks and tanks; 6 hatches; 12 steam winches; steam steering gear; two decks laid; coefficient '75 nautical draft; side lights on poop, bridge, forecastle, and 'tweens; 14 derricks, those on main deck for 10 t., on bridge for 7 t.; electric light; wireless. Net register, 4,625 t. Price, $625,000.

Above steamers are under British registry.

No. 8.—10,570 tons dead-weight, including bunkers, on 26.9 feet draft. Built, 1903, of steel; 100 A1 Lloyd's special survey No. 2, 1911; dimensions, 455.8 by 55.2 by 33.10 feet; molded, cubic capacity, 605,045 feet; 10½ knots on 38/40 tons consumption; triple engines amidship; cylinders, 27 inches, 46 inches, 76 inches by 51-inch stroke; three boilers, S. E. tubular, 200 pounds working pressure, water ballast, 3,896 t. in cellular bottom; peaks and deep tank; 6 hatches; 11 steam winches; and 16 derricks; steam steering gear; electric light and wireless; two decks laid. Net register, 4,286. Price, $450,000.

No. 9.—8,200 tons dead-weight, including bunkers; 25.4½ feet draft. Built, 1913, of steel; dimensions, 380 by 53 by 28.6 feet; molded, cubic capacity 490,927 grain, 453,791 cubic feet bale; 10½ knots on 30 tons consumption; triple engines amidship; cylinders, 26 inches, 42 inches, 70 inches by 48-inch stroke; two S. E. and one auxiliary S. E. boilers, 180 pounds working pressure; water ballast; 1,297 t. in C. D. B. and peaks; 6 hatches; 10 steam winches; and steam steering gear; two decks laid, one of which is steel; shelter deck, part steel and part iron; plate keel; electric light; two main boilers; forced draft; side lights in poop; built propeller, with manganese-bronze blades; spare blades; 25 t. evaporator. Net register, 2,778. Price, $380,000.

No. 10.—8,000 tons dead-weight, including bunkers, on 24.6 feet draft. Now building; will be ready for delivery in February or March, 1915; of steel; dimensions, 401 by 52.1 by 30 feet; molded; triple engines; cylinders, 27 inches, 44 inches, 75 inches by 48-inch stroke; surface condenser; 10 to 11 knots. Price, $370,000.

No. 11 (withdrawn).—8,575 tons dead-weight, including bunkers, on 24.10 feet draft. Built, 1914, of steel; 100 A1 Lloyd's; dimensions, 385.6 by 53.6 by 36 feet to shelter; cubic capacity, 503,520 cubic feet; 9½ knots, loaded, on 25 tons consumption; triple engines amidship; cylinders, 25 inches, 42 inches, 68 inches by 48-inch stroke; three boilers, S. E. tubular, 180 pounds working pressure; 5 hatches; 10 steam winches; steam steering gear; steam windlass; two decks laid, one of steel, one of iron; shelter deck. Net register, 2,895. Price, $320,000.

No. 12.—10,320 tons dead-weight, including bunkers, on 26 feet draft. Built, 1914, of steel; class, British corporation; dimensions, 425 by 55.5 by 30 feet; molded; two decks laid; shelter deck; cubic capacity, 597,710 cubic feet; 10½ knots laden, about 40 tons consumption; triple engines amidship; cylinders, 28 inches, 45 inches, 75 inches by 51-inch stroke; three tubular boilers, 180 pounds working pressure; 10 steam winches; 10 derricks; also 2 small ones on poop; coefficient, '79. Most up-to-date steamer, with desking, telegraph, shifting boards, cargo battens, telescopic topmast, with crosstrees at top and tables at bottom. All holds inside coated with bitumastic enameled composite, etc. Net register, 3,500. Price, $400,000.

Above steamers are under British registry.

No. 13.—8,800 tons dead-weight, including bunkers, on 24.6 feet draft. Built 1913 of steel, class B. S., British corporation; dimensions, 402 by 54 by 27.6 feet; molded, cubic capacity, 540,442 cubic feet; 10 knots on 28 tons consumption; triple engines; cylinders, 26 inches, 42 inches, 70 inches by 48-inch stroke; surface condenser, 3 boilers, S. E. tubular, 180 pounds working pressure, water ballast, C. D. B., F. and A. P. T.; 7 steam winches, 1 deck, and shelter laid. Net register, 2,930. Price, $325,000.

No. 14.—8,036 tons dead-weight, including bunkers, on 24.5 feet draft. Built 1914 of steel, 100 A1 Lloyds'; dimensions, 385 by 52 by 29.6 feet; molded, cubic capacity 432,979 cubic feet; 10 knots on 28 tons consumption; triple engines, amidship; cylinders, 25 inches 40 inches, 68 inches by 48-inch stroke; surface condenser, 3 boilers, S. E. tubular, 180 pounds working pressure; water ballast, 1,183 t. in C. D. B., F. and A., P. T.; 5 hatches, 10 steam winches, steam windlass, steam-steering gear; 1 deck laid, steel, 'tween deck, 7.6 feet; 12 derricks, 4 derrick posts; wood-grain divisions, coefficient, '783; steam heating, bilge keels; four 18-inch vents each hold; ice room; steam-ash hoist; Morrison 25 t. evaporator; F. water condenser, 1,500 gallons, etc. Net register, 2,955. Price, $315,000.

No. 15.—8,150 tons dead-weight, including bunkers, on 24.3 feet draft. Built 1913 of steel, highest British corporation; dimensions, 385 by 52.1 by 29.6 feet; molded, cubic capacity, 430,208 cubic feet

grain, or 409,047 cubic feet bales; 9.5 to 10 knots on 27 tons ordinary consumption; triple engines, amidship; cylinders, 25 inches, 40 inches, 68 inches by 48-inch stroke; surface condenser, 3 S. E. tubular boilers, 180 pounds working pressure; water ballast, 1,430 t., C. D. B. and peaks; 6 hatches; 10 steam winches; steam windlass; steam-steering gear; 1 deck laid, steel; 1 spare room for passenger accommodation; 12 derricks and tables; 4 derrick posts; grain divisions; spare propeller; shafts; evaporator and heater; also winch condenser. Net register, 2,954. Price, $340,000.

Above steamers are under British registry.

No. 16.—Steamship built of steel, to carry passengers and cargo; twin screw; built, 1894; engines, triple; indicated horsepower, 2,500; length, 383.4 feet; breadth, 46 feet; depth, 27.2 feet; registered gross tonnage, 4,761; electric light; sub. sig.; 12 knots; arranged to carry 16 first and second class passengers, 1,000 steerage. Price, $375,000.

No. 17.—Passenger and cargo steamer arranged to carry 137 first and second class, 1,260 steerage; built of steel, 1894; twin screw; engines, triple; indicated horsepawer, 2,500; length, 383.4 feet; breadth, 46 feet; depth, 27.2 feet; registered gross tonnage, 5,640; electric light; sub. sig.; 12 knots. Price, $625,000.

No. 18.—Passenger and cargo steamer arranged to carry 120 first and second class, 1,344 steerage; built of steel, 1899; twin screw; engines, triple; speed, 13 knots; indicated horsepower, 3,200; length, 428.9 feet; breadth, 54.3 feet; depth, 39.4 feet; registered gross tonnage, 7,414; electric light; sub. sig. Price, $625,000.

No. 19.—Passenger and cargo steamer arranged to carry 35 first and second class, 206 third class, 2,144 steerage; built of steel, 1899; twin screw; engines, quadruple; 12½ knots; indicated horsepower, 5,500; length, 501 feet; breadth, 58.1 feet; depth, 36.7 feet; registered gross tonnage, 10,058; electric light; wireless telegraphy; sub. sig. Price, $1,125,000.

No. 20.—Passenger and cargo steamer arranged to carry 210 first class, 224 second class, 1,343 steerage; built of steel, 1896; twin screw; engines, quadruple; speed, 16 knots; indicated horsepower, 7,000; length, 523 feet; breadth, 60.1 feet; depth, 34.8 feet; registered gross tonnage, 10,695; electric light; Stone Lloyd bulkhead doors; sub. sig. Price, $1,250,000.

No. 21.—Passenger and cargo steamer arranged to carry 110 first class, 175 second class, 252 third class, 1,660 steerage; built of steel, 1896; twin screw; engines, quadruple; speed, 16 knots; indicated horsepower, 7,000; length, 526.4 feet; breadth, 60 feet; depth, 34.6 feet; registered gross tonnage, 10,915; electric light; Stone Lloyd bulkhead doors; sub. sig.; wireless telegraphy. Price, $1,250,000.

No. 22.—Passenger and cargo steamer arranged to carry 133 first and second class, 1,450 steerage; built of steel, 1901; twin screw; engines, quadruple; speed, 13 knots; indicated horsepower, 3,400; length, 429.3 feet; breadth, 54.3 feet; depth, 39.6 feet; registered gross tonnage, 7,524; electric light; sub. sig. Price, $812,500.

Above steamers are under German registry.

EXHIBIT 77.

[Panama Railroad Co., Panama Railroad, Panama Railroad Steamship Line.]

NEW YORK, *January 15, 1915.*

SIR: I confirm the following statement made to you this morning regarding our contract with the Earn-Line:

The Earn-Line Steamship Co. is an American corporation located in Philadelphia, and operates time-chartered tramp steamers in the West Indian trade.

It is under contract with us to furnish tonnage to transport from Hampton Roads to the Canal Zone all the coal we require for the operations of our company and the Panama Canal, and is similarly under contract with the Maryland Steel Co. to carry all its ore from Cuban ports to Sparrows Point. It is because of these contracts, giving its steamers full cargoes both ways, that the Earn-Line is able to carry our coal and the Maryland Steel Co.'s ore at lower rates than its competitors.

In the early part of September we had a large stock of coal on hand, and as the requirements of steamers passing through the canal had become considerably lessened we notified the Earn-Line that at least for a month or two we would not require more than 20,000 tons per month. There was no outward West Indian business to which these steamers could then be assigned, and the Earn-Line, figuring they could profitably employ some of their steamers in the European freight trade, and that there would be no question of their returning to this country the latter part of October, chartered four of them for European business.

These steamers arrived out with their cargoes were delayed in discharging because of lack of berthing facilities, labor, etc., were then taken over; first, by the English, and then by the French Governments for the carriage of stores, ammunition, etc., and are still on the other side with no immediate prospect of their return to this country until these two Governments release them.

In the meantime the demands for coal considerably increased and we call upon the Earn Line to furnish the tonnage required. Our stock has been reduced from 90,000 to 40,000 tons, and both the Earn Line and our company are scouring the charter market in the effort to secure sufficient tonnage to carry to the Isthmus the amount of coal it is imperative we should keep there. The usual charter rates for vessels of this kind range from 3s. 2d. to 3s. 9d. per dead-weight ton. The agents of the Earn Line have informed me that in some instances they have, by instructions of their principals, offered owners, all of whom are located in Europe, as high as 11s. per ton, and are at the present time making offers on all steamers that are open for business even at such high rates that the officials of the Earn Line know it will mean a severe loss to them if the vessels are secured, and might, if conditions do not improve, result in their retirement from business.

We have the right under our contract to go out in the market and charter any steamers we can secure in the event that the Earn Line does not furnish the tonnage we call for. We have this in view, but we know we can not make any better progress in this direction than the agents of the Earn Line and that our interference might simply result in increasing the present high rates by unnecessarily adding to the number of concerns that are seeking tonnage.

Yours, respectfully,

(Signed) T. H. ROSSBOTTOM,
Assistant to Vice President.

The SECRETARY OF COMMERCE,
Washington, D. C.

EXHIBIT 78.

[From the New York Journal of Commerce, January 2, 1915.]

ABNORMAL FREIGHT RATES FOLLOW TONNAGE SCARCITY—CHAOTIC CONDITIONS PREVAILED AFTER DECLARATION OF EUROPEAN WAR—FIRST SIX MONTHS OF THE YEAR WITHOUT STARTLING FEATURES—RATES MAINTAINED EASY LEVEL—LOSS OF GERMAN MERCHANT MARINE, COMBINED WITH EXPANSION IN FREIGHT MOVEMENT, BRINGS RECORD-BREAKING FREIGHT RATES.

Conditions in the steamship freight trade were at the two extremes during the year just ended. The year opened with freight business, both import and export, affected to a material degree by the internal depression in this country. During the first six months freight rates were easy and fluctuated within a narrow margin. The advent of the European war in August brought chaotic conditions, but out of the maelstrom there developed a period of high freight rates seldom, if ever, approximated in the annals of the shipping world.

During the early part of the year trade, both foreign and domestic, felt the heavy hand of depression. The pendency of the request for a 5 per cent advance in railroad freight rates, the assimilation of the new tariff, and the reorganization of the banking system of the country combined to lessen the volume of trade. The steamship lines faced a dull year. Aside from the movement of old-crop grain, which furnished good freight, the lines lacked the stimulating effect of an active movement in general cargo. Exports of manufactured articles and imports of supplies from Europe, the Orient, and South America dropped to a low level under the repressive conditions that obtained.

In March there was quite a flurry in freight rates, but the upward movement was only spasmodic. Rates soon dropped back to the level effective at the beginning of the year. How berth rates acted in the first five months of the year is shown in the following compilation of berth rates to the principal ports of Europe. The figures show the berth rates quoted by the lines on the first of each month from January to August.

CHAOTIC CONDITIONS WITH ADVENT OF WAR.

The disorganization of steamship services, the enforced withdrawal of the German and American merchant marines, and the cost of war risk on hulls chargeable to freight combined to send up freight rates to Europe by the regular lines. Advances ranging from 100 to 400 per cent were made in the period from September to the end of the year, with rates firm and still advancing when 1914 closed.

During the month of August absolute disorder replaced the perfect running and intricate machinery of the steamship trade. The big lines withdrew all berth-rate quotations and would not make rates on any other than actual freight offers. Rates changed from day to day; in fact, rates on same conditions differed each hour of the day, but throughout the movement was upward, and when after a month of chaos the steamship lines recast their services to fit in with war conditions, thus enabling the quotations of berth rates, it was noticed that the freight rates were fully double those quoted immediately before the advent of the war.

The English lines suffered from many causes. Early in August their best ships were requisitioned by the British Admiralty. The movement of troops from Dover and other channel ports to France forced the British Government to order the lines using London as their terminal to send their boats to Liverpool. The Red Star Line, with its impor-

tant service to Antwerp, operated its boats to Liverpool. Many other changes of a similar nature occurred, so that it took considerable time before order was evolved out of chaos.

With the conclusion of the period of readjustment the volume of freight, temporarily diminished, began to assume large proportions. The Governments of France and England placed orders with manufacturers in this country, and the movement of these war materials required considerable space. Munitions of war, hospital equipment, foodstuffs, and a host of other articles began to arrive at the seaboard about the middle of September, all seeking fast transportation across the Atlantic. The lines, hampered by the loss of their best vessels through naval requisitioning, were forced to bring out numerous of the small vessels, and while eventually the volume of sailings to Europe was equivalent to the tonnage movement before the war the amount of freight offered to the lines continued to exceed the supply of vessels.

ABNORMAL FREIGHT RATES FOLLOW TONNAGE SCARCITY—CHAOTIC CONDITIONS PREVAILED AFTER ADVENT OF WAR.

Forwarding houses perceived the freight space would eventually be at a premium, and later developments proved that their surmise was correct. During October and November the steamship lines received demands for freight space on vessels sailing far in advance of current requirements. Late in November and throughout December the efforts of forwarders to secure freight space for both prompt vessels and those sailing in January were without avail.

INCREASING TRADE WITH NEUTRALS.

The Holland-American Line and the Scandinavian-American lines chartered numerous additional vessels to take care of the volume of freight offering. The Norwegian Government established a buying agency in this country in order to insure the maintenance of low prices on food products. Many ships took cargoes of foodstuffs; in fact, it has been estimated by freight authorities that fully 80 per cent of the excess movement of freight to Europe over last year consisted of foodstuffs.

With the three principal food-producing nations in the throes of martial conflict, those smaller nations of Europe formerly dependent on Germany, Austria, and Russia for grain found their source of supply cut off. The unusually heavy grain crop garnered in 1914 in this country enabled the supplying of Europe without trouble. The export surplus of wheat just fitted in with the extra requirements of Europe, and the price of grain, instead of declining in face of the heavy crops, advanced on the steady export demand.

How berth rates on the leading export commodities advanced in the last half of the year just closed is shown in the table appended. Comparison with the rates quoted at the beginning of the year and those in force just before the outbreak of the war show that as the year drew to a close the rates demanded by the lines had increased from 200 to 400 per cent over those in force before the war.

SOUTH AMERICAN TRADE POOR.

The South American lines had a poor year throughout. Depression in Brazil, combined with poor crops in the Argentine, caused a heavy falling off in trade. Steamship lines maintained their regular sailings, however, but were often forced to fill cargo holds up with coal.

With the advent of the war the demand for coal from South America created quite a little activity among the regular lines. The big railroads and power companies that had contracts for Welsh coal placed orders with the Virginian producers, and steamers that formerly took coal as cargo simply to fill up now found fuel competing with general cargo for freight space. This condition did not last long, however, and toward the end of the year South American conditions again fell back to the inactivity that prevailed earlier in the year.

A FAIR YEAR FOR FAR EASTERN LINES.

Steamship lines operating to Australia, India, China, and Japan had fairly good business during the year just ended. The Australian market was especially brisk. China and Japan were good purchasers and the amount of freight forwarded compared favorably with that of 1913. Toward the latter part of the year the long-distance lines were placed at a disadvantage owing to the high cost of chartering steamers. Where tonnage could be secured at 4 shillings per ton per month on a dead-weight basis before the war the rate early in December was 12 shillings. Few vessel owners were inclined to place their steamers in the long-distance trades, even at the rate of 12 shillings, preferring to keep their vessels in the trans-Atlantic trades.

During the last week of December the long-distance steamship lines were seriously considering advancing freight rates in order to meet operating costs, and it is expected that some official action in the direction of increasing freight rates will be taken early in the new year.

EXHIBIT 79.

[Wall Street Journal, January 1, 1915.]

OCEAN FREIGHT RATES ARE SOARING STEADILY HIGHER—ALMOST UNPRECEDENTED SHORTAGE OF TONNAGE FOR PROMPT JANUARY AND FEBRUARY DELIVERY—BULK OF DEMAND FOR SHIPPERS OF COTTON, GRAIN, AND GENERAL CARGO FOR TRANSATLANTIC ACCOUNT—SEEKERS FOR SPACE COMPELLED TO GO INTO THE SAILING-VESSEL MARKET, WHERE SUITABLE TONNAGE IS SCARCE.

The almost unprecedented shortage of tonnage for prompt January and early February delivery has pushed rates to a level seldom reached in the history of steam navigation. At the same time it has placed a heavy check on chartering; in fact, so heavy has been this check in the past week or 10 days that chartering was actually at a standstill several times.

On the other hand, demand for tonnage continues unabated. If anything, the volume of current inquiry for prompt and early forward loading ships is larger than at any stage of the present rise of rates in the freight and charter markets.

The bulk of this demand is for trans-Atlantic account. This, in turn, is made up of grain, cotton, and general cargo, principally. Such cargo vessels as have arrived from England in ballast, to carry foodstuffs and miscellanies to Great Britain and Continental Europe, have not helped the situation on the western side of the Atlantic very much.

Spot freight rates at the close of the calendar year ranged from 40 to 160 per cent and, in several instances, to 200 per cent higher than they did just prior to declaration of war in Europe. Rates quoted with the concluding activities of the last day of the year compare as follows:

[1] Per 40 cubic feet. [2] Per cubic foot.

In some instances holders of cargoes have been compelled to go into the sailing-vessel market to obtain space for their commodities. Charter rates in that market have risen accordingly. Chartering itself will be restricted there, however, by the scarcity of tonnage of a serviceable nature for trans-Atlantic carriage.

Among those who have been compelled to go into the sailing-vessel market are shippers of timber. These interests are absolutely unable to obtain steamers at rates which they are reported to pay, and charters are reported from the Gulf to West Britain at rates varying from 120s. to 140s. for January-February-March loading.

Freight rates to South America, as a whole, continue at about 25 per cent over the regular tariff on the east coast, while to the west coast rates remain unchanged. To Central America shipping men are quoting rates that are practically normal, excepting on a few commodities, on which the rates are a little higher, but not as a result of the war. To Australian points current rates range about 25 per cent over regular tariffs in consequence of a heavy movement of cargo.

West Indies business continues inactive, with no material changes. Coal charterers continue to have difficulty in obtaining tonnage on a rate basis and are offering 40s. to Alexandria or Spezzia for early January loading. There is a growing demand for tonnage to ports of Australia and also for the Far East.

FINDINGS OF THE COURT OF CLAIMS.

The VICE PRESIDENT laid before the Senate communications from the assistant clerk of the Court of Claims, transmitting certified copies of the findings of fact and conclusions filed by the court in the following causes:

Shadrack T. Harris *v.* The United States (S. Doc. No. 738);

Louisa Boles, daughter of Charles Heinz, deceased, *v.* The United States (S. Doc. No. 737);

Joseph B. Harris *v.* The United States (S. Doc. No. 736);

Milton W. Henderson *v.* The United States (S. Doc. No. 735);

William A. Duckworth *v.* The United States (S. Doc. No. 734);

Michael McNulty *v.* The United States (S. Doc. No. 733);

Edwin D. Haynes *v.* The United States (S. Doc. No. 732);

Quincy A. Harper *v.* The United States (S. Doc. No. 783);
Adah H. Love, niece of James M. McClelland, *v.* The United States (S. Doc. No. 782);
Alice E. Gunn, widow of William A. Gunn, *v.* The United States (S. Doc. No. 781);
Charles Hammond *v.* The United States (S. Doc. No. 780);
Mary T. Gunther, widow of Arthur Gunther, *v.* The United States (S. Doc. No. 779); and
Henrietta H. Hyatt, widow (remarried) of Edward J. Hazel, *v.* The United States (S. Doc. No. 778).

The foregoing findings were, with the accompanying papers, referred to the Committee on Claims and ordered to be printed.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented resolutions of the municipal council of the provincial government of Talisay, and the municipal council, provisional government of Kabancalan, Occidental Negros, P. I., praying for the passage of the so-called Jones bill, for the self-government of the Philippine people, which were referred to the Committee on the Philippines.

He also presented a petition of the general secretary of the Federal Council of the Churches of Christ in America, of New York City, N. Y., praying for the enactment of legislation to provide pensions for civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

He also presented a memorial of the National Board of Steam Navigation, of New York, remonstrating against Government ownership and operation of merchant vessels in the foreign trade of the United States, which was ordered to lie on the table.

He also presented a memorial of the board of aldermen of New York City, remonstrating against the passage of the so-called immigration bill, which was ordered to lie on the table.

Mr. CHAMBERLAIN presented petitions of sundry citizens of Oregon, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented petitions of sundry citizens of Oregon, praying for the creation of a rural credit system, which were referred to the Committee on Banking and Currency.

Mr. HITCHCOCK presented petitions of sundry citizens of Seward, St. Louis, Lincoln, Harbine, Hickory Grove, Wynot, and Battle Creek, all in the State of Nebraska, and a petition of sundry citizens of Chicago, Ill., praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented memorials of sundry citizens of West Point and Monterey, in the State of Nebraska, remonstrating against the circulation of anti-Catholic publications through the mail, which were referred to the Committee on Post Offices and Post Roads.

Mr. THOMPSON presented petitions of sundry citizens of Hays, Kirwin, Hillsboro, and Redfield, all in the State of Kansas, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Ellis, Gaylord, and Logan, all in the State of Kansas, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

Mr. GALLINGER presented the petition of W. F. Peel, of Nashua, N. H., praying for the enactment of legislation to provide for the uniform grading of grain, which was referred to the Committee on Agriculture and Forestry.

Mr. McCUMBER. I present resolutions adopted at a meeting of citizens of Enderlin, in the State of North Dakota, favoring the enactment of legislation prohibiting the sale of munitions and arms to belligerents. The resolutions are very short and terse and present the whole subject. I ask that they may be printed in the RECORD and properly referred.

There being no objection, the resolutions were referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

Resolutions passed at a meeting of citizens of the United States held at Enderlin, N. Dak., January 17, 1915.

Whereas 10 nations of the Old World are now waging the greatest war of mankind and are not only exhausting their own resources, but are also drawing immense supplies and munitions of war from the United States of America; and

Whereas the armament and supplies that are being furnished by the United States tend to increase the military conflagration of Europe, multiply the loss of life, already appalling, and cause the destruction of property that is bringing nations to desolation and assist in the prolongation and continuance of this most dreadful of all wars; and

Whereas we as a people from our hearts lift our voices in prayer for peace, while as a Nation we are aiding in war and augmenting the struggle by emptying our private arsenals and war supplies onto the battle fields of Europe; and

Whereas our Government has proclaimed strict neutrality and thereby given assurance to American citizens of all races and to the belligerent powers themselves that we shall give aid and support to none, and by our acts as a Nation break no bonds of friendship with the countries with whom we are at peace and create no discord among our citizens here by discriminating against their fatherland; yet when we offer military supplies and equipments to any nations that choose to buy it is with the full knowledge that for 100 years England by her supremacy on the seas is the master of all contraband goods transported by water, and that she and her friends alone can benefit by our unholy commerce, and we are pursuing that course which diverges so far from strict neutrality that we injure our ancient friends—Germany and Austria—by every means in our power excepting the employment of armed force alone; and

Whereas this country has recognized the right of our Government to withhold war supplies from contending armies when she laid an embargo upon munitions of war when the feeble armies of Mexico were arrayed against each other, nevertheless she now offers her limitless supplies to the mightiest armies that were ever assembled in battle array; and

Whereas the United States is disloyal to itself when it promotes a foreign war by furnishing the sinews of war while the Nation is prostrate commercially and waiting for the dawn of peace to return to her former prosperity and achievements: Therefore be it

Resolved, That we, American citizens residing in Enderlin, N. Dak., in delegate meeting assembled, hereby declare that it is the imperative duty of the Congress of the United States to pass the necessary law forthwith that will enable the President of the United States to lay an embargo upon all contraband of war, saving and excepting foodstuffs alone, and thereby withdraw from the contending powers all aid and assistance of this Republic: And be it further

Resolved, That we are in strict sympathy with the Christian endeavor of this Nation to appeal to the God of Nations that peace may come and reject as hypocrisy and national sacrilege the commercial spirit of the country that is answering our supplications for peace by sending the instruments of destruction and death to the serried armies in struggle through the Empires of Europe: And be it further

Resolved, That we, citizens of the United States, who have contributed our full share to American peace, American Christianity, and American civilization, call upon all Americans to join with us in enforcing that strict American neutrality that will give aid and comfort to none of the contending powers, and that will withhold American resources from promoting destruction and slaughter among the friendly nations of Europe: And be it further

Resolved, That copies of these resolutions be sent to our Representatives in Congress in the House of Representatives and Senate, to the President, the Vice President, and the Secretary of State of the United States at Washington, D. C.

Fred Zittelmann, Albert Zittelmann, Robert Zunnock, Johan F. Henkel, August Geitl, O. A. Culbertson, John Jacobs, Carl Lindemann, H. E. Pool, C. G. Doulins, W. Vossberg, C. Mueller, John Genz, Robert Lindemann, Carl Shumacker, Bernhard L. Biven, John T. Reiz, Emil Seelig, Lewis Altman, Philip Naker, F. F. Kuntz, Albert Nachtigall, Robert R. Froemke, Ernest Hanelt, Willie Nachtigall, Dan. Froemke, Edward Froemke, Albert Schumacher, Lewis A. Froemke, Fred. Chenzy, Gerald Buss, Fred. Kelm, Carl Krueger, E. Hofmann, William Lindemann.

Mr. BRISTOW presented a memorial of sundry citizens of Coffeyville, Kans., remonstrating against any change being made in the compensatory time law for postal employees, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of sundry citizens of Mound Valley, Kans., remonstrating against the exclusion of anti-Catholic publications from the mail, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of sundry citizens of Kansas City and Quindaro, in the State of Kansas, praying for the enactment of legislation to provide pensions for civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

Mr. WORKS. I send to the desk a number of petitions, numerously signed by citizens of California, favoring legislation prohibiting the exportation of arms and munitions of war to belligerent nations. I ask that one of these petitions, which is very short, the one signed by Jacob Price, be printed in the RECORD, that the others be printed in the RECORD without the signatures, and that the total number of the signers of these various petitions be stated in the RECORD.

Mr. STONE. Where we are sitting it is impossible to hear what is going on at that distance. I should like to have the request of the Senator from California stated in a tone sufficiently audible to reach all Senators.

Mr. WORKS. The petitions I have presented favor legislation prohibiting the exportation of arms and munitions of war to belligerent nations.

There being no objection, the petitions were referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

Hon. JOHN D. WORKS,
United States Senate, Washington, D. C.:

In order to confirm by deeds the avowed peace-loving intentions of the great American Nation, a bill prohibiting the sale to belligerents of all war material has been introduced in Congress. Recognizing the fact that the refusal of the United States of America to permit the export to belligerents of munitions and all implements of war will facilitate the termination of warfare, we, the undersigned citizens of San Diego, Cal., give our hearty approval to this movement and urge our representatives in Congress to support the passage of House resolution 377 and Senate bill 6688.

JACOB PRICE AND OTHERS.

—

To Senator JOHN D. WORKS,
Washington, D. C.

HONORABLE SIR: The undersigned American citizens respectfully ask you to vote for and lend your active support to Senate bill 6688 or 6862, or any similar measure, prohibiting the export of arms, ammunition, and munitions of war from the territory or any seaport of the United States, so that it may pass the Senate at this session of Congress.

Signed by 1,325 citizens of the State of California.

—

To Senator JOHN D. WORKS,
Washington, D. C.

HONORABLE SIR: The undersigned American citizens respectfully ask you to vote for and lend your active support to Senate bill 6688 or 6862, or any similar measure, prohibiting the export of arms, ammunition, and munitions of war from the territory or any seaport of the United States, so that it may pass the Senate at this session of Congress.

Signed by 1,980 citizens of the State of California.

—

To Senator JOHN D. WORKS,
Washington, D. C.

HONORABLE SIR: The undersigned American citizens respectfully ask you to vote for and lend your active support to Senate bill 6688 or 6862, or any similar measure, prohibiting the export of arms, ammunition, and munitions of war from the territory or any seaport of the United States, so that it may pass the Senate at this session of Congress.

Signed by 1,320 citizens of the State of California.

Mr. NELSON presented petitions of sundry citizens of Minnesota, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented a memorial of sundry citizens of Minnesota, remonstrating against the exclusion of anti-Catholic publications from the mail, which was referred to the Committee on Post Offices and Post Roads.

Mr. POINDEXTER presented a petition of the Skagit County Pomona Grange, Patrons of Husbandry, of Anacortes, Wash., praying for the enactment of legislation to provide Government ownership of telephone and telegraph lines, which was referred to the Committee on Post Offices and Post Roads.

He also presented petitions of the International Alliance of Theatrical Stage Employees; of Local Union, No. 1214, United Brotherhood of Carpenters and Joiners of America; and of Local Union, No. 278, I. U. of U. B. W., all of Walla Walla, in the State of Washington, praying for the enactment of legislation to regulate the interstate commerce in convict-made goods, which were ordered to lie on the table.

Mr. SHEPPARD presented a petition of the Chamber of Commerce, of El Paso, Tex., praying for the creation of a National Security Commission, which was referred to the Committee on Military Affairs.

Mr. MYERS presented petitions of sundry citizens of Great Falls, Mont., praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

Mr. ROBINSON presented a petition of sundry citizens of Hicks, Ark., praying for the enactment of legislation to prohibit the exportation of ammunition, etc, which was referred to the Committee on Foreign Relations.

He also presented a petition of sundry citizens of Batesville, Ark., praying that an appropriation be made for the construction of seven locks and dams on Upper White River, Ark., which was referred to the Committee on Commerce.

Mr. KERN presented petitions of sundry citizens of Hammond, Decatur, Huntington, and Indianapolis, all in the State of Indiana, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented a memorial of sundry citizens of Anderson, Ind., remonstrating against the circulation of anti-Catholic publications through the mail, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of the Chamber of Commerce, of Kokomo, Ind., remonstrating against the enactment of legislation to increase the armament, which was referred to the Committee on Military Affairs.

He also presented petitions of sundry citizens of Elkhart, Ind., praying for the enactment of legislation to provide Federal censorship of motion-picture films, which were referred to the Committee on Education and Labor.

He also presented a petition of the United Mine Workers of Princeton, Ind., praying for the enactment of legislation for the extension of the Bureau of Mines, which was referred to the Committee on Mines and Mining.

Mr. BRANDEGEE presented petitions of sundry citizens of Danbury, Taftville, Norwich, Meriden, Baltic, Lisbon, Norwalk, and Middletown, all in the State of Connecticut, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

REPORTS OF COMMITTEES.

Mr. SHIVELY, from the Committee on Pensions, submitted a report (No. 921), accompanied by a bill (S. 7402) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, the bill being a substitute for the following pension bills heretofore referred to that committee:

Mr. SHIVELY, from the Committee on Pensions, to which was referred the bill (H. R. 20562) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, reported it with amendments and submitted a report (No. 932) thereon.

Mr. SMOOT, from the Committee on Public Lands, to which was referred the bill (S. 4422) for the relief of John L. Sevy, reported it with amendments and submitted a report (No. 935) thereon.

Mr. STERLING, from the Committee on Public Lands, to which was referred the bill (H. R. 11318) authorizing the sale of lands in Lyman County, S. Dak., reported it without amendment and submitted a report (No. 936) thereon.

Mr. SHIELDS, from the Committee on the Judiciary, to which was referred the bill (S. 6854) to incorporate the Boy Scouts of

America, and for other purposes, reported it with amendments and submitted a report (No. 937) thereon.

Mr. MYERS, from the Committee on Public Lands, to which was referred the bill (H. R. 16738) to provide for the payment of certain moneys to school districts in Oklahoma, reported it with amendments and submitted a report (No. 938) thereon.

Mr. LANE, from the Committee on Indian Affairs, to which was referred the bill (S. 6671) confirming patents heretofore issued to certain Indians in the State of Washington, reported it without amendment and submitted a report (No. 939) thereon.

Mr. JAMES, from the Committee on Patents, to which was referred the bill (H. R. 18031) amending sections 476, 477, and 440 of the Revised Statutes of the United States, reported it without amendment and submitted a report (No. 940) thereon.

Mr. FLETCHER. I am directed by the Committee on Military Affairs, to which was referred the bill (S. 2854) granting an honorable discharge to William C. Chandler, to report it adversely, and I ask unanimous consent that the bill be postponed indefinitely.

The VICE PRESIDENT. The bill will be postponed indefinitely.

Mr. CHAMBERLAIN, from the Committee on Military Affairs, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

S. 3892. A bill for the relief of Charles G. Griffa (Rept. No. 930);

S. 5104. A bill to authorize the Secretary of War to furnish certain transportation to the Oregon Agricultural College cadet corps by a United States Army transport (Rept. No. 928);

S. 6217. A bill to increase the efficiency of the Organized Militia, and for other purposes (Rept. No. 924);

S. 7066. A bill for the relief of Amos Dahuff (Rept. No. 931);

H. R. 17765. An act to regulate details of majors in the Ordnance Department (Rept. No. 923); and

H. R. 13123. An act for the relief of Charles H. Rayfield, alias Charles H. Czarnowsky (Rept. No. 927).

Mr. CHAMBERLAIN, from the Committee on Military Affairs, to which were referred the following bills, reported them each with amendments and submitted reports thereon:

S. 6966. A bill to authorize the maintenance of organizations of the mobile army at their maximum strength and to provide an increase of 1,000 officers (Rept. No. 926); and

H. R. 16510. An act to provide for recognizing the services of certain officers of the Army and Navy, late members of the Isthmian Canal Commission, to extend to them the thanks of Congress, to authorize their promotion, and for other purposes (Rept. No. 929).

Mr. CHAMBERLAIN, from the Committee on Military Affairs, to which was referred the bill (S. 7046) providing for the purchase of lands for an aviation school, reported it with an amendment and submitted a report (No. 925) thereon.

Mr. CHAMBERLAIN, from the Committee on Commerce, to which was referred the bill (S. 7261) to amend sections 4421, 4422, 4423, 4424, and 4498 of the Revised Statutes of the United States, and section 12 of the act of May 28, 1908, relating to certificates of inspection of steam vessels reported it without amendment and submitted a report (No. 922) thereon.

Mr. SHEPPARD, from the Committee on Military Affairs, to which was referred the bill (S. 6510) to authorize the appointment of Duncan Grant Richart to the grade of second lieutenant in the Army, reported it with amendments and submitted a report (No. 934) thereon.

OHIO RIVER BRIDGE.

Mr. SHEPPARD. From the Committee on Commerce I report back favorably without amendment the bill (S. 7266) to authorize the Brunot Island Bridge Co. to construct, maintain, and operate a bridge across the back channel of the Ohio River, and I submit a report (No. 933) thereon. I call the attention of the junior Senator from Pennsylvania [Mr. OLIVER] to the report.

Mr. OLIVER. This is a bridge bill of great urgency. It will lead to no controversy at all, and I ask unanimous consent for its present consideration.

The VICE PRESIDENT. Is there objection?

Mr. SMOOT. If the Senator will ask unanimous consent that the reading be dispensed with——

Mr. ROBINSON. I object, Mr. President.

The VICE PRESIDENT. Objection is made. The bill will be placed on the calendar.

THE NATIONAL ARCHIVES (S. DOC. NO. 717).

Mr. FLETCHER. On December 21, 1914, the Senator from Washington [Mr. POINDEXTER] presented to the Senate a pamphlet entitled "The National Archives: A Programme," by Waldo Gifford Leland, which was reprinted from the American Historical Review, and it was referred to the Committee on Printing. I am directed by the Committee on Printing to report a resolution for its printing.

Mr. POINDEXTER. I ask unanimous consent for the present consideration of the resolution.

The resolution (S. Res. 523) was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That the pamphlet submitted by Mr. POINDEXTER on December 21, 1914, entitled "The National Archives: A Programme," by Waldo Gifford Leland, be printed as a Senate document.

PAN AMERICAN CONFERENCE.

Mr. STONE. I ask that the joint resolution (S. J. Res. 228) authorizing the President of the United States to extend invitations to Central and South American Governments to be represented at a conference looking to an improvement of the financial relations between the United States and these nations, reported by me from the Committee on Foreign Relations on January 20, and which is now on the table, be taken therefrom and referred to the Committee on Appropriations.

The VICE PRESIDENT. The joint resolution will be referred to the Committee on Appropriations.

VOTES ON FEDERAL RESERVE ACT.

Mr. SHAFROTH. On October 5, 1914, the Senator from Oklahoma [Mr. OWEN] presented a statement prepared in the office of the Secretary of the Senate relative to the yea-and-nay votes of the Senate during the consideration of the Federal reserve act approved December 23, 1913, and it was referred to the Committee to Audit and Control the Contingent Expenses of the Senate. The committee has had the matter under consideration, and I ask that that committee be discharged from the further consideration of the matter and that it be referred to the Committee on Printing for action.

The VICE PRESIDENT. Without objection, it will be so ordered.

DISTRICT EXCISE BOARD.

Mr. SHAFROTH. In behalf of the Committee to Audit and Control the Contingent Expenses of the Senate, I report favorably, with certain amendments, the Senate resolution 522, submitted by the senior Senator from New Jersey [Mr. MARTINE], and I desire to ask unanimous consent for its present consideration.

Mr. SMOOT. Let the resolution be read.

The Secretary read the resolution, as follows:

Resolved, That the special committee appointed by the President of the Senate to investigate the conduct of the excise board is hereby further authorized to investigate fully into the manner in which the excise law, so called, is being administered in the District of Columbia; and said committee is hereby authorized to send for persons and papers, to administer oaths, to compel the attendance of witnesses, to employ stenographers to report such hearings as may be had at a rate not to exceed $1 per printed page, and to have the testimony and proceedings of such hearings printed for the use of the committee. The expense of such hearings shall be paid out of the contingent expenses of the Senate, upon vouchers to be approved by the chairman of the said special committee. The said committee is also authorized to sit during the sessions of the Senate.

Mr. TOWNSEND. Mr. President, I hope there will not be any more requests of this kind until the morning hour has been completed. We have but a few minutes remaining, and we want to get in some bills.

The VICE PRESIDENT. Is there any objection to the present consideration of the resolution?

The Senate, by unanimous consent, proceeded to consider the resolution.

The amendment of the committee was, after the words "printed page," to strike out "and to have the testimony and proceedings of such hearings printed for the use of the committee."

The amendment was agreed to.

The resolution as amended was agreed to.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. POMERENE:

A bill (S. 7403) for the prevention of the manufacture, sale, or transportation of such edible alimentary pastes as macaroni, spaghetti, vermicelli, and noodles, containing any added artificial coloring matter, and for regulating traffic therein, and for other purposes; to the Committee on Public Health and National Quarantine.

A bill (S. 7404) granting the consent of Congress to the Cleveland Yacht Club Co. to construct a bridge across the west arm of Rocky River, Ohio; to the Committee on Commerce.

A bill (S. 7405) to amend section 1608–J of the act of Congress entitled "An act to establish a code of law for the District of Columbia," approved March 3, 1901, as amended by the act of

Congress approved February 23, 1905; to the Committee on the District of Columbia.

By Mr. SMITH of Maryland:

A bill (S. 7406) to enlarge, extend, remodel, and improve the United States post-office and courthouse building located at Baltimore, Md.; to the Committee on Public Buildings and Grounds.

By Mr. HARDWICK:

A bill (S. 7407) to donate certain condemned cannon to the Gordon Institute, Barnesville, Ga.; to the Committee on Military Affairs.

By Mr. GALLINGER:

A bill (S. 7408) granting an increase of pension to Edward Dudevoire (with accompanying papers); and

A bill (S. 7409) granting a pension to Katherine B. Robeson (with accompanying papers); to the Committee on Pensions.

By Mr. LODGE:

A bill (S. 7411) granting an increase of pension to James C. Baker (with accompanying papers); to the Committee on Pensions.

By Mr. BURTON:

A bill (S. 7412) to appropriate $50,000 to erect an equestrian statue of Gen. Ulysses S. Grant at Georgetown, in the State of Ohio; to the Committee on the Library.

A bill (S. 7413) to authorize the change of name of the steamer *General Garretson* to *S. H. Robbins* (with accompanying papers); to the Committee on Commerce.

By Mr. CHAMBERLAIN:

A bill (S. 7414) to amend section 2291, Revised Statutes, relating to homestead entry, as amended; to the Committee on Public Lands.

(By request): A bill (S. 7415) authorizing the appointment of Stephen R. Beard as captain in the Quartermaster Corps of the United States Army; to the Committee on Military Affairs.

By Mr. McCUMBER:

A bill (S. 7416) for the relief of John H. Fesenmeyer, alias John Wills; to the Committee on Military Affairs;

A bill (S. 7417) granting an increase of pension to Orlinda A. Edick; and

A bill (S. 7418) granting a pension to Mayme Chilson (with accompanying papers); to the Committee on Pensions.

By Mr. JONES:

A bill (S. 7419) granting certain lots to the city of Port Angeles, State of Washington, for municipal purposes; to the Committee on Public Lands.

By Mr. STERLING:

A bill (S. 7420) granting an increase of pension to Ziba Fry;

A bill (S. 7421) granting an increase of pension to Charles C. Moulton; and

A bill (S. 7422) granting an increase of pension to Parsons B. Mix; to the Committee on Pensions.

By Mr. GRONNA:

A bill (S. 7424) for the prevention of cruelty to animals transported in interstate commerce; to the Committee on Interstate Commerce.

By Mr. CATRON:

A bill (S. 7425) to reimburse the State of New Mexico for money advanced for the survey of public lands; to the Committee on Public Lands.

A bill (S. 7426) granting an increase of pension to Lazaro Sandoval (with accompanying papers); to the Committee on Pensions.

By Mr. POINDEXTER:

A bill (S. 7427) prohibiting the use of the name of any Member of either House of Congress or of any officer of the Government by any person, firm, or corporation practicing before the Patent Office in advertising his business; to the Committee on Patents.

By Mr. STONE:

A bill (S. 7428) to authorize the appointment of George W. Sager as a first lieutenant on the retired list of the United States Army (with accompanying papers); to the Committee on Military Affairs.

A bill (S. 7429) granting a pension to Mabel Turton (with accompanying papers); to the Committee on Pensions.

By Mr. SHERMAN:

A bill (S. 7430) granting a pension to John A. Foster; to the Committee on Pensions.

By Mr. DILLINGHAM:

A bill (S. 7431) for the relief of Frances A. Bliss; to the Committee on Claims.

A bill (S. 7432) granting a pension to James L. Swan (with accompanying papers);

A bill (S. 7433) granting a pension to Nellie H. Judkins (with accompanying papers); and

A bill (S. 7434) granting an increase of pension to Alva M. Titchout (with accompanying papers); to the Committee on Pensions.

By Mr. LANE:

A bill (S. 7435) authorizing issuance of land patent to Lewis Montgomery; to the Committee on Public Lands.

(By request): A bill (S. 7436) to encourage private enterprise and capital in upbuilding the merchant marine of the United States and to promote commerce between the United States and foreign nations; to the Committee on Commerce.

By Mr. OLIVER:

A bill (S. 7437) granting an increase of pension to William Dougherty (with accompanying papers); and

A bill (S. 7438) granting an increase of pension to Alonzo Cole (with accompanying papers); to the Committee on Pensions.

By Mr. OLIVER (for Mr. PENROSE) (by request):

A bill (S. 7439) to provide a commission to secure plans and designs for a memorial bridge to the memory of William Penn and to provide for the erection thereof; to the Committee on Commerce.

A bill (S. 7440) for the relief of Caleb Aber; to the Committee on Military Affairs.

By Mr. SMOOT:

A bill (S. 7441) granting an increase of pension to George W. Vogel (with accompanying papers); and

A bill (S. 7442) granting an increase of pension to Joseph A. Fisher (with accompanying papers); to the Committee on Pensions.

By Mr. THOMAS:

A bill (S. 7443) granting a pension to Laura Belle Ewing; and

A bill (S. 7444) granting a pension to Anna C. Gregory (with accompanying papers); to the Committee on Pensions.

By Mr. BRYAN:

A bill (S. 7445) granting an increase of pension to William Varnes (with accompanying papers); to the Committee on Pensions.

By Mr. BORAH:

A bill (S. 7446) granting an increase of pension to Edwin W. Moody (with accompanying papers); to the Committee on Pensions.

By Mr. SHEPPARD:

A bill (S. 7447) for prohibition of the liquor traffic in the District of Columbia; to the Committee on the District of Columbia.

By Mr. TOWNSEND:

A bill (S. 7448) to appoint Roy K. Carson a second lieutenant in the United States Marine Corps; to the Committee on Naval Affairs.

By Mr. WEEKS:

A bill (S. 7449) granting an increase of pension to Virginia Watson; and

A bill (S. 7450) granting an increase of pension to Marie Raum Moses; to the Committee on Pensions.

By Mr. BURLEIGH:

A bill (S. 7451) granting an increase of pension to Israel A. Gardner (with accompanying papers); to the Committee on Pensions.

By Mr. OWEN:

A bill (S. 7452) amending section 26 of the act of Congress approved May 29, 1908, entitled "An act to authorize the Secretary of the Interior to issue patents in fee to purchasers of Indian lands under any law now existing or hereafter enacted, and for other purposes;" to the Committee on Indian Affairs.

By Mr. LA FOLLETTE:

A bill (S. 7453) granting an increase of pension to Alice S. C. McNaught; to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 7454) granting an increase of pension to Lawrence Seaman (with accompanying papers); and

A bill (S. 7455) granting a pension to Mary Walls (with accompanying papers); to the Committee on Pensions.

A bill (S. 7456) regulating the use of the mails relative to loans, etc.; and

A bill (S. 7457) regulating use of Postal Service by mail from foreign countries pertaining to loans, etc.; to the Committee on Post Offices and Post Roads.

By Mr. LIPPITT:

A bill (S. 7458) granting an increase of pension to Mary L. Lowe; to the Committee on Pensions.

FOUNDATION FOR PROMOTION OF INDUSTRIAL PEACE.

Mr. LODGE. I introduce a bill to dissolve the Foundation for the Promotion of Industrial Peace, and for other purposes, and ask that it be referred to the Committee on Education and Labor.

The bill (S. 7410) to dissolve the Foundation for the Promotion of Industrial Peace, and for other purposes, was read twice by its title and referred to the Committee on Education and Labor.

Mr. LODGE. I ask that the accompanying letter from the Solicitor for the Department of Commerce may be printed in the RECORD and referred to the Committee on Commerce.

The VICE PRESIDENT. Without objection, it will be so ordered.

The communication was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

DEPARTMENT OF COMMERCE,
OFFICE OF THE SOLICITOR,
Washington, January 19, 1915.

Hon. HENRY CABOT LODGE,
United States Senate, Washington, D. C.

MY DEAR SENATOR: At the request of Secretary Redfield I herewith inclose you draft of an act, "To dissolve the Foundation for the Promotion of Industrial Peace, and for other purposes," with the request that you introduce it in the Senate, you having introduced the original bill there creating the foundation. The preamble to the proposed bill was inserted in order to conform to the style of the act establishing the foundation, and also in order that the reasons for the dissolution might appear in the act dissolving it. As therein stated, no additions to the original fund have come to the foundation, and the accrued income from the original fund has been found wholly insufficient to enable the peace committee to carry out the purposes of the foundation. For this reason the trustees decided that it was best to have the foundation dissolved, and the money returned to Mr. Roosevelt or disposed of with his approval. With this in view, the chairman of the foundation wrote Mr. Roosevelt as follows on December 5, 1914:

"I am instructed by the special committee of the trustees of the Foundation for the Promotion of Industrial Peace to submit to you for your information a report which the committee contemplates presenting to the trustees it, as the committee hopes, the proposal contained therein shall commend itself to your judgment. It would be most unjust to the present board of trustees if you were to feel that, in making this suggestion, we are shrinking from a duty that we had undertaken to discharge because of any half-heartedness on our part in carrying out your wishes. The committee believes, on the contrary, that you will yourself appreciate that in the absence of any additions to the fund so generously given by you, the fund itself is too small to be successfully administered by a board so constituted. Under the circumstances, therefore, the committee hopes that you will be willing to have the trustees petition the Congress to permit the return of this fund to you, because in your hands the committee is sure that it will be much more highly useful than it can be under the care of any practicable board of trustees. If, however, you feel that a further effort should be made to administer the fund as now provided for by law, the trustees will endeavor to bring about only such minor changes in the law as are in any event necessary. We are entirely certain that you will not in any case misunderstand our motives in raising this question definitely in your mind."

Mr. Roosevelt wrote the chairman the following letters, on January 4:

"I have received your letter of December 5.

"I entirely agree with you. I especially agree in your statement that it would be most unjust to the board of trustees to feel that they have in any way shrunk from performance of the duty that, because of my action, was put upon them. On the contrary, the absence of any additions to the fund has completely prevented effective action by the board of trustees. The fund is altogether too small to be successfully administered by a board constituted as this one was. Its only usefulness was to serve as a nucleus for other gifts of the kind. These gifts have not been made, and I entirely agree with you that it is better to have the fund returned to me to be administered by myself. In this case I shall, of course, use it for purely philanthropic purposes.

"I thank you heartily for the proposal. I cordially approve of it, and I earnestly hope that Congress will act immediately on your suggestion. Such immediate action would enable me to use a portion of the fund this winter when the suffering among our own people is so severe."

"I think it preferable to have the disposition made by me, and to have me report the same to the trustees. With a sum as small as this, better work will be done by one person than by a board; and the reasons which made me desire to turn it over to be administered by a board, when it was to be a nucleus to which other sums were to be added, no longer obtain when only this amount is to be disposed of. The plan, through no fault of the trustees, has resulted in the talent being hidden in a napkin for eight years. My proposal is to have it used, and, if possible, some of it used this winter, when there is so much suffering; and I do not think it will be well to have it used by a committee."

At a meeting held in the presence of the Secretary on the 16th instant, at which there were present Mr. Chief Justice White, the Hon. Seth Low, and Mr. John Mitchell, the draft of the bill herewith submitted to you was approved. This action has also the approval of the other members of the committee—Mr. Secretary Houston and Mr. Marvin Hughitt.

I assume that the inclosed will furnish you all the information you desire in the matter. If, however, in addition to the above, you desire to look over the files of the department in reference to this foundation, I will be glad to submit them to you at any time.

Yours, very truly,

A. L. THURMAN, *Solicitor.*

PROHIBITION OF REVENUE FROM LIQUOR TRAFFIC.

Mr. WORKS. I introduce a short bill, and ask that it be printed in the RECORD and referred to the Committee on Finance.

The bill (S. 7423) to prohibit the collection of revenue from dealers in intoxicating liquors and making sellers of liquors liable for crimes of persons while intoxicated by use of liquors supplied by them, was read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

A bill (S. 7423) to prohibit the collection of revenue from dealers in intoxicating liquors, and making sellers of liquors liable for crimes of persons while intoxicated by use of liquors supplied by them.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the passage of this act no license shall be issued to or tax levied against or collected from any person, corporation, or association selling, manufacturing, or in any other way dealing in or with intoxicating liquors in any State or portion of any State or in the District of Columbia, or any other Territory where the sale or manufacture of intoxicating liquors is forbidden by law or the vote of the people, and all laws or parts of laws authorizing the issuance of such laws or imposition of such tax in so far as they apply or relate to any State, Territory, or locality where the manufacture or sale of intoxicating liquors is forbidden as aforesaid, are hereby repealed.

SEC. 2. That from and after January 1, 1916, no revenue or other tax shall be levied against or collected from any persons, corporation, or association for or on account of the manufacture or sale of intoxicating liquors of any kind, and all laws or parts of laws authorizing the imposition or collection of any tax or the issuance of any license or permit to manufacture, sell, or otherwise deal in intoxicating liquors are hereby repealed, to take effect on said last-named date.

SEC. 3. That where any person shall be guilty of the commission of any crime while in a state of intoxication resulting from the use of intoxicating liquors obtained from any person, acting for himself or as agent of another engaged in the sale of intoxicating liquors, the person from whom he procured such intoxicating liquors shall be guilty as an accessory before the fact of the crime so committed by the person to whom such liquors were supplied, and punished accordingly.

RIVER AND HARBOR APPROPRIATIONS (H. R. 20189).

Mr. CHAMBERLAIN submitted two amendments intended to be proposed by him to the river and harbor appropriation bill, which were referred to the Committee on Commerce and ordered to be printed.

Mr. PERKINS submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. JONES submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. ROBINSON submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. SHERMAN submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

He also (for Mr. LEWIS) submitted an amendment intended to be proposed to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. HARDWICK submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. O'GORMAN submitted three amendments intended to be proposed by him to the river and harbor appropriation bill, which were refered to the Committee on Commerce and ordered to be printed.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. JONES submitted an amendment proposing to appropriate $25,000 for special experiments looking to the most practicable and cheapest methods of producing denatured alcohol, intended to be proposed by him to the Agricultural appropriation bill (H. R. 20415), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. CATRON submitted an amendment proposing to appropriate $500 to reimburse the State of New Mexico for money advanced the United States to secure the survey of lands granted to that State, intended to be proposed by him to the general deficiency appropriation bill, which was ordered to be printed and, with the accompanying paper, referred to the Committee on Appropriations.

Mr. POINDEXTER submitted an amendment proposing to appropriate $10,000 for the establishment and maintenance of an experimental station in central Washington and for carrying on field work in connection therewith, intended to be proposed by him to the Agricultural appropriation bill (H. R. 20415), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

OMNIBUS CLAIMS BILL.

Mr. VARDAMAN submitted an amendment intended to be proposed by him to House bill 8846, commonly known as the

omnibus claims bill, which was ordered to lie on the table and be printed.

THE MERCHANT MARINE.

Mr. CLARK of Wyoming submitted an amendment intended to be proposed by him to the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia, to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes, which was ordered to lie on the table and be printed.

Mr. JONES submitted an amendment intended to be proposed by him to the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia, to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes, which was ordered to lie on the table and be printed.

WITHDRAWAL OF PAPERS.

On motion of Mr. LODGE, it was

Ordered, That the papers in the case of Eugene E. Colburn (S. 640, 63d Cong., 1st sess.) be withdrawn from the files of the Senate, no adverse report having been made thereon.

On motion of Mr. SMITH of Maryland, it was

Ordered, That the papers accompanying the bill (S. 7848, 62d Cong.) for the relief of Henry A. Garheart be withdrawn from the files of the Senate, no adverse report having been made thereon.

On motion of Mr. BORAH, it was

Ordered, That the papers accompanying the bill (S. 625, 63d Cong.) granting an increase of pension to James M. Wells be withdrawn from the files of the Senate, no adverse report having been made thereon.

On motion of Mr. SHIVELY, it was

Ordered, That the papers accompanying the bill (S. 4642, 63d Cong., 2d sess.) granting a pension to Rose Schroeder be withdrawn from the files of the Senate, no adverse report having been made thereon.

EMPLOYMENT OF STENOGRAPHER.

Mr. SHEPPARD submitted the following resolution (S. Res. 524), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Irrigation and Reclamation of Arid Lands, or any subcommittee thereof, be, and the same is hereby, authorized to employ a stenographer from time to time, as may be necessary, to report such hearings as the committee may direct to be had, such stenographer to be paid at a rate not exceeding $1 per printed page, and that the expense thereof be paid out of the contingent fund of the Senate.

IOWA INDIANS.

Mr. OWEN submitted the following resolution (S. Res. 525), which was read and, with the accompanying papers, referred to the Committee on Indian Affairs:

Resolved, That the bill (S. 7293) entitled "A bill for the relief of the Iowa Indians," now pending in the Senate, together with all the accompanying papers, be, and the same is hereby, referred to the Court of Claims, in pursuance of the provisions of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; and the said court shall proceed with the same in accordance with the provisions of such act and report to the Senate in accordance therewith.

EMPLOYMENT OF STENOGRAPHER.

Mr. POINDEXTER submitted the following resolution (S. Res. 526), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Expenditures in the War Department, or any subcommittee thereof, be authorized during the Sixty-third Congress to hold hearings and employ a stenographer at a price not to exceed $1 per printed page, to report such hearings in reference to expenditures by the War Department for artillery and ammunition therefor, especially as to the use of high explosives; and the expenses thereof shall be paid out of the contingent fund of the Senate.

THE NAVY.

Mr. PERKINS. Mr. President, I send to the desk a short communication from ex-Senator William E. Chandler, also ex-Secretary of the Navy, in relation to the increase of the Navy. I ask that it be printed in the RECORD and referred to the Committee on Naval Affairs.

Mr. TILLMAN. I ask that the letter of former Senator William E. Chandler presented by the Senator from California [Mr. PERKINS] be read for the information of the Senate.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read the communication.

The Secretary read as follows:

WASHINGTON, D. C., *January 15, 1915.*

Hon. GEORGE C. PERKINS,
United States Senator.

MY DEAR SENATOR PERKINS: I venture to advise you to refrain (1) from bringing politics into naval legislation or administration, (2) from making haste in naval construction or expenditure, (3) from weakening civilian control in the Navy Department, and (4) I urge you not to forget the duty that is from Congress to the taxpayers of the United States.

I.

Politics in dealing with the Navy: Abstention from any political motives or differences in connection with naval affairs is as appropriate as when dealing with foreign affairs. Besides, nothing from political complaints will result in Republican advantage.

Our opponents have been in national power less than two years. The Republicans had a reasonably sufficient Navy for the Civil War. But from 1865 down to 1883 they did practically nothing for the Navy. In that last year the available appropriations were $15,402,120 and the expenditures were $13,936,294. And at least $2,000,000 of the amount were wasted on a discreditable navy-yard establishment.

The naval ships, large and small, were 37 in number, all built of wood but 4, and those were of less than 1,400 tons displacement. All the ships were of low speed, their engines not modern, only 14 being compound, and their maneuvering and destructive powers were inferior to existing warships of other navies. It was officially then said that "with not 1 modern high-powered cannon in the Navy and with only 87 guns worth retaining, the importance of action for the procurement of naval ordnance seems apparent if the Navy is to longer survive," and so in 1883 the destruction of the old Navy and the beginning of the new took place.

With this record of naval nonconstruction continued for 18 years you will see that we can not make political capital out of any Democratic delay of naval construction and preparation during a period of about 18 months.

II.

Reasons for making haste slowly: There is a potent reason for not hurrying present naval construction. Until the present war in Europe is over we can not be at all certain in what direction large expenditures ought to be made. It is not to be expected that whatever may be revealed big battleships will be no longer built. But such is the terrifically destructive power of Zeppelins and aeroplanes and of submarines, that no more large warships should be built until every possible device is developed for the protection of the ships. One, two, or three more protective decks may be required; one, two, or three more ship's bottoms may be advisable. Who can now tell? It is the height of folly not to study questions like these before making vast additional expenditures. We can spend money enough in various ways upon submarines and flying machines, upon guns and explosives, to use up all the appropriations that can wisely be made within the next few years. It is not my purpose in this brief letter to discuss the question whether our country is in any danger of immediate war with any powerful nation. The blindest man can see our absolute safety till long after the present European war ends. During this period we should study the art of modern war with diligence and wisdom, and make sure that when we next spend vast sums for dreadnaughts we are as certain what we ought to do as investigation into a dreadful war all around the globe can make us. Already we are told that five of our battleships—the famous *Oregon* and the *Indiana*, *Massachusetts*, *Kentucky*, and *Kearsarge*—are obsolete and should be "replaced by new ships."

III.

We should strengthen instead of weakening civilian control of the Navy Department: There are in the Navy 3,388 commissioned officers, and there are, besides the ordinary clerical force, only two civilians—a Secretary and an Assistant Secretary of the Navy. But they represent the civilian President of the United States, who is in addition made by the Constitution "Commander in Chief of the Army and Navy of the United States, and of the militia of the several States when called into the actual service of the United States."

The Navy of our free Republic, to be governed by the laws of Congress and thus commanded by a President, aided by his Secretary and Assistant Secretary, should not be decorated by many special boards of naval officers, and by no such boards except such as are created by the President and disbanded whenever this is deemed wise by the Commander in Chief. There are established by law eight bureaus of the Navy Department, and such bureaus have existed since the beginning of the Government. The chiefs of these bureaus must be naval officers nominated by the President and confirmed by the Senate and their terms end in four years. As a general proposition they are sufficient professional advisers and assistants for the Secretary and President, and are all that are needed to keep those two civilians from making mistakes in the exercise of their rightly bestowed power to command the Navy of the Republic.

But this is not all. The President and Secretary are under the constant surveillance of the two Houses of Congress, whose natural course of watching and legislating is aided by regular committees and may be strengthened by the assistance of other Members of special capacity and energy not possessed by the regular committees—if there are such superior Members, as some Members think they are. In view of all these provisions for securing perfect direction of the naval arm of our Government it would be a mistake to embarrass and weaken the present civilian control of the Navy Department.

IV.

Be sure and constantly keep in mind the duty that Congress owes to the taxpayers of the Nation: You have heard Senator Hoar say that every laboring man in Europe carries on his back a soldier armed and equipped as the law directs. The French Revolution was caused by the unequal taxation of the poor peasants and laborers and the evasion of taxation by the rich nobles.

In 1883 we were expending on the Navy $15,000,000 annually, and when destroying the old worthless ships and guns and beginning a new Navy we at first increased the annual expenditure to only $20,000,000. In 1913 our total ordinary expenditures were $682,000,000, of which $160,000,000 were military, $133,000,000 were naval, and $175,000,000 were military pensions, making $468,000,000 (or nearly 70 per cent of the $682,000,000) used to pay the expenses of past wars and in preparing for future wars, as Representative Tawney repeatedly reminded Congress.

It has hitherto seemed that the most important question in this country during the next 20 years would be that of keeping down national extravagance and taxation. The Democratic Party is to be thrust out of national power in 1916 largely because it fails to fulfill its promises of economy in expenditures and because of its reduction of tariff protection and of the wages of American labor. It behooves the Republican Party to go slowly in enlarging the appropriations of the late billion dollar Congresses. The European war is no excuse for haste in naval appropriations, but rather a reason for going slowly until

we are quite sure in what way and to what extent our naval construction and preparation are to be modified by the course of existing events. At all events we should wait before making vast expenditures until the next Congress meets and until we learn the result of the pending German Zeppelin expedition for the destruction of England.

There is not to be the slightest danger for years of the need by the United States of entering into a serious war with any formidable nation.

I trust you will be willing to receive my suggestions, even if they are not profound and wise.

Yours, truly, WILLIAM E. CHANDLER.

Mr. TILLMAN. Mr. President, I am glad the Senator from California has decided to ask for the publication in the RECORD of the letter from former Senator William E. Chandler. Mr. Chandler sent me a copy of the letter to Senator PERKINS, and that explains why I am speaking on it. All three of us have had long service on the Naval Committee; Senator PERKINS more than either Chandler or myself. Senator Chandler has had a varied experience in naval affairs. He was Secretary of the Navy under President Arthur, and really began the construction of the new Navy. He was on the Naval Committee when I first came to Washington in 1896, and was at that time one of the ablest men in the Senate. Although he has recently entered his eightieth year his mind is still alert and vigorous. While he is a Republican and I am a Democrat, we have always been warm personal friends. Necessarily he is better posted on naval affairs than almost any man in Washington, not excepting even in the Navy Department itself. I attach great weight to his judgment on naval matters, and I am especially glad to see that his views and my own coincide in regard to the unwisdom of an extended and costly building program at this time. Right now the Navy needs many other things far more than it does battleships.

The war in Europe will undoubtedly explode a great many theories about battleships and submarines. Indeed it has already exploded many ideas on these subjects. The German 42-centimeter guns, the great surprise of the war so far, demolished the most scientifically constructed forts made of concrete and iron so easily, and almost instantaneously, that the best fortified city in Europe, Antwerp, was captured in less than a week. And the Germans, or some other nation, may be holding in reserve some devil's engine which will make superdreadnaughts as obsolete and useless for war purposes as an Indian canoe. No one knows what is going to happen. The demon of destruction, like a vulture, hovers over Europe with an insatiate appetite. Hell itself seems to have broken loose over there, and if the devil is not abroad his prototypes are devastating what eight months ago was the fairest and most prosperous corner of that Continent.

Why should we build battleships when every day may demonstrate their utter worthlessness? Let us wait until the war has shown what kind of craft we should construct. Time alone can teach us whether future sea fighting will be waged most successfully on, under, or above the water. The relative merits of the dreadnaughts, aeroplanes, and Zeppelins will be found out ere long, and we can reap the fruits of the experiments now going on without sharing any of the dangers of the conflict. We can wait and watch with perfect safety the lessons of the war; for the nations of the world are too busy destroying each other and wasting accumulated wealth of years; and all of them will be too much exhausted for at least 10 years to think of fighting us. The submarine in the future is bound to cut a great figure in naval warfare and possibly in harbor defense, too. Until, as Mr. Chandler says, we know what the Zeppelins are going to do, or can do, with battleships; whether bombs dropped from these air craft can destroy battleships unless they have two or three decks, or subdivisions, protected by armor; or whether the danger of torpedoes from below will require two or three bottoms to keep the ships from sinking, it would be the height of folly, in my opinion, to pursue any other course than to prepare to build battleships and have the plans drawn in anticipation of their construction; but wisdom compels us to wait before making contracts or expending money in any such way until we know what we are doing.

I am sure the Senator from California will agree with me in my estimate of Mr. Chandler's ability. His experience and intimate knowledge of naval affairs force me at least to listen when he speaks authoritatively, as he has done in this letter; and I for one shall not vote for any other policy at this time. It would be little short of a crime for the Naval Committee and for the Congress, too, if we rushed the construction of battleships until we know what lessons the war will teach and show to be wise. The appropriation bill which is now pending in the House carries many items for increase in the Navy for which, I notice in the papers, Secretary Daniels said he did not ask at all and does not think the Navy needs. How they got into the appropriation bill I do not know; and why they were put there is also a mystery. I find nothing whatever in the hearings or in the estimates in explanation.

It does seem to be time for Congress to go slow in expending these tens of millions of dollars because of some supposed necessity, or the desire on the part of some one to have ships constructed in certain navy yards or in certain places. I feel sure a half dozen or more battle cruisers, strong enough to put up a good, stiff fight and swift enough to catch anything afloat, or run away as wisdom may dictate, would serve the country's needs at this time far better. Just the type of battleship we ought to build, we do not now know. Therefore, I am sounding this warning. There never was any wiser utterance than Davy Crockett's motto:

Be sure you are right and then go ahead.

Already the fight between the fractions of the two opposing fleets in the North Sea has demonstrated one thing: That speed is of vital importance to any war craft we are to build, whether battle cruiser or dreadnaught. The swifter German cruisers got away from the British, but the slower, *Blucher*, although faster than any battleship we have, was sunk. And yet the General Board urges the construction of more battleships. The Naval Registers give the highest speed of any of our battleships at 22 knots.

If the contracts are once let for a specified form of ship, any change which, in the light of experience might be thought desirable, would be a very costly affair. Therefore, I earnestly urge and beg the Senate to consider carefully the amendment I am prepared to offer at the proper time, and which I now send to the desk, and ask to have read by the Secretary so it may get into the RECORD.

The VICE PRESIDENT. The letter will be referred to the Committee on Naval Affairs. The Senator from South Carolina sends to the desk an amendment intended to be proposed by him to the naval appropriation bill, which, without objection, will be read by the Secretary.

The Secretary read as follows:

Amendment to the naval appropriation bill (H. R. 20975) to be proposed by Senator TILLMAN as a substitute for the building of two battleships:

"The Secretary of the Navy is hereby directed to prepare and submit to the next Congress plans and specifications for building four warships of the type, power, and speed which, in his judgment, based on the knowledge gained from the prevailing war in Europe, are best suited for war on the sea; also to report, in the light of that war, the value and uses in naval warfare of aeroplanes, Zeppelins, and submarines."

The VICE PRESIDENT. The proposed amendment will be referred to the Committee on Naval Affairs and be printed.

EXTENSION OF THE MERCHANT MARINE.

Mr. MARTINE of New Jersey. Mr. President, I offer and ask to have printed in the RECORD an address delivered before the American Association for the Advancement of Science, at Philadelphia December 29, by Mr. George W. Norris. It is a short address, comprising six pages.

The VICE PRESIDENT. Is there objection?

Mr. JONES. I understand it is an address with reference to the shipping bill.

Mr. MARTINE of New Jersey. It has reference to the shipping bill.

Mr. JONES. I think it would be better if the argument were read to the Senate, as the bill is under consideration.

Mr. MARTINE of New Jersey. I will ask that the Secretary be instructed to read it to the Senate.

Mr. LODGE. I object.

The VICE PRESIDENT. Objection is made. The question is, Shall the address be read? [Putting the question.] The ayes seem to have it. The ayes have it, and the Secretary will read the address.

The Secretary proceeded to read the address.

Mr. MARTINE of New Jersey. I ask that the address be published entire in the RECORD without further reading.

The VICE PRESIDENT. Is there objection?

Mr. McCUMBER. I object.

The VICE PRESIDENT. The Senator from New Jersey requested that the address be printed in the RECORD and there was objection. He asked that it be read, and there was objection. Thereupon the Chair, in accordance with the rule of the Senate, put the question, and the Senate ordered that it be read. It can not now be withdrawn from being read without the consent of the Senate, and there is objection to its withdrawal.

Mr. OVERMAN. I do not think there was an objection to the withdrawal of the reading.

The VICE PRESIDENT. There was an objection.

Mr. POINDEXTER. Mr. President, it is a pertinent matter relating to important legislation now pending before the Senate, and I think it should be read.

Mr. KERN. As the Senator from New Jersey submitted a request that the reading be dispensed with, I ask unanimous consent that the order of the Senate directing that it be read be reconsidered.

Mr. McCUMBER. Mr. President, I objected to unanimous consent. I think the reading can be finished in a very few minutes more. It is a pertinent matter, and if it is not read now it will be read at some other time. So we would gain nothing by dispensing with the reading.

Mr. CLARK of Wyoming. Regular order, Mr. President.

Mr. STONE. Let the reading proceed.

Mr. POINDEXTER. Regular order!

The VICE PRESIDENT. The address has been ordered read, and the reading will proceed.

The Secretary resumed and concluded the reading of the address, which is as follows:

EXTENSION OF OUR MERCHANT MARINE.

[An address delivered before the American Association for the Advancement of Science, at Philadelphia December 29, 1914, by George W. Norris.]

The subject which has been assigned to me for discussion this afternoon is "The extension of our merchant marine." With all respect, I would suggest that "The Revival of our Merchant Marine" would have been a truer and more appropriate title. By whatever name we may choose to call it, the subject is one of tremendous importance—of such importance that, while I am glad to have the opportunity of presenting it, I hope and trust that it may be discussed in many other forums; that my very imperfect presentation may be supplemented and improved; and that these discussions may go on until we reach a real and practical remedy for the present deplorable conditions.

One of the most notable of Sir Walter Raleigh's many notable aphorisms was his declaration, "Whosoever commands the sea commands trade. Whosoever commands the trade of the world commands the riches of the world, and consequently the world itself." That statement is as true to-day as it was when he made it. The converse of the proposition is equally true—that whosoever does not command the sea trades at the pleasure of others and contributes to the wealth of others, who will in time command the world itself. Never has the world had such an object lesson in the value of "command of the sea" as is afforded to-day, when the industries and commerce of England continue in an almost normal way in the midst of a war for national existence, while Germany's commerce has been banished from the seas and her vessels are tied up in all the great ports of the world, her exporters are idle, her looms are silent, and her people must economize in their use of foodstuffs to avoid the danger of ultimate starvation. You may say that this is a question of a navy rather than of commerce, but I would have you note that the two are inseparably related. An adequate navy must include colliers, transports, supply and hospital ships, and scout cruisers, as well as battleships, torpedo boats, and submarines. There must be shipyards for construction and repair work, and there must be a reserve of men trained to the sea to meet the added demands and losses of war, and unless there is a merchant marine you can not have these things. Shipyards can not live on the construction of battleships alone. Confine them to that, and war will find you without shipyards, without trained artisans, without an adequate supply of auxiliary ships, and without facilities for manning such ships as you might otherwise be able to put in commission.

Leave out the question of national defense, and look merely at what our position would be if, instead of an undisputed mastery of the sea by England, there was an even distribution of sea power, and England, France, Germany, and Austria were all preying upon each other's commerce, and goods could not be shipped with safety in the vessels of any of those nations. We produce about 42 per cent of the world's pig iron, nearly 25 per cent of its wheat, over 40 per cent of its coal, over 70 per cent of its corn, and 60 per cent of its cotton. A great deal of our production of these articles we export—two-thirds of our cotton and nearly a quarter of our wheat, not to speak of 32,000,000 barrels of petroleum annually—and with these exports we pay a large part of our annual charge of six hundred to eight hundred millions due to the rest of the world for interest, dividends, freights, and payments and remittances of various kinds. If there were no ships in which these goods could be exported, what pen could describe the financial and industrial chaos in which we would be plunged? Think of the point to which wheat would drop. Think of the iron furnaces out of blast, the mines closed down, the farmers ruined, and our gold supply exhausted, unless universal repudiation were enforced. The picture is too horrible to contemplate; and yet, like a drunken man dancing on a tight rope, we go on relying upon the providential mercy which has thus far preserved us from such a national catastrophe. This is no figure of rhetoric, or overdrawn picture. It is a self-evident peril, which stares us in the face and to which only fatuous folly will seek to close its eyes.

But have we no ships, you may ask? Oh, yes; if you will refer to the last issue of Lloyds' Register you will be gratified to find that the American merchant marine comprises 3,100 vessels of over 5,300,000 tons gross register, and these figures are the narcotic which has lulled to sleep so many of our statesmen and business men and economists. But if you will analyze these figures, and subtract the vessels which ply only upon our lakes, rivers, bays, sounds, or canals, and which are either absolutely imprisoned on our inland seas or otherwise unavailable for ocean transportation, you will have left only 361 vessels of a gross tonnage of 1,375,000 tons to represent our ocean-going American merchant marine, and even from that paltry remnant there should probably be a further deduction made on account of vessels which, owing to their limited size, are not commercially available. The available ocean-going marine is therefore just about equal in tonnage to the fleet of one single German company. Put in a different form, whereas in 1861 over 65 per cent of our foreign commerce was carried in American bottoms, in 1901 only 8 per cent was so carried. To-day our foreign commerce represents about one-eighth of the world's total, and not more than one-tenth of that one-eighth, or 1¼ per cent of the world's commerce, is carried in American bottoms. For the carriage of the other nine-tenths of our own foreign commerce it is estimated that we are annually paying to the shipowners of other nations in ocean freights and passage money from $200,000,000 to $250,000,000 a year. This is a direct loss, and takes no account of the profits we might make if, like other nations, we engaged in the business of transporting goods other than our own. By the neglect of this business it is therefore evident that we are not only (a) losing these last-mentioned possible profits, and (b) paying this enormous and killing annual charge, but we are also subjecting ourselves daily to the frightful risk of an utter paralyzation of our whole foreign trade.

Having thus outlined present conditions, it may be pertinent to refer very briefly to the causes which have brought them about. In the early days of the Nation nearly all of our foreign commerce was done in American vessels—in 1821, for example, 89 per cent of it. Up to the Civil War there was a slow but steady decline, the proportion being 86 per cent in 1831, 83 per cent in 1841, 73 per cent in 1851, and 65 per cent in 1861 (fractions omitted). Then came a rapid drop—32 per cent in 1871, 16 per cent in 1881, 12 per cent in 1891, and 8 per cent in 1901. With all the tremendous increase in our foreign trade in the last 50 years, the American tonnage carrying it is now only 40 per cent of what is was 50 years ago.

What is the explanation? The size of vessels had been increased, and iron and steel had taken the place of wood in construction. Instead of being built in a sort of local cooperative way the construction of vessels had become a specialized form of industry. Construction had been subjected to the inevitable results of our protective-tariff policy, and operation had been subjected to both those results and to the effects of our navigation laws. We had made ships about 60 per cent more expensive to build in American than in foreign shipyards and from 20 per cent to 35 per cent more expensive to operate after they were built. Having thus bound a ligature around each leg of our merchant marine, we have watched the legs atrophy, and have for 40 years confined ourselves to eloquent regrets that our bound and shackled victim did not run and dance and to expressions of fervid hope that he soon would. We can maintain a monopoly of coastwise commerce. We can give a practical monopoly to a public-utility company or a limited monopoly to a line of land transportation, but on the lanes of the broad ocean, which is the highway of all the world, there can be no monopoly. There all comers meet, and "the race is to the swift, the battle to the strong." In that unrestricted competition the weak, the overburdened, and the handicapped can not even hope for success.

Is it not about time for a people as intelligent as the American people to alter their attitude upon this all-important subject? There are certain economic or industrial changes which could be made to advantage. I believe that the high cost of vessels built in American shipyards is largely due to the fact that they are finished with an unnecessary degree of elaboration, and that there is an utter lack of standardization. An ocean "tramp" built merely to carry bulk freight does not need to be highly finished. She should be strong and seaworthy, but neither speed nor appearance is material. Many of the modern freighters constructed abroad are mere steel boxes, pointed at the ends, with an engine, a propeller, and a rudder. Our Lake freighters are sometimes described as being "built by the mile and sold by the foot," but their effect upon transportation costs has been little short of marvelous. In the memory of living men it used to cost 32½ cents a bushel to bring wheat from Duluth to Philadelphia. Last fall it was brought over the same route for 6¼ cents a bushel. Grain has been moved from Duluth to Buffalo for 1 cent a bushel, and coal and ore between Superior and the lower Lake ports for 40 cents to 50 cents a ton. There is no reason to doubt that what these freighters have accomplished in Lake transportation and what a great Detroit manufacturer has done in automobile construction may be, to a great extent at least, duplicated in ocean transportation. Standardization is the secret, but standardization is only effective when it can be applied on a large scale; and what opening, it may be asked, is there for it when, as at present, there is practically nothing to standardize?

This brings me to a discussion of some of the remedies which have been suggested by individuals or organizations interested in the subject. Among these suggestions are the removal of duty on materials entering into the construction of vessels, the admission to American registry of foreign-built vessels, subsidies, and various modifications of the navigation laws. It is perfectly evident that, as President Wilson said in his last message to Congress—

"To correct the many mistakes by which we have discouraged and all but destroyed the merchant marine of the country, to retrace the steps by which we have, it seems almost deliberately, withdrawn our flag from the seas, except where, here and there, a ship of war is bidden carry it or some wandering yacht displays it, would take a long time and involve many detailed items of legislation, and the trade which we ought immediately to handle would disappear or find other channels while we debated the items."

American shipbuilders are already handicapped by the higher cost of materials and higher wage scale which they have to meet, and to admit foreign-built vessels to American registry as a regular and permanent thing would probably be a fatal blow to the shipbuilding industry. The admission of shipbuilding materials free of duty would be wholly inadequate to meet the situation. Many people have argued for many years in favor of subsidies, which have been suggested to successive Congresses in many forms, sometimes undisguised and sometimes disguised as payments for carrying the mails, or as a guaranty of the bonds of private corporations or as a Government loan to a private corporation. It is a well-known fact that the Democratic Party is opposed on principle to subsidies, either disguised or undisguised, and as it was never possible to get any form of subsidy through a Republican Congress, it is scarcely worth while to consider the possibility of its getting through a Democratic Congress. Any attempt to modify the existing navigation laws will certainly be opposed by the seamen's union, supported by all the other labor unions and reenforced by the enthusiastic advocates of the "safety-at-sea" idea, whose cause has been so much strengthened by the series of startling marine disasters which have shocked the world within the last few years. It is therefore evident that any changes that will bring the cost of either building or operating vessels down to the foreign standard must be very radical changes, and will inevitably be opposed by very powerful interests. I do not mean to say that no attempt should be made to effect such changes. American ingenuity and adaptability has been able to make a success in many lines of industrial activity where foreigners had distinct initial advantages, and I believe that we would find means to overcome in ocean transportation some differences in cost of both construction and operation, and that changes might ultimately be accomplished which would make it possible to overcome the handicap. It is too evident for argument, however, that the accomplishment of any such result will be tedious and difficult, and that the present conditions should not be allowed to continue for the years that must elapse before such result could be reached.

The pressure of these facts and conditions has been felt in Congress, and at the last session several bills were introduced aiming at either the

development of the merchant marine or the provision of auxiliary vessels for the Navy, or both. There were hearings before the House Committee on the Merchant Marine and Fisheries at which these bills were discussed quite fully, and majority and minority reports were submitted from that committee. At the present session a new bill has been introduced by Senator STONE, which was referred to the Committee on Commerce, and has been favorably reported from that committee. This bill creates a shipping board, consisting of the Secretary of the Treasury, the Postmaster General, and the Secretary of Commerce. Subject to the direction or approval of the President as to its more important functions, this shipping board is authorized to subscribe to any part, not less than a majority, of the capital stock of a corporation undertaking the purchase or construction and subsequent operation of merchant vessels to ply between ports of the United States and the ports of Central and South America, and perhaps elsewhere as necessary to meet the requirements of commerce. It is further provided that Government bonds up to $30,000,000 may be issued for the purpose of purchasing or constructing vessels to be sold to such corporation, payment therefor being made in bonds of the corporation. This bill contains a further provision authorizing the President to lease or transfer to such corporation not only vessels purchased or constructed under the provisions of the act, but also such naval auxiliaries as are suitable for commercial use and are not required for use in the Navy in time of peace. It is further provided that vessels purchased or constructed under the act shall be, as far as possible, suitable for use as naval auxiliaries and that the Government shall have the power to take them for naval purposes at any time.

This act and a similar one introduced in the previous session have been criticized in many quarters. Some persons regard them as "paternalistic" and others brand them as "socialistic." Some object to the idea of using public money to run steamship lines at a loss. Some persons given to seeing ghosts can only regard them as schemes to buy the German steamers tied up in our ports, while to others the specter assumes the form of "an entering wedge to Government operation of transportation by land as well as by water." Others oppose them because they believe the navigation laws should be changed. Others because they believe that the proper remedy is in subsidies to privately owned and operated lines. Both these last classes are unwilling that the patient should be cured by any other remedy than their own, although they will probably admit that there never was a time when the acceptance of either of these remedies was so unlikely as just now.

As to the idea that the adoption of such a measure would be a precedent for railroad operation by the Government or would in the slightest degree pave the way to any such result, I can imagine nothing more unlikely. The conditions which exist in ocean transportation and the theory upon which Government intervention must be justified are so wholly different from the railroad situation that there can be neither analogy nor comparison between the two. Moreover, as the governmental intervention would probably be temporary—ultimately yielding the field to private capital—and would probably show a balance on the wrong side of the ledger, opponents of Government ownership of railroads should rather welcome the experiment as likely to prove an illuminating object lesson.

The bill authorizes the shipping board to "purchase or construct" vessels. While much-needed orders would quickly be given to our shipyards, no doubt, pending construction, some vessels would be either purchased or chartered, to take care of the present trade emergency, and it is quite possible—perhaps likely—that some of these would be German. Does this detail condemn the whole proposition? The other objections—paternalism, socialism, and the use of public money in a probably nonremunerative enterprise—all involve the same principle. Men always have differed, and always will differ, as to just what functions Governments—National, State, or municipal—should undertake. Leaving out the extremists at both ends, I think it may be said that a very large majority of our people are of opinion that Government should provide all those things necessary to the health, safety, and comfort of the community which private capital does not and will not provide. Where private capital might do it on certain terms or where private capital is doing it, and there is a dispute as to the efficiency of the service or the fairness of the rates and terms, there is always and necessarily a wide field for argument. But where the thing is necessary, and private capital has not undertaken, and will not undertake, to supply it, there is substantial agreement that it should be supplied by the community itself, acting through its constituted authorities. I am not attempting to state this with scientific accuracy or in the phrase of the political economist. I am only endeavoring to state what I believe to be the plain opinion of the plain people. They have acted on this principle repeatedly, and in many localities. To take two conspicuous illustrations: It has brought about the construction of many miles of municipally built and municipally owned subways, and it has created harbor improvements whose cost has run into the tens of millions. Cities went into these enterprises, either alone or in association with private capital to which preferential terms were given, knowing that the direct return upon the investment would not be adequate for a period of years, if ever, but knowing also that they were essential to the health, comfort, and development of the community; that they must be provided; and that they could not be provided in any other way. I maintain that the entry of the Federal Government into ocean transportation is justified on exactly similar grounds.

Let me review the facts:

Fact one. We have, practically speaking, no vessels in which to send out our $2,500,000,000 of exports or bring in our nearly $2,000,000,000 of imports. Because of this fact, we are (1) destroying the efficiency in war of our Navy, (2) fattening the rest of the world by an annual payment of $200,000,000 or more, (3) hampering our manufacturers and exporters by compelling them to ship through their competitors, and (4) running the risk of an utter paralyzation of our foreign trade by a war to which we are no party.

Fact two. Under existing conditions it is capable of mathematical demonstration that private capital can not and will not supply such vessels.

Fact three. These conditions can not be materially changed without such radical and fundamental changes in our policies as could only be brought about, if at all, through an educational propaganda continued over a period of years.

Fact four. The Federal Government can fill the void at a direct cost which can not be more than a very minute fraction of the indirect benefit.

Believing in the absolute truth of these facts, I am strongly in favor of trying the experiment. I believe that the lines established by the Government will greatly aid our exporters, and thereby simplify the problems of our bankers; that their operation will develop trade to a point where, within a few years, it will be possible for private capital to take some of them over; that the facts learned and the experience gained will pave the way for such changes in the laws as will permit private capital to enter the field; and that thus there will come about, under governmental initiative, that general revival of the American merchant marine about which we have all been dreaming for a generation, but hitherto failing to translate our dreams into action.

CONVENTION WITH NICARAGUA.

Mr. GALLINGER. I have a brief paper relating to the so-called Nicaragua convention, which I ask to have printed in the RECORD without reading.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

A STATEMENT SHOWING WHY THE PENDING NICARAGUA CONVENTION AS IT NOW STANDS SHOULD NOT BE RATIFIED BY THE AMERICAN SENATE, MADE IN THE INTEREST OF COSTA RICA AND ON BEHALF OF THE AMERICAN CITIZENS NOW CARRYING ON VAST BUSINESS ENTERPRISES WITHIN HER BORDERS AND EXTENDING INTO OTHER STATES OF CENTRAL AMERICA.

To the Senate:

The purpose of this statement is to show that the Government of Nicaragua has no power to make a valid grant for canal purposes across her territory to the United States, independent of Costa Rica, as is attempted in the pending treaty before the Senate. That the grant "for canal purposes," as expressed in said treaty, lies within the exterior territorial lines of the so-called Nicaragua canal route connecting the waters of the Atlantic and Pacific Oceans on the line of the San Juan River via Lake Nicaragua, from a point near San Juan del Norte on the Caribbean Sea to Brito on the Pacific Ocean.

That there are well-established reasons why this canal route is to be considered and treated as an entirety, incapable of partition or sale in parcels, Nicaragua and Costa Rica as having coordinate relations of ownership therein, as the same have been already adjudicated and defined by a tribunal of competent jurisdiction, and as surveyed and delineated by commissions of engineers chosen by these two Governments and the Government of the United States.

And that this status of affairs comports not only with the principles of common-law rights, but rests in specific treaty stipulations made and entered into by Nicaragua and Costa Rica, influenced by some of their sister States and the mediation of the American Government, in the interest of peace, as a full and final adjustment of their adverse contentions over boundary lines and the rights of property pertaining to said route, which alone averted the horrors of war between these two nations.

That any attempt by the Government of the United States to acquire any part of this territory "for canal purposes," as is contemplated in the pending treaty, from the Government of Nicaragua, to the exclusion of Costa Rica, is in direct contravention of this adjustment and a radical departure from the pacific policy heretofore pursued by the Government of the United States in its intercourse with these Central American States.

The necessity of such an adjustment was more than indicated and doubtless stimulated by the letter of instructions given to J. Bozman Kerr, the American Chargé de Affaires to Nicaragua in 1851, by Mr. Webster as Secretary of State in the Fillmore administration at that time, in the case wherein a company of citizens of the United States, under the name and style of the "American Atlantic and Pacific Canal Co.," created under a contract made with Nicaragua, pursuant to a convention between the United States and Nicaragua, but not ratified, conditioned that the United States was to recognize the rights of sovereignty and property which Nicaragua possesses over the line of said canal and to guarantee the neutrality thereof, so long as it "shall remain under the control of the citizens of the United States." It will be observed that the territorial right embraced in this contract was coextensive with the entire line of the canal route as hereinbefore described.

In this letter Mr. Webster says: "It is well known that for some time past there has been a dispute between the States of Nicaragua and Costa Rica respecting the boundary, and it is certain that until this shall be adjusted the United States could not undertake to guarantee to Nicaragua dominion over the line of the canal to it, impliedly at least, by deciding that dispute in her favor, and engaging to maintain that decision by force should that become necessary." He further says: "Mr. Molina is now the minister of Costa Rica at Washington. In his note of the 31st of March he states that his Government claims a right of dominion over the country lying on the south bank of the River San Juan, from the Atlantic Ocean to the Lake of Nicaragua, as well as all that portion of the aforesaid lake comprised between Fort San Carlos and River La Flor, together with the right to the joint navigation of the above-mentioned River San Juan and Nicaragua. If, therefore, the line of the interoceanic canal should be on the south side of the river or in the river bed thereof, a guaranty by us to Nicaragua of dominion over it would be in defiance of the claims of Costa Rica referred to."

"Under these circumstances," said Mr. Webster, "you will represent to the Government of Nicaragua that this Government can not undertake to guarantee the sovereignty of the line of this canal to her until the course which that work shall take with reference to the River San Juan and its terminus on the Pacific shall be ascertained and until the difference between Nicaragua and Costa Rica respecting the boundary shall be settled. You will suggest to them that it will be advisable for them to empower the minister of Nicaragua here to adjust the question of limits. If, however, the Nicaraguan Government should refuse to authorize Mr. Marcoleta to negotiate upon this subject, you will then intimate to her authorities that the United States will not regard with indifference any attempt on her part to wrest from Costa Rica any territory of which the latter State may now be in peaceful possession."

(See Book 15, American States Instructions, Department of State, p. 113.)

An adjustment of these differences was formally initiated and supposed to be concluded by the treaty of April 15, 1858, signed by Nicaragua and Costa Rica and San Salvador as a mediator, known as the "treaty of territorial limits," which was cordially ratified by the Presidents of Costa Rica and Nicaragua on the 25th day of April, 1858, "as conducive to the peace and prosperity of the two countries and reciprocally useful to both of them."

The said treaty of limits remained in statu quo until about the year 1870, when Nicaragua was the first to question its validity and to differ as to its interpretation, which condition of affairs gave rise to the treaty of December 24, 1886, known as the Costa Rican-Nicaraguan boundary treaty, by which these two powers agreed to submit to arbi-

tration the question as to the validity of the treaty of limits of 1858 and such points of doubtful interpretation as might require a decision in the event of the said treaty of limits being found valid, and further agreed that the arbitrator of these questions should be the President of the United States of America, His Excellency Grover Cleveland, who accepted the office, and on the 22d day of March, 1888, made his award therein, an award which will ever attest his high sense of justice and judicial ability. (See Foreign Relations, 1887, pp. 267–268.)

Inasmuch as the full text of this award appears in volume 2 of the History and Digest of International Arbitrations and in House Miscellaneous Documents, Fifty-third Congress, second session, volume 39, available for the use of Congress, only so much of the same is reproduced or referred to here as is deemed justly material to the purposes of this statement. The first question to be decided by the arbitrator was as to the validity of the treaty of limits of April 15, 1858, and this he decided to be valid. Findings 6, 8, 9, 10, and 11 of the third clause of this award are, in their order, as follows:

"6. The Republic of Costa Rica can not prevent the Republic of Nicaragua from executing at her own expense and within her own territory such works of improvement, provided such works of improvement do not result in the occupation or flooding or damage of Costa Rica territory, or in the destruction or serious impairment of the navigation of the said river or any of its branches at any point where Costa Rica is entitled to navigate the same. The Republic of Costa Rica has the right to demand indemnification for any places belonging to her on the right bank of the River San Juan which may be occupied without her consent, and for any lands on the same bank which may be flooded or damaged in any other way in consequence of works of improvement.

"8. The right of the Republic of Costa Rica to the navigation of the River San Juan with men-of-war or revenue cutters is determined and defined in the second article of this award.

"9. The Republic of Costa Rica can deny to the Republic of Nicaragua the right of deviating the waters of the River San Juan in case such deviation will result in the destruction or serious impairment of the navigation of the said river or any of its branches at any point where Costa Rica is entitled to navigate the same.

"10. The Republic of Nicaragua remains bound not to make any grants for canal purposes across her territory without first asking the opinion of the Republic of Costa Rica, as provided in article 8 of the treaty of limits of the 15th day of April, 1858. The natural rights of the Republic of Costa Rica alluded to in the said stipulation are the rights which, in view of the boundaries fixed by the said treaty of limits, she possesses in the soil thereby recognized as belonging exclusively to her; the rights which she possesses in the harbors of San Juan del Norte and Salinas Bay; and the rights which she possesses in so much of the River San Juan as lies more than 3 English miles below Castillo Viejo, measuring from the exterior fortifications of the said castle as the same existed in the year 1858; and perhaps other rights not here particularly specified. These rights are to be deemed injured in any case where the territory belonging to the Republic of Costa Rica is occupied or flooded; where there is an encroachment upon either of the said harbors injurious to Costa Rica; or where there is such an obstruction or deviation of the River San Juan as to destroy or seriously impair the navigation of the said river or any of its branches at any point where Costa Rica is entitled to navigate the same.

"11. The treaty of limits of the 15th day of April, 1858, does not give to the Republic of Costa Rica the right to be a party to grants which Nicaragua may make for interoceanic canals, though in the case where the construction of the canal will involve an injury to the natural rights of Costa Rica her opinion or advice, as mentioned in article 8 of the treaty, should be more than "advisory" or "consultative." It would seem in such cases that her consent is necessary, and that she may thereupon demand compensation for the concessions she is asked to make; but she is not entitled as a right to share in the profits that the Republic of Nicaragua may reserve for herself as a compensation for such favors and privileges as she, in her turn, may concede."

The special attention of the Senate is respectfully called to Costa Rica's right of navigation in the waters of the San Juan River and its bearing upon the merits and validity of the pending treaty so far as it affects this right from the standpoint of its present status under treaty stipulations, the award of President Cleveland, and the law of nations. Article 6 is material in this connection, as it furnished the basis upon which the arbitrator considered this question. It is as follows:

"The Republic of Nicaragua shall have the exclusive dominion and sovereignty over the waters of the River San Juan from their issue out of the lake to their discharge into the Atlantic Ocean, but the Republic of Costa Rica shall have the perpetual right of free navigation in these waters from the mouth of the river up to 3 English miles below Castillo Viejo for commercial purposes. * * * The boats of either country may touch at any part of the banks of the river where the navigation is common without paying any dues except such as may be established by agreement between the two Governments."

(For the full text of said treaty see State Papers, vol. 48, 1857–58.)

In his interpretation of article 6, which is found in the second clause of the award, the arbitrator says: "The Republic of Costa Rica has not the right of navigation of the River San Juan with vessels of war, but she may navigate the river with such vessels of the revenue service as may be related to and connected with her enjoyment of the purposes of commerce accorded to her in said article 6 or as may be necessary to the protection of said enjoyment."

And to safeguard this right from encroachment by Nicaragua was the object of finding 9, by virtue of which Costa Rica "can deny to the Republic of Nicaragua the right of deviating the waters of the River San Juan in case such deviation will result in the destruction or serious impairment of the navigation of the said river, or any of its branches, at any point where Costa Rica is entitled to navigate the same," and holding the same to be a natural right in the light of the common law and as belonging exclusively to Costa Rica, limits the power of Nicaragua in specific terms from being a party to any grant for an interoceanic canal in any case where the construction thereof will involve an injury to this natural right in Costa Rica, without previous consultation with her upon the subject, without her voluntary consent thereto, and without the recognition of her right of compensation for any concessions she may be willing to make in the premises.

The liberty and right of navigation and commerce, then, which Costa Rica possesses upon so much of the waters of the River San Juan as "lies more than 3 English miles below Castillo Viejo" is without question paramount to all other rights under consideration to the same extent as that sanctioned by the English and American courts and as recognized by the Congress of the United States over the navigable rivers within their jurisdiction. (See American and English Encyclopedia of Law, vol. 16, p. 260, and cases there cited.)

To give practical effect to this award, a third treaty was concluded between Costa Rica and Nicaragua on the 27th day of March, 1896, whereby the contracting parties agreed each to name a commission composed of two engineers or surveyors for the purpose of properly tracing and marking the boundary lines between them pursuant to the award, and for the appointment of a third engineer by the President of the United States clothed with the power to decide any question of difference that might arise between the two said commissions in conducting said survey, and whose decision should be final as to the same.

The engineer appointed by President Cleveland was Gen. E. P. Alexander, an American, learned and distinguished in his profession, who fulfilled with great care the duty assigned him, as is evidenced by his exhaustive report to the Commission of Limits of Costa Rica and Nicaragua of September 30, 1897. (See House Documents, vol. 1, 55th Cong., 2d sess., 1897 to 1898.)

It may be said by way of illustration that the territorial relations of Costa Rica to the south bank of the San Juan River is analogous to that of the United States to the south bank of the River St. Lawrence.

The Government of the United States holds the reciprocal right and liberty of commerce and navigation upon the St. Lawrence and the intervening lakes in the interest of peace under treaties of long standing with Great Britain.

By muniments not less binding and defensible Costa Rica holds a corresponding reciprocal liberty and right of commerce and navigation with Nicaragua upon the waters of the San Juan, qualified only as provided in the second clause of the award.

It is not necessary to comment upon the attitude that the United States Government or Great Britain would assume toward each other if their said treaty rights were not mutually respected.

It is important to note in this connection that the action taken in 1851 by Mr. Webster as Secretary of State in relation to the "American Atlantic and Pacific Canal Co." has been observed as a rule of action by that department until the advent of the present treaty convention with Nicaragua now pending before the Senate.

It is equally important to note the good faith which has been observed by the Government toward this award up to the present time, touching any negotiation for obtaining this canal property. This good faith was manifested by President Harrison in his message of December 9, 1891, in which he says: "Grave complications for a time seemed imminent in view of supposed conflict of jurisdiction between Nicaragua and Costa Rica in regard to the accessory privileges to be conceded by the latter Republic toward the construction or work on the San Juan River, of which the right bank is Costa Rican territory. I am happy to learn that a friendly arrangement has been effected between the two nations."

Again, it was manifested through the action of Mr. Hay as Secretary of State in procuring the protocols of agreements between the Governments of the United States, Nicaragua, and Costa Rica of December 1, 1900, as the basis of negotiations for the acquisition of this property and naming the amount of compensation to be paid to each for the same.

(See House Documents, vol. 110, 57th Cong., 1st sess., 1901–2, pp. 23–25.)

Again, as appears in the act of June 28, 1902, entitled "An act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific Oceans," wherein Congress shaped its provisions, so far as it related to the acquisition of the Nicaraguan Canal property, upon the lines of the award and as a unit of ownership.

(U. S. Stat., vol. 2, pt. 1, sec. 4, p. 482.)

Against the approval of the pending convention the Government of Costa Rica, through her accredited minister, in April, 1913, made her remonstrance to the Department of State, according to the custom of nations in such cases, upon good and substantial grounds, as appears from the same now on file in the archives of the State Department, and deemed worthy of the consideration of the Senate, in which she especially complains that this convention was negotiated with Nicaragua without her knowledge, or without imparting to her its nature or its provisions; that the knowledge of its terms, so far as it affects her rights, came through indirect sources and not from the Government of Nicaragua, as it should have done, and therein praying for a hearing and an investigation by that department of her rights as presented in said remonstrance, which was denied to her, and as a last resort she therefore comes to the Senate, where the treaty-making power is supreme under the Constitution, to renew her remonstrance against the ratification of this convention. She comes not under the surveillance of this or any other Government. No battleships are required to patrol her shores or ports to enforce contracts or treaty obligations. No foreign marines to occupy her territory and regulate by force her internal affairs. She comes, on the contrary, as a free, independent, and self-governing sister Republic to make this protest, confident in the belief that she will receive upon the merits of her cause the same consideration as if she were of equal rank and power with the Government of the United States. She comes not as an obstructionist to any reciprocal measures or policies that the United States Government may desire to enter upon and promote in full regard and respect for the honor and rights of independent States and the common welfare of herself and the people of the States of Central America.

The pulsations of this great artery of international commerce, if constructed and put in operation, will not be confined to the Republics of Costa Rica and Nicaragua alone, but go as well to stimulate the commerce and growth of all the States of Central America.

The distinguished arbitrator says in his award in finding 10 of the third clause "that the Republic of Nicaragua remains bound not to make any grant for canal purposes across her territory without first asking the opinion of the Republic of Costa Rica, as provided in article 8 of the treaty of limits of the 5th day of April, 1858."

This inhibition upon the granting power of Nicaragua grew out of the fact that the arbitrator had ascertained from the evidence before him in the case, as the fact is, that the property interests of the two Republics were so distributed, ramified, and intermixed throughout the territory and navigable waters of the canal route as to absolutely preclude any grant by Nicaragua alone "for canal purposes across her territory" without affecting the natural rights in lands and navigable waters and other rights pertaining thereto of Costa Rica, of which she was in actual possession and exclusive ownership.

The well-known purpose of this convention so far as it affects the rights and interests of the Nicaraguan Canal problem is not withheld from the public knowledge. It is well-known to the public that its purpose is not to construct and operate the canal, but to tie up in the strong hands of the Government of the United States its absolute control that it may not be utilized by any other interest in competition with the Panama Canal.

It is no more nor less than an attempt to effect this purpose through a convention with Nicaragua alone, negotiated with her, if not under duress, at least in the constructive presence of hostile military forces of the United States then occupying her territory, and by what amounts in law to an usurpation of the rights and interests of Costa Rica in the canal. In the light of the award it is no more nor less than a stroke of arbitrary power on the part of the American Government.

The Senate, we think, may well pause at this juncture of affairs to measure its evil effect, if consummated, upon the people of Costa Rica and of the States of Central America, and not less upon the vast American interests already established therein and dependent for their continued prosperity upon the amity and good will of these peoples.

The situation now before the Senate, as it may be briefly summarized, is as follows: At the Capitol of the Republic of Costa Rica has been erected a stately temple under the joint auspices of this Government and the Republics of Central America, within whose courts the Goddess of Peace holds the scepter. This was done to solidify and give permanent effect to the preexisting policy of peace and amity between these nations as a tribunal of civil procedure in the adjustment of controversies that might lead to war.

To the honor of Costa Rica, this sentiment has been kept alive through the administrations of the six distinguished citizens now living who have served the Republic as president in constitutional succession, and is still faithfully cherished and maintained by the present able and illustrious executive of that Republic, Don Alfredo González.

It was this sentiment that inspired the confidence of Costa Rica and Nicaragua in this Government to invoke its mediation, through President Cleveland, to secure a settlement of their pending contentions in a mutual bond of everlasting peace.

To ratify this treaty in disregard of the rights of Costa Rica would be in violation of this plighted faith, and would inevitably reopen with increased fury the old feuds and put the Republic of Costa Rica upon the offensive and the defensive in the maintenance of her rights as "nominated in the bond."

All of which is respectfully submitted.

JOHN N. POPHAM,
GEORGE C. HAZELTON,
Representing the American Business Interests in the Republic of Costa Rica.

WASHINGTON, D. C., *January 19, 1915.*

FOREIGN NATIONAL-DEFENSE SYSTEM (S. DOC. NO. 796).

Mr. CHAMBERLAIN. I present three papers, the first relating to the officers training corps of Great Britain, the second being on the Australian system of national defense, and the other the national-defense system of Switzerland. I ask that the three papers be printed as one document.

The VICE PRESIDENT. Without objection, it is so ordered.

THE MERCHANT MARINE.

Mr. WALSH. Mr. President, I desire to give notice that on Thursday, January 28, 1915, I shall address the Senate on the unfinished business, and with particular reference to the question of the transfer of the flag from belligerent to neutral vessels.

DISTRICT EXCISE BOARD.

Mr. HITCHCOCK. I ask to be relieved from service upon the special committee appointed by the Vice President to investigate conditions in the District of Columbia with reference to the action of the excise board.

The VICE PRESIDENT. Is there any objection? The Chair hears none.

ANILINE-COLOR INDUSTRY.

Mr. POMERENE. I ask unanimous consent that the Chair may lay before the Senate Senate resolution 520.

The VICE PRESIDENT. The morning hour having expired, the Chair lays before the Senate the unfinished business, which is Senate bill 6856. The Senator from Ohio asks unanimous consent that the Chair may lay before the Senate Senate resolution 520. Is there objection?

Mr. JONES. Let it be read.

Mr. FLETCHER. I do not object if——

Mr. POMERENE. It is simply a resolution calling on the Secretary of Commerce for certain information.

Mr. FLETCHER. I do not desire to have it displace the unfinished business.

The VICE PRESIDENT. The unfinished business was laid before the Senate at 1 o'clock, and it is now before the Senate. The Senator from Ohio asks unanimous consent for the present consideration of a resolution.

Mr. GALLINGER. Let it be read.

The VICE PRESIDENT. The Secretary will read the resolution, and the Chair will see if there is objection to its consideration.

The Secretary read Senate resolution 520, submitted by Mr. POMERENE on the 14th instant, as follows:

Resolved, That the Secretary of Commerce be, and he is hereby, directed to inform the Senate as fully as possible as to the facts relating to the supply of dyestuffs for American textile and other industries, the sources of such supply, the extent and nature of the supply, the movement of prices, the available materials for the manufacture of such supplies in this country, the possibilities, if any, as to the stoppage of such supply by reason of the existing European war, and any and all such other facts as will bring the existing conditions in the aniline color industry fully to the knowledge of the Senate.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. STONE. Mr. President, a parliamentary inquiry. Does the consideration of the resolution displace the unfinished business?

Mr. GALLINGER and Mr. SMOOT. Oh, no.

The VICE PRESIDENT. No. Is there any objection to the consideration of the resolution? The Chair hears none. The question is on agreeing to the resolution.

The resolution was agreed to.

THE SENATE MANUAL.

Mr. OVERMAN. I ask unanimous consent to have a resolution considered which is familiar to everyone in the Senate.

The VICE PRESIDENT. It will be read.

The Secretary read the resolution, as follows:

Resolved, That the Committee on Rules be instructed to prepare a new edition of the Senate Manual, and that there be printed 4,000 copies of the same for the use of the committee, of which 250 copies shall be bound in full morocco and tagged as to contents.

The VICE PRESIDENT. Is there objection to the consideration of the resolution?

Mr. SMOOT. I should like to ask the Senator from North Carolina if there is any necessity for that at this time?

Mr. OVERMAN. We are putting out a new edition of the manual now, and we want to have authorization for it. If we do not have the authorization, we can not get it out until the next Congress. This is the customary resolution which has been introduced here for 20 years.

Mr. SMOOT. I have always thought that in the past we printed too many editions of the manual. I do not see why we should print a new edition for this session.

Mr. FLETCHER. I call for the regular order.

The VICE PRESIDENT. There is objection to the consideration of the resolution, and the unfinished business is before the Senate.

THE MERCHANT MARINE.

Mr. FLETCHER. As directed by the Committee on Commerce, I ask leave to withdraw the amendment in the nature of a substitute to Senate bill 6856, the ship-purchase bill, presented on January 6, 1915, and to offer the amendment in the nature of a substitute for the original bill and all amendments heretofore reported thereto from the Committee on Commerce, which I send to the desk.

The VICE PRESIDENT. The Senator has the right and the amendment will be received, printed, and ordered to lie on the table.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes.

The VICE PRESIDENT. The pending question is on the amendment of the Senator from Massachusetts [Mr. LODGE] to the original bill, and the Senator from New Hampshire [Mr. GALLINGER] is entitled to the floor.

Mr. GALLINGER. Mr. President, I have been carrying around with me for several days some valuable thoughts on the pending bill hoping that I would have an opportunity to present them, but apparently there has been a disposition on the other side of the Chamber to keep me from doing so. On Saturday last a recess was taken covering the entire day, so as to permit our Democratic friends to hold a caucus, and this morning a great deal of extraneous matter has been submitted which has consumed two hours of valuable time.

Mr. President, in view of the apparent purpose of the Democratic majority to make it appear to the country that they are deeply solicitous to rehabilitate the American merchant marine, and that the bill under consideration is designed to accomplish that purpose, I beg to call attention to certain votes which have been taken in the Senate on the subject during the past 10 years. In addition to the instances that I shall cite, other efforts have been made by the Republicans to secure legislation on the subject which were either defeated in the Senate by Democratic votes or in the other House by a solid Democratic vote and the votes of a few Republicans from the Middle West. The votes to which I wish to call attention are the following:

Senate bill 3739, passed the Senate July 12, 1890. The yeas were 28, the nays 16; Republicans, yeas, 27; nays, 1; Democrats, yeas, 1; nays, 15.

Senate bill 1348, passed the Senate March 17, 1902; yeas, 42; nays, 31. Republicans, yeas, 41; nays, 8; Democrats, yeas, 1; nays, 22; Populists, nays, 1.

Senate bill 529 passed the Senate February 14, 1906. Yeas 38, nays 27; Republicans, yeas 38, nays 6; Democrats, yeas 0, nays 21.

Senate bill 28 passed the Senate March 20, 1908, upon which there was no roll call, the Senate by a viva voce vote voting unanimously for the bill, which failed in the other House.

Senate bill 6708 passed the Senate February 2, 1911, yeas 39, nays 39. Republicans, yeas 39, nays 13; Democrats, yeas 0, nays 26. The Vice President voted in the affirmative and the bill was passed.

On another occasion a bill passed the Senate, was slightly amended in the House of Representatives, and the amended bill returned to the Senate. An effort was made to agree to the House amendments, but the bill was filibustered to death by Democratic Senators.

At a later date Mr. President, I may present some data relating to the matter of so-called filibustering in the Senate, which has been discussed more or less during the past few days.

Since I came into the Senate this morning I have had placed on my table an amendment in the nature of a substitute for the bill which we are now considering. It is marked "Confidential," but I believe it is the same amendment the Senator from Florida [Mr. FLETCHER] submitted an hour ago, having withdrawn all amendments which had been previously offered. So, as I understand the matter, this amendment is now the bill of the majority, and it is to be considered as the committee bill.

Owing to the fact that this substitute amendment has been submitted this morning, which I believe is the third or fourth substitute that has come from the committee during the time we have been debating this measure, it occurs to me it has been a very fortunate circumstance for the majority that we have insisted upon full and free debate on this great question, because, Mr. President, if we had been forced into a vote at any time prior to the present moment we would have been voting upon a measure that the Democratic majority does not now sanction. For that reason the minority has rendered not only the country, but the majority of this body, a real service in insisting that this matter should be fully debated before action was taken upon it. We have given them opportunity to reconstruct their bill several times.

I repeat, Mr. President, in view of that fact the minority have rendered the majority a real service in debating this bill until they could have time in their various caucuses to give this matter the consideration which has at last resulted in the substitute that is now before us.

In glancing over this new bill I notice two or three things that are of interest. I will merely call attention to them at the present time in a word, possibly taking them up later on when we have progressed further in this debate, and then consider them at greater length.

In the last session, Mr. President, the American merchant marine over seas having been practically wiped from the oceans of the world, foreign nations having taken control of the commerce of the seas to the practical exclusion of American shipping, certain Senators were very anxious that those foreign vessels should be put into the coastwise service of the United States so that that magnificent fleet of coastwise steamers which has been built up by private enterprise and by private energy and by private capital should have as competitors the fleets of the other great maritime nations of the world. That matter was discussed at length. When a vote was taken the proposition was defeated by a vote of 2 to 1. It is now proposed in this new draft that the ships which are to be built under the provisions of this law shall be put into the coastwise service of the United States. In other words, Mr. President, defeated in their purpose to open the coastwise shipping to foreign nations, they now propose to get the camel's nose into the tent by admitting into the coastwise service these vessels which are to be built ostensibly for the foreign commerce of our country. It is a dangerous proposition and one, Mr. President, that I feel sure will be resisted with a great deal of force and energy on this side of the Chamber.

They have also reconstructed the shipping board, and in that respect I think they have acted wisely. I am glad that the minority of the Senate gave them an opportunity to do this, listening as they doubtless have to the protests of the press and the utterances of public men against putting the shipping of the United States into the hands of three cabinet officers, making it a political machine, as the Reserve Board has been made a political machine by the present administration and the majority in Congress.

They propose to do another somewhat remarkable thing in this bill. Turning to page 7, I read:

> All rules and regulations relating to or which affect shipping, navigation, or water-borne commerce of the United States, heretofore made or published, by authority of law, shall only be and remain in force until midnight on the 31st day of December, 1915, and by proclamation of the President shall cease to have any force or validity at any prior date when new shipping rules and regulations shall as provided hereby take the place of those now in existence.
>
> The Shipping Board herein provided for shall propose such rules and regulations applicable to the shipping and water-borne commerce of the United States in lieu of those now in force and covering matters of like character as they may determine suited to the present needs of such shipping and commerce, which, when approved by the President and published, shall apply and become of full force and effect in lieu of such rules and regulations as are now applicable thereto. In the rules and regulations hereby authorized to be adopted and put into force different classes of shipping, navigation, and water-borne commerce may be appropriately and differently treated and provided for. Such rules and regulations when promulgated may be modified, changed, or amended by the Shipping Board.

It will be observed, Mr. President, by the language of the bill itself that the rules and regulations which it is proposed to modify and annul were adopted by authority of law. But it is now proposed to throw them aside and give this Shipping Board authority to make rules and regulations governing the commerce of the United States.

Mr. NORRIS. Mr. President——

Mr. GALLINGER. I yield to the Senator from Nebraska.

Mr. NORRIS. That particular provision of the new substitute just offered attracted my attention this morning when I read it. I should like to have the Senator, if it will not divert him from his line of argument, to explain briefly the present shipping rules, stating what are the principal objects, and so forth. It is a subject which was not touched on, as I remember it, in the prior substitutes of this bill. Some of us do not understand just exactly what is the object of this particular new section of this substitute.

Mr. GALLINGER. Mr. President, that matter will be discussed by me, and doubtless it will be discussed by other Senators a little later on. It is impossible for me off-hand to give the rules and regulations that are now in vogue and which have been enacted by authority of law. I shall take occasion, as I had intended to do, to call upon the department to supply me with all those rules and regulations as they now exist, and when they are before me I shall see that they are presented to the Senate. They will then become a proper subject of discussion and we shall be able to determine whether or not it is wise in this bill to annul all those rules and regulations and put in a shipping board authority to make other rules and regulations. I do not know how serious the matter is, and I call attention to it to-day simply in passing as a question that may be of very great importance and one that ought to be looked into very carefully before it is agreed to.

Mr. SAULSBURY. Mr. President——

The PRESIDING OFFICER (Mr. POINDEXTER in the chair). Does the Senator from New Hampshire yield to the Senator from Delaware?

Mr. GALLINGER. I yield to the Senator.

Mr. SAULSBURY. I desire to say, regarding the provision which is referred to by the Senator from New Hampshire, that I am rather glad I am able to assume responsibility for fathering that provision of the bill. I had assumed that the Senator from New Hampshire would be in hearty accord with an effort which I might make to reconsider and revise the present shipping rules and regulations. Though my service in this body does not entitle me to speak with certainty, I understand that the Senator from New Hampshire has been most earnest in his efforts to provide for a reconsideration and a revision of all our shipping laws, as well as the rules and regulations which have been made by various bureaus, located in Washington chiefly, under the authority of existing laws.

The provision to which the Senator has referred, and of which I can not now tell whether he approves or disapproves, I believe will be one of the great means of reforming the system under which we are now living. There are laws regarding our shipping and there are rules and regulations made pursuant to laws by certain officers of various bureaus. It is the object of this provision, so far as those rules and regulations now apply, to force a reconsideration by a body of men who will reconsider them and promulgate new rules in lieu of them, or, if they consider them good, readopt the existing rules, so that our shipping and navigation laws may be up-to-date and not obsolete, preventing a great deal of commerce, when by a change in a very few simple matters there might be a considerable increase in commerce.

I think upon consideration the Senator from New Hampshire will agree with me that a provision of this character is very

desirable. I shall try at some future time during the debate to give instances with which I imagine the Senator from New Hampshire may be familiar where the present rules and regulations militate against the shipping of the United States, particularly our coastwise shipping.

Mr. STONE. Mr. President, I rise to a parliamentary question.

The PRESIDING OFFICER. The Senator from Missouri will state it.

Mr. STONE. I will ask the question of the Senator from New Hampshire. Does he consider the interruption he permitted by the Senator from Delaware to have been made to ask a question or to make a speech?

Mr. GALLINGER. The Vice President yesterday ruled that an interruption of this kind might be allowed without imperiling the right of a Senator having the floor to continue. I presumed that that was understood. It certainly is in accordance with the custom that has always heretofore prevailed in the Senate.

I will say in reply to the Senator from Delaware that I have not been in any propaganda nor have I been over-anxious to have the navigation laws of the United States entirely overhauled. I have thought that there were some laws relating to navigation that might well be amended and perhaps some of them might well be stricken from the statute books. As to the rules and regulations I am not prepared to speak with any degree of authority or with any degree of knowledge. I notice that they were enacted, according to the amendment, by authority of law. I observe that now without authority of law we are to have a new set of rules and regulations made by a board. It may be wise. I say frankly to the Senator from Delaware that I shall certainly be delighted to hear him on that subject, and I will endeavor to acquaint myself with the facts before I come to vote upon the proposition.

I do not want the Senator from Delaware to think that I am in unyielding opposition to the proposition, because I am not. I simply called attention to it as apparently a radical departure from existing conditions, and for that reason it occurred to me that we might well pause before committing ourselves to it, and give it careful consideration, with a view to taking enlightened action when we came to cast our votes.

Mr. ROOT and Mr. SAULSBURY addressed the Chair.

The PRESIDING OFFICER. Does the Senator from New Hampshire yield, and to whom?

Mr. GALLINGER. I yield first to the Senator from Delaware.

Mr. SAULSBURY. I wanted simply to correct an apparent misapprehension into which the Senator falls. The rules and regulations, of course, which are referred to in this section are those which have been adopted under existing laws. If this amendment shall pass, and the shipping board be given authority, of course the shipping board will have the same authority to adopt new rules that the former officers had to adopt the existing ones.

Mr. GALLINGER. I understand the matter. I now yield to the Senator from New York.

Mr. ROOT. Mr. President, I want to make a suggestion at this point which it occurs to me may be useful in the future. I can put it in the form of a question if it is considered necessary, but I shall not trouble to do that unless it is deemed necessary. It is this: This new provision, which, of course, none of us who are not caucus members have had an opportunity really to consider, and which has been presented here this morning, vests in the shipping board the power to make regulations. The bill also vests in the shipping board power to carry on business through a corporation. If the establishment of that new business through the shipping board is not to drive out all other American merchant marine, there will then be competition between the business carried on by the shipping board through this District of Columbia corporation and the business carried on in private enterprise by owners of American ships, and we ought to be pretty careful before we put into the power of one competitor the making of rules that are going to govern the other competitors. There ought to be a very definite statement of what is to be the scope of the quite indefinite authority that is proposed to be given by this new provision.

Mr. GALLINGER. I fully agree with the Senator from New York on that point.

Passing from that question, I venture to suggest, Mr. President, that the remarkably able and persuasive argument made by the senior Senator from New York [Mr. ROOT], one of the ablest jurists of the land, on yesterday, might well have concluded this discussion, but evidently the proponents of the bill are still intent upon pressing it, without reference to its consequences upon either national or international interests. As a consequence those of us who see grave peril in this proposed legislation must continue the discussion, to which I will now endeavor to make a contribution, even if what I say or the manner in which I say it may not meet the approval of the Senator from Mississippi [Mr. WILLIAMS], the Senator from Missouri [Mr. STONE], or the Senator from Indiana [Mr. KERN].

First, I would like to ask when a perfected bill, representing the views of the majority, may be expected?

Mr. President, I wrote that on yesterday, and I presume the answer would be that I have a perfected bill now before me. I am glad that after this long period of incubation the majority has presented what they doubtless regard as a perfected bill—perfected until the next draft is presented to the Senate.

The truth is, we are having a moving-picture exhibition day by day, the screen each morning displaying a different view from the one we looked on the day before. When will this kaleidoscopic performance cease so that we may know what kind of a bill the majority stands for? As already suggested, the third edition of the bill proposes to put these ships built for the foreign trade into the domestic trade—a new and dangerous proposition.

I would also like to ask what routes are contemplated beside those to Central and South America? What are the "and elsewhere" routes? Are they to be across the North Atlantic, across the Pacific Ocean, or where? We are entitled to know, and we ought to know precisely what is contemplated in that respect.

We are also entitled to know why the appropriation bills—the supply bills of the Government—should not now be taken up and considered. One great appropriation bill is now ready to be reported and others are practically ready. Why are those bills held back? What is the purpose of the majority in this respect?

I trust, Mr. President, that it may not become necessary for Senators from time to time to move to discharge the Committee on Appropriations from the further consideration of appropriation bills, so as to pass them before this session ends.

I was gratified to observe, by an observation from the Chair yesterday morning, that questions such as I suggest may be propounded and answered without the Senator propounding them losing the floor, as had been heretofore hinted would be the result. This gives us hope that after all we may have some debate on this bill before the physical powers of the minority are worn out by long hours and unusual legislative procedure.

It is only natural that there should be some speculation as to the reason why so strong an attempt should be made to force this bill through Congress. The mere fact that the President declared himself in favor of the proposition—apparently before he had fully considered it—furnishes no reason why he should refuse now to change his position and insist on having his way. This seems especially so in view of the President's attitude at the time he was urging Congress to reverse itself by repealing the provision of the Panama Canal act exempting American coastwise vessels from payment of tolls. In his message at that time the President said:

> The large thing to do is the only thing we can afford to do, a voluntary withdrawal from a position everywhere questioned and misunderstood.

The present instance seems to afford a splendid opportunity for the President to practice what he preaches, and that, too, without repudiating a plank in the Democratic national platform.

The Senator from New York has eloquently registered his protest against the methods being employed in this body. But we are not alone in this. The newspapers of the country are protesting and the people of the country are loudly protesting against it. Here is an illustration which has come to my personal attention. A distinguished Democratic Member of the House of Representatives in conversation on Saturday last said:

> Never in the history of the world has there been an organization or any body of men so weary, worn, and so completely spent as this present Congress of ours.
>
> Never in the history of our country or in that of any country under the sun have the people been so tired, disgusted, and sick of the doings of any legislative body as are our people in this country right this minute.
>
> We are worn and weary, thoroughly fagged. We are irritable among ourselves, and we can not legislate properly, even if there were any need whatever for further legislation. The people for whom we are assuming to legislate want nothing further forced upon them. They are sick of us. We are all pretty tired, but we must go on.

I wonder why we must go on?

What I have quoted recalls the nine days' bloody fight in Mexico City when the then President was importuned by

his cabinet and advisers to resign, as other countries were threatening to intervene and stop the orgy, and Mexico would lose her independence. Mad Madero returned the answer:

The spirits of Bonaparte and Cromwell are directing me, and they say "fight on"—so I say "fight on." We will fight on until not a stone is left in Mexico City and until every Mexican soldier lies dead.

So they fought on, as the administration is fighting on, and heaven only knows what the result will be either in Mexico or here. Again I ask why not pass the appropriation bills and stop? Why must we continue to go on considering this bill? The legislative judgment is against it. Why not follow our convictions on the subject?

Mr. President, our Democratic friends keep us absolutely in the dark as to what has been going on in their daily and nightly caucuses, and as a result we must look to the enterprising represenattives of the press for information. Turning to the Washington Post of a few days ago I find on the front page an article with the following headlines:

PLEDGED BY CAUCUS—SENATE DEMOCRATS ENTER PACT TO STAND BY SHIP BILL—HALF A DOZEN UNYIELDING—FIGHT OVER LEGISLATION LIKELY TO BE THE BITTEREST IN YEARS—ADMINISTRATION HAS DECIDED TO THROW OVER ALL THE APPROPRIATION BILLS IN ORDER TO DRIVE SHIP-PURCHASING MEASURE THROUGH—REPUBLICANS STAND READY TO EMBARRASS WHENEVER POSSIBLE—KERN CONFIDENT OF VICTORY.

The article, for the absolute correctness of which I do not vouch, reads as follows:

By a vote of 37 to 3, Senate Democrats in the caucus yesterday made the administration ship-purchase bill a party measure and passed a resolution binding every Democrat to its support. Senators HOKE SMITH of Georgia, BRYAN of Florida, and THOMAS of Colorado voted against the resolution, but after being defeated joined in to make the action unanimous.

The resolution was offered by Senator FLETCHER. It provides, first, that it is the sense of the caucus that the ship-purchase bill shall be enacted into law; second, that it shall be made and kept the unfinished business of the Senate until concluded; third, that the Democratic Members of the Senate hereby pledge their full support to the measure.

The vote cast for this resolution was more than two-thirds the majority membership in the Senate. Several years ago the Democratic caucus, under the leadership of former Senator Blackburn of Kentucky, decided that a two-thirds vote in caucus was binding upon every member of the party. That action has never been set aside.

While administration leaders assert that no Democrat can vote against this bill and escape the charge of bolting his party, it is understood the following Democrats will not support it unless materially amended:

I omit the names of those Democratic Senators, and continue to quote:

Senator VARDAMAN said last night that no caucus action could bind him to support a bill in which he did not believe. Senator HARDWICK said he would not be bound by the caucus action, having made a promise to his constituency against Government ownership. He will fight the measure on the floor, and his skill as a parliamentarian is counted on by the opponents of the bill.

The newspaper article then gives the names of certain Senators on the Republican side who will support the bill and also the denial of Republican Senators that more than one of the minority will vote for the measure. The article then proceeds to say:

An important amendment agreed to yesterday accomplished in a measure what was unsuccessfully attempted in the Panama Canal Act. This amendment will permit any ship built in the United States under the provisions of this act for the over-seas trade to also engage in the coastwise trade.

It will be observed, Mr. President, that this enterprising newspaper man several days ago had definite information as to what was to be presented this morning in the shape of the amendment in the nature of a substitute for the pending bill. The article continues:

This amendment * * * was offered to section 5 of the bill which prohibits foreign ships acquired from engaging in the trade with Porto Rico, Hawaii, the Philippines, Guam, and Tutuila.

To the extent, at least, of opening the coastwise trade to ships hereafter built in this country, regardless of their intended use in ocean commerce, the caucus by this amendment has struck at what Democrats have always characterized as the "coastwise shipping monopoly." The only opposition grew out of the fact that the present emergency related to our foreign trade and not coastwise, and the fear that the adoption of this amendment might bring the coastwise trade shipping lobby into the fight against the measure. It was agreed to, however, without serious opposition.

As perfected in caucus, the bill provides for a shipping board to consist of the Secretary of the Treasury, the Secretary of Commerce, and three civilians, to be appointed by the President, with the consent of the Senate.

Again, Mr. President, that shows how accurate this enterprising newspaper man was in getting the proceedings of the Democratic caucus on this great question.

The only other amendments to the original bill of material nature was one to incorporate the proposed ship corporation under the laws of the District of Columbia, and another to provide that the original capital stock of $10,000,000 can be increased at any time only to the extent of $10,000,000 more.

All indications now point to the most determined and relentless battle waged over an important piece of national legislation since the Aldrich-Vreeland currency act was adopted.

It will be remembered, Mr. President, that that filibuster against the Aldrich-Vreeland currency act was carried on by the Senators on the other side of the Chamber and not by Republican Senators; and it was a filibuster that has had few parallels in the history of our country.

The administration has decided to throw overboard all the appropriation bills and permit them to become flotsam and jetsam on the congressional seas in order to drive the ship purchase bill safely into port. Republican opponents will attempt to embarrass Democrats by urging the passage of measures in which the proponents of the bill are deeply interested, such as the river and harbor bill and the war-claims bill.

There are two bills that are very dear to the Democratic heart. Just think of how the mail of the senior Senator from North Carolina [Mr. SIMMONS] must be burdened with demands upon him to put through appropriations for the rivers and creeks of that State. Just think how the Senators from North Carolina, South Carolina, Tennessee, Georgia, Kentucky, and other Southern States must be importuned at the present time to pass the so-called omnibus claims bill appropriating money almost exclusively for those States.

The article from which I have been reading, and which is so illuminating and authentic, because it foreshadowed exactly what the committee has done, continues:

Sessions of the Senate lasting eight and ten hours will be resorted to before long to "expedite" passage of the bill. Finally, as a last resort, the device of a continuous session will be tried in order to exhaust the filibusters.

"We shall keep the bill before the Senate until it is passed," said Senator KERN, chairman of the caucus. "There is no disposition to displace it with any appropriation legislation. We will urge it as rapidly as possible, giving every opportunity for discussion. Whether we shall hold night sessions or continuous sessions has not been determined. Much will depend on the future course of the opposition."

Here are the grounds on which the opposition is conducting this fight:

That the bill is the opening wedge of Government ownership.

That, Mr. President, is largely the ground upon which I am opposing this bill and which I will discuss when I reach it.

That it is socialistic and may lead to Government control of other instruments of trade and industry.

Of course it will; that is the purpose of it.

That it threatens serious international complications because of the administration's anticipated purpose to buy ships of belligerent nations and enter them in the foreign trade during the present European war.

The country believes that, whether the majority of this body believes it or not, the economists of the country believe it; the newspapers of the country believe it; and I shall show that there is a protest, loud and deep, against our taking any chances in the purchase of belligerent ships during the terrible war in Europe that may drag us into war with one or the other of those nations at some time.

That there is no necessity for the Government buying ships to put them in the South American trade, since there are more ships now plying on these trade routes than are sufficient to accommodate the business offered.

I will endeavor to show, Mr. President, at the proper time, that so far as present commerce is concerned, there is an abundance of ships plying between the United States and Central and South America. I am in favor, however, of legislation that will enable the Government to put some fast mail ships on those routes, a proposition for which I have argued in season and out of season during the past 10 years, and which I think, after the war closes, if not before, would be exceedingly wise and beneficial legislation. The article concludes:

That for the Government to purchase ships will paralyze existing shipping corporations, since they will be unable to compete with the Government on any route which the Government enters.

Of course, that will result. No private party can compete with the Government with the funds of the National Treasury at its command, and with $40,000,000 in this bill, with which to make a commencement, what private individual or what private corporation will undertake to compete with the Government on any route that may be selected if this bill shall pass?

Mr. President, I approach the discussion of this question with some trepidation, for has it not been said from the "seats of the mighty" that those of us who oppose this bill are either misguided, blind, or ignorant; and has it not been further said, that no matter what position the ignorant, minority of this body may take the bill is to be passed? And has it not also been said that we have the termerity to oppose this bill without going to the other end of the avenue, and telling the head of a coordinate branch of the Government why we dare do such a thing? Probably the President thinks, in the language that has recently been incorporated in a bill which passed this body, that most of us are suffering from "constitutional psycopathic inferiority," or something of that kind.

But, Mr. President, notwithstanding the suggested inhibition of individual thought and independent action on this great

question, I propose to deal with it as I think best, unhampered by the views of others, and undismayed by the criticisms of those in high authority.

We are asked where we get our credentials to stand in the way of the proposed legislation, and we answer that we get them from the same source that elected President Wilson to make recommendations to the Congress, and to administer the laws, but not to dictate legislation. Where is the clause of the Constitution to be found that takes from the Congress the freedom of legislative action, the right to amend or reject bills, or the right to originate legislation without let or hindrance? It is well that this should be understood. That it has been lost sight of to a large extent is no excuse for its continuance.

Verily, Mr. President, we have fallen on strange times if the voice of the minority is to be stilled by either Executive declaration or manifesto from the majority. Others may subscribe to that doctrine, others may agree to the charge that the Republican Party has not had an idea in 30 years, but for myself I repudiate it. The history of the Republican Party for the last 30 years is replete with splendid achievements and magnificent results, and the Republican Party will soon return to the power that was temporarily wrested from it by conditions that do not exist to-day. The one great legislative achievement that the Republican Party failed to accomplish was the enactment of a law that would have put American ships on the great overseas routes of trade; and that failure was almost entirely due to Democratic filibustering. The senior Senator from Missouri, lifting his eyes and assuming an attitude of reverential distress has told the Senate that he has already seen indications of filibustering on this bill, but the Senator from Missouri has not to look far back in the past to discover real and successful filibustering on another merchant marine bill, which procedure received the approval of the Senator from Missouri, if, indeed, it did not receive his valuable and influential support. Probably the Senator from Missouri has forgotten the day when 39 calls for a quorum were made in the interests of the Democratic minority, using more than one-half of the calendar day in that way, followed by 20 calls on the next day. The Republican majority protested then, but in vain; but now the minority is to be run over rough-shod if the well-known plans of the leaders of the majority prevail.

So, Mr. President, let us be fair with each other. Everybody knows that the bill under consideration is a far-reaching measure, full of doubts and uncertainties. Everybody knows that it proposes to overthrow the traditions and policies of our Government, and venture out upon an untried sea, without chart, compass, or the results of experience to guide us. Private enterprise, private initiative, and private genius are to be supplanted by governmental activities in an experimental field, where profit is impossible and failure a practical certainty. Can it be expected that those of us who do not believe in Government ownership of the means of transportation should sit dumb while what we conceive to be false and disastrous economic theories are being put in operation? Can this be expected of us, even in response to the dictum of the captain of the Democratic team, to use the words of the captain himself?

Mr. President, the great and overwhelming proposition contained in this proposed legislation is that of Government ownership, and to that I propose to address myself at some length. I remember when the great Democratic orator, who had twice been a candidate for the Presidency, returned from a tour around the world, and was greeted by an admiring throng in Madison Square Garden, what a shock he gave to his Democratic hearers when he advocated Government ownership of railroads. You all remember it. From all sides came the declaration that the utterance would bar their great leader from the Presidency. What has since then come over the spirit of the dreams of the Democracy to work this change? Or am I well informed when I say that I do not believe a majority of the proponents of this bill really believe in it, but are being driven by the force of party discipline and Executive power to support it? That may be denied, but nevertheless I believe it to be a fact. The Democratic leader in the White House demands that all Democrats shall work together along the line marked out by him, and he warns his party that unless they work together they are to meet with his disapproval.

As I have said, Mr. President, the most vital and far-reaching point in this discussion is the matter of Government ownership, and it will be my endeavor to show, before taking up the shipping part of the argument, that the proposition is quite generally condemned in the country, and wherever tried has proved anything but a success. Theorists see nothing objectionable in the proposition that the Government shall buy and operate the railroads. To them the fact that the purchase price would be five or six times as much as all the money in circulation throughout the country is a matter of little consequence. Their vision does not extend beyond the fact that they want the Government to engage in business enterprises to the sure destruction of private enterprise and private capital.

Let me call attention to the storm of disapproval that has burst forth since the proposition to put the Government in the water transportation business of the country has taken shape.

Mr. F. G. R. Gordon, a leading labor representative, delivered an address before the National Civic Federation in New York City last December on the question of Government ownership of telegraph lines, which is so replete with wisdom that I will quote it, although I do so, Mr. President, with a feeling that some Senators will doubtless think that I ought not to consume the time of the Senate in presenting to them the views of this very able labor representative, who is also a well-recognized economist. Mr. Gordon said:

> The most common argument made in favor of the socialization of the telegraph and telephone is that under private ownership they are a monopoly, operated for profit, with high rates and poor service, and that by having the Government own and operate them they can become a part of the postal system with large economies in operation, and in turn supply the people with cheaper rates, good service, and higher wages to the men and women who operate the lines, and, lastly, provide a surplus for the Government.
>
> I shall prove just the opposite of all this glittering dream; I shall prove that wherever the telegraph or the telephone have been socialized there is extremely poor service, with large financial losses, low wages for employees, and rates that, on the whole, are fully as high as they are in this country and in many instances higher.
>
> Nearly all the nations of Europe, as well as New Zealand and Australia, own and operate both telegraph and telephone systems and have done so for many years.
>
> The alleged "success" of our Post Office Department is used as an argument for the further extension of the socialization of the means of communication. But as a matter of fact, there are fundamental differences existing between the social function of the post office and the work of the telegraphs and telephones. The mail service is universal; it requires mostly only the simplest character in its operation; its work is to a great extent performed by private common carriers. But, despite its comparative simplicity and ease of operation, our post office has not been a financial success from any standpoint. All the gains, where any have been made, have come from the private-ownership features of that business.
>
> The Hon. DAVID J. LEWIS, author of the bill to nationalize the telephone system, asserts that 1.85 per cent of the business of the post office is franked, and that but for this free transportation and the further fact that 29.24 per cent of the business pays only 5.19 per cent of the revenue, our Post Office Department would have paid an annual profit each year since the Civil War. This is merely a half truth and assumption, and in this case the half truth is pretty bad. In the first place, if that 1.85 per cent of franked mail were not free, three-fourths of it would not be sent through the mails at all, so Mr. LEWIS is 75 per cent wrong there. And the same thing is true of at least half of the 29.24 per cent which he says pays 5.19 per cent of the revenue. Congressman LEWIS is either not very familiar with these facts, which are self-evident, or he is merely a dreamer of strange dreams. And as for the franking privilege, he ought to know that the Post Office Department is the recipient of large favors from Uncle Sam which rightly are a part of the expense of conducting the business, but which are paid for by the Treasury Department.
>
> The most striking example of this last statement is that the Postal Department does not build or care for the public buildings which it occupies. While the post office does an annual business, on both sides, of about $600,000,000, it has only five or six million dollars of capitalization for the entire Nation. Even some of the salaries of the staff are paid out of the other departments; the Postmaster General, Assistant Postmaster General, the Assistant Attorney General, and the subsidiary general officials connected with these officials are not paid from the postal revenues. The expenses of this character, as shown by an examination of the appropriation act of March 4, 1913, will amount in 1914 to $1,913,350. In the appropriations for the Treasury Department we also find that for the office of Auditor for the Post Office there was appropriated for salaries for postal savings system and other expenses the sum of $766,620, with an additional sum of $18,000 for the postal savings banks and $5,000 for the Department of Justice for the Attorney General for the Post Office. This figures up a total of $2,702,970 of expenses that legitimately belong to the Post Office Department, but which are met by other departments. It is quite pertinent to ask Congressman DAVID J. LEWIS, public-ownership advocate, why he failed to give us this information.
>
> Vastly more important than these expenditures are those for public buildings and their repairs and care. In the 12 months from July 1, 1911, to June 30, 1912, the total cost for public buildings and their care amounted to the great sum of $22,660,212.85, and at least 75 per cent of this outlay legitimately belonged to the post office, and was paid by the Treasury Department. Keeping in mind the statement of Congressman LEWIS that but for the franking system, etc., the post office would have paid every year since the Civil War, I point to the fact that the entire revenue of the postal system from 1865 to 1913 was $3,775,838,529, and the total gross expenditure was $4,055,106,045. This shows a direct loss of $279,267,516 in these 48 years. The indirect losses were millions more. For instance: The public buildings used exclusively for the post office had cost for construction, sites, and extensions and alterations the sum of $58,991,738.42 up to June 30, 1912. And other buildings which were jointly used by the post office, customhouse, etc., had cost $127,080,549.68. If we allow but 75 per cent of this last cost to the postal service, then we have a total up to June 30, 1912, of more than $153,000,000 as a capital investment which properly belonged to the post office to pay interest upon, though it paid not a cent. The annual interest charge at 4 per cent would amount to $6,000,000. When Congressman LEWIS was using the post office to bolster up his argument for a socialized telephone he did not give us this very valuable information. Take this interest charge and the cost for salaries paid by other departments which should be paid by the post office, amounting to nearly $3,000,000, and the care for the public buildings, their extension and repairs, we have a total annual deficit of more than $14,000,000 on the average for every year

since 1865! Here is a grand total loss of $672,000,000 in 48 years, and this is what public-ownership advocates call a "success."

Just now these advocates are boasting of the wonderful success of the parcel post. The alleged facts about that much-praised system are simply mere half truths. The mails are weighed once in four years, and the railroads are paid on this basis for the succeeding four years. Nearly every railroad official in the country is complaining of inadequate pay for this service. Some statistics will tell why the postal revenues for 1907 were $183,585,000 and for 1912 they were $246,744,000, or an increase of $63,159,000. The railway mail pay in 1907 was $51,008,000, and in 1912 it was $50,703,000. In other words, while the mails were increasing several hundred million pounds the railway mail pay was decreasing. This was before the parcel post was established, January 1, 1913. The service was inaugurated with a weight limit of 11 pounds, and for the first six months the railroads received no compensation whatever for this greatly increased business. On July 1, 1913, all the railroads which did not have a weighing in the spring of 1913 were allowed an increase of 5 per cent for mail transportation. A month later the Postmaster General increased the weight limit to 20 pounds, and on January 1, 1914, a further increase was made. This naturally produced a large increase in the volume of traffic, which the railroads were forced to carry absolutely free. It was estimated that the parcel post would carry 600,000,000 packages for this year (1914), and that it would yield a revenue to the Post Office Department of $60,000,000. This is how Uncle Sam makes money on the parcel post.

If a shoe manufacturer had free rent and heat for his plant and paid only 75 per cent for the cost of transportation for 100 per cent of service, is there any reason why he should not make a howling success while his competitors all about him were failing? As a matter of fact, the Post Office Department is underpaying the railroads to-day to the extent of from $20,000,000 to $30,000,000 annually, and at the same time is losing about $14,000,000 every year on the average, if we take all the facts into consideration. It's about time that the enthusiasm directed upon blindly lauding the Post Office Department be concentrated upon a constructive effort to overhaul the system and remedy its glaring defects. It is the worst managed big business in this country, and talk of its success simply encourages the growth of the socialistic idea in other lines, and more especially as to railroads, telegraphs, and telephones. Uncle Sam pays the railroads less than 20 per cent of the total expense of the Postal Service, while the British Post Office pays 24 per cent in general and 55 per cent on the parcel-post business.

Fortunately for us, other nations have socialized both telegraph and telephone systems, and therefore comparisons between private and public ownership can be shown. In both Europe and Australia the publicly owned telegraph and telephone has passed far beyond the experimental stage. I propose to show by facts and statistics that Government ownership of these means of communication has resulted in failure. In the first place, let me point out the foolishness of attempting to socialize the telephone and leaving the telegraph under private control. Governments of Europe which had public ownership of the telegraph socialized the telephone just as soon as it was demonstrated that it could carry conversation, for the very reason that they did not dare to face competition, and, likewise, if we are to socialize the telephone we must also own and operate the telegraph or else suffer a competition that Uncle Sam can not successfully meet. It is assumed by the advocates of public ownership that the telegraph and telephone can be consolidated with the Post Office and thus save large expense in operation. It is, however, the general outcome in the administrations of the several nations of Europe that this does not work out in practice and that the supposed economies do not materialize.

TELEGRAPH RATES COMPARED.

A great deal of loose talk and misstatement has been made regarding rates on the publicly owned telegraph systems of the world. A very important fact in connection with this is that in Europe the address and signature are both counted as a part of the message. Take the telegraph system of Great Britain as an example. It looks like a very cheap service when we hear that a 12-word message is sent over the wires of Great Britain for 12 cents. But if you send a message from London to Liverpool, you will naturally give the city and street address and the names of sender and receiver. This will consume at least 10 words, leaving only 2 for the text, or in reality 6 cents a word, as compared with the method in this country where the address and signature are not counted. The following table shows the different rates in Europe for a 10-word message, with address and signature, allowing 10 words for address, etc.

France	$0.193
Norway	.268
Belgium	.116
Sweden	.268
New Zealand	.200
Great Britain	.200
Germany	.238
Italy	.212
Denmark	.268
Austria	.244
United States	.250 to $0.300

The corresponding rates for 10-word messages, allowing 5 words for address and signature, are as follows:

France	$0.102
Norway	.201
Belgium	.096
Sweden	.201
New Zealand	.15
Great Britain	.15
Germany	.179
Italy	.164
Denmark	.201
Austria	.183

For the preferred rates we find that several countries in Europe actually charge from two to three times higher than we pay in this country, allowing 10 words for addresses and signature. In Germany, for example, the rate is 71.4 cents; in New Zealand it is 40 cents; in Italy, 63.7 cents; in Austria it is 73 cents. In Great Britain there is no urgent rate. Urgent or preferred rates in the United States are on the above basis—25 to 30 cents. Allowing only 5 words for address and signature, the preferred rates for 10 words of text would be: Germany, 53.6 cents; New Zealand, 30 cents; Italy, 49.2 cents; and Austria, 54.9 cents.

With the exception of Russia, all the countries of Europe are small compared with the great territory of this country and Canada. The trade and commerce of Europe may be compared in practice with that of the different States or Provinces of this hemisphere. Thus the international messages all over Europe are numerous, as is natural among more than 300,000,000 people living mostly within 2,000 miles of one another. Twenty-seven per cent of the telegraph messages in France are domestic noncommercial and international inward and transit telegrams; 50 per cent in Norway; 44 in Sweden; 51 in Switzerland; 24 in Germany; 25 in Italy; 40 in Austria; and 10 in Great Britain. An ordinary message of 15 words, which includes the address and signature, sent from Belgium to France costs 35.7 cents, but if the same message be preferred or urgent the cost is $1.071. The rates from Belgium to Germany are the same. A like message from France to Germany (ordinary) will cost, ordinarily, 43.4 cents; urgent, $1.303. A 15-word message from Great Britain to France costs 60.6 cents; from Sweden to France, ordinary, 72.4 cents; urgent, $2.171. From Switzerland to France, or to Germany, the rate is, ordinary, 38.6 cents, and urgent, $1.158. For the distance from Stockholm to Paris, 1,000 miles, the rate for a 15-word message, address and signature, is 72.4 cents. From New York to Chicago, about the same distance, the rate for a 10-word message, address and signature free, is 50 cents. And this 72.4-cent rate is not far from the average all over Europe. For "urgent" everywhere in Europe the rates are much higher than in this country. Thus we see that in Europe, on the whole, the international rates are double the domestic, and it is the international rates that should be compared with the rates in this country, because the distances are more nearly even.

We should not lose sight of the fact that what is known as "ordinary" service on the socialistic telegraph lines throughout Europe is a service that is so poor, so utterly incompetent, that it would not be tolerated in this country.

Some of us personally know that the system is, as Mr. Gordon well says, so utterly poor and incompetent that it would not be tolerated for a minute in the United States.

The "preferred" service is the only kind that corresponds with the average service on the telegraph lines of this country, and the cost in Europe is very much higher than for the same service in the United States.

Advocates of government ownership of telegraph lines submit tables of rates in Europe which to a considerable extent are misleading, owing to the fact that on messages passing through two countries a single message is counted as two and the cost split; if it passes through three countries, it is made to count for three messages, with a one-third rate. There is no more justification for this "splitting up" of a message than there would be for our counting a message from Smith of Massachusetts to Jones of Pennsylvania as three messages and dividing the cost, making it one-third per message the real rate because it happened to pass through three States.

From Paris to Vienna is about 650 miles, and the cost for a 15-word message is 57.9 cents, as against only 40 cents in this country for the same distance. But Mr. LEWIS would divide the message between Paris and Vienna into three and split up the cost, and thus demonstrate that rates are higher here than in Europe.

The following table shows the great difference in the area of this country and the different countries in Europe:

	Area in square miles.	Per cent of United States.
United States	[1] 3,026,789	100.0
Austria	115,800	3.8
Belgium	11,400	.4
Denmark	14,800	.5
France	207,000	6.8
German Empire	208,800	6.9
Great Britain	121,400	4.0
Hungary	125,600	4.1
Italy	110,700	3.7
Netherlands	12,600	.4
Norway	124,100	4.1
Sweden	172,900	5.7
Switzerland	16,000	.5

[1] This area excludes Alaska, the Canal Zone, and the island possessions.

This table gives you at a glance the tremendous differences in distances within the boundary lines of these countries. The average telegraph haul in the United States is about 570 miles, and the average for the night letters is 1,025 miles. In Belgium the average haul for domestic telegrams is only 42.5 miles, in Great Britain 150 miles. Thus, measured by the distance served, the average cost for telegraph messages in this country is far cheaper than in Europe. As for service, everyone who has lived in Europe, or who has taken the trouble to investigate, knows that the telegraph service of this country is far superior to that of any other country.

WAGES.

Another point which public-ownership advocates seem to know nothing about, or they ignore it, is the difference in wages in the several countries compared. Facts show, however, that the wages paid to telegraphers in this country will average about two and one-half times those of Europe.

DEFICITS.

Deficits is another thing that the public-ownership fellow seems to forget about. Nearly every government-owned telegraph system in the world is run at a loss. In 1870 the British nation completed the ownership of the entire telegraph systems. It is reported that the profit under private ownership was an average of $1,600,000 annually. The Government had only fairly got started when the deficits commenced, and they have ever since been growing. For the last few years the annual loss on the system has been over $5,000,000. For the 12 months ending March 31, 1913, it was £1,175,347, or $5,723,940. The year before, according to a statement made by a socialist leader to the official organ of the Socialist Party of this country, it was $6,196,285. These losses include the interest charges upon £10,867,644, or $52,925,426, of capital. It has been stated by several writers, who assert that they have the facts, that this $52,925,426 does not, however, represent the full cost of the system, and that some $30,000,000 additional

capital should by right be included in the capital cost. Sydney Brooks places the loss since 1870 of the socialized system at $200,000,000. We are told by the socialists that this loss is more than offset by the cheaper rates. This is not true; but if it were, where would it leave us? The system would be in the position of taxing all the people in 43 years some $200,000,000 in order that the dukes, the lords, the rich bankers, merchants, and manufacturers might have their telegraph rates cut in two. In other words, it would be taxing all the people in order that less than 10 per cent of them might have "cheap" rates. Ten per cent of the population send 90 to 95 per cent of the messages. And, as already explained, the rates are not so cheap as they appear in the reports. The cost of 12 cents for 12 words sounds pretty good until one understands that the address and signature are charged for. John L. Jones, 3 Lane Street, Liverpool, counts 7 words, and A. T. Smith 3 more, making 10 out of the 12 used for address and signature, which shows about how much of a message one can send for 12 cents. Each additional word is charged 1 cent, so that 12 words with the foregoing address and signature would cost 22 cents, and not 12, as we are told by those who want our aid in giving the people of this country more socialism. In 1901, which is the latest available figure in regard to telegraph losses in that country, the government telegraph system of Germany lost $3,500,000, while that of France lost $1,880,000 in 1905, the latest figure available. In Australia in 1912–13 the loss was $799,206, and in New Zealand the telegraph and telephone service for 1912–13, $313,212. Nor must we lose sight of the fact that the publicly owned telegraph and telephone pay no taxes. The taxes which they would pay were they in private hands would have to be paid by the people under other forms.

No thoughtful man can imagine that the great telegraph system of this Nation can be operated anywhere near as cheaply under Government ownership as under the present system. Public ownership everywhere has increased the cost of operation and almost always lowered the standard of efficiency. If we were to socialize the telegraph system to-morrow, in less than two years we would add 25 to 35 per cent to the cost of operation; we would overstaff the system, hedge it about with red tape, and in time make of it what our postal system is, namely, the worst-managed big business in the Nation.

Publicly owned telegraphs and telephones are everywhere characterized by wretched service, low wages to employees, use by but a small percentage of the population, and large annual deficits.

Where the Government does own both the telegraph and telephone, it is not the masses, but the classes, that mostly make use of them.

Many men who think they are not socialists are advocating Government ownership of the telegraph, the telephone, and the railroads, but they fail to see that the socialization of these services is but a step toward the socialization of all the means of production and distribution. The Government-ownership advocate is a socialist, though he may not know it, and in supporting Government ownership of the railways, the telegraph, or the telephone, is indirectly, if not directly, working for the Government ownership of your store, your farm and shop, and, most important of all, the Government ownership of your labor.

Mr. President, it may be said that I have wasted some time in reading that somewhat extraordinary address by Mr. Gordon, a distinguished labor representative, a man whom I know has made a most profound study of this question. I venture to say that the statistics that Mr. Gordon presents can not be successfully controverted by anyone. If it be true, as this gentleman asserts, that the government ownership of telegraph and telephone lines in the countries where the experiment has been tried has proved not a success but a failure, how absurd it would be for us to follow the advice of one Republican Postmaster General and one Democratic Postmaster General and place the entire telegraph system of the United States in the hands of the Government! And if the statistics here presented are true, as I assert them to be, how unwise it will be for us to turn the water transportation of this country into the hands of the Government, and allow the Government to become a competitor with the private individual and the private corporation which are now transacting that business!

I am so thoroughly imbued—and in this respect I may be called, as I am frequently called, a "standpatter" or a "reactionary"—with the feeling that we ought to give serious pause to this question of adopting to any extent the principle of Government ownership that I am taking more time in its discussion than I otherwise would take. With me it is a profound conviction. I believe it is going in the wrong direction. I believe, though it may not come in my time, that if we adopt the doctrine laid down in the bill that is under consideration at the present time, inevitably, by the force of sentiment that will be developed in the minds of many people in this country, the agitation for the ownership of railroads, telegraphs, and telephones, as well as the public utilities of the various municipalities of the United States, will gain great impetus; and I want to do my part toward preventing that consummation, which I feel sure would be disastrous to the best interests of the country.

The article I have read has impressed me very profoundly; and I want to emphasize the fact, as stated by Mr. Gordon, that the British post-office department has recently made a report of its operations for the year ending March 31, 1914, in which it estimates the loss from the telegraph service for the year at £1,230,965, or nearly $6,000,000. If our Government should acquire the telegraph lines, who can estimate the loss that would result? And if steamship lines are acquired, why not telegraph lines, and if telegraph lines are not profitable, why shall steamship lines be?

The experience of Great Britain in the matter of government ownership of the telephone is equally discouraging. Here is an editorial from the London Daily Mail on that subject, entitled "Why and Because." I will say that this extract I myself clipped from the London Daily Mail, a copy of that paper having been sent to me by a friend now resident in Paris, so that the extract is authentic, and I assume that it states the exact facts. Listen to it:

Why is it that Government ownership and management of the telephone is practically always a failure? Why is it that for every thousand Europeans there is only one telephone, while for every thousand Americans there are 15? Why is it that the country which has done most to improve the telephone, both technically and commercially, and to popularize its use is the country in which its operation and development have been and still are exclusively the work of private enterprise? Why is it that not one of the innumerable discoveries that have transformed the telephone industry in the last 30 years has emanated from a department of state; that European Governments have been the last to adopt them, and that the verdict which experts are obliged to pass upon them, with perhaps two partial exceptions, is that they have not learned their business? Why is it that there are great and famous towns in Europe at this moment where methods and machinery that were abandoned 20 years ago in America are still in use? Why is it that throughout the length and breadth of Great Britain and the Continent hardly a single efficient long-distance service is to be found? Why is it that in New York one can invariably get the number one wants, and get it at once, while in London one has often to wage a prolonged and embittering battle with a slow operator, insufficient lines, and a conversation—if any conversation ensues—that is only audible when it is interrupted.

The broad answer to all these questions is that the alertness and enterprise that are essential to telephone development can not be expected from a Government department. The characteristics of the bureaucratic mind and temperament forbid it. The organization of a Government office, with a virtually irremovable staff, forbids it. The spirit of officialdom, with its traditions of subordination, its narrow professional outlook, its unwillingness to concentrate responsibility, its insensible stifling of initiative, forbids it. A Government department can not raise and discipline its staff to the same level of efficiency as a commercial company. It can not act with the same freedom and directness as a private board. It can not pursue a business object without deference to a hundred influences and considerations that have nothing to do with business. It can not advertise with anything like the same boldness. It naturally seeks efficiency through economy instead of economy through efficiency. It has to think of politics and political reactions. Its whole constitution prevents it from proving as enterprising as private initiative, as prompt to discard obsolete methods and apparatus, as quick to adopt new inventions, as skillful and aggressive in gathering in subscribers.

As we all know, to our cost, we have Government ownership and operation of the telephones in Great Britain. We shall never have a telephone system worthy of the name so long as the post office remains in undivided and despotic control. Sooner or later that authority must be modified or delegated if our telephone system is ever to attain an even passable standard of efficiency.

Every American who has had experience with telephones in either England or Germany has a lively recollection of the wretched service. Some Members of this body have had the same experience that I could recount, and I assert most emphatically that the condition so vividly set forth by the London Daily Mail is a fact, that the condition is about as bad as it can possibly be.

In this connection I quote a letter written by Mr. A. G. Hagedorn, of New York, under date of March 25, 1914, to the editor of the Market World and Chronicle, as follows:

Referring to the editorial in your issue of March 21, on the Annual Report of the American Telephone and Telegraph Co. and on the arguments advanced by the Postmaster General, in a recent report, in favor of the governmental ownership of the telegraph and telephone lines, my own experience with governmental telephone service in Germany may be of some interest to you. Let me add that this experience extends over a period of years, the more recent dating back some two years.

At that time I was a visitor in a home situated outside of Wiesbaden, at a distance which was easily covered by automobile in 20 minutes. Whenever it became necessary to telephone to or from Wiesbaden, it was a rare occurrence if a connection could be established in less than 15 or 20 minutes, and often the time required was much greater. I remember very distinctly an occasion when our party was delayed at Wiesbaden and it was desired to notify the friends at home. Some one suggested a telephone message, but those who knew the service advised against it, saying it would only mean additional delay and we might reach home, if we proceeded, about as quickly as we could get a message through.

To telephone to Frankfort on the Main, which we could reach by auto in less than one and a quarter hours, was an undertaking which was even more trying. If this was done during the morning hours, we could easily count on an hour's time for the operation and very frequently on much more than that. The procedure was this: You called up the local operator and gave him the call. He would inform you that the same had been noted and that you would be notified when the line was ready for you. How long this would take was entirely dependent on the number of calls that had come in ahead of your own. During banking and exchange hours, particularly in times of activity in the commercial world, the delay would be very trying. Business concerns recognize this, and, I was told, usually put in their calls for the following day during the day preceding.

I have telephoned to other cities from the home mentioned above and recall in particular the experience had in establishing a connection with the city of Bonn—an affair of about two hours.

It is needless to add any comment to the above. Anyone who has had the experiences I have related, and then compares such service with our own prompt and efficient service, can have but one opinion on the

question whether government ownership and control of the telephone system is to be preferred to private ownership and control.

I dwell upon this matter, Mr. President, for several reasons. I am not indifferent to the movement that is going on in this country in favor of government ownership. It exists in the District of Columbia and it exists elsewhere. If it can be established that the experiment tried elsewhere has been disastrous rather than successful, I shall feel that any contribution I make to it is not time lost during this discussion.

One of the most significant and powerful arguments ever made against the government ownership of railroads, and as I have before said, if we have government ownership of steamships why not of railroads, is contained in an address delivered by our erstwhile associate in this body, the Hon. Jonathan Bourne, jr., before the National Civic Federation of New York City, on December 4, 1914. I hope Senators will listen to the philosophy and sound reasoning of our friend Mr. Bourne.

I wish, Mr. President, that I might have had time to summarize this extremely able and interesting argument, but like some other Senators, and like most Senators, my time has been greatly occupied of late in the consideration of other matters, and particularly in that of appropriation bills and hence I am constrained to give the address in full. Mr. Bourne said:

Mr. Chairman and members of the National Civic Federation:

The desideratum of all government should be the protection of its citizens and only such restraint of individual action as is absolutely necessary to insure the desired protection of all its citizens.

That, Mr. President, is a maxim that no one will take issue with.

The limit of the individual's restraint should be clearly expressed by law, and not left to the whim or fancy of an executive, a commission, a department, or a bureau.

A government of rule and regulation, a bureaucratic government such as ours is rapidly trending toward, can not long endure.

I am strongly opposed to Government ownership of railroads because of the following three objections:

First. The fundamental objection that it would be absolutely destructive of popular and representative government.

That is an objection, Mr. President, which ought to engage the attention of every thoughtful man. If it tends to the destruction of popular and representative government, it ought to be resisted at all hazards and on all occasions.

Second. The unanswerable objection that Government ownership necessitates Government regulation; that the failure of Government regulation necessitates the failure of Government ownership; that the success of Government regulation eliminates the necessity or desirability of Government ownership.

Third. The economic objection that Government ownership would be more dilatory, less efficient, and far more costly to the people of the country.

I imagine Mr. Bourne has had experience in Europe with the telephone and telegraph systems of those countries, and that his experience there led him to the observation that Government ownership would be more dilatory and less efficient, which it certainly is.

All government, society, and business are composed of human units and directed by the forces controlling human action. Hence in approaching governmental problems we should carefully analyze these forces. Where any individual is called upon for immediate action many forces, such as sentiment, love, passion, or hatred, may determine the action. I am convinced that every deliberated action of any individual in his primary capacity is controlled or influenced by the individual's opinion as to the effect such action will have upon his own personal selfish interest. If this be true, then the least power delegated to single individuals in government the better for the interests of those governed.

There are no two people in the world exactly alike, and probably there never will be. Hence each individual has a different viewpoint as to what constitutes his own selfish interest. Under community action no individual can secure gratification of his own selfish desire, but must rest content with what the majority of the community believe to be for the best interest of all. Therefore the more you force the people to act collectively, the more you can distribute governmental power, the better the general welfare of the community governed.

Mr. President, that paragraph is worthy of former Senator Bourne, the man who discovered the "composite" citizen, and it ought to attract the attention of the Senate.

In all organized society there are three great forces continually struggling for supremacy—the police force of government, the religious force, and the commercial force. The best government would be correlated action between these forces, but with domination of the police force over the religious and commercial forces.

The people as a whole and not any individual should constitute the police force of government. No individual should constitute a government. Our whole political organization is founded on this idea; and yet the present trend of this country, or at least of the present administration and some previous ones, has been toward centralized government, with practically plenary powers in the hands of the Executive or department or bureau heads.

The evil results of the police force, commonly called the State, being represented or dominated by a single individual are to-day most forcefully and horribly illustrated in the European situation, where one man by virtue of his occupancy of a throne has involved 400,000,000 people in a continental war, resulting in the slaughter of millions of men, the destruction of billions of dollars' worth of property, and cessation of industrial activities with resultant economic waste beyond human comprehension. Had the policies of European nations been left to legislative bodies rather than to individual monarchs the situation which now exists could not have been developed.

Selfishness and ambition so generally control human action that great delegated power must always be a menace. It is certainly axiomatic that centralized power in an individual or commission can only produce results commensurate with the integrity, ability, experience and unselfishness of the individual or individuals constituting the commission.

Returning to my first objection to Government ownership of railroads, I assert that it would be absolutely destructive of popular and representative government. The ownership of railroads would be quickly followed by ownership of telegraph and telephone lines, express companies, water transportation companies, and electric railways doing an interstate business. I am opposed to Government ownership of any of these public service corporations.

I present herewith a table I have prepared giving the number of employees, for the years specified, of the United States Government and of the different public service corporations, showing a total of 3,054,988 employees.

1914, number of Government civil employees	469,000
1912, telephone and telegraph employees	220,656
1913, railway employees	1,815,239
1912, electric and street railway employees	282,461
1906, water transportation	188,348
1907, express employees	79,284
Total	3,054,988

Reflect over these figures, Senators.

Says Mr. Bourne:

Remember that in the last 10 presidential elections the President has been chosen by a plurality varying from a little over 7,000 to about two and a half millions. Can any person familiar with the politics of this country doubt the correctness of the assertion that, under Government ownership of these public-service corporations, with the resultant addition of over two and a half million employees to the Government pay roll, those employees and their friends would inevitably control the Government under our political machinery? The tendency would be more pay and less service in governmental employment, resulting in ceaseless efforts on the part of outside labor to secure Government employment because less onerous and more remunerative, with cumulative dissatisfaction and irritation in all private enterprise.

In the past, Presidents have been able to dictate the nomination of their would-be successors, either themselves or others, because of subservience to the Executive of the great number of Federal officeholders. While it is true that universal adoption of presidential primaries would minimize the possibility of repetition of this misuse of power in the future, yet even under a primary system, the existence of over 3,000,000 employees, subject to removal, promotion, transfer, or demotion by Executive order, would give a political power that should not be delegated to any single individual if the Government is to last.

Advocates of Government ownership urge that the taking over of the railroads by the Government would eliminate them from politics. In my opinion it would have the opposite effect, throwing them into politics.

The assertion that the railroads are now a positive factor in politics is untrue. Undoubtedly there was a time when railroads and other large corporations exerted a very large and very effective influence upon State and National politics, but that time has passed. The direct primary has overthrown the power the corporations had under the old convention system, and the people have the power to-day not only to select between candidates, but to choose the candidates as well.

Government ownership would be followed by organization of Government employees for the promotion of their own interests. These employees would immediately become an organized factor in every campaign. Their influence would be exerted, not primarily for the promotion of the best interests of the country, but for the promotion of their own interests. Their influence would be thrown with the party or candidate that promised most for the fulfillment of their desires.

So long as the party in power kept on good terms with the 3,000,000 Government employees, it would have their support, and the support and cooperation of their relatives. While it would be absurd to argue that any such body of men would act as a unit at all elections, it is altogether probable that a sufficient number of them would so act as to make them a formidable political organization.

An administration backed by an active organization spread throughout the length and breadth of the country would thereby have a tremendous and practically overwhelming advantage over the party seeking to supplant it.

The establishment of classified civil-service rules and regulations would not remove the menace to truly representative government. Even though appointments be made in part in accordance with competitive tests, the fact that chief officers of the party in power have control over promotions, demotions, transfers, and removals, would make the individual governmental employee subservient in politics, except where practically the whole body of employees acted in accordance with prearranged plans for the benefit of the employees themselves.

Our Government was founded upon the principle of distribution, rather than centralization of power. The framers of the American Constitution provided for three branches of government, the legislative, executive, and judicial. The legislative branch, composed of a large number of individuals, was designed to be the dominant branch, for it was vested with the lawmaking power. The judicial branch was designed to interpret and the executive branch to execute the laws enacted by Congress.

But in practice we have drifted far from the principles adopted when the Government was founded. Ours is a representative form of government, generally conceded to be the best thus far evolved by the brains of men, because it is a government of, for, and by the people. Yet, especially in the past two years, our tendency has been, in my opinion, entirely contradictory of the theory upon which our Government was constructed, and, unless checked, must result in absolute destruction of representative government.

Some political leaders seem to have gone commission mad. Every social and economic problem, in their view, calls for the creation of a new bureau or department or commission, with power to make rules and regulations for the government of the American people. Congress, the legislative body of the Constitution, is becoming but an instrumentality for the creation of bureaus and commissions vested with the real lawmaking power. The citizen of to-day who wishes to know what he can or can not do within the law, consults not

merely the statute books, but the latest pamphlets of rules and regulations adopted by some department or bureau head or commission.

While I believe the Interstate Commerce Commission has accomplished, and is accomplishing, much good; have favored its receiving the power to regulate railroad rates; yet I realize that it is yet to be demonstrated whether the powers it already has should be enlarged or curtailed, and I am appalled at the realization that the legislation of the past two years has so centralized government as to place the interstate business of this country practically in the hands of 19 men, or possibly of 11; the Interstate Commerce Commission, consisting of 7 members, or a majority of 4, practically determining rates affecting the welfare of the whole Nation; the Federal Reserve Board, consisting of 7 members, or a majority of 4, practically determining currency expansion or contraction affecting all business of the country; the Trade Commission, consisting of 5 members, or a majority of 3, that will practically dictate the policies of 160,000 of the large corporations of this country, with the inevitable result that attempts will be made to use these boards as political machinery for the advantage or disadvantage of some administration, and ultimately of some individuals.

Proceeding now to a consideration of my second objection:

It is strange that the advocates of Government ownership, who assert the failure of Government regulation, overlook the fact that Government regulation is just as essential under Government ownership as it is to-day. If the Interstate Commerce Commission must be charged with the duty of regulating rates, supervising provisions for protection of life, and guarding against favoritism and discrimination, surely all these duties must be performed under Government ownership.

The conflicting interests of competing shipping points would exist under Government ownership, just as they exist to-day.

Every section of the country and every industry would be before the managing board of the Government railway system asking for reduced rates on certain commodities, or between certain points.

Every community would be before the board asking for improved service, improved equipment, and extension of lines.

Where the Interstate Commerce Commission has one problem to solve now, it would have ten under Government ownership.

It can not be expected that discrimination will be elimnated under Government ownership. Those who anticipate any such reform need only recall the serious differences that have arisen already in the Federal Reserve Board over the effort of the Secretary of the Treasury to extend special favors in financial matters to one section of the United States.

Another proof that we would have discrimination—unfair discrimination—under Government ownership may be found in the records of the Post Office Department, where such discrimination has been practiced. In 1910 Postmaster General Hitchcock ordered the establishment of what is known as the "blue tag" service, under which certain publications were ordered transported on freight trains, while rival publications of very similar character and competing for the same trade were continued in the mails.

Please remember that although these magazines which were ordered transported on freight trains paid exactly the same rate of postage and were admitted to the mails under exactly the same laws as those that were continued on fast mail trains, yet they received, under the Postmaster General's deliberate order, a far less efficient character of service.

When such a discrimination can be made in the Postal Service, who can doubt that there would be similar discrimination under Government ownership and operation of the railroads.

Government ownership of telegraph and telephone lines would result in intermittent press censorship and continuous press subservience to the administration in power, thereby utterly destroying our zealously guarded "freedom of the press."

Discriminations no doubt exist to some extent to-day, but they have been reduced to a minimum. The point I wish to impress upon your minds is that Government ownership would not relieve the country of the necessity of Government regulation.

If Government regulation is a failure to-day, we have no good reason to believe it would be a success under Government ownership. We can not hope to secure for the management of a Government-owned railroad system men who are more honest or more capable or more aggressive in the performance of their duty than are the members of the Interstate Commerce Commission and the officers of the Department of Justice.

If they can not succeed in enforcing the law and in preventing discrimination, we can not expect them to establish and maintain equitable service under Government ownership.

If a member of the President's Cabinet will undertake to favor one section of the United States in the operation of a currrency and banking law, some other member of the President's Cabinet would attempt to favor some section of the country in the management of Government railroads under his control.

Therefore, I assert again that if Government regulation is a failure, Government ownership will be a failure, and if Government regulation is a success, the reason for Government ownership is eliminated.

The economic objection to Government ownership is the one I deem of least, and, in fact, of very slight, relative importance. I am not one of those who think that Government ownership would lead to financial disaster, or ruin of the transportation service, or the destruction of internal commerce. I have no doubt whatever that the Government could acquire the railroads, operate them with a fair degree of success, inaugurate some reforms and save some waste through the elimination of duplication. But I am also convinced that while the Goverment, as the owner and operator of the railroads, would likely inaugurate improvements in some respects, these would be more than offset by deterioration in the service in other ways, and that the economies accomplished by elimination of duplication would be more than counterbalanced by increased expenses in other respects.

It seems to me to be absurd to argue ,as some gentlemen do, that the Government could take over the railroads, provide better equipment, install the most up-to-date and expensive appliances for the protection of employees and passengers, increase the wages, and reduce the hours of employes, and at the same time give service as good as now rendered at a less cost.

That every practicable precaution should be taken for the protection of life, no one will question. This, as I understand it, the Interstate Commerce Commission now has the power to require. I have no doubt whatever that it has ordered the installation of protective equipment as rapidly as it is deemed practicable

Undoubtedly there is some waste in the present system of management, because competing roads maintain more frequent train service than is necessary between certain points, through an effort on the part of each to secure as large a share as possible of the traffic. The elimination of some of the trains would mean a somewhat reduced service, a correspondingly reduced cost, and a consequent saving. I can not agree, however, with those who believe that this reduction in service, due to the elimination of competition and reduction of supervisory organization in the management due to the consolidation of all the railway systems into one, would effect any economy whatever, when allowance is made for the increased number of employees incident to Government ownership. That it costs the Government more to perform service than it does a private concern is so generally recognized that it requires no demonstration.

Under present conditions passenger and freight rates are practically uniform on competing lines, and the only competition is in the matter of service. The effort of the managers is to secure a larger portion of the traffic by providing superior facilities and rendering superior service. With the elimination of competition under Government ownership, this incentive would be entirely removed. At the present time every employee is urged by his superiors and compelled by his own desire to retain his position and secure promotion by demonstrated ability to put forth every effort to secure business for his company by offering the traveler and the shipper the best service practicable. Under Government ownership that incentive would be removed. The employee would perform his routine service with faithfulness, no doubt, but without putting forth unusual effort.

One of the arguments made in behalf of Government ownership is that it would mean increased compensation to railroad employees. That this result would be realized no one will question, nor shall I assert that it ought not to be realized. What I do contend is that the advocates of Government ownership who base their arguments upon economic reasons err in their contention that the Government can both increase compensation of employees and reduce the cost of transportation to the shipper.

The average compensation of the present railway employee is about $723 per annum. The lowest salary paid to the railway mail clerk during the first year of this employment, when he is performing practically unskilled service, is $900 per year. The average compensation of the railway employee is therefore below the least compensation of railway mail clerks in the employ of the Government.

If the average compensation of railway employees should be increased one-third, which is a very conservative estimate of the increase that would be experienced under Government ownership, the total addition to the compensation account would be $400,000,000 annually, the present pay roll of the railroads amounting to over $1,200,000,000 in round numbers.

My assertion that Government ownership would be less efficient is based to a large extent upon a personal experience I had some four years ago. On December 21, 1910, by the adoption of a resolution which I introduced, the Senate called upon the President to inform the Senate as to the total number of officers and employees of the Government, exclusive of enlisted men of the Army and Navy. Sixty-five days elapsed before the information was transmitted to the Senate, it being received on the evening of February 24, 1911.

While waiting for the receipt of this information, I became curious to know how long it would take large corporations to supply similar information regarding their own service. I therefore addressed letters to the Standard Oil Co., United States Steel Co., and the Western Union Telegraph Co. asking them how long it would take them to supply the information. The Standard Oil Co. replied that it could supply the information in three days; the Western Union could supply it within a few days. I received no response from the United States Steel Co.

It was a cause of great surprise to me that it should take the departments of the Government, all located in Washington, 65 days to inform the Senate as to the number of their employees, when all appointments are made from Washington and all pay rolls audited there.

The Post Office Department and its service is frequently lauded, especially by Postmasters General and their assistants, for its efficiency and economy. Let us analyze: Mail is deposited by citizens in post offices and letter boxes, picked up by postal employees, carried to assembling points, routed for destinations, delivered to privately owned railroads, transported by them all over the country; received by postal employees and distributed in post-office boxes or by carriers to the addresses. Could this service be performed without the privately owned railroads? Is the Post Office Department entitled to sole credit for this activity? Are not the railroads entitled to some credit for safe and expeditious transportation all over the country, especially when public opinion compels them to carry the mail, and at rates which I am satisfied after two years' special study of the subject are too low?

I have no desire to minimize the credit due the postal mail collectors, clerks, and distributors, yet comparison with large mail-order houses, where I have known a mail order for 12 different articles from 8 different departments to be filled, with the packages on the platform at the car within four hours from the time of the receipt of the letter containing the order, shows an efficiency and organization in the mail-order house that does not exist in the postal department, because of better executive direction in the former than exists in the latter.

The head of a mail-order house or other large business establishment engaged in distribution devotes his time to increased efficiency, better service, and intelligent economies, while a Postmaster General's time is too apt to be consumed in an effort to build up a political organization by the distribution of nearly 60,000 post offices among the faithful followers of the administration.

Successful private business is run on the merit and promotion plan, while we are prone to run the Government on the demerit and demotion basis.

In this discussion I make very little use of statistics, for it has been my observation and experience that statistics are very unreliable and are very likely to be misleading, even when used with the best of intentions. Statistics are quite frequently derived from a prejudiced source and usually selected and used to support preconceived ideas.

Let me elaborate a little on my statement that I have found statistics unreliable.

You will all remember that the Postmaster General of the last administration declared in his last annual report that he had succeeded in placing the Post Office Department on a self-supporting basis and had a surplus of $219,000 as proof. The first report of his successor, the Postmaster General of the present administration, challenged this statement and asserted that the apparent surplus was produced by a "faulty method of accounting," and that instead of a surplus there was in reality a deficit of $732,000.

I shall not take your time to enter into a discussion of the relative merits of the two assertions, which involve a difference of $951,000. It

is sufficient to know the indisputable fact that one of the Postmasters General was wrong. The incident serves to illustrate not only the unreliability of statistics but the probability that Government statistics are manipulated to suit the purposes of the management of the department.

Just as it was to the interest of the Postmaster General of the last administration to make a bookkeeping showing of a surplus in the management of the department of which he was the head, so it is to the interest of the management of Government-owned railroads of every country in the world to make the record show successful management. Because of the personal interest of those in control, the statistics which they make public should be viewed with care and accepted as true only after most thorough scrutiny.

It is not necessary that statistics be inaccurate or used with dishonest intent in order to be misleading. Correct figures may be used with the utmost good purpose and yet lead to erroneous inferences.

For example, in an article in the Saturday Evening Post of June 6, 1914, Gov. Stubbs said:

"During the year 1913 the railroad companies of the United States received in revenue $3,171,000,000. There are in this country approximately 20,000,000 families of 5 persons each. The average cost of living for these families last year was approximately $625 each. Railroad transportation cost each of these families an average of $158.50, or a quarter of its total expense."

Later Mr. Stubbs refers to this railroad revenue as a "tax." While Mr. Stubbs does not say in express words what conclusion he wishes drawn from his use of these figures, the unexpressed inference is that each family was mulcted to the extent of an average of $158.50 during the year.

In reply to the Stubbs article, President Ripley, of the Santa Fe, presented what he termed a reductio ad absurdum, in which he enumerated nine items of family expense which totaled $12,848,000,000, or an average of $642.35 per family. These items did not include food, clothing, or rent, yet they exceeded the total average cost of living.

The thought that occurs to me in connection with the manner of presentation which Mr. Stubbs has adopted is this:

If a computation of the average revenue of the railroads per family is pertinent to a discussion of Government ownership of railroads, why is it not also pertinent to compute the average railroad expenditure per family? If the railroads are to be charged with the revenue collected, why not credit them with the money expended?

I have not at hand the documents from which Gov. Stubbs secured his statistics as to the total revenue of the railroads of the United States. I have here, however, the text of the 1912 report of the Interstate Commerce Commission, covering the financial operations of 246,828 miles of roads that reported to that body. The report does not state the amount of the total income of the railroads, but by addition I ascertain that the report shows for this mileage of roads a total income from all sources of $2,995,596,275, or an average of almost $150 per family, assuming that there are 20,000,000 families in the United States. These same roads paid out for wages, supplies, taxes, interest, and dividends a total of $2,942,682,321, or an average of over $147 per family. The remainder of the income was spent for additions, betterments, new lines, extensions, and reserves.

In this connection the following table on ton-mile revenue and distribution may be interesting to some:

	Cent.
Average receipts per ton-mile	0.744
Distributed as follows:	
Wages	.321
Materials and supplies	.200
Taxes	.030
Rentals (net)	.012
Interest (net	.108
Balance for stockholders, to cover adjustments, improvements, dividends, and surplus	.073

The average rate of dividend on all railway stock in 1912 was 4.64 per cent.

The average rate of interest accrued on all railway funded debt in 1912 was 4.22 per cent. This represents interest legally accrued and charged by the railways to their income account, whether the interest was actually paid to the bondholders or not. In other words, this covers interest defaulted as well as interest paid. If the amount of defaulted interest could be ascertained and subtracted from the total amount of accrued interest, this rate would unquestionably be somewhat smaller.

Personally, I see nothing pertinent in the computation of the average railroad revenue per family, but, if there is any force in the presentation of the figures as to income, I submit that the average railroad expenditure per family is just as pertinent and the averages are so nearly the same as practically to counterbalance.

In 1879 Congress directed the Postmaster General to secure from the railroad companies transporting mail certain information relative to operating receipts and expenditures, the purpose being ascertainment for proper compensation for railroad mail transportation. Intermittent attention was paid to this congressional direction, and in 1907 a departmental commission of five was appointed by Postmaster General Cortelyou. Over 140 questions were prepared and propounded to the 795 steam railroads then carrying mail.

It cost the railroads $250,000 to furnish the information and the Government a direct out-of-pocket cost of $19,423 for tabulation of the information contained in the railroads' answers, which is set forth in Document No. 105, Sixty-second Congress, first session, and reported to Congress August 12, 1911. Accompanying said document was a suggested draft of a bill indorsed by Postmaster General Hitchcock, accompanied by a letter conveying the impression that the result of the adoption of such legislation would be a saving to the Government of about $9,000,000 in the railway-mail pay.

Here we have a concrete result of four years' research work in a department at a total expense of practically $270,000—a good investment if the many departmental examples of pitiful vacillation, unreliable data and estimates cause Congress to check all departmental figures and decline to follow blindly departmental suggestions.

Study of the bill showed that Mr. Hitchcock and his assistants had failed to realize that rights of way, road beds, track, equipment, and terminals were necessary prerequisites in the operation of mail cars, for in his method of payment, he had made no allowance whatever for capital charges, recommending that the Government only allow 6 per cent on the ascertained cost to the railroad companies for carrying the mail, and his predicted $9,000,000 saving to the Government was based entirely on this premise.

Fortunately Congress had created a joint congressional committee, which made an exhaustive study of the subject. With tardy realization of the absolute fallacy and injustice of his first suggested plan, Postmaster General Hitchcock, on January 23, 1913, submitted a second draft of bill for regulation of railway mail pay. Study of this plan by the joint congressional committee soon demonstrated that the plan was practically unadministrable and certainly undesirable.

On February 12, 1914, a third plan, in the nature of a tentative draft, was submitted, and the joint congressional committee was soon satisfied that same was unscientific and most undesirable, giving unnecessary and dangerous powers to the Postmaster General and containing rates, which, if adopted, would be absolutely confiscatory.

The joint committee's demonstration and the ultimate realization on the part of the department of its mistake in its third bill resulted in the submission to the House of Representatives of a draft if what is known as H. R. 17042, introduced in the House of Representatives on June 4, 1914, sections 13, 14, and 15 of which cover "compensation for the transportation of mail." The joint congressional committee again demonstrated the department's suggested rates under its new plan to be absolutely confiscatory.

Here we had four departmental plans suggested and urged for enactment within a period of three years, each differing from the others in fundamental features, but all seeking further dictatorial and plenary powers for the Postmaster General. Do you expect successful Government ownership of railroads under such a vacillating management as that?

During the nearly two years' study made by the congressional joint committee the department presented estimates of annual overpayments to the railroads to the amounts of $9,000,000, $10,531,792, $1,615,532, $319,832, and $221,832. Many other instances of very inadequate and unreliable statistics furnished by the Post Office Department during this investigation could be cited.

Very similar was the experience of a congressional committee between 1898 and 1901, when the department submitted statistics that the railroads were paid on an average of 6.58 cents per pound for transporting mail, averaging 40 cents per ton-mile, with an average haul of 328 miles, whereas a special weighing demonstrated that the average payment was, in fact, 2.75 cents per pound, averaging only 12.56 cents per ton-mile, with an average haul of 438 miles.

Commenting upon these statistics, Congressman Moody, afterwards a justice of the Supreme Court, said:

"In other words, we were not paying one-third as much as the Post Office Department had led the people of the country to believe we had been paying."

The commission appointed in 1911 to investigate the subject of postage on second-class mail matter, of which commission Justice Hughes, of the Supreme Court, was chairman, had a similar experience. It repeatedly found the statistics submitted by the Post Office Department to be erroneous, and the department changed its figures when compelled to do so by demonstration of their inaccuracy. So glaring and numerous were the errors that the commission commented upon them as follows:

"It seems hardly worth while to include subsidiary tables from which these results are taken or to criticize the details, as the commission has little confidence in their accuracy."

I have made frequent references to the Post Office Department, not through any desire to specially criticize that department, but because the Postal Service is the only Government activity which corresponds with the Government ownership and operation of railroads, and furnishes the only demonstration based upon experience of what we might expect under Government ownership of railroads and other national public utilities.

I recognize the fact that evils exist in every line of human activity and that remedies must be provided. My own theory is that government should leave as large opportunity as possible for individual enterprise and industry, holding out as an incentive the assurance of enjoyment of the rewards of legitimate endeavor. In order that opportunities may be equally open to all, wrongful acts must be prohibited by criminal statutes, which should impose penalties so severe and make punishment so certain that violation will be extremely rare. This assurance of a large degree of liberty, and also definite restriction upon improper action, should not depend upon the varying whims or prejudices, or even the sound judgment, of bureau heads, but should be prescribed by act of the law-making body established by the Constitution, so that every citizen can read in the plain language of the statute the extent of his rights and the limitation upon his liberty.

No one will condemn more severely than I the wrongful acts of corporation managers who have pillaged their stockholders or wrecked the institutions over which they had control. Deeds of such character should be made criminal by law, if not already so defined, and prison doors should swing open to receive and confine the culprit who is unfaithful to his trust.

But eradication of evils of this kind does not require Government ownership. There is no need to stifle individual enterprise, ambition, and energy in order to prevent repetition of wrongful acts. Advocates of Government ownership propose a remedy worse than the disease. In the misguided effort to cure evils in railroad finance they would fasten upon the Nation evils far more serious, far more insidious, more deeply affecting the welfare of present and future generations, striking at the very vitals of truly representative government.

For my part, I have not lost confidence in government by law. I am not convinced that the crooks in railroading so far outnumber the honest men that elimination of the dishonest is hopeless. The day is not near so dark nor the prospect so gloomy as some would have us believe. There is still a preponderance of good among the American people, and we have not yet reached the time when we must write upon the pages of our history the declaration that we shall buy the railroads because we can not control the crooks.

I am not satisfied that efficiency goes with Government employment. I am not ready to give my approval to a plan which means the establishment of a political machine composed of 3,000,000 Government employees and their relatives and friends. I have the utmost confidence that if Congress will take its magnifying glass off the White House and relieve itself of the delusion that a citizen becomes an omnipotent statesmen as soon as he has become President by virtue of the votes of 42 per cent of the electorate, we shall be able to solve a considerable number of the problems that now confront us, and without placing a check upon that marvelous American enterprise which is justly the admiration of the civilized world. I believe the American people still have confidence in representative government, and that when they realize the trend of public affairs they will rebuke the effort to establish one-man government with dictatorship from the Executive Mansion.

Mr. NELSON. Mr. President, I should like to ask the Senator from New Hampshire a question if it will not embarrass him.

The PRESIDING OFFICER (Mr. CHILTON in the chair). Does the Senator from New Hampshire yield to the Senator from Minnesota?

Mr. GALLINGER. I yield to the Senator.

Mr. NELSON. My question is this: Has the Senator from New Hampshire figured how much suitable and available tonnage for shipping purposes could be secured for the $40,000,000 proposed to be provided by this bill?

Mr. GALLINGER. I will say to the Senator from Minnesota, in reply to that question, that the report of the Merchant Marine Commission specifically states that the cost of a swift vessel built as was contemplated in the bill that was then presented to Congress for service to South America and the Orient would be about a million dollars. The Senator from Minnesota can, therefore, see that even if we have the $40,000,000 which is proposed in the pending measure—the $30,000,000 that is directly proposed to be appropriated in the bill and the $10,000,000 contingent—we probably would not get more than 30 steamships at the outside. We would get more, of course, if cheap freighters were built; but there is to-day a superabundance of ships of that type ready for employment.

Mr. NELSON. Is there not an estimated rule in respect to freighters; for instance, a given figure per ton, for which they can be built?

Mr. GALLINGER. Yes.

Mr. NELSON. What is the usual figure?

Mr. GALLINGER. About $50 a ton.

Mr. NELSON. What would be the price per ton of a combination ship, a freight and passenger ship? That would be higher, would it not?

Mr. GALLINGER. That would be much higher, particularly if we built them as was contemplated in the bill recommended by the Merchant Marine Commission, according to the plans and specifications of the Navy Department, so as to make them auxiliaries to our Navy in time of war. They would undoubtedly cost much more.

Mr. NELSON. We could not, then, under the provisions of this bill, as I understand, hope to secure more than from 30 to 40 fair-going ocean freighters?

Mr. GALLINGER. I think not.

Mr. NELSON. Not beyond that?

Mr. GALLINGER. I should think it would be even less than that.

Mr. NELSON. What proportion does that bear—I ask the question of the Senator from New Hampshire because I know that no Senator is more familiar with the subject than is he—to the aggregate amount of tonnage engaged in the trade between this country and Europe?

Mr. GALLINGER. It would be negligible.

Mr. NELSON. Would it amount to 5 per cent?

Mr. GALLINGER. I should think it would be nearer 1 per cent than 5 per cent. Some people talk about building a merchant marine sufficient for transacting the ocean carrying business of the country so far as our imports and exports are concerned, but testimony has been presented by some one—and I think I will refer to it before I get through—who is an expert on this matter, that we could not possibly go into a project of that kind without expending $600,000,000. We are talking now about acquiring 30 or 40 ships. England has 4,000 or more, I believe—some say twice that number—so that the ships which could be provided under the pending bill would be a mere drop in the bucket as compared to the shipping of the British Empire and of Germany.

Mr. NELSON. Assuming the largest number—40 ships, say—and assuming that they would be fairly distributed amongst the leading ports of this country, such as Galveston, New Orleans, Savannah, Charleston, Newport News, Baltimore, Philadelphia, New York, and Boston, would there be more than four or five ships to a port?

Mr. GALLINGER. I think very much less than that. In addition, the Senator might mention Seattle, Portland——

Mr. NELSON. I am not including the Pacific coast, but the Atlantic coast only.

Mr. GALLINGER. As to the Atlantic coast, not more than that number at the outside.

Mr. NELSON. Even if the ships were all for the use of what may be called the "cotton belt," sailing from such ports as Galveston, New Orleans, Savannah, and Charleston, there would be but a few ships for each port?

Mr. GALLINGER. Very few, indeed.

Mr. BRANDEGEE. Mr. President, will the Senator allow me to ask him a question for my information?

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Connecticut?

Mr. GALLINGER. Certainly.

Mr. BRANDEGEE. I understood the Senator to say that a ship suitable for the trade contemplated by the bill would cost about a million dollars?

Mr. GALLINGER. A mail ship of proper speed and proper construction.

Mr. BRANDEGEE. And with proper cargo-carrying capacity?

Mr. GALLINGER. With proper cargo-carrying capacity at the same time.

Mr. BRANDEGEE. About what, does the Senator think, would be the tonnage of a million-dollar vessel? It seems to me that it is of some consequence to know how much tonnage may be carried by the ships proposed to be acquired under the pending bill, at $50 a ton, if the Senator is correct about that——

Mr. GALLINGER. Fifty dollars a ton for a cargo vessel. Vessels of what may be called a combination type would cost more per ton, and a first-class mail and passenger ship would cost still more.

Mr. BRANDEGEE. Taking a cargo vessel alone, if it costs in the neighborhood of $50 a ton to build such a ship a million-dollar ship would have a tonnage of 20,000 tons. Is not that a very large vessel?

Mr. GALLINGER. It is a large vessel.

Mr. BRANDEGEE. Does the Senator think 20,000-ton ships fit for the business in which they are intended to be used could be bought for a million dollars each?

Mr. GALLINGER. I should say not. But they would not be 20,000-ton ships. The kind of vessels contemplated would cost more than $50 per ton. They would cost something like $100 per ton.

Mr. BRANDEGEE. I have in mind the steamers owned by the Panama Railroad Co. which operate between New York and the Canal Zone. The two larger steamers were the *Ancon* and the *Colon*, as I remember their names. They were 10,000-ton ships.

Mr. GALLINGER. Yes.

Mr. BRANDEGEE. A ship of twice their cargo-carrying capacity would be an enormous ship, and I rather doubt if a millions dollars would buy such a ship.

Mr. GALLINGER. I should think it very improbable that that amount of money would buy a ship of 20,000 tons, and I do not apprehend that ships of that size will be constructed—certainly not cargo ships exclusively.

Mr. FLETCHER. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Florida?

Mr. GALLINGER. With pleasure.

Mr. FLETCHER. I desire to inquire if the Senator has considered about what tonnage a proper type of cargo-carrying vessel should have?

Mr. GALLINGER. Mr. President, I have not made any figures along that line. I take it that, if this bill passes, we will have not only cargo carriers, but likewise mail and passenger ships, will we not?

Mr. FLETCHER. Precisely; I think that is true; but some suggestion has been made about acquiring larger ships. I can not imagine what we would want with 56,000-ton ships, or even with many 20,000-ton ships, if any. I have read some authority on that subject, a British work, to the effect that the ideal cargo carrier was a ship of between seven and eight thousand tons. I did not know whether the Senator had investigated that matter.

Mr. GALLINGER. I quite agree with the Senator that that would probably be the ideal tonnage of a cargo carrier. Of course, Mr. President, in estimating the cost of these ships we are laboring under a disadvantage in not knowing exactly what is contemplated to be done under this bill. We are told that these ships are to be for trade with Central and South America "and elsewhere." If the ships are to enter into the trade to the Orient and Australasia, of course they ought to be large and swift ships to carry the mails and also passengers. Such ships, of course, would be expensive and would be of a much greater tonnage. I do not know that that trade would require ships of 20,000 tonnage, but they would approximate that; and, of course, they would be very expensive; but I do not know on what routes these ships are to be put; we are left in the dark as to that. I suppose the proposed shipping board will determine that question, and after a while, if this bill passes—and I trust it may not pass—we will get more definite information than we possess at the present time. For myself, I should like some Senator to tell, if he knows, precisely where

those "and elsewhere" routes are to be. Perhaps the Senator from Florida knows.

Mr. FLETCHER. I will be glad a little later on to make some suggestions along that line in answer to some 14 questions propounded by the Senator from Ohio [Mr. BURTON].

Mr. GALLINGER. Well, Mr. President, it delights me to learn that the Senator from Florida is going to discuss this question further. I think he ought to do so. He is able to do so; we should like to listen to him, and would be glad to have him illuminate the subject to a greater extent than the report does or than does the preliminary statement of the Senator from Florida, which was very interesting as far as it went.

Mr. SIMMONS. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from North Carolina?

Mr. GALLINGER. I yield to the Senator from North Carolina.

Mr. SIMMONS. The Senator is now discussing a very interesting question and one upon which I confess I have very little information and would like to have more; that is, as to the cost of different kinds of ships. I assume that some of these ships would be combination passenger and freight ships, while some might be freighters alone. I was going to ask the Senator if there was any material difference in the cost of a combination ship and a freighter?

Mr. GALLINGER. Oh, Mr. President, there is the same difference that there is between a $1,000 house and a $5,000 house—the same difference there is between the cost of marble and brick or between pine boards and mahogany.

Mr. SIMMONS. I am not quite sure, but I am under the impression that the majority of the vessels engaged in carrying cotton from the southern ports run from about 1,200 to 2,500 tons. Has the Senator any idea of what those boats would probably cost? I think they are purely freight boats.

Mr. GALLINGER. I have not, Mr. President. I think that tonnage is inordinately low, and I should think it would be very expensive to transport any product such as cotton in vessels of that type. They must be very slow and inefficient. But I frankly admit to the Senator that I have nothing to warrant a definite opinion in answer to the question the Senator puts.

Mr. SIMMONS. The Senator and myself traveled across the ocean, I believe, in the *St. Louis*.

Mr. GALLINGER. We traveled the other way in a much more expensive and luxurious boat than the *St. Louis*, as the Senator will remember.

Mr. SIMMONS. Yes; going one way, but coming the other.

Mr. GALLINGER. In other words, we traveled in a German ship going across (a ship now interned in New York) and an American ship coming over. The Senator knows the difference between those two ships, and the relative cost.

Mr. ROOT. Mr. President, may I inquire whether there was any specific reason for the Senator's coming back in a more economical boat than the one in which he went over? [Laughter.]

Mr. SIMMONS. We had a very economical chairman and auditor, and the appropriation was getting a little low, I expect. That, I think, is a boat of about 10,000 or 12,000 tons. According to the Senator's estimate of $50 a ton, that would be about $500,000.

Mr. GALLINGER. My estimate of $50 a ton was for a pure freighter, which the *St. Louis* is not. The *St. Louis* is considered a most excellent ship.

Mr. SIMMONS. What I wanted to get from the Senator was whether his estimate was based upon freighters or passenger vessels.

Mr. GALLINGER. A pure freighter of the lowest type.

Mr. President, I am conscious of the fact that some criticism will be made because I have placed in the RECORD the opinions of a former Member of this body on the question of Government ownership; but, as I said before, to me that is the crux of this whole situation. To me the question as to whether we are to inaugurate Government ownership in a great industry such as transportation across the oceans of the world leads me to give more attention to it than I otherwise would. I would have been glad to have simply discussed the bill, as I shall discuss it in a little while, from a maritime standpoint, and endeavor to show that our country has been very unwise in its legislation and that this attempt is but another unwise one to solve a problem that, in my judgment, can not be solved in this way. No doubt I shall likewise be criticized for giving, as I shall now proceed to give, the opinions of individuals and the editorial views of some of the great newspapers of the country against the bill that is now engaging our attention.

The matter of municipal ownership of public utilities is making a rather poor showing these days, Mr. President; and municipal ownership is not any different from Government ownership. It is Government ownership; and if it is not doing well, if it is not making a success, it ought to cause us to hold our breath and give pause to legislation that is to extend that principle. Everywhere municipal ownership seems to be suffering from depression, possibly "psychological," and we may expect to be told that it is manufactured to endanger the prospects of success of a bill which provides for the municipal ownership of the street railways and other public utilities of the District of Columbia. I do not know whether it was by accident or design, and I make no criticism that would be invidious or distasteful to anyone, but it is rather a remarkable circumstance that during the present administration every man appointed to the position of Commissioner of the District of Columbia is in favor of Government ownership. One of the first announcements he makes is that he is in favor of the Government taking over the public utilities of the District of Columbia—the street railways, the gas plant, the electric-light plant, and other utilities, if there are any. I want to show—and I shall be as brief as I can in discussing this phase of the matter—that municipal ownership where it has been tried has not been a success. A leading newspaper says:

> Following closely reports from Seattle telling of financial loss from municipal operation of the street cars come advices from three Canadian cities, which have been proudly pointed to, showing dismal failure in two and a most extraordinary "success" in the third—success consisting of a deficit as yet not estimated and a service so precarious that "many people would rather walk to and fro," so it has been asserted.
>
> Our municipal-ownership crusaders pose with expanded waistcoats and fondle unctuously the theory that they are the people's friends, the abnegating champions of the wage earner against the bondholder; so it may be they will not hastily reject the evidence of the failure of municipal ownership in Canada, notwithstanding it is published in and vouched for by the Union Labor Advocate, official organ of the Washington Building Trades Council, affiliated with the building trades department of the American Federation of Labor.
>
> This reliable publication, it appears, sought information from its official correspondents concerning the operation of municipal ownership in Canada, solely for the reason that such an experiment was being discussed in Washington. Their responses appear in the current issue of the Union Labor Advocate. Coming from a source which can not be accused of prejudice against municipal ownership, they are worthy of careful consideration.

I shall not quote them all, but shall give one or two illustrations.

From Edmonton, Alberta, J. Hanning, secretary, sends the following astonishing summary of the situation:

> It is an utter failure in Edmonton. The street car system is the poorest of five cities I have lived in—Toronto, Vancouver, Portland, Winnipeg, and Edmonton—and the fares are equal to the highest—straight 5 cents.
>
> The reason for the failure of municipal ownership to compete, or even compare, with private ownership in this city is because the spoils system entirely eliminates all chances of getting competent men to run it. Every year the administration changes, and with it the entire staff goes, too. Always incompetent men are given the jobs, their ability lying in their power to get votes. * * *
>
> It is true they have lost $40,000 since its inception, and it looks as though they will lose more. The city owns the electric-light system and sells the street car service power at 2 cents per kilo, robbing Peter to pay Paul. Residents pay as much as 8 cents per kilo.
>
> The city sells its railway the necessary power at one-fourth the rate it charges the residents, and the road loses $40,000.

A recent French publication by Yves Guyot, translated from the French, entitled "Where and Why Public Ownership Has Failed," is a document of much interest and value. Perhaps a more suggestive title would be, "Where Has Public Ownership Not Failed?"

> According to M. Guyot the successful instances are practically undiscoverable. In an exhaustive fashion he cites the experiences of all the civilized countries of the world in the experiment of ownership or operation of what have come to be known as public utilities. It has been uniform. Expensive and unsatisfactory service are shown beyond question to be the unbroken rule, and though in some instances an apparent success from a financial view has been made in some countries in some directions and at some time, the happy experience was short lived and due entirely to the methods of bookkeeping in use; that is to say, allow for the amortization of the original cost of the plant and of its renewals or extensions and only a loss can be figured from State ownership. An abundance of minute and carefully tabulated statistics are furnished and the whole field of governmental monopolies from railways to alcohol and from Belgium to Russia is covered.
>
> For this uniformity of experience there must be a reason. M. Guyot finds it in the mainspring of human action, which, until now and probably forever, have been and will be the same. High office, money decorations, rank, and homage are things men strive for, and with the certainty that such things are not obtainable for the individual through successful conduct of a business for the State, interest is lost or even never aroused in the enterprise. And without that failure is certain. The Socialist declares that national or municipal undertaking is more economical than private, because no dividend need be paid upon capital. But interest and sinking fund authorization must be provided for, consequently the margin of economy is merely the difference between the two, and experience has taught uniformly that the poor service due to poor management by salaried public officials tends constantly toward diminished receipts and so toward the reduction of the margin of economy.

A careful perusal of M. Guyot's work will well repay anyone who is interested in this subject which is now being seriously

agitated in this country. The standing of M. Guyot as an economist gives assurance as to his method and accuracy, and if there be any virtue in profiting by the experiences of others we will do well to realize that the path of innovation is not necessarily the path of wisdom.

The proposition that the Government shall invest $40,000,000 in the purchase and building of ships, to be operated by the Government, is almost universally condemned by the press and by thoughtful business men. Rear Admiral Stockton writes as follows:

> They (the belligerents) will quietly take the vessels put under the American flag to evade capture and condemn them as legitimate prizes—a condemnation which is not only justified by the law and usages of the sea, but by treaties which we have entered into.

Mr. ROOT. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from New York?

Mr. GALLINGER. Certainly.

Mr. ROOT. May I ask the Senator if that is the same Admiral Stockton who was one of the delegates of the United States to the conference of London?

Mr. GALLINGER. I understand so.

Mr. ROOT. And who signed the declaration of London in behalf of the United States?

Mr. GALLINGER. He did.

Mr. ROOT. And who was at one time the head of the Naval War College at Newport?

Mr. GALLINGER. He was.

Mr. ROOT. And a very distinguished authority on questions of international law and naval law?

Mr. GALLINGER. A man of great distinction along those lines. I want to repeat what Admiral Stockton says:

> They—the belligerents—will quietly take the vessels put under the American flag to evade capture and condemn them as legitimate prizes—a condemnation which is not only justified by the law and usages of the sea but by treaties which we have entered into.

Mr. James McLoughlin writes to me from the Aldine Club, New York, as follows:

JANUARY 5, 1915.

Hon. J. H. GALLINGER,
Senate Chamber, Washington, D. C.

DEAR SIR: I am a college graduate, have been a licensed master of vessels, and have been and am still a shipper of merchandise by sea for the past 35 years. I conceive, therefore, that I have a right to be heard in the discussion of the question of the registry of ships of belligerent powers in the United States at the present time and the organization of a company, with the Government as a stockholder, to own such ships.

It appears to me to be the most crazy proposition which has so far emanated from an eccentric administration.

If we do these things, England daring, we will soon be at war with her.

If we do them, socialism and paternalism will have set a new limit and private property will be driven from the high sea so far as the American flag is concerned

I hope you will do all you can to delay and prevent this obnoxious thing. There is no limit to which you can go which will not be patriotic and a fulfillment of your obligation to the State and country you represent.

Here is a letter from Wallace Downey, director-treasurer of the United States Marine Association, New York City, which is worthy of careful consideration:

> We are against Government ownership on general principles and emphatically against it owning and operating merchant vessels competing with private-owned foreign ships. Government ownership within the limits of the Nation is bad enough, but it is our own affair. Government ownership of vessels competing with private-owned foreign vessels in foreign trade would certainly create foreign and domestic jealousy, international friction, and ultimately war. All this in addition to stagnation of private interest and adequate development and tens of millions of Government money lost in investment and operation for an inefficient and paltry service. Ship subsidy, with all its faults, would be twenty times cheaper annually, twenty times more effective and productive of necessary results, and one hundred times safer internationally.

I also call attention to the following letter from Dr. Royall J. Miller, of Atlanta, Ga., which shows that the people of the South are taking an active interest in this question:

Senator GALLINGER, *Washington, D. C.*

DEAR SIR: I am taking the liberty of inclosing you a clipping from the Atlanta Georgian, January 20. The proposed amendment to buy ships and lease or sell them to private parties or corporations is a most pernicious one. It more closely approaches a direct subsidy than any measure recently proposed. Those who reversed themselves on Panama tolls because they claimed that was a subsidy are now proposing this plan of investing Government money in ships for individuals or corporations, charging only 4 per cent for the money.

Very truly,

ROYALL J. MILLER, M. D.

Mr. President, the hearing upon this bill in another place was a very meager and unsatisfactory one, and no hearing whatever was given to the people of the United States in this body. In the other House two Members of that body made addresses, and the Secretary of the Treasury gave his opinion concerning the measure at very great length. No business man was called, no shipping man was called, no merchant was called, no expert was called, nobody was called except the three gentlemen I have named; and that hearing occupied a small part of two days. I wondered then that they did not call some of these experienced men, some of these practical men who know something about this subject from the practical viewpoint. I wondered that Capt. Dollar, of San Francisco, a man who owns ships that are engaged in both the foreign and the domestic trade, was not asked his opinion. I wondered why Capt. Crowley, who is likewise the owner of ships in both the foreign and the domestic trade, was not called to express his views. I speak of those two men as representative of a class of men who have definite, positive, personal knowledge of this subject. And I also wonder that James J. Hill, that great master of transportation, was not asked to give his opinion.

Two or three days ago, and without any solicitation on my part, I received a letter from Capt. Crowley, which I shall read. He is known to a great many Members of this body. He is known to all the Members, I doubt not, of the Committee on Commerce. He is a man who has the confidence of every man who knows him in Boston or elsewhere. He says:

Hon. JACOB H. GALLINGER,
United States Senate, Washington, D. C.

DEAR SIR: I am glad to note by the papers that our New England Senators are putting up a strong fight on the Government ownership bill, and I hope and trust they will succeed in defeating it. If it should go through I can not understand where the Government will be able to purchase or build ships, as I have had a man in England for five weeks trying to buy or charter ships, but it was impossible to do so, and could not get a ship built there under any guaranty of delivery.

I wish every Member of the Senate might have heard that sentence as I read it, as it is a pretty direct and conclusive answer to the suggestion that all we have to do is to go out and buy these ships, or all we have to do is to go abroad and have them built and go into the business of transportation.

> I would also state that the shipyards in this country are now practically full of work, and they can not guarantee to build or deliver any ship inside of 12 to 18 months.
>
> My company has just contracted with the New York Shipbuilding Co., of Camden, N. J., for two large ships, to run in the Atlantic and coastwise trade, and we can not get these ships within a year's time.

And yet, Mr. President, that private company represented by Capt. Crowley, having contracted for two large ships to be built by the New York Shipbuilding Co., of Camden, will have their ships afloat just about the time the Government goes into the business in competition with private shipowners, provided this bill passes, and Capt. Crowley's ships will be sent to the scrap heap, in my opinion, because neither he nor any other private shipowner or shipbuilder can possibly compete with the Government under the conditions of this bill. Capt. Crowley concludes:

> I note there has been much talk about high ocean freight rates, which is no fault of the shipowners of this country, but is the fault of foreign shipowners, and of course it is only natural that American shipowners should follow. It is not only ocean freights that have gone up, but all commodities, such as cotton, wheat, etc., which is on account of the war. As soon as the war is over freight rates will go down to their normal prices, and there will be plenty of ships in the market.
>
> My company are still in the market for ships, but as we are unable to buy any abroad and can not get any delivered in this country inside of 12 to 18 months, it would be no use for us to go ahead and contract for more ships, as there will probably be a great change in prices and freights before the ships can be delivered.
>
> I am inclosing you several clippings in regard to Government-owned ships. Trusting you will be successful in defeating this bill, I am,
>
> Very truly, yours,
>
> COASTWISE TRANSPORTATION CO.,
> J. G. CROWLEY,
> *General Manager and Treasurer.*

Under date of January 16 I received the following letter from the Boston Chamber of Commerce:

> The board of directors of the Boston Chamber of Commerce at their meeting on January 14 unanimously adopted the report of the chamber's special committee on merchant marine, in which it recommended that the chamber oppose the bills now pending in both Houses of Congress (H. R. 18666 and S. 6856), providing for Government ownership and operation of vessels engaged in foreign trade, for the reasons set forth in the report, a copy of which is sent you herewith. The committee also makes specific suggestions as to the preferable methods of creating a strong and enduring merchant marine.
>
> In arriving at its conclusions the committee not only carefully considered the proposed measures now pending in Congress, but invited JOSHUA W. ALEXANDER, chairman, and Congressman E. W. SAUNDERS, of the House Committee on the Merchant Marine, and ex-Congressman J. Sloat Fassett, who addressed the members of the chamber at a public dinner and presented the arguments for and against the proposed measures. This was done in order that the chamber should not take action until it had been fully informed upon the different phases of the question.
>
> After careful consideration of the arguments presented the board of directors are unanimous in their opinion that the present bills for Government ownership and operation of merchant vessels would discourage private capital and personal initiative, and deter the development of an American shipping industry, so vital to the commercial progress of Boston, of New England, and of the whole United States.

As a substitute for the plan proposed by the Government the chamber makes six specific suggestions for creating an American merchant marine, which they believe to be much preferable to Government ownership.

We sincerely hope that you will carefully consider the recommendations and suggestions set forth in the chamber's report, and that you may see your way clear to oppose the bills providing for Government ownership and operation of our merchant marine.

Very truly, yours,

E. J. BLISS,
President.
JAMES A. MCKIBBEN,
Secretary.

The report of the committee of the Boston Chamber of Commerce relative to the pending legislation is as follows:

To the Executive Committee and Board of Directors:

There is some precedent in the practice of other nations for Government ownership of railroads; there is none whatever for Government ownership of a merchant marine.

Such experience in this direction as exists is either an accident or a fragment. The United States bought a small steamship line from New York to Colon as a part of the assets of the old French Panama Canal Co., and has operated that line as an incident of canal construction (statement of Mr. E. A. Drake, vice president Panama Railroad Steamship Co.) at a nominal bookkeeping profit of about 2 per cent for 10 years, with insurance, depreciation, and interest disregarded—imperative charges of a regular steamship concerns which, if paid by the Government line, would have involved a huge deficit and bankruptcy. The Government of western Australia has owned and operated a small coastwise steamship line for two years (report of attorney general of western Australia), with a loss of $114,000 the first year and of $96,000 the second. It is believed that this enterprise will be abandoned.

This is the net experience in Government ownership which the world affords—two lines, both of them financially failures. Yet the ocean-steamship business as a whole in private hands is and has been reasonably prosperous—as prosperous, on the average, as other industries, or it could not have procured capital for its great and constant growth. Twenty-five years ago the tonnage of all nations recorded by Lloyd's was 22,151,000; 10 years ago it was 36,000,000; now it is 49,089,000.

There has been almost no increase in the overseas tonnage of the United States in this period, but the causes are well known. This is not the place for their discussion at length, and they can not be remedied by a mere expedient of Government ownership. Steamers of a Government-owned line would, if built in the United States, cost more than competing foreign-built ships, or if bought abroad would cost no less than such competing ships, and would cost considerably more to operate. They would, of course, equally with private-owned American ships, be debarred from the subsidies of foreign Governments. A half a century of actual trial proves that under such conditions and with only such exceptions as serve to prove the rule, American ships can be maintained in overseas commerce only at an annual loss that finally becomes prohibitive.

MORE COSTLY THAN A REGULAR SUBSIDY.

This inevitable loss under these bills will have to be made up out of the Treasury of the United States, through appropriations for the maintenance of the Government-owned steamship service. There is no proof or suggestion that a Government-owned line under the American flag can be operated at any less expense than a private-owned line. In fact, the expense of a Government-owned line would certainly be greater, for it has been established again and again that the Government can not conduct any business so economically as private individuals trained from youth in that business and dependent on it for profit and livelihood.

Experience has shown that it costs about 20 per cent more to build battleships in Government navy yards of the United States than in private yards, under like systems of accounting, and it is a fair assumption that there would be at least an equal contrast in the cost of ship operation. Therefore it is a reasonable expectation that if a subsidy of a given amount were required for the profitable maintenance of a private-owned merchant marine, a Government-owned merchant fleet would demand a subsidy at least 20 per cent, and probably much more than 20 per cent, greater, in the form of appropriations from time to time for the Government steamship corporation, of whose stock the Government holds 51 per cent while private capitalists may own the remainder.

Without entering on a consideration of the expediency or justice of a subsidy system, it is indisputable that this Government-ownership project involves a particularly wasteful form of subsidy expenditure, inasmuch as trained and responsible private shipowners would be able to provide a given service at a lower cost, or for the same amount to render a more efficient and comprehensive service.

SHIP OWNING A SPECIALIZED BUSINESS.

The proposed bills hold that the Government-owned merchant marine shall be managed by a shipping board, composed of the Secretary of the Treasury, the Postmaster General, and the Secretary of Commerce—

This was written before the third edition of the bill was presented to the Senate—

not one of whom, probably, would have had the slightest experience in or knowledge of the ocean shipping business, which is a profession by itself, complex and difficult, requiring intense application and exceptional aptitude. It is not to be expected that Cabinet ministers, even of the highest general abilities, could compete in this highly specialized calling with men who had made it the one thought and effort of their lives.

The Panama Canal line is a conspicuous case in point. Its president is and has been Col. George W. Goethals, the distinguished builder of the canal. This Government line, though favored in the transportation of officials and employees, supplies, and materials, has failed to earn a sum equivalent to its insurance, depreciation, and interest, which must be regularly met by all private steamship companies.

DOES AN EMERGENCY EXIST?

It is said that an emergency exists because of the great European war, and that this emergency justifies a disregard of all precedents and demands immediate and extraordinary legislation. We deny that there is any such extreme emergency. Chartering is active; vessels long idle are being employed; freight rates have advanced. But these higher rates are due in chief part to risks incident to the war, to higher insurance rates, and to an increased cost of coal, supplies, and wages. Shipowners and merchants who have been questioned state that there is ample tonnage offering in the world in general for the reduced amount of trade that is being transacted. In South American commerce, especially, on which stress is laid by the proposed bills, there are said to be more ships than cargoes. A widespread business depression, due to the war and other causes, has suddenly reduced the purchasing power of the South American Republics. A new American freight steamship line has recently been established to Brazil. Other American steamships naturalized under the new free-registry law are scheduled to sail at frequent intervals for Argentina, Uruguay, Chile, and Peru. There is and long has been an American line to Venezuela, and there are two or three American lines, one the Government-owned service, to the Isthmus of Panama, aside from the six American lines regularly plying through the canal in the coastwise trade between the Atlantic and Pacific seaboards. The managers of the lines to the farther countries of South America state that because of the prevalent business dullness they are finding it difficult to load their ships and maintain their sailings, without the additional handicap of having the Government of the United States as a competitor.

A note is appended which says:

The United States & Brazil Steamship Line, under the auspices of the United States Steel Corporation, operates three American freight steamers from New York to Rio de Janiero and Santos. Norton, Lilly & Co. operate three American freight steamers from New York to Montevideo, Buenos Aires, and Rosario. W. R. Grace & Co. (Merchants' Line) and the New York-South American Line both operate American freight steamers from New York to Chile and Peru. The Red D Line operates four American mail, passenger, and freight steamers under ocean mail pay to Venezuela. The United Fruit Co. operates several American mail, passenger, and freight steamers from New York to the Isthmus of Panama and Colombia. The Panama Railroad Steamship Line operates several American mail, passenger, and freight steamships from New York to the Isthmus of Panama, connecting at Balboa for ports on the west coast of South America.

The report continues:

AS TO THE LACK OF COTTON SHIPS.

There is some difficulty in securing a sufficient number of ships on the route from the southern cotton ports to Bremen; but it should be understood that because of mines and other conditions this is an extra-hazardous service. British and French ships, of course, are not available for the carrying trade to Germany, and the German Government has stipulated that cotton shall be brought to German ports only in ships of American register, which are also preferred for the export of German dyestuffs and chemicals. Twelve or more American steamers from the coastwise service have accepted charters in the Bremen cotton trade during the few weeks since that trade was opened.

The information of the committee is that the real difficulty in the Bremen trade is not lack of ships but lack of marine insurance on hulls and cargoes. A Federal war insurance board has already been instituted for temporary service through the European war. Proposals to extend the authority of this board so that it can assume marine risks for the time being, while conditions remain as abnormal as they are now, are already before Congress. Such an expedient would solve the problem without any need of resort to the costly and dangerous expedient of Government ownership. If proper insurance can be had more ships will be available. There are still suitable American steamships not yet chartered. From this fleet, with return cargoes practically assured, enough tonnage should be had to carry all the cotton required for direct import by Germany. In addition to these steamships there is a large fleet of seagoing sail vessels, capable of carrying cotton or other cargoes with reasonable safety if insurance can be had. Indeed, several American sailing craft have been chartered in the past few days for lumber freights from the Gulf of Mexico to the Mediterranean.

A HAZARD TO NEUTRALITY.

There are large considerations of national prudence why any American ships employed to carry cotton or other goods to German ports should be private-owned ships, instead of the property of our National Government. Hon. Robert Lansing, the counselor of the Department of State, recently emphasized before a subcommittee of the House Committee on Naval Affairs the grave risks that would be run in the transportation of conditional contraband to a belligerent port in a public ship of the United States. Raw cotton is regarded as noncontraband, but the very appearance of a national-owned ship in belligerent waters is fraught with a peculiar hazard to neutrality that does not attach to the voyage of a private-owned vessel.

An accident or affront to a Government-owned ship would be a vastly more serious affair than a similar happening to an ordinary commercial vessel not of a public character. A Government-owned merchant marine, created in the stress of war, would be a potent agency for the embroiling of the United States in the terrible catastrophe now convulsing Europe.

GOVERNMENT OWNERSHIP WILL NOT INCREASE TONNAGE.

No considerable increase in the amount of tonnage actually available for the carrying of our over-seas trade in any direction can be anticipated from this proposed expedient of Government ownership. All the American ships and all the neutral ships that could be bought and utilized for this purpose by the Government can be had equally well for charter for export at current rates on application to their present owners. Government ownership has no magic power to increase the tonnage of the world. New ships can not be constructed in either American or foreign yards in a period less than 7 months—9 or 10 months or a year would be required for the largest cargo vessels. The British Government, on December 23, proclaimed an embargo on the transfer of British ships to foreign flags without the assent of the British Board of Trade, which in present circumstances would hardly be forthcoming. Dutch, Scandinavian, Spanish, Italian, and other neutral steamers are in such active demand and are earning such unusual rates of freight that it is not probable that our Government could purchase them now without the payment of inordinate prices. A scheme of Government ownership and operation, hazardous and difficult at any time, could be effected at the present juncture only by a prodigious expenditure.

Thirty or more German steamships, some of them of large tonnage, are interned at present in ports of the United States. The Hamburg-American Co., the larger of the concerns owning them, has recently declared that its ships were not for sale. Moreover, last August, a rumor that these German steamers might be bought by the American

Government immediately drew a notification from both Great Britain and France that the purchase and operation of these belligerent vessels under the American flag would be regarded as an unfriendly act and as a violation of neutrality.

The committee is deeply interested in the real revival and restoration of the American merchant marine in over-seas trade, but is profoundly convinced that an ambitious scheme of Government ownership would discourage and delay and not promote this great object dear to the hearts of the entire Nation. Shipowners and shipbuilders state that the introduction of these proposed bills has had the unfortunate result of halting private enterprise and defeating important plans for the extension of steamship services and for new construction. No business man, no business corporation, however resolute and resourceful, desires to have as a possible competitor the Government of the United States.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Colorado?

Mr. GALLINGER. I yield to the Senator.

Mr. THOMAS. Will the Senator yield with the understanding that he does not yield the floor except for the purpose of an executive session?

Mr. GALLINGER. I will ask the Senator from Colorado if after the executive session a recess will be taken?

Mr. THOMAS. Not until late. The purpose is to go back into legislative session.

Mr. GALLINGER. Very well, Mr. President, I am quite willing to take a little rest, and I yield.

EXECUTIVE SESSION.

Mr. THOMAS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 1 hour and 37 minutes spent in executive session the doors were reopened.

THE MERCHANT MARINE.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes.

Mr. KERN. Mr. President, it was the desire of the majority, and I might say the intention of the majority, that the session should continue until about 9 o'clock this evening, in order that the business of the Senate might be facilitated. I understand, however, that the Senator from New Hampshire [Mr. GALLINGER], who has the floor, is somewhat indisposed, on account of having spoken some two and a half or three hours, and would prefer that he be permitted to go on to-morrow morning, not desiring to have the continuity of his remarks broken.

While in the opinion of a majority a filibuster is in operation, and as a filibuster is supposed to be a test of physical endurance that might not be a sufficient excuse for the majority to abandon its purpose and intention, we are not unmindful of the fact that the Senator from New Hampshire is, in point of service, the oldest Member of this body; we all have a kindly feeling for him personally; and we are not inclined to hold the Senate in session to any later hour than 6 o'clock.

I think, however, it is fair that notice should be served upon Members on both sides of the Chamber that it is the purpose of the majority that there shall be night sessions hereafter throughout this week, and that hereafter, in case of one Senator becoming exhausted, it will be necessary that some other Senator shall be prepared to take his place; otherwise, a vote will be insisted upon.

I give this notice in all kindness.

Mr. GALLINGER. Mr. President, if the Senator will permit me, I think it is due to myself to say that I am not indisposed, and I have not made any such claim. Senators upon the other side very kindly said to me that if I preferred to go on to-morrow, it could be arranged. I deeply appreciate any courtesy that is extended to me; but I do not want it to go out, even into the corridors, that I am a sick man, because I am not.

Mr. KERN. I only know what has been told to me by Senators on this side of the Chamber; and I assumed, from what they told me, that the Senator expressed a preference to be relieved from further work to-day.

Mr. GALLINGER. When consulted I did express a preference, just as we have done hundreds of times in the past, that it would be more agreeable to me to go on in the morning; but, of course, I am subject to whatever program the majority has in mind. I want to repeat that I do appreciate deeply any expression of kindness or any act of courtesy on the part of the majority, and that it would be more agreeable to me to go on in the morning; but if it is thought otherwise, I shall not insist upon it, and I have not insisted upon it.

RECESS.

Mr. KERN. In view of the preference expressed by the Senator from New Hampshire, and in view of the fact that word has been passed about that the session to-day would not be continued later than 6 o'clock, I move that the Senate take a recess until 11 o'clock to-morrow morning.

Mr. HUGHES. Mr. President, will the Senator withhold that motion for a moment that I may submit a report?

Mr. KERN. I withhold the motion for that purpose.

Mr. HUGHES. I ask unanimous consent to submit, in behalf of the junior Senator from New York [Mr. O'GORMAN], a favorable report from the Committee on the Judiciary.

Mr. SMOOT. I object.

The VICE PRESIDENT. Objection is made. The Senator from Indiana moves that the Senate take a recess until 11 o'clock to-morrow morning.

The motion was agreed to; and (at 5 o'clock and 52 minutes p. m.) the Senate took a recess until to-morrow, Wednesday, January 27, 1915, at 11 o'clock a. m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate January 26, 1915.

INTERSTATE COMMERCE COMMISSIONER.

Henry Clay Hall to be an Interstate Commerce Commissioner.

UNITED STATES ATTORNEY.

Edwin S. Wertz to be United States attorney for the northern district of Ohio.

UNITED STATES MARSHAL.

Jonas T. Amis to be United States marshal for the middle district of Tennessee.

RECEIVER OF PUBLIC MONEYS.

Raymundo Harrison to be receiver of public moneys at Fort Sumner, N. Mex.

PROMOTIONS IN THE NAVY.

Capt. De Witt Coffman to be a rear admiral.
Capt. William F. Fullam to be a rear admiral.
Commander Edward L. Beach to be a captain.
Lieut. Commander Gatewood S. Lincoln to be a commander.
Lieut. (Junior Grade) Ralph C. Needham to be a lieutenant.
Lieut. (Junior Grade) Richard T. Keiran to be a lieutenant.
Asst. Paymaster Smith Hempstone to be a passed assistant paymaster.
Second Lieut. Charles L. Austin, United States Army, to be an assistant paymaster.

POSTMASTERS.

COLORADO.

J. A. Theobold, Breckenridge.

CONNECTICUT.

Edward M. O'Brien, Waterbury.

FLORIDA.

James F. McKinstry, Gainesville.

GEORGIA.

General M. Kilgore, Loganville.

INDIANA.

John A. Cody, New Albany.

MINNESOTA.

George E. Crow, Walker.
Edwin L. Gove, Madelia.
Charles E. McAllen, Chokio.
Charles W. Mobeck, Center City.

NEW YORK.

Frank P. Bagg, Barneveld.
Sylvester R. Deyo, Kingston.
Edgar H. Jolliffe, Congers.

OHIO.

William A. Ault, Wadsworth.
Andrew H. Austin, Ravenna.
John S. Gossett, Dennison.

PENNSYLVANIA.

Charles B. Duff, Ford City.
Glen S. Hamilton, Falls Creek.
Michael F. Lawler, Jessup.
William Leslie, Parkers Landing.

VIRGINIA.

A. B. Buchanan, Tazewell.
William H. Maffett, Vienna.
John L. Pulley, Ivor.
C. F. Ratliff, Floyd.
T. W. Richardson, Bedford (late Bedford City).

WEST VIRGINIA.

A. L. Hatfield, Matewan.
James A. Pyles, New Martinsville.

WISCONSIN.

Edward Cody, Antigo.
John Coppes, South Kaukauna.
William F. Gruenewald, Oshkosh.
Alexander W. Horn, Cedarburg.
E. J. Jacquot, Hortonville.
Frank H. Kellner, Denmark.
Levi Lane, Oconto Falls.

HOUSE OF REPRESENTATIVES.

TUESDAY, *January 26, 1915.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Make us tractable, O God our heavenly Father, to the heavenly vision revealed unto us in the life, character, and teachings of the Jesus of Nazareth, that with unselfish devotion, patience, zeal, efficiency, we may do the tasks whereunto Thou hast called us, and thus be the instruments in Thy hands for the furtherance of good government and the betterment of mankind. In His name, Amen.

The Journal of the proceedings of yesterday was read and approved.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. RUSSELL, for two days, on account of sickness.

To Mr. CARY, for 10 days, on account of death in his family.

The SPEAKER. Both these requests should date back to yesterday; but last night, when the House failed to obtain a quorum, they were not submitted.

AGRICULTURAL APPROPRIATION BILL.

Mr. LEVER. I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 20415) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1916.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the Agricultural appropriation bill, H. R. 20415, with Mr. HAMLIN in the chair.

The CHAIRMAN. The Chair understands that there is a motion pending to strike out.

Mr. ANDERSON. That amendment was defeated.

Mr. LEVER. As I recollect it, that amendment was withdrawn by unanimous consent.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] objected.

Mr. MANN. That amendment was defeated, and I then moved to strike out the last two words, and I withdraw that pro forma amendment.

Mr. CANDLER of Mississippi. A vote was taken after the gentleman from Illinois [Mr. FOWLER] objected, and that amendment was defeated.

Mr. ANDERSON. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Minnesota offers an amendment which the Clerk will report.

The Clerk read as follows:

Page 20, lines 6, 7, and 8, strike out the word "straw," in line 6, and the words "which may be used for paper making," in lines 7 and 8, and insert in lieu thereof the following: "with a view to increasing the oil content of flaxseed."

Mr. ANDERSON. Mr. Chairman, I think the debate last evening very thoroughly demonstrated the fact that the work under this item is not being directed toward a very feasible or practical end, and the purpose of my amendment is to redirect the work under the item to a somewhat different field in the same general line. In other words, the amendment does not prevent the appropriation being applied to flax, but applies it in the direction of increasing the oil content instead of experimental work in the direction of its usefulness for paper making.

The North Dakota Experiment Station has been carrying on experiments with flax for a long time. Practically 90 per cent of all the flax raised in the United States is raised in the States of Minnesota, North Dakota, and Montana. The reason for that is that there has been a very general opinion among farmers that flax could not be raised two, three, or four years in succession. So it has been almost exclusively a pioneer crop. The North Dakota station in its experiments has ascertained that where flax is raised for three or four or five years in succession a certain parasitic growth appears which attacks the roots and results in a kind of wilt. The North Dakota station has also been carrying on certain experiments along the line of the rotation of crops and the treating of the seed to eliminate this parasitic growth and has developed resistant varieties of plants and seed. But what I desire with this amendment is to direct the work under the item toward the increasing of the oil content of the flaxseed. In this country flax is raised almost entirely for the seed, and as the value of the seed depends almost entirely upon its oil content the work under this item, if it could be directed toward the testing of flax so as to increase the oil content of the seed, would be very much more valuable than it can possibly be when directed as it now is.

Mr. McLAUGHLIN. Mr. Chairman, I have no doubt that there is much force in what the gentleman from Minnesota says in regard to the value of the flaxseed and the uses to which it is or may be put and the desirability of investigation along that line, but I think the amendment he offers ought not to be adopted just as he has framed it, as it will stop altogether experiments that are being made to learn if flax straw can be used profitably in the making of paper.

When the matter was considered by the Committee on Agriculture some doubt was expressed as to the wisdom of continuing the appropriation, but, as I recall, the officials from the department who spoke concerning it said that the work had been carried on very satisfactorily and that it has not yet been finished, but the provision as it appears in the bill was retained largely as a result of the statement made by the gentleman from North Dakota [Mr. HELGESEN], a member of the committee, who in a very clear and convincing manner told of the value of the work the experiment station in North Dakota is doing.

The gentleman's statement convinced the committee that the work ought not to be abandoned; and while I have no objection to the bill containing an appropriation to enable the department to make investigations as to the use of the flaxseed, I think it would be unwise at this time to eliminate altogether the provision in regard to experiments with the flax straw; and if an amendment is to be made, I think the experiments regarding straw ought to be continued, although the provision may well be extended perhaps to include the experiments respecting the seed.

Mr. ANDERSON. Will the gentleman yield?

Mr. McLAUGHLIN. I yield to the gentleman from Minnesota.

Mr. ANDERSON. I want to say to the gentleman that I had drawn a paragraph proposing a new item covering the work I had in mind, but in view of the general attitude of the committee and the desire to keep this bill within reasonable limits and to exercise economy, I thought it better to direct the money already provided by the bill to the new use than to increase the expenditure by preparing new items; but if there is any real opposition to discontinuing the work under the item I shall offer the proposition as a new paragraph.

Mr. McLAUGHLIN. That would be my suggestion to the gentleman—that he so broaden the language as to permit the department to make experiments and investigations respecting the use to be made of flaxseed. I do not know what the chairman of the committee may do, but if the suggestion is made to increase the appropriation, as far as I am concerned, I should rather have it increased than amended, as first suggested by the gentleman from Minnesota.

Mr. LEVER. Mr. Chairman, I was about to suggest to the gentleman from Minnesota to add a proviso making it read something in this way—provided that $5,000 of this amount may be spent in the direction indicated in the gentleman's amendment. I think I would have no objection to that. That would take about half of it.

Mr. ANDERSON. Would not the gentleman be willing to increase the amount by $5,000 so as not to interfere with the other work?

Mr. LEVER. I should rather not, for I have not considered this matter, although the gentleman's statement is very clear.

It is clear to my own mind that we have about reached the point where we ought to close up this investigation, although I would not want to cut it right off at once. It seems to me that $5,000 of this appropriation could be used to start the gentleman's investigation and at the same time leave one or two men continuing their investigations of the paper-making possibilities of flax straw. I would be very glad to accept that amendment.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to withdraw his amendment. Is there objection?

There was no objection.

Mr. ANDERSON. Now, Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

At the end of the paragraph, line 8, page 30, insert the following: "*Provided*, That $5,000 of this amount may be used in testing and breeding flax with a view to increasing the quantity of oil contents of flaxseed, including rotation experiment and demonstration."

Mr. LEVER. Mr. Chairman, I have no objection to that.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

For the breeding and physiological study of alkali-resistant and drought-resistant crops, $22,280.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word. Yesterday in the discussion of this Agricultural appropriation bill there was some little discussion in connection with the sugar industry and its decline. I want to say something about the lumber industry. I find in the report of the Chief Forester, dated December 23, 1914, the following statement in regard to forest management in the national forest:

FOREST MANAGEMENT.

Timber sales on the national forests supply demands from two sources. The first is local use by railroads, mines, and communities in the vicinity of the national forests. This demand requires from 30 to 40 per cent of the annual cut. It is comparatively stable. The second demand is from the general lumber market.

The amount of timber cut and the receipts from sales thus depend in large part upon trade conditions in the lumbering industry. A consistent effort has been made by the Forest Service to make the annual volume of business more stable both by increasing local sales and by encouraging sales for varied industries, such as the manufacture of pulp and paper and of wood distillates, whose demands are less affected by trade conditions. While substantial progress has been made in this direction, no large increase in the volume of timber sales is possible except in connection with good business conditions in the lumber trade of the United States.

Now I call attention to the following paragraph:

Last year was for the greater part one of weak lumber markets and curtailed production. Lumber manufacture was active and trade conditions good from August, 1912, to May, 1913.

That last is the month and year that the House of Representatives passed the Underwood tariff bill and sent it to the Senate. The report continues:

This period of good times in the industry was reflected in the large timber-sale business reported for the fiscal year 1913. Since then, however, the demand for lumber has fallen off to a marked degree. Many of the mills operating in national forest regions, including purchasers from the forests, have been forced to carry excessive stocks, particularly of low grades. There has been a drop in lumber prices of from $1 to $4 per thousand feet on various grades. Possible purchasers, including a number who had previously applied for blocks of national forest stumpage, became very cautious. While the cut under outstanding sale contracts has been well sustained and exceeds that of the preceding year by 131,000,000 board feet, new sales for the general lumber market have fallen off materially.

Mr. SLOAN. Will the gentleman yield?

Mr. JOHNSON of Washington. Yes.

Mr. SLOAN. I want to call the gentleman's attention to the fact that yesterday afternoon a distinguished member of the Agriculture Committee was rebuked by the Chairman for injecting a tariff discussion into this bill. Does not the gentleman fear that he may come under the disfavor of the Chairman and be likely to be rebuked by the Chief Forester?

Mr. JOHNSON of Washington. I have no fear, unless some one should undertake to show that the report of the Chief Forester is merely psychological; that it does not state the situation. Here is the Forester making a report intending to show that the sales and the business in the great forest reserves in the United States are kept up in such a quantity as to warrant the expenditure of five and a half million dollars to take care of this matter. And yet he is, on page 8 of this statement, forced to make the statement that timber conditions are already declining, that there is a fall in the market, and to give the date of the beginning of that as May 8, 1913, in spite of the special reports of Secretary Redfield that the lumber industry was good at that time.

Mr. CANDLER of Mississippi. Will the gentleman yield?

Mr. JOHNSON of Washington. I will.

Mr. CANDLER of Mississippi. The Forester does not attribute it to the Underwood tariff law.

Mr. JOHNSON of Washington. Perhaps not; but I do.

Mr. CANDLER of Mississippi. I know that the gentleman does; but I do not.

Mr. MOORE. Will the gentleman yield?

Mr. JOHNSON of Washington. Yes.

Mr. MOORE. Is it not due to a lack of efficiency? Does not the gentleman think that if we had more careful bookkeeping, as recommended by the Secretary of Commerce, the Forester could show better business?

Mr. JOHNSON of Washington. Here is a great agricultural bill carrying $22,000,000, and a quarter is for the Forestry Service. A great change in the form for the distribution of the fund is contemplated, which will go over without much consideration.

Mr. MOORE. Does not the gentleman think that more "efficiency" in the service would give more work to the unemployed who are now wandering over the country seeking jobs?

Mr. JOHNSON of Washington. I wish that that might be so.

Mr. GOULDEN. Mr. Chairman, I move to strike out the last two words. On lines 9 and 10, page 20, is an item for the breeding and physiological study of alkali-resistant and drought-resistant crops, $22,280. Will the gentleman state what success has been made in that direction?

Mr. LEVER. I will say that the item covers investigations of the function and structure of crop plants grown in the arid part of the United States in order to determine why different species and varieties differ in their resistance to alkali and drought, and in order to furnish a physiological basis for plant breeding, variety testing, and investigations of cultural methods; an investigation of the native vegetation of arid regions with a view to its use as an indicator in classifying land upon the basis of its crop-producing capabilities; investigations to secure more drought-resistant strains of field crops adapted to dry-land agriculture; investigations to obtain by introduction and breeding drought-resistant and alkali-resistant varieties of pomegranates; the securing of varieties of Egyptian cotton yielding fiber of superior quality growing under irrigation in the southwestern part of the United States; and the investigation of the effect of alkali and unfavorable moisture conditions upon this crop.

One of the results of this investigation has been the development of the fact that Egyptian cotton can be grown very successfully in that country, with the result that quite a little industry has been built up at this time.

Mr. GOULDEN. What success have they met with in raising cereal crops under the system known as dry farming?

Mr. LEVER. The success has been somewhat indifferent, I take it, but they are continuing to investigate in the hope of finally finding some way of doing it that will secure the industry in the country.

Mr. GOULDEN. How long has Congress been appropriating for this particular purpose?

Mr. LEVER. Well, I could not tell.

Mr. GOULDEN. Well, a matter of 10 years?

Mr. LEVER. It has been a matter of 8 or 10 years.

Mr. GOULDEN. I remember it was some time ago, but I know that in traveling over the West I discovered a good many dry lands where they were endeavoring to cultivate them, and I wondered what success the department had met in helping to solve that question or assisting in solving it.

Mr. LEVER. It was encouraged by its own success, and I think the members of the committee feel that perhaps that feeling of encouragement is hardly justified by the facts, but we feel they ought to be permitted to continue this work.

Mr. GOULDEN. I have no fault to find with the recommendation of the department or the committee. I only wanted to know for my own information, as well as the Committee of the Whole House, what success has attended the efforts, if any. I have no doubt but that the Committee on Agriculture have acted wisely.

Mr. LEVER. I am glad to give it to the gentleman.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

For investigations in connection with western irrigation agriculture, the utilization of lands reclaimed under the reclamation act, and other areas in the arid and semiarid regions, $70,380.

Mr. BOOHER. Mr. Chairman, I move to strike out the last word. I want to ask the chairman of the committee how many appropriations are made in this bill for the investigation of the semiarid lands?

Mr. LEVER. It is only the item under consideration now and an item which we have just passed a moment ago, and then there is one in the irrigation project carried in the back of the bill.

Mr. BOOHER. Does the gentleman know how much money is appropriated now by these different paragraphs for this investigation of semiarid crops?

Mr. LEVER. I would say, offhand, it was $250,000.

Mr. BOOHER. What has been the result of this experimental work by the bureau of the department?

Mr. LEVER. I will read from my report of last year on this subject. I have not gone into this this year as I did last year.

Mr. BOOHER. I want the chairman and the committee to understand that I am not finding fault, but I want to know if results are being obtained thus far.

Mr. ANDERSON. If the gentleman will permit, I can give him some information——

Mr. LEVER. I will read from the report of last year to the gentleman:

This work includes an investigation of the agricultural conditions in the irrigated regions and adjacent regions of western United States for the purpose of discovering and recommending the best methods of crop production in those regions and to provide facilities for the various cooperating specialists of the Bureau of Plant Industry to work out the agricultural problems which come within their special fields. Special attention is also given to the production of long-staple cotton in the irrigated Southwest, particularly in Salt River Valley, Ariz., and the Imperial Valley, Cal.

Now, the gentleman from Arizona, my friend will recall, last year gave the committee a very succinct idea of the work being done in reference to long-staple cotton, and quite an industry has also grown up in the Imperial Valley of California due to this investigation.

Mr. BOOHER. Does the chairman know how much money has been expended by Congress on these investigations?

Mr. LEVER. I could not tell the gentleman without going back over the reports, and I have not them at hand now.

Mr. STAFFORD. Does the gentleman's estimate of $250,000 apply only to the expense in the field, or does it also include the expenses for examinations here at Washington?

Mr. LEVER. I think it includes the expense in the field, although I have not looked into that.

Mr. STAFFORD. Here we have two items which aggregate some $250,000. Certainly that does not include the expenses in the field and also of these sensitive experts who are employed down here in the bureau at Washington.

Mr. LEVER. I assume a portion goes to administration expenses and a portion to traveling expenses and a portion to salaries. It is expended like any other item in the bureau.

Mr. BOOHER. It can not possibly go to the payment of salaries, because we appropriate for salaries in another place.

Mr. STAFFORD. That is what I am trying to point out to the chairman. The expenses of salaries of officials employed in Washington and used in this work is in addition to the appropriations here provided.

Mr. LEVER. These salaries carried on the statutory rolls for this work here in Washington would be in addition.

Mr. BOOHER. Does part of the salaries for these people come out of the appropriation we are now discussing?

Mr. LEVER. I think not.

Mr. STAFFORD. Not clerical salaries.

Mr. LEVER. I meant clerical salaries.

The CHAIRMAN. Without objection the pro forma amendment will be withdrawn and the Clerk will read.

The Clerk read as follows:

For horticultural investigations, including the study of producing, handling, and shipping truck and related crops, including potatoes, and the study of landscape and vegetable gardening, floriculture, and related subjects, $56,080.

Mr. GUERNSEY. Mr. Chairman, in connection with this item I wish to offer an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 21, at the end of line 18, by adding the following: "And, in addition, $50,000 to reimburse potato shippers for the amount assessed upon them on account of Federal inspection of potatoes offered for shipment."

Mr. LEVER. Mr. Chairman, I reserve a point of order on that.

Mr. GUERNSEY. Mr. Chairman, in connection with the amendment I have offered to provide $50,000 to reimburse shippers of Maine potatoes for the charge imposed on them on account of this Federal quarantine, I wish to say this: The Government declared in 1914—to take effect August 1, 1914—a quarantine on all the potatoes in the State of Maine, as what was called "powdery scab" was found in a few potatoes near the Canadian border.

The declaration of the quarantine against all Maine potatoes was a great hardship for a time to Maine potato growers, and is still a burden to them. It not only prevented shipments from the State but it advertised injuriously one of the chief crops of the State through the country when, as a matter of fact, Maine potatoes have always been unusually sound and healthy—almost entirely free from the suspicion of disease—and 99 per cent are to-day. This is due, no doubt, to the fact that the soil and climate of Maine are particularly adapted to the production of sound potato stock; more so, perhaps, than any other part of the country.

If that quarantine had gone into effect without an appropriation to carry it out, it would have locked up the great potato crop in the State last year. An amount was appropriated—something like $50,000. One hundred thousand dollars was recommended. The $50,000 has proved insufficient. The organization necessary to inspect a crop of thirty to forty million bushels involves a large expenditure of money. The department was obliged to send a superintendent to Maine to take general charge of the inspection. He organized a force which, under his direction, began the inspection, and in addition to his regular salaried assistants he employs a force of from 80 to 150 men under a per diem arrangement to inspect potatoes. This force varies according to the volume of shipments. The $50,000 last year, I understand, has been practically all placed; that is, it has been paid out in part and the balance will be required for the salaries and expenses of the permanent organization during the balance of the fiscal year and to carry on the general expenses of the inspection. Now, a great proportion of the crop is still unshipped, and there is not money to pay for the extra men—the per diem men—who would be required to make the inspection, with the result that the department, in order to continue the inspection, has assessed the shippers $2 per car on every carload of potatoes inspected for shipment, and will continue to do that throughout the balance of the fiscal year 1915. Up to the 1st of December I understand that the department paid all the expense of the inspection; since then it has not been able to, as I have stated, owing to the insufficiency of the appropriation and the expense of its regular organization.

In order to bring to your minds the work involved in the inspection of potatoes in Maine, I will state that in September last 1,908,515 bushels were shipped out of Maine; in October, 2,229,395 bushels; in November, 1,784,630 bushels; in December, 1,610,692 bushels; and there will have to be inspected for shipment more than 2,000,000 bushels per month for several months to come until the crop is sold; and, as near as I can tell, the $2 charge per car on the shippers will amount to fully $50,000.

Mr. McKENZIE. Mr. Chairman, will the gentleman yield?

Mr. GUERNSEY. Yes.

Mr. McKENZIE. What does the State of Maine do in connection with this matter? Is it bearing any of this burden?

Mr. GUERNSEY. The State of Maine has made no appropriation, and I feel it ought not to be called upon to do so, as the quarantine was imposed by the Federal Government for the benefit of the whole country. My attention was called by the gentleman from Pennsylvania the other day to a fact in connection with this matter, that the Government whenever it undertakes these inspections does not in all cases impose the burden upon private individuals.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Maine yield to the gentleman from Pennsylvania?

Mr. GUERNSEY. Yes.

Mr. MOORE. Is it not a fact that we are making appropriations at this time to investigate various diseases, and are making other kinds of inspections without asking appropriations from the States?

Mr. GUERNSEY. That is my understanding.

Mr. MOORE. In the matter of the cane-sugar growers in Louisiana, we are making a direct appropriation for their benefit without asking for any return from the State?

Mr. GUERNSEY. Yes; I so understand.

Mr. MOORE. Is it not true with regard to the work of exterminating the boll weevil, for which we make Federal appropriations constantly? We do not ask any cooperation from the States, but treat it wholly as a Federal matter?

Mr. LEVER. The gentleman from Pennsylvania is absolutely mistaken as to that. I can show by figures that I have here that the States have contributed more for that work in the South than the Federal Government has contributed to it. The policy of the department is to compel cooperation from the States.

Mr. MOORE. Will the gentleman say that that is done in the matter of the cattle tick and other things of that kind?

Mr. LEVER. Exactly. My State has contributed exactly what the Federal Government has contributed. I went before the State Legislature of South Carolina a year ago and urged the State legislature to make an appropriation. I will not say that the result of my speech was the $30,000 which the State appropriated, but the legislature did appropriate the money. [Laughter.]

Mr. MOORE. Let me ask the gentleman from South Carolina this: What amount are we appropriating this year for the treatment of the boll weevil?

Mr. ANDERSON. $666,000.

The CHAIRMAN. The time of the gentleman from Maine has expired.

Mr. GUERNSEY. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. LEVER. The total appropriation for the boll-weevil work is $666,000.

Mr. MOORE. Can the gentleman tell me what the State of South Carolina appropriates to match that?

Mr. LEVER. I will put it in the RECORD. I do not happen to have the figures here. But the State of South Carolina has appropriated more for that object than the Federal Government has appropriated.

Mr. ANDERSON. South Carolina has appropriated——

Mr. LEVER. The college makes an appropriation, I will say to my friend.

Mr. ANDERSON. The State of South Carolina, including the college, appropriates $52,000.

Mr. MOORE. Will the gentleman tell us where most of the money appropriated for the treatment of hog cholera is expended?

Mr. LEVER. Most of it is expended in the Northwest. I do not think a dollar of it is expended south of the Potomac River.

Mr. MOORE. How much do the States appropriate for this hog-cholera work?

Mr. LEVER. I can not tell the gentleman as to that. That is a new item.

Mr. ANDERSON. Some of the States that are getting the benefit of this hog-cholera appropriation are making large appropriations on their own account. They are also making appropriations for serum plants and are providing part of the serum that is used.

Mr. LEVER. I think the State of Ohio has expended $400,000 in building a number of serum manufacturing plants.

Mr. MOORE. In these cases the States act voluntarily in the matter, whereas in the State of Maine the Federal Government actually established a quarantine to prevent the potato growers and potato shippers from getting to their market.

Mr. LEVER. That is done in South Carolina with respect to other things. You can not ship a steer out of an infected area in South Carolina, except under certain regulations. There is no difference between this proposition and that one.

Mr. RUBEY. Mr. Chairman, will the gentleman from Maine yield?

The CHAIRMAN. Does the gentleman from Maine yield to the gentleman from Missouri?

Mr. GUERNSEY. Yes.

Mr. RUBEY. Replying to the inquiry made by the gentleman from Pennsylvania [Mr. MOORE], I will say that the State of Missouri has contributed $75,000 for the work of eradicating hog cholera. Less than that in proportion is received from the Federal Government, and it is the policy of the Department of Agriculture to cooperate with the States, and in nearly every instance the States are contributing a proportional part, not only for the eradication of hog cholera but everything else.

Mr. MOORE. Can the gentleman tell us about the foot-and-mouth disease?

Mr. LEVER. I will say with reference to the foot-and-mouth disease that the States and the Federal Government do cooperate and pay half and half the expense.

Mr. GUERNSEY. In the inspection of the shipment of beef by the packing houses is the expense divided, or is it paid wholly by the Federal Government?

Mr. LEVER. That is a statute which has been passed by Congress. There is a permanent appropriation of $3,000,000, and the Government is bearing the total expense of inspection.

Mr. GUERNSEY. That is what I thought; the Government, in order to protect the country as a whole, pays the entire expense of the inspection of beef. Now, in order to protect the country as a whole from a disease which it was claimed existed in the Maine potato, they caused a quarantine on all of the potatoes of Maine—locked up the crop—and except for the money provided by the Congress for inspection that crop would have stayed in the State, as no one would have had authority to inspect it for shipment but Federal inspectors, and without money provided by Congress they could not have been sent to Maine to do the work. Now, in view of the fact that Congress has not appropriated enough to move the whole crop, it seems to me the Government should make good and appropriate now an additional amount, so that the growers of potatoes and the shippers shall not be burdened. The potato shipper is entitled to as much favor as the beef packer; both are handlers of food products in interstate shipment. To a very large extent the quarantine is absolutely unnecessary, as it is probable that 99 per cent of the potatoes covered by the quarantine were absolutely free from disease.

Mr. ANDERSON. May I ask the gentleman a question?

The CHAIRMAN. The time of the gentleman has expired.

Mr. ANDERSON. I ask unanimous consent that the gentleman's time be extended five minutes.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that the time of the gentleman from Maine be extended five minutes. Is there objection?

There was no objection.

Mr. ANDERSON. I want to ask the gentleman whether or not it is a fact that the tax of $2 a car which is being imposed on shipments of potatoes from Maine, to pay the expense of this quarantine, was placed on the shipments at the suggestion of the people of Maine themselves?

Mr. GUERNSEY. I do not understand that it was, unless the department informed them that they had not money enough to carry on the inspection, and that without inspection the crop could not leave the State.

Mr. ANDERSON. I just want to read to the gentleman the testimony before the committee:

Mr. HAUGEN. Did I understand you to say the shippers are to be taxed $2 a car for this inspection?

Mr. MARLATT. Yes. They are very willing to pay it; it is their own suggestion. Potatoes must be inspected before they can move.

Mr. HAUGEN. That flows into what treasury?

Mr. MARLATT. Into the treasury of the State of Maine.

Mr. HAUGEN. Then the State of Maine is not doing anything?

Mr. MARLATT. The citizens of the State of Maine?

Mr. HAUGEN. I mean the State itself.

Mr. MARLATT. No; the State is not appropriating anything.

Mr. HAUGEN. My understanding last year was that if we would appropriate this amount of money Maine would take care of itself after the first year. Was that your understanding, Mr. Chairman?

The CHAIRMAN. I do not recall that that was the exact understanding. I do recall having a telegram from the governor to the effect that the State of Maine would bear some portion of this burden. I do not recall just what the telegram was, but I have it in my files.

Now, of course, the fact of the matter is that the Government in the exercise of its authority prohibited the exportation of potatoes from Maine unless they were inspected, and if it desired it could impose upon the people of Maine the entire cost of this inspection. Whatever is contributed by the Government to the inspection is contributed altogether as a gratuity rather than as a matter of right.

Mr. GUERNSEY. In reply to the gentleman I will say that it ought not to be so, as the potatoes of Maine are, as a whole, practically unaffected, and only in two or three very small sections have they discovered any disease whatever, so that 99 per cent of the potatoes burdened by the quarantine were free from disease, but were held up by the action of the Federal Government. For that reason I believe the Government should pay the whole bill.

Mr. MOORE. Will the gentleman yield for a question?

Mr. GUERNSEY. Yes.

Mr. MOORE. Is it not true that this 99 per cent of healthy potatoes are subject to this inspection, and that the farmers who dig them and the shippers who send them to market are practically assessed that $2 a carload in getting them to market, which condition does not obtain anywhere else in the country?

Mr. GUERNSEY. The gentleman is right. The farmer is taxed. Their price is reduced just so much.

Mr. HAUGEN. Is it not also true that this appropriation was made at the suggestion of the Representatives from the State of Maine on the representation that an appropriation would be provided at the next session of the Maine Legislature to cover the expense?

Mr. GUERNSEY. This was the situation: The crop was locked up by the quarantine, and the Senators from Maine and the Representatives did make a request for a Federal appropriation to move the crop, and very likely some one did suggest that perhaps the Legislature of Maine would make an appropriation or contribution; but my contention is that neither the State nor the shippers ought to be obliged to contribute.

Mr. HAUGEN. I am free to say that my understanding was that the appropriation was made last year to meet an emergency, and that the State of Maine was to take care of itself after the first year; but I find this year it comes in here and asks for another appropriation, which we have recommended. Now, is it the wish of the gentleman that the appropriation be stricken out?

Mr. GUERNSEY. No; I think it should be increased.

Mr. HAUGEN. The gentleman thinks the Federal Government should take care of it entirely?

Mr. GUERNSEY. I do.

Mr. BARTLETT. Will the gentleman yield for a question before he sits down?

Mr. GUERNSEY. Yes.

Mr. BARTLETT. I understand that this quarantine prevents the shipment of potatoes out of the State of Maine until they are inspected?

Mr. GUERNSEY. Yes.

Mr. BARTLETT. And that the potato grower has to pay $2 a car for the inspection?

Mr. GUERNSEY. That is paid by the potato shipper and indirectly by the grower.

Mr. BARTLETT. Has not the Legislature of the State of Maine appropriated money to aid that purpose?

Mr. GUERNSEY. It has not up to this time.

Mr. BARTLETT. The tax, then, whatever it is, is borne by the grower, in conjunction with the officers of the Agricultural Department?

Mr. GUERNSEY. That is the situation at the present time.

Mr. LEVER. The gentleman from Minnesota [Mr. ANDERSON] and the gentleman from Iowa [Mr. HAUGEN] have stated the case of the committee as strongly as I could possibly state it without taking up too much time, and I am therefore compelled to make the point of order.

Mr. MOORE. Will the gentleman reserve his point of order for five minutes?

Mr. LEVER. I have already reserved it for 15 minutes. The gentleman understands that he can get time on the next paragraph.

Mr. MOORE. Does the gentleman insist on his point of order?

Mr. LEVER. I do not want to cut the gentleman off, but we have had 15 minutes on this item. If the gentleman insists, I will withhold the point of order.

Mr. MOORE. If the gentleman will withhold it for two minutes it is all I ask.

Mr. LEVER. I will do so.

Mr. MOORE. Mr. Chairman, I think the amendment offered by the gentleman from Maine ought to be considered, although the gentleman from South Carolina has the right to make the point of order, and it may be sustained. The situation in Maine is peculiar. The farmers there are remote from the market. It costs more, possibly, to get Maine potatoes into the market than it does to get them from the Middle West. It costs more to bring them from Maine to a market like New York than it does to bring them from Bermuda and across the water. They are seriously handicapped in other ways. They are directly up against the Canadian border and the tariff which protected them against the Canadian potato was taken off, then there came a great rush of Canadian potatoes which threatened the whole industry of Maine. This of itself would have been sufficient to destroy the market for Maine potatoes, but suddenly the "scab" was discovered and the quarantine was put on. That since has served as a tariff, minus the revenue.

Now, more than 99 per cent of the potatoes of Maine are unaffected by the "wart" or "scab," and the great bulk of the territory is untouched by it. These Maine farmers go about the business of raising potatoes in the usual way, and it seems to be a great injustice that all of them should be made to pay for this inspection when only so few are affected. We do not treat all our farmers that way.

The Clerk read as follows:

Purchase and distribution of valuable seeds: For purchase, propagation, testing, and congressional distribution of valuable seeds, bulbs, trees, shrubs, vines, cuttings, and plants; all necessary office fixtures and supplies, fuel, transportation, paper, twine, gum, postal cards, gas, electric current, rent outside of the District of Columbia, official traveling expenses, and all necessary material and repairs for putting up and distributing the same; for repairs and the employment of local and special agents, clerks, assistants, and other labor required, in the city of Washington and elsewhere, $252,540. And the Secretary of Agriculture is hereby directed to expend the said sum, as nearly as practicable, in the purchase, testing, and distribution of such valuable seeds, bulbs, shrubs, vines, cuttings, and plants, the best he can obtain at public or private sale, and such as shall be suitable for the respective localities to which the same are to be apportioned, and in which same are to be distributed as hereinafter stated, and such seeds so purchased shall include a variety of vegetable and flower seeds suitable for planting and culture in the various sections of the United States: *Provided*, That the Secretary of Agriculture, after due advertisement and on competitive bids, is authorized to award the contract for the supplying of printed packets and envelopes and the packeting, assembling, and mailing of the seeds, bulbs, shrubs, vines, cuttings, and plants, or any part thereof, for a period of not more than five years nor less than one year, if by such action he can best protect the interests of the United States. An equal proportion of five-sixths of all seeds, bulbs, shrubs, vines, cuttings, and plants shall, upon their request, after due notification by the Secretary of Agriculture that the allotment to their respective districts is ready for distribution, be supplied to Senators, Representatives, and Delegates in Congress for distribution among their constituents, or mailed by the department upon the receipt of their addressed franks, in packages of such weight as the Secretary of Agriculture and the Postmaster General may jointly determine: *Provided, however*, That upon each envelope or wrapper containing packages of seed the contents thereof shall be plainly indicated, and the Secretary shall not distribute to any Senator, Representative, or Delegate seeds entirely unfit for the climate and locality he represents, but shall distribute the same so that each Member may have seeds of equal value, as near as may be, and the best adapted to the locality he represents: *Provided also*, That the seeds allotted to Senators and Representatives for distribution in the districts embraced within the twenty-fifth and thirty-fourth parallels of latitude shall be ready for delivery not later than the 10th day of January: *Provided also*, That any portion of the allotments to Senators, Representatives, and Delegates in Congress remaining uncalled for on the 1st day of April shall be distributed by the Secretary of Agriculture, giving preference to those persons whose names and addresses have been furnished by Senators and Representatives in Congress and who have not before during the same season been supplied by the department: *And provided also*, That the Secretary shall report, as provided in this act, the place, quantity, and price of seeds purchased, and the date of purchase; but nothing in this paragraph shall be construed to prevent the Secretary of Agriculture from sending seeds to those who apply for the same. And the amount herein appropriated shall not be diverted or used for any other purpose but for the purchase, testing, propagation, and distribution of valuable seeds, bulbs, mulberry, and other rare and valuable trees, shrubs, vines, cuttings, and plants.

Mr. YOUNG of North Dakota. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 23, line 14, after the word "stated," strike out "and such seeds so purchased shall include a variety of vegetable and flower seeds suitable for planting and culture in the various sections of the United States."

Mr. LEVER. Mr. Chairman, I do not know how much debate there will be on this proposition, but I ask unanimous consent that all debate close in 10 minutes on the paragraph and all amendments thereto.

The CHAIRMAN. Is there objection?

Mr. YOUNG of North Dakota. I object to that, but will withhold the objection for a moment.

Mr. LEVER. There are several that want a little time on this side, and I ask unanimous consent that debate close in 15 minutes.

Mr. YOUNG of North Dakota. It seems to me that this is rather early to have debate limited on a matter of so much importance. There is no telling how many may want to speak on this side.

Mr. LEVER. How much time does the gentleman desire himself?

Mr. YOUNG of North Dakota. Very little, because I had some time the other day.

Mr. LEVER. I ask unanimous consent, Mr. Chairman, that all debate on the paragraph and amendments thereto close in 30 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on the paragraph and amendments thereto close in 30 minutes. Is there objection?

There was no objection.

Mr. YOUNG of North Dakota. Mr. Chairman, as I had 20 minutes during the general debate upon this bill three days ago and there are only 30 minutes agreed upon at this time for the discussion of this amendment, I do not propose to take very much time. It seems to me that the Department of Agriculture might be trusted to spend the money and make the seed distribution according to its best judgment rather than to be tied down by the words contained in the bill that I have moved to strike out, which provide that the distribution is to be largely confined to vegetable and flower seed.

As I mentioned while the matter was under discussion a few days ago, these seeds which are sent out from year to year are not of any superior quality or of new varieties. They are just the kind of seeds any farmer can buy at the nearest village or town for a few cents. We are not furnishing him with anything new. I do not think anybody is being fooled by sending out the seeds from year to year, except possibly some of the Congressmen. The farmers who get them—or the most of them—know what they are worth and how senseless the whole proceeding is, and I think it is about time for us to cut out this farce. There is nothing so belittling to Congress as this annual seed peddling. If a farmer in my district would propose to spend $250,000 so foolishly as is proposed in this paragraph of the bill, he would be suspected of insanity. I strongly favor

permitting the department officials to use their discretion in the selection of seeds. If such discretion is given to them, they will undoubtedly confine the distribution to new and rare varieties of seed for the purpose of introducing new crops to increase the income or preserve the fertility of the soil. The farmers are being told to mix some brains with their farming. It might be well for Congressmen to mix some brains with their agricultural legislation.

Mr. PAGE of North Carolina. Mr. Chairman, it was not my purpose to follow a precedent I have made for several years of making an attempt to eliminate this item. I think I know when I have been defeated, and I have found out, as far as the House of Representatives is concerned in regard to this item, that "Ephraim is joined to his idols," and there is no possible hope as long as this distribution is placed in the hands of Members of Congress of defeating the appropriation on the floor of the House.

I do not desire to provoke the annual speech of the gentleman from Mississippi [Mr. CANDLER], and I very much hope, as much as we delight in it and as much pleasure as it gives the House of Representatives, that in the interest of time and orderly procedure we may escape it, and I am going to say nothing to provoke it.

I want, however, to say that I have not changed my mind or my attitude toward this appropriation as being a waste of the public money. It is no better now than it was in the preceding bill or any bill that has gone before it; but recognizing what I said in the beginning, of the uselessness of making a fight against it here, I shall not pursue it, although I shall vote for the amendment offered by the gentleman from North Dakota.

Mr. HUGHES of Georgia. Mr. Chairman, I am in favor of the distribution of seeds by the Government, and I am in favor of that from personal experience; and I feel that a great deal of good has been accomplished by the distribution of these seeds. It is the province of this great Department of Agriculture to advance the interests of the farmers of this country, and I disagree with my distinguished friend from North Carolina [Mr. PAGE]. I believe that it confers a greater benefit the longer we continue to disseminate these seeds. Mr. Chairman, I live in one of the largest agricultural sections in Georgia or the South, and to show the interest of the people of that section in these seed distributions I have more applications for the seeds than is my pro rata share. I want to give one or two experiences of my own and those of my neighbors. There are two diseases that are most destructive to the cotton plant. One is known as the black root or rot and the other is anthracnose, and wherever these diseases attack the cotton it is as fatal as the boll weevil or any other destructive insect. There is a pea known in Georgia as the cow pea or the red pea, which pea has a great amount of vine, and that pea has been a great favorite in Georgia from the fact that no pea we have ever used seemed to benefit the land more than this. But it was discovered that where this pea was sown and followed by cotton that almost always this terrible root rot was the result.

The farmers therefore felt that they would have to discontinue the use of this great fertilizing pea in order to save their cotton. In the meantime, however, the Government began to disseminate what was known as the iron pea. It has not been yet used to any very large extent, but this was found to be the fact, that the seed has the same fertilizing properties given to the soil as the red pea, and at the same time, where the iron pea is used, it seems to prevent this fearful black rot or root. And the same case with the anthracnose. There is cotton sent out by the Government, sent in small packages, which was a resistant cotton seed to the fearful disease. Now, Mr. Chairman, I wish to say Georgia and the entire South have planted more small grain—rye, oats, and wheat—a great deal more this season than ever before. There is a determination that cotton shall not be the only moneyed crop in that State and in that section. They desire to procure the very best seed, and when those seed are disseminated they take the small packages and they put them upon a plat, and finally get sufficient quantity with which to plant their crop, thereby selecting such seed as are adapted both to soil and climate.

Again, Mr. Chairman, the farmers of the South are determined to enter into the growth and the production, more than ever, of live stock, and in order to do that they must sow to grasses, and the grass seed is in great demand, and I only wish that we had more of those seed which we could send to the farmers with which they could experiment and get the very best grass possible. [Applause.]

Mr. STEVENS of New Hampshire. Mr. Chairman, I shall vote in favor of the amendment to strike out the paragraph. I realize what I may say will have no practical influence with Members, because this is one of the few subjects which come before the House which every Member knows about already. We all get the seeds and we know what the seeds are and we know how they are distributed. Judging from my own experience, I think a large part of the seed are wasted and never get into the ground. Even if every seed was used, I do not think the Government should be in the business of distributing ordinary, everyday kind of commodities, which can be bought in any city store and any country store, any more than it should distribute pins or needles or fertilizer or food. I wish to say that in my State, which is quite an agricultural State, the Farmers' Grange, which is the one big organization which includes all the farmers of the State, adopted unanimously, without any opposition, a resolution at its last State convention condemning and disapproving the free distribution of garden seed by the Government. Let me say, further, that any man who is a real gardener and takes much interest or pains in his garden will not plant any Government garden seed to rely upon, but will get standard seeds, which he knows to be true to name and of real value.

Mr. CANDLER of Mississippi. Will the gentleman yield?

Mr. STEVENS of New Hampshire. Yes, sir.

Mr. CANDLER of Mississippi. Does not the gentleman know that every seed that is sent out by the Department of Agriculture by this congressional seed distribution is tested and required to come up to a certain standard of vitality and must be true to type?

Mr. STEVENS of New Hampshire. Well, I have no doubt the seeds have vitality, but they are the ordinary garden seed, just as you can buy in any country or any city store or in any grocery store through New England; and anyone who wants special brands—unusually good seeds—he buys them from an established recognized seed house, and he does not have those sent out by the Government or by anybody else.

Mr. CANDLER of Mississippi. They are tested by the Government, and if the Government is competent to test them they must come up to standard; every one is tested.

Mr. STEVENS of New Hampshire. I want to say the seeds which were given to me consisted of radish, lettuce, carrots, and beets, not one of which was a rare or unusual kind or was of any particular value over the seeds which we buy in our local stores at 5 and 10 cents a package.

Mr. MOORE. Mr. Chairman, reading the amendment offered by the gentleman from North Dakota [Mr. YOUNG], I find that he proposes to strike out "vegetable and flower seed suitable for planting and culture in various sections of the United States." That being clearly a discrimination against the urban-ite, of course I would have to oppose the amendment. Why vegetable and garden seed should be stricken out I can not understand.

If the purpose of the amendment is to please the farmer and cut out those who cultivate gardens, it is unquestionably a discrimination, and a very unfair one.

These vegetable and garden seeds, it may be contended, have no place in a great city. But that idea is erroneous. I represent a district that does not have a full acre of unimproved ground in it, and yet there are many people there who look regularly for those seeds. To take away the vegetable and garden seed from the city people, and leave all other seed to be distributed elsewhere, would mean that a very large proportion of our population would be deprived of one of the real pleasures they now have in life As to many of my own constituents, the distribution of the seed means a little sunshine within the brick walls; it means a little blossom, a little perfume to homes that are far removed from the free, pure air of the country, and where that wholesome atmosphere is sorely needed. It may be thought by some who come from the country districts that we have no use for those seeds, but let me say that the man or the woman or the child who lives in my district and who watches the growth of the plant——

Mr. CLINE. Mr. Chairman, will the gentleman yield there?

The CHAIRMAN. Does the gentleman from Pennsylvania yield to the gentleman from Indiana?

Mr. MOORE. I do.

Mr. CLINE. I want to inquire of the gentleman from Pennsylvania what the real purpose is in contributing garden seeds?

Mr. MOORE. Apparently it is to bring the blessings of sunshine and the aroma of flowers to all the people, including the farmers and the dwellers in the cities. [Applause.] It may be educational. I think it is. There are gentlemen on that side who can explain that feature of it better than I can. I am simply saying that if seed are to be distributed, they ought not to be distributed in only one section or to one class of our people; and in respect to garden or vegetable seed, I was trying to inform the House that every package of them which goes into a great congested district like mine does actually bring a little

ray of sunshine, a little bit of cheer, into a home or into a school where it did not exist before. [Applause.]

Mr. CLINE. I was asking the question of the gentleman for the purpose of securing information. I did not understand whether it was for the purpose of bringing sunshine into the homes or——

Mr. MOORE. I think a Government that fails to bring sunshine into the homes of its people would be a failure. I think this is the time of year and this the time of all times when it would pay to bring a little sunshine into the homes of our people, for some of them are sorely distresed. These seed go into the schools of my district; they go into the houses of the poor in my district; and here they appear in a little box in some tidy window in a mere bucketful of earth. They are stuck outside the windows of our dwellings or on the fire escape or in the balconies of our schools. They are a delight to our housewives and an object lesson to our children in the joy and the pride of cultivating nature. Take away the garden seeds from the city districts and you will remove some of the few remaining beauty spots in the already congested centers. We have recently encouraged the children, and the grown persons, too, to cultivate the vacant lots. The work has interested many of our poorer families, who have little opportunity to go out and get the pure air of the country. They are too closely confined to the restricted and congested areas, from which there seems to be no escape, and the cultivation of these garden spaces helps.

Mr. CLINE. Mr. Chairman, will the gentleman yield further?

Mr. MOORE. I yield to the gentleman from Indiana. I wish we could add more of his areas to our section. We helped to build up the State of Indiana. Philadelphia has contributed some of its best blood to that State, and we are proud of the progeny of the people from Philadelphia who settled there. Some day we hope to connect up with them by means of the gentleman's canal right across from Toledo. [Laughter.]

Mr. CLINE. I wish to remind the gentleman, too, that the Government sends out alfalfa seeds and other seeds of that kind.

Mr. MOORE. Well, having no further time at my disposal, I would refer that proposition to the gentleman from Oklahoma [Mr. MURRAY], who is an expert on the subject. [Laughter.]

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. POWERS. Mr. Chairman, I am in favor of this section of the bill as it has been written by the committee. I see no reason why this Government should not continue to furnish flower and vegetable seeds to the farmers of the country as it has done in the past. They are entitled to them. Take, for instance, the question of pensions. This Government appropriates annually for the pensioners of this country in the neighborhood of $180,000,000. That costs practically every man, woman, and child in this country $2 a year. Upon that basis every man who is the head of a family of five contributes to that expense, of his substance, $10 a year.

I am not complaining of that. Take, for instance, the river and harbor appropriation, which averages annually about $40,000,000. The money so expended peculiarly benefits those who live around the harbors and on the navigable streams of the country. Most of the farmers live away from them. The farmers throughout the land are not the ones peculiarly benefited by such appropriations, yet they help to foot the bill. Again, take the money expended on public buildings throughout the country. Most of this money is expended on the public buildings in the towns and big cities of our land. The farmers of our country help, out of their means, to make up these various appropriations. The farmers of our land are taxed like other people to help defray the running expenses of this great Government all along the line. They are its strength in time of peace, its bulwark in time of war. It is nothing but just, it is nothing but fair, it is nothing but right that the farmers in return should get some little benefit from the Government they so loyally support.

Mr. YOUNG of North Dakota. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Kentucky yield to the gentleman from North Dakota?

Mr. POWERS. I yield.

Mr. YOUNG of North Dakota. Does not the gentleman believe that if we propose to do something of real value for the farmer we ought to send them seed that will have some special value to them, either on account of the fact that they can not buy it at the nearest market town or on account of the fact that it is a new variety, a new kind of seed, that he otherwise would not be able to get? Does not the gentleman believe that the department itself should be given the discretion to send out that kind of seed rather than be forced by law to send out these almost worthless vegetable and flower seeds?

Mr. POWERS. I think the gentleman, usually right as he is, has entirely the wrong idea of this section of the bill. As I understand it, the Department of Agriculture has the power, and it is its duty under this law, not only to furnish good seeds of the best varieties it is capable of buying, either at public or private sale, but it is its further duty to send to the various sections of this country that character of seeds which is adaptable to that particular section. I think the gentleman has the wrong idea and the wrong notion of what the law actually is, and is intended by this bill to be.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. CANDLER of Mississippi. Mr. Chairman, how much time remains?

The CHAIRMAN. Seven minutes.

Mr. STAFFORD. I ask unanimous consent that the gentleman from Mississippi be allowed to use that time.

The CHAIRMAN. If no one desires to speak, the Chair will put the question.

Mr. STAFFORD. I have submitted a request for unanimous consent.

The CHAIRMAN. The gentleman from Mississippi would be entitled to control the time.

Mr. CANDLER of Mississippi. Mr. Chairman, I fully agree with the distinguished gentleman from Ohio [Mr. GORDON] that the amount involved here will make no difference, so far as what he has to say is concerned, because his speech this time will have about as much effect as the speeches usually made upon this floor in opposition to this appropriation, and that is no effect at all. If you will look into the situation, you will find in the gentleman's home city, where he lives, one public building that cost more than the amount of the distribution of these seeds for many years combined. Still he complains about sending a package of seeds to the farmers of this country. He prefers palaces for city people to seeds for farmers. [Applause.] I did not believe it necessary to say anything, but the chairman [Mr. LEVER] insists that I do so, and therefore I will submit a few remarks. I am glad my friend from North Carolina [Mr. PAGE] did not desire to provoke me into saying anything, although I know everything I ever said upon this subject has been very entertaining to him as well as to everybody else on the floor of this House. [Laughter and applause.] If it was not entertaining I would not have so many urgent invitations to address myself to this important subject. During the past few days I have been invited by many Members on the floor of this House to be sure and submit some of my brilliant remarks upon this question. [Applause and laughter.] It always affords me pleasure to accommodate my many good friends—Democrats and Republicans—and it makes me happy to stand up for those things that are for the welfare and the prosperity of the people, and especially of those who make a living by digging it out of the ground. [Applause.] If there are any people on earth whom I desire to help and to sustain and to make happy and prosperous, it is that class of our citizenship who stand behind this great Republic in time of peace and who stand at the front with those who defend it in time of war. They are the people who live close to nature and hear the birds sing and see the flowers grow and produce the wealth of this country and plant these seeds which we send them and produce from the ground sustenance which helps to sustain their lives and the lives of their beautiful, bright-eyed, rosy-cheeked children who grow up in close touch and association with nature in its beauty, to the honor and glory of this great Republic. [Applause.]

I am glad that my friend from North Carolina [Mr. PAGE] finds that all the efforts he has made in the past have been ineffective to prevent this appropriation, and that, therefore, he is willing to cease his opposition to it; and when my friend from North Dakota [Mr. YOUNG], who is now "young," grows older and has remained here as long as the distinguished gentleman from North Carolina [Mr. PAGE] has been here he will find that his efforts are ineffective, and he will cease to waste his time in trying to prevent the people receiving this little remembrance from "Uncle Sam" which we send them year by year. [Applause.] So I beseech you all, my fellow distinguished Members, in the days which are to come to let the people alone in the reception of those things which are good for them and bend your energies to bring greater happiness and prosperity to them, to their homes, to their wives and their children. I commend my distinguished and good friend from Pennsylvania [Mr. MOORE] for the beautiful sentiments which he has uttered today, and I am glad he has announced himself upon this occasion as one of the advocates of this appropriation and one of the

friends of the lovely children and beautiful ladies in his district who write to him for these packages of seeds, which he promptly sends as tokens of his interest in their welfare. He serves his people with great ability and fidelity here in this and all other great matters and merits and receives their and our commendation. [Applause and laughter.] May he, with us, continue the good work, and may prosperity ever enlarge and expand until all the people of this great Republic will be made happy in the reception of these splendid seeds, which will blossom forth into beautiful flowers and wholesome food, to the gratification and delight of the citizens of this glorious country. [Great applause and laughter.]

The CHAIRMAN. The time of the gentleman has expired. The question is on the amendment offered by the gentleman from North Dakota [Mr. YOUNG].

The question being taken, on a division (demanded by Mr. YOUNG of North Dakota) there were—ayes 25, noes 68.

Accordingly the amendment was rejected.

Mr. PAGE of North Carolina. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The gentleman from North Carolina moves to strike out the paragraph.

The question being taken, on a division (demanded by Mr. PAGE of North Carolina and Mr. GORDON) there were—ayes 29, noes 66.

Mr. YOUNG of North Dakota. I demand tellers.

Tellers were refused, not a sufficient number seconding the demand.

Mr. YOUNG of North Dakota. I make the point of no quorum present.

The CHAIRMAN. The gentleman from North Dakota makes the point of no quorum present. The Chair will count. [After counting.] One hundred and twenty-five Members present, a quorum. The Clerk will read.

The Clerk read as follows:

FOREST SERVICE.

Salaries, Forest Service: One forester, who shall be chief of bureau, $5,000; 1 chief of office of accounts and fiscal agent, $2,500; 7 district fiscal agents, at $2,000 each; 1 forest supervisor, $2,700; 1 forest supervisor, $2,600; 8 forest supervisors, at $2,400 each; 20 forest supervisors, at $2,200 each; 48 forest supervisors, at $2,000 each; 66 forest supervisors, at $1,800 each; 5 forest supervisors, at $1,600 each; 1 deputy forest supervisor, $1,800; 4 deputy forest supervisors, at $1,700 each; 28 deputy forest supervisors, at $1,600 each; 31 deputy forest supervisors, at $1,500 each; 18 deputy forest supervisors, at $1,400 each; 10 forest rangers, at $1,500 each; 22 forest rangers, at $1,400 each; 78 forest rangers, at $1,300 each; 287 forest rangers, at $1,200 each; 650 assistant forest rangers, at $1,100 each; 80 forest guards, at $1,100 each, for periods not exceeding six months in the aggregate; 1 clerk, $2,100; 4 clerks, at $2,000 each; 19 clerks, at $1,800 each; 20 clerks, at $1,600 each; 9 clerks, at $1,500 each; 21 clerks, at $1,400 each; 8 clerks, at $1,300 each; 112 clerks, at $1,200 each; 88 clerks, at $1,100 each; 51 clerks, at $1,020 each; 30 clerks, at $960 each; 107 clerks, at $900 each; 2 clerks, at $840 each; 1 compiler, $1,800; 1 draftsman, $2,000; 3 draftsmen, at $1,600 each; 2 draftsmen, at $1,500 each; 6 draftsmen, at $1,400 each; 4 draftsmen, at $1,300 each; 9 draftsmen, at $1,200 each; 2 draftsmen, at $1,100 each; 3 draftsmen, at $1,020 each; one draftsman, $960; 4 draftsmen, at $900 each; 1 artist, $1,400; 1 artist, $1,000; 3 map colorists, at $900 each; 1 map colorist, $720; 1 photographer, $1,600; 1 photographer, $1,400; 1 photographer, $1,200; 1 photographer, $1,100; 1 lithographer, $1,200; 1 lithographer's helper, $780; 1 machinist, $1,260; 1 carpenter, $1,200; 2 carpenters, at $1,000 each; 1 carpenter, $960; 1 electrician, $1,020; 4 laboratory aids and engineers, at $900 each; 1 laboratory aid and engineer, $800; 1 laboratory helper, $720; 1 laboratory helper, $600; 1 packer, $1,000; 1 packer, $780; 4 watchmen, at $840 each; 1 messenger or laborer, $960; 3 messengers or laborers, at $900 each; 4 messengers or laborers, at $840 each; 3 messengers or laborers, at $780 each; 4 messengers or laborers, at $720 each; 6 messengers or laborers, at $660 each; 5 messengers, messenger boys, or laborers, at $600 each; 2 messengers, messenger boys, or laborers, at $540 each; 3 messengers, or messenger boys, at $480 each; 3 messengers, or messenger boys, at $420 each; 12 messengers, or messenger boys, at $360 each; 1 charwoman, $540; 1 charwoman, $480; 1 charwoman, $300; 11 charwomen, at $240 each; in all, $2,335,580.

Mr. FOWLER. Mr. Chairman, I desire to reserve the point of order against the paragraph.

Mr. STAFFORD. Mr. Chairman, I notice that there have been some changes in the phraseology in the item under consideration from that of last year, particularly as to the designation of assistant forest rangers to forest guards. I believe the explanation of the department is that it is the desire to take these officials out from the civil service.

Mr. LEVER. The explanation is this: The designation "forest guards" is substituted for the designation "assistant forest rangers" hitherto used to designate the 80 six-months places provided in the present appropriation. The change is made to accommodate these positions to the rules of the Civil Service Commission, the designation "forest ranger" being reserved for employees in the permanent force on the national forests, whereas the employment of men for periods not exceeding six months is temporary in character, and such men are not necessarily drawn from the civil-service register. The only effect of this change is to avoid the difficulties experienced this year in filling these positions on short notice during the fire season.

Mr. STAFFORD. I wish to inquire whether under the old practice, in describing these men as assistant forest rangers, they were not obliged to take a civil-service examination.

Mr. LEVER. Yes; under the old designation that is true.

Mr. STAFFORD. And the effect of the change is to remove from the civil service appointees who were formerly on the classified list.

Mr. LEVER. The statement is:

The employment of the men for the purpose is not exceeding six months, and is temporary in character and not necessarily drawn from the civil service.

So my former statement is incorrect.

Mr. STAFFORD. Is the gentleman positive about that?

Mr. LEVER. I am quoting from the hearings.

Mr. STAFFORD. The language is ambiguous. I know it has been stated that they should be lifted from the civil service, and the argument is that they are only to be employed six months at a time, whereas the forest rangers proper are to be employed during the year. The language does not convince me that these assistant forest rangers are not obliged to take the civil-service examination.

Mr. LEVER. As I gather, the civil service has reserved for itself the title "forest rangers." Now, "assistant forest rangers" would be an encroachment on the other title, and the purpose of this redesignation is to get rid of the difficulty. That is the explanation given to us.

Mr. STAFFORD. The gentleman realizes that if a person is employed only six months in each year it would not necessarily follow that they should be removed from the civil service.

Mr. LEVER. My idea is, from the recollection of the situation and reading the language, that the Forest Service has been under no necessity of taking these temporary men from the civil-service list.

Mr. MANN. May I ask the gentleman a question?

Mr. LEVER. Certainly.

Mr. MANN. Are not these what they call temporary appointments?

Mr. LEVER. Yes.

Mr. MANN. Under existing law the temporary appointments are made with the consent of the Civil Service Commission and not necessarily from the eligible list.

Mr. LEVER. That is the language and the explanation—not necessarily drawn from the eligible list.

Mr. STAFFORD. The Postal Service sometimes has a large number of temporary employees, and they are drawn from the eligibles on the civil-service list. These forest guards are temporary in one sense, and in another sense they are permanent. They are temporary only for a portion of the year, but permanent because they are appointed for each succeeding year.

Mr. LEVER. I think the gentleman is mistaken about that.

Mr. STAFFORD. According to the report of the department, they are employed six months each year.

Mr. LEVER. That might be true, but there are different seasons of the year, and they may be different individuals.

Mr. STAFFORD. They are employed for six months each succeeding year in the same forest reserve.

Mr. LEVER. But not necessarily the same individuals.

Mr. STAFFORD. That might be, if you had them on the permanent roll.

Mr. LEVER. If you had them on the permanent roll, that would be true.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. JOHNSON of Washington. Does this mean 80 forest guards at $1,100 each for six months?

Mr. LEVER. No; it means at the rate of $1,100.

Mr. JOHNSON of Washington. Would not there be confusion between the legitimate forest guards in the Indian Service and the regular forest rangers?

Mr. LEVER. I would not think so.

[Mr. JOHNSON of Washington addressed the committee. See Appendix.]

Mr. FOWLER. Mr. Chairman, there is a point of order pending against the paragraph. I desire to inquire of the chairman in reference to the provision, "One chief of office of accounts and fiscal agent, $2,500."

Mr. LEVER. What line and page?

Mr. FOWLER. Page 25, lines 14 and 15. I desire to know how that got into the bill.

Mr. LEVER. It has been in the bill ever since I have been handling it.

Mr. FOWLER. I beg the gentleman's pardon; he is mistaken.

Mr. LEVER. The gentleman from South Carolina knows better than the gentleman from Illinois; it was in last year's bill.

Mr. FOWLER. That is true.

Mr. LEVER. Last year was the first year I handled the bill, so that my statement is correct after all, is it not?

Mr. FOWLER. The gentleman has handled it twice, has he not?

Mr. LEVER. No.

Mr. FOWLER. Has not the gentleman been chairman of the committee during the preparation of two bills?

Mr. LEVER. Oh, no; this is my first term as chairman.

Mr. FOWLER. This is the gentleman's second bill?

Mr. LEVER. This is my second bill, and that is the reason why I am modest and shaky.

Mr. FOWLER. The gentleman is exceedingly modest because he is so strong.

Mr. LEVER. No; this has been in the bill ever since I have handled it.

Mr. FOWLER. I thought the gentleman meant since he had been on the committee. But in the bill for the fiscal year ended June 30, 1914, it does not carry this provision at all, and in that bill it is provided that all salaries fixed in this bill should be the fixed sum.

Mr. LEVER. That may be, and yet it would not make this subject to a point of order.

Mr. FOWLER. I am asking the gentleman how it got in the bill.

Mr. LEVER. It came in the bill probably by a transfer from the lump-sum fund, but I can not recall it two years back; the gentleman ought to know that, with a bill of over 1,000 items in it.

Mr. FOWLER. The gentleman is so resourceful he would lead everyone to believe that he knows everything connected with the bill.

Mr. LEVER. Well, I really can not tell the gentleman how it got into the bill. I can get some information for him, if he will give the Clerk a little time to run back over the hearings and find out. There is no change from last year's appropriation, and hence I have no information prepared.

Mr. FOWLER. Mr. Chairman, I apprehend that the way this position and the salary attached thereto came into this bill and the former bill was through a lump-sum proposition wherein the head of a division is given the authority to employ men as far as necessary in his bureau. In consequence thereof he gave to some of his friends or some of the employees a very low salary and others he employed at a very extravagant salary, and then he came in with the extravagant salaries and asks the Committee on Agriculture, or any of the rest of the appropriating committees as far as that is concerned, that they be incorporated in the appropriation bill as fixed positions and fixed salaries in the bill.

Now, Mr. Chairman, that would amount to a comedy if it were not for the fact that its effect upon the Treasury is a tragedy. Really I can not say whether this position is needed or not. One thing I do know is that so far as my investigations have been made that it is injected in here for the second time. Now, the rule of parliamentary procedure is that unless an office is fixed by organic law a point of order when interposed will be sustained against it. There is no law fixing this office in the organic statute. It will not do, Mr. Chairman, to say that this position came from the lump sum, and for that reason it found its way into this bill as a permanent office with a fixed salary.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FOWLER. I make the point of order against it.

Mr. LEVER. Mr. Chairman, does the Chair desire to hear from me on the point of order? The point of order is so badly taken I do not desire to take up the time of the committee to argue it.

The CHAIRMAN. The Chair would like to hear from the gentleman whether there is any existing law authorizing this.

Mr. HAWLEY. Can not the committee understand what the point of order is—what line and page?

The CHAIRMAN. The present occupant of the chair was not in the chair at the time the point of order was made.

Mr. LEVER. It is page 25, line 14, "one chief of office of accounts and fiscal agent, $2,500." I want to call the attention of the Chair to section 169, which I have quoted here so many times:

Each head of a department is authorized to employ in his department such number of clerks of the several classes recognized by law and such messengers, assistant messengers, copyists, watchmen, laborers, and other employees and at such rates of compensation, respectively, as may be appropriated for by Congress from year to year.

I find also, I will say to the Chair, in answer to the gentleman from Illinois, that this officer was transferred from the Division of Accounts last year. As I now recall, my recollection having been refreshed, he was transferred from the Division of Accounts and Disbursements to the Forest Service, which the gentleman will see in the hearings. But notwithstanding that, it is not subject to a point of order.

Mr. FOWLER. Mr. Chairman, if it be true that a power was conferred upon the Department of Agriculture to make a rearrangement of the different bureaus so that they might conform to the best interests of the Agricultural Department, then I grant that under the organic statute the Secretary of Agriculture might make such transfers as he deems proper not in violation of the statute. But the organic law creating the Department of Agriculture, which the chairman of the Committee on Agriculture has just read, does not serve his purpose, because it gives the heads of the department the right only to employ at such wages as they may deem proper sufficient force to carry out the duties of the various bureaus.

Now, they can do that this year under the organic law, and they can do it next year under the organic law, but that does not justify the Committee on Agriculture in placing it in this bill as a fixed office at a fixed salary. To say that the organic law creating the Department of Agriculture and conferring upon the chiefs of the various bureaus the right to employ a force to discharge the duties of the various bureaus justifies the creation of an office by Congress which has not heretofore been in existence is contrary to the legislative practice of Congress, and it can not be sustained, because the rule is that if a position has not been created by organic law, then it has no place in the bill and is subject to a point of order.

Now, if the gentleman is correct, Mr. Chairman, that this position had previously been authorized and inserted in another bureau and was transferred to the Bureau of Forestry for convenience, then, Mr. Chairman, I concede that that might have been done. As I recollect, Mr. Chairman, that position did not have its existence in the bill when the Committee on Agriculture secured the passage of a little paragraph of two and a half lines covering in all of the great irregularities of the past back from time immemorial or from the time the Department of Agriculture was established. I say if it did not have an existence at the time this little clause was passed 18 months ago for the purpose of covering in everything, as a hen hovereth over her brood in time of storm, then, Mr. Chairman, it ought not to have any place in this bill.

Mr. LEVER. Mr. Chairman, in the current law, upon the recommendation of the committee, acting under the provisions of the Dockery Act, which requires that the accounting in each bureau shall be done in that bureau, and in the interpretation of that act by the Department of Agriculture and by a later statute, also, the central division of accounts and disbursements was almost dismantled. I read from my report accompanying the current law last year:

There is a decrease in the above appropriation—

Referring to the Division of Accounts and Disbursements—

of $43,050, as indicated by the following table.

Then, I give the places transferred and the offices from which they were transferred, and in that list I find places transferred to other bureaus, among them the Forest Service—one chief, Office of Accounts, and fiscal agent, $2,500—so that this is nothing more nor less than a transfer under the present law.

The CHAIRMAN (Mr. ADAIR). Let me ask the gentleman from South Carolina, Was this same item carried in the bill last year?

Mr. LEVER. It was—and in the year before that it was in another place in the Department of Agriculture—in the Division of Accounts and Disbursements.

The CHAIRMAN (Mr. ADAIR). The Chair is ready to rule. The Chair is of opinion that under section 169 that has been read and under the privilege given the department to employ such messengers, assistant messengers, copyists, laborers, and so forth, as are necessary the point of order is not well taken, and is therefore overruled. The Clerk will read.

The Clerk read as follows:

General expenses, Forest Service: To enable the Secretary of Agriculture to experiment and to make and continue investigations and report on forestry, national forests, forest fires, and lumbering, but no part of this appropriation shall be used for any experiment or test made outside the jurisdiction of the United States; to advise the owners of woodlands as to the proper care of the same; to investigate and test American timber and timber trees and their uses, and methods for the preservative treatment of timber; to seek, through investigations and the planting of native and foreign species, suitable trees for

the treeless regions; to erect necessary buildings: *Provided*, That the cost of any building erected shall not exceed $650; to pay all expenses necessary to protect, administer, and improve the national forests; to ascertain the natural conditions upon and utilize the national forests; and the Secretary of Agriculture may, in his discretion, permit timber and other forest products cut or removed from the national forests to be exported from the State, Territory, or the District of Alaska in which said forests are respectively situated; to transport and care for fish and game supplied to stock the national forests or the waters therein; to employ agents, clerks, assistants, and other labor required in practical forestry and in the administration of national forests in the city of Washington and elsewhere; to collate, digest, report, and illustrate the results of experiments and investigations made by the Forest Service; to purchase necessary supplies, apparatus, and office fixtures, and technical books and technical journals for officers of the Forest Service stationed outside of Washington, and for medical supplies and services, and other assistance necessary for immediate relief of artisans, laborers, and other employees engaged in any hazardous work under the Forest Service; to pay freight, express, telephone, and telegraph charges; for electric light and power, fuel, gas, ice, washing towels, and official traveling and other necessary expenses, including traveling expenses for legal and fiscal officers while performing Forest Service work; and for rent outside of the District of Columbia, as follows.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] reserves a point of order on the paragraph.

Mr. STAFFORD. Mr. Chairman, I notice that the committee has engrafted a new idea on this paragraph in extending the aid given to the forest force, not only in giving them supplies for medical treatment, but also giving them professional services. Here we have an item that has no limitation whatsoever on the amount that may be expended. The forest superintendents might go to the extreme of spending unlimited amounts of money for the care and treatment of employees injured in the Forest Service.

I am in sympathy, I may say to the gentleman, with the idea of providing medical services, so that in case of injury the amount of compensation that might be recovered will be reduced by immediate medical attention. But I will put this query to the gentleman: Whether or not he does not think there should be some limitation on the amount that might be expended in any one case by these subordinates in the field? Otherwise some subordinate official in a forest reserve might run up a very large bill for medical services, and it would be paid without the cognizance of any bureau chief, and certainly without that of the committee having this matter under their direct scrutiny.

Mr. LEVER. That matter was put in the bill, I will say to the gentleman from Wisconsin, at the urgent request of the Chief Forester, Mr. Graves. The cross-examination of Mr. Graves was made by Mr. HAWLEY. I read:

Mr. GRAVES. On page 79 there are a few changes in language. You will notice in the middle of the general introductory clause there are a few words added, "and for medical supplies and assistance." The words "for" and "assistance" are added.

Mr. HAWLEY. Should not that be "attendance"?

Mr. GRAVES. Last year we got the authority to purchase medical supplies, but we have not had authority to employ medical aid in case of injury to our men in fighting fires, and when we have——

Mr. HAWLEY (interposing). It says "assistance necessary for immediate relief of artisans." Should not that word "assistance" be "attendance"? Do you not mean medical attendance?

Mr. GRAVES. The word "assistance" was designed to cover both the attendance and such expenses as, perhaps, for taking a man out. At the present time, if a man breaks his leg and is taken out from the forest to the nearest headquarters or town, it is impossible for the Government to pay the expense of transporting him.

Mr. HAWLEY. Yes.

Mr. GRAVES. And a number of instances have occurred where the forest officer or the ranger has had to pay $25 or $30 to transport men who have been injured, and a number of times they have had to pass the hat around for that kind of assistance.

Now, we have the authority here not only for providing him with medical supplies but the authority to pay some man who would take him out on a litter and take him to some place where he could be restored to health.

Mr. STAFFORD. No. The result of this amendment will be to pay for professional services so long as the injury continues. That is the way I read the report of the Chief Forester.

Mr. LEVER. That is not the way I read the statement of Mr. Graves. I have only the statement of Mr. Graves, which I have read to the gentleman.

Mr. STAFFORD. The gentleman is reading from the hearings?

Mr. LEVER. Yes.

Mr. STAFFORD. I direct the attention of the gentleman to the language found in the note to the draft copy of the supply bill, where it is much more specific as to the purpose intended by this amendment.

Mr. LEVER. Please read the language.

Mr. STAFFORD. It says:

Under this legislation the Forest Service appropriation becomes liable for the payment of salaries or wages of employees of the service injured while engaged in hazardous employment, during the period of disability, but not exceeding one year from the date of disability. From the frequently hazardous nature of their duties, the employees of the service are peculiarly liable to injuries, and it is in the interest not only of the humane treatment of employees injured in the course of their employment but also in the economy of expenditure in the public funds that such injuries be given adequate medical treatment immediately, thereby reducing the period of disability for which the Government becomes liable under the compensation act.

I said I was in sympathy with the purpose to be attained by this provision, but I put this query to the gentleman: Whether, with the unlimited thousands of dollars at the disposal of these subordinate officials in the field, there should not be in each instance some limitation placed as to the amount that may be expended for medical services in the treatment of an injured employee?

Mr. LEVER. Probably the gentleman is right; but how could we anticipate 12 months in advance just how much would be necessary? Suppose there should be a tremendous outbreak of forest fires, such as we had in 1910, when a great many men were injured and some killed, I believe. How could we anticipate that?

Mr. STAFFORD. You could readily anticipate it by saying that in no one instance should there be expended more than $200 or $300 in the medical treatment of any person injured by reason of accident incurred in the service.

Mr. LEVER. You would limit it as to the individual?

Mr. STAFFORD. Of course; so that these subordinate officials in the field, who have not any too great regard for Uncle Sam's Treasury in the matter of putting their hands into his pocket, would be limited in the expenditure which they could make.

Mr. LEVER. The gentleman is one of the leaders on that side of the House, and ought not to indulge in any such language.

Mr. STAFFORD. I respectfully disavow holding any such place.

Mr. LEVER. I do not believe the gentleman thinks that these men would put their hands in the Treasury to spend money unnecessarily.

Mr. STAFFORD. I do believe that they are not as careful in the expenditure of public money as they would be in the expenditure of their own funds.

Mr. LEVER. I do not know but what that is true of all Government officials, including Members of Congress.

Mr. STAFFORD. And that is why I believe there ought to be some limitation placed here.

Mr. MANN. Will the gentleman yield to answer a question?

Mr. STAFFORD. I shall be very glad to.

Mr. MANN. This item, as I understand it, is only for immediate relief.

Mr. LEVER. For immediate relief, of course.

Mr. MANN. The language does not contemplate that the Government shall pay for the medical attention to somebody who is injured, except for the immediate relief.

Mr. LEVER. As I gather it from Mr. Graves's testimony and from his statement to me, it refers to a case of this kind: A man is hurt in the forest—in a forest fire, or otherwise. He is 10 miles away from headquarters. There is somebody in the neighborhood who has a horse and wagon; they pick him up and put him into the wagon and carry him to headquarters, and give him medical attention; but there is no authority in law to pay the man for his service in carrying the injured man to headquarters. That is all there seems to be to it.

Mr. MANN. As a matter of practice now, where we furnish medical supplies for immediate relief is that intended to cover hospital supplies for six months?

Mr. LEVER. Not at all.

Mr. MANN. I think the suggestion of the gentleman from Wisconsin is a good one, if it will work out.

Mr. STAFFORD. I direct attention to the fact that the language recommended by the committee is not the language recommended by the department. This language is capable of a different construction to what the gentleman suggests. The language recommended by the department is as follows:

And for medical supplies and assistance necessary for immediate relief of artisans, laborers—

And so forth. You will notice that the language recommended by the committee is:

And for medical supplies and services, and other assistance necessary for immediate relief of artisans, laborers—

And so forth. Under the phraseology as recommended by the committee the department would have the right to pay for the entire expenses of medical treatment of any injured employee until he recovered.

Mr. LEVER. It says—

For immediate relief.

Mr. STAFFORD. Oh, no.

Mr. LEVER. Well, but I can read. It says—

Necessary for immediate relief.

Mr. MANN. The comma ought to be stricken out.

Mr. STAFFORD. The comma is most potential in the authority which will be given to these officials.

Mr. LEVER. The gentleman means the comma after the word "services"?

Mr. STAFFORD. After the word "services."

Mr. LEVER. If that will cure the situation, we have no objection.

Mr. STAFFORD. I am not sure that would cure it.

Mr. MANN. If we should fix a limitation of $200 in each case, would not that be considered by the department as authority to expend that sum of money in each case?

Mr. LEVER. That would be my fear.

Mr. STAFFORD. The gentleman ought to know that in every case where there happened to be a little injury they would not spend that much.

Mr. MANN. I am not speaking of a case where there is a little injury.

Mr. STAFFORD. If there was a little injury, then they would be subject to severe criticism if that amount was expended for that purpose.

Mr. LEVER. Here is a man who has his leg cut off. Would they put him in a hospital and keep him until he got well?

Mr. MANN. Or a man is badly burned in a forest fire.

Mr. LEVER. If gentlemen desire the comma to be stricken out, I will offer the amendment.

Mr. STAFFORD. I would like to inquire why the committee did not adopt the language recommended by the department?

Mr. LEVER. My recollection is that the testimony before the committee upon a close examination of a witness by the gentleman from Oregon [Mr. HAWLEY] brought out the suggested change. That is my recollection of it.

Mr. STAFFORD. Why do you want the words "other assistants" here? Does not the phraseology meet all conditions to say "medical supplies and services"?

Mr. MANN. You want to cover the case of medical supplies. There might be some doctor there who ought to be employed to protect the man who has been badly burned.

Mr. STAFFORD. That would come under "medical supplies."

Mr. MANN. The language in the bill is a little more explicit.

Mr. LEVER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 28, line 20, strike out the comma after the word "services."

The amendment was agreed to.

Mr. LEVER. Before we go on, Mr. Chairman, I want to say that that comma was a typographical error.

Mr. HAUGEN. Mr. Chairman, on page 28 it has been suggested that the words "or the District" should be stricken out It reads:

And the Secretary of Agriculture may in his discretion permit timber and other forest products cut or removed from the national forest to be exported from the State, Territory, or the District of Alaska.

Alaska is a Territory and not a District, and the courts have so held.

Mr. LEVER. Will the gentleman offer an amendment?

The CHAIRMAN. The Chair will state that a point of order is pending.

Mr. STAFFORD. Mr. Chairman, I have not withdrawn the point of order. I reserved it, but I shall not make it.

Mr. HAUGEN. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

On page 28, line 8, after the word "State," insert the word "or," and, in line 9, page 28, after the word "Territory," strike out the words "or the District of Alaska."

The amendment was agreed to.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word, for the purpose of asking a question of the chairman of the Committee on Agriculture. I would like to ask in regard to the proposed medical attendance for the relief of artisans, laborers, and other employees. Does that mean peculiarly and distinctively the employees of the Forestry Service?

Mr. LEVER. In the field service.

Mr. JOHNSON of Washington. In case of a fire in a forest reserve, when all the citizens within reach are called upon, as they are under the law, to help fight the fire, they do not receive pay, and if they are burned or hurt, will they receive medical attendance under the wording of this bill?

Mr. LEVER. No; they do not.

Mr. JOHNSON of Washington. So the forest rangers are to have one more advantage over the people.

Mr. HAWLEY. Will the gentleman yield?

Mr. JOHNSON of Washington. Yes.

Mr. HAWLEY. The testimony before the committee showed that persons temporarily employed to fight the fire would be given the assistance in case they were injured.

Mr. JOHNSON of Washington. The chairman of the committee says no.

Mr. LEVER. Then I did not catch the gentleman's question.

Mr. HAWLEY. If a large fire should break out in some forest, and in order to fight it an additional force of 20 men were employed to fight it, if any of them were injured during the work they would likewise be afforded the assistance provided here.

Mr. LEVER. I think they would then be employees and be entitled to compensation.

Mr. JOHNSON of Washington. But suppose 200 citizens are called upon and some of them are injured, and some even become temporarily insane; is there no medical attendance for them?

Mr. LEVER. We are taking care of people in the governmental employ, and we are not taking care of you or me.

Mr. JOHNSON of Washington. The law requires any person called upon to fight fire in the forest to comply regardless of pay.

Mr. LEVER. I did not know there was any such law.

Mr. JOHNSON of Washington. They have to fight the fire with the rangers.

Mr. LEVER. Under what law are they compelled to fight the fire, National or State?

Mr. JOHNSON of Washington. I am not sure. Perhaps it is a State law. I think the rangers have the right to call upon a man to drop his work, wherever it is, and assist in fighting the fire.

Mr. LEVER. That must be a State law, for I know of no Federal law.

Mr. HAWLEY. I think if there is any such law it must be a State law and not a Federal law.

Mr. JOHNSON of Washington. How do the forest rangers get the authority to call upon men?

Mr. HAWLEY. They have authority from the central office to have additional assistance when a fire breaks out, but I do not think they can compel anybody to do it.

Mr. JOHNSON of Washington. The fire is fought in connection with the employees of great corporations, by the Weyerhaeusers, for instance, and they employ for the occasion all they can pick up.

Mr. ANDERSON. The gentleman would not want the Government to pay for injuries to the employees of the large timber corporations, would he?

Mr. JOHNSON of Washington. No, indeed; and there is the great hole in the whole Forestry Service right now.

Mr. LEVER. The gentleman's suggestion would do that very thing.

Mr. JOHNSON of Washington. It would not. The poor people who are trying to make homes in these far-off forest reserves, when they are taken from their homes and put on horses and made to ride 20 or 30 miles to assist the Government in fighting a fire and come back home with their clothes torn off and frequently out of their heads for a week, are not treated as well as these forest rangers who hibernate in the winter in $3,000 houses at the expense of the Government. And if you would take the time and look into it and find where the five and a half million dollars——

Mr. LEVER. But the gentleman would have some poor devil employed by the Federal Government who has been severely burned 15 miles away from home suffer agonies for lack of attention, medically and otherwise, because the gentleman is against the forest policy of the United States.

Mr. JOHNSON of Washington. No; the proposition that is now up to which I call attention is a proposition to pay these forest rangers and employees——

The CHAIRMAN. The time of the gentleman has expired.

Mr. JOHNSON of Washington. I ask for five more minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington? [After a pause.] The Chair hears none.

Mr. LEVER. If the gentleman will permit, he wants to go further, because the suggestion, as I understand, is that he is willing to give to some farmer in the community who has been hurt in a forest fire——

Mr. JOHNSON of Washington. Some poor unfortunate who has undertaken to make a living on the hard terms imposed by a beneficent Government.

Mr. LEVER. Now, the gentleman wants to take care of some "farmer," but some poor devil employed by the Weyerhauser Corporation, who happens to be hurt, and he would make a distinction as to him, and he would not give any attention at all——

Mr. JOHNSON of Washington. The distinguished chairman of the committee is doing me an injustice.

Mr. LEVER. The corporation has not suffered from the fire, it is the poor devil who has fought the fire who happens to be an employee of that corporation.

Mr. JOHNSON of Washington. I think the chairman of the committee is doing me an injustice which I am sure he does not wish to do. I charge that the corporations have run over many of the forest reserves, that they assist in the management, and that they have cost the United States Government millions which should not have been expended. These poor men for whom I am speaking try to help the United States Government to fight fire. They are the men who have gone there to try to make homes; they want the locality to prosper, whereas these other men, these rangers and agents, who like to live in the open, have taken employment in the forest reserves, apparently for the purpose of harassing the settlers, and seem to enjoy making it hard for them to live. Only last fall on one of these reserves I met a man who was insane who had been taken by one of these rangers without one cent's pay and driven out into the front line of the fire and made to fight the fire. In that community are 10 to 15 forest employees living in a $3,000 headquarters building, whereas the law provides only for a $650 building.

Mr. HAWLEY. Will the gentleman yield for a question?

Mr. JOHNSON of Washington. With pleasure.

Mr. HAWLEY. Do I understand the gentleman correctly to say that the forest ranger has authority to go to any citizen of the United States and say to him that he must go and fight fire?

Mr. JOHNSON of Washington. I think he has authority to commandeer a citizen in the vicinity of the fire.

Mr. HAWLEY. I wish the gentleman would look it up and find out.

Mr. JOHNSON of Washington. At any rate he does it. He assumes authority, anyhow. I assure you the power of a forest ranger is quite beyond the belief of half the men on this floor.

The Clerk read as follows:

Alamo National Forest, N. Mex., $3,578.

Mr. BOOHER. Mr. Chairman, I want to make a parliamentary inquiry. If a Member wishes to inquire about the receipts and disbursements of these forest reserves, whether it should be done at the beginning of the reading of this paragraph, or after all the items have been read?

The CHAIRMAN. The Chair thinks the gentleman can exercise his own judgment. At the end of any paragraph the gentleman has the right to take the floor for five minutes.

Mr. LEVER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LEVER. There are about 155 of these forest items. I think the Chair heretofore has ruled that each of these is a separate paragraph.

The CHAIRMAN. That is undoubtedly so.

Mr. LEVER. It seems to me that a Member could tie up the House in a short session of Congress on these forest items if that ruling is to be maintained. It seems to me that it is practically in the same category as the statutory roll, and that all of these several units ought to be considered as one paragraph.

Mr. JOHNSON of Washington. Mr. Chairman, on the contrary, all these paragraphs have been greatly changed. There is a reduction in every single one of them, and some paragraphs providing funds for new forests, and that reduction leads to the proposition later on in the bill to banish the so-called 15 per cent distribution of funds.

The CHAIRMAN. The Chair thinks each of these items is a separate paragraph, and will be so construed.

Mr. LEVER. All right.

Mr. BOOHER. Mr. Chairman, I move to strike out the last word. I want to say to the chairman of the Committee on Agriculture I do not propose to discuss each one of these items, or any one except the one just read. I notice in the report of the Chief Forester in the hearings before the committee that the Forest Service last year contains a greater deficit than the year before. Is that correct?

Mr. LEVER. I will answer the gentleman I am not sure the gentleman is correct about that, but I will have it in a minute.

Mr. BOOHER. The reason I ask that question is I have been unable from the reading of the report and of the hearings to determine that question.

Mr. JOHNSON of Washington. Mr. Chairman, will the gentleman yield?

Mr. BOOHER. Yes.

Mr. JOHNSON of Washington. When the gentleman says "deficit" does he mean actual deficit from the receipts of the Forest Service?

Mr. BOOHER. I mean how much more, if anything, it cost the Government to run the Forest Service than the receipts.

Mr. LEVER. The total expenditures of the national forests are as follows:

The national forests.

SUMMARY.

[Area, 187,505,627.]

Total expenditures	$4,163,493.81
Outstanding liabilities Aug. 31	26,294.21
Total allotment	4,189,788.02
Distributed among the several subactivities approximately as follows:	
Ordinary current expenses	3,237,017.59
Land classification	38,670.45
Survey of land	20,799.93
Cooperative fire	3,717.16
Fire and other emergency	146,168.05
Planting on national forests	147,148.93
Forest management	2,209.65
Forest products	109.44
National range investigations	144.49
Improvements	343,687.57
Roads and trails for States	250,114.76
Total	4,189,788.02

RECEIPTS FROM NATIONAL FOREST RESOURCES.

Timber sale	$1,243,195.37
Timber trespass	12,981.19
Timber settlement	39,927.11
Grazing	997,582.47
Grazing trespass	4,765.12
Fire trespass	7,949.89
Occupancy trespass	157.64
Special use	68,615.52
Water power	62,535.90
Total	2,437,710.21

Totaling $2,437,710.21, this makes a difference which the Government must bear of $1,750,000 in round numbers, but this does not include scientific, technical, and other lines of work carried on by the service. My recollection is that the receipts this year have slightly increased over those of last year.

Mr. JOHNSON of Washington. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Missouri yield to the gentleman from Washington?

Mr. BOOHER. Yes.

Mr. JOHNSON of Washington. What was the difference that the Government would bear?

Mr. LEVER. One million seven hundred and fifty thousand dollars in round numbers for the individual forests.

Mr. JOHNSON of Washington. There must be something wrong in that, because we are appropriating $5,500,000.

Mr. LEVER. The gentleman must understand that these receipts are covered into the Treasury as miscellaneous receipts and become available for other purposes.

Mr. JOHNSON of Washington. Let us take this particular reserve—the Alamo. I read:

Alamo National Forest, N. Mex.

[Area, 941,790 acres.]

Total expenditures	$13,053.85
Outingstanding liabilities, Aug. 31	46.16
Total allotment	13,100.01
Distributed among the several subactivities approximately as follows:	
Ordinary current expenses	$12,308.30
Fire and other emergency	97.00
Improvements	507.71
Roads and trails for States	187.00
Total	13,100.01

RECEIPTS FROM NATIONAL FOREST RESOURCES.

Timber sale	$1,937.69
Timber trespass	68.75
Grazing	5,077.47
Grazing trespass	22.50
Special use	1,132.10
Total	8,238.51

That forest reserve is 941,000 acres in the State of New Mexico. It seems to have received for roads and trails $187. I take it that is under the 10 per cent fund?

Mr. LEVER. Yes; I presume so.

Mr. JOHNSON of Washington. Then, the counties in which the reserve lies will receive out of the United States Treasury one-fourth of the income, which was $8,000, or $2,000 in round numbers; so that the State of New Mexico has received from

the income of that forest reserve, comprising almost a million acres, $2,000 in lieu of taxes, and $187 to be expended as the bureaucracy of the Forest Service may decide, for the building of trails in some other reserve. Is that correct?

Mr. LEVER. If the gentleman will permit me, I will give him the figures. The area is 941,790 acres. The total expenditures were $13,053.85. The outstanding liabilities August 31 were $46.16. The total allotment was $13,100.01. This is distributed among the several subactivities approximately as follows: Ordinary current expenses, $12,308.30; fire and other emergency, $97; improvements, $507.71; roads and trails for States, $187; total, $13,100.01.

The receipts from national-forest resources were: Timber sales, $1,937.69; timber trespass, $68.75; grazing, $5,077.47; grazing trespass, $22.50; special use, $1,132.10; a total of $8,238.51.

That has been turned into the Treasury. Does that answer the gentleman's question?

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. BOOHER. Mr. Chairman, I ask leave to proceed for five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. BOOHER. I want to call the attention of the chairman of the committee to some figures in the hearing, in the report of the Chief Forester, which do not agree with the figures he read a moment ago. The report shows a total cost of the Forest Service of $5,000,000——

Mr. LEVER. What page is that?

Mr. BOOHER. The Forestry Service hearings, page 284.

Mr. LEVER. That is last year's hearing. The gentleman is evidently reading from the wrong hearing.

Mr. BOOHER. You sent me the wrong hearing, then.

Mr. LEVER. I am reading from the official figures.

Mr. BOOHER. I have the wrong book, then. But anyhow there is a large deficit between the receipts for the Forest Service and the expenditures, and there is no reason why it should be so.

The Chief Forester says that if the Forest Service is put on a commercial basis, whatever that is, it will pay the expenses.

Now, why should it not be put on a commercial basis? I will read from the hearings of last year, because I presume what is stated there as to last year would be true this year. Outside the Forest Service pasture for sheep per head costs 3.6 cents per month. In the Forest Service the Government receives 1.4 cents per month per head.

Now, why that should be I can not understand, unless what they charge outside would be putting the Forest Reservation on a commercial basis. Can there be any objection to doing that? Let us see. I will read from the hearings of a year ago, as I have not those of this year. The chairman of the committee asked Mr. Potter, an employee—I think the chief assistant of the Forest Service—this question:

The CHAIRMAN. You have not stated, Mr. Potter, the fees received from grazing.

Mr. POTTER. About $1,000,000 is the total revenue from grazing at the present time.

Mr. REILLY. Why should not the same rule for the sale of timber be followed in the sale of forage—to the highest bidder?

Mr. POTTER. Mainly for the reason that it would work against the bona fide settler.

Mr. REILLY. I mean, after taking care of the bona fide settler, why should not the cattlemen who want the privilege of using the forest reserves pay for that the same as they do for timber?

Mr. POTTER. It is entirely a matter of policy, sir, as to what should be the basis of the charges. If it is desirable to increase the revenue and place the grazing on a commercial basis, that would be the proper way in which to do it.

Now, he was asked another question a little further on in this examination. He was asked this question by Mr. MAGUIRE, and he did not answer it, for what reason I do not know. I read:

Mr. MAGUIRE. Are there any bona fide reasons why the forage privilege sold to people not settlers should not be put on a commercial basis?

He did not answer that question at all.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. BOOHER. Yes.

Mr. ANDERSON. Of course the gentleman knows that since those hearings were had those rates were increased?

Mr. LEVER. The gentleman from Missouri is mistaken. It is increased 20 per cent for sheep and other animals.

Mr. ANDERSON. I think it is 25 per cent.

Mr. LEVER. If the gentleman will permit me, I will read from the statement furnished me by the Forest Service:

The fee charged for grazing cattle on the national forests is from 48 cents to 72 cents per head per annum, depending upon the advantages and locality of the forest, the average rate being 56 cents per head. If the range is to be used during only a portion of the year, the rate is reduced accordingly, but in no case below 20 cents per head for any short period. The fee charged for grazing sheep is 25 per cent of the cattle rate, or an average of 14 cents per head per annum. Fees for short periods are fixed the same as for cattle, with a minimum rate of 5 cents per head. The fees for grazing horses are 25 per cent more and the fees for grazing swine 40 per cent less than the cattle rate.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BOOHER. I ask unanimous consent for 10 minutes more.

The CHAIRMAN. The gentleman asks unanimous consent that his time be extended 10 minutes. Is there objection?

There was no objection.

Mr. LEVER. I read further:

These differences in ratio are all due to the relative amount of range required or degree of damage done in grazing the different kinds of stock.

Before the transfer of the national forests to the Department of Agriculture no charge was made for grazing; neither was any charge made for this use of the lands before their inclusion in the national forests.

So that only since the national forests have taken over these lands have there been any fees whatever.

Mr. BOOHER. But is it true also that before that time the Government was not paying out $5,000,000 a year to look after them?

Mr. LEVER. I read further:

Therefore in the initiation of a grazing fee it was based upon the proposition that on account of the special advantages enjoyed by the stockmen using the national forest ranges over those on the outside ranges and the protection given them it was no more than fair that a reasonable fee should be paid for the grazing privileges, which would go toward helping to meet the expense of administration and protection of the forests.

A study of the charges made for the use of other grazing lands of similar character and in private ownership indicates that the commercial value of the grazing privilege on such lands averaged about three times the fee charged by the Forest Service; but owing to the many restrictions which must be imposed upon the stockmen using the national forests and the desirability of reserving the right at all times to exclude live stock whenever it appears that damage is being done to the forest by their presence, or that such action is necessary in reference to areas which are to be reforested, it was deemed undesirable to place grazing on a commercial basis.

This is a frank statement from the Forest Service.

Heretofore the rate for grazing sheep has been 20 per cent of the rate for cattle, but owing to the adoption of better methods in handling sheep and the reduction in damage by this kind of stock the rate has been changed to 25 per cent of the rate for cattle, and the change will be made for the coming season by an increase of 20 per cent in the rate charged for cattle. This will produce an increase of about $100,000 in the total revenue.

The rate has been increased 20 per cent for cattle. This will produce an increase of about $100,000 in the total revenue. Now, if the gentleman will permit further, I will read him another statement prepared by the department:

The second largest source of revenue is from grazing. This is now nearly a million dollars. The number of stock will be gradually increased, but any large increase must come from requiring a larger fee for the use of the forest ranges. At present the average fee is 56 cents for cattle and horses and 14 cents for sheep. This rate of charge is less than the actual commercial value of the forage. The national forests were formerly grazed free of all charge. The establishment of range regulations over some 100,000,000 acres of land, involving some 9,000,000 head of stock, many of them owned by ranchers and small settlers, requiring restrictions to prevent injury to the forest and to conserve the range, necessitated at first a moderate charge only and not a full commercialization of the resource merely to secure revenue. Ultimately grazing receipts should be increased 50 to 100 per cent.

Mr. BOOHER. Ultimately—when does he mean?

Mr. LEVER. I asked the Forester that question, and his answer was that these fees should not be raised abruptly 50 or 100 per cent, but that there ought to be a gradual raise in the fees, as rangers more and more understand the best use of the range.

Mr. BOOHER. He is not giving the reason that he gave a year ago when he was before your committee. Here is what he said about it then:

Mr. TAYLOR. You would have better control, would you not, over these men that graze their cattle on these lands if you charged a very small fee? In other words, they would not be so anxious to get everything out of it?

Mr. POTTER. We get better cooperation from them, unquestionably, under the system of small fees than we would if we charged every cent the grass was worth.

Mr. LEVER. I think that is true.

Mr. BOOHER. If you give your property away to a man, of course, he will be more friendly than if you asked him a decent price for it, and that is the way they are proceeding here.

Mr. LEVER. I do not think that is true at all.

Mr. BOOHER. I do.

Mr. LEVER. That is no contradiction of Mr. Graves's statement.

Mr. BOOHER. Now, let me see—

Mr. TAYLOR. If you charged every cent the grass was worth, they would want to graze it down close?

Mr. POTTER. Yes.

Now, do you mean to tell me that if you charged what it was worth an animal grazing on the range would eat the grass down

any closer than if you charged less than what it is worth? That may be good theory, but it will not work out in practice.

Mr. LEVER. The gentleman does not understand the theory.

Mr. BOOHER. When you charge only one cent and a quarter a month for each sheep, will it eat less than when you charge 4.4 cents a month? I should like to see that breed of sheep, because it would be a very economical kind to raise in a country where pasturage is high. [Laughter.]

Mr. HELGESEN. If you were paying all the grass was worth, you would put more sheep on per acre, and they would crop the grass closer.

Mr. BOOHER. Oh, no. The Forest Service can provide by regulation how many sheep per acre can go on the range, just as you would provide how many sheep should be turned onto your land, if you rented your pasture, and that is what they do. The Secretary of Agriculture has said how many head of sheep and how many head of cattle and horses and other stock shall be pastured on these ranges. He has fixed the number, so that there is no danger from that source. It is simply a lack of business sense that permits the forest reserves of this country, year in and year out, to go on in this way, with the expenses growing and growing above what the receipts are. Nobody can give a reason why the forest reservations of this country should be a tax upon the people, while the forest reservations just across the line in Canada year after year turn a surplus into the treasury of the Dominion, as is shown by the reports. That is a fact, that they get from $2,000,000 to $3,000,000 a year into the Dominion treasury from their forest reservations, according to their reports, and we have a deficit every year of $2,000,000 or $3,000,000. That is the difference in management.

I can not see why these forest reserves should not be put on a commercial basis. I do not know what they mean by that; they can provide in their rules, just as the Secretary of Agriculture has done, that only so many head of sheep or so many head of cattle shall be pastured on these forest reserves. When that is done that is the end of it, and you are not putting so many sheep on it that they destroy all the grass or anything else. It is all a matter of regulation, and they ought to pay what the property is worth. The Government is keeping these forest rangers there to protect the property and the people using it, and they are not paying enough for the pasturage to pay the expenses of taking care of it.

Mr. McLAUGHLIN. Will the gentleman yield?

Mr. BOOHER. Yes.

Mr. McLAUGHLIN. There are just such regulations as the gentleman states limiting the number of animals permitted to graze on a particular piece of property.

Mr. BOOHER. I want to ask the gentleman if he can give any good reason why it should not be put on a commercial basis and a reasonable charge made and the money go into the Treasury of the United States?

Mr. McLAUGHLIN. The charges are made, and those who make them consider them reasonable, and the money collected is turned into the Treasury.

Mr. BOOHER. Yes; the money is turned into the Treasury; but outside of the forest ranges there is the same class of forage and the same class of pasture land, and these same stockmen pay 4.4 cents for pasturing stock outside and inside only 1.4 cents. Why it is, I can not understand.

Mr. McLAUGHLIN. I do not know what charges are made for the use of land outside the forest reserves, but I know there has been a good deal of discussion as to the rates of grazing inside of the forest reserves, and those making the charges for inside consider them reasonable and proper. I think the charges within the national forests are less than charged outside.

Mr. BOOHER. Just about one-third.

Mr. McLAUGHLIN. And at that a great many contend that the charges within the national forests are higher than they ought to be. That grows out of the fact that formerly they had the use of this grazing land without any charge at all, and the feeling had developed that they ought to be used without any charge.

Mr. BOOHER. Oh, I understand that; in every new country that is true. When the owners began to fence up the lands for farming purposes cattlemen tore down the fences and claimed that their cattle had the right to run over the land. Now the Government has fenced the forest reserves. Let me read what was said in the hearings last year about this matter:

Mr. HAWLEY. Does that comparison include the value of the area for grazing purposes?

Mr. POTTER. Yes, sir. It only included lands on the outside which were grazed under comparatively the same conditions as the lands within the forests.

Mr. HAWLEY. Of course, the comparison would be valuable if the same kind of forage grew on one acre as grew on another. If it did not, it would not be.

Mr. POTTER. These were comparisons with comparatively the same kind of land and used under practically the same conditions.

Mr. HAWLEY. And the same amount of forage per acre?

Mr. POTTER. Practically the same amount; yes, sir.

Mr. SLOAN. And in contiguous or neighboring territory?

Mr. POTTER. Yes, sir; in neighboring territory to the national forests. We found as to sheep that the average price per month which was being paid for outside land was 3.6 cents per head, as compared with a charge on the national forests of 1.4 cents per head per month. Compared with the use of practically the same kind of lands outside of the national forests and under practically the same conditions, the stockmen were voluntarily paying three times as much money for privately owned land as for the Government lands. So we concluded that our fees or charges were very reasonable.

Now, I call your attention to the fact that the same kind of land, with like pasturage and under the same conditions, outside of forest reserves rents for three times what it does inside the forest reserve.

Mr. McKENZIE. Will the gentleman yield?

Mr. BOOHER. Yes.

Mr. McKENZIE. If the cattlemen and sheepmen pay 4 cents a head outside the forest reserve and only 1.4 cents inside of the Government forest reserves, I would like to know if the gentleman from Missouri can tell us how they determine which cattlemen or citizens shall have the benefit of the cent and a quarter pasturage while his neighbor pays 3 or 4 cents outside?

Mr. BOOHER. I can not tell; I only know what I read in the hearings, and they do not explain the situation fully.

Mr. McKENZIE. How do they avoid favoritism?

Mr. BOOHER. I suppose they divide it among the different cattle and sheep men.

Mr. COOPER. Will the gentleman yield?

Mr. BOOHER. Yes.

Mr. COOPER. The gentleman from Oregon [Mr. HAWLEY] has just suggested to me a possible explanation for a part of this. He says that these privately owned ranges, or places where the sheep go, are fenced and leased for a long period, whereas in a forest reservation they require a herder to go out and take care of the sheep, and that it lasts for only one year. It requires men to attend the sheep or cattle, while in the other instance they are fenced, and it does not require the herders.

Mr. BOOHER. I want to say to the gentleman from Wisconsin that Mr. Potter in testifying before the committee said that it was under practically the same conditions and the same kind of land.

Mr. COOPER. But one is fenced and the other is not.

Mr. BOOHER. There is nothing of that kind in Mr. Potter's statement.

Mr. COOPER. The private property is fenced and does not require as many men, under the circumstances, to take care of the sheep, and that seems to me a plausible statement.

Mr. BOOHER. But it was not given by the forester when he was before the committee.

I find in the hearings on this bill before the committee the following questions and answers, which do not bear out the statement that the outside range is fenced. On the contrary, it appears that the fencing is in the forest reserves.

Mr. HELGESEN. For how long do you lease the range?

Mr. POTTER. Only for one season.

Mr. HAWLEY. But a man who is satisfactory is sure of getting his lease the next year?

Mr. POTTER. Yes, sir; but under our regulations we provide for renewals unless it is necessary to reduce the range to stop damage or to provide for bona fide new settlers. As new settlers come in we take care of them by reducing the permits of the larger stockmen and issuing small permits to the settlers.

Mr. HELGESEN. It is absolutely on a license basis, then?

Mr. POTTER. Entirely on a license basis; yes, sir.

Mr. HELGESEN. And they are not allowed to fence it?

Mr. POTTER. They are allowed to construct such fences as are necessary for the control of the stock. That is one of the advantages that comes from grazing on the national forests over grazing on the outside range.

Mr. HELGESEN. How can they fence for one year?

Mr. POTTER. They fence on the one-year permit, because they feel sure of the renewal, except for these two conditions, and they are perfectly willing to go ahead and construct fences on that basis.

It seems to me that the statements of Mr. Potter quite fully answer the fencing proposition.

Mr. LEVER. The Forester could not tell all that he knew in the short time he was before the committee, and the gentleman from Missouri could not tell all he knew in five minutes.

Mr. BOOHER. No; great man as I am, I could not tell all I know in five minutes. But I know what I read in the hearings, and I know when the Forester was before the Committee on Agriculture he was there to give the committee all the information he had, and when he was asked the questions by Mr. SLOAN to explain that situation he ought to have explained it. He had the explanation that the gentleman from Wisconsin says that he has got from somebody else.

Mr. COOPER. Let alone what the Forester ought to have done, I gave the gentleman what the gentleman from Oregon

says is the explanation, and he is a practical observer of the actual conditions.

Mr. BOOHER. What the gentleman from Oregon says about the situation would appeal to me, but we ought to have got it out of the Forester in the hearings, where we could have read it. Because the Forester says it is practically the same for the same kind of land, that it has the same kind of forests. Now, this matter was discussed a year ago. Nobody ever thought it was because somebody had gone out and fenced a great lot of this outside land. I would like to know what kind of fence they put around it. We have great areas of land, large tracts; who put a fence around it?

Mr. STEPHENS of Texas. Will the gentleman yield?

Mr. BOOHER. No; I have not the time. The Forester said that if we put this on a commercial basis that we could get more money for it. Now, if you want to put it on a commercial basis——

Mr. COOPER. What does he mean by "commercial basis"?

Mr. BOOHER. I do not know.

Mr. COOPER. A self-sustaining basis?

Mr. BOOHER. I read what the Forester said about it.

Mr. COOPER. What does the gentleman understand by "commercial basis"?

Mr. BOOHER. It is not what I understand, but it is what the Forester said and understands.

Mr. COOPER. What does the gentleman understand the Forester understands?

Mr. BOOHER. If the gentleman wants me to state what the Forester meant, I am not going to try to do it.

Mr. COOPER. Is the gentleman arguing something that he does not understand himself?

Mr. BOOHER. No; I have got an idea of what commercial basis means. I would say, a paying basis.

Mr. COOPER. But the gentleman was defending the proposition, and now he can not define it.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. BOOHER. Just a word in conclusion; just a minute.

The CHAIRMAN. Is there objection to the gentleman from Missouri having one minute? [After a pause.] The Chair hears none.

Mr. BOOHER. Now, if the gentleman will let me conclude. I would like, for the benefit of the gentleman from Wisconsin, to define what the Forester meant, and I respectfully suggest that he hunt up the Forester and get it from him. He has not told the committee what he meant. He has not told anybody that I know of. I think what he meant was that he would rather rent this for a cent and a quarter an acre than to get what it is worth. I am trying for the benefit of the committee to see whether or not we want him to put it on a commercial basis, which would mean a paying basis. I do not know of any other basis that the word "commercial" would mean. Now, are we to wait for this to go on from year to year, with greater taxes every year upon the people, or are we going to instruct him to put these reserves on a commercial basis?

The CHAIRMAN. The time of the gentleman has again expired.

Mr. HAWLEY. Mr. Chairman, I desire to make some observations about placing the forests on a paying basis.

Mr. BOOHER. Do not use the word "paying," but use the word "commercial," which the Forester used, and tell us what he meant, for the benefit of the gentleman from Wisconsin.

Mr. HAWLEY. I prefer to use the word "paying," if the gentleman will permit me. The great resource of the national forests is the timber on them. While at the present time the amount received from grazing, including grazing trespass, is a little over a million dollars, and the amount received from timber sales, with timber trespass added, is a little over a million and a quarter dollars, the amount received from grazing can not be very greatly increased, in my opinion. It may be in some places increased a little, but, generally speaking, the grazing is selling for about what it ought to sell for under conditions now existing. With a hundred million acres of land within the national forests, of which there are 16,000,000 acres in Oregon—and I use the State of Oregon as an illustration, because I am more familiar with conditions there, on which there are more than 200,000,000,000 feet of timber—the solution of the problem of making the reserves a source of income to the Government lies in increased sales of timber, and the Committee on Agriculture has been urging, ever since I have been a Member, that we should increase our timber sales. Years ago we used to sell in small quantities. The amount included in each sale was comparatively small, seldom exceeding a million feet. No lumberman, no logger, can do business on a million feet of timber, especially when they have to build logging roads and open up the way to get the timber out. The sales have increased in size recently until a hundred million feet or more may be sold in a body. Sales are increasing to some extent, but the cut does not yet equal the actual deterioration of the forest; that is, there is a great deal of timber overripe, deteriorating, and becoming worthless.

Now, the thing to do to put the Forest Service on a paying basis so it will be a resource instead of an expense to the Government is to give the Forest Service legislation, if necessary, to enable it to put the timber on the market in quantities sufficient to induce commercial operators to buy, build roads, and build mills. We should sell a large enough contract so that they can cut timber sufficient to make it commercially profitable, and then we will get back from the forest all that it is necessary to pay for its care, which will be a very small amount in proportion to sales, and yield a considerable net revenue. That is a solution of the problem—to put these forests on a basis of paying revenue instead of remaining as an expense to the Government.

Mr. McKENZIE. Will the gentleman yield?

Mr. HAWLEY. I will.

Mr. McKENZIE. Is the amount of timber limited by law that they can cut on one of these reservations, or is it simply a regulation of the Forest Service?

Mr. HAWLEY. The amount to be included in any sale is determined by the service.

If we are going to put the Forest Service on a paying basis and make it a source of revenue, we must authorize large sales, and if legislation is necessary, enact the necessary legislation, so that the sales can be made in large enough bodies to pay the operators a reasonable return.

And no one will buy timber on a national forest and pay the Government price—and they usually get the highest stumpage price in the market around them—unless they have an opportunity on a reasonably well-managed property of making a profit.

The CHAIRMAN. The time of the gentleman from Oregon has expired.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Washington moves to strike out the last word.

Mr. JOHNSON of Washington. Mr. Chairman, I am much interested in the statement in advocacy of large sales on the part of the gentleman from Oregon [Mr. HAWLEY]. The Forester in his report calls attention to four large tracts which contribute greatly to his aggregate of money received for sales of lumber. Then, he goes into a page of description and argument, advocating small sales, for, as I read this morning from his report, his policy is to encourage the nighborhood and small sales in order to secure some stable income.

Now, it may be a very fine policy to enter into those large contracts. It is perhaps a good policy, except where the Government goes into a deal covering from 15 to 25 years' time, with some subsidiary branch of a great railroad for the taking off of millions and millions of feet of timber, where the only payment is the payment of $8,000 or $10,000 down, the rest to be paid in installments years apart and at the conclusion of the contract, the Government receiving no interest whatever, and the bulk of the timber being paid for at the conclusion of that great length of time. That is what is making the trouble with the lumber and the timber business in the West.

Mr. Chairman, we are coming in a moment in this bill to the appropriation for the Kaibab National Forest Reserve, the one that has been attracting so much attention recently in the magazines, and of that the Chief Forester says:

> In addition to these contracts the sale of seven large areas was approved during the year, following an estimate and appraisal of their stumpage. The most important of these is a body of 1,000,000,000 feet of western yellow pine on the Kaibab National Forest, in northern Arizona, adjoining the northern rim of the Grand Canyon of the Colorado River. The exploitation of this area will require the construction of approximately 200 miles of railroad unless further developments in trunk-line construction in this region bring the forest nearer to rail facilities.

Then he goes into a discussion of a page or so in the hearings on the present bill, as to the advisability of building 200 miles of railroad to get to a great stand of inaccessible timber, and intimates, but will not say outright, that the Government should build the road. Then, if you will turn again to the annual report, you will find the Forest Department congratulating itself on two contracts for a million feet of sawed timber in the Olympic Forest, in the State of Washington, in the district which I have the honor to represent, which they say marks the opening of this vast forest.

Now they want to get these great sales in territories that can not be reached by roads, and at the same time if you will turn and examine this detailed statement of expenses for the

reserve and calculate the amount that is allowed or given for cutting out the roads and trails you will find that the sums are so small as to be of no consequence in connection with the work.

Now turn to the report of the Secretary of Agriculture made this year and read the hope that is held out to the settlers in the reserves. The Secretary of Agriculture says:

In regions where timber is the chief income-producing resource absence of demand for it often works a serious hardship upon those who have entered the region as the advance guard of civilization and are seeking, in the face of many difficulties, to establish homes. There are counties in which a sparse local population of pioneer settlers find themselves surrounded by a wilderness largely consisting of national forest land, which is almost idle so far as any form of present use in concerned. In other words, a great, if not the greatest of the potential sources of wealth in such counties, held in trust by the Government for the benefit of the public, not merely contributes nothing now to the upbuilding of the communities which will give value to the forests, but actually adds to the burden which these communities must assume.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. JOHNSON of Washington. I ask unanimous consent for another five minutes, Mr. Chairman.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to proceed for five minutes. Is there objection?

Mr. LEVER. Mr. Chairman, I am not going to object, but I am going to plead with gentlemen on both sides of the House and say that it is absolutely necessary that we pass this bill by Thursday night. I hope the gentleman will help me get along with the bill. I am not going to object.

The CHAIRMAN. Is there objection to the gentleman's request?

Mr. JOHNSON of Washington. I had the intention of hurrying along, Mr. Chairman, but——

Mr. LEVER. I am not going to object to the gentleman proceeding for five minutes more——

Mr. JOHNSON of Washington. But whenever a man wants to ram a Weyerhauser knife into me I resent it, and I propose to take up as much time as I choose this afternoon in the discussion of the bill.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. JOHNSON of Washington. I was reading a moment ago from the statement of the Secretary of Agriculture, in which he points out how these large communities are suffering from the want of taxes. He says:

Were the forests private property they would pay their fair proportion of the cost of road development, public schools, and other public activities through taxation. The Government, unlike the private owner of timberland in such regions, is holding the timber, not in order to make a profit later by its advance in value, but in order to make it promote the public welfare. That it should be made to serve the local as well as the national public welfare has been definitely recognized in the provisions of law for the use of 35 per cent of all gross receipts from the forests for local public purposes.

To carry more fully into effect this already established principle a further step should be taken. It should not be necessary to wait until the period of hardest struggle is past before these public resources begin to assist local development. Before the national forests begin to yield large incomes, as well as after, they should be made to participate in the work of building up the country and giving value to all its resources.

Now, Mr. Chairman, I have here a statement showing the cost of this service since 1906, up to and including 1913, showing a greatly increasing appropriation every year, and showing also an increasing income from products of the forest reserve—for grazing, trespass, fines, the sale of timber, and so on—absolutely out of proportion, however. The policy changes apparently every few years. It is impossible for anyone to keep track of the disbursements and expenditures and how the amounts go for roads and trails or for school funds; and, so far as I have been able to ascertain, ever since the year 1906, when this subject came up, there has been an insistent desire to hurry it along. Only a few pages of committee hearings are devoted to the Forest Service. In spite of the fact that this bill appropriates five and one-half million dollars, the entire hearings on the subject are comprised in not to exceed 10 pages, and those 10 pages might just as well be summed up in the oft-repeated words of the Forest Service itself—"administrative supervision." That is all there is to it. You have your chief, you have your supervisors in the seven districts, and their subofficers out in the reserve, commanding an array of rangers. Fifteen or eighteen men have charge of each of the larger reserves, exercising all of the authority of the courts of law, priding themselves every time they can soak a $10 fine on a poor ranger in a heavily forested country when his cow or his few sheep have gone over an imaginary line; scowling and spying around the country raking in these fines. And here is a great bureau of the Government, grown up to such a point that I boldly make the statement that this great Committee on Agriculture, composed of as intelligent men as there are in this House, and as hard-working men, do not pretend to follow or know anything about the forest reserves, which comprise, as I have just said, from one-third to more than one-half of all the territory in the 11 far Western States and much territory in other States as well.

There was limited general debate on this bill. I was unable to get any of the time, and the moment anyone who comes from the edge of one of these reserves undertakes to say something for the homesteaders who have gone in there and are struggling against conditions more onerous than ever existed in the pioneer days of Kentucky, Illinois, or Missouri; the moment a man dares to stand up and say a word about conditions there, some gentleman on this floor wants to know where the Weyerhaeusers come in in the matter.

Mr. LEVER. I wondered what the gentleman was referring to. This is the second time that he has used the word "Weyerhaeuser." I certainly did not thrust Weyerhaeuser at the gentleman.

Mr. JOHNSON of Washington. I sincerely hope the gentleman did not intend to do so, but I am getting a little tired of being asked about Weyerhaeuser every time I say a word in the hope of calling serious attention to many Forest Service inequalities. There are a large number of settlers as good citizens as there are anywhere in this country who have gone out into these reserves and settled, and it is in their behalf that I am making these remarks.

Mr. LEVER. I think my conduct on the floor of the House will compare favorably with that of the gentleman for courtesy. I should like to know what remark I have made to which the gentleman took umbrage.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LEVER. I ask unanimous consent that he have three minutes more.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the gentleman from Washington have three minutes more. Is there objection?

There was no objection.

Mr. JOHNSON of Washington. I said at the time that I hoped the gentleman did not mean any discourtesy by his question. These pioneers, farmers and ranchers, many of them do not see so much as $500 in cash in a whole year. I was asking if, when they were forced to go in and fight these fires, they should not have the same protection and the same surgical assistance that is being given to the rangers, and the gentleman asked me if I would have the Weyerhaeuser agents paid, or something of that kind.

Mr. LEVER. No; I did not; and the RECORD will show I did not. I said, suppose an employee of the Weyerhaeuser Co. should suffer the same trouble that the farmer suffered, that the gentleman spoke of, would the gentleman have that poor man suffer, 15 miles from headquarters—would the gentleman have him suffer the tortures of the burned because he happened to be employed by a corporation? That is what I said, and if that hurt the gentleman's feeling, I am sorry. I would not have the gentleman think I would wound his feelings knowingly for anything on earth. That is what I said, and the RECORD will show it.

Mr. JOHNSON of Washington. It seems a pity, however, that between the corporations on the one hand and the United States Government operating almost as a corporation on the other hand, when we get down to the real problem of these forest reserves so little attention should be paid to the settlers and pioneers out there. Gentlemen on the floor of this House, if you will read these hearings, where an appeal is made for the use of timber for ships, and in another place where an appeal is made for a Government railroad for 200 miles, and then if you will consider these ship-purchase bills and other bills of that kind that are coming before this Congress I leave it to the good judgment of gentlemen on this floor if it is not about time we gave some attention to the Forestry Service and its plans and what it is coming to.

Mr. LEVER. But the gentleman would not make that a reason for making an unkind reference to me when I have had no intention of being discourteous to anyone.

Mr. JOHNSON of Washington. I shall be very glad to withdraw that. I meant nothing of the kind, I am sure.

Mr. McLAUGHLIN. I move to strike out the paragraph for the purpose of getting a little time.

The CHAIRMAN. The gentleman from Michigan moves to strike out the paragraph.

Mr. McLAUGHLIN. I presume some of the criticism the gentleman from Washington [Mr. JOHNSON] is making is

proper enough, but gentlemen of the House ought to know that every regulation made in relation to the national forests and their use is for the benefit, first, of the people who live and own property in the vicinity of the national forests. In the matter of the use of timber settlers are permitted to use a certain amount of the timber without any charge whatever. They are permitted to use timber, a further quantity of it, at a very moderate charge, less than is demanded of those who would buy in large quantities or for commercial purposes.

In the matter of the use of forests for grazing, the settler is permitted to use a certain amount of a forest reserve in the vicinity of his home without any charge whatever, and in every case the actual settler is preferred, when he wishes to use the grazing lands within the forests, to those who would use them for commercial purposes.

I wish to say that it must be a source of relief and satisfaction to the people of the United States to know that finally the authority of the United States is exerted for the protection of these great forests. We hear about men being arrested for trifling infractions of the law—some men who go on a forest reserve and take a little timber or a little wood. Possibly those cases actually arise, but I am inclined to believe that the gentlemen who tell them are drawing on their imagination in their effort to break down and discredit the Forestry Service. But rules and regulations are made to apply to everyone, and they must necessarily apply alike to the big man who would deliberately evade the law or knowingly violate it in important particulars and to the small man who might unintentionally violate it or transgress in some minor particular. I say it is encouraging, to say the least, for the people of the United States to know that their forests are being taken care of and that everybody, large or small, regardless of who or what he is or what his influence is or heretofore has been, is now amenable to the laws which Congress has enacted for the protection of our forests.

The gentleman from Washington has referred to the fact that timber for the use of the Government for the construction of railroads has been refused. It is true that it was suggested when this bill was in process of preparation that the officials whose duty it will be to construct the railroad in Alaska should be permitted to take from the national forests, without any charge whatever, all timber of all kinds that they might wish or need in the construction of that railroad.

That matter was fully considered and discussed by us in the meetings of the committee, and we determined to recommend to this House that no such provision should be put into this appropriation bill. Congress has appropriated money for construction of a railroad in Alaska, sufficient for the purchase of material of all kinds, and there is no reason why that money should not be used. The Forestry Service is attacked in this House every time a bill is presented more vehemently than any other provision of the appropriation bill. The Forestry Service is, and always has been, more savagely attacked than any other in the Department of Agriculture. The amount of money necessary to carry on the service is criticized, and if we were to permit the adoption of this provision, if we were to recommend the incorporation in this bill of a provision which would permit the timber from the forests to be taken for other branches of the Federal Government without payment, we would be recommending the use by other departments of the proceeds and the assets of the forest reserves while we were continuing all the expenses of the service, expenses which are so closely scrutinized and so severely criticized.

If the Forest Service is to be criticized, as in former years, for expenditures necessary to carry it on, then it is entitled to all the revenue that can possibly be secured and to all revenue arising from use or sale of its property, and any other branch of the Government wishing to use timber from the forest must pay for it, or wishing to avail itself of any privilege or advantage of use of the resources of the forests ought to be charged with the cost or value of the same. The Forest Service ought not to be criticized because of large appropriations made in its behalf and be denied the right to realize on its resources, or be asked to separate itself from its property without receiving payment or even being credited with the value of the property. That is the reason why the committee has refused to permit the incorporation in this bill of the provision for the use of the timber from the forests for the construction of railroads or other branches of the Government without payment to the Forest Service.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. JOHNSON of Washington. Will the gentleman go further and say that the money taken from the forest reserve instead of being turned into the Treasury should be used to develop the building of roads through the reserves?

Mr. McLAUGHLIN. All revenue received for sale of timber and for use of forest reserves is turned into the Federal Treasury; a portion of the money so paid into the Treasury is turned back or paid to municipalities in which the forests are located. In my judgment, the percentage that the local treasuries are getting is more than they ought to have.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. JOHNSON of Washington. Does the gentleman think that $1,000 out of 1,000,000 acres is too much for road building?

Mr. McLAUGHLIN. Oh, I do not know anything about particular cases; but I know, as a general proposition; or, I will say, that in my judgment as a general proposition, the percentage of receipts from the national forests turned back from the Federal Government into local treasuries is fully as much as, if not more than, they are entitled to.

Mr. JOHNSON of Washington. Does the gentleman think that out of 1,600,000 acres, $25.35 as one county's share of the 25 per cent of the sale in lieu of taxes is too much, and that the county which receives it is on the highway to prosperity?

Mr. McLAUGHLIN. If the gentleman wants to open up that proposition and advocate an increase of percentage that the local treasuries shall receive, let him bring it before the House, and let it be fully discussed, and he will find out what the temper of the House is, and learn something that he does not now know about the administration of the forests and the use of the money.

Mr. JOHNSON of Washington. We all confess to a great lack of knowledge about the whole proposition. In fact, I find in the hearings that the gentleman from Michigan asked seriously if the people are permitted to go on forest reserves to reside. Of course he asked it innocently and for information.

Mr. McLAUGHLIN. Yes, sir; and I will say to the gentleman that I have myself favored the proposition as suggested that certain kinds of use and occupation by private parties should be permitted in the national forests, for certain uses of the national forests or in a way that will benefit the people or add to their comfort, and at the same time that will not injure or endanger the forests or interfere with their proper administration. I favor anything that can be done without injury to the forests or without departing from the policy of maintaining and protecting them. A bill of that kind, providing things of that kind of use, was up here on unanimous-consent day—a bill introduced by my friend from Oregon [Mr. HAWLEY], and I was heartily in favor of it, but the gentleman from Wisconsin [Mr. STAFFORD], exercising his right, objected to it; and it was not considered, and the gentleman from Wisconsin will remember I talked with him afterwards and suggested to him that, in my opinion, he made a mistake, and I believe he now thinks he did.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ANDERSON. Mr. Chairman, I shall only take but a minute or two to correct a misapprehension on the part of the committee, which may have been created by the remarks of the gentleman from Missouri [Mr. BOOHER]. He directed his remarks to the proposition that the Forest Service did not charge as much for the grazing of animals within the forest reserves as was charged by private individuals or private corporations for private grazing lands, and wanted to know why the Government could not require the same payments as were required by private corporations. Now, there are certain sound fundamental reasons why the Government can not make the same charge as would be made by private corporations. In the first place, the Forest Service in the public interest is required to make certain restrictions which private corporations are not required to make. In the public interest the Forest Service can only make a lease for a single year, whereas private corporations make leases for a term of years. In the public interest the Forest Service limits the number of sheep which can be grazed on a definite area, a restriction which is not ordinarily made by a private corporation. In the third place, it makes certain restrictions with respect to the building of fences. It does not permit the building of fences except under certain conditions, while private corporations permit and, in fact, encourage the inclosure of certain areas. In my opinion, it will not be possible to put these grazing areas upon anything like a commercial basis until some satisfactory grazing law is enacted by the Congress.

The CHAIRMAN. The question is on the motion of the gentleman from Michigan to strike out the paragraph.

The question was taken, and the motion was rejected.

The Clerk read as follows:

Arkansas National Forest, Ark., $11,930.

Mr. WINGO. Mr. Chairman, I desire to offer the following amendment, which I send to the Clerk's desk.

The Clerk read as follows:

That the Executive orders and proclamations setting forth and reserving certain lands in the State of Arkansas, known and designated as the Ozark National Forest and the Arkansas National Forest, as forest reserves be, and they are hereby, suspended, vacated, set aside, and held for naught as to all public lands now included in said reserves lying and being situated within the State of Arkansas, and that all public lands therein be, and they are hereby, excluded from said forest reserves and are hereby restored to the public domain, the same as though said orders and proclamations had not been issued.

Mr. LEVER. Mr. Chairman, I make a point of order on the amendment.

The CHAIRMAN. Does the gentleman from Arkansas desire to be heard on the point of order?

Mr. WINGO. I desire to be heard on the point of order.

Mr. LEVER. If the gentleman desires me to reserve it, I will do so. I thought probably he had in mind another amendment. Of course, the gentleman recognizes this is not in order.

Mr. WINGO. I think it is in order.

Mr. LEVER. I make the point of order that it changes existing law.

The CHAIRMAN. The Chair will hear the gentleman for a moment.

Mr. WINGO. Mr. Chairman, it is true it is a change of existing law, but it plainly reduces the expenditures of the Government $11,930. As a matter of fact, it will reduce expenses and is plainly in order.

The CHAIRMAN. The Chair is of opinion the point of order is well taken. Unless the gentleman can convince the Chair he is in error he will certainly sustain it.

Mr. HAWLEY. Mr. Chairman, if there is any doubt, I would like to be heard.

The CHAIRMAN. The Chair is ready to rule. The Chair thinks clearly it is a change of existing law, and the Chair sustains the point of order.

Mr. WINGO. Mr. Chairman, I move to strike out the paragraph. The performance we have just witnessed shows how difficult it is to reach institutions like these forest reserves when once they get established. I have always been opposed to these two reserves, and have been doing everything in my power since I have been a Member of Congress to have them abolished, and I shall not be content with my efforts here to-day, but I intend to press this matter until these lands are thrown open to entry to the settlers and home builders of this country.

There is not a person who has an intelligent opinion with reference to these two reserves in my district, but admits that their creation was a mistake. No man of intelligence can go to these reserves and ride through them without being forced to the conclusion that the lands in them should not be included in a forest reserve, but should be left to the agricultural development of the settlers who desire to enter them under the homestead laws.

Originally, when they established these forest reserves, they included in them nearly everything. They included nearly one whole county, with the exception of 77,000 acres—one of the oldest counties in my State, where the Government owned altogether only 26 per cent of the lands of that county. Of course, that seemed ridiculous, and they early began eliminating lands, and have been eliminating ever since. Only last April they eliminated several tracts of land in those reserves.

I want to call your attention to the character of land which was eliminated. Why they were eliminated and why agricultural lands were retained I have not been able to ascertain.

The department admits that the lands that were eliminated were "chiefly mountainous." This description is stated in a letter signed by Mr. C. M. Bruce, under date of April 28, 1914. I will not read all of the letter, because I was calling for specific information as to how many acres in the elimination were located in two particular counties, and the letter furnished that specific information, and the writer added that they were "chiefly mountainous."

That was no information to me, because I knew personally the lands; and I say to you, gentlemen, that, possibly, with the exception of 12 per cent of the lands in those reserves, the lands that are left in those reserves are better agricultural lands than those that have been eliminated.

Why is there a forest reserve around the timber in that forest reserve? Does the Government own any timberland there? Only a part. Who owns it? Less than a year ago it was suggested by the Secretary of Agriculture that those of us who were interested in those reserevs should meet him in a conference. We met, and he stated his reasons very frankly—and he was correct about it—and I think if the Secretary of Agriculture could ever ride through that forest he would abolish the whole thing. In a letter he says:

At present the alienated lands intermingle with the Government lands in these forests in such a way as to make it difficult to secure protection from fire and introduce permanent measures of forestry. The cleared lands are of low agricultural value and constitute small fields of from 5 to 50 acres. Roads and railroads are lacking, and it is difficult for the settlers to develop satisfactory community life.

To a man who is used to the character of land that the Secretary is used to, it is indeed of low market value. But he admits that the farmers have gone in there and have fields of from 5 to 50 acres. A few years ago it was 50 to 75 miles from a railroad, and yet many people preferred that land on which to make their homes, and they have made a success of farming, and they have developed farms there, and, in fact, in that area are some of the oldest settled lands in the Southwest. Some of the best men in the world have come out of those communities, reared upon just such hill farms as the Secretary regards of low value. Then the Secretary says:

Several questions arise. Can we not eliminate portions of the present forests which have a large proportion of agricultural lands, and which are difficult to administer, and exchange lands in the portion eliminated for lands held by settlers in the portion which it is proposed to retain? In the Ozark Forest, for instance, which has a gross area of 963,300 acres, it is suggested that we retain approximately 488,000 acres and that we increase the Government ownership of lands within this retention area by such exchange as I have indicated, and that the area retained be closed against further alienation.

He says, further:

A considerable part of the land in the area proposed to be retained is held by nonresidents and by the railroads.

The Acting Secretary of Agriculture, Mr. Carl Vrooman, writes me under date of October 9, 1914, as follows:

The Paul D. Rust Lumber Co. claims, approximately, 103,000 acres lying in a comparatively solid body on South Fourche Lefave and on Dry Fork. The Graham Lumber Co. owns between thirty and forty thousand acres on Mill and Johnson Creeks.

Then he goes on to say:

Within the proposed permanent boundary of the Ozark National Forest the St. Louis, Iron Mountain & Southern Railroad claims lands in the following sections:
R. 17 W., T. 10 N., secs. 25, 27, 29, 31, 33, and 35.
R. 18 W., T. 10 N., secs. 25 and 27.
R. 19 W., T. 10 N., secs. 7 and 9.
R. 20 W., T. 10 N., secs. 1, 3, 5, 7, 9, and 11.
R. 20 W., T. 11 N., secs. 17, 19, 27, 29, 31, 33, and 35.
R. 21 W., T. 10 N., secs. 1, 3, 5, and 11.
R. 21 W., T. 11 N., secs. 3, 5, 7, 9, 13, 15, 17, 19, 21, 23, 25, 27, 29, 31, 33, and 35.
R. 22 W., T. 11 N., secs. 1 and 13.
R. 22 W., T. 12 N., secs. 17 and 35.
R. 23 W., T. 12 N., sec. 13
And all of the odd sections within the proposed permanent boundary in Rs. 27 and 28 W., T. 12 N.
Of the balance of the patented lands lying in the proposed permanent boundary of the Ozark National Forest, it is estimated that approximately 50 per cent are held mainly for speculation, and mostly by alien nonresident owners.

Now let us see about some of the other holdings.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. WINGO. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. FESS. Mr. Chairman, will the gentleman permit a question while he is there?

The CHAIRMAN. Does the gentleman from Arkansas yield to the gentleman from Ohio?

Mr. WINGO. In just a moment. I want to conclude that statement. I want to quote from the letters themselves, so as to avoid error. After he has named these railroad holdings he says:

Of the balance of the patented lands——

Mr. FORDNEY. I wanted to ask the gentleman if he would permit me——

Mr. WINGO. With pleasure.

Mr. FORDNEY. Has the gentleman any knowledge of what portion of these private holdings were originally patented to the railroad company and then sold to private individuals? The odd sections of land were originally conveyed to the railroad company.

Mr. WINGO. I am referring to land held by the railroad company.

Mr. FORDNEY. But orginally a great portion of these lands now held in private ownership were patented to the railroad company and by them sold to private holders.

Mr. WINGO. That may be true, but I call attention to the fact that the railroad holds these grants, and in addition other lumber companies hold large amounts, one company 103,000 acres and another 40,000 acres, and of the balance in smaller

holdings about 50 per cent, so the Secretary says, are held for speculative purposes by nonresident owners.

Now, why should the Federal Government undertake to protect these holdings when it is not claimed by anyone that there are more than just a few small tracts of Government timbered land left in that territory? Is there any man who is in favor of conservation and who believes in the Forestry Service who will say that is a practical thing to do? It certainly is not.

Now, I started out on the theory that the department itself had recognized that there was something wrong there and that they were going to begin to eliminate it, and I have the assurance that a great deal of it will be eliminated, for the reasons that they themselves have given in this correspondence, because they are bound to recognize that these lands are more valuable for agricultural purposes than for anything else, and every time there has been a dispute out there between the Forest Service and an entryman, and a ranger has made an adverse report on the homestead application, when a special agent of the Land Department has been sent there, in a great majority of cases they reported that the land was valuable chiefly for agricultural purposes, and upheld the right of the entrymen to make the entry.

I have been through the Arkansas National Forest myself. I know the character of its lands. I know that measured from the standpoint of the Forestry Service itself it is ridiculous that the Arkansas National Forest is retained there, because all the principal holdings of valuable timber have long since passed into the hands of the railroads and these large lumber companies. Now, under the proposed elimination plan in my own congressional district they propose to eliminate a large amount. The area of Government land to be retained in one reserve was reported at 364,000 acres, and the private land to be retained in that area was 182,000 acres. Now, that is under a proposition that has not yet gone through, simply a tentative suggestion made by the department something like a year ago, which has not yet been acted upon.

Well, we will take some of the other items. In the Ozark National Forest, in my district, there in one county they proposed to retain Government land to the amount of 2,672 acres; private land now within the area to be retained, 8,177 acres. By reason of the investigations that have been made as to the agricultural character of these lands the Secretary of the Interior has tentatively suggested that certain eliminations should be made.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WINGO. I ask unanimous consent that I may proceed for five minutes.

Mr. LEVER. Reserving the right to object, I ask unanimous consent that debate on this paragraph and all amendments thereto close in 10 minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all debate on this paragraph and amendments thereto close in 10 minutes. Is there objection?

Mr. WINGO. I do not want to take up any more time than is absolutely necessary.

Mr. MANN. How much time does the gentleman want to discuss this proposition?

Mr. WINGO. I have already asked for five minutes, and I have another amendment that I intend to offer.

Mr. STAFFORD. Is it an amendment to the same paragraph?

Mr. WINGO. I will not object, if it is desired to close the debate.

Mr. FLOYD of Arkansas. I object to closing the debate on this paragraph in 10 minutes.

Mr. LEVER. How much time does the gentleman want? I realize that the chairman of the committee is absolutely helpless in this matter on this item and others like it, but I must appeal to gentlemen to help the committee get along with the consideration of the bill as rapidly as possible. I will ask the gentleman from Arkansas [Mr. FLOYD] how much time he desires?

Mr. FLOYD of Arkansas. I do not know yet.

Mr. LEVER. I am perfectly willing to come to an agreement if gentlemen will suggest how much time they desire.

Mr. FLOYD of Arkansas. A colleague of mine who is not in the room now desires some time, and I should not like to agree to a limitation at this time.

The CHAIRMAN. Is there objection to closing debate on this paragraph and all amendments thereto in 10 minutes?

Mr. FLOYD of Arkansas. I object.

The CHAIRMAN. The gentleman from Arkansas [Mr. FLOYD] objects. The gentleman from Arkansas [Mr. WINGO] is recognized for five minutes.

Mr. WINGO. Mr. Chairman, I recognize that it is hard to get the attention of the House upon a matter of this kind. I personally know the facts about which I am talking. I am not going to discuss the question of conservation or forest reserves. I know that these lands are valuable chiefly for agricultural purposes. Of course there is a little ridge here and there of which that is not true. In some of the counties there are small tracts here and there that may be said not to be fit for agricultural purposes, but wherever you find a piece of land in either one of these reserves that is not fit for agricultural purposes the timber on it is scrubby and not fit to be conserved. The Secretary says that the cleared lands of these small farmers are in tracts of from 5 to 50 acres. That may be true. It is true that this is in a part of Arkansas where the holdings of home owners are not large. I want to say frankly, without any feeling of ill will toward the plantation owner, because some of the best friends I have are the plantation owners in my district, but among the best citizens in my district, and that is true in every farming district in this country, are the small farmers, the small landowners who live upon small farms of from 40 to 120 acres, each with his little orchard, with his bottom fields, with his hill fields, and with his pasture. The great majority of them are hard-working, law-abiding, and God-fearing men, who pay their honest debts and to the best of their ability educate their children and train them up to make useful citizens. I submit, Mr. Chairman, that if these lands are thrown open to settlement and taken up by men of this type, so that on each 40 of this reserve one of them will have his little home, more direct benefit will flow not only to Arkansas but to the entire country than can be derived from all of the forest reserves in this Nation.

The small farmer is the most valuable farmer from the standpoint of citizenship you have in this country. And because, forsooth, he has not been able to carve from the wilderness more than 50 acres of land in one field, can it be the part of wisdom to class such land as unfit for agricultural purposes and retain it in a forest reserve? That is ridiculous, Mr. Chairman. I have not the slightest doubt but that if you could ride through the Arkansas National Forest one day you would say that it is agricultural land, and that it is a farce as a forest reserve, and that it should never have been established.

Now, let us abolish these two reserves and thereby save the Government $77,000 a year. The farmers are willing to take it. I have here a statement of the number of people who it is claimed have evidenced a desire to enter the land within these reserves. There have been 2,580 men who thought that the land was sufficiently valuable for farming purposes, and for that reason desired to make homestead entries in them. These people were from Oklahoma, Missouri, Kansas, Massachusetts, Maryland, Colorado, New York, and nearly every State in the Union, and they would be glad to homestead these lands if permitted to do so. Even those who have been permitted to enter lands that the Forestry Service admitted were agricultural lands have had their applications held up and have been so annoyed and harassed as to defeat the objects of the homestead law, and their experiences prevent a great many others from entering who would like to do so.

Only to-day there came to my office a letter from a widow, who writes how she and her husband went down there in 1911 from one of the far Northern States to homestead a piece of land. She states how they filed on 160 acres, 6 miles from the county seat of the county; how they made improvements; and how, after considerable time had elapsed, their filing fee was sent back to them and they were told that the place was in the forest reserve. After considerable correspondence, they were finally advised that they would have to homestead under the act of June 11, 1906; that is, through the Forestry Bureau. Finally the husband died, after he had put in a year and a half's effort to procure land which he, as a farmer, knew was agricultural land. Finally his widow applied through the Forestry Bureau, and she writes that the forestry people came and surveyed 160 acres for her and that afterwards she was told she could only get 40 acres. She states that she lived alone the balance of the required time—one and a half years more—and finally she had to get out and seek work, and while she was gone her home burned and she lost everything she had. She spent several hundred dollars on the place and cleared and put under hog-tight fence a 16-acre field. She states that when she writes to the department she receives a stereotyped reply—that if she has complied with all of the homestead laws and lived on the land with a special use permit, no reason could be seen why she could not prove out at once on her second application, which she made a few months ago. But she only had a verbal permit from the forestry people, and this good woman wants to know if this verbal permit is sufficient. I do not know anything about the merits of this particular case, but I shall investigate it; but I do know that in the past my attention has been called to cases

where the records show such a systematic course of petty annoyance that I am convinced that instead of trying to carry out the spirit of the homestead laws of this country, everything was being done to drive proposed settlers away. There is barely a week passes but that some one calls my attention to some complaint that some bona fide settler has made.

I know the character of the land in the Arkansas National Forest, for I have driven through it, and I know that the great bulk of the timbered lands of these reserves are held by the railroads and large timber companies, and that practically all of the Government land that is left is suitable for agricultural purposes and is of the same type of land as that upon which a great many settlers in these very communities have made their homes during the past 50 years. It is true that they are not homes of wealth and splendor; it is true that the farms are not level, large plantations. They are just the typical hill farms to be expected in a country of that kind, and good men have tilled such lands, made their homes, brought up their children, and given to the country the development with which it is now blest.

Mr. Chairman, it is with such people and in such humble homes as these that real patriotism is born. Patriotism does not always abide in palaces, but can always be found in the woods and fields, by the lakes and streams, among the humble farmers, who love their homes and fear and serve their God and are devoted to their country.

The CHAIRMAN. The question is on the motion of the gentleman from Arkansas to strike out the paragraph.

The question was taken; and on a division (demanded by Mr. WINGO) there were 16 ayes and 24 noes.

So the motion to strike out was rejected.

Mr. WINGO. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

That the Executive orders and proclamations setting apart and reserving certain lands in the State of Arkansas, known and designated as the Arkansas National Forest and the Ozark National Forest, as forest reserves be, and they are hereby, suspended, vacated, set aside, and held for naught as to all public lands now included in said reserves which are suitable for agricultural and fruit-growing purposes, and said public lands be, and they are hereby, excluded from said forest reserves and are hereby restored to the public domain as though said orders and proclamations had not been issued.

Mr. LEVER. Mr. Chairman, I make a point of order to that amendment.

Mr. WINGO. Mr. Chairman, there is a difference between this amendment and the former amendment. The gist of this amendment is that all public lands within a public reserve suitable for agricultural purposes shall be eliminated from the reserve. That is the only way you are going to carry out the law now existing—by a special declaration by Congress eliminating the land from the reserve.

The CHAIRMAN. The Chair will ask the gentleman if he does that will he not change existing law?

Mr. WINGO. No; it would be enforcing existing law by eliminating certain lands which the law has said the officers shall eliminate and which they have not done and which they admit they have not done. It is not change of existing law; it is a declaration directing administrative officers in a specific case to enforce the general statute.

Mr. ANDERSON. Will the gentleman yield?

Mr. WINGO. Yes.

Mr. ANDERSON. May I ask the gentleman a question? Of course the Forestry Service or no other Government official would be authorized to issue a patent for these lands or take any action which would take the title of the lands out of the United States without legal authority, which I take it this amendment tends to give, and if it does, then it changes the existing law.

Mr. WINGO. No; here are certain lands admitted to come within the act of 1906 with reference to the elimination of agricultural lands in the reserve. It is admitted that certain lands within those forest reserves are agricultural lands. All my amendment does is to change the present status; it does not change the present law, but the present status. They are not open to entry until the administrative officers charged by law with the duty formally by an order eliminate them and carry out the law. Then they are open to entry. Now they have not made that formal order. This is an instruction to the officers in certain specific cases to carry out the law.

Mr. LEVER. Does not the gentleman admit that under the act of 1906 the discretion of elimination is lodged in the Secretary of Agriculture? In this amendment it takes away from him that discretion, and therefore changes existing law.

Mr. WINGO. No; this does not do that; the discretion is to determine whether it is agricultural land. He has no discretion as to elimination, but once it is determined that the land is agricultural, under the act of 1906, it is his duty to eliminate it. This does not undertake to take away the discretion that requires him to exercise his discretion. It requires him to carry out the result that would naturally flow from the exercise of that discretion. He admits they are agricultural lands, and this says that you must eliminate the agricultural lands, because the law says that they shall be eliminated. It does not change the law. It says that you must carry out the law in a specific case.

Mr. LEVER. If the Chair pleases, it seems to me from the very statement of the gentleman from Arkansas that this amendment is subject to a point of order. Under the act of 1906 the Secretary of Agriculture is authorized to investigate to ascertain if certain lands are agricultural or nonagricultural. When he has made a determination of that fact it is within his discretion to certify that fact to the proper authority. Now, by this amendment we undertake to take away from the Secretary of Agriculture the discretion in the premises, and to that extent it is a change of existing law. It is legislation upon an appropriation bill.

The CHAIRMAN. The Chair understands, not having the act of 1906 before him, Congress gave to the executive officer the right to withdraw certain lands as forest reserves. Now he has that right under the law.

Mr. ANDERSON. Mr. Chairman, a parliamentary inquiry. I desire to make an additional point of order that the amendment is not germane to the paragraph. The paragraph merely appropriates money for a specific purpose. It is, as I understand it, to care for this particular forest, while the amendment of the gentleman from Arkansas is a very different proposition.

Mr. WINGO. Mr. Chairman, upon that point the public records show, to which I have called the attention of the committee, that if this law is carried out and my amendment adopted it will absolutely eliminate the expense embodied in this item. It will eliminate the amount carried there, because the public records show that the lands are admittedly and confessedly agricultural lands, a great majority of them, and it does not require any far-fetched conclusion that if you eliminate the greater part of the reserve you reduce the expense of the reserve from this item which is under consideration.

Mr. STAFFORD. The gentleman does not contend that to an item that has for its object the expense of maintenance it is germane to offer an amendment that required the opening of this land to settlement?

Mr. WINGO. It would if it reduced expenses.

Mr. STAFFORD. Not at all. Under the Holman rule the amendment must be germane.

Mr. LEVER. Mr. Chairman, I read the law. On page 137 of the Laws Applicable to the Department of Agriculture we find the following:

That the Secretary of Agriculture may, in his discretion, and he is hereby authorized, upon application or otherwise, to examine and ascertain as to the location and extent of lands within permanent or temporary forest reserves, except the following counties in the State of California, etc., which are chiefly valuable for agriculture, and which, in his opinion, may be occupied for agricultural purposes without injury to the forest reserves, and which are not needed for public purposes, and may list and describe the same by metes and bounds, or otherwise, and file the lists and descriptions with the Secretary of the Interior, with the request that the said lands be opened to entry in accordance with the provisions of the homestead laws and this act.

Mr. HAWLEY. Will the gentleman yield?

Mr. LEVER. Yes.

Mr. HAWLEY. The present law is permissive to the Secretary and invests a discretion in him.

Mr. LEVER. Exactly.

Mr. HAWLEY. The proposed amendment is mandatory and takes away his discretion of the former law, and therefore changes existing law.

Mr. LEVER. That is the position I have been taking all the while.

The CHAIRMAN. That is what the Chair was proceeding to state a while ago when interrupted. It seems to the Chair under existing law the Secretary of Agriculture has the right to withdraw such lands as in his opinion comes within the provisions of this statute. Now, the amendment provides that certain lands which in the opinion of some one else might be agricultural lands shall peremptorily be withdrawn or excluded from the withdrawal heretofore made by the Secretary of Agriculture——

Mr. LEVER. In his discretion.

The CHAIRMAN. In his discretion; and it appears to the Chair it would be a change of existing law. The Chair therefore sustains the point of order.

MESSAGE FROM THE SENATE.

The committee informally arose; and Mr. HENRY having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had insisted upon its amendments to the bill (H. R. 19422) making appropriations to provide for the expenses of the Government of the District of Columbia for the fiscal year ending June 30, 1916, and for other purposes, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. SMITH of Maryland, Mr. LEA of Tennessee, and Mr. GALLINGER as the conferees on the part of the Senate.

AGRICULTURAL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

Chelan National Forest, Wash., $6,260.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word for the purpose of asking if I may insert as a part of my remarks a statement in regard to the receipts and expenses of the Chelan National Forest, Wash., and all the other forest reserves of that State.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington to inserting the matter which is indicated? [After a pause.] The Chair hears none.

Mr. JOHNSON of Washington. Also a large table showing the receipts and expenditures in the entire service for the last five years.

The CHAIRMAN. Is there objection?

Mr. STAFFORD. Reserving the right to object to the last request, does the gentleman mean to embody in the RECORD a statement of the expenditures of the forest reserves as included in this statement from the Department of Agriculture?

Mr. JOHNSON of Washington. For several reserves in the State of Washington only.

Mr. STAFFORD. I have no objection.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Michigan National Forest, Mich., $3,081.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word in order to say a word in reference to the Michigan National Forest. The statement has been made by the gentleman from Michigan [Mr. MCLAUGHLIN] that the amount received by the States for roads and trails is too large. I desire to call attention to the expenditures for the Michigan National Forest:

Michigan National Forest (Mich.).
[Area, 131,928 acres.]

Total expenditures	$9,014.29
Outstanding liabilities, Aug. 31	11.21
Total allotment	9,025.50
Distributed among the several subactivities approximately as follows:	
Ordinary current expenses	$6,437.23
Fire and other emergency	327.66
Planting on national forests	1,385.15
Improvements	873.15
Roads and trails for States	2.31
Total	9,025.50

RECEIPTS FROM NATIONAL FOREST RESOURCES.

Timber sale	$113.20
Occupancy trespass	140.00
Special use	61.50
Total	314.70

There is one case where the tremendous amount of $2.31 is set aside for roads and trails in a reserve comprising 131,928 acres.

Mr. FORDNEY. I would like to ask the chairman a question. I have lived in the State of Michigan for 45 years and I have never heard of a national forest reserve in that State. Where is it?

Mr. LEVER. Which line is it?

Mr. JOHNSON of Washington. Line 19, page 32, is an appropriation of $33,081 for Michigan National Forest.

Mr. LEVER. I really can not tell the gentleman what part of the State it is in.

Mr. FORDNEY. I never heard of one in the State before.

Mr. HAWLEY. It has 132,000 acres.

Mr. FORDNEY. That acreage extends from the middle of the southern peninsula of the State to the extreme northwestern part of the upper peninsula. There may be 40 acres of land here and there on a lake or fraction on a river bank, but there is not 160 acres of Government land in any single body in the State that is worth a penny an acre.

The Clerk read as follows:

Nebraska National Forest, Nebr., $5,897; and to extend the work to the Niobrara division thereof, $5,000: *Provided*, That from the nurseries on said forest the Secretary of Agriculture, under such rules and regulations as he may prescribe, may furnish young trees free, so far as they may be spared, to residents of the territory covered by "An act increasing the area of homesteads in a portion of Nebraska," approved April 28, 1904, $10,897.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] reserves a point of order on the paragraph.

Mr. STAFFORD. What is the character of the extension work on this Niobrara branch of the Nebraska National Forest?

Mr. LEVER. I will yield to my friend from Nebraska [Mr. KINKAID], who is responsible for that item being put in the bill many years ago.

Mr. STAFFORD. I was not aware of the fact that my very distinguished friend from Nebraska was a member of this committee.

Mr. KINKAID of Nebraska. I am not. I thank the gentleman for his undeserved compliment.

Mr. STAFFORD. It could not be undeserved.

Mr. KINKAID of Nebraska. There are two national forest reserves, or two units of the Nebraska National Forest Reserve, and they are a considerable distance apart—say 150 miles. Now, at one of them, the Halsey unit, a pine-tree nursery has been maintained for a number of years, and young pine trees have been furnished free from it to the settlers who will plant them.

The administration of the Department of Agriculture under the direction of Secretary Wilson adopted the idea suggested by me that it would be economical to allow settlers to grow trees, as this would result in a reduction in expenditures hitherto made in tree planting by Government employees; consequently for several years settlers have been planting the young trees furnished them by the Government nursery operated on the Halsey unit. This extension is for starting a nursery for the growing of pine trees on the Niobrara unit of the Nebraska National Forest Reserve, which is situated over 100 miles from the Halsey unit.

Mr. STAFFORD. Is the purpose of the $5,000 appropriation to establish nurseries?

Mr. KINKAID of Nebraska. Yes. That is to establish a nursery, and it is to save the expense of transporting trees from the south part of the State, where the Halsey Reserve is, to the northern part of the State, where the Niobrara unit is.

Mr. STAFFORD. What is the need of having two nurseries in the same State for the same purpose?

Mr. KINKAID of Nebraska. The object is to grow trees in a nursery on the Niobrara Reserve whereby to reforest the area of 125,000 acres contained in the tract. Trees will be planted on this reserve and by settlers in the country tributary thereto the same as trees have been planted on the Halsey unit and its vicinity farther south.

Mr. STAFFORD. I assume that there has been no merchantable timber cut on this forest reserve within the memory of man?

Mr. KINKAID of Nebraska. No; there was but little timber in the first place, but the purpose here is to experiment on the forestry of the sand hills of Nebraska, where mostly no trees were formerly grown.

Mr. STAFFORD. Is it expected that there will ever be any merchantable timber grown there in the memory of man?

Mr. KINKAID of Nebraska. Yes; it is; and a fine showing is already being made. The indications are that it would be a very good long-time investment for the Government to make to grow trees in this way.

Mr. STAFFORD. I wish the gentleman would direct his remarks to the need of establishing another nursery on the sand hills and sand plains of Nebraska.

Mr. KINKAID of Nebraska. I answer the gentleman from Wisconsin the economy will consist in the saving of transportation cost of shipping young trees from the south part to the north part of the State. The roundabout way the railways run makes the distance about 800 miles, besides having to haul a considerable distance from railway stations to the Niobrara unit. It will not cost as much to establish and maintain the nursery as it would to transport the trees from the other nursery—the trees that are demanded for planting on that reserve and in its vicinity by settlers.

Mr. STAFFORD. Can the gentleman tell me the maximum amount of expense that will be required to maintain this nursery?

Mr. KINKAID of Nebraska. The expense will be very much reduced after the work has been started.

Mr. STAFFORD. How much money will be required to be invested to establish this additional nursery?

Mr. KINKAID of Nebraska. The amount proposed will be adequate, it is believed, and that will erect buildings which will be permanent, and hereafter the expenses will only be for operating the nursery, and will be greatly reduced below the present amount.

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the gentleman from Nebraska may proceed for three minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. STAFFORD. Then I understand the maximum expense for this additional nursery in Nebraska will be $5,000 for the construction of buildings. Thereafter it will occasion how much expense to maintain it?

Mr. KINKAID of Nebraska. It will be very much less, I apprehend. I think it will not be more than $2,000 after that, and even that amount may be reduced gradually after that.

Mr. STAFFORD. Mr. Chairman, I recognize that they certainly need trees out in Nebraska. I have been out in these Western States and have seen some of the tree claims in the Dakotas. I am quite skeptical as to whether they will ever be able to grow trees there. But I take the word of the distinguished gentlemen, who has done so much to make a garden spot of the sand spots of Nebraska, and give him the benefit of the doubt, and therefore I withdraw the point of order.

The CHAIRMAN. The gentleman from Wisconsin withdraws the point of order.

Mr. JOHNSON of Washington. Mr. Chairman, I notice that last year the planting of trees on the Nebraska National Forest cost $13,936. Does not the gentleman think that an additional nursery will cost that much more in the next bill?

Mr. KINKEAD of Nebraska. Oh, no. That cost was chiefly for buildings.

Mr. JOHNSON of Washington. Will it not be necessary to place mosquito netting and wire netting there to protect seeds and trees?

Mr. KINKAID of Nebraska. No; I think not.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Oregon National Forest, Oreg., $12,963.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Washington moves to strike out the last word.

Mr. JOHNSON of Washington. Inasmuch as I am familiar with the Olympic Forest Reserve, it being one of the three large reserves in my district, I want to call the attention of the House to the expense and distributions in this reserve, where it is conceded there is the heaviest body of standing timber in all the United States:

Olympic National Forest, Wash.

[Area, 1,652,000 acres.]

Total expenditures	$29,485.65
Outstanding liabilities, Aug. 31	25.09
Total allotment	29,510.74
Distributed among the several subactivities approximately as follows:	
Ordinary current expenses	$23,864.73
Land classification	48.82
Fire and other emergency	463.28
Improvements	5,133.91
Total	29,510.74

RECEIPTS FROM NATIONAL FOREST RESOURCES.

Timber sale	$8,659.67
Timber settlement	2,400.00
Grazing	6.50
Special use	521.00
Water power	86.00
Total	11,673.17

Mr. Chairman, in the arguments which are used in supporting this bill great stress is always laid on the sums to be spent for land classification—that is, the effort to find homestead and agricultural land which will be good for settlers. The promise has been made to the people in the Olympic Peninsula for a great many years that they would not only have roads through this great reserve, which obstructs travel in every direction, but that they would have land classification.

The area of this reserve is 1,600,000 acres, fully as large as some New England States. The expenditures last year on this great reserve were $29,400, divided as follows: Ordinary current expenses, $23,000—that is, for rangers and other agents in a little kingdom not subject to any of the laws or rules that govern the United States outside, not controlled by the governor of the State or the legislature of the State. For land classification, concerning which so much is said in the hearings, there was spent $48; for fire and other emergencies, $463. And I should like to say that this is one of the reserves where we do have forest fires; and in spite of the trails that are made by the rangers to shut off the fires, the flames often leap half or three-quarters of a mile and start a fire in an entirely different locality. It only cost the Government $463 for fire protection. For improvements the sum of $5,133 was expended. The improvements, I presume, consisted of erecting telephone lines, maintaining pack trains, and building ranger stations, lookout stations, and so on. Not one cent of the 10 per cent fund which is supposed to go to the State to be spent for roads and trails in the forest reserve was spent for that purpose in this reserve.

There was received from sales in that reserve $11,600. That reserve covers a good portion of four very large counties. Under the 25 per cent distribution the four counties would have received altogether not as much as $3,000 in lieu of what they might have received from settlers coming in and from the taxation of the property and the growth and improvement of a locality that has been choked and starved.

It is interesting to note that under this 10 per cent fund there have been constructed, according to a report issued a year or so ago, in the State of Idaho 9 miles of roads and 37 miles projected; in Montana, 59 miles constructed and 96 miles projected; in North Dakota, 1½ miles constructed and 1½ miles projected; in South Dakota, 14 miles constructed and 14 miles projected; in the State of Washington, with 11,000,000 acres in reserve, 1½ miles constructed and 13 miles projected; in Colorado, 40 miles constructed and 73 miles projected; in Kansas, 1¼ miles constructed and 4 miles projected; in Michigan, nothing; in Minnesota, 4 miles projected; in Nebraska, 1¼ miles constructed and 2¾ miles projected; in South Dakota, 5 miles constructed and 35 miles projected; in Wyoming, 13 miles constructed and 60 miles projected.

Mr. J. M. C. SMITH. Can the gentleman tell why they have constructed no roads on the Michigan forest reserves?

Mr. JOHNSON of Washington. I presume that with a forest reserve stretched over the entire two peninsulas the road would have to be pretty thin under the 10 per cent that is allowed for construction.

The CHAIRMAN. The time of the gentleman has expired.

Mr. JOHNSON of Washington. The general table of receipts and disbursements in the forest reserves to which I have referred follows:

Statement of receipts and disbursements, all national forests in the United States, fiscal year beginning July 1, 1905, and ending June 30, 1913.

	1906	1907	1908	1909	1910	1911	1912	1913
National forests resources, net receipts	$763,533.01	$1,530,321.88	$1,788,255.19	$1,766,088.46	$2,041,181.22	$1,968,993.42	$2,109,256.91	$2,391,920.85
Paid to Arizona and New Mexico for schools					815.48	30,434.16	36,087.75	45,547.30
Paid to States for roads and schools, 10 and 25 per cent of receipts	75,510.19	152,665.04	444,379.00	438,702.81	505,990.87	474,767.64	506,603.58	586,593.39
Roads-and-trail fund							207,304.66	234,638.68
DISBURSEMENTS—FORESTS.								
Administration and use	573,437.82	918,287.27	1,622,413.17	2,093,781.68	2,791,275.62	3,395,730.77	2,933,453.55	3,057,546.38
Improvement	23,521.28	74,672.55	551,938.00	564,105.06	571,242.72	265,981.87	994,921.78	812,256.78
Fire	16,322.72	10,583.69	11,536.10	71,579.33	71,056.84	1,059,590.89	240,490.74	95,867.16
Total on national forests	613,281.82	1,003,543.51	2,185,887.27	2,729,466.07	3,433,575.18	4,721,303.53	4,168,866.07	3,965,670.32
Inspection, etc., properly chargeable as national-forest cost	343,717.85	534,875.80	932,379.94	825,429.96	917,577.37	888,217.86	1,048,961.44	1,049,961.44
Forest investigation	233,428.76	281,693.88	328,609.73	357,974.44	343,439.71	310,418.57	312,332.05	333,517.36
Total for Forest Service work	1,190,428.43	1,820,113.19	3,446,876.94	3,912,870.47	4,694,592.26	5,919,939.96	5,530,219.56	5,348,325.81

The Clerk read as follows:

Ozark National Forest, Ark., $9,030.

Mr. JACOWAY. I move to strike out the paragraph.

The CHAIRMAN. The gentleman from Arkansas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 33, by striking out line 18.

Mr. JACOWAY. Mr. Chairman, I do not think I will detain the committee the full time allotted me under the rule, but I have some observations I want to submit. I believe that if the people living within the Ozark and Arkansas reserves were allowed to vote upon this proposition 90 per cent of them would cast their vote in favor of abolishing both of them. Ever since I have been a Member of this body I have been in favor of abolishing both the Arkansas and Ozark reserves. One of the first bills introduced by me had for its purpose the repealing of the law creating these reserves. At each succeeding Congress I have reintroduced this bill, hoping the committee would report it favorably. There have been extensive hearings on this question, as will be shown in House reports. These hearings were had May 18, 20, 21, 23, and 24, 1910. If Congress will avail itself of the opportunity to read these hearings, I feel morally sure it will be unerringly drawn to the conclusions I entertain on the question. At this time I wish to add that my colleague [Mr. FLOYD of Arkansas] on February 11, 1910, introduced a bill to abolish the Ozark National Forest. He has at each subsequent Congress introduced bills for the same purpose, and has a bill pending now before the Public Lands Committee. He and I have worked assiduously at all times for the abolishment of both the Arkansas and Ozark National Forests. It is my purpose to continue these efforts, fully believing that soon the Congress will give the people who have their homes in these reserves, and those that are desirous of homesteading, the relief that they seek and which justice demands they should have.

When I state to the committee that I am constantly in receipt of letters from people who reside within these reserves reciting how in the administering of the policy of the forestry reserves they are harrassed and bothered and various and sundry injustices done them, I state that which is in every sense absolutely true. I will not encumber the RECORD nor trespass upon the patience of the committee by giving at this time a detailed statement of all these many complaints; my time will not permit. However, for the benefit of the committee I ask to read a dramatic instance bearing directly upon this matter and that occurred in the United States Federal Court, at Fort Smith, Ark.:

A DRAMATIC INCIDENT IN FEDERAL COURT ROOM.

A dramatic incident occurred in Federal court Saturday in the trial of the case in which the Government sought to recover damages from Thomas A. Johnson on a charge of removing timber from a homestead. The incident was one in which every homesteader in the district and every person interested in the work of the Government foresters is interested.

Thomas A. and Thomas H. Johnson, of Scott County, were both tried during the week on the above charge; and the two cases have taken up the larger portion of the court sessions for the week. Saturday the defendant was on the stand and his counsel was asking questions for the purpose of getting before the jury the history of defendant's homestead.

When reprimanded by the court for the indirection of queries, the counsel reminded the court that he was following the line of questioning assumed for the Government, when Judge Rogers sharply questioned the methods of counsel on both sides, declaring that counsel had consumed the time of the court for a day and half when witnesses might have told all they knew of the case in two hours; and the judge then took the defendant in hand himself.

It was evident that the defendant, a young farmer, was innocent of any knowledge of court procedure and somewhat in awe of his surroundings; but the judge quickly relieved him of his embarrassment and within half an hour had drawn from the witness an outline of his homestead history.

It was a picture of a young man with wife and child, who started out to make a home for himself by taking up a homestead near the home of his father. Clearing the timber little by little; his young wife and baby living with him in the little log house from period to period as the work of putting the tract in cultivation progressed; frequently going back to father's for short periods; father helping son on the homestead and son helping father at other periods. Small crops and timber exchanged for fence wire, team, wagon, and implements from time to time as exigencies permitted, always with the aim to build a home. After a struggle extending through three years $200 was paid to the Government and $15 fees out of money the young man had accumulated, pieced out with loans borrowed from father.

After the judge had drawn out the whole story, the judge remarked: "That is all. Has the defense any further questions?" Defendant's counsel had the wisdom to see that the court had made his case for him and rested. The prosecuting attorney asked permission to cross-examine. After two or three questions on other points, the witness was asked:

"What did you do with the brush on the land from which timber was cleared?"

"I burned part of it and part is still in piles."

"Is it not a fact that you did not pile and burn any brush until ordered to do so by the forester?"

The witness replied that it was not; but the proceedings were instantly halted by the remark of the court:

"The forester had no business to give any such orders. Homesteaders are not in the keeping of the Forestry Department; nor has that department anything to do with this suit. It is in charge of this Federal court district."

The court also made some sharp comments upon forestry-law complications and the institution of "pestiferous suits" which harass families actually seeking to make homesteads, who are entitled to the support and assistance of the Government; and called attention to the fact, that in the case at bar, the evidence showed that the making of that homestead has been held up for nearly three years, while the Government has retained the $215 the defendant had paid, and has hampered the defendant in his effort to make a home for himself, wife, and child.

Both prosecution and defense quickly announced their case closed, and the court laconically remarked: "Go to the jury."

The jury were out of the room just four minutes when they returned a verdict of not guilty. In discharging the jury, the court said:

"I feel that it would not be doing justice, to close this case without saying that, for the Government to forfeit this man's homestead under the showing made here, would be a fraud and an injustice. This case should never have been brought into this court. It has cost the Government fully $1,000 in jury and witness costs and in holding back other cases with their witnesses for the larger part of the week; and if it had been brought on adequate grounds the Government could have won a verdict of not over $200. There should be distinction made between the man who deliberately undertakes to take advantage of the homestead laws for his own profit and the man who, with honest intention to secure a homestead, may technically violate some of the timber provisions. The Government is solemnly bound in duty to aid the man who, under the homestead law, seeks to establish a home, and not, instead, to harass and hamper him."

This pathetic story is but one of many.

I desire to further call the attention of the committee to the privately-owned lands in the Ozark Reserves. Every alternate section of land in the counties of Stone, Van Buren, Cleburne, Pope, Yell, and Perry is owned by the Missouri Pacific Railroad Co., except in those instances where the railroad company has sold it. To give the committee fuller information I will read a letter from the Secretary of the Interior.

OZARK NATIONAL FOREST.

DEPARTMENT OF THE INTERIOR,
Washington, April 9, 1910.

SIR: In compliance with the provisions of House resolution of March 7, 1910, by direction of the President I have the honor to submit the following data relative to lands in the Ozark National Forest, in the State of Arkansas:

First. The number of acres of land embraced within the exterior boundaries of the said national forest—1,526,481.

Second. The total number of acres included therein, the title to which has passed to private ownership—779,615.

Third. The total number of acres held therein by claimants under the land laws—222,806.

Fourth. The number of entries, the acres included therein, within the said national forest which have been suspended, the reason for the suspension, and the sources from which adverse reports in regard to the entries have been received, and whether or not adverse reports of the Forestry Bureau have been accepted as sufficient to warrant the suspension of entries and, in any case, conclusive as to their invalidity; also for what length of time entries have been suspended or patents denied, and what steps have been taken to determine the rights of entrymen thus questioned:

	Number of entries.	Acres.
Total entries of all kinds affected by adverse reports since creation of forest	167	24,011
Entries in which final proof was never submitted by the entrymen	107	14,120
Entries in which proof was submitted and certificate withheld pending investigation	30	5,861
Entries in which proof was made and final or commutation certificate issued and patent withheld pending investigation	30	4,060
Total	167	24,011

Adverse reports by forest officers	149
Adverse reports by special agents of this department	18

Entries against which this department directed proceedings on adverse reports charging lack of residence or cultivation, or both, and in a few cases also that entries were made for timber, as follows:

Entries, no proof made	84
Proof made, certificate withheld	10
Final or commuted entries	19
Mineral applications (charge lands not mineral in character)	4
Total (16,641 acres)	117

Status of above 117 entries:

Canceled for failure to deny charges and apply for hearing	27
Relinquished by claimants	19
Pending report from local officers	60
Hearings had, local officers' decisions adverse to claimants	9
Decisions of local officers in favor of entrymen	2
Total (16,641 acres)	117

Entries against which no proceedings have been ordered, as follows:

Adverse reports—entries relinquished by claimants before proceedings were ordered	6
Adverse reports—entries canceled for failure to make proof within statutory period	7
Adverse reports—entries held for cancellation on face of proof—reports not invoked—pending register and receiver's reports	7
Canceled on face of proof, reports not invoked	3

Final entries and entries in which proof has been made, awaiting report from Forester	11
Forest officers' adverse reports—to special agent to investigate	2
Adverse reports pending office action	9
Suit against patent	1
Total (7,400 acres)	50

The Forest Service has the privilege of investigating every entry within a national forest to determine its bona fides, if it so desires, and proofs and entries when protested by that bureau are held without action awaiting report. Its adverse reports are not conclusive as to the invalidity of an entry, but such reports are considered by this department in connection with the entry record, and if the reports are deemed sufficient action is taken against the entries thereon. If the reports are found insufficient, the Forester is so advised, and that favorable action will be taken upon his failure to submit sufficient adverse report.

The final and commutation proofs and the final and commutation entries above set forth in detail, 60 in all, were in nearly every case submitted and made during the years 1908 and 1909. One of the proofs was made in 1906 and 2 in 1907, while 1 of the final entries was made in 1905, 2 in 1906, and 6 in 1907. All of the final and commutation entries were protested within two years from the date of final certificates.

When proceedings are ordered against an entry on an adverse report, the entryman has 30 days within which to deny the charges and apply for a hearing. If he takes this action, a hearing is duly arranged, and if testimony is submitted a decision is rendered thereon by the local land officers. Their decision and the testimony are then transmitted to the General Land Office and decision rendered on the record. If the decision of the General Land Office is adverse to the entryman, he has the right of appeal to this department.

Fifth. "What information, if any, your department has of any applications which may have been made for listing any of said lands in said national forest as agricultural lands, what applications have been acted upon, and what granted or refused?"

The Department of Agriculture has, to date, filed with this department 48 lists of agricultural lands within the Ozark National Forest, listed under the act of June 11, 1906 (34 Stat., 233), embracing a total of 1,670 acres. Forty-four of these lists have been opened to entry under said act, representing 1,550 acres. Action has not yet been taken on the remaining 4 lists.

The matter of the examination and listing of lands under said act is exclusively within the jurisdiction of the Department of Agriculture, and applications for such listing being made to the Forest Service, the Department of the Interior has no knowledge as to what percentage of such applications is allowed.

Sixth. The number of acres of lands in private ownership, the number covered by claims, and those unentered under the land laws embraced within the boundaries of said national forest lying within each of the counties of Stone, Van Buren, and Cleburne, in said State:

Stone County:	Acres.
Lands in private ownership	147,964
Lands covered by claims	60,621
Restored under act of June 11, 1906	60
Withdrawn for use of Forest Service as administrative site	160
Unappropriated lands	102,261
	311,066

Van Buren County:	
Lands in private ownership	152,281
Lands covered by claims	37,276
Restored under act of June 11, 1906	551
Withdrawn for use of Forest Service as administrative site	160
Unappropriated lands	85,272
	275,540

Cleburne County:	
Lands in private ownership	37,149
Lands covered by claims	17,673
Unappropriated lands	20,428
	75,250

Very respectfully,

R. A. BALLINGER, *Secretary.*

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

As stated in this letter, we find that these 1,526,481 acres of land are embraced within the exterior boundaries of the said national forests. Out of this number 779,615 acres have passed to private ownership. The total number of acres held therein by claimants under the land laws is 222,806 acres, leaving 524,060, or about one-third of the total number of acres embraced within the exterior boundaries of this national reserve.

Can it be honestly argued that the Federal Government has any jurisdiction over the land in these forest reserves the title to which has passed years since from the Government to private individuals? Yet in a most decided sense does the Forestry Bureau arrogate to itself this unwarranted function. Again, can it be contended that there is any duty devolving upon this Government to look after, protect, and conserve the many thousand acres of land owned by the Missouri Pacific Railway Co. even should it be the desire of this corporation? I think not. The people who live in these reserves and who know of these conditions, and who are as honest and reliable as any citizenship, in great numbers say that these are the conditions. To a most marked degree these facts are borne out in the letter of the Secretary of the Interior which I have just read.

In my judgment the administering of the forestry laws, in so far as Arkansas is concerned, is a dismal and signal failure, and the law should be repealed, and at once.

I feel that the bills seeking to abolish the Arkansas and Ozark Forest Reserves should be favorably reported and speedily passed by Congress.

ARE THE FOREST RESERVES IN ARKANSAS A BUSINESS PROPOSITION?

The agricultural bill as it passed the House in 1910 carried an appropriation of $32,960 for the Arkansas National Forest and $29,961 for the Ozark National Forest, making a total of $62,921 for maintaining these two reserves. As shown in a letter from Hon. Willis L. Moore, Acting Secretary Department of Agriculture, we find that the total income to the Government from these two reserves for the year 1910 was $6,346.98. Under the law 25 per cent of this amount went to the public schools and public roads of the county or counties in which the forest reserve is situated. In other words, out of the total revenues of $6,346.98, $1,586.74 went to the credit of these funds, leaving a balance of $4,760.34 to go to the credit of the Federal Government. In other words, it cost the taxpayers of this Government $58,160.66 more to maintain the Ozark and Arkansas Forest Reserves during the year 1910 than the Government secured from all sources in these reserves; that these forest reserves, in so far as Arkansas is concerned, are failures; that the Forest Service as administered in them is annoying and harrassing to the people residing therein. Attention is again called to the hearings bearing directly on this question.

I know many of the gentlemen connected with the Bureau of Forestry and regard them as high-grade men. I have no quarrel to wage with them on any of their policies as affecting any other portion of this country except in my own State. I am not informed as to conditions in other States. Neither, Mr. Chairman, would I stand upon this floor and try to impede, hobble, or trammel any movement that is of a progressive nature. I had rather lend my limited ability to the processes of construction than those of destruction.

In the counties of Franklin, Johnson, Pope, Yell, and Perry, as well as in other counties affected by these reserves, are a class of people just as honest, just as capable and progressive as will be found anywhere. These people are longing for the day to come when they can be rid of the rules, regulations, and laws governing these reserves. The honest homesteader wants to found his home upon these lands that are withheld from entry in so far as practical purposes are concerned. The State of Arkansas invites this class of citizenship to make their homes within her boundaries, and to this end this Government should repeal the law creating these reserves and to permit a development for Arkansas to move forward unimpeded that is now denied her as a result of creating these two reserves. Again, I say, I have no war to wage with the Forestry Bureau as to their general policy as it affects other portions of the country, but in so far as Arkansas is concerned I take serious issue with this department, and measure my words when I say that in so far as the Forestry Service as administered in the Ozark and Arkansas reserves is concerned it is a dismal and signal failure, and on account of the very nature of things can never be made otherwise. [Applause.]

The CHAIRMAN. The question is on the motion of the gentleman from Arkansas to strike out the paragraph.

The question being taken, on a division (demanded by Mr. JACOWAY) there were—ayes 22, noes 27.

Accordingly the amendment was rejected.

The Clerk read as follows:

For necessary miscellaneous expenses incident to the general administration of the Forest Service and of the national forests specified above.

Mr. GOULDEN. Mr. Chairman, I move to strike out the last word for the purpose of securing some information. We have now finished up the forest reserves, with some of which I am familiar. The amount appropriated here, as I understand, is the gross amount. How much revenue is there to offset that?

Mr. LEVER. Yes; there is.

Mr. GOULDEN. Approximately about how much?

Mr. LEVER. About $2,400,000. That goes into the Treasury as miscellaneous receipts.

Mr. GOULDEN. And is therefore a credit against the amount appropriated to maintain the forest reserves?

Mr. LEVER. Yes.

Mr. CARTER. Of what do those receipts consist; what produces them?

Mr. LEVER. Sales of timber and grazing mostly.

Mr. CARTER. Do any of the proceeds go to the different States?

Mr. LEVER. Oh, yes; I think about 40 per cent, now.

Mr. JOHNSON of Washington. Twenty-five per cent is returned from the United States Treasury to each county, according to its proportion in the reserve where the sales have been

made, and then 10 per cent of the forest-reserve receipts is set aside for use in some reserve or reserves in the State where the money originated. This is controlled further by the forest-reserve management. There are eight reserves in my State. Ten per cent of all the receipts in all the reserves can be spent for roads in any one of the reserves.

I said a moment ago that in the Olympic Reserve of the sales amounting to $12,000 there would come back $3,000. I should have said that that $3,000 is to be divided among four counties.

Mr. CARTER. The four counties get how much back?

Mr. JOHNSON of Washington. On the $12,000 sales from timber and grazing and fines, the four counties altogether, 25 per cent. That, of course, must be divided among the four counties. It will average about $900, but it may run down in the case of one county to $300 and in another up to $1,200. It runs down so small that it is not the equivalent that it should be for taxes, considering the enormous area involved.

Mr. CARTER. How much land is there in the reservation?

Mr. JOHNSON of Washington. One million six hundred thousand acres, and 33,000,000,000 feet of timber.

Mr. CARTER. So the four counties get $3,600?

Mr. JOHNSON of Washington. No; $3,000. And that must be divided among the four counties. The hope is held out every year that it is going to something worth while, but it never is.

Mr. LENROOT. Will the gentleman yield?

Mr. JOHNSON of Washington. Yes.

Mr. LENROOT. Can the gentleman tell how much this particular forest service costs the county?

Mr. JOHNSON of Washington. Year before last it cost the county $100,000 to build a trunk wagon road that the United States Government would not build, and I never have been able to figure out why the people in my State and county should have built it.

Mr. LENROOT. Was it built for the benefit of the reserve?

Mr. JOHNSON of Washington. It was built for the benefit of a handful of settlers that went there before the reserve was established.

Mr. LEVER. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by printing a table of school, road, and trail money for States from receipts' fund.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The following is the matter referred to:

SCHOOL, ROAD, AND TRAIL MONEY FOR STATES FROM RECEIPTS' FUND.

Under existing law, besides the 10 per cent of the gross receipts which is made available for expenditure by the Secretary of Agriculture in building roads and trails for the benefit of the public, another 25 per cent of the gross receipts is paid over to the States by the Federal Government for the benefit of county schools and roads. The amounts available under both the 10 per cent and the 25 per cent clauses of the law during the fiscal year 1914 and the amounts that will be available during the current year from the receipts of that fiscal year are shown below:

Amounts available for States from forest receipts.

State.	School and road moneys paid to States, fiscal year 1914.	School and road moneys payable to States, fiscal year 1915.	Road and trail moneys expendable by Secretary of Agriculture, fiscal year 1914.	Road and trail moneys expendable by Secretary of Agriculture, fiscal year 1915.
Alaska	$13,126.08	$14,692.09	$5,250.43	$5,876.83
Arizona	74,659.49	63,398.34	29,863.80	25,359.34
Arkansas	12,854.02	9,983.19	5,141.61	3,993.28
California	74,541.55	65,001.84	29,816.62	26,000.73
Colorado	54,922.64	56,340.42	21,969.05	22,536.17
Florida	3,250.51	3,959.41	1,300.21	1,583.76
Georgia		108.44		43.37
Idaho	78,163.90	59,227.81	31,265.56	23,691.12
Kansas	1,148.84	1,207.72	459.53	483.09
Michigan	65.43	78.68	26.17	31.47
Minnesota	201.63	538.72	80.65	215.49
Montana	65,238.15	93,586.06	26,095.26	37,434.42
Nebraska	3,098.59	1,064.38	1,239.43	425.75
Nevada	16,556.89	16,894.47	6,622.76	6,757.79
New Mexico	31,284.15	33,743.49	12,514.99	13,497.40
North Carolina		206.31		82.52
North Dakota	67.72	74.83	27.09	29.93
Oklahoma	673.20	638.87	269.28	255.55
Oregon	55,950.72	61,606.59	22,380.29	24,642.60
South Dakota	11,436.70	14,469.77	4,574.68	5,787.91
Tennessee		20.64		8.26
Utah	34,902.14	37,601.15	13,960.85	15,040.46
Virginia		613.00		245.20
Washington	33,109.69	35,637.54	13,243.88	14,255.02
Wyoming	21,341.35	28,578.50	8,536.54	11,431.40
Total	586,593.39	599,272.17	234,638.68	239,708.06

The States of Arizona and New Mexico received additional shares of national forest receipts for their school funds on account of school lands included within national forests, as follows: To Arizona, paid in the fiscal year 1914 from the receipts of 1913, $36,226.65, and payable from the receipts of 1914, $30,730.58; to New Mexico, paid in the fiscal year 1914 from the receipts of 1913, $9,320.65, and payable from the receipts of 1914, $9,890.94.

The Clerk read as follows:

In the District of Columbia, $131,970.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. Yesterday I submitted an inquiry to the chairman of the committee as to the amount of money that was to be paid from the lump-sum appropriation for this service here in Washington. According to the statement of expenditures in 1914 it amounted to $154,000. He stated that he did not have the data at hand, but would have it when the item was reached. Here we have a total in addition to the amount expended out of the lump-sum total of $498,000 for administration expenses; and then, just prior in the bill where you provide for draftsmen, photographers, artists, and so forth, an appropriation running into hundreds of thousands of dollars. I wish to inquire specifically if the chairman has the total amount appropriated or expended in any year for administration in connection with the Forestry Service?

Mr. LEVER. Heretofore that amount has been about 15 per cent of the total fund, exclusive of the statutory roll. Under the arrangement we have provided in this bill the total amount for administrative expenses will be the sum of these seven items under consideration.

Mr. STAFFORD. The gentleman does not catch the question. We have here a total appropriation of $498,000 for administration expenses.

Mr. LEVER. Where does the gentleman get that?

Mr. STAFFORD. That is the total of the six or seven items just read. Then previous in the bill we appropriate I do not know how many hundred thousand dollars in detail for draftsmen, artists, and various other administrative purposes. In other parts of the bill we have expenses for administration out of the lump-sum appropriation. What I want to know is what is the total amount for administration expenses in this branch of the service, both in the city of Washington and outside.

Mr. LEVER. I thought I answered the gentleman correctly before when I stated that heretofore the amount had been about 15 per cent of the total appropriation, exclusive of the statutory roll.

Mr. STAFFORD. What is the total expense from the statutory roll?

Mr. LEVER. I am sorry I can not give that to the gentleman offhand. I may be able to get it right here.

Mr. STAFFORD. I thought the gentleman had it. Does it not approach a half a million dollars?

Mr. LEVER. The administrative expenses will probably be about 10 per cent of the total, running up to about $500,000, both in Washington and outside.

Mr. MANN. What does the gentleman mean by administrative expenses?

Mr. LEVER. Well, I mean not salaries, not equipment, or things of that kind.

Mr. HAWLEY. Will the gentleman yield?

Mr. LEVER. I have a statement here in which it says:

Under administrative expenses are included the supervisory work, inspection work, general expenses connected with the accounting, and general expenses connected with legal work outside of the salaries of the law officers.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. I would ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. LEVER (continuing)—

In addition to that there is a considerable amount of concentration of routine processes at the headquarters, such as drafting and computing work, which are more cheaply done at one point than when scattered in the national forests. Those are what we include under the general heading of "General administration." This seems to be in the nature of supervisory work and accounting work.

Mr. MADDEN. What is the total amount of the appropriation for the Forest Service?

Mr. LEVER. About $5,000,000.

Mr. MADDEN. What are the receipts?

Mr. LEVER. I have answered about $2,400,000.

Mr. MADDEN. So there is still a loss of about $3,000,000?

Mr. LEVER. The excess of expenditures over receipts, as I recall it, is about $1,750,000 for the forests themselves, exclusive of scientific, technical, and other lines of work.

Mr. MADDEN. If the appropriations are $5,000,000 and the receipts are about $2,400,000, there is $3,000,000 difference.

Mr. LEVER. One million seven hundred and fifty thousand dollars would be the difference between the expenditures on the forests and the receipts from the forests.

Mr. MADDEN. I do not see how that is calculated, even with an appropriation of $4,800,000, and the amount only received is $2,400,000; that would still be $2,000,000 difference.

Mr. LEVER. The reporters took my book away, but I recall now that the $1,750,000 is the difference between receipts from the forests and the expenditures on the individual forests. The difference for the whole of the Forest Service is about $3,000,000.

Mr. MADDEN. Is that all the expense connected with the Forest Service—the kind of expense suggested by the gentleman from Wisconsin? That is managerial expense.

Mr. STAFFORD. I was first trying to ascertain how much clerical expense was involved in the administration of the Forest Service here in Washington and in the field. I find here in the statement of expenditures for 1914 a total of $998,000, nearly a million dollars, for salaries which I assume to be for clerical expenses. I do not know whether it is clerical or not.

Mr. LEVER. It would be clerical expenses both in Washington and outside and at the different headquarters.

Mr. STAFFORD. In that amount there is an item of $154,000 paid out of the lump-sum appropriation for salaries here in Washington. I wish to ask the chairman of the committee what is the necessity of allowing such a large amount as that to be paid out of the lump-sum appropriation rather than placing these clerks on the statutory rolls when they are employed here in Washington?

Mr. LEVER. I assume, as I have answered several times on this proposition, that those men are carried on the lump-sum roll because they consider them more nearly scientific men, or temporary in their tenure, than clerks and permanent in their tenure.

Mr. STAFFORD. I do not wish to anticipate consideration of the next item, which is directly related to what we are now considering. I wish to inquire, Why is it necessary, in view of the appropriations for administrative expenses for these respective districts, to have the total appropriation interchangeable to the extent of 10 per cent, so that there could be at least 10 per cent of nearly $2,000,000 applied to any one item?

Mr. LEVER. That is an important question, and I am very glad to answer the gentleman. The gentleman knows heretofore 15 per cent of the total general expenses for the Forest Service has been available for administrative purposes. The committee thought that that was an unwise provision, and that they had better set out the administrative expenses in detail in this bill, which we have done. Now, the Forest Service urged upon the committee the necessity of having some leeway in the appropriation for these 155 various units, and this 10 per cent is to give them that leeway. For instance, it might be impossible for the Forest Service, in making up these estimates, to anticipate the exact amount necessary for fire protection or some other unforeseen emergency, and this 10 per cent is put in there to meet that.

Mr. STAFFORD. I do not think the provision reported by the committee carries out that purpose. I do not care about anticipating, but the gentleman will see that the discretion given to the department has been an interchangeable item of 10 per cent on the total appropriation.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. Mr. Chairman, I ask for two minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. LEVER. Let us read the language.

Mr. STAFFORD. It reads:

Provided further, That the amounts so interchanged shall not exceed in the aggregate 10 per cent of all the amounts so appropriated.

That is on line 3, page 37. That would enable the Forest Service to appropriate 10 per cent of $1,811,000 to any one item in the bill, and would not restrict their discretion in any way whatsoever.

Mr. LEVER. No; the gentleman is mistaken about that.

Mr. STAFFORD. Oh, no; I am not mistaken. I think that is the only construction which that language will bear. If you strike out the word "all" and say "of the amounts appropriated for each item herein," then you would restrict them to 10 per cent of those items. This limitation does not restrict them at all; in fact, it gives them greater liberty than they had before.

Mr. LEVER. In order to allay the apprehensions of the gentleman from Wisconsin, I might be willing to accede to his proposition.

Mr. GARNER. Mr. Chairman, I would like to ask the gentleman a question. Will the gentleman yield?

Mr. LEVER. Yes.

The CHAIRMAN. The time of the gentleman from Wisconsin has again expired.

Mr. HAWLEY rose.

Mr. GARNER. I move, Mr. Chairman, to strike out the last word.

The CHAIRMAN. The gentleman from Oregon [Mr. HAWLEY] is recognized.

Mr. HAWLEY. I have a remark to make, but I will yield until the gentleman from Texas [Mr. GARNER] has concluded.

Mr. GARNER. I was trying, Mr. Chairman, if the gentleman will permit me, to elicit from the chairman of the committee a general idea as to the possibility of reducing the expenditures for the forest reserve. I have noticed some criticisms of that in the magazines and newspapers. I am free to say that I know very little about it; but it has occurred to me that there ought to be some method by which the permanent expenditures in taking care of the forest reserves of this country shall be reduced. Therefore, while I am not making criticism as to the expenditure of the money, I would like to see the expenditures reduced.

Mr. LEVER. I will say to the gentleman from Texas that it is my opinion that for the present there is not any great possibility of reducing the expenditures, but there is a strong probability of increasing the revenues from the Forest Service. I believe that as soon as the lumber market gets into good condition it will be safe to say that we can increase our revenues from the national forests anywhere from $250,000 to $400,000 a year. I confidently believe that, although that is entering the field of prophecy, and I am neither a prophet nor the son of a prophet.

Mr. JOHNSON of Washington. Mr. Chairman, do I understand the gentleman from South Carolina to say that the lumber business is in bad condition?

Mr. LEVER. Yes.

Mr. JOHNSON of Washington. In spite of the reports of Secretary Redfield to the contrary?

Mr. LEVER. I am not talking about the reports of Secretary Redfield. I think the gentleman knows why, and I think I know why the lumber market is not now in good condition.

Mr. JOHNSON of Washington. Does the gentleman believe that with the building of good roads and automobile roads in the forest reserves in the Appalachian and eastern mountain ranges there will be any prospect whatever of reducing the cost of the Forest Service?

Mr. LEVER. I am not familiar with the Appalachian forests; but I would like to know from the gentleman from Georgia [Mr. LEE] or the gentleman from Oregon [Mr. HAWLEY], who are on the Forestry Commission, if it is true that any automobile roads are being built on the national forests that we recently acquired under the Weeks law?

Mr. HAWLEY. Not that I know of. There was one constructed on a forest in North Carolina when we obtained it, and there were some automobile roads on other portions of land that we obtained, but they were on the land when we obtained it.

Mr. JOHNSON of Washington. Then these magazine pictures showing forest rangers working on good roads are not true pictures?

Mr. HAWLEY. I will say to the gentleman that they maintain roads and construct wagon roads for the purpose of hauling supplies in to the ranger stations and for the purpose of opening up the forests, to give means for going quickly from one forest to another for the administration of the service; but there are no automobile roads for the purpose of ordinary travel.

Mr. JOHNSON of Washington. One thing more. The Forest Service puts in its tabulated statement of receipts and disbursements an item for "administration and use," beginning with $573,000 in 1906 and increasing year by year until it was more than $3,000,000 for the year 1913.

Mr. LEVER. The expenses of the Forest Service are set forth in detail in the papers I hold in my hand. This is the statement of expenditures. The committee has not been acting entirely without information on that subject. Here are detailed statements by districts, covering page after page, with the utmost detail.

Mr. JOHNSON of Washington. I have presented a consolidated statement of receipts and expenditures, furnished by the Forest Service.

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. HAWLEY. Yes.

Mr. BUTLER. I want to get a candle some night and make a light on it and read about these expenditures for the Forest Service. That is what I am directly interested in as a Member

of the House. Can the gentleman tell me where I can get this information? I will procure the candle.

A MEMBER. Let it be a big one. [Laughter.]

Mr. BUTLER. I want to know whether we are conserving public jobs or conserving the Government property.

Mr. LEVER. We are conserving 160,000,000 acres of Government property.

Mr. HAWLEY rose.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BUTLER. Mr. Chairman, I am opposed to the amendment that is pending. That is, to strike out the last word.

The CHAIRMAN. The gentleman from Oregon [Mr. HAWLEY] has the floor.

Mr. BUTLER. Very well. I will wait until the gentleman from Oregon is through. Then I want to ask some questions.

Mr. HAWLEY. Questions were asked about the proportion of the appropriation which will be expended for personal services in connection with the Forest Service as compared with the amount expended for other services out of the five million and one-half dollars appropriated for this service. The amount for salaries in the city of Washington, for salaries at the headquarters of the several forest districts, for salaries of forest rangers, timber cruisers, and those in charge of timber sales, and for all work of that kind in each forest amounts to the greater proportion by far of the entire appropriation. The amounts for rent in Washington and equipment and for rent in the several national forest districts, and for the equipment of offices and forest rangers' cabins, and for field equipment constitute a very small proportion of the entire amount appropriated by the bill for this service. The amount of money appropriated by the bill used for the payment of personal services in carrying out the law for the care and maintenance and protection of national forests is by far the greater part of the appropriation for this service.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. HAWLEY. Yes.

Mr. STAFFORD. Will the gentleman give some definite figures as to the amount of money appropriated in this bill for the Forest Service that is used exclusively for clerical services here in Washington and in the field, both that paid out of the statutory roll and out of the lump-sum appropriation? Does it not aggregate nearly a million dollars?

Mr. HAWLEY. For the payment of expenses here in Washington?

Mr. STAFFORD. For clerical services connected with the administration of the Forestry Service, in Washington and in the field, including those paid out of lump sums as well as those on the statutory roll.

Mr. HAWLEY. Let me see if I have the gentleman's question straight. The gentleman wishes to know the amount paid for clerical services in Washington and in the field?

Mr. STAFFORD. Yes.

Mr. HAWLEY. I have not that information at hand.

Mr. STAFFORD. Does it not approximate a million dollars?

Mr. HAWLEY. For clerical services?

Mr. STAFFORD. Oh, yes; for the cost of administration, of a clerical nature.

Mr. HAWLEY. It would be just a guess, which I prefer not to make.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] reserved a point of order. Does the gentleman desire to make it?

Mr. FOWLER. I withdraw the point of order.

The CHAIRMAN. The point of order is withdrawn.

Mr. FORDNEY. Mr. Chairman, I move to strike out the last word. I do not want to be understood as being opposed to the preservation of our forests, but I do want to make a few observations in the way of criticism upon the plan set forth in this bill, not at all criticizing the members of the committee, because the matter is presented to them by men in charge of the Bureau of Forestry in such a way that they can not contradict it.

A few years ago, when Senator Carter of Montana was a Member of the Senate, an additional appropriation was asked for by the Bureau of Forestry for that department, and a committee was appointed, of which, as I now remember, Mr. Carter was the chairman. I have read the report of that committee. The committee was requested to make an investigation as to how the money appropriated for that department from the time of its origin up to that date had been expended. As I remember the report now, $25,200,000 had been appropriated for that bureau up to that time, and of that sum $18,000,000 had been spent for advertising and only $7,200,000 for actual services, or money paid out for the employment of foresters and office work. Out of a total of $25,200,000 the sum of $18,000,000 had been spent for advertising, when Gifford Pinchot was chief of that department.

Mr. BUTLER. What was the character of the advertising?

Mr. FORDNEY. The report stated that it was chiefly to further the interests of Gifford Pinchot as a candidate for the Presidency of the United States. Here is an appropriation of $5,553,000 for the maintenance of our forests, for the employment of men in the field and in the office.

I want to offer this as a suggestion, because I know what I am talking about: One hundred dollars per acre will purchase to-day the choicest forest that stands in either of the five great forest States of this country—Montana, Idaho, Washington, Oregon, and California, where, according to the estimates of the Government, 54 per cent of all the timber in the United States stands. One hundred dollars per acre will purchase the very choicest of the forests in either of those States; and if this money, instead of being spent in this extravagant way for the maintenance of our forests were appropriated for the purchase of those lands, 700,000 acres of land could be purchased for that sum of money, land containing from 30,000,000,000 to 40,000,000,000 feet of the choicest timber that stands under God's sun.

I want to criticize this manner of spending the public money in the employment of great armies of men—doing what? I know some of the foresters employed by the Government to-day, and, in my opinion, if some of them were set down in the middle of a forest they would have a mighty hard task to find their way out except on a trail. They know but little about estimating timber. To-day the Government is offering timber for sale, and I once asked Gifford Pinchot, who was then Chief of the Bureau of Forestry, "Why are you offering for sale the timber of the Government in forest reserves? Why are you disposing of the timber? What is the purpose of a reserve?" He said, "Why, my dear sir, the Congress of the United States will not appropriate a sufficient sum of money for us to employ men in the field, and we are selling timber to get money for that purpose."

The CHAIRMAN. The time of the gentleman has expired.

Mr. MADDEN. Mr. Chairman, I know very little about the Forestry Service, and I am afraid that there is no one on the floor who knows much more about it than I do; but I do know that we are losing $3,100,000 every year in the management of the service.

Some five or six years ago, when this service was in its infancy, we were told that at the end of three years the Government would be receiving an income largely in excess of the expenditures; but every year the loss grows greater. Now, it seems to me that there ought not to be any reluctance on the part of the House to do the thing that is necessary to obtain the information as to why this service is being so extravagantly managed. It is not more extravagantly managed now than it was under previous administrations, I feel sure of that; but it is extravagantly managed, and the men who manage it either do not know or will not tell why it is being so extravagantly managed. That is obvious, for the great Committee on Agriculture, in charge of the bill, is unable to tell anybody why so large an amount of money is being expended in the service and so small an amount received in return. It seems to me that there is only one way to get the information that we have tried in vain to get, and that is to appoint a committee of the House whose sole duty it shall be to investigate the conduct of this Forest Service. The appointment of such a committee could be no reflection upon anyone. The information ought to be obtained. The heads of the departments and bureaus connected with the service ought to be put on the witness stand by some committee of the House authorized to ask them questions, and they should be kept upon the witness stand long enough to compel them to answer all the questions that are necessary to obtain the information.

Mr. STAFFORD. Mr. Chairman, will my colleague yield?

Mr. MADDEN. Yes.

Mr. STAFFORD. Have we not a committee on expenditures in each one of the various departments, which committee has exclusive jurisdiction to investigate into the expenditures of that department?

Mr. MADDEN. We have.

Mr. STAFFORD. And does not the gentleman recall that in a former Congress, when Mr. Charles E. Littlefield was a Member of this House and chairman of the Committee on Expenditures in the Department of Agriculture, he made a very exhaustive investigation of that department, although at that time the Forest Service was not under the Agricultural Department?

Mr. MADDEN. Mr. Chairman, I think that the Committee on Expenditures in the Agricultural Department could employ its

time very profitably in ascertaining why we are running behind so much every year in conducting the Forestry Service. This committee could do no better service to the American people than to obtain the information which will give everybody who wants to read an intelligent conception of how this Forestry Service is being conducted, and why it is that instead of making money as we said we would we are losing $3,000,000 every year.

Mr. LEVER. Mr. Chairman, I do not hold any brief for Gifford Pinchot. The distinguished gentleman from Michigan, one of the largest lumbermen in the country, I think, made his talk on the assumption that Mr. Pinchot was the National Forester. As a matter of fact, he has not been in the Forestry Service for the last three or four years.

The present Forester was appointed by President Taft. I do not know his politics, and I do not care what it is. But I do believe that he is not only an honest man but that he is a capable man.

It is a very easy matter, I will say to my friend from Illinois, who has just taken his seat, to leisurely stroll in on the floor occasionally during the day and accuse members of the committee of having no information about the work at hand. [Applause.]

Mr. MADDEN. Will the gentleman yield?

Mr. LEVER. The gentleman can not yield at present; I want to continue my statement. With the exception of the chairman of this committee, I believe that the membership of the Agricultural Committee contains as highly intellectual men as the average of this body. [Applause.]

Mr. MANN. Higher than that.

Mr. LEVER. The gentleman from Illinois says "higher," and as chairman of the committee, excepting myself, I accept his amendment. [Laughter.] I am sure that there is no committee in this House, certainly not the committee of which the gentleman from Illinois is a member, that devotes the time to looking into the details of its business more than does the Committee on Agriculture. But I would have him understand that this bill contains—I have not counted them—a thousand different items carrying appropriations ranging from $500 to $5,000,000, and it is almost a physical impossibility for any man, no matter how bright he may be, no matter how earnest he may have been in gathering facts, to anticipate every question, sensible and not sensible, that may be asked on the floor of the House by men who have never read the report of the Secretary of Agriculture, by men who are not interested enough to read the reports of the various bureau chiefs—and from that the gentleman from Illinois could have got the information he was seeking a moment ago, and which if I had not loaned my report I could have given him—these gentlemen who have not taken the time to read the bill even, these gentlemen who have not taken the time to read the report of the committee—I say it is easy to stroll in occasionally, after having had a good smoke, and two or three of them during the day, and accuse somebody of not knowing what he was doing. [Applause.]

I want to say for the committee over which I have the honor to preside that I can present as high a range of intelligence and hard work and attention to duty as any committee in the House.

Mr. MADDEN and Mr. DIES rose.

The CHAIRMAN. The Chair has promised to recognize the gentleman from Texas.

Mr. DIES. Mr. Chairman, I want to say to the gentlemen of the committee that all the chairman of the Committee on Agriculture has said about that committee is true, and all that the gentleman from Illinois has said about the Forestry Service I have no doubt is equally true.

If the American people ever expect to get anything out of trees growing in the national forest, the American people will be disappointed. The people never get anything where the Government manages the business, except the privilege of paying the bill. All of the trees located upon the national forests will eventually be sawed up into planks, sold, and there will not be enough left to pay for the hands that look after the bugs on the trees and keep the fires out of the woods, and who draw thousands of dollars in salary looking after the service.

The Government as a manager of business, gentlemen, is a failure. When it goes into operating the railroads in Alaska there will be a failure, and when it begins to operate the ships we are going to buy there will be no profit, and when the employees of the ship lines and the Forestry Service and the Alaska railway service come here and ask for more pay and more pensions you will do just as you have with the rural carriers of the South and the pension getters of the North—you will get down on your dewclaws and make obeisance and give them all they ask. [Laughter.]

That is Government ownership; that is the effect of the new propaganda that is driving public opinion into hysterics. The Government as an employer of labor is a failure, and the Government as a conductor of business is a failure. I say if there is an American citizen living to-day that expects anything out of the forests of this country except to pay taxes to make up the deficit they will be badly disappointed. They will never get a cent; but it will all go to pay the high-salaried people that run it. [Applause.]

Mr. MADDEN. Mr. Chairman, I am very sorry that the distinguished gentleman from South Carolina, the chairman of the Committee on Agriculture, felt called upon to deliver a lecture to men on the floor of the House, charging them with walking onto the floor of the House occasionally, and then undertaking to dictate what should and what should not be done.

I want to say to the gentleman from South Carolina, that I am on the floor of the House 99 per cent more of the time than he is. I am here all the time—every day—no matter what bill is under consideration, and the gentleman from South Carolina is rarely on the floor except when the agricultural bill is under consideration. Now, I do not undertake to tell the Committee on Agriculture what they ought to do and what they ought not to do. I think there is no committee in the House so deserving as the members of this committee. They are all hard-working men; they are all devoted to the interests that come under their jurisdiction; they work night and day to determine as best they can what ought to be done; but I am sorry to say that they have not been able to develop, or rather to get the department heads to develop the information which they are continually seeking. The gentleman from South Carolina said that it could be easily obtained what the deficit in the Forest Service was, if that question were put to him. Well, I asked the gentleman a short while ago, and he said the loss was $1,700,000 a year, and then I figured up how much the appropriations were, what the receipts are, and I concluded it was $3,100,000 a year; so that the information obtained from the chairman of the Committee on Agriculture is not very accurate. I am not denying that the amount of the appropriation is $5,500,000, and neither will he deny that the amount of receipts is $2,400,000; and if I can calculate the difference between those two figures it will leave the result of $3,100,000.

I have no criticism to make of any man on the Committee on Agriculture. I have no right to criticize them. They have done their work as best they knew how, and they have a high order of intelligence on that committee. I will admit that the order of intelligence in the committee is higher than that of any other committee in the House [laughter], and that no man in the House possesses the qualifications of the chairman of the Committee on Agriculture; that he is not only a genius in figures, but a gentleman as well as a man, and he has the good of the country at heart. He is a patriot, and he works in season and out of season to obtain information which is covered up by the heads of the bureaus in the department over which his committee presides.

Mr. JOHNSON of Washington. Will the gentleman yield for a question?

Mr. MADDEN. No. I yield to his genius and to his ability, but, with all his genius and all his ability, he has thus far been unable to obtain the information which will give the Members of the House an intelligent conception of how the Forest Service is being conducted. I do not blame him; I know he has done the best he could. I do not blame any member of the committee, because they have all done the best they could; but what I do suggest, and did suggest, is that the committee charged with the responsibility of making the investigation—namely, the Committee on Expenditures in the Department of Agriculture—ought to do its duty. I know it is not the duty of the Committee on Agriculture to do what I suggest and I am not complaining because they have not assumed that duty, but I do complain because the committee charged with the responsibility has failed to perform its duty and bring to the notice of the House and the country the information to which we and the people of the Nation are entitled. [Applause.]

The CHAIRMAN. The pro forma amendment is withdrawn and the Clerk will read.

The Clerk read as follows:

In all, for the use, maintenance, improvement, protection, and general administration of the specified national forests, $1,811,148: *Provided*, That the foregoing amounts appropriated for such purposes shall be available interchangeably in the discretion of the Secretary of Agriculture for the necessary expenditures for fire protection and other unforeseen exigencies: *Provided further*, That the amounts so interchanged shall not exceed in the aggregate 10 per cent of all the amounts so appropriated.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. JOHNSON of Washington. It is a matter of some gratification——

Mr. MANN. I would like to have this point of order disposed of. We would like to get through with this bill at some time.

Mr. STAFFORD. Mr. Chairman, I make a point of order that the paragraph is new legislation in making available interchangeably the various amounts heretofore appropriated for a specific purpose.

The CHAIRMAN. Is that all the gentleman desires to say?

Mr. STAFFORD. That it is new legislation, and for the further reason it affects the discretion that the executive heads may have in the expenditure of these various amounts.

Mr. LEVER. This item is nothing more or less than an appropriation.

Mr. MANN. It is perfectly plain to anybody.

The CHAIRMAN. The point of order is overruled.

Mr. STAFFORD. Mr. Chairman, I offer an amendment. Strike out, in line 2, page 37, the words "the aggregate" and insert in lieu thereof the words "any item," and in line 3, strike out the word "of" and also the letter "s" after the word "amount," so as to read:

Provided further, That the amount so interchanged shall not exceed in any item 10 per cent of the amount so appropriated.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 37, line 2, strike out the words "the aggregate," and in line 3, same page, strike out the word "of" and strike out the "s" after the word "amounts."

Mr. LEVER. I will ask the gentleman to explain that. I would like to hear an explanation, because I did not understand very well the reason the gentleman gave.

Mr. STAFFORD. Mr. Chairman, I am strongly opposed to granting to any executive head the right to utilize an entire appropriation for any other item. That is what this proviso would do to the extent of 10 per cent, if it stands as it is. I will say to the committee that just this kind of phraseology was the basis of the Post Office frauds which were unearthed some 12 years ago, whereby Beavers and Machen, through the interchangeable 10 per cent appropriations for the bureaus of the Postal Service, covered up their peculations so that nobody could detect just how much money was being used. The amendment I propose is to restrict the 10 per cent of appropriations to the respective items, so that 10 per cent of the total of $1,811,000 can not be utilized for any one special forest.

If we are going to achieve anything by the policy adopted by the committee this year in restricting the amount that may be expended in the various forests, it ought to be done in some such way. Under the proposal in the administration of the service the 10 per cent of the various amounts of expenditures for the respective seven districts, ranging in various amounts from $12,000 to $60,000, could be utilized in those respective districts in addition to those amounts. I think that the amendment should be accepted.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Wisconsin [Mr. STAFFORD].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. HAUGEN. Mr. Chairman, just one word. After what has been said I think it is due, in justice to the chairman of the Committee on Agriculture, to say that no Member of this House devotes his time to official duties with more assiduity and greater industry than the distinguished chairman of the committee. [Applause.] The Committee on Agriculture probably gives more time to the consideration of the bills under its charge and to hearings than any other committee in this House, and, of course, a committee that gives hearings from 10 o'clock in the morning until 6 o'clock or 7 o'clock in the evening for weeks and months in the year, its members are necessarily so busy attending to matters coming before their committee that it is impossible for the chairman and members of that committee to be always present here on the floor of the House.

Now, then, as to the Forest Service, it is true that we have turned over to that service 160,000,000 acres of land—the timber, the grazing, and the water powers on it—and now, as I understand from the distinguished gentleman from Oregon [Mr. HAWLEY], it may be necessary to build railroads and possibly boats in order to dispose of the timber. We are disposing of it as well as we can. We were promised some years ago that this service would be made self-sustaining, but we find that after years of efforts to make it such we are short several million dollars. By applying economy and business methods undoubtedly the Forest Service could, or can be, made self-sustaining; but, as has been pointed out, that is foreign to the administration of Uncle Sam's affairs. If favoritism and discrimination referred to is true, it is not confined to the Forest Service or the Department of Agriculture. It may have been a mistake to undertake the task; but, gentlemen, if so, we should remember that that was due to an act of Congress. The Committee on Agriculture has been doing its best to carry out its instructions.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For the selection, classification, and segregation of lands within the boundaries of national forests that may be opened to homestead settlement and entry under the homestead laws applicable to the national forests, $100,000.

Mr. GOULDEN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from New York [Mr. GOULDEN] moves to strike out the last word.

Mr. GOULDEN. I do so for the purpose of securing an explanation. I think I will appeal to the gentleman from Oregon [Mr. HAWLEY], if the chairman of the committee will permit me. We have heard a number of serious charges made here on the floor to-day, particularly by the gentlemen from Arkansas [Mr. WINGO and Mr. JACOWAY], as well as by the gentleman from Washington [Mr. JOHNSON], with regard to the difficulty of homesteading in the forest reserves. This is an item, it seems to me, that applies especially to the matter of opening up the forest reserves for entry under the homestead laws.

These charges have been heard by Members on the floor to-day. They have impressed me with the idea that the settlers who have attempted to locate upon these forest reservations were harassed, and in some cases fined, and, in fact, it was next to impossible for any man to successfully homestead in one of these forest reserves. That is the charge, repeated and reiterated again and again, by the gentlemen from Arkansas, as well as by the gentleman from Washington.

Mr. LEVER. The answer to it is this provision and the one following.

Mr. GOULDEN. I simply wanted to know what foundation there was in the charges, and if that is so, what steps have been taken to remedy it. I know nothing about the truth of these charges, but having been through the West many times and having seen these reservations, I noticed homesteaders and settlers who looked to me as though they were on the point of starvation, and it prompted in my mind the idea that there might be something in the charges made to-day of the difficulty of homesteading on account of the management of these forest reserves by those officially in charge of them. I simply rose for the purpose of securing information.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. GOULDEN. With pleasure.

Mr. MANN. Does the gentleman understand that this is the only bill that carries a provision for this purpose?

Mr. GOULDEN. No. I will say to the gentleman that I am aware of the fact that it is not. I have heard these charges before.

Mr. MANN. I have heard them, too, but I have never taken them seriously.

Mr. GOULDEN. I am inclined to take them seriously, inasmuch as they come from the gentleman from Washington and from the gentlemen from Arkansas, because they live in those particular sections and are supposed to know whereof they speak, and I think they do.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. GOULDEN. Yes.

Mr. WINGO. Let me state this: Assuming that the Forest Service is sincere and honest and square, yet, like the average man, they have become fanatics about their own work. They look at a piece of land from the standpoint of the Forest Service. The homesteader, on the other hand, looks at it from the standpoint of the original intent of the homestead act, for the purpose of building a home. There is where the irreconcilable conflict comes. That is the conflict that Congress has got to settle, whether you are going to turn the public domain over in every instance to the official determination of men who are daffy on their particular theory, or whether Congress is going to undertake to balance and settle the conflict between the two irreconcilable forces.

Mr. GOULDEN. Does the gentleman agree that this section and the following section will remedy the evils that are complained of, as claimed by the chairman of the committee?

Mr. WINGO. I do not think they will, especially in the case of the Arkansas national forest reserve. The gentleman from Illinois does not take us seriously, because he has not been down there. If the gentleman would ever spend one day on the

Arkansas national forest reserve, he would be disgusted with the idea that those lands were ever included in a reserve.

Mr. GOULDEN. I certainly was very much impressed with the statement of the gentleman from Arkansas [Mr. WINGO], and that is why I call up the matter. I want some explanation, if possible. I have no doubt that what the gentleman from Arkansas says is true; and if the gentleman from Illinois and myself traveled through the gentleman's district, which I understand is quite a prosperous one, and saw the homesteaders struggling for an existence, I think perhaps we might agree with him.

Mr. WINGO. After my experience to-day, I think about the only hope I have is to get the gentleman from New York [Mr. GOULDEN] and the gentleman from Illinois [Mr. MANN] to go down with me and visit that reserve, and I now invite them to do so.

Mr. GOULDEN. I accept the gentleman's invitation, and I hope the gentleman from Illinois [Mr. MANN] will do the same.

Mr. MADDEN. I am going down, too.

The CHAIRMAN. If there be no objection, the pro forma amendment will be considered as withdrawn, and the Clerk will read.

The Clerk read as follows:

For the survey and platting of certain lands, chiefly valuable for agriculture, now listed or to be listed within the national forests, under the act of June 11, 1906 (34 Stats., p. 233), and the act of March 3, 1899 (30 Stats., p. 1095), as provided by the act of March 4, 1913, $85,000: *Provided*, That any unexpended balance of an appropriation of $85,000 to be expended "for the survey and platting of certain lands, chiefly valuable for agriculture," etc., provided by the act of June 30, 1914, entitled "An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915," be, and the same is hereby, continued and made available for and during the fiscal year ending June 30, 1916, for the purpose of this appropriation.

Mr. PAGE of North Carolina. Mr. Chairman, I make a point of order against the proviso from line 15 down to the bottom of the page as new legislation. I do not care to argue the point of order at all.

Mr. MANN. Mr. Chairman, I question whether that is legislation. It is merely making a reappropriation of the unexpended balance.

Mr. PAGE of North Carolina. The gentleman certainly will not question the fact that the money could not be used with a reappropriation, which is legislation.

Mr. MANN. As far as that is concerned, all the appropriation bills, especially those coming from the Committee on Appropriations, properly contain many items of this character——

Mr. PAGE of North Carolina. If the gentleman will permit me there——

Mr. MANN. If the gentleman will let me finish my sentence, there are constant reappropriations of the unexpended balances of appropriations for prior years for the same purposes.

Mr. PAGE of North Carolina. That is true, but the gentleman also knows that the Committee on Appropriations have charge of the bill making appropriations for deficiencies.

Mr. MANN. Oh, yes; but this is not a deficiency.

Mr. PAGE of North Carolina. This is not a deficiency——

Mr. MANN. A deficiency would be for the balance of this fiscal year. This is making an appropriation for the next fiscal year.

Mr. PAGE of North Carolina. Yes; but of money appropriated for the last fiscal year presumably unexpended.

Mr. MANN. No; of money appropriated for the current fiscal year.

Mr. PAGE of North Carolina. I mean the current fiscal year.

Mr. MANN. Which will be unexpended on the 30th of June.

Mr. PAGE of North Carolina. Certainly.

Mr. MANN. Reappropriating it for the next fiscal year.

Mr. PAGE of North Carolina. Certainly.

Mr. MANN. That is not a deficiency.

Mr. GARNER. Will the gentleman from Illinois yield for a question?

Mr. MANN. I yield.

Mr. GARNER. Is there any difference between appropriating money that is now in the Treasury, that has already been appropriated for the current fiscal year, and appropriating any unexpended balance that may be in the Treasury for the coming fiscal year?

Mr. MANN. I can not see any difference at all.

Mr. GARNER. I can not see any difference at all. I do not see any reason why the committee has not the right to appropriate money already in the Treasury, as much as it has to appropriate money that may be in the Treasury.

Mr. PAGE of North Carolina. I will call the attention of the chairman to the fact that this is a change of law. Here is the statute under which this appropriation is made, recited in the paragraph itself.

Mr. LEVER. That was an appropriation act.

Mr. MANN. I do not understand what the gentleman's point is about that.

Mr. PAGE of North Carolina. That this is legislation, and that it is a change of existing law.

Mr. MANN. Of course, the form of this language is not the very best for an appropriation. Instead of saying "reappropriated" it says "continued and made available"; but it means the same thing. Now, if they had said "reappropriated," it would clearly be in order, because we have the right to appropriate for the next fiscal year any sum in the Treasury. This takes effect as to the next fiscal year, and affects only the unexpended balance for this fiscal year that remains in the Treasury on June 30.

Mr. PAGE of North Carolina. I grant that that statement of the gentleman is true; but that fact does not keep this from being legislation. It is not an appropriation.

Mr. MANN. Why, certainly it is. Appropriation and reappropriation are the same thing.

The CHAIRMAN. The Chair is ready to rule.

Mr. PAGE of North Carolina. I am perfectly willing that the Chair shall rule.

The CHAIRMAN. There seems to be no question that the item for which the appropriation is sought to be made is in order and authorized by law, and the present occupant of the chair feels that there is no difference between a straight appropriation of a certain sum of money and a reappropriation for the same purpose of an unexpended balance, and in support of that opinion the Chair finds a precedent.

On February 12, 1897, the Post Office appropriation bill was under consideration in Committee of the Whole House on the state of the Union, when this paragraph was read:

The Postmaster General is authorized to apply to the payment of the salaries of letter carriers for the fiscal year 1897 the sum of $23,000, being an unexpended balance of $13,500 of the appropriation for the current fiscal year for street letter boxes, posts, and pedestals, and an unexpended balance of $9,500 of the appropriation for the current fiscal year for package boxes.

Mr. Orrin L. Miller, of Kansas, having made the point of order, the Chairman ruled:

The Chair is of opinion that this is simply in the nature of an additional appropriation for letter carriers. There can be no question as to the authority of the Committee on the Post Office and Post Roads to report an appropriation giving an additional amount to letter carriers. The provision in this bill has simply the effect of a new appropriation. It proposes merely to use for this particular purpose an unexpended appropriation in the bill of last year. This appropriation is applied to an object already provided for by law—the payment of letter carriers. The Chair overrules the point of order on the ground that the provision is simply the application of a previous unexpended appropriation to a purpose contemplated by law.

It seems to the Chair that that precedent is on all fours with this. For that reason the Chair overrules the point of order. The Clerk will read.

The Clerk read as follows:

That hereafter all moneys received toward cooperative work in forest investigations or in the protection and improvement of the national forests or in the survey, examination, and appraisal of lands and timber, the exchange of which shall have been or hereafter may be authorized by Congress for the purpose of eliminating private holdings in national forests or of consolidating lands of the United States therein, shall be covered into the Treasury and shall constitute a special fund, which is hereby appropriated and made available until expended, as the Secretary of Agriculture may direct, for the payment of the expenses of said work and of refunds to the contributors of amounts heretofore or hereafter paid in by them in excess of their share of the cost of said work: *Provided*, That annual report shall be made to Congress of all such moneys so received as contributions for such cooperative work. And hereafter in lieu of requiring purchasers of national-forest timber to dispose of the brush and débris resulting from cutting operations the Secretary of Agriculture may require them to deposit in the Treasury such sum in each case as he may consider necessary to cover the cost to the United States of such work, and the moneys so deposited shall constitute a special fund, which is hereby appropriated and made available until expended, to enable the Secretary to pay such cost and to make refunds of any amounts deposited by such purchasers in excess of such cost.

Mr. MADDEN. Mr. Chairman, I reserve a point of order.

Mr. PAGE of North Carolina. I make the point of order.

Mr. MANN. Against the whole paragraph?

Mr. PAGE of North Carolina. I make it against the whole paragraph, for I do not see how you can separate it. There is a part of a provision at the first of the paragraph and the latter part at the end.

Mr. MANN. The appropriation at the top of the page is probably unnecessary, but it is now existing law.

Mr. LEVER. The first part is carried in the present law.

Mr. MANN. It is carried in the existing law.

Mr. PAGE of North Carolina. I did not understand the gentleman.

Mr. MANN. The first part of the paragraph is now existing law.

Mr. LEVER. And the latter part is new legislation.

Mr. MANN. Undoubtedly.

Mr. PAGE of North Carolina. In lines 4, 5, 6, and 7 there is a change in the language.

Mr. LEVER. But it does not change the meaning.

The CHAIRMAN. The Chair is of the opinion that it is legislation, and the Chair sustains the point of order.

The Clerk read as follows:

To enable the Secretary of Agriculture more effectively to carry out the provisions of the act of March 1, 1911 (36 Stat., 961), entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," $15,000 of the moneys appropriated therein shall be available for the employment of agents, clerks, assistants, and other labor, and for the purchase of supplies and equipment required for the purpose of said act in the city of Washington.

Mr. FOSTER. Mr. Chairman, I reserve a point of order. The $15,000 that you propose to appropriate for work in the city of Washington is in reference to the act which requires the purchase of the forest reserves in the Appalachian and White Mountain ranges.

Mr. LEVER. Yes. And I will yield to the gentleman from Oregon who is a member of that commission.

Mr. HAWLEY. Mr. Chairman, in the purchase of the land by the Forest Reserve Commission under the law the Forestry Service is directed to conduct an investigation as to the value of the land, the soil, the amount of timber on the land, the value of the timber, and as to all other questions connected with the physical valuation of the property. That work is done in the field, and all the expenses of the field work are paid out of the $2,000,000 appropriation made annually, which is a fixed appropriation. But when these reports are sent to Washington to be worked up here in the office, and the reports digested and the data collated for the use of the commission, under the present law such work must be paid for out of the appropriation carried in the bill for the maintenance of the Forestry Service. We have asked for this legislation so that the $15,000 could be used out of the $2,000,000 annual appropriation for working up in the Washington office of these reports from the field, and so that we might know accurately what the land bought by the commission cost per acre, including every item of cost.

Mr. MANN. It just saves $15,000 a year, because this charges it to the permanent appropriation; otherwise we would have to appropriate for it.

Mr. FOSTER. Mr. Chairman, I will withdraw the point of order.

Mr. LEE of Georgia. Mr. Chairman, I would like unanimous consent to insert in the RECORD a report of the official commission for 1914, of this commission to purchase the forest reserves. It is a very brief report.

Mr. MANN. How long is it?

Mr. LEE of Georgia. About 16 pages, but that includes two maps, which we will omit.

Mr. MANN. Is it printed as a document?

Mr. LEE of Georgia. It is printed as a Senate document.

Mr. MANN. I have no objection to its being printed, although I doubt if anybody ever reads an article printed in nonpareil type.

Mr. LEE of Georgia. It preserves it, and I should like to have it go in.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The following is the document:

[Senate Document No. 661, Sixty-third Congress, third session.]

NATIONAL FOREST RESERVATION COMMISSION.

LETTER FROM THE SECRETARY OF WAR, TRANSMITTING THE REPORT OF THE NATIONAL FOREST RESERVATION COMMISSION FOR THE FISCAL YEAR 1914.

NATIONAL FOREST RESERVATION COMMISSION,
Washington, D. C., December 19, 1914.

SIR: In accordance with the provisions of section 5 of the act of Congress approved March 1, 1911 (36 Stat., 961), I have the honor to transmit herewith report of the National Forest Reservation Commission for the fiscal year ended June 30, 1914.

Inasmuch as there is considerable demand for information as to the lands being acquired and the procedure adopted, it is requested that in addition to the usual number of copies printed there be printed an additional 1,000 copies.

Very respectfully,

LINDLEY M. GARRISON,
Secretary of War, President.

The PRESIDENT OF THE SENATE.

REPORT OF THE NATIONAL FOREST RESERVATION COMMISSION FOR THE FISCAL YEAR ENDED JUNE 30, 1914.

The act of March 1, 1911, which created the National Forest Reservation Commission and authorized the acquisition of lands by the United States on the watersheds of navigable streams, appropriated for the fiscal year 1910, $1,000,000, and for each of the fiscal years 1911 to 1915, inclusive, $2,000,000. Inasmuch as these moneys were appropriated by fiscal years and were not made available until expended, the appropriation for the year 1910 never became available. Owing to the limited time during which the appropriation for the year 1911 was available nearly all of that year's appropriation reverted to the Treasury. Appropriations for the years 1912 to 1915, by amendment to the act, have been made available until expended.

The lands approved for purchase by this commission to June 30, 1914, aggregate 1,104,529 acres. These were approved at an average price of $5.03 per acre. The total amount involved in the purchases is $5,560,202.21, exclusive of the costs of examinations and surveys. In the fiscal year 1912, 287,698 acres were approved, at an average price of $5.65 per acre; in 1913, 425,717 acres, at $4.71 per acre; and in 1914, 391,114 acres, at $4.96 per acre.

Purchases have been made in 15 localities or purchase areas in the States of Georgia, New Hampshire, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia. Purchase areas have also been designated in Alabama, Maine, and Maryland, but no purchases have as yet been approved within these States.

The following table shows the program which has been undertaken and the results accomplished. Part I, consisting of the first four columns, gives information concerning the areas in which purchases are being made. Part II gives the acreage approved for purchase within each State, the average price paid, and the total amount involved, with detailed information with respect to each county, watershed, and purchase area. Part III pertains to the lands which have been acquired and paid for. The acreage, the amount paid, and the average cost are shown, as well as the location of the lands by States, counties, watersheds, and purchase areas.

It will be noted from the figures in the table that the acreage acquired is small as compared with the acreage approved for purchase. This is due to the delay in settlement incident to the survey and title examination of the tracts and to the time required to put the titles into shape to be acceptable to the United States or to carry through condemnation proceedings when such are necessary.

After lands are approved for purchase every effort is made to complete the transaction as quickly as possible on account of the hardship to the vendor should he have to wait unnecessarily long for his money. With as little delay as possible the Secretary of Agriculture enters into a purchase agreement with the vendor and thereafter the survey and title examination are made. On June 30, 1914, surveys had been completed for 624,229.53 acres. Surveys were nearing completion on 145,976 acres more. Title examinations by the field title attorneys were in progress on 112,165 acres and had been completed on 368,614.21 acres, of which 190,755.20 had been acquired, 2,780 acres had been approved by the Department of Justice and were awaiting settlement, 60,665 acres were under condemnation.

The procedure is now so shaped that tracts which are free from title defects or nearly so can usually be paid for in from 6 to 8 months after approval for purchase. Longer delay in settlement in almost all cases is due to defects or condition of title which in some instances can only be overcome by condemnation proceedings. It has been urged that the Government should pay interest in cases where settlement is much delayed. We believe it would be highly undesirable to do so. To pay interest in such cases would put a premium upon defective titles and work out chiefly to the advantage of the owner who gives no assistance toward putting his title into good condition or hastening the conveyance.

CHARACTER OF LANDS WHICH ARE BEING ACQUIRED AND METHODS OF VALUATION.

Of the 1,104,529 acres which have been approved for purchase, 342,061 acres, or 31 per cent, are virgin timberlands. The forest consists of a mixed growth of hardwoods with pine and hemlock in the Southern Appalachians and hardwoods and spruce in the White Mountains. Much of the timber is now saleable at stumpage prices fully equal to those paid. Cut over and culled lands comprise 535,845 acres, or 48 per cent. On some of these the merchantable timber has been completely removed. On others only the more valuable kinds and sizes of trees have been cut, leaving much valuable material. The merchantable timber has been reserved for limited periods by the vendors on 118,533 acres, or 11 per cent. In all such cases a limit of size has been fixed below which trees shall not be cut and regulations have been agreed to which will preserve the young timber and protect the tract from fire and other damage. The approved lands include altogether 18,353 acres, or 2 per cent, of abandoned farm land. Some of this land has been abandoned for years and is slowly reverting to forest. Most of it is so steep that it never should have been cleared, but here and there are small tracts suitable for farming or grazing. The only remaining class of land is that which is barren or covered by a nonmerchantable growth of timber. This class includes 89,737 acres, or 8 per cent of the total area, and consists mainly of mountain tops or high rocky ledges

In valuing tracts to determine the prices to be offered for them the procedure in all cases has been to carefully cruise the timber and appraise its value, taking into consideration quantity, quality, distance from market, and cost of operation. A separate appraisal is made of the land. Improvements have been valued only where they were considered to be useful to the Government, and mineral rights only when it was considered inadvisable to leave them outstanding. No value has been placed upon water power or intangible elements, such as scenery or prominence of situation.

In the period during which purchases have gone on land prices have varied but little. Cut-over lands of similar condition and location were acquired at approximately the same price in 1914 as in 1912. There appears to be no reason for much variation in this class of land except as it may be valuable for grazing, fruit growing, or some other use. Land that has been seriously damaged by fire is to be had at about $1 per acre less than land which has not been burned.

Neither have stumpage prices varied much for the classes of timber which have been acquired. They were slightly higher in 1913 than in 1912, but in 1914 dropped back to about the 1912 level. Most of the large bodies of valuable timber are strongly held and are not to be purchased below their real value.

An objection which was at one time raised to this policy of acquisition by the Federal Government was that the Government could not acquire land at reasonable prices; that it would find that the land had been picked up in advance by speculators whose interference could not be eliminated. This difficulty, although encountered to some extent at the start, was overcome by adhering strictly to the policy of buying only at reasonable prices and refusing to buy tracts held under option for an advance in price.

RESTRICTION OF PURCHASES.

The underlying purpose of the act of March 1, 1911, is the acquisition by the Federal Government of sufficient areas of mountainous nonagricultural lands on the watersheds of navigable streams to be influential in protecting those watersheds from the bad effects of forest fires and the unwise timber cutting and clearing. The purpose of the law restricts materially the activities to be carried on. Even in the mountainous sections of the country conditions exist which limit the areas of land to be acquired. In some localities it is the presence of farm land. Again the prevalence of coal and other minerals removes from the possibility of purchase millions of acres of mountainous or hilly lands the surface of which is necessarily held to facilitate mining operations. The policy of some of the States to acquire and hold for forest purposes their wild mountain lands makes it unlikely that the Federal Government will ever be permitted to purchase lands in those States, since under the Federal statute no purchases may be made until the State in which the land lies has given its consent through legislative action. It is the policy of many corporations, companies, and individuals to hold permanently large bodies of mountain land for their timber or other resources. These conditions taken collectively are so extensive as to restrict within somewhat narrow limits the lands available and desirable for purchase by the Federal Government.

From the beginning of purchases in the Appalachian Mountains the plan has been followed of restricting purchases to localities of especial strategic importance. The 21 purchase areas named in the table on pages 6–8 are based on many years' study by the Geological Survey and the Forest Service and include very important sections of the principal watersheds of the Appalachian region. These purchase areas are shown on the maps which accompany this report. It is not intended, nor would it be advisable, to acquire all the lands within these areas. It will be sufficient to acquire tracts of suitable size as units of forest administration. These will become demonstration forests and centers of influence for forest protection and proper utilization. Although comparatively small in total area their influence will be far reaching, and we believe they will lead to forest conservation over very large areas of land held in private ownership.

Purchases have been begun in 15 of the areas. By purchasing in a number at the same time it has been possible to make greater headway and to secure better prices than if purchases were limited to one or two. In any particular area there are times when little headway can be made and other times when it is possible to make great progress. Only by having a number of areas can fairly steady progress be made. Another great advantage of carrying on purchases in a number of areas at once is that competition and better prices can be secured. The lack of purchases in six of the purchase areas is due to the fact that until now it has not been possible to obtain lands in the acreage wanted and at prices considered reasonable.

IMPROVEMENT AND USE OF ACQUIRED LANDS.

The Secretary of Agriculture is authorized by law to protect and administer the acquired lands as national forests. Bearing in mind that the protection of the mountain watersheds can best be accomplished by maintaining a thriving forest upon the land, it will be the purpose to keep the timber growing permanently upon all portions which can not otherwise be utilized without permitting erosion or in other ways menacing the flow of the streams.

The virgin timber which is being acquired contains many trees that are overmature and becoming defective, the stands partially cut over have remaining certain kinds of timber that were not utilized at the time of lumbering. These lands, where there is sale for the timber at fair prices, will be given an improvement cutting which will remove this deteriorating material as well as such mature growth as can be spared from the forest without impairing its protective influence. Where cutting is to be done the timber will be sold on the stump to the highest bidder and cut under the rules and regulations of the Secretary of Agriculture.

The full development of the forest will require the construction of roads, trails, and telephones on the lands owned by the Government, to connect with those supplying the general public. Already the work of constructing these improvements has begun. Ninety-two miles of roadway, 520 miles of trail, and 25 miles of telephone line have been constructed. This work can be still further extended as soon as proceeds from timber sales begin to come in, since 10 per cent of the proceeds of such sales is specifically set apart by law for road and trail construction.

Roads, trails, and telephones will greatly facilitate the protection of the Government's land from fire. Fire causes such damage in the regions where lands are being acquired that the purposes of the Government for developing a maximum forest can not be carried out until fires are entirely controlled. Great progress is being made. On the lands purchased or under contract during the fiscal year 1915 only 3,600 acres were burned over, whereas it was not uncommon in past years for 10 to 20 per cent of such areas to burn over a season.

With the Government lands being developed for intensive timber production other forms of use become possible in larger degree. The range can be more completely utilized, the water resources will be more readily available to the public, and the general use of the mountains will be increased. The public greatly appreciates the opportunity to go into the highlands for health, pleasure, and recreation. Many of the tracts which are being acquired present very attractive scenery and afford delightful places in which to travel or rest. Some of the most attractive spots being in remote situations have been inaccessible, but the roads and trails which are being built will make it easier to reach them. Opportunity for camping is increased. Those who desire permanent camp sites may obtain them on payment of reasonable annual fees. Other special uses which do not injure the forest are like-

wise permitted. Demands for such uses have already started in considerable volume and are being encouraged.

ADVANTAGES OF GOVERNMENT FORESTS TO THE REGION AND COUNTRY.

Since the uses of the acquired lands are beginning to take form it is becoming clear that the forests are to serve the region in a number of important ways. By definite plan they have been widely distributed over the mountain region. Perhaps their greatest use is in the control of forest fires. Every effort is made to suppress fires on the Government lands. All improvements and all the force employed are in part or wholly for this purpose. The Government force in any community is also ready to cooperate with the State and local officials and other landowners where they can do so without expense to the Government in keeping fire out of entire communities. A great number of landowners are now coming to believe in fire protection and they welcome the Government's aid in a program that they themselves would not be able successfully to carry out.

The forests are also to serve as practical demonstrations of forestry or the production of successive crops of timber. The methods of forestry are new and demonstrations are necessary in this field as in all branches of agriculture. Certain timberland owners are beginning already to follow the example of the Government in limiting the cut so as to save the young trees and in requiring clean utilization so as to leave the stand in good growing condition.

Government ownership and management of extensive forest areas in the eastern mountains will further benefit the region in providing encouragement and aid for the mountain people in rightly using the resources of the region. The Government's undertaking is such that its representatives must mingle largely with the local people and have constant dealings with them. Of some it is buying land, others are employed in constructing trails and telephones or as forest guards. Still others are becoming timber contractors, buying small quantities of timber and cutting it under Government supervision.

The manner in which the Government forests will be handled will call for numerous small timber contractors living near at hand and working in the timber business all or a portion of the year. Some of these may desire to live on Government land, in which case they will be given every opportunity to develop comfortable homes and use the available cleared patches for their gardens and crops. The forest will thus be made permanent and thriving forest communities will be built up.

In considering the advantages of these forests to the local communities it should be remembered that 25 per cent of the proceeds goes back to the counties concerned for school and road purposes and that an additional 10 per cent is to be spent on roads and trails within the forests under the direction of the Secretary of Agriculture. The aid thus secured must in the future be of large assistance in those counties which will contain extensive areas of Government land.

Of the advantages here pointed out some are local, others regional or national. But if the results are to be as stated there will come to the Nation the added advantage of a large and important region turned to its natural use and made permanently productive. This should be true of the Appalachian region in so far as it is chiefly adapted to the production of forest. The soil will be held in place on the most critical portions of the watersheds, giving navigable streams a large measure of protection. So far as the watersheds comprise agricultural lands there can be little or no protection to the streams under this program. Soil on fields which are to be farmed permanently must be kept in place by proper methods of tillage. The program here considered covers only the areas that need to be retained in permanent forest.

WHAT WILL BE ACCOMPLISHED WITH THE PRESENT APPROPRIATION AND WHAT SHOULD BE DONE.

There remains unexpended from the appropriation for 1914 an estimated balance of some $95,655, which, with the appropriation of $2,000,000 for the fiscal year 1915, is available for additional purchases. With this amount it will be possible to acquire at least 300,000 acres, giving a total to be acquired with present appropriations of some 1,400,000 acres. Had it been possible to use also the $3,000,000 which was appropriated for the fiscal years 1910 and 1911 the area acquired would have amounted to about 2,000,000 acres.

The commission profoundly believes that the practicability and wisdom of this policy of land purchases by the Federal Government has been fully demonstrated. Experience has proved that it is entirely practicable for the Government to acquire lands of the character desired at the headwaters of the navigable rivers and that they may be obtained at reasonable prices and in areas of sufficient size for successful administration as national forests. By the employment of condemnation where titles are defective a safe title may be vested in the United States.

The wisdom of the Government's acquiring and permanently holding for forest purposes extensive bodies of land at the headwaters of the great rivers is becoming more and more clear. Far-reaching good will result in safeguarding the streams from erratic flow and in protecting the watersheds from destructive erosion to which they are subject when unwisely cleared. A basis will be afforded for permanent industries in regions which otherwise are in danger of ceasing to be productive and of becoming a menace to the navigable rivers and to the communities situated upon them.

The appropriations which were made have been sufficient to start the work and make very substantial progress. Through the care exercised in making purchases the lands acquired are so well situated for administration and use that even should appropriations cease considerable good would be accomplished. But the program should not cease at this point. It should go further. However, the commission does not look upon the program as being indefinite as to appropriations, but rather as requiring appropriations through a number of years. In a report to Congress December 11, 1907, the Secretary of Agriculture expressed the opinion that by the ownership of 5,000,000 acres in the southern Appalachians and 600,000 acres in the White Mountains the Government could lead the way to the right management and use of the southern Appalachian and White Mountain regions. The commission, after an experience of more than three years in making purchases, regards that view as being entirely sound. We do not now believe it will be necessary to acquire larger areas to accomplish the purposes of the act in the southern Appalachian and White Mountains. In the view of the commission the acquisition of these areas should be considered as the present working program.

Although to this time purchases have been limited to the southern Appalachian and White Mountains, experience indicates the advisability of undertaking purchases before long in the Ozark Mountains in Arkansas, and possibly in certain other mountainous sections. Such purchases, however, would be on a small scale as compared with those in the Appalachian region.

HOW THE PROGRAM SHOULD BE WORKED OUT.

It is the judgment of this commission that the work can best be done under appropriations covering periods of five years each, the appropriations becoming available annually and remaining available until expended, as is now the case. Experience has shown that it is entirely impracticable to attempt to do this work under appropriations which expire with the fiscal year. That plan was fully tried and it had to be changed through an amendment to the act. It is likewise of the utmost importance that appropriations be continued through periods of not less than five years. Regularity of appropriations, which in this work is of the utmost importance, can best be secured in that way. When this work was begun its requirements were such that well-trained men were not available. A force of timber cruisers, title examiners, and surveyors had to be assembled and trained as experts, a task which required some two years. It would be most unfortunate to have to disband this force in case funds were not appropriated for any given year. If purchases were suspended during any year it would also require much time and expense to get under way again the negotiations that would be broken off. Many of the cruises and examinations which would have been made and which would not have resulted in purchases would have to be made over again. From every point of view it is highly desirable that appropriations continue without interruption.

It is to be emphasized that the Congress established this project upon the basis of an appropriation of $11,000,000. Instead of hastening into purchases in order to utilize an annual appropriation, which would have been unbusinesslike and resulted in loss to the Government, the commission adopted the more conservative policy of making purchases only after full information had been secured in regard to each tract and reasonable prices had been obtained. By so doing it established the work upon a sound basis, but $3,000,000 of the money which had been appropriated reverted to the Treasury. This $3,000,000 will have to be reappropriated if the work is to be carried as far as the Congress intended under the first appropriation.

In the judgment of the members of the commission the work should be carried forward in a steady, systematic way until the program is completed. Since the existing appropriations cease with the fiscal year 1915, it is accordingly recommended that action be taken by the Congress during the present session to extend the appropriations at the current rate of $2,000,000 per year until and including the fiscal year 1920.

EXPENDITURES.

The following statement shows in detail the expenditures incurred in carrying on operations under the Weeks law during the fiscal year ended June 30, 1914:

Appropriation: "National Forest Reservation Commission"		$25,000.00
Expenditures for fiscal year ended June 30, 1914:		
Salaries	$150.00	
Equipment	60.00	
Furniture	270.40	
Freight, express, and drayage	.77	
Total		481.17
Unexpended balance Aug. 31, 1914		24,518.83
Outstanding liabilities Aug. 31, 1914		0
Balance to revert to Treasury		24,518.83
Appropriation: "Acquisition of land for protection of watersheds of navigable streams"		$2,000,000.00
Unexpended balance from fiscal year 1913, available July 1, 1913 (see report of the National Forest Reservation Commission for the fiscal year 1913, S. Doc. No. 307, 63d Cong., 2d sess.)		3,002,563.26
Repayments to the credit of the appropriation during the fiscal year 1914		118.63
Total available for fiscal year 1914		5,002,681.89
Expenditures during fiscal year 1914		839,653.59
Unexpended balance available for further disbursement July 1, 1914		4,163,028.30
Against the unexpended balance of July 1, 1914, there were existing liabilities in the form of executed contracts for the purchase of lands amounting to	$3,321,100.43	
Lands which had been approved for purchase but for which the contracts for purchase had not been executed June 30, 1914, amounted approximately to	746,271.88	
Total outstanding encumbrances		4,067,372.31
Available balance for encumbrances in fiscal year beginning July 1, 1914		95,655.99

Analysis of expenditures during fiscal year 1914.

Classification.	Forest Service.	Solicitor's Office.	Geological Survey.	Purchase of lands.	Total.
Salaries	$118,254.16	$28,820.84	$191.67	.....	$147,266.67
Travel, station, and field expense	33,850.21	9,071.47	205.76	[1]$44.85	43,172.29

[1] Expenses of Division of Accounts and Disbursements in connection with payments for lands.

The Clerk read as follows:

That hereafter as much of the act of March 4, 1913, making appropriations for the Department of Agriculture, as relates to reimbursement of "owners of horses, vehicles, or other equipment lost, damaged, or destroyed while being used for necessary fire fighting, trail, or official business," shall be extended so as to provide reimbursement to officers and employees of the Forest Service for loss, damage, or destruction of horses, vehicles, or other equipment necessarily used by them in fire fighting or in unforeseen emergencies, to be paid out of appropriations made for meeting the expense of such fire fighting or emergencies.

Mr. PAGE of North Carolina. Mr. Chairman, I reserve a point of order on that.

Mr. MADDEN. I make the point of order.

Mr. McLAUGHLIN. Will the gentleman reserve it?

Mr. MADDEN. I will reserve it.

Mr. McLAUGHLIN. Mr. Chairman, on March 4, 1913, an act was passed providing that where horses, vehicles, equipment, and so forth were employed by the Forest Service in fighting fires, in case the equipment was lost or destroyed, the owner might be reimbursed; and an appropriation was made for the purpose, or a method was provided by which the loss might be paid. The comptroller, however, has rendered an opinion to the effect that regular employees, the rangers in the service, can not recover for the loss of their property; that the act does not cover them. It was the opinion of the committee after very careful consideration of this matter that that should be remedied.

Mr. MADDEN. Will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. MADDEN. Do the regulars furnish their own horses and equipment?

Mr. McLAUGHLIN. They furnish their own horses and equipment; and in the ordinary, regular work they take their chances. If their property is lost or destroyed or damaged, there is no recourse; they have no way of recovering for that loss or injury. But in emergencies, where awful fires occur, where there is occasion for extraordinary work on the part of the rangers and the exposure of their persons and their property to great danger, it is the opinion of the committee that when they suffered loss they ought to be reimbursed, the same as the owners of private property hired and engaged by the Forest Service to perform or assist in this dangerous work. It seems to the committee that when a fire occurs the statute providing for reimbursement should be made to cover the property of the rangers in this extraordinary work.

Mr. MADDEN. How many cases of this sort have taken place?

Mr. McLAUGHLIN. I do not know; but not very many. But there are a great many fires, and there is an opportunity for the exercise of a great deal of skill and bravery and heroism, and all that, and it seems to us that the men engaged in that work, when they are called upon to perform that dangerous work, ought to be taken care of.

Mr. MADDEN. I withdraw the point of order.

Mr. MANN. I make the point of order.

The CHAIRMAN. The Chair will sustain the point of order, and the Clerk will read.

The Clerk read as follows:

That hereafter the Secretary of Agriculture may, upon such terms as he may deem proper, for periods not exceeding 20 years, permit responsible persons or associations to use and occupy suitable spaces or portions of ground in the national forests for the construction of summer homes, hotels, stores, or other structures needed for recreation or public convenience, not exceeding 5 acres in area to any one person or association.

Mr. PAGE of North Carolina. Mr. Chairman, I make the point of order against the paragraph.

Mr. McLAUGHLIN. Will the gentleman reserve it?

Mr. PAGE of North Carolina. If the gentleman desires to take up the time of the committee, I will reserve it.

Mr. LEVER. I want to ask the gentleman if he is going to make the point of order, explanation or no explanation?

Mr. PAGE of North Carolina. Yes; I am going to make the point of order.

Mr. LEVER. Then I do not think there is any use of taking up the time.

Mr. PAGE of North Carolina. I will withhold it as a courtesy to the gentleman, who is a member of the committee.

Mr. McLAUGHLIN. Mr. Chairman, it seems to the members of the committee that if the situation is understood there will be no objection to this. There are 150,000,000 acres of forests set apart as reserves. The property can not be purchased and, except as provided by law, there can be absolutely no use of these immense areas—a hundred and fifty or a hundred and sixty millions of acres. One of the principal objections to the entire national-forest proposition is that these lands are withdrawn from purchase or settlement; that the people in the localities where they lie have no use of them, can not avail themselves of any privileges in connection with them; and it seems as though the authority ought to be vested in the Secretary of Agriculture to permit the harmless use of some of the places within the forests, that he ought to have authority to make leases on such terms as he pleases for a harmless, temporary use. In many parts of the forests there are places suitable for summer resorts, little parks where the people could get together for recreation and for amusement, perfectly harmless, without danger to the forests, altogether under the regulation of the Secretary of Agriculture. All these people are excluded absolutely from the forests. It seems to me and it seems to the committee, and they considered it very carefully, this language being carefully drawn, that, as we safeguard the forests and protect them in every respect, something of this kind ought to be in the law, and the Secretary ought to have the authority this provision would give.

Mr. PAGE of North Carolina. Mr. Chairman, I have no doubt in the world these hotels and summer resorts and other places would be very convenient, indeed, for the purposes of these numerous employees under these forest reserves to resort to in their days off, and at other times, but I insist upon the point of order.

Mr. LEVER. We concede it.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Total for Forest Service, $5,553,256.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word. I have endeavored to take up no more time than necessary this afternoon in discussing what I consider to be the most important of all the Government activities—certainly the only activity where the Government holds great physical resources and hopes sometime in the far-distant future to have an income. I am glad to note a disposition on the part of quite a large number of Members to pay some attention to this great service. I note also that most Members confess freely that they know little about either the receipts or the expenditures or the form of the organization that rules supreme over a territory as vast as that of any 10 or 12 States one might name. This interrupted debate, covering perhaps two hours' time, gives some idea of the magnitude of the proposition. Does anyone suppose that Chief Forester Graves has an easy time? Why, the domain over which he reigns is larger than several of the kingdoms now at war across the sea.

Mr. Chairman, I desire to join others in paying a compliment to the chairman of the Committee on Agriculture [Mr. LEVER] and to all of the members of that committee. This bill, which they have prepared, covers every form of agricultural investigation from the smallest germ that infests some tiny seed up to the roving ranger, who glories in his title and who—paid by the Government—is the last of his type on the frontier.

Mr. Chairman, the work embraced by the Committee on Agriculture covers, as shown by this bill, the greatest possible range of activities, and I hope I have been able to show that the receipts and expenditures and general supervision of the Forest Service are not correctly lodged in the Department of Agriculture or in the Committee on Agriculture of the House of Representatives. The forest-reserve expenditures are one-fourth of all the money appropriated in the name of agriculture. They are one-eighth as much as it is proposed to expend this session for river and harbor improvements.

Manifestly, it is impossible for any member of the Agricultural Committee to know as much as he would like to know about a great bureau which controls 154 separate reserves. In my opinion, Mr. Chairman, the handling of the forest reserves and their appropriations should be in the hands of a committee devoted to that purpose alone. In fact, inasmuch as the Forest Service handles the potential resources of the United States, and will soon deal with water-power leases and other great matters, the time is here when that great service shall be a department of the Government itself, backed up by a separate committee of the House of Representatives. I submit—as one member of a district, a very large part of which is comprised of neglected forest reserves, and where the activities of the rangers are most onerous—I have been within my rights in calling the attention of this committee to what has been promised to us, and what small returns we are receiving as our share of an expenditure of considerably more than five millions of dollars.

The Clerk read as follows:

General expenses, Bureau of Chemistry: For all necessary expenses, for chemical apparatus, chemicals and supplies, repairs to apparatus, gas, electric current, official traveling expenses, telegraph and telephone service, express and freight charges, for the employment of such assistants, clerks, and other persons as the Secretary of Agriculture may consider necessary for the purposes named, in the city of

Washington and elsewhere, in conducting investigations, collecting, reporting, and illustrating the results of such investigations; and hereafter the Secretary of Agriculture may furnish, upon application, samples of pure sugars, naval stores, microscopical specimens, and other products to State and municipal officers, educational institutions, and other parties and charge for the same a price to cover the cost thereof, such price to be determined and established by the Secretary, and the money received from sales to be deposited in the Treasury of the United States as miscellaneous receipts; and for rent outside of the District of Columbia, for carrying out the investigations and work herein authorized, as follows:

Mr. PAGE of North Carolina. Mr. Chairman, I reserve a point of order for the purpose of asking the chairman what the purpose of this is, what is really to be done?

Mr. LEVER. Dr. Alsberg, when before the committee, made this statement:

We have received a considerable number of requests from public-health laboratories where bacteriologists are employed for samples of pure sugar, which can not be obtained in commerce but which the Bureau of Chemistry has made from time to time for its own purposes. Those sugars are necessary for the study of bacteria—for the identification of such bacteria as the organism that produces typhoid. We have had no authority to aid these public institutions by giving them small quantities—an ounce or two—of these very rare sugars, which we get as a by-product in some of our work. We felt that they should not be given free but that they should be paid for, in order that their value might be appreciated.

Mr. PAGE of North Carolina. I withdraw the point of order.

Mr. FOSTER. Mr. Chairman, I renew the point of order. I see the committee put in language in reference to illustrating the results of such investigation.

Mr. LEVER. The statement of the chief on that proposition is this:

That is for the purpose of giving us authority to make illustrations of an educational nature. An example of that is the production through the past year of an egg-candling chart, of which I have a sample here. In the course of our investigations on the shipping and marketing of eggs, studies on the candling of eggs were made. We had these drawings made [indicating drawings]. We had no authority to publish that kind of a chart. Fortunately, the State of Missouri wanted those illustrations for a bulletin; so the State of Missouri had the stone made and the lithographs prepared, and the Department of Agriculture bought a certain number of those charts from the publisher.

Mr. FOSTER. It is simply to make that use of the investigations?

Mr. LEVER. Exactly.

Mr. FOSTER. Not for the purpose of putting them on moving pictures or anything of that kind?

Mr. LEVER. Not at all; just simply to illustrate what the department is doing for educational purposes.

Mr. FOSTER. Not these other purposes?

Mr. LEVER. Not at all; there is no such intention in the minds of the committee, and I do not think in the mind of the department.

Mr. FOSTER. I withdraw the point of order.

The Clerk read as follows:

For investigating and testing the chemical and physical properties of leather and tanning materials, and for the study of tanning processes, and the utilization of tannery by-products, $8,000.

Mr. PAGE of North Carolina. Mr. Chairman, I make a point of order against the paragraph. It is new legislation. I do it, Mr. Chairman, for a purpose.

The CHAIRMAN. The gentleman from North Carolina [Mr. PAGE] makes a point of order against the paragraph.

Mr. PAGE of North Carolina. This is starting up a new work in the Department of Agriculture that is now being done by the Bureau of Standards. We have built up the Bureau of Standards to do all this testing for the Government, and even for private individuals, and for that reason I make a point of order.

Mr. LEVER. I am not sure it is subject to a point of order, but I will not argue the proposition.

Mr. MANN. Of course it is subject to a point of order.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

In all, for general expenses, $139,680.

Mr. MANN. Mr. Chairman, the total should be corrected.

Mr. LEVER. I shall ask unanimous consent at the close to correct the totals.

Mr. MANN. You had better ask unanimous consent now.

Mr. LEVER. I ask unanimous consent, Mr. Chairman, that the totals of this bill may be corrected by the clerk.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that all totals in the bill may be corrected by the clerk to the committee. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Enforcement of the food and drugs act: For enabling the Secretary of Agriculture to carry into effect the provisions of the act of June 30, 1906, entitled "An act for preventing the manufacture, sale, or transportation of adulterated, or misbranded, or poisonous, or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes," in the city of Washington and elsewhere, including chemical apparatus, chemicals and supplies, repairs to apparatus, gas, electric current, official traveling expenses, telegraph and telephone service, express and freight charges, and all other expenses, employing such assistants, clerks, and other persons as may be considered necessary for the purposes named, and rent outside of the District of Columbia; and to cooperate with associations and scientific societies in the revision of the United States Pharmacopœia and development of methods of analysis, $635,161.

Mr. FOSTER. Mr. Chairman, I make a point of order on the language beginning on line 21, after the words "District of Columbia."

The CHAIRMAN. The gentleman from Illinois makes a point of order.

Mr. MANN. Will the gentleman reserve his point of order for a moment?

Mr. FOSTER. Certainly.

The CHAIRMAN. To what does the point of order refer?

Mr. FOSTER. I make the point of order on the language on line 21, after the words "District of Columbia."

Mr. MANN. We have official representatives on the board which revises the Pharmacopœia, an annual revision being partly made and a decennial revision being quite completely made in the Bureau of Chemistry. I do not know how often this item or a similar item may come in, but these people are compelled to do this work. The Pharmacopœia is an official document under the pure food and drugs act, and it is desirable, certainly, to have the officials who have to enforce the pure food and drugs act to help in revising the Pharmacopœia. That is all this contemplates.

Mr. FOSTER. I think the gentleman is mistaken as to that.

Mr. MANN. We have always provided for this in some way.

Mr. FOSTER. This is a private matter, and private capital pays for it and gets what profit may come from it.

Mr. MANN. Of course private capital pays for the publication of the Pharmacopœia, but it is not revised at the expense of private capital at all. It is revised by the scientific associations of the United States, and in that revision the Government officials are represented as officials of the Government.

Now, we make the Pharmacopœia the official statement under the pure food and drug act, as a matter of convenience, it is true, and yet these people ought to be represented in making up this Pharmacopœia, because they are obliged to follow it all the time in the enforcement of the law. The expense is very nominal, of course, so far as that is concerned.

Mr. FOSTER. I judge the expense would not be large.

Mr. MANN. The authority ought to be granted, surely.

Mr. FOSTER. I will state to the gentleman that we have tried to get some other pharmacopœia of the United States adopted by Congress. In times past such an effort has been made, and we never were able to succeed.

Mr. MANN. I would be willing to argue the question with the gentleman any day and undertake to convince him that it is impossible to make two standards of medicine at the same time of the same medicine. Of course, I know that the proposition has been to make the Homeopathic Pharmacopœia official by the Government, and nobody has any objection to that except in those cases where one pharmacopœia gives a statement as to the formation of a remedy in one way and another pharmacopœia gives a statement of its formation in another way, and nobody can enforce the law where you have two definitions of the same thing.

That has been the only objection to it. But if my friend is objecting to this because he is a homeopathist, of course I have nothing further to say.

Mr. FOSTER. I do not understand the gentleman.

Mr. MANN. I say if the gentleman is objecting to this because he is a homeopathist, I shall have nothing further to say.

Mr. FOSTER. Not at all.

Mr. MANN. I supposed it was that way when the gentleman put it on the ground that the homeopathic pharmacopœia had not been made official.

Mr. FOSTER. The gentleman remembers that when this was in the bill a year or so ago it went out on a point of order.

Mr. MANN. I would not dispute with the gentleman if he says that is the case, but I do not remember it.

Mr. FOSTER. I am not referring to this particular item, but to the other matter that the gentleman speaks of.

Mr. MANN. I made a point of order, having had it under consideration in my committee for years, and having said to gentlemen interested in the publication of a new homeopathic pharmacopœia as against an existing pharmacopœia that nobody had any objection to making either one of the pharmacopœias official as to these things that were not duplicated. You can not enforce a prosecution against a man when you can not define what the crime is.

Mr. FOSTER. I think the gentleman is partly right and partly wrong in his statement. However, in this case I will withdraw the point of order and let it go. But I do not think it is fair treatment.

Mr. MANN. The Committee on Interstate and Foreign Commerce, when I was chairman—and the same is true now—never had the slightest desire to be unfair in the treatment of homeopathists, but always greatly respected their opinions and their pharmacopœia.

The CHAIRMAN. The time of the gentleman has expired. The point of order is withdrawn, and the Clerk will read.

The Clerk read as follows:

For the examination and classification of agricultural lands in forest reserves, in cooperation with the Forest Service, $20,000.

Mr. RAKER. Mr. Chairman, I have a matter that I am taking up with the department on this subject, and I shall be prepared to speak on it when the bill is taken up for consideration the next time. I do not want to occupy the time of the committee now, and I ask unanimous consent that this item may be passed, to be taken up when the committee next meets.

The CHAIRMAN. The gentleman from California asks unanimous consent to pass this paragraph. Is there objection?

Mr. MANN. Reserving the right to object, what does the gentleman want to do?

Mr. RAKER. I want to see if an amendment can not be presented which will come within the Holman rule, so as to permit a man in the Forest Reserve, who has obtained, say, 30 or 40 acres of land, lived on it, and then before proving up has obtained 10, 15, or 20 acres more, to make proof on the whole tract, and obtain his patent all at one time without making two or three bites of it.

Mr. MANN. This committee would not have jurisdiction of a matter of that sort. That belongs to the committee of which my distinguished friend from California [Mr. RAKER] is a very active member.

Mr. RAKER. Does the gentleman recognize that this legislation was originally placed upon an appropriation bill, providing for these very things? I do not want to take the time of the committee, and it will take but a moment. If my amendment is not in order, of course that will end it.

Mr. MANN. If it were in order, it would take some time to discuss it. I think the gentleman ought to rely upon his own committee for that legislation. We are getting to a pretty late point in the session, where we have to dispose of things as we go along.

Mr. RAKER. I know, but I have not brought the correspondence here, and do not want to delay the committee if I can avoid it. I do not want to take the time of the committee without results.

Mr. MANN. I know. It is very seldom that the gentleman does.

Mr. RAKER. I have taken very little time of the committee.

Mr. MANN. Of which committee—the Committee of the Whole House on the state of the Union?

Mr. ADAIR. Any old committee.

Mr. RAKER. This particular committee at this time. I want simply to say that there are many complaints from actual bona fide homesteaders who apply for agricultural lands in the forest reserves. The complaint is that when a man makes his application there may be 100 acres for which he applies, and he is cut down to 40 acres and the tract zigzags in the survey, and on a full showing later more land is added; but the procedure is one which leads to great delay, and I was hoping that this matter might be regulated by giving the department further power if necessary, to the end that the homesteader might obtain title all at one time and so build up the country. I am asking this in the interest of homesteaders who are not seeking timberlands or mineral lands, but actual homes.

Mr. MANN. Of course, the homesteaders are very properly seeking to get good land wherever they can find it, if they do not have to pay for it. I do not blame them for that; but they had just as lief take advantage of the Government as anybody else. We could not properly perfect legislation of that sort on this bill. I shall have to object.

The CHAIRMAN. The gentleman objects. The Clerk will read.

The Clerk read as follows:

Preventing spread of moths, Bureau of Entomology: To enable the Secretary of Agriculture to meet the emergency caused by the continued spread of the gypsy and brown-tail moths by conducting such experiments as may be necessary to determine the best methods of controlling these insects; by introducing and establishing the parasites and natural enemies of these insects and colonizing them within the infested territory; by establishing and maintaining a quarantine against further spread in such manner as he shall deem best, in cooperation with the authorities of the different States concerned and with the several State experiment stations, including rent outside of the District of Columbia, the employment of labor in the city of Washington and elsewhere, and all other necessary expenses, $310,000.

Mr. MANN. Mr. Chairman, I move to strike out the last word. What is being done and what progress is being made in the effort to control the gypsy moth and the brown-tail moth?

Mr. LEVER. The information we have from the chief of the bureau on that subject is, I think, quite encouraging. They have lately introduced a parasite which is handling the situation pretty well and which the chief of the bureau thinks will probably control it in time.

Mr. MANN. Of course if they are going to eliminate or control one or both of these moths by a parasite which lays eggs that develop in the body of the moth it ought not to entail any very large amount of expense after they get started.

Mr. LEVER. Of course the introduction of the parasite is quite recent, as the gentleman knows.

Mr. MANN. I do not know how far it has been successful. I know they have been introducing the parasite for a number of years, and sometimes they have been able to find it again in a locality where they have introduced it, but usually they have not.

Mr. LEVER. Heretofore the parasite has not been very satisfactory, but recently they have introduced a parasite which they think is going to be very valuable in keeping down the moths.

Mr. MANN. Of course we appropriate quite a sum of money. How far are they successful in preventing the spread of these moths in New England?

Mr. LEVER. Let me read the statement of Dr. Howard:

Dr. HOWARD. The work is going on very satisfactorily. The conditions in the infested territory are better than they have ever been, but there have been one or two outside outbreaks. Last winter, after I appeared before this committee, a colony of the moths was found at Mount Kisco, N. Y. The State authorities came down and borrowed some scouts from us, and by vigorous action they outlined and treated the colony, and I think this year they are on their way to actual extermination. Then, within the last two months, a colony was discovered at Rutherford, N. J., and the State of New Jersey, together with our scouts, are trying to wipe that out.

Upon the whole, I think the reports of the department are very encouraging.

Mr. RAKER. I move to strike out the last two words. Before making my statement, I want to ask the chairman of the committee whether or not under this provision the department is making any effort to prevent the spread of these two pests by packages that are sent through the parcel post? Would this provision permit the department to take action in that particular?

Mr. LEVER. Oh, undoubtedly. Nothing can pass out of these quarantined districts that has not undergone the inspection of the department.

Mr. RAKER. Suppose a parcel is sent from a point in the Eastern States where these pests exist, and the parcel goes to California and is there in the post office. How are you going to get this package out to determine whether or not it is inspected before it is delivered to the consignee?

Mr. LEVER. I will say to the gentleman candidly that that would be a pretty hard proposition. I imagine that it could be done under some regulation of the department. I do not know what regulation they may have on that subject. I do not know whether they would do anything at all under such circumstances.

Mr. RAKER. If it is not done and can not be done, does not the gentleman believe that while we are permitting plants and bulbs to be issued by parcel post, and we have a law in regard to quarantine on infected plants, that there ought to be some method by which the further spread of these diseases should be prevented and have the parcel-post articles inspected at the point of destination.

Mr. LEVER. I would not commit myself to that as a policy, but the gentleman's statement is very persuasive, at least.

Mr. RAKER. If there is no law on the statute book against it, and a State permits the inspection, does not the gentleman believe that under this appropriation the Government, in connection with the State, would be able to inspect the plants? In other words, could the funds provided for in this bill be used?

Mr. LEVER. I do not know as to this particular fund, but there are funds in the bill that could be used for that purpose.

Mr. RAKER. For these two particular moths?

Mr. LEVER. Yes; undoubtedly.

Mr. RAKER. I withdraw the pro forma amendment.

The Clerk read as follows:

Salaries, Bureau of Biological Survey: One biologist, who shall be chief of bureau, $3,500; 1 chief clerk and executive assistant, $1,800; 1 administrative assistant, $2,250; 1 financial clerk, $1,600; 2 clerks, class 3; 3 clerks, class 2; 5 clerks, class 1; 3 clerks, at $1,000 each; 2 clerks at $900 each; 1 preparator, $1,200; 1 messenger, $720; 1 photographer, $1,300; 1 game warden, $1,200; 1 draftsman, $900; 2

messengers, messenger boys, or laborers, at $480 each; 1 laborer, $600; 1 charwoman, $240; in all, $34,470.

Mr. LEVER. Mr. Chairman, I offer the following committee amendment to correct a typographical error.

The Clerk read as follows:

Page 52, line 1, after the word "clerks," insert a comma.

The amendment was agreed to.

The Clerk read as follows:

General expenses, Bureau of Biological Survey: For salaries and employment of labor in the city of Washington and elsewhere, furniture, supplies, traveling, and all other expenses necessary in conducting investigations and carrying out the work of the bureau, as follows:

Mr. CULLOP. Mr. Chairman, I move to strike out the last word. I do this for the purpose of having inserted in the RECORD a concurrent resolution adopted by both branches of the Indiana Legislature about 10 days ago concerning the quarantine of the foot-and-mouth disease in the State of Indiana.

It clearly shows the people of that State were dissatisfied with the manner in which this matter was being administered. The resolution is as follows:

Concurrent resolution pertaining to the foot-and-mouth disease.

Whereas there exists a modified quarantine by the Federal Government against 67 counties within the State of Indiana in which foot-and-mouth disease has not and does not at the present time exist, said modified quarantine prohibiting shipments of cattle, sheep, and other ruminants and swine for interstate shipment for any purpose other than immediate slaughter; and also a quarantine against 25 counties within the State of Indiana in which no known cases of foot-and-mouth disease now exist, 7 of the 25 counties adjoining counties where outbreaks of said disease occurred, but in which no outbreaks of said disease have existed at any time; and prohibiting interstate shipments from said quarantined counties unless inspected by Federal inspector before shipment, and also requiring that said shipments be made to quarantined sections of public stockyards at the point of destination or to abattoirs where Federal meat inspection is maintained, and prohibiting the same and the shipment from said point of destination, except to abattoirs within the State and for immediate slaughter only; and

Whereas the stockmen and farmers living within the counties under Federal quarantine are compelled to ship their live stock to quarantined sections of public stockyards and suffer heavy financial losses, amounting to from $40 to $100 a car because of shrinkage in weight of live stock, the result of delay in unloading cars and improper facilities for handling live stock, and because of the lower prices paid for all live stock in the quarantined section of said stockyards, due to lack of competition; and

Whereas farmers and live-stock breeders living in the State of Indiana are prohibited from shipping cattle, sheep, and swine interstate for purposes other than immediate slaughter, thus seriously interfering with the production of meat and the business and operations of the breeders of pure-bred stock; and

Whereas we believe that the control of foot-and-mouth disease is well in hand in the State of Indiana, and that there is a general and urgent demand for immediate relief by the farmers and live-stock men: Therefore be it

Resolved by the house of representatives (the senate concurring), That we respectfully request that the United States Senators and Members of Congress from the State of Indiana in the Congress of the United States call on the Secretary of the United States Department of Agriculture at an early date to request that reshipment of live stock be permitted from quarantine sections of stock yards now under a Federal quarantine to stock yards or stock markets in other States for immediate slaughter, and that the quarantine area which includes the counties in which the outbreaks of foot-and-mouth disease have occurred, and the infected animals have been slaughtered, and certain adjoining counties, be immediately changed to include the 5-mile zones surrounding premises where infection has existed; and that live-stock breeders and farmers located in the State of Indiana be allowed to ship, interstate, animals for breeding purposes from sections outside of the said 5-mile zones upon inspection by Federal or State quarantine officers; and further, that it is not the purpose or intention of this resolution to interfere with or hamper in any way the stamping out of the present outbreak of foot-and-mouth disease by the Federal and State authorities, which we believe is necessary to the live-stock industry of this country; and that we sincerely believe the relief asked for in these resolutions is reasonable and will not endanger in any way the live-stock interests of this or any other State; and that a copy of these resolutions be transmitted by the chief clerk of the house of representatives to the Secretary of the United States Department of Agriculture, and to each of the United States Senators and Representatives of the State of Indiana in the Congress of the United States.

Now, Mr. Chairman, some reference has been made about the quarantine of stock because of this disease in Indiana. I take it the work on this subject in that State was not so very satisfactory or the legislature would not have deemed it necessary to adopt this concurrent resolution. It was adopted about 10 days ago by a unanimous vote in both branches of the legislature, and was introduced because of the practical unanimous demand of the farmers and stock breeders to be relieved from what they felt and knew was operating as an injustice to them. They knew the manner in which the quarantine was enforced discriminated against them unjustly and ought to be modified so that the injustice would be removed. They felt it so keenly and knew it so well that the legislature recognized the merit of their contention and acted promptly in the premises as far as it could go. It would seem that a Government official with nothing but the good of the public at heart should not have permitted the matter to go on until the people were compelled to protest through their legislature. It occurs to me, and doubtless to each Member, that there was urgent necessity for this action on the part of the legislature or it would not have been taken. Public requirements demanded it take notice of the matter, and it did so. This clearly demonstrates that in the administration of this matter in that State the people have not been satisfied, and hence the expression was made of their objection in this public and official way.

Complaints of the wrongs done because of the manner in which it has been administered have been many and emphatic, and as the matter has been brought to the attention of the department in an official manner, I hope it will take proper notice of it and see to it that the party responsible for it shall be brought to justice and dealt with properly. This will not repair the injury done the innocent who have suffered because of it, nor will it repair the losses suffered, but it will admonish those who are intrusted with a similar public duty hereafter that such duty must be efficiently performed and the rights of the public preserved, which has not been done in this instance, as it most clearly appears.

The Clerk read as follows:

For investigating the food habits of North American birds and mammals in relation to agriculture, horticulture, and forestry, including experiments and demonstrations in destroying wolves, prairie dogs, and other animals injurious to agriculture and animal husbandry, and for investigations and experiments in connection with rearing of fur-bearing animals, including mink and marten, $110,000: *Provided*, That of this sum $15,000 shall be used for the destruction of ground squirrels on the national forests and other public lands: *And provided further*, That of this sum not more than $5,000 may be used in investigating the disease of wild ducks in the Salt Lake Valley region of Utah.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I do not know whether this paragraph is an illustration of how difficult it is to ever stop an appropriation after it has once started, or whether it is an illustration of the natural and proper extension of the work. We started in to appropriate a certain amount of money for the destruction of ground squirrels in the national forests, assuming that when they got those all destroyed we would quit making that appropriation. But possibly—I do not say that it is so—gentlemen who hold the job, when they run out of squirrels in the national forests, still like to continue the work, so they have got the committee to insert "or other public lands," and we now have entered on a project of killing all the ground squirrels on all the lands in the West.

If we commence to kill the ground squirrels in all the lands of the United States and my recollection as a boy is any good, it is quite a task that we have entered upon. What harm do the ground squirrels do the Government on the public lands?

Mr. BARTLETT. Will the gentleman allow an interruption?

Mr. MANN. Yes.

Mr. BARTLETT. I think we have also spent a considerable amount of money destroying them in California to prevent their carrying diseases.

Mr. MANN. Yes; that is carried in another bill.

Mr. LEVER. Does the gentleman from Illinois direct his inquiry to me?

Mr. MANN. To anybody who is willing to respond.

Mr. LEVER. The gentleman from Minnesota [Mr. ANDERSON] is thoroughly familiar with the proposition, and I appeal to him.

Mr. MANN. He is young and tender on the committee, and I suppose that is the reason that he dares to rush in to defend it. [Laughter.]

Mr. ANDERSON. I am not defending anything. I will read what was said before the committee:

Mr. HENSHAW. That is the case, Mr. Chairman. The new language as it appears in these estimates reads, "and adjacent public lands," but since that would limit our work to national forests and lands contiguous thereto, we now would like to change that again so as to read "national forests and other public lands." There are public lands more or less remote from national forests where we are very anxious to carry on demonstration work for the benefit of neighboring farmers, but our present authority is not sufficiently broad to permit that. If the words were changed to "and other public lands," that would enable us to do the needed work.

And so I take it that the change of language is designed to permit demonstration work for the benefit of settlers.

Mr. MANN. I do not know how accurate the gentleman is in other respects, but he is wholly inaccurate in his statement that this appropriation does not permit demonstration work on public lands as to ground squirrels, because this item is "for investigating the food habits of North American birds and mammals in relation to agriculture, horticulture, and forestry, including experiments and demonstrations in destroying wolves, prairie dogs, and other animals injurious to agriculture and animal husbandry." That permits the demonstration work on public lands in reference to ground squirrels.

Mr. ANDERSON. The proposition of the gentleman before the committee was that that only permitted demonstration in the forest reserves.

Mr. MANN. The gentleman in charge of the work does not know what the appropriation is. It is first $110,000 for demonstration work destroying animals injurious to agriculture. Then there is a provision that $15,000 of this shall be used for the destruction of ground squirrels in the national forests. That is a mandatory provision. I say here is a man with a job. The squirrels have run out; the money must be expended; so that the man has to extend the scope. He can not find squirrels on the national forests, so he wants to extend it and find them on the public domain. But he already has authority to make experiments in the way of demonstration work in any place in the national forests or on the public domain, or in New York City if he can find squirrels there. There is no limitation. But now he wants to be forced to destroy the squirrels on all the public domain. Why, that is an immense undertaking and ought not to be entered upon. If we enter upon it we will be asked to destroy all noxious animals in the United States before we get through if this gentleman continues to live.

The CHAIRMAN. The gentleman withdraws the pro forma amendment.

Mr. MANN. And could not get a reply.

The Clerk read as follows:

For all necessary expenses for enforcing the provisions of the act approved March 4, 1913 (37 Stat. L., 847, 848), relating to the protection of migratory game and insectivorous birds, and for cooperation with local authorities in the protection of migratory birds, and for necessary investigations connected therewith, $50,000.

Mr. CULLOP. I find a great many complaints concerning this legislation, and only yesterday I received a letter from the game warden of Indiana complaining about the operation of the law there, and inquiring if a test case had been made.

Mr. LEVER. A test case has been made.

Mr. CULLOP. Among other things, saying that the lawyers had advised the warden that the act itself was invalid and that it worked great hardships. A few hunters are living in the country yet in many places, and they desire to exercise the privilege of enjoying this sport, but that they are denied the pleasure on account of this law. The letter is interesting, and I here submit it for the benefit of the committee:

INDIANA FISH AND GAME COMMISSION,
Indianapolis, January 21, 1915.

Hon. W. A. CULLOP, *Washington, D. C.*

DEAR MR. CULLOP: Under the Federal law of 1913, providing for Federal control of migratory game and insectivorous birds, waterfowl, including brant, ducks, geese, and swan, may be killed from September 1 to December 15, inclusive. Woodcock may be killed from October 1 until November 30, inclusive, and jacksnipe or Wilson snipe, black-breasted and golden plover, and greater or lesser yellow legs may be killed from September 1 to December 1, inclusive.

It so happens that the open season provided by said law for killing the above game birds is the very time that there are none of these birds in Indiana to shoot, and the sportsmen of this State feel that the law is a very unjust one, and they are up in arms against it. Practically the only duck shooting we have in Indiana is in the early spring, as the birds linger a few days in their flight to the north, and our sportsmen, under the Indiana law, can shoot ducks, geese, etc., until the 15th day of April, which gives them a few days of duck shooting in the spring months. The Federal law takes away the only duck shooting our sportsmen have. These same conditions exist as to the shooting of woodcock, snipe, and the other game birds mentioned above. The open season fixed by the Federal law for shooting them is the very time when there are none in Indiana to shoot. Our sportsmen view the Federal law as purely a rich man's law. These birds are protected by law in their flight from the south to the north and are then slaughtered in the summer months in Canada, and, really, the only sportsmen who have any opportunity to enjoy shooting these birds are those who are wealthy enough and have sufficient leisure to spend their winters south and their summers north.

I am informed that the Federal law is not being enforced and that the Government has not the men available to enforce it, if it so desired. It seems to be the opinion of a great many of our best lawyers that the said law is unconstitutional. I am also informed that an article was published in Field and Stream to the effect that certain parties in the State of Kansas had violated the law and invited the Federal authorities to arrest them, in order to test its constitutionality, but that the Federal authorities refused to make the arrests. What are we to do? Shall we go ahead and observe the Federal law or shall we disregard it and observe only our State laws?

The Fish and Game Commission of Indiana is vitally interested in this matter, not only because it seems to be unjust to our sportsmen, but for the further reason that our commission derives its funds from the sale of licenses, and if our sportsmen are deprived of this shooting, there is no reason why they should pay out their money for the privilege.

I should be very glad to have you take this matter up with the proper authorities and give me your advice as to what action this department should take in regard to the observation of the State law.

Yours, very truly,

E. C. SHIREMAN, *Commissioner.*

Was it the real purpose of this law when it was enacted in regard to the migration of game from one part of the country to another to protect it, or was it to give some hunters an advantage over others?

Mr. LEVER. It is to protect migratory game. That answers the question in one sentence.

Mr. CULLOP. And not in the interest of the hunters of any particular section of the country. I must confess it looks to me as if it was in the interest of certain classes of hunters.

Mr. LEVER. Not that I know of.

Mr. CULLOP. Now, it is plain from this letter of the game warden that these birds and ducks go over into Canada, and the rich sportsmen of this country go over there during the summer months and have a good time hunting, while the poor fellow at home, because of this legislation, is denied that right. I think there is something in this contention in reference to it. They go over into Canada and spend the summer touring around a month or so enjoying themselves and killing the game that goes out of the United States, while the ordinary fellow in this country, on account of this legislation and who is not so well fixed financially, can not visit Canada and the northern part of the country, and hence has no opportunity to have his sport and kill game here at home. The same amount of game, it is claimed, is killed every year, but they go out of the country to kill it; but it is in all probability the same game that passes from this country into the northern country. Now, if this be true it would seem the legislation was enacted for the benefit of the rich and to the detriment of the poor. I am opposed to it.

Mr. LEVER. If the gentleman from Indiana will permit, as I said a moment ago, an appeal of this case is before the Supreme Court of the United States.

Mr. CULLOP. I would ask if the gentleman can give the title of the case? I do hope the decision of the lower court will be sustained, and let the poor hunter have a chance.

Mr. LEVER. I do not happen to have the title, but it is a decision of Judge Trevor, of Arkansas.

Mr. BARTLETT. I want to say that I put that decision in full in the RECORD last Congress when it was made.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. BARTLETT. Mr. Chairman, I desire to be recognized. I desire to ask the gentleman if he can give me some information as to how much of the $50,000 appropriated last year has been expended in the enforcement of this law up to this time?

Mr. MANN. The year is not up yet.

Mr. LEVER. It will be impossible to tell the gentleman how much we have spent of the $50,000 up to this time.

Mr. MANN. We appropriated $50,000 in the last bill.

Mr. BARTLETT. The House appropriated $10,000 and the Senate made it $50,000; and, as I recall, the $50,000 at that time was all that the Department of Agriculture asked for and all they thought they could expend, but it was stated by the then Secretary of Agriculture, or the chief having in charge this provision, that they did not propose to endeavor to enforce the law and spend much money until the question had been decided as to the right of Congress to enact any such law; and, if I recall, the gentleman from South Carolina, the chairman of the committee, then stated that that $10,000 was all that was needed and all that the department asked for, and, on account of the doubtful constitutionality of this law, the department did not think that they would spend it. However, it went over to the Senate and, with the same information, the Senate put it up to $50,000; and it is important to know whether the department has spent the $50,000, or calculates expending it, or again contemplates expending this sum.

Mr. LEVER. I would say to the gentleman it would be impossible for me to get the data he wants at my hand at the moment. I have no information at hand on that proposition.

Mr. MANN. They are spending money now.

Mr. BARTLETT. Oh, they can expend the money. They can throw it at the birds.

Mr. MANN. I thought the gentleman asked if they were doing it.

Mr. BARTLETT. I do not doubt that they will spend it if you give it to them.

Mr. MANN. Permit me to say that there have been a good many prosecutions brought under this law, and the Government has been successful in every case except the Arkansas case.

Mr. BARTLETT. I do not remember about that.

Mr. MANN. I read about the case officially the other day.

Mr. BARTLETT. Of course we have got to appropriate for this provision as long as it is the law.

Mr. HAWLEY. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. Oh, yes.

Mr. HAWLEY. Of the $50,000, $7,000 is expended here in Washington for necessary clerical services and other work and $43,000 is expended for the hiring of persons, either alone or in

cooperation with associations in the States, for the protection of water fowl and game birds and insectivorous birds.

Mr. BARTLETT. The gentleman means it has been allotted by the Secretary of Agriculture to be expended?

Mr. HAWLEY. It is being expended now for this fiscal year ending June 30, 1915.

Mr. BARTLETT. I do not doubt but that he would expend twice as much if you gave it to him.

Mr. BARTON. Mr. Chairman, this law is supposed to be a national law, affecting all States alike. I would like to ask the chairman of the committee how it happens that in every State in the Union except three Southern States this law goes into effect on the 1st day of February? Why are the three Southern States excluded?

Mr. LEVER. I can not answer that question, because I do not know that it is a fact.

Mr. MANN. Oh, the law is in effect everywhere.

Mr. BARTON. I am so informed by the department.

Mr. LEVER. The chairman evidently has in mind something about the open and closed season?

Mr. BARTON. Yes; the open and closed season.

Mr. LEVER. That would be affected by the climate where they are.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Total for Division of Accounts and Disbursements, $44,920.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word.

Mr. MANN. We have now come to the Division of Publications, and I think we shall be able to finish this bill easily on Thursday and then have some time to spare.

Mr. LEVER. If the gentleman will pardon me a moment, I suggest to the gentleman from Wisconsin [Mr. STAFFORD] that there is absolutely no change in the Division of Publications.

Mr. MANN. It will not take any longer Thursday than to-night.

Mr. LEVER. I am anxious to get to that Bureau of Crop Estimates.

Mr. MANN. Oh, I think the gentleman will be in great luck to get to the Bureau of Soils, on page 47. We are now on page 55, and we have read about 30 pages to-day.

Mr. LEVER. Will the gentleman give me five minutes? It remains five minutes until 6 o'clock.

Mr. MANN. I am going to make a point of no quorum.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the Chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 20415) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1916, and had come to no resolution thereon.

LEAVE OF ABSENCE.

Mr. CROSSER, by unanimous consent, was granted leave of absence indefinitely, on account of the serious illness of his father.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. FLOOD of Virginia, by direction of the Committee on Foreign Affairs, reported the bill (H. R. 21201) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1916, which was read a first and second time, referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report (No. 1324), ordered to be printed.

Mr. MANN. Mr. Speaker, I reserve all points of order on the bill.

The SPEAKER. The gentleman from Illinois reserves all points of order.

HOUR OF MEETING ON THURSDAY.

Mr. LEVER. Mr. Speaker, I ask unanimous consent that when the House adjourns to-morrow it adjourn to meet on Thursday at 11 o'clock a. m.

The SPEAKER. The gentleman from South Carolina asks unanimous consent that when the House adjourns to-morrow it adjourn to meet at 11 o'clock Thursday morning. Is there objection?

There was no objection.

EXTENSION OF REMARKS.

Mr. McKELLAR. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the ship purchase bill.

The SPEAKER. The gentleman from Tennessee [Mr. McKELLAR] asks unanimous consent to extend his remarks in the RECORD on the subject of the ship purchase bill. Is there objection?

There was no objection.

Mr. BARKLEY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by having printed a speech delivered by Carl Schurz on peace and war.

The SPEAKER. The gentleman from Kentucky [Mr. BARKLEY] asks unanimous consent to extend his remarks by printing in the CONGRESSIONAL RECORD a speech made by Carl Schurz. Is there objection?

Mr. BORLAND. Mr. Speaker, it seems to me that speech must have been printed and pretty widely distributed years ago. I shall have to object to that.

Mr. BARKLEY. It is only a very short speech, Mr. Speaker, and it is not included in his printed speeches.

Mr. BORLAND. What is it about?

Mr. BARKLEY. Peace and war. It was made soon after the Cleveland Venezuela message.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, Mr. Speaker, how long a speech is it?

Mr. BARKLEY. It would take about 10 minutes to read it.

Mr. MANN. That depends upon how fast a man talks. How much space would it take in the RECORD?

Mr. BARKLEY. It would not take more than half a page. I ran across it in a newspaper. It is not printed in the collected speeches, and it so impressed me that I would like to have it printed.

The SPEAKER. Is there objection?

There was no objection.

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bill:

H. R. 19076. An act to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

ADJOURNMENT.

Mr. LEVER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock p. m.) the House adjourned until to-morrow, Wednesday, January 27, 1915, at 12 o'clock noon.

EXECUTIVE COMMUNICATION.

Under clause 2 of Rule XXIV, a letter from the Secretary of the Treasury, transmitting copy of communication of the Secretary of War submitting an estimate of deficiency in the appropriation for transporting and caring for interned Mexican soldiers and military refugees for the fiscal year ending June 30, 1915 (H. Doc. No. 1522), was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. J. R. KNOWLAND, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 20977) to provide for the establishment of a life-saving station in the vicinity of Duxbury Reef, Cal., reported the same with amendment, accompanied by a report (No. 1323), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. BURNETT, from the Committee on Immigration and Naturalization, to which was referred the bill (S. 3419) admitting to citizenship and fully naturalizing George Edward Lerrigo, of the city of Topeka, in the State of Kansas, reported

the same without amendment, accompanied by a report (No. 1321), which said bill and report were referred to the Private Calendar.

Mr. WITHERSPOON, from the Committee on Naval Affairs, to which was referred the bill (H. R. 18174) to transfer Capt. John Calvin Leonard from the retired to the active list of the United States Navy, reported the same without amendment, accompanied by a report (No. 1322), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 20261) granting a pension to James G. Caldwell, and the same was referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. GALLIVAN: A bill (H. R. 21183) to amend section 212 of the Penal Code; to the Committee on the Post Office and Post Roads.

By Mr. TEN EYCK: A bill (H. R. 21184) to increase the limit of cost of the United States post-office building and site at Cohoes, N. Y.; to the Committee on Public Buildings and Grounds.

By Mr. BARNHART: A bill (H. R. 21185) authorizing the Secretary of War to donate condemned cannon and cannon balls; to the Committee on Military Affairs.

By Mr. FLOOD of Virginia: A bill (H. R. 21201) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1916; to the Committee of the Whole House on the state of the Union.

By Mr. GITTINS: Concurrent resolution (H. Con. Res. 59) authorizing the President to invite the nations of the world to participate in a conference; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BARNHART: A bill (H. R. 21186) to remove the charge of desertion from the military record of George W. Philpott and to grant him an honorable discharge; to the Committee on Invalid Pensions.

By Mr. BRUMBAUGH: A bill (H. R. 21187) granting a pension to Maggie Little; to the Committee on Invalid Pensions.

By Mr. CLAYPOOL: A bill (H. R. 21188) granting a pension to Abraham Branadum; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21189) granting a pension to Henry Steinmetz; to the Committee on Invalid Pensions.

By Mr. FRENCH: A bill (H. R. 21190) granting an increase of pension to Benjamin N. Trout; to the Committee on Invalid Pensions.

By Mr. HAMLIN: A bill (H. R. 21191) granting an increase of pension to Savilla Milligan; to the Committee on Invalid Pensions.

By Mr. HART: A bill (H. R. 21192) for the relief of the Orvil Cooperative Building & Loan Association; to the Committee on Claims.

By Mr. MAHAN: A bill (H. R. 21193) granting a pension to Charles C. Dougherty; to the Committee on Pensions.

By Mr. TAGGART: A bill (H. R. 21194) granting a pension to John C. Brewer; to the Committee on Pensions.

Also, a bill (H. R. 21195) granting a pension to Mary White; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21196) granting an increase of pension to Sherman L. Abbott; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21197) granting an increase of pension to Henry W. Batsford; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21198) granting an increase of pension to William E. Stukey; to the Committee on Invalid Pensions.

By Mr. CONNOLLY of Iowa: A bill (H. R. 21199) granting a pension to Lilla Riley; to the Committee on Invalid Pensions.

By Mr. THOMPSON of Oklahoma: A bill (H. R. 21200) quieting and confirming the title of the Methodist University of Oklahoma in and to certain tracts of land located in the city of Guthrie, Okla.; to the Committee on the Public Lands.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of Mississippi Choctaw Indians, favoring the passage of House bill 19213, for the relief of Mississippi Choctaw Indians; to the Committee on Indian Affairs.

Also, petition of A. B. Wiltse, Ritzville, Wash., relative to fourteenth amendment to the Constitution; to the Committee on the Judiciary.

By Mr. ALLEN: Petition of Cincinnati (Ohio) Branch, National German-American Alliance, favoring embargo on contraband of war; to the Committee on Foreign Affairs.

Also, petition of Louis Brickenberger and other citizens of Hamilton County, Ohio, against prohibition in the District of Columbia; to the Committee on the District of Columbia.

By Mr. BAILEY: Petitions of Otto Pippart, Martin Rosch, Adam Buckreis, C. J. Pfeffer, C. E. Lamade, Michael Foeldery, George Pielmeier, George A. Scheeler, Carl Willnecker, H. Sabathne, K. Kumpf, John C. Schomberg, George Breisacher, Edward A. Gromiller, Matthew Hauser, Karl Wolke, Francis Weidlich, Richard Siegel, Peter Bey, George Schottdorf, George Nickola, Adam H. Brede, Joseph Murl, August Hauser, August Noll, George Funk, John Gieg, Fred Apple, Louis Wiesinger, Albert Staerk, Adolph Koehle, Adolph Benzel, Fred Nickola, John B. Ritter, Hugo Weissflog, Robert Schroeder, Adam Schauer, Jacob Haller, John George Schmidt, and Anton Steckeler, all of Altoona, Pa., for the enactment of legislation prohibiting the exportation of arms and munitions of war; to the Committee on Foreign Affairs.

Also, petition of Italian Protective Association of Westmoreland County, Pa., protesting against passage of the immigration bill; to the Committee on Immigration and Naturalization.

Also, petition of Local Union No. 472, United Mine Workers of America, favoring passage of the Kern-Foster bill; to the Committee on Mines and Mining.

By Mr. BEAKES: Petitions of Woman's Literary Club, First Baptist Church, First Presbyterian Church, Methodist Episcopal Church, Woman's Christian Temperance Union, First Church of Christ (Scientist), Markham Air Rifle Co., Daisy Manufacturing Co., and 9 citizens, all of Plymouth, Mich., protesting against the shipment of American horses to countries now at war; to the Committee on Foreign Affairs.

Also, petitions of Fred Engel, president, and Joachim Schwieger, secretary, Arbeiter Bund of Dundee; Rev. F. Bauer and 45 citizens of Riga; J. Fred Schaeberle and 37 citizens of Ann Arbor, all of the State of Michigan, in opposition to the shipment of arms to foreign countries; to the Committee on Foreign Affairs.

By Mr. CALDER: Petition of Board of Aldermen of New York City, favoring S. 3672, providing for exchange between Federal Government and State of New York for certain waterways; to the Committee on Rivers and Harbors.

By Mr. CARR: Memorial of St. Kagimier Society, of Windber, Pa., protesting against immigration restrictions; to the Committee on Immigration and Naturalization.

By Mr. CURRY: Memorial of Board of Supervisors of Solano County, Cal., favoring old-age retirement of superannuated civil-service employees; to the Committee on Reform in the Civil Service.

By Mr. DILLON: Petition of citizens of South Dakota, favoring bill to prohibit export of arms; to the Committee on Foreign Affairs.

By Mr. EAGAN: Petitions of John Sul, of Hoboken, and William Biskorcsanys, of Guttenberg, N. J., favoring passage of House joint resolution 377, to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. ESCH: Memorial of directors of the Racine (Wis.) Commercial Club and directors of the Racine (Wis.) Retail Merchants' Association, asking that combined passenger and package freight steamers on the Great Lakes be exempted from the provisions of the seamen's bill; to the Committee on the Merchant Marine and Fisheries.

Also, petition of C. F. Pfefferkern and 63 other citizens of Elroy, Wis., favoring passage of resolution to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. GALLIVAN: Memorial of citizens of Massachusetts, protesting against the passage of the Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. GITTINS: Petition of citizens of Niagara Falls, N. Y., favoring bill to improve the Harlem River; to the Committee on Rivers and Harbors.

By Mr. GUERNSEY: Petition of sundry citizens of Lewiston, Me., favoring passage of House joint resolution 377, to prohibit the export of war material; to the Committee on Foreign Affairs.

By Mr. KEISTER: Petition of Polish National Giuini, of Mount Pleasant; Polish Lodge, Z. N. P., of Jeannette; St. Joseph's Society, Lodge 88, Polish Alliance; St. Stanislaus Lodge, B. & M., 364; Society of Gorali Polskich, all of Mount

Pleasant; Branch 1380 of the National Polish Alliance, and United Groups of the National Polish Alliance, of Jeanette; H. M. B. Stanislaus Group, No. 1143, of Forbes Road; National Polish Alliance, No. 791, of East Vandergrift; 78 members Knights of the White Eagle, of Mount Pleasant; and National Polish Alliance of Monessen, all in the State of Pennsylvania, against Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. KONOP: Petition of Carl Hermann and other citizens of Oconto, Lawrence, and Brown Counties, and citizens of Marinette, Wis., favoring resolution to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. LONERGAN: Petition of John Gwozdz, Thompsonville, Conn., relative to Smith-Burnett Immigration bill; to the Committee on Immigration and Naturalization.

By Mr. McGILLICUDDY: Petition of National German-American Alliance, of Lewiston, Me., favoring the prohibition of the sale and export of munitions of war; to the Committee on Foreign Affairs.

By Mr. MAGUIRE of Nebraska: Petitions of sundry citizens of Plattsmouth, Elmwood, Alvo, Greenwood, and Murdock, Nebr., favoring passage of House joint resolution 377, to prohibit the export of war material; to the Committee on Foreign Affairs.

By Mr. MAHER: Petition of Board of Aldermen of New York City, favoring S. 3672, providing for exchange between Federal Government and State of New York of certain waterways; to the Committee on Rivers and Harbors.

By Mr. MILLER: Petitions of sundry citizens of Littlefork and Hibbing, eighth district of Minnesota, favoring bill to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. MOTT: Petition of National German-American Alliance, of Oswego, N. Y., favoring passage of House joint resolution 377, to prohibit export of war material; to the Committee on Foreign Affairs.

Also, petitions of citizens of Cazenovia, N. Y., relative to world federation for the adjudication of international disputes; to the Committee on Foreign Affairs.

Also, memorial of branch of the Polish Alliance of America, Oswego, N. Y., protesting against the literacy test in the immigration bill; to the Committee on Immigration and Naturalization.

By Mr. REILLY of Connecticut: Petition of citizens and organizations of Connecticut, against literacy test in immigration bill; to the Committee on Immigration and Naturalization.

By Mr. ROUSE: Petitions of 305 and more citizens of Kentucky, favoring resolution to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. SABATH: Memorial of sundry societies of Chicago, Ill., favoring House joint resolution 377, to prohibit the export of war material; to the Committee on Foreign Affairs.

Also, memorial of St. Samalaw Br My Society and Pulaski, Washington, and Kosciusko Society, of Chicago, Ill., protesting against the passage of the Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. TOWNSEND: Petitions of the Eleventh and Fifteenth Ward Branch, Socialist Party, Newark, N. J., protesting against treatment of striking workingmen at Roosevelt, N. J.; to the Committee on the Judiciary.

By Mr. UNDERHILL: Petitions of citizens of Cohocton, N. Y., favoring passage of bill to prohibit export of war material; to the Committee on Foreign Affairs.

SENATE.

WEDNESDAY, *January 27, 1915.*

(Legislative day of Tuesday, January 26, 1915.)

The Senate reassembled at 11 o'clock a. m., on the expiration of the recess.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gronna	Overman	Smith, Mich.
Bankhead	James	Page	Smoot
Bryan	Jones	Perkins	Stone
Catron	Kenyon	Pittman	Thornton
Chamberlain	Kern	Ransdell	Tillman
Clapp	La Follette	Root	Townsend
Culberson	Martin, Va.	Saulsbury	Vardaman
Dillingham	Martine, N. J.	Shafroth	White
Fletcher	Nelson	Sheppard	Williams
Gallinger	O'Gorman	Sherman	

Mr. JAMES. I was requested to announce that the Senator from South Carolina [Mr. SMITH] is detained from the Senate on account of illness in his family.

The VICE PRESIDENT. Thirty-nine Senators have answered to the roll call. There is not a quorum present. The Secretary will call the roll of absentees.

The Secretary called the names of the absent Senators, and Mr. HARDWICK, Mr. HOLLIS, Mr. LANE, Mr. MCLEAN, Mr. REED, Mr. SHIELDS, Mr. THOMAS, and Mr. THOMPSON answered to their names when called.

Mr. SMITH of Arizona, Mr. SMITH of Georgia, Mr. MCCUMBER, Mr. BRADY, and Mr. NORRIS entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty-two Senators have answered to the roll call. There is a quorum present.

PENSION BILLS.

Mr. SMOOT. Mr. President, I ask unanimous consent that we may take up the bills granting pensions and increase of pensions to certain soldiers and sailors of the Civil War. I will state to the Senator from Florida [Mr. FLETCHER] there are only about a half dozen of those bills on the calendar, and it will not take very long to pass them. I believe that this would be a very good time to take them up, if there is no objection. Some of them are Senate bills and I know the other House is waiting to make up an omnibus pension bill, and they ought to be given an opportunity to do so in order that they may be passed upon at this session of Congress. I ask the Senator if he will not allow this to be done. I do not mean general legislation, but simply the bills granting pensions and increase of pensions to the soldiers and sailors.

Mr. SMITH of Arizona. Not to affect the status of the pending bill.

Mr. SMOOT. Not to affect the status of the pending bill, of course.

Mr. FLETCHER. Mr. President, I would not like to do that now. I think it is very important that we should proceed with the pending bill. The Senate yesterday did not sit as many hours as it might have done, and I hope the Senator from Utah will not ask me to yield now. One thing leads to another and we do not know how much time we would lose. I feel constrained to object at present. It may be that at some later time we can arrange it.

Mr. SMOOT. Would the Senator object to simply taking up the Senate pension bills at this time so that they can be sent to the other House?

Mr. FLETCHER. I do not feel justified in consenting to any variation from the regular order at this time. I am sorry, but I must ask for the regular order.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the Speaker of the House had signed the enrolled bill (S. 5614) for the improvement of the foreign service.

THE MERCHANT MARINE.

Mr. GALLINGER. I ask that the unfinished business be laid before the Senate.

The VICE PRESIDENT. The Chair lays before the Senate the unfinished business, Senate bill 6856.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia, to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes.

Mr. GALLINGER. Mr. President, when I yielded the floor on yesterday for a motion to go into executive session I was presenting the report of the directors of the Boston Chamber of Commerce, one of the most instructive documents that has been issued on the subject now before the Senate. Before concluding the reading of the report I beg to inquire what the question before the Senate is at the present time.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Massachusetts [Mr. LODGE] to the original bill.

Mr. GALLINGER. I ask that the amendment be read, as I may want to address myself to it.

The VICE PRESIDENT. The Secretary will read the amendment.

The SECRETARY. It is proposed to add to the bill the following proviso:

Provided, That no vessels shall be purchased under this act which are the property, in whole or in part, of or which are in any manner controlled or subsidized by any of the nations now at war, nor shall

any vessels be purchased under this act which are the property of any of the subjects or citizens of said belligerent nations.

Mr. GALLINGER. Mr. President, I made the inquiry for the reason that I wanted to ascertain whether the amendment now under consideration is embraced in the new draft of the bill reported on yesterday.

Mr. NELSON. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Minnesota?

Mr. GALLINGER. I yield.

Mr. NELSON. I will say to the Senator that it is not included in the substitute that was reported yesterday.

Mr. GALLINGER. I have just discovered that fact.

Now, Mr. President, I will conclude the reading of the report of the Boston Chamber of Commerce:

The proposed bills profess, in general language, to provide Government-owned ships only for "the foreign trade," but this profession is thrown to the winds by an amendment adopted in the Senate Committee on Commerce which includes Hawaii among the regions to which a Government-owned fleet shall operate. Hawaii is not a foreign country. It is not a dependency like the Philippines or Guam. It is a regularly organized Territory of the United States, and its ports are ports of the United States, exactly as are Boston and New York and Philadelphia and San Francisco. Trade with Hawaii is and has been since 1900 American coastwise trade, in which none but American vessels may lawfully participate. There has not been a word of suggestion or complaint that the war in Europe affected in any way the transportation of merchandise between Hawaii and the American mainland, for which a large, new, and increasing American fleet is available. The inclusion of Hawaii among foreign ports in foreign trade is without a shadow of excuse; all interested in the American merchant marine will rightfully regard it as an ugly menace, as an "entering wedge" to Government competition in the entire great coastwise commerce of this country, reserved for more than a hundred years to American ships and American owners, and now employing a vast shipping of upward of 7,000,000 tons. Any plea that the help of the Government is needed in this mighty trade is wholly baseless and indefensible.

Mr. President, the amendment in the nature of a substitute submitted to the Senate on yesterday proposes to do to a certain extent precisely what the Boston Chamber of Commerce feared would be done in the matter of this legislation. It opens, to a certain extent, the coastwise trade to these ships that are to be built by the money of the Government, breaking down the laws that relate to the coastwise trade of the United States which have been on the statute books for over a century, and to my mind, next to the matter of Government ownership, that is one of the most serious conditions which confront us in this proposed legislation.

Mr. NELSON. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Minnesota?

Mr. GALLINGER. I do.

Mr. NELSON. I would inquire of the Senator if the Hawaiian line—I do not recall its corporate name——

Mr. PERKINS. The American-Hawaiian Line.

Mr. NELSON. I ask the Senator if the American-Hawaiian Line is not one of the most prosperous steamship lines that we have in this country?

Mr. GALLINGER. It is one of the most prosperous and one that, perhaps, does more credit to the American merchant marine, such as it is, than any other line now in operation. The Senator from North Dakota [Mr. MCCUMBER], sotto voce, asks me if they are able to supply the demand. There has never been any suggestion that they need additional ships between the ports of the United States and Hawaii, and there is not any excuse for breaking down the coastwise laws, so far as Hawaii is concerned.

The report concludes as follows:

The amendment added to the bill in the Senate Committee on Commerce authorizing the Government to charter, lease, or transfer its ships to private corporations is a frank recognition of the force of the criticism which the original plan has met with everywhere from the representative mercantile bodies of the United States. But this modified proposal also is essentially unsound. So long as merchant ships cost more to operate under the American flag than under foreign flags no Government-owned ships will be chartered by experienced shipowners unless the amount of this additional cost of operation is subtracted from the charter price, leaving that price merely nominal. Under such conditions the Government, of course, will actually be paying a concealed subsidy, which might much better be a frank, open, and stated one.

The committee on merchant marine of the Boston Chamber of Commerce therefore disapproves the bills pending in both Houses of Congress (H. R. 18666 and S. 6856) for Government ownership and operation of vessels in the foreign trade for the following reasons:

(a) It is a sound principle that the Federal Government should not engage in a business which, under suitable conditions, can be conducted to equal or better advantage by private enterprise.

(b) Such an undertaking would be an unwise departure from the traditional policy of the American people, would involve a wasteful expenditure of public money, and would imperil our neutral position in the great European war.

(c) No present emergency justifies the Government in embarking in the ocean shipping business; increased governmental facilities for marine insurance will largely solve the immediate problem of the cotton trade; Government ownership could not immediately add to the number of ships afloat upon the seas; and wherever there is a real need for vessels they can be as easily supplied by other means without resorting to this unsound and hazardous experiment.

(d) The proposed legislation would discourage private capital and personal initiative, and thereby indefinitely defer the development of an American ocean shipping industry, so vital to the commercial progress of Boston, of New England, and of the whole United States.

We make the following suggestions as to methods for the creation of a strong and enduring merchant marine, which would be preferable to Government ownership and operation as proposed in the pending bills, and urge their consideration by Congress:

SUGGESTIONS.

1. The establishment in the Department of Commerce of a shipping board of five members, after the example of the British Board of Trade and similar organizations of other maritime governments, such a shipping board to be composed of the Commissioner of Navigation, a representative of the ship-owning interests, of the shipbuilding interests, of the shippers in water-borne trade, and an expert in marine insurance, this board to have general supervision of the American merchant marine.

2. A prompt revision and modernizing of our navigation laws and regulations, so far as they unnecessarily increase the cost of operating American ships as against foreign vessels.

3. An amendment of the ocean-mail law of 1891 so that the compensation now paid to 20-knot ships to Europe can be paid to ships of less speed—of the second class—suitable to establish regular mail, passenger, and fast-freight services in naval reserve ships on the longer routes to South America, Australasia, and the Orient.

4. In place of an investment of $40,000,000 in Government ownership and operation a Federal fund of the same amount, to be administered by the shipping board above referred to for the purpose of guaranteeing mortgages examined and approved by the board or for careful loans upon shipping built or purchased for over-seas trade and fitted for auxiliary naval service.

The sum of $40,000,000 devoted to ownership and operation of a Government-owned fleet would produce only a relatively small fleet, but a proper use of a Government fund in the manner indicated would provide a large one, of far greater value to the commerce of the Nation.

5. Annual retainers of a proper amount to citizen officers and men of merchant vessels of the United States, after the practice that has proved so successful, particularly in the British mercantile marine, and special compensation to steamships not under contract for carrying mails, but built on designs approved by the Navy Department and pledged to the service of the Government as fuel ships, supply ships, or transports, so that the Government may be able to control an adequate American auxiliary fleet and a naval reserve of officers and men in time of need.

6. To meet a present condition an extension of the powers of the existing Bureau of War-Risk Insurance to cover marine insurance on hulls and cargoes, with the understanding that this bureau shall be discontinued when the war is ended.

Respectfully submitted.

ELWYN G. PRESTON, *Chairman*,	THEODORE JONES,
EDWARD E. BLODGETT,	WINTHROP L. MARVIN,
L. A. COOLIDGE,	ROBERT S. PEABODY,
PAUL E. FITZPATRICK,	GEORGE F. WILLETT,
FREDERICK FOSTER.	

The special committee on the American merchant marine in the foreign trade of the Chamber of Commerce of New York has submitted an interesting and instructive report. It is in line with the declaration of almost every commercial body of the country, and conclusively proves that the business interests of the United States are absolutely and unreservedly opposed to the proposed legislation.

On that point, Mr. President, I desire to say that, so far as the commercial bodies of the United States are concerned, I know of none—unless we except the dispatch which came here from a citizen of Chicago the other day, who stated that the executive committee of the Chicago Board of Trade had passed a resolution in favor of this legislation—I know of no other body that has passed resolutions of that kind, while, on the other hand, from the Atlantic to the Pacific the boards of trade and commercial organizations, representing the business interests, shipping included, have passed strong and forceful resolutions condemning it unreservedly.

The report of the special committee on the American merchant marine in the foreign trade of the Chamber of Commerce of New York, to which I have referred, is as follows:

To the Chamber of Commerce:

The war in Europe has centered attention in this country upon our lack of a merchant marine. The problem, while present in the public mind to some extent for years, had not been brought home forcibly to all parts of the country as has been done by the partial tying up of the commerce of the world, and the consequent inability of this country to find neutral tonnage to carry its products to foreign markets. This sudden shortage of vessel tonnage resulted in an abrupt advance in freight rates, making it possible for the first time in years for American vessels to engage profitably in foreign trade.

The conditions to-day are recognized by all to be abnormal, and to some extent unsafe as a permanent basis for the reestablishment of our merchant marine; but they are certain to continue, so long as a state of war exists in Europe, and probably, because of the wastage of vessel property during the conflict, for several years after it ends.

The return to normal conditions in Europe must be gradual. Industries, to-day prostrate, must be reconstructed. Cities which have been laid waste must be rebuilt. The products of Europe will not equal the demands of that Continent; and the cost of shipbuilding which has already advanced 20 per cent in England, will continue for some time upon a higher level than has been normal in the past. It seems, therefore, that the immediate future affords an opportunity that ought to be availed of to reestablish our foreign merchant marine and the shipbuilding industry of this country.

Mr. FLETCHER. Mr. President, may I make an inquiry of the Senator in regard to the report of the New York Chamber of Commerce from which he is reading? I take it that is the report which was submitted some days ago to the Chamber

of Commerce, in which the committee recommend as a remedy for the present situation the guaranteeing of bonds issued by private concerns that might engage in the shipping business. That is the remedy proposed, as I understand, in the report from which the Senator is quoting.

Mr. GALLINGER. This is the report of the special committee on the American merchant marine in the foreign trade of the New York Chamber of Commerce. I propose to read it with some care, and the Senator will be able to ascertain exactly what the special committee recommends. I have not as yet examined it, and hence am not familiar with its recommendations; but whatever they are, they are worthy of our consideration.

Mr. FLETCHER. The reason I was inquiring was because I think there was a subsequent report, although I am not certain about that, and I did not know from which one the Senator was reading.

Mr. GALLINGER. The report continues:

The problem under the most favorable conditions is difficult; but it is rendered less difficult by the unusual conditions which now exist. That a merchant marine is to-day desired by the American people can not be denied. There are some who, while recognizing all of the difficulties, believe that our shipping should be reestablished by Government aid, no matter what the cost may be. There are others who think that the industry should be left to work out its own future and be reestablished only if it can be done without Government aid. A third element, representing perhaps the greater part of the people of the country, believe that reasonable Government aid should be extended to reestablish so important an industry, and are willing that substantial Government assistance be extended during the development period, if a wise method can be suggested.

Your committee, while sharing to the fullest extent the desire of all citizens to see the American flag and American shipping again upon the high seas, recognizes that the problem is one of business; and that an American merchant marine to be permanent must justify itself in competition with ships of foreign nations. Your committee believes that American shipping can justify itself upon this basis, once the development period has been passed, and feels that advantage should be taken of the present exceptional opportunity to place American vessels in competition for the commerce of the world.

Before proceeding to a discussion of the methods which seem practicable, we desire to place ourselves on record as opposed to Government ownership and Government operation of vessels. We do not base our opposition to this principle upon the ground that a Government department can not operate vessel property as cheaply as private owners, although we have grave doubt of the ability of the Government to meet the economic standards of successful private enterprise. We base our objections on the much more fundamental principle in this instance that Government competition in this field of industrial effort will, in our belief, defeat the ends which it is sought to attain.

The American people desire not only to see the American flag upon the high seas, but to see American commerce restored to a position of supremacy. England alone has over 4,000 steamers engaged in foreign trade.

Some estimates have placed the number at twice that figure—

and to meet and ultimately outdistance competition of this character will require an enormous investment of American capital and energy. It is impossible to conceive that Government ownership and operation can be successfully extended to cover so vast a field, and the moment it is invaded by the competition of public capital American private capital and energy, so essential to the successful restoration of our merchant marine on any adequate scale, will decline to enter the field. We have in New York City an example of the operation of this principle. The municipality has begun the construction of wharves and piers for the accommodation of freight vessels. Private enterprise has refused to meet the competition of public capital and untaxed property, and the construction of wharf property through private effort has ceased. The city has been unable to keep pace with the demands of shipping, and commerce is already beginning to suffer from a shortage of pier property.

Certain officials in Washington who are deeply interested in the experiment of Government ownership and operation of vessel property reply to all objections with the statement that private capital has failed to take substantial advantage of the amendments already made to the shipping laws, and that unless American ships are forthcoming from private capital they conceive it to be the duty of the Government to secure them by the use of public credit. It may be urged in reply to this statement that American ships have not been produced by private capital at this juncture, both because the finances of the world have been in deadlock since these amendments have been passed, so that capital investments have not been made in ships or anything else and also because this temporary legislation has only partially paved the way for the investment of American capital in vessel property.

The steamship man must obtain his capital for American ships from American investors. The American investor knows little of the value of securities of steamship companies beyond the repeated statements in the public press that it costs 40 per cent more to operate an American vessel than one owned abroad, and that, consequently, competition is impossible without a heavy subsidy.

These statements are not calculated to attract American capital to vessel securities. The recent difficulties of the railroads in securing capital for needed extensions illustrates the importance of maintaining public confidence in the value of securities which must be sold to provide the transportation facilities vital to the welfare of this country, and it seems pertinent to ask how it can be expected to interest private capital in vessel property if public competition be substituted for public regulation.

In the olden days of sailing ships the cost of a vessel was comparatively small, and it was the custom to divide the ownership among the members of a community. The captain, perhaps, owned a thirty-second, some one else a sixty-fourth, and those who had money to invest took the balance in accordance with their means. The larger capital requirement of modern business has brought into existence the corporation, and to-day all important enterprise is financed by the sale of stocks or bonds secured by the property owned.

At the outset it must be recognized that one of the most important parts of this problem is to satisfy the investing public that they can safely buy bonds secured by vessel property. Otherwise the steamship man is helpless, and can do little to restore our shipping, no matter what inducements may be held out to him.

Your committee will, therefore, first address itself to suggestions for a solution of this portion of the difficulty. A suggestion which has frequently been put forth is that the Government guarantee the bonds of steamship companies. This the committee does not favor, for if a Government guaranty be extended to all owners public credit will be employed to an extent to cause grave concern to conservative men; and, on the other hand, if the guaranty be limited to the bonds of a few individuals or corporations a feeling is sure to exist that favoritism has been shown. Whatever form of guaranty is offered it should be available to all whose character and standing entitle them to it and a distinct limit should be placed upon the extent of the obligation assumed by the Nation.

The present administration has suggested that $30,000,000 be invested in Government-owned vessels. If this be done, a small fleet will be created, but the feeling that the Government may from time to time add to this fleet and enter more extensively into competition for the ocean-carrying trade will prevent the participation of private enterprise in solving this problem.

Your committee submits that the same sum, if set aside as a guaranty fund and invested in Government bonds or other income-bearing securities, to be administered by a central board, having the same fostering relationship to the building up of our commerce and shipping as the Federal Reserve Board has to our finance and banking, will accomplish infinitely greater results. This guaranty fund could be administered along lines which have been in successful operation in a different field for a hundred years, namely, in relation to mortgages upon real estate. The Credit Foncier in France and other companies which guarantee mortgages upon property in Argentina, Canada, and elsewhere are well known, but the best illustrations for local purposes are the various mortgage guaranty companies of this country. A loan is perhaps made at 5 per cent. The mortgage is guaranteed by the company and sold upon a 4½ per cent basis, the guaranteeing company making one-half of 1 per cent annually upon each mortgage as a compensation for its guaranty and its services. Its services consist in collecting the interest, seeing that taxes and assessments are paid, and that the insurance is maintained.

An example of the successful operation of such a company is the Bond & Mortgage Guaranty Co. of this city. That company began its operations 22 years ago with $1,000,000 capital and a small surplus. It has guaranteed within that period about $750,000,000 of mortgages, many of which have, of course, been paid off. It has outstanding approximately two hundred and fifty millions of guaranteed mortgages. Its present capital is $5,000,000 and the combined capital and surplus exceeds $10,000,000. It has paid its own way, made good some losses, and added more than $5,000,000 to capital and surplus from earnings of one-half of 1 per cent upon mortgages guaranteed. In addition it has occupied a useful field of enterprise. An occasional loss is of course made, but the income from invested capital, together with the percentage set aside annually out of the interest rate, makes good all losses and, under conservative management, leaves a satisfactory margin of profit.

As applied to the construction of a ship, the guaranty would, of course, cover only a part of the vessel's cost, and a guaranty fund of $25,000,000, conservatively administered, could safely guarantee several hundred million dollars of steamship bonds, and thus do far more to reestablish our shipping than would be the case if a similar amount was permanently invested in vessel property. If this plan be adopted, an attractive security can be offered to the public; the responsibility of the Government can be limited, the Government would be paid for its guaranty, and a central board having supreme authority over shipping matters can be established. Such a board could approve construction plans, much as the building department of New York approves building plans, and approve the standing and character of the men behind a steamship enterprise, much as the Federal Reserve Board approves indorsers of notes and bills of exchange. It could be useful in many ways and should assure a high grade of public intelligence in charge of this important department of public welfare.

Notwithstanding the objections which many advance to public commissions, your committee has developed by inquiry among steamship men that such a commission would be welcomed by them as an aid in eliminating difficulties which now exist in shipping matters. The board should be made equal in dignity to the Federal Reserve Board, and it should be considered a high honor to serve upon it.

Your committee will not attempt to take the time necessary to do more than outline the general functions of such a board, and to affirm its belief that the suggestion offers a practical method of enabling steamship men to secure a substantial part of the money necessary to reestablish our shipping at a rate of interest much lower than is available at present, while at the same time safeguarding the public credit and fostering shipping in the interest of public welfare.

All shipping matters should be placed under the control of this board, and there is now pending in Washington legislation, which, if enacted into law, will require the most careful supervision of men of high intelligence who should devote all of their time to the work. This legislation covers the general field of governmental regulation of steamship rates, government license of ocean carriers, and many other measures designed to safeguard public welfare, but which, as applied to ocean commerce, are untried, and about which there exists a radical difference of opinion among many people.

Among other items which should receive its consideration is the maintenance of standards for the personnel of the officers and men of the merchant marine. The school ships maintained by Massachusetts and New York are educating officers for the merchant marine. They are doing a most useful and necessary work. Thousands of young men throughout the country are ready for the call of the sea, and are animated by the same spirit which filled the forecastle and quarter-decks of the American vessels 50 years ago. Other ships of this character should be established and the course of training amplified to make the graduates fit, both for the merchant marine and the Navy. There are discharged from the Navy each year about 4,000 young men who have enlisted from all parts of the country. These men have had a most valuable training in the Navy and should be encouraged to go into the merchant marine service. Many foreign nations encourage the creation of such a naval reserve by paying a small additional wage to men honorably discharged from the Navy, who continue a seafaring life and hold themselves in readiness as naval reservists. This practice is worthy of serious consideration.

The second step in reestablishing our shipping consists in creating conditions which will attract steamship men to make use of the credit

machinery thus established, and to create the vessel property so urgently desired. This again divides itself into two parts; regular lines carrying passengers and mails, and freight steamers.

We will discuss the regular lines. Public attention seems centered at the moment upon trade with South America, and we will, therefore, take lines to that part of the world as a type for consideration, although a similar service may be established to many other countries with the same class of vessel.

We desire first to point out that there has been a general misunderstanding of the added cost of operating American vessels as compared with the same vessel under a foreign flag. It has been frequently stated and generally accepted that the operation under the American flag will cost from 40 to 50 per cent more. We believe this percentage should be applied to wages alone, for the cost of fuel, supplies, insurance, and upkeep is substantially equal for the same vessel in the same trade, regardless of flag.

On passenger ships, where the wage item may be a larger percentage of the total operating cost, the difference in favor of foreign vessels is somewhat greater; but with strictly freight carriers your committee is informed that the disadvantage under which American tonnage must labor is 5 and 10 per cent of the total operating cost. Even in passenger vessels of a type suitable for South American trade, the disadvantage probably does not greatly exceed 10 per cent. These estimates take no account of the difference in interest, if the American vessels be constructed in this country, for that subject will be treated under a separate heading.

This difference in operating cost, while less important than has been generally understood, is still sufficient to discourage the operation of American ships, and is frequently the margin between profit and loss. Your committee therefore is of the opinion that it is idle to expect that American lines of passenger and mail steamers can be established, even though credit machinery, to make easy their financing, be created, without some measure of Government aid. It must be borne in mind that the new lines must enter into immediate competition with long-established foreign-owned lines, with experienced agents at ports of call, and with contracts which can not be easily disturbed. The new lines must fight their way into the trade.

It seems desirable that as few changes in existing laws be made as is possible. The present ocean-mail act permits the payment of $4 per mile to mail vessels of 20-knot speed. A speed of 20 knots is in excess of any yet established in the South American trade and beyond present reasonable requirements. The cost of maintaining such speed upon long voyages is to-day prohibitive. A vessel capable of making 16 knots, and running regularly at 15, will meet all requirements and be slightly better than competing lines under foreign flags. In services of this character it is not so much extreme speed which is required, but regularity of service.

We therefore suggest that the requirements be reduced to a trial speed of 16 knots and the compensation be left as at present. There are many countries to which an even less speed will answer all purposes, and we suggest that the speed requirements for vessels of the second class be reduced from 16 knots to 12 knots and the subvention of $2 per mile left in force. It must be remembered that these subventions are not payable to all vessels, but only to lines operating under contract a service asked for by the Government. We have been assured by steamship men of experience and standing that if this be done, there can be no doubt that advantage will be taken of the credit machinery before outlined and a number of lines established.

A reason for the extreme speed heretofore provided for has been the desire of those connected with the Navy to see constructed vessels of sufficient speed to be of use as commerce destroyers in time of war. Your committee would point out that if such vessels are necessary, it is not a sound economic policy to operate them in a trade for which they are not suited at a large annual loss. They should be either constructed for the trans-Atlantic service, where such speed is necessary, or built and maintained by the Government for naval uses. Your committee expresses no opinion as to the necessity for such vessels, for it is not considered a part of the economic question under consideration. We desire to point out, however, that there is only one line of American mail steamers between this country and Europe. These steamers are approximately 20 years old and are rapidly wearing out. The time is not far off when the service must be discontinued or new vessels provided. If commerce destroyers are a necessity, it may be desirable to arrange for new vessels for a trans-Atlantic service. If this be done, your committee sees no other method to adopt than to provide for the payment of a sufficient subsidy to maintain in service such vessels as the Government may require. The construction of such vessels would assure the Government an American mail service to Europe, gratify national pride, and meet naval requirements. They are not, we repeat, a necessary part of the present problem.

In making these suggestions we are not unmindful of the apparently deeply rooted objection in the minds of many of the citizens of this country to the payment of subsidies. It is a practice susceptible of such abuse that we suggest, rather than recommend, the only method which seems to promise the immediate construction of passenger and mail steamers and at the same time conform to economic standards.

Your committee desires to make clear that it has endeavored to avoid the pitfalls of recommending radical legislation. It recognizes that there is a wide difference of opinion as to the best method to be employed to reestablish our merchant marine. It has given consideration to all methods which have been suggested, and the creation of preferential duties, under which our merchant marine flourished during the first half of the nineteenth century, has been carefully discussed. A preferential duty of 5 per cent has been authorized by Congress, and the question of the legality of the measure is now before the Supreme Court of the United States. In due course a decision will be rendered, and it seems useless to discuss such a measure until such decision has been handed down. We have also given earnest consideration to the arguments of those in favor of the Alexander bill as it now stands (Jan. 1). We recognize that this bill is considered an administration measure and has been approved by President Wilson. For this reason we have endeavored to convince ourselves of its merit, but have been unable to agree that a sufficient crisis exists to warrant the enactment of a law which departs from established economic standards and may do grave injustice to those citizens who already own vessel property. It is stated that the people of this country are against taxing themselves in order to provide subsidies for steamship lines, and it is suggested that they tax themselves to operate Government-owned lines admittedly at a loss. We fail to see the difference, except that the latter plan carries with it evils far worse than a lack of American ships on the sea.

Government ownership of ocean lines can not bring to our aid a single vessel except by building. Every steamship in the world is working to-day except those interned in neutral ports. If these can be transferred to our flag without international complications, there will be no difficulty in financing the transfer of those suitable for freight carrying, for their earnings will justify the purchase. If they can not be transferred without trouble with England and France, it is certain we do not wish the United States to become their owner.

The construction of vessels designed to carry freight only is, we believe, attended with less difficulty than the establishment of regular passenger and mail lines. As we have pointed out, the item of wages on vessels of this character represents a smaller percentage of the total operating cost, and the disadvantage under which American vessels labor is in the neighborhood of 5 per cent of the total operating cost. Under conditions existing in the past even this difference would prevent the engaging in foreign trade of American tonnage, but it is the conviction of your committee that conditions will not again be normal for a number of years, and that if credit machinery be created to enable the steamship men to finance American steamship enterprise, sufficient inducements will exist to assure the construction of a substantial tonnage of freight vessels without the payment of subsidy.

In any event, it is the opinion of your committee that it is not necessary at the present time to provide subsidies for freight vessels. Their earning power, so long as the war continues, will be more than ample, and the slight disadvantage in operating cost is at least partially offset by economies in interest made possible through an application of our plan to guarantee steamship bonds. There is, of course, a wide divergence of opinion as to how long the war will last and of the probable condition of foreign shipping at its close. A large tonnage has already been destroyed, and it is the opinion of some experienced steamship men that the operating cost of foreign vessels will be higher than it has been in the past, for years to come.

Your committee has been advised of plans for the establishment of certain freight lines, which are already under consideration, without subsidy. The difficulties which lie in the way of the immediate carrying out of these plans are twofold: First, fear of Government competition; and second, the difficulty in interesting American investors in the securities. If these two difficulties are removed, we feel confident a beginning will be made, and the consideration of any subsidy for freight vessels may be safely postponed for a year, at least, when the matter can be again taken up and judged from the standpoint of conditions existing at that time.

You will note that no reference has been made as to whether the proposed tonnage should be constructed in American or foreign yards. Discussion of this matter has been omitted for two reasons: First, amendments have already been made in shipping laws, permitting the acquisition of foreign-built tonnage for a limited period; and second, it is quite possible that a condition may arise in the near future which will make competition for vessel construction by the yards of this country much less difficult. If a substantial tonnage is to be created, it is idle to suggest that it be entirely constructed in this country, for the facilities do not exist for the work. The building up of a shipbuilding industry, like the construction of a fleet, will require time. If a large tonnage built abroad is placed under the American flag, the necessary repair work will be an important aid in establishing American yards upon a basis where they can compete with foreign shipbuilders. The inability of the American shipbuilder in the past to compete with foreign yards has been partially due to the fact that there has been but a limited demand, and only for vessels of special construction.

The American manufacturer in many fields of industry has shown his ability to compete with and outdistance the foreign manufacturer of any article which can be standardized and produced largely by machinery. The automobile industry is a recent illustration of this principle. The raw materials needed for ship construction are all available, and it is the opinion of your committee that if a demand arises for the construction of a large number of freight vessels more or less of the same general type, and, therefore, standardized in character, the American shipbuilder will have less difficulty in competing for ship construction, the foreign cost of which, as we have already pointed out, is 20 per cent higher than at the beginning of the war.

Your committee is not unmindful of the fact that this view may be unduly optimistic, but, in view of all the circumstances surrounding the present situation, we are inclined to recommend that the specific provision that part of the tonnage to be operated under the American flag be constructed in American yards be deferred until the immediate future can be more clearly foreseen and we approach the time limit set by the recent amendments permitting the acquirement of foreign-built tonnage.

Many other phases of this question have also been considered and discussed by the committee, but we have kept always in mind our desire to present only practical suggestions for taking a substantial step forward.

Mr. President, that is a most interesting presentation of the subject. It opens up a new field of inquiry and investigation. It is a matter that I apprehend not a single Senator has given serious thought to, and it ought to be considered before any permanent legislation on the question of the American merchant marine is adopted by the Congress of the United States. I feel that the time I have taken in presenting that document to the Senate has been justified, and I commend it to the careful and serious consideration of Senators who feel an interest in the pending legislation.

Mr. President, I have said already that this proposed legislation is condemned by the best thought of the country. It is condemned almost universally by commercial organizations, it is condemned almost universally by the business men of the land, and it is condemned almost universally by the great newspapers of the United States. There probably never has been a measure presented to Congress involving a great public question such as this that has met with so little support and such almost universal condemnation as has this bill.

In this connection, for the purpose of justifying the statement I make, I propose to read some editorials from prominent newspapers scattered throughout the land, showing precisely

how those great purveyors of news, those great newspapers which enlighten public opinion and blaze the way to a large extent for legislation, feel on this subject.

An article has already been read into the RECORD from the Chicago Tribune, one of the greatest papers in the United States, published in the second city of the United States, carrying a weight of influence that can scarcely be estimated, and for that reason speaking with authority to a certain degree as to the sentiment of the community in which it is published. This morning I was handed a copy of the Chicago Tribune of date January 25, only a few days ago, in which is another editorial which the Senate ought to give heed to and which I propose to submit. The caption of the article is "The case against the shipping bill." It says:

The Democrats have decided to let the opponents of the shipping bill do all the discussing and "debating" on the floor of the Senate. They are charging a filibuster, which is absurd—since there has been no real discussion of the bill in Congress—and thus furnishing an excuse for their silence.

Whom do they expect to deceive? The case against the bill is so strong and so conclusive that the silence of its sponsors can but be construed to mean sheer inability to defend it or to meet the many objections that have been raised against it by business bodies, by leading newspapers, including Democratic organs, and by sound thinkers in and out of public life.

Let us briefly state some of these objections.

The bill spells serious complications with foreign powers, seizures, and captures that may lead to perilous war agitation. It is a "purchase" bill, and it is plain that ships now in profitable use can not be purchased and ought not to be purchased, for they would add nothing to available facilities, and the cost of purchase would be excessive and abnormal because of the war and the ill-timed appearance of our Government as a purchaser of ships. On the other hand, to buy idle, interned ships is to offend certain powers and to invite seizure, delay, strife, and hazard. It is to take a leap into the dark zones of international law and belligerent policies. The French, for example, have never recognized the right to sell or buy an interned ship during progress of a conflict.

The bill is neither an emergency measure nor a permanent one. It has the faults of both kinds of crude shipping legislation and the merits of neither.

It is based on a misrepresentation of the facts. There is no "lack of carrying facilities." What difficulty there is is due to the war, and that can not be magically removed by a Government line of ships.

As to trade with Latin America, what is wanting is credit, banking, advertising facilities, knowledge of Latin needs and tastes, and the wherewithal to pay for our goods. If we had cargoes to carry there and back, the ships would be forthcoming.

The bill does not remedy a single defect in our navigation laws. It can not develop a merchant marine, because it falsely diagnoses the trouble and prescribes the wrong and futile remedy—nay, it prescribes a remedy that would aggravate the trouble. The bill has discouraged and, if enacted into law, would handicap and stop private enterprise where the great need admittedly is the fostering and stimulating of such enterprise. Private capital can not compete with the Government, as the latter neither counts cost nor keeps books properly and pays deficits out of taxation.

Should the war end soon, the "emergency" theory of the bill would fall to the ground, while the "permanent" theory would simply fail to stand up and take its place. The Government would find itself in a business for which it is not fitted, and politics and spoils would prevent its letting go and acknowledging its egregious blunder.

This is the worst of all possible times to plan or legislate for "permanent" upbuilding of a merchant marine. Everything in foreign trade and shipping is abnormal and artificial, and "the wisdom of Congress" is grotesquely unequal to the task of separating the accidental obstacles from those attributable to our own laws, our safety standards, our wages, our financial conditions, our national habits, and ideas of investment and profit.

Ever since the President declared his purpose to recommend and press legislation of this kind the newspapers of the country have criticized and condemned it. I have extracts from newspapers dating back as far as August last; but naturally we are more interested in the observations of those papers of recent date, and so I read from the Boston Transcript of January 23 a most interesting editorial. The Boston Transcript is one of the old, conservative, and reliable papers of New England. It treats of business and finance in a conservative and intelligent way, and when it utters a voice of warning it is always safe to give it careful thought. The caption of the article is "Not 'Government ships or nothing.'" The Transcript says:

It is a counsel of weakness and folly that it must be "the Government ownership bill or nothing"—that there is no other way in this world war crisis to enlarge our merchant marine. Such a plea, the last desperate resort of the advocates of the administration scheme, would not, we think, except in loyalty to the President, receive the sanction of our neighbor, the Springfield Republican. Who outside the ranks of the Socialists urged Government ownership and operation of ocean steamships as the only method to secure such ships before the present war? And it was no nearer to being the only method then than it is now. Three principal expedients advanced before August last to restore our ocean shipping were: (1) Preferential tariff rates on goods imported in American ships—the "policy of the fathers"; (2) free ships, with a revision of our navigation laws; (3) ocean mail subventions. The first two were distinctively Democratic plans; the last the Republican method. Under this administration the two Democratic plans have been embodied in law.

The Simmons-Underwood tariff allows a discount of 5 per cent of the duties on imports in vessels of the United States, provided this does not abrogate or impair treaties with foreign Governments. Secretary McAdoo, speaking at Chicago January 9, cities the Attorney General as holding that these treaties make the plan "unworkable"; it has never been enforced.

At this point, Mr. President, I may be pardoned for observing that the Merchant Marine Commission took into most careful consideration the question of differential or discriminating duties, a majority of the commission at the outset being in favor of that plan; but after carefully considering it, looking at it from all angles, the commission decided that it was an unworkable plan and called attention to the very thing that has obstructed the enforcement of the provision in the Underwood-Simmons tariff law. It was that we had entered into thirty-odd commercial agreements with foreign nations—unwisely, as some of us thought—which, unless they were abrogated, would stand in the way of carrying out that doctrine of the fathers which worked so well in the early days of the Republic. The enforcement of the provision in the tariff law has been held up on that ground alone, and I understand that the question as to whether or not it can be enforced, regardless of those conventions and treaties, is now before the Supreme Court of the United States. It seems to me that we can not hope to get any relief in that direction.

The editorial continues:

Free ships for foreign commerce were provided in the Panama Canal act of August 24, 1912. The plan proved an utter failure. Not one foreign-built ship was added to our fleet before the war. An emergency act of August 18, 1914, exempted foreign-built ships from the requirement of carrying American officers and of complying with our inspection and measurement laws. About 100 vessels of a total gross tonnage of 400,000 have sought our flag since—nearly all of them were American-owned before the war opened. This small result is confessed by the Democratic leaders to be an utter disappointment. In other words, the Democratic doctors "have tried two prescriptions"; both have failed. Now they invoke the new and desperate remedy of Government ownership. Can they reasonably expect the country to heed and follow them again? Why should it be "Government ships or nothing"?

About the Republican plan of ocean mail and other subsidies there is nothing strange. Like the gold standard, such subsidies are the common practice of the mercantile world. The Bureau of Navigation has lately shown that $45,000,000 annually was being expended in mail and other subsidies and bounties by foreign Governments—about $10,000,000 by Great Britain alone. Our own expenditure is a little more than $1,000,000 annually under the almost forgotten but useful ocean mail law of 1891. This ocean mail law is responsible for almost all of the regular steamship service in foreign commerce under the American flag. It has undeniably worked well so far as it goes. At a cost of about what the British Government gives to a single line this American legislation provides a line to Europe, two or three to the West Indies, and one across the Pacific to Australia. Why not take immediately the estimated profit on our foreign mail service of between $3,000,000 and $4,000,000 a year and apply this at once to the creation of more services?

Later on, Mr. President, I shall call attention to the fact that a bill is now before the Committee on Commerce, introduced by me, which proposes to accomplish precisely that result. We have an average profit of about $2,000,000 a year from our ocean mail service, and it has seemed to some of us that that amount of money, or a less amount of money perhaps, in addition to what is now granted, might well be invested in ocean mail pay, so as to create a larger fleet than we have at the present time operating under the provisions of the act of 1891.

The editorial concludes as follows:

But the ships would have to be built? Not all of them would have to be built. Some large coastwise steamers could temporarily be utilized. Under the Panama Canal act, if proper foreign steamships were available, they could be purchased. All these vessels, accepting the subsidy, would be under contract with the Government. As to routes and regularity of sailings they could be utilized where they were needed most. This would provide every possible advantage of Government control without any of its perils and embarrassments. It would be a saving of time and money both. Trained steamship organizations already existing could secure the ships and undertake the service. Because of superior knowledge, efficiency, and economy, they could do this at far less cost than any semipolitical Government board that would have to build up an organization beforehand.

Great Britain has 30 subsidized steamship services to all quarters of the globe—the backbone of her merchant marine. There is no reason why the United States should not have as many, and it can get them more quickly and cheaply by cooperation with private capital and enterprise than by any groping amid the darkness and dangers of Government ownership and operation. Requirements of high speed can be temporarily waived in favor of capacious tonnage, and if it is necessary Congress can go a step further and grant naval retainers to thoroughgoing cargo ships suitable for fuel and supply ships after designs approved by the Navy Department.

How many recall that proposed Republican subsidy bills, which were merely an extension of existing ocean mail law, were defeated only by a political filibuster once in the Senate and by a margin of a few votes in the House of Representatives? There can be no doubt that if the same Congresses were to vote on the same legislation now, in the illumination which this war gives of the need and value of an American merchant marine, the bills would be enacted by a huge majority. But it is a Democratic Congress and a Democratic administration, making professions of hate of subsidy and yet providing in this Government-ownership scheme for the hugest and most extravagant subsidy of all. Both Massachusetts Senators have ably exposed the economic folly and the foreign menace that merge in this measure. Next week Senator ROOT will prove its conflict with the law of nations. Meantime the protests of Great Britain, France, and Russia show the world's attitude toward this trouble-bearing scheme.

The New York Times is a newspaper which carries tremendous weight throughout the reading world. It is not a Republican newspaper; it never has been a Republican newspaper, but in dealing with great public questions it takes a broad and con-

servative view. I wish to read a brief editorial from that paper under date of January 23, only a few days ago:

Senator HOKE SMITH is reported as saying of the rural-credits bill and the shipping bill: "These two measures will be passed and appropriation bills be allowed to go over to an extra session." That is a perfect program for those who think these bills are good for them and are indifferent to the protests against the enactment of one of them on the merits or of both of them in preference to the passage of the bills for the support of Government.

At the other end of the Capitol there is another sentiment. Members are appealed to by their leader to avert an extra session by diligence at this session. "If I am any judge of public opinion, the last thing the people want is an extra session of Congress," said Mr. UNDERWOOD.

I have no doubt that that great leader of Democratic thought [Mr. UNDERWOOD] expresses the feeling of ninety-nine one-hundredths of the Democratic Party in the country, and I am also impressed with the feeling that he represents the real feelings of a majority of the Democrats in this body. The Times editorial continues:

That is certainly true of this Congress and may be taken as true of the next Congress. It is because the people have had too much of this Congress that there is so little enthusiasm for taking a chance on a change of Congress. The more Congresses change the more they are just the same. The idea that Congress could earn thanks by letting things alone has not yet dawned at the Capitol or at the other end of the Avenue. The idea that the more Congress does the worse off the people are is more general among the people than among the Congressmen.

The country's bills must be paid, but what popular sentiment is there for writing "must" on any other project of legislation? To put the Government shipping bill before the appropriation bills is to substitute the opinion of Washington for the opinion of the country. To force an extra session is something abhorrent to the sentiment which shrinks from new laws as a psychological obstacle to optimism. "Let us have peace" is the weary cry, as was proved by the applause which from both sides of the House greeted Leader UNDERWOOD'S remarks. Pass the appropriations and quit is all that the country wants Congress to do.

The shipping bill was not dreamed of when this Congress was elected, and it will be forgotten before the next Congress meets.

Mr. SMITH of Michigan. It was not in the Baltimore platform, either.

Mr. GALLINGER. The Senator from Michigan, who always makes wise observations, suggests that it was not in the Baltimore platform, either; but even if it had been it would probably have been disregarded by the party in power and by the President, as most of the other planks in the platform have been.

The editorial concludes in these words:

The rural-credits bill has merits, but the farmers can worry along with their $10,000,000,000 of new wealth at least as well as they have in harder years than this. The country will forgive the past if it is not asked to forgive any more. Congress will best commend itself to the country by doing as little as possible beyond passing the appropriation bills.

How wise that advice is! As I said a day or two ago, there is one great appropriation bill ready to be reported to the Senate; there is another great appropriation bill which will be ready to be reported in a day or two, so I am informed; other appropriation bills have come over from the House and are now before the committees of the Senate under consideration. In all the history of the Government I venture to say that no such spectacle as this has ever been presented; that in a short session of Congress the appropriation bills are thrown aside for the consideration of a controverted question, which, in all probability, will consume the entire time of the session in its consideration. The minority is not responsble for it; the minority echoes the expression of the New York Times, that the country is demanding what the majority of this body is opposing.

The New York Journal of Commerce, under date of January 8, a great trade paper, has this to say about the pending bill:

Alba B. Johnson, president of the American Manufacturers' Export Association and head of the Baldwin Locomotive Works, of Philadelphia, when asked for his opinion as to the attitude of the exporters of the country on the Government ship-purchase project yesterday, said that the association at its recent annual convention adopted resolutions condemning the proposition, and practically as a unit the 300 members which the organization has are vigorously opposed to the plan. The feeling of the exporters, Mr. Johnson explained, is that for the Government to embark in a field which belongs strictly to the private commercial interests of the Nation at this time is neither commercially wise nor reasonably sure of success.

Mr. Johnson said that the provisions of the bill are such that if enacted into law they will provide a formidable weapon for political use with which to create great havoc among legitimate existing shipping interests. The advocates of the measure, he continued, advance the theory that shipping facilities for the transportation of our exports abroad under existing conditions are inadequate, but they apparently overlook the testimony of experienced and practical men that the present situation is due mainly not to any extensive lack of vessels, but to the present unstable foreign exchange operations, scarcity of foreign labor for handling commerce, and particularly the high cost of marine insurance, and that with relief in these directions greater activity will follow and the present and future requirements of our commerce, if properly encouraged through a satisfactory revision of the American navigation laws, will be amply met by private enterprise.

The pending bill in Congress which provides that our Government invest the sum of $50,000,000 in merchant ships, Mr. Johnson said, has many vicious features, not the least of which is that no private enterprise, however capably and economically managed, where the management is accountable to stockholders, can compete with the Government in the same industry. Furthermore, he pointed out, the bill would create a shipping board composed of the Secretary of the Treasury, Secretary of Commerce, and the Postmaster General, which could subscribe to the capital stock of any existing steamship lines for the purpose of purchasing, constructing, and operating a fleet of merchant vessels to any part of the world or in the port to port traffic of the North American and Central or South American coasts; that under our elective system of government the personnel of the offices is subject to change every four years, and it is not likely, therefore, that with such flexible and uncertain management the public could be expected to invest its capital in an enterprise in the control of which it can for all time hold only a minority interest. Such a proposition is hardly a feasible one for the President of the United States to stand for at this time, judging from the commercial outlook for success, he added.

A practical suggestion for the American Government to adopt in the ship-promoting activity which it has apparently determined upon, Mr. Johnson continued, is that the $50,000,000 which it intended to use for the direct purchase of the lines which the Government proposes to operate should be loaned out to private American steamship interests at a similar small interest rate to that exacted by the British Government, thus permitting the private and more experienced companies to buy up and operate all available steamers under the direct supervision of the Government. This plan of bringing about an adequate American merchant fleet to cope with the needs of the time in the trans-Atlantic trades, Mr. Johnson maintained, would come as near to insuring the success of the Government's venture and purpose as any plan which could be adopted at this time. It would likewise overcome the danger that under the pending bill for Government owned and operated ships that lines would be established where they would most likely prove unprofitable and even unnecessary, and avoid the dangerous and unwarranted interference with the existing privately owned and operated American lines.

The British marine credit plan, which Mr. Johnson declared he favored for adoption by our Government in place of the pending ship-purchase measure, by an interesting coincidence was also put forth by Charles M. Muchnic, foreign manager of the American Locomotive Co. Mr. Muchnic has just returned from Europe after a two months' business trip. When asked for his opinion as to the desirability of the Government embarking in the operation of a fleet of ocean freight carriers, he asserted that from what he had learned of the proposition thus far he was absolutely opposed to any such plan.

I have already read an article from the New York Times of recent date. I now want to read a brief article from the same paper published a little time ago. It is as follows:

The proposal to put $25,000,000 into Government merchantmen bristles with puzzles for those who like to back their Government through thick and thin. Would Americans in general prefer to have the project fail or succeed? If it succeeded, of course there would be an end of any other sort of American merchant marine, and the various other proposals with that end in view should be abandoned. No one is going to compete with the Government in anything, and no more in steamships than in railways in Alaska. An attempt is made to justify this venture by analogy with the Panama Railway. The suggestion is unfortunate from the viewpoint alike of the Government steamships and of those who would have to use them in default of any others. The operating cost ratio of the Panama Railway began to rise from the day the Government took control. It costs nearly twice as much to operate the easily managed Panama Railway as to operate the Pennsylvania, which has more difficulties than any other. The operating cost being high, necessarily the rates are high. They are five times higher than the rate on the average private railway. It would cost $33 to send a ton of freight from New York to Chicago on the scale of the Panama line. A shipper who would like to see the arguments for Government ownership realized must shudder when he thinks of what would happen to him if he were committed to the tender mercies of Government steamships or railways, or perhaps both. He could hope for no relief from any regulating commission. Uncle Sam allows no such interference with his affairs.

Mr. MARTINE of New Jersey. Mr. President, just there will the Senator from New Hampshire allow me to interrupt him?

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from New Jersey?

Mr. GALLINGER. I always yield to the Senator from New Jersey with pleasure.

Mr. MARTINE of New Jersey. I do not want to take the Senator off the floor——

Mr. GALLINGER. I will not allow the Senator to do that.

Mr. MARTINE of New Jersey. But in reference to the Panama Railroad, the Senator from New Hampshire refers to the private ownership and the present Government ownership. Is the Senator not aware that under the private ownership of the Panama Railroad passengers were charged $25 apiece for first-class passage and $10 apiece for second-class passage to cross the Isthmus, the distance being, I think, 47 miles; and the freight charge was 50 cents a cubic foot? Is not the Senator also aware that under those charges the Panama Railroad, under private ownership, declared on an average 25 per cent dividends; that, in addition, there were frequent stock benefactions to stockholders, and that the stock of the railroad stood at 385? Is he not further aware of the fact that since this railroad has been taken over by the Government and operated under Government ownership, instead of the charge for a first-class passage across the Isthmus being $25, as was the case under private ownership, under public ownership the fare is $2.40, and the freight rates have been reduced as well? There is the condition which prevails under Government ownership, so that the statement which the Senator has quoted, it seems to me, falls flat in comparison.

I say the passenger fare of $2.40 under Government ownership is an extravagant charge, even yet, for it amounts to about 6 cents per mile, and there is no railroad in our land charging as much as that. So, even at that rate, the Government is charging an enormous rate, but far less than the $25 which was charged for passage across the Isthmus when the railroad was under private ownership.

Mr. GALLINGER. Well, Mr. President, I am not well versed in the affairs of the Panama Railroad when it was under private ownership.

Mr. MARTINE of New Jersey. I happen to have known in days gone by both the president, Mr. Hoadley, who is now dead, and the secretary and treasurer, Mr. Charles Smith. Those facts have been well established and are easily gotten at, being matters of record.

Mr. GALLINGER. I do not know, Mr. President, as a matter of history, what the trials and tribulations may have been of those who built that road or how expensive it may have been to construct. Very likely that fact might throw some light on the subject and modify the statement the Senator from New Jersey has made.

Mr. MARTINE of New Jersey. But the fact that the stock of that railroad stood in the market at 385 and that 25 per cent dividends were declared upon it can not be controverted nor gotten away from.

Mr. GALLINGER. Mr. President, that may be so. It is a small and insignificant railway, at best.

Mr. MARTINE of New Jersey. True.

Mr. GALLINGER. And if it had remained in private ownership, it would have, in the nature of things, very soon have gone out of commission because of the building of the Panama Canal.

Mr. MARTINE of New Jersey. I only cite it because the Senator brought it to mind.

Mr. GALLINGER. I do know, Mr. President, that the freight charges on that road are enormous at the present time.

Mr. MARTINE of New Jersey. The freight charge was 50 cents per cubic foot under private ownership.

Mr. GALLINGER. So that, if the charges were reduced to the point the Senator from New Jersey thinks they ought to be, there would doubtless be a loss to the people of the United States.

The editorial from the New York Times continues:

The public aspect of the enterprise is no more alluring. It is a proposal in the interest of peace, but it is peculiarly adapted to embroil the United States with every belligerent. It would be obnoxious to have a Government vessel compelled to submit to an examination regarding its cargo, and it would be embarrassing to the last degree if a piano should turn out to be machinery for war against the nation making the discovery. A cargo of food might become cause for hostilities, and goods which were innocent when laden might become contraband on the voyage. The taking of a Government merchantman into a prize court would be a novelty without attractions for those who like a quiet life. As this is a "hurry-up" measure, it follows that this $25,000,000 can not be used for the encouragement of American shipbuilding. The money must be spent for foreign-built vessels, of which the best offering are German. For the Government to buy such boats might offend our friends among the allies opposing Germany. The $25,000,000 which seems so considerable is a mere drop in the flood of expenditure that would gush through the opening thus made. Terminals would be necessary, costing as much more at least, and the building up of a freight business is a matter of years. Only the inexperienced could dream of starting a steamship business on a commercial basis with $25,000,000, a small fraction of the capital of each of many private companies.

A worse time for such an adventure could not be chosen. The ocean passenger trade for either tourists or immigrants is prostrated, and the freight business is worse. There will be no incoming freight on any attractive scale, and the glut of outgoing freight will not be enduring. When the emergency is over what will have become of the $25,000,000, and what will be done with the remnant, if any? If Americans can not compete with foreign vessels, how much less can the Government do so? And what a horde of embarrassing questions are suggested by competition between vessels of the United States and private ships of other countries, whose Governments may be trusted to defend them against the aggression of our Government freighters and passenger boats. The idea was debated in the House before it was launched by the President, but none of the speakers showed the least appreciation of the practical aspects of the question, so enamored were they with their patriotic dreams.

The New York Journal of Commerce, from which I have already quoted, treats the subject further under the head of "Stupid shipping legislation."

War has caused a sharp awakening to the deplorable situation of our mercantile marine. According to a statement carefully prepared by this paper, not less than 5,800,000 gross tons of ocean-going ships have been withdrawn from service since the war began. About 3,500,000 tons represent German and Austrian shipping and 1,700,000 tons British vessels chartered by that Government. In addition, over 600,000 tons are known to have been destroyed or captured. This sudden withdrawal of such a vast amount of tonnage, approximating 13 per cent of the world's total, has created a temporary ocean freight famine. This is one of the exigencies of war that can not be avoided, and would have occurred even had we already possessed a respectable merchant marine. The difficulty, though temporary, is a real one and warrants any rational and effective means of relief that can be devised.

One of the most puerile proposals that has yet been offered is that of Government ownership. A bill has been introduced at Washington, which the administration is expected to support, authorizing the creation of a $10,000,000 shipping corporation, of which the Government shall own a controlling interest. The Government is also authorized to issue bonds to the extent of $30,000,000, making a total available capital of about $40,000,000.

How much relief would a plan of this sort afford? There is good reason for estimating the cost of building a 10,000-ton ship in the United States at about $425,000, compared with $325,000 in an English shipyard. At present the cost of building in a British yard ranges from $45 to $75 per ton. If we take $50 per ton as the cost of a good freighter, this would allow investment in about 800,000 tons, or about 23 per cent of the amount already withdrawn. But where are these 800,000 tons of ocean vessels to be procured? It would be sheer folly to attempt to build such a fleet, even in part, because the war would probably be over before such ships could be put into commission, and they would enter the market at a time when transportation would be depressed by exhaustion from the war and when the supply of tonnage would already be excessive. In other words, if the Government built such ships it could not provide the relief immediately needed, but would only aggravate a bad situation later on, not to speak of incurring a heavy loss to the Government. The only means of relief possible would be for the Government to purchase foreign vessels now lying idle in various portions of the world. This involves grave risks, risks that private capital is not willing to undertake, and that, if assumed by the Government, might easily involve us in serious international disputes. Besides, the German ships are probably not for sale. The whole proposal of Government ownership in ships is so visionary, inadequate, and dangerous as to be utterly unworthy of an intelligent administration. The situation does not warrant such paternalistic and socialistic methods. As a precedent it is highly dangerous, and as a cure for a bad situation it can only be classed as stupid.

There is still a lamentable amount of ignorance about American shipping. The urgent necessity for its revival is beyond question, and when Congress repeals the laws which deny American shipowners a fair chance and prevent them from entering the business under the same terms and conditions as their rivals, then we may expect a genuine and permanent restoration of our prestige on the seas, and not before.

The Boston Herald, an old-established and influential newspaper, circulating all over New England and possibly other portions of the country, has this to say about the bill:

President Wilson has felt the weight of public criticism of a Government-owned merchant marine. The plan of his message is a modified and diluted plan. "It," he declares, "is not a question of the Government monopolizing the field. It should take action to make it certain that transportation at reasonable rates will be promptly provided, even where the carriage is not at first profitable; and then, when the carriage has become sufficiently profitable to attract and engage private capital, and engage it in abundance, the Government ought to withdraw."

The same reasoning would have justified and forced the Government years ago, when iron mills and cotton mills and woolen mills were few, to create such mills by direct Treasury appropriations, and to operate them until they could have been sold out to capitalists. And the same thing would have been true of the construction and operation of railroads. We should then have had a delightful state of socialism, with the Government conducting all the main activities of life. Could such a step have been retraced and all these activities turned over to private ownership?

Asking this question is to answer it. A Government-owned merchant marine in the beginning would inevitably mean a Government-owned merchant marine in the end. And let us remember that, counting in our vast coastwise fleet, we have already, without Government ownership, the second greatest merchant shipping in the world. On June 30 last, according to the Navigation Bureau report, the United States had a merchant tonnage of 7,928,000.

There is manifestly no lack of American ships where American laws have established just conditions. If there is a lack of American ships on certain routes, which the President particularizes as "to our neighbor States of America," may there not be a cause for it that can be overcome without the rash expedient of Government ownership? Indeed, as the Herald showed the other day, American steamers are already appearing on the routes to Brazil, Argentina, Chile, and Peru, where a preferential war risk affords the equivalent of subsidy. Now the President of the United States proposes to put the Federal Government into competition with the enterprise of private owners—and, of course, to drive them off the seas.

The zeal of the President for a merchant marine is splendid. No Republican Executive has spoken on this theme with keener emphasis. But Mr. Wilson has chosen the wrong road to the right goal. Government ownership will not be necessary if we treat our ships as England and France and Japan and Germany and Spain and Italy have treated theirs. Even Norway and Sweden have recently put lines of their own on South American routes by direct State aid to experienced and responsible shipowners. Why not follow the sound, proved policy of the world instead of an expedient that has only failure written on it?

Our so-called Government line to Panama—an incidental result of the canal purchase—earned only 2 per cent a year in 10 years, without allowing a cent for interest, insurance, or depreciation, which would have turned that small profit into an enormous deficit. The Government line of Western Australia lost $114,000 the first year and $96,000 the next. These are the sum of such experiments up to date, and both disastrous.

President Wilson has already modified his Government-ownership project from a permanent scheme to a brief, temporary device. Why not take one more step and abandon it altogether?

To vary the reading somewhat, I have here an editorial from the Macon (Ga.) Telegraph, which I will read. It is very brief:

The welcome report comes from Washington that there is no expectation of the passage of the ship-purchase measure. Even in an hour of panic following the paralysis of commerce caused by the first shock of the European war the country was startled by the proposition of a Government-owned merchant marine, and, in view of the continually improving conditions that have followed, it is no surprise to hear that the unpopular measure has been practically abandoned.

The ship-purchase measure being hopeless, a proposition of Government aid to persons going into the shipping business will be pressed, it is stated. The Democratic leaders of the past have been opposed to ship subsidies, and undoubtedly there are objections to the policy, but there can be no question that it is greatly to be preferred to that of a Government-owned marine.

The New York Herald, under the heading "Is Government ownership impending?" says:

Forecasters of the President's forthcoming message to Congress agree in predicting that he will strongly advocate the Government going into the business of buying and operating merchant steamships.

In an interview published in the Herald Mr. James A. Farrell, president of the United States Steel Corporation, said of the shipping situation:

"At present there is no lack of shipping facilities, as there are more ships than cargoes to all parts of the world. We are now sending ships from one port to another in ballast, because we can not get cargoes for them. We need more trade, not more transportation."

If this is the situation—and surely Mr. Farrell should know the facts—what possible reason can there be for Government ownership of steamships? With the burden of taxation already too great, where is the wisdom of adding to more taxation for doubtful experiments.

If the Government is to take a plunge into the mercantile-marine business, what steamships is it going to buy? German steamships now interned in American ports? Can the President be sure there would be no danger in such purchases?

With every legitimate effort to build up our mercantile marine the American people will sympathize, but it seems improbable that they will support a policy of Government ownership.

The Davenport (Iowa) Times has this to say:

A comparatively few shipowners have availed themselves of the privilege of American registry under the recent emergency act. As a result of this, President Wilson is reported to be considering the advisability of urging again his plan for a Government-controlled merchant marine.

There is need for a merchant marine under the American flag that will blaze the way for an expansion of American commerce with South American countries. Merchant ships are missionaries of commerce. They develop trade. But if trade with South America is to be developed rapidly a number of ships will be required. At the beginning the business they could get probably would not make their operation a paying project. Possibly that is why we do not now have such a fleet of ships.

Any plan by which the Government would own the ships or 51 per cent of the stock in such ships would be likely to result in the operation of the ships at the beginning at a loss, which the Government would be expected to make up, either in payments for mail contracts above present costs or in the form of waiving returns on capital invested.

But such a plan would be a form of ship subsidy. Why not try a direct subsidy, and know what the exact cost of developing a merchant marine is from year to year? If the Democrats are opposed to subsidy, they are likely to oppose the other plan as well.

The Muncie (Ind.) Press has an editorial headed: "Of All Sad Words." It is worth listening to:

Every schoolboy is familiar with that famous couplet which John Greenleaf Whittier put into "Maud Muller" to the effect that "of all sad words of tongue or pen the saddest are these: 'It might have been.'"

These words, which were penned first as the melancholy climax to a little love scene, have now become applicable to the condition of a great Nation—our own country, the United States.

Never in all history have we been better qualified to use the phrase "it might have been" than at present. We stand a great, united people, a hundred million strong, blessed with every facility that science, education, and nature have to give. Figuratively speaking, we have the world, or at least the markets of the world, at our feet.

The great nations of the world are engaged in a titanic struggle for mastery and perhaps even for existence. Practically all manufacturing and commerce in Europe has stopped. It is up to the United States to feed the people of the Old World and to provide them with all the necessities of life.

And yet we are about as well prepared to do this as a German dirigible is prepared to fly to the moon. The crisis has caught us unawares. We have no merchant marine, no way to send our products abroad. To-day our principal seaboard cities are glutted with shipments for which cross-ocean transportation is not available.

In the past every effort toward building up the merchant marine of the United States on a scientific basis has been rejected. There has always been some little demagogue to spring up with a yell of "special privilege" and "graft." Now, when the golden opportunity has come, we have a special privilege indeed, and that is the privilege of kicking ourselves for having been so improvident in the past. And so at a time when we ought to be the busiest and most prosperous nation on earth, through a mistaken policy at home and abroad we find ourselves down at the heel, with half of our factories closed and the other half working men three days a week.

But, although the great opportunity found us asleep at the switch, the terrible struggle in Europe has at least benefited us in one way. It has cut off competition from abroad that ere this, under the present tariff law, would have driven us out of our own markets had not the general conflagration abroad shut off the production in the belligerent nations.

Even this elimination of European competition, however, has not been enough to offset entirely the result of the free-trade administration. Things began to slip badly before the European war, and they are not yet righting themselves with any degree of certainty.

Worst of all, of course, is the realization that we have overlooked the greatest opportunity that ever came to a civilized nation in the way of trade expansion. But unless some twentieth century necromancer can conjure a fleet of phantom ships out of the night there does not seem to be any help for it.

The Providence (R. I.) Bulletin treats of the subject as follows:

The supposed dire necessity for ships which inspired the Government ship-purchase idea proves with a little waiting to be nonexistent. Judged by his adherence to the proposal that the Government buy and operate merchant ships, the President's "single-track" mind extends straight out to sea. The metaphor may now be changed to "steering a straight course." But Mr. Wilson should tack. Great Britain's merchant marine has not been driven from the sea. If vessels can be operated under foreign flags and laws between this country and foreign ports our Government can not order American over-seas commerce to be carried in its own bottoms, for this is a matter of international trade. Probably foreign shipowners can compete with our Government as operators of merchantmen; their experience counts for much. But American shipowners will not compete with Washington.

The proposal to stifle private enterprise is the more intolerable because it is directed at the use of the sea, the gift of nature equally to all mankind. As an excuse for the restraints placed on private railroad operations the fact is pointed out that a railroad exists by virtue of the favor of right of eminent domain. No such argument applies to shipping.

This is not the only objection to the engagement by the Government in the furnishing of marine transportation. The resultant public debt will be burdensome. The business world will not be better served. The laws which the Government enacts for private shipowners do not bind it in its own operations. There is no Government department or service the efficiency of which would lead the shippers of the world to expect it to make a striking success of the merchant-marine business financially or in the facilities that it may be expected to furnish.

The Rutland (Vt.) Herald speaks as follows:

The greatest merit of the message delivered yesterday to Congress by President Woodrow Wilson is its brevity. As against a ponderous, unreadable document running into pages of a newspaper the President has written less than the equivalent of five columns of type, all readable, fairly timely, and couched in the Chief Executive's well-nigh faultless English.

Apart from the absorbing topic of national defense, evidently written as an afterthought, the next characteristic recommendation deals with the need of a merchant marine. Admitting, as everyone must, the sincerity of the President's purpose, it is impossible to escape the conclusion that the President has set his heart with a stubbornness almost childlike on a line of ships owned by the United States.

That was written more than a month ago; and from what we read in the press and what we have listened to from the other side of the Chamber it is very evident that the President's purpose is equally as insistent as it was when it was first broached.

The Herald and the great majority of the press of the United States will not be in accord with the President on this question. If the need of ships is as imperative as it seems from the message, the solution lies not in the handful of Government-owned vessels proposed in the pending bill but in a frankly subsidized merchant marine to restore the American flag to the seven seas.

The President, in fact, points the way to this consummation himself. He says:

"The case is not unlike that which confronted us when our own continent was to be opened up to settlement and industry, and we needed long lines of railway, extended means of transportation prepared beforehand, if development was not to lag intolerably and wait interminably. We lavishly subsidized the building of transcontinental railroads. We look back upon that with regret now, because the subsidies led to many scandals of which we are ashamed."

Mr. President, I think the scandals, great as they were at one time, were more than offset by the benefits that came to the people of the United States in the construction of those great transcontinental lines.

Naturally President Wilson is opposed to subsidies, but there is nothing in his reference to this great topic which contravenes the position of many practical students of the problem, which is that subsidies are practical and nationally profitable, the best and quickest means of getting results, and just as easily safeguarded from scandal as any other Government enterprise.

The Boston Post is one of the most aggressive and unrelenting Democratic newspapers in the United States. It is also one of the most prosperous and possibly the most largely circulated newspaper of New England. A month ago that paper said:

One of the two moot points in the President's message for which the Post said that there was by no means general approval in the country, and not even agreement in the Democratic Party, was that which repeated Mr. Wilson's approval of his plan for Government purchase and operation of merchant vessels.

The President has modified his scheme somewhat. The Federal ownership of the merchant marine is to be temporary, not permanent—"when the carriage has become sufficiently profitable to attract and engage private capital and engage it in abundance the Government ought to withdraw."

But it is difficult to see how private capital can be stimulated to go into the merchant-marine venture in the face of Government competition, no matter if that is announced as to be only temporary. The President declares that the Government should "make certain that transportation at reasonable rates will be promptly provided, even where the carriage is not at first profitable"; that is to say, the Federal lines can afford to and will lose money on the venture. What earthly chance, then, would private owners have to get into the game at all? It is futile to suppose that they will engage in the business solely for recreation.

In speaking of the Boston Post, Mr. President, as one of the influential, widely circulated Democratic newspapers in New England, I did not mean to exclude from the calculation the Boston Globe, which is a long-established and potential Democratic paper, unflinching in its advocacy of Democratic principles, and giving its support without stint to the present administration, with the exception of the proposition embodied in the bill before us that the Government shall go into the purchase, ownership, and operation of steamships. Under date of January 6, this great Democratic newspaper, under the caption, "Not the time now for Government-owned merchant marine," published the following in its editorial columns:

The "Government" has its teeth so firmly set in the idea that it should own and operate merchant ships that it will not let go.

One of the first effects of the war in this country was to bring home to the American people, as years of agitation on the platform and in the press have not brought home, the vitalness of our merchant-marine problem.

The public knew in a general way that our foreign shipping had been falling behind year after year until only a very small fraction of the American foreign trade was carried in American bottoms. Just what this meant in practice it did not understand, and, as there appeared to be plenty of foreign ships for our imports and exports, it did not much care.

Still less did the public understand the reason for the decline of our shipping, though the prevalent idea was that our strict navigation laws and the high cost of shipbuilding in this country were to blame.

With the outbreak of the war, however, the problem became acute. The shipping of England's foes was driven from the seas, and a large part of British shipping was summoned to the service of the Government. Needed imports did not come to port; goods for export piled up on docks and in warehouses.

Then arose a loud cry for relief, especially in the form of admitting foreign ships to American registry. That, it was confidently believed, would save the day, since foreign owners must be only too glad to put their endangered or useless vessels under the safe American flag.

A long step toward "free ships" had been made in the Panama Canal act of 1912, and last August this act was enlarged to admit to registry for the foreign trade foreign-built ships without distinction of age. They were, moreover, exempted from compliance with American measurement and inspection laws and from the requirement that the officers should be Americans.

But as the first act had had no results, so the new one had very little. No real increase was made in our foreign shipping, and nearly all the ships that were brought under the American flag had been previously owned by American corporations. The proposed wholesale purchase of German liners found vigorous opposition from Germany's foes.

Yet still the need of more ships and better service continued, and a new expedient was proposed—that the Government should control and operate steamship companies, leaving a minority interest for private investment. Since the Government could not induce its citizens to become shipowners, it would become a shipowner itself for the public good.

It can not be denied that some good results could be secured in this way. There undoubtedly would be new American ships, possibly new trade routes and better service for exporters. There would be the needed auxiliary fleet in time of war.

The real question, however, problems of constitutionality aside, is whether the gain would be worth the cost and whether that method of attaining the desired end is the best.

American capital, estimated at from $100,000,000 to $200,000,000, is invested in the ocean trade under foreign flags, where a reasonable profit can be counted on. It has not been invested in American ocean trade evidently because it is not profitable.

The reasons are the higher wage level, certain restrictions imposed by our laws, and the fact that American shipping must compete against the subsidies and aids granted by foreign Governments to their liners.

Where private business can not make a profit, the Government certainly could not do so. When the Government enters business, it is to render services which the public requires and can not otherwise get, and to render them whatever the cost. Nobody expects Government operations to be economical; if they result in a deficit, the public accepts it because the public benefits by the service.

It is highly probable that Government ships, if they were able to get the trade, would handle it only at a loss. But it would not be for a service rendered to the whole people, but to the exporters and importers; in practice it would be taxing the whole people for the good of a part.

That sounds, Mr. President, like a subsidy. We have heard it iterated and reiterated that if we give any aid to the shipping industry of the United States we are going to tax the rest of the people for the benefit of the shipowners. So it seems, according to the view of this great Democratic newspaper, if this scheme goes through it will be for the benefit of the exporters and importers, not for the people at large.

More than this, it would force private enterprise out of foreign shipping instead of drawing it in, and so would defeat its own ends. The outcome would be a Government merchant marine, uneconomically managed, and nothing else. From any viewpoint the question of Government ownership of ships could not be fairly tested at this time.

Here, Mr. President, is a declaration from this leading Democratic newspaper that is worthy of serious consideration. The Globe concludes:

Better than this now is an open policy of Government subsidy. Better still a tariff discrimination in favor of American-carried goods. Either or both, coupled with free ships, should see a speedy growth in our shipping. And, if less speedy than the acquisition of a Government fleet, it would be of more enduring value.

I have already quoted from the Boston Transcript one editorial. That is a newspaper of such high standing, such is its acknowledged conservatism and as a purveyor of valuable information it is so reliable that I am going to quote an additional brief editorial:

The annual address of the President before Congress to-day is the longest delivery of his administration. In style it will not suffer by comparison with his previous utterances. The phrases of his alluring rhetoric lose little of their charm, familiar though they have become through frequent use. His cheerfulness of tone betrays, however, a chastened spirit upon which the verdict of the congressional elections was not wholly lost. Instead of combating that verdict we find him gracefully refusing to play the part of historian toward the record of the Congress now in its closing session, and, with an optimism equalled only by astuteness, suggesting that "our thoughts are now more of the future than of the past." If only the people could thus easily dismiss from their minds the hard times and the heavy taxes which constitute thus far their main inheritance from the present Congress they could more nimbly ascend the heights of the President's optimism, and view the future with his enthusiasm. Theirs, however, is not the task of the historian, and they, unlike the President, can not wish away the stern problems of the present.

That reminds me, Mr. President, that the Chief Executive at one time, when some business men called on him to point out the sad condition of the industrial affairs of the country, said to them: "It is purely psychological; business is looking up." Promptly a bright newspaper of the country retorted, "The President is right, business is looking up. It is flat on its back, and it can not look in any other direction." Yet the President continues to have his optimism both as to the business of the country and as to the great advantage which is to result from this proposed shipping legislation, and he is wrong on both propositions. The Transcript continues:

To the pending shipping bill which provides for the purchase and operation by the Government of a merchant marine, we have on several occasions expressed our opposition, and so far from modifying that the President's discussion of the measure we believe will have the effect of confirming and strengthening previous criticisms. He favors the Government ownership of our merchant marine for a limited period only; in other words, long enough to destroy the nucleus that has survived and to discourage private business from making any other attempt to restore our flag on the seas. We hope the Nation will not be slow to speak its mind against any such ruinous nostrum. It lacks the advantages of Government and private ownership of shipping and combines the disadvantages of both.

Well, Mr. President, the Nation has not been slow to speak its disapproval of the bill we are now considering, and if by any misfortune it shall become a law the Nation will not fail to voice its disapproval of the political party that enacted it.

The Springfield (Mass.) Morning Union speaks as follows:

In his message to Congress President Wilson again urges governmental ownership as a means of developing an American marine and attempts to stem the agitation for an inquiry into the national defense by assurances that our military provisions are adequate. In neither case does his course of argument carry conviction. As regards the merchant marine he virtually concedes that governmental ownership is the only alternative to the granting of substantial subsidies and he contends stoutly for governmental ownership. "The Government must open these gates of trade," he says, "and open them wide; open them before it is altogether profitable to open them, or altogether reasonable to ask private capital to open them at a venture. It is not a question of the Government monopolizing the field. It should take action to make it certain that transportation at reasonable rates will be promptly provided, even where the carriage is not at first profitable; and then, when the carriage has become sufficiently profitable to attract and engage private capital and engage it in abundance, the Government ought to withdraw."

But in this the President fails to give us any hint as to how governmental ownership is going to prepare the way for successful private operation. By what magic will the Government so arrange matters that, after operating ships for a season, it may step aside and enable private concerns to compete successfully, though enjoying no subsidies and paying good wages for a reasonable amount of work under comfortable conditions, with carriers of other nations, liberally subsidized and operating at a cost incompatible with the maintenance of an American standard in respect to labor? That is the problem.

The President does not go into the causes that have reduced our merchant marine to its present low estate, possibly because he feared to make his message too long. But he ought at least to investigate those causes carefully himself before urging a remedy; and if he had done this with any thoroughness he would have seen the fallacy in his reasoning. The problem met with here is different from that involved in the building and operation of a railroad or a telephone system. In respect to these latter it is fair to anticipate that the developing agent will be able to hold the business it has created. Franchises can be refused to concerns desirous of building competing lines. But in the case of foreign shipping there are no such natural and artificial restrictions. No costly tracks or wires are required for ocean commerce, and ships can be shifted readily from one route to another if trade conditions so dictate. Competition involves foreign agencies over which our Government can have no direct control. So that, even if the Government should build up a large shipping business and turn it over to private concerns that, unlike the Government, could not do the business at a heavy loss to itself, there would be no assurance that such business would not quickly be lost to the ships of other countries when the artificial props were removed. The President, in fact, gives us no basis for thinking otherwise than that this would be the natural and inevitable result.

Moreover, the President errs in assuming that to provide ships will of itself assure the speedy rehabilitation of our merchant marine. In order to make a successful merchant marine these ships must do a large business, and the acquisition of such business is one of our problems. This will require time, even with foreign shipping hampered as it is by the war, for foreign capital, buttressed with governmental support, has been years establishing this business, and it will take years, probably, to win it to the United States even if we can meet our rivals on an even footing. As a short-cut, quick-cure provision, the President's plan does not appear to be at all sound, when viewed as a device for getting permanent results. There remain other objections that the President ignores. He does not show wherein governmental ownership is more effectual than subsidized private lines in getting results. If the Government can not serve this field better than private capital can with reasonable assistance from the Government, why extend the Government's operations? Why extend them in any direction unless there is a good and urgent reason for it? It so happens, moreover, in this case that the policy of governmental ownership would involve special and unusual risk, particularly with foreign nations at war. Government vessels charged with carrying freight, and more or less of a contraband nature, would afford a peculiarly grave menace to our neutrality. Why incur this peril? Is it necessary? Is it practical as an economic remedy? The President has not demonstrated that it is.

Another brief editorial from the Boston Herald, under the caption "Boston does not like it," is as follows:

Boston shipowners have pronounced against President Wilson's shipping bill. The Boston Maritime Association, "whose members own the bulk of steam and sail tonnage in Massachusetts," protests to Congress against the measure as "entirely foreign to the purpose for which the movement exists," and as "distinctly a move toward general Government ownership."

This is the judgment of experts, who know their trade, and rightfully object to the United States Treasury as a competitor. Whatever present difficulty there may be in securing tonnage, these practical ship managers say, is due mainly to inability to obtain insurance on cargoes or on ships, particularly if sent to mined and dangerous waters. As to South America, the business depression there, due to the war, has brought about a condition in which there are, temporarily at least, more ships than merchandise to fill them. These Boston shipowners have given to Secretary Redfield a list of ships representing over 200,000 tons of dead-weight capacity, which could be chartered foreign if there were sufficient business to employ them.

This Government-ownership bill is having a particularly bad effect upon Boston's maritime prosperity. For several years our Boston merchant fleet has been steadily increasing. Among the new ships are 24 steamers available for foreign as well as coastwise trade, embodying an investment of upward of $8,000,000. Four of these ships are now on the routes to Europe and four more on the Pacific. But since the war began and President Wilson launched his Government-ownership project it is significant that Boston capital has turned from and not to the sea, building has ceased and no more new ship contracts have been awarded.

If the bill on which the President in his message insists with so much emphasis were really helpful to the merchant marine, no one would see and welcome it more eagerly than the alert and ambitious shipowners and builders of New England. But they are unitedly against it. So, apparently, are the actual shipping men all along the Atlantic and Pacific. One maritime or mercantile association after another condemns the administration plan, and not one upholds it from the great commercial States of either seaboard.

This, presumably, is the reason why the Government-ownership bill was "jammed through" the Senate Committee on Commerce without the accustomed courtesy of public hearings. The promoters of this unprecedented measure were afraid of the verdict of the men who know.

Mr. President, I have had several bills relating to the American merchant marine before the Committee on Commerce during my service in this body and in every instance hearings were accorded to the friends and to the opponents of the measure, but it happened for some reason or other that this particular bill was reported out of the committee without any hearings, and as a result the only means that the business men, the industrial interests, and the newspapers of the country have to protest is through the medium I am now employing.

A little time ago the esteemed Washington Post, under the caption "Government steamships—the danger of complications," had an editorial which I read with a good deal of interest at the time and which I think is worthy of reproduction. The Post said:

The present controversy with Great Britain is a warning against the enactment of the administration bill providing for Government-owned steamship lines.

A strong protest has been made, and it will be reinforced if necessary, against the unwarranted interference with American commerce. Some of the American cargoes are in foreign bottoms and some of them in ships under the American flag. The controversy is over the cargoes and not over the ships. But what would the situation be if Great Britain were to seize ships owned and operated by the United States Government? An acute quarrel would ensue, and the nations would be fortunate if they escaped war.

The ships owned by the United States under the proposed law would not be commanded by officers of the United States Navy, it is true, but they would be Government vessels, nevertheless. The United States could not permit such vessels to be stopped and searched on the high seas without a loss of self-respect. It would be compelled to resist such attempts. The people would expect any administration to defend the flag, and would assert themselves in no uncertain manner if the Government weakly yielded to a foreign power.

The entry of the United States Government into the ocean-carriage business would be an unfortunate mistake. The Government was not organized for money-making purposes.

It can not enter any commercial field without competing with its own citizens. Private steamship lines would have to go out of business, go under a foreign flag, or be absorbed by a Government monopoly. Instead of promoting a healthy, permanent merchant marine under the American flag the Government-ownership plan would kill off the existing merchant marine and make individual enterprise in that field impossible. At the same time, complications with foreign Governments would be inevitable. The Government ships would have to submit to search and possible seizure or refrain from carrying cargoes during war time. Therefore the establishment of Government lines at this juncture, when practically all the world is at war, is most ill-advised.

At a later date, that of January 6, the Post had another editorial headed "Government ships would be dangerous in wartime and costly in time of peace." Just think of it, Mr. President! We are going to enter into a policy that it is asserted would be dangerous in wartime and costly in time of peace, and I have no doubt that that assertion is fully justified by the facts. The Post said:

The minority report on the Government ship purchase bill is well worthy of serious consideration by the administration. At this juncture, when complications with Great Britain regarding the treatment of neutral cargoes remain to be settled, it is prudent that the United States should very carefully investigate conditions before it commits itself to the plan of purchasing foreign ships to be owned and operated by the Government, or under its auspices.

There is no shortage of ocean vessels. Very few of them have been destroyed. There are many tied up, particularly those under the German flag; but if the United States Government should purchase German ships and attempt to operate them it would find itself in hot water immediately. International law presumes that transfers of flag during hostilities are not made in good faith, but are merely a subterfuge to relieve vessels of a belligerent from the consequences of war. Of course the United States would not be a party to fraudulent or colorable transfers of ownership. The transfer would be genuine; but, nevertheless, Great Britain would raise objections to any plan that would release the German vessels. These vessels are put out of commission by war, greatly to the damage of Germany. This is a legitimate advantage enjoyed by Great Britain, which she would not forego for the sake of assisting the United States to build up a competitive commerce.

In fact, Mr. President, to this intelligent editor's statement that Great Britain would resist the purchase of German ships by our Government because Great Britain is enjoying an advantage from the fact that they are interned in American ports he might have added that the entire history of the British Government has been to do everything possible to prevent the upbuilding of an American merchant marine. Great Britain has not been overcareful of the agreements she has made with the United States in that regard, and if Great Britain has failed to discover any means by which she could cripple the American merchant marine it has escaped the attention of some students of that subject. So Great Britain will have a double purpose in objecting to the purchase of these ships by our Government, one purpose being that she is crippling Germany by keeping them in our ports, and the other that she is unwilling to have us, by the purchase of ships from belligerent or neutral nations for that matter, which will tend to build up our merchant marine, thus become a competitor with her on the ocean.

The Post continues:

"Every craft set afloat by the Government would add one more risk of our being drawn into the present war," says the minority report. This is unquestionably true.

As for the operation of Government-owned ships after the war, how would they be made to pay? Since American vessels can not compete with foreign ships in the overseas trade, how long will Congress be willing to meet losses incurred by the Government lines? Is Congress willing to pay big sums for the sake of seeing the American flag on the seas, when vessels under other flags will carry American cargoes cheaper than our own vessels?

The more the Government ship-purchase bill is studied, the more serious appear to be the obstacles in the way of successful operation of Government-owned ships. It is a piece of paternalism that is dangerous in time of war and ruinously costly in time of peace.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). Does the Senator from New Hampshire yield to the Senator from Florida?

Mr. GALLINGER. With pleasure.

Mr. FLETCHER. May I ask the date of the editorial which the Senator from New Hampshire has just read?

Mr. GALLINGER. That was under date of January 6, 1915.

Mr. FLETCHER. I think, if the Senator will take the trouble to refer to an editorial of a few days ago, he will find that the Post then expressed a very different view upon it.

Mr. GALLINGER. That was probably written by a cub reporter, while this was written by the real editor of the Post. I was once connected with a newspaper in an editorial capacity. While I was away from home for a few days the office boy wrote an editorial which appeared in that issue, very much to my dismay when I returned. If an editorial of different tone has appeared in the Post it may be accounted for in the same way.

I want to say that I deserve the thanks of the majority of the Senate for not introducing more protests from the newspapers of the country against this bill. I have a bundle of them in my committee room which I might use, but I feel that what I have quoted ought to be a sufficient education for those who are unwise enough to advocate the passage of this measure.

Coming now directly to a consideration of the merchant-marine question I beg to call attention to the fact that whenever demands have been made to pass remedial legislation, such as enlarging the postal subventions to American ships, we have been met with the suggestion that the adoption of differential duties would solve the problem, and when the impossibility of securing relief from that source has been pointed out then the claim that the amendment of the navigation laws so as to admit of the purchase of ships abroad would be a panacea. The Merchant Marine Commission pointed out clearly that free ships would in nowise solve the problem, and for the purpose of testing it no opposition was made to incorporating in the Panama Canal act a proposition along that line. The discriminating-duties proposition is a part of the existing tariff law, but that has proved the failure that some of us pointed out it would, and no effort is being made to enforce it.

If the CONGRESSIONAL RECORD should be searched during the past 10 years it would be found that whenever an effort has been made to pass a bill that some of us believed would tend to rehabilitate the American merchant marine, we have been met by two objections from our Democratic friends. One was, that all we had to do to reestablish the American merchant marine, without the payment of a subsidy or subvention from the Government, was to return to the discriminating-duties policy of the fathers—Washington, Jefferson, and Madison. When that argument seemed to fail, then we were met with the other proposition—that if we would amend our archaic navi-

gation laws and allow the citizens of the United States to go into foreign countries, purchase foreign-built ships and put them in our overseas service the problem would be forever set at rest.

Well, Mr. President, neither of those propositions appealed to me, because I did not think that either of them would accomplish the desired result. The Merchant Marine Commission, which was composed of fairly good men, members of this body and of the other body, gave a great deal of time to the consideration of all these matters and reported on them. Here is what the Merchant Marine Commission said about the free-ship question——

Mr. FLETCHER. Will the Senator give us the number of the report from which he is about to read?

Mr. GALLINGER. I am quoting from Senate Document No. 225, Sixtieth Congress, first session, on page 56, entitled "The Free Ship Question." I have an impression that this particular statement may not be found in full in the report of the Merchant Marine Commission, although I am not certain as to that. That it received the concurrence of that commission, or at least a majority of them, I assert with confidence. This article says:

To repeal our century-old registry laws and allow shipowners to buy or build at low prices abroad the ships needed for our commerce seems at first glance an easy and inexpensive way of securing a large mercantile marine.

But it meets only one-half of the question. American ships now cost more to build than foreign ships, chiefly because American shipyard wages are higher, and only in very small part because of the cost of materials, which are free anyway for vessels for the foreign trade.

During the discussion of this matter it was rather interesting to find that very few public men understood that all the materials for shipbuilding, under the laws of the United States, could come in absolutely without the payment of duty; so that the materials themselves were free. As I say, that was not generally understood. The report continues:

But American ships also cost more to run after they are built, because of the higher wages on shipboard, and often, also, because foreign ships not only have low wages, but receive bounties from their governments.

"Free ships" would not solve this difficulty; they would not touch it.

Suppose two steamers, identical in size and cost, were built side by side in a British yard and sold, one to an American, the other to a British company, for the trade to South America. The steamer flying the British flag could procure its officers and crew at Liverpool for wages about 30 per cent less than the steamer flying the American flag could at New York or New Orleans.

This is a serious handicap, but the British steamer, carrying the British mails, would receive some thousands of dollars in subsidy, while the American steamer would receive either nothing at all or at most some few hundred dollars of United States mail pay.

Perhaps the British subsidy would be large enough to guarantee a handsome dividend on the British steamer, which could thereby carry freight at cost, while the American steamer, without the help of a subsidy, would either have to ask higher freight rates on American goods or forego a dividend altogether.

This illustration will show that "free ships," even if the policy were adopted, would not solve the shipping question; that there would still be left the difficulty of the higher American shipboard wages, and in some cases also of the foreign subsidies.

It would be very much as if a policy of free trade were adopted, for example, in the machinery of woolen mills. Of course, the immediate result of the entire removal of the protective duty would be to kill the manufacture of such machinery in the United States and reduce a number of skilled mechanics to idleness and want. But the woolen mills could import their machinery free of duty, and doubtless would get it for a somewhat lower price.

If, now, a protective duty were kept on woolen goods, it is probable that a great deal of "free" foreign machinery would be bought and operated. But if there were no protective duty whatever on woolen manufactures—just as there is now no protection for ships—it is probable that foreign woolens made with low wages would overwhelm our mills, and that even with machinery "free," very little, if any, machinery would be purchased.

In the matter of shipping, this is no mere conjecture. It is exactly what has happened in the maritime experience of the world. In the years between 1840 and 1860 the crisis of the transition from sails to steam and from wood to iron in shipbuilding, the British Government gave generous subsidies to steamship lines; at this date the chief part of British steamship tonnage was subsidized. One result was to give iron shipbuilding and steam-engine building such an impetus in British yards that no nation could compete with them. Foreseeing this, the British Government for the first time passed a "free-ship" law, shrewdly hoping that all other nations, especially the United States, would follow, and that soon all the ships of the world would be built of British iron by British workmen.

But the United States did not follow. After a time, however, France did, and Germany and Italy and Norway and other nations.

The result in France was that in 1881, after a long trial of the privilege of buying "free ships" in Great Britain, the French people found themselves with fewer ships (914,000 tons) than they had in 1870 (1,072,000 tons), while French shipbuilding had so nearly disappeared that it was difficult to get new battleships for the national defense without going to England for them also.

Of course, this weakening of the French navy was one of the results which British statesmen had sought when they gave their first subsidies to steamships and encouraged their neighbors across the channel to adopt a "free-ship" policy.

In despair at the disastrous consequences of the "free-ship" policy, and realizing how Great Britain had tricked her, France now adopted an elaborate plan of subsidies to French shipping, steam and sail, and bounties to shipbuilding. The French subsidy system in many respects was a blundering one, though it has been much amended and improved.

But with all its faults of detail it has established French shipyards fit to build the heaviest armor clads; it has created a large naval reserve of merchant officers and sailors, and finally it has increased French tonnage (which shrank steadily under "free ships") from 914,000 in 1881 to 1,760,000 in 1904—very nearly double.

Germany also tried "free ships." Her merchants were allowed to buy all their seagoing vessels in Great Britain, but while this expedient increased German tonnage scarcely any (only from 1,098,000 in 1873 to 1,243,000 in 1881) it did smother German shipbuilding so effectively that there was not a yard in the Empire that could construct a man-of-war to protect the coasts, and the few armor clads which Germany possessed were bought of British builders.

In 1881 Bismarck appealed to the Reichstag to put an end to this and to give subsidies to German steamship lines after the British example. A subsidy of $1,047,500 was given to the North German Lloyd for a service to Japan, China, and Australia, and of $214,000 to another company for a line to Africa.

But the Reichstag would have no "free ships" for those new lines. It required, significantly, that the subsidized ships should be built in German yards, as far as possible, of German materials. Thus, these subsidies created the German shipyards that are now building Kaiser Wilhelm's battle line, and have built the monster *Deutschland* and other Atlantic flyers.

German shipping, which had made no notable increase under "free ships" alone, has grown wonderfully since Bismarck led the way for imperial encouragement. Besides these generous mail subsidies, the German State railways haul material at nominal rates for shipyards—a virtual bounty on shipbuilding—and these same State railways grant favorable rates on goods exported by German steamers.

That is a point which has been overlooked to a large extent in the discussion of the American merchant marine question. Germany, owning the railroads, carries materials for shipbuilding to German shipyards at a lower cost than it carries other commodities, and also makes more favorable rates on goods exported by German steamers than by other steamers. Germany's great wisdom in these matters is shown by the fact that a letter mailed in Washington for Germany will require a 5-cent stamp if it is not designated in writing on the envelope that it is to go by a German steamer. If it is to go by a German steamer, it will cost 2 cents. Germany in every way looks out for the upbuilding of her industries, and especially of her shipping facilities. Of course I am speaking of conditions existing before the war, and conditions which will exist after this horrible war comes to an end, which heaven grant may be before long.

The German merchant marine interests are fostered in every possible way, and though a "free-ship" policy still exists, relatively few German steamers are now bought abroad.

German tonnage, which was 1,243,000 in 1881, is now 3,393,000.

This was written in the year 1905. We talk about the free-ship policy of England. When the great steamships *Maurctania* and *Lusitania* were built in England, not only did the Government put up $13,000,000 to build them, to be paid back through mail subventions, but the contract provided that they should be built in British shipyards. So that even England has not fully lived up to the free-ship policy which has been so often referred to in connection with that country.

Norway at first made best use of the "free-ship" experiment. The Norwegians are born sailors, and they work for almost the lowest wages. Between 1870 and 1880 Norway bought a great many American and British sail vessels, sold at a low price because they could no longer compete with steam, and Norwegian tonnage rose rapidly from 1,022,000 to 1,650,000.

But there it seemed to stop. While France, with very much less aptitude for the sea, increased her tonnage by help of subsidy from 1,104,000 in 1890 to 1,760,000 in 1904, Norwegian tonnage has scarcely gained at all, or only from 1,650,000 to 1,779,000.

But now Norway, though she is very poor and small, has followed the other nations in showing her dissatisfaction with "free ships" alone, and has begun to give small subsidies to regular mail lines and bounties to native shipbuilding.

Italy tried "free ships," as France and Germany did, with exactly the same experience. Her ships did not increase, and her shipyards vanished. Finally Italy also, to save her shipping trade, was forced to adopt a comprehensive system of subsidies to all ships, including bounties on construction.

The Italian merchant fleet has grown rapidly of late years, from 860,000 tons in 1894 to 1,259,000 tons in 1904.

Japan, too, has followed the same course. She tried "free ships" persistently, with the result that as late as 1894 she had only 200,000 tons of shipping of all kinds, and almost no shipyards.

The war with China in 1894 taught Japan a sharp lesson of the value of a merchant marine. She turned now to subsidies and bounties on a liberal scale, developing steamship lines and native shipyards, and possessed a merchant fleet of 830,000 tons in 1904, sufficient for her needs of transports and auxiliary cruisers in the greater war with Russia.

To sum up, therefore, it may be said that all the maritime nations of the world have tried "free ships" in the past, and, disappointed with the results of this expedient alone, have now all turned to some form or degree of subsidy, bounty, or subvention.

Even Great Britain has so little faith in "free ships" as an economic principle that her recent mail contract with the Cunard Line requires specifically that the subsidized steamships shall be "built in the United Kingdom."

That is a matter to which I have already referred.

Thus the "free-ship" idea is conspicuously flouted, though not formally abandoned, by the British Government.

Other governments, as a rule, do not actually forbid a "free-ship" policy, but they do all they can to encourage their merchants to build their ships at home, and not add further to the maritime dominance of Great Britain.

European bounties on shipbuilding are, of course, a direct discouragement to "free ships" and a powerful protection to native industry. If the United States Government were to pay ten to twenty dollars a ton on every ship built in the United States, something might be said for the free registry of British-built vessels in America; but to practice "free ships" without any aid or encouragement to home building is something which is done now by not one of the maritime nations.

Even if the "free-ship" policy were applied in connection with a subsidy policy in the United States, the "free-ship" principle would be of very dubious advantage. If out of 100,000 tons of steamships subsidized and added to our merchant fleet in a single year 50,000 tons were built in this country and 50,000 tons bought in Great Britain, the 100,000 tons would undoubtedly cost less than if they were all of American construction.

But, on the other hand, to the extent of 50,000 tons we should then have developed the shipyard resources of the United Kingdom and should have deprived American yards of 50,000 tons of that experience which must be had before American ship prices can be reduced, as they must some day be reduced, to the level of our formidable competitor.

American shipyard wages are the highest in the world. But they are no higher than the wages in American locomotive works and bridge works, and American locomotives and bridges are competing in cost with similar British articles.

How, with our high wages, have we been able to bring down the price of American locomotives and bridges? Why, by keeping these works constantly employed to their full capacity, by standardizing their product, and by maintaining steadily an enormous volume of production.

To manage to do the same thing with our shipyards is finally to reduce the price of ships, and it is the only sure way in which this can be accomplished, except, indeed, by a reduction of American shipyard wages, which nobody would advocate.

But to buy ships in Great Britain under a "free-ship" policy instead of building the ships, even at a temporarily higher price here, is to hamper this process of industrial evolution and play directly into the hands of our great antagonist.

This fact is clearly seen by our British rivals. As the London Engineer not long ago said:

"Free ships would be a good thing for our English shipbuilders, for whether at first or at second hand the vessels purchased would be of English build for the most part. The development of a native American shipbuilding industry can be of advantage to neither builders nor owners here."

This is also the expert view of the practical ship merchants of America. Nearly all of the experienced shipowners of this country engaged in foreign trade testified in the course of the recent long and careful inquiry of the Merchant Marine Commission.

These practical men were asked: "Do you desire 'free ships'?" "If Congress changed our law and enabled you to buy ships abroad and run them in the foreign trade, would you do so?"

With only one or two exceptions these practical men emphatically replied that they did not desire "free ships"; that they could not buy foreign vessels and run them under the American flag at the American wage rate against the cheap wages and often the subsidies of their foreign competitors; that "free ships," if adopted, would prove to us, as to others, a delusion, and would be of no advantage whatever toward the real development of an ocean fleet in the United States.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Minnesota?

Mr. GALLINGER. I yield.

Mr. NELSON. I desire to ask the Senator a question. This may not be the proper place in his remarks to do so, but I should like to ask him if it is not a fact that the ocean rates on exports from this country are high because of the fact that the imports have fallen off to such an extent that vessels coming from the other side to this country get little or no freight, comparatively speaking, and they have to earn enough on the passage out to Europe to pay them for the round trip? Is not that one of the chief causes, in addition to the war risk and insurance rates, that has tended to increase rates?

Mr. GALLINGER. Mr. President, the Senator has undoubtedly made a wise suggestion in that regard. A great problem in establishing American lines across the oceans of the world has been to try to connect with ports where a return cargo could be secured. It would be disastrous for an American line of ships to go into the business when, although there are goods to be transported from our country, there are very few goods to be brought back, and no wise shipping man would engage in an enterprise of that kind.

In addition to the cause which the Senator from Minnesota [Mr. NELSON] has suggested as a reason for high rates, there is one other cause which might be stated, and that is that the European war has made labor so difficult of procurement that the wages of the men on the docks and in the warehouses, as well, have been largely increased, even if labor can be procured at all. That is one reason why we hear it said that American goods are lying at the ports of foreign countries without being unloaded.

Mr. NELSON. Mr. President, will the Senator yield to me further?

The PRESIDING OFFICER. Does the Senator from New Hampshire yield further to the Senator from Minnesota?

Mr. GALLINGER. I yield further.

Mr. NELSON. Would not an investigation disclose the fact that the rates on imports to this country by way of the ocean have not increased anywhere near as much as have the rates on exports?

Mr. GALLINGER. I understand that to be so.

Mr. NELSON. Is not that due to the fact that imports are comparatively slight and that vessels which ply to Europe are glad to get anything in the shape of a return cargo, and hence there has been little or no increase in that kind of traffic?

Mr. GALLINGER. I understand that to be a fact.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Utah?

Mr. GALLINGER. I yield to the Senator from Utah.

Mr. SMOOT. In that connection, Mr. President, I should like to ask the Senator if it is not also a fact that, on account of the great number of ships that, because of the war, have been withdrawn from actual service, the law of supply and demand is now working and the shipowners themselves are getting every dollar out of the trade that it is possible to get; so that they have increased rates sometimes 500 and 600 per cent, for the very reason that the ships are not procurable to carry the amount of exportations demanding shipment? Of course freights have advanced greatly, but the mere fact of the United States purchasing 30 ships from some other nation would have no effect whatever upon the ocean-freight rates charged the commerce of the world.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Florida?

Mr. GALLINGER. I yield to the Senator from Florida with pleasure, always.

Mr. FLETCHER. I simply wanted to ask the Senator if he claimed that the shortage of cargoes coming to this country would in any wise occasion such advances as are reported—that vessels are getting $40,000 per month where before the war they were chartered for $5,000 a month?

Mr. GALLINGER. It does not fully account for it. It accounts for it in part. The fact is that our people are not different from the other people of the world in matters of business. The opportunity has presented itself for shipowners of all the nations of the world to advance their rates. On certain routes there is ample reason why they should do so, because the hazards are great. On other routes very likely they have advanced them inordinately. I assume that to be true. But that the purchase or the construction of 30 or 40 ships by the Government of the United States could by any possibility have any great influence upon reducing the rates upon the 4,000 or more British ships which are traversing the ocean is beyond my comprehension.

In this connection I may use the simile of our friend and former colleague who stood directly behind me for so many years and guided the legislation of this body as few men have, the Senator from Maine [Mr. Hale], who used to say that "You might as well have painted ships on a painted ocean." I think you might just about as well put a fleet of painted ships on a painted ocean and expect them to reduce to any substantial degree the increased rates that are now charged as to expect 30 or 40 ships under the American flag to accomplish that result, even if we could get the ships. If we propose to buy them, where are we to get them? If we build them, we can not get them built in American shipyards to-day and I doubt if we can in foreign shipyards under 12 or 15 months. Then the emergency, we all hope, will have passed; the war will have closed; English and German and French ships will again dot the ocean. They are navigated at a much less cost than an American ship can be navigated, and this venture that we have made will go to the scrap heap. That is what will probably happen.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire further yield to the Senator from Florida?

Mr. GALLINGER. I yield with pleasure.

Mr. FLETCHER. I do not wish to interrupt the remarks of the Senator from New Hampshire.

Mr. GALLINGER. Oh, the Senator does not annoy me. I always yield with pleasure to the Senator from Florida.

Mr. FLETCHER. I have listened with interest to his address, but I should like to inquire of the Senator if he agrees with the view of the committee which reported to the New York Chamber of Commerce that the difference in the cost of operating vessels under the American flag and under foreign flags is from 5 to 10 per cent?

Mr. GALLINGER. I do not agree with that at all.

Mr. FLETCHER. That is the statement that was read here this morning.

Mr. GALLINGER. Yes; I read that statement for what it is worth. Every statement is worth just what the facts will justify. The truth is that the difference in the food supply as

between American ships and many foreign ships would probably be 5 per cent. The additional crew that we are required to carry is a very important item. Then there is the fact that we are compelled, under the laws of the United States, to pay the officers of the ship more than twice what is paid by foreign governments; the further fact that we are required to carry a portion of our crew of Americans, while they carry Lascars and Chinese and Japanese, and the lowest-paid laborers in all the world. Oh, I know the difference would not be as little as that. I do not know just what it would be, but it is enough to prevent our capitalists and our shipowners and shipbuilders from going into the business, and it always will prevent them from going into it until in some way we equalize the difference in cost between navigating an American and a British or German, Japanese, or French ship.

I will conclude the article I have been reading by quoting the closing paragraph:

Moreover, the Merchant Marine Commission caused a direct special inquiry to be addressed to the International Mercantile Marine Co. and other concerns, wholly or in part American, owning ships under foreign colors. The managers of these concerns, representing practically all of the American investments in foreign shipping, were asked point-blank if they would put their ships under the American flag providing Congress opened registry to them.

Without an exception, in reply to this specific question, they said they would not do so, unless, indeed, enough aid were given through subsidy or discriminating duty to enable these foreign-built ships to pay American wages to their crews and to offset subsidized competition.

Yet, if there were any actual benefit in "free ships," these American owners of vessels under foreign flags would be the prime beneficiaries.

Their unanimous opposition, therefore, is exceedingly significant.

"Free ships" are not only discredited by the experience of the world but are overwhelmingly opposed by the trained judgment of American ship merchants.

Mr. President, notwithstanding that argument, which was presented to the Congress and particularly to the Senate, when a bill was introduced prepared by a majority of the Merchant Marine Commission, and not strenuously opposed by the minority, we were met by the assertion that if we would only revise or modify or repeal our "archaic navigation laws" and let Americans go to England, to France, to Germany, and to Italy and buy ships as freely as the citizens of those countries could buy them, we need not worry any further about upbuilding the American merchant marine. Well, we have yielded to that, those of us who did not believe in it; a free-ship law is on our statute books, and still the ships are not here and they will never come here under that policy.

Then, when that contention failed, our opponents fell back on the plea that the discriminating-duties policy of the fathers, a policy advocated by Washington, Jefferson, Madison, and the other great men of the early period of our history, was really the policy that we ought to adopt.

Mr. NELSON. Mr. President, will the Senator yield to me?

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Minnesota?

Mr. GALLINGER. I yield to the Senator from Minnesota.

Mr. NELSON. Would not this be a good occasion to apply the old-time principle of discriminating duties? It is a principle announced by the Supreme Court that a treaty may repeal a law, and a law may repeal a treaty. That part of the tariff law which provided for a discriminating duty operated to that extent as a repeal of existing treaties. Would not this be a good time to enforce that provision and resort to that practice? Would it not help to make up the difference in the cost of constructing the vessels and in the cost of operating them to have a discriminating duty of, say, from 5 to 10 per cent? I believe the old-time duty was 10 per cent.

Mr. GALLINGER. Yes.

Mr. NELSON. I should like to hear the Senator's views on those questions.

Mr. GALLINGER. Mr. President, I voted for that provision in the Underwood tariff law which allowed a differential duty of 5 per cent on goods transported in American bottoms; but I did it with a full conviction that if it was tried it would prove a failure. I will give my reasons for that belief. I regret exceedingly that it was held up. I regret that the law department of the Government ruled that, in view of the fact that we had entered into thirty-odd commercial agreements or treaties with foreign countries whereby we had promised not to adopt any policy that they did not adopt—in other words, reciprocity agreements—we could not enforce that provision of the tariff law in the face of those agreements, and that it ought not be attempted until such time as we annulled those treaties. I wanted to see the experiment tested.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire further yield to the Senator from Minnesota?

Mr. GALLINGER. I do.

Mr. NELSON. If the Senator will allow me another question, I will make a brief preliminary statement in order that the Senator may understand the question. A bill is now pending, commonly called the seamen's bill, by which we propose to impose upon sailors of foreign ships entering our ports the same regulations that we impose upon our own sailors. Now, if we have the power to impose such regulations and restrictions upon the sailors of foreign ships entering our ports, why have we not the like power to resort to discriminating duties, and what is the difference in principle?

Mr. GALLINGER. Mr. President, I had hoped we had that right, although I greatly doubted it, when the tariff bill passed. For myself, I should like to see it tried. I think it might be of some benefit. The Merchant Marine Commission considered that matter at very great length, however, and they have made a report on it, which I propose to read.

When the Merchant Marine Commission was organized a majority of the commission were in favor of discriminating duties, but after a thorough investigation of the subject, and seeing the difficulties that were in the way, they came to the conclusion that such a plan would not meet the requirements of the situation. As an illustration, in the early days we had a small import duty upon pretty much everything from all the countries with which we traded. We now are looking for trade with South and Central America, and the goods from those countries are almost all on the free list, so that the differential duty would not be of much benefit to the shipping interests of the United States, so far as those countries are concerned. The same is true of the Orient, where we are trying to extend our trade. Largely the goods are either on the free list or at a very low rate of duty, and we would get little benefit from that. We would get great benefit if we had ships across the North Atlantic—there is no question about that—where we could get the benefit of a differential duty on the goods that are brought from France, Germany, England, and Italy; but, unfortunately, this great country of ours, the richest in the world, leading all the nations of the earth in wealth, in manufacturing, in agriculture, and in mining, has exactly four second-class ships crossing the North Atlantic to-day. So that the great benefit we would receive if we had an adequate merchant marine traversing the North Atlantic would amount to very little in view of the fact that we have only those four lone ships as against the great fleets of Great Britain, France, and Germany.

Mr. STERLING. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from South Dakota?

Mr. GALLINGER. I yield to the Senator from South Dakota.

Mr. STERLING. The Senator from New Hampshire speaks of a differential duty. For information, I should like to know if the Underwood bill, instead of speaking of it as a differential duty, did not make a discount of 5 per cent on the duty on all goods shipped in American bottoms?

Mr. GALLINGER. Yes; that is a differential or discriminating duty.

Mr. STERLING. Yes.

Mr. GALLINGER. On general principles it would inure to our advantage. But to get any particular benefit out of a differential duty in the case of the nations with which we are trading, where we have most of the products on the free list, we would have to resort to the expedient of putting them on the dutiable list, which would result in a storm of disapproval throughout the country that no political party could stand for.

The Senator from California [Mr. PERKINS], who really knows more about ships and shipping than any other man in public life, and who I wish were physically able to take my place in this discussion, calls my attention to what Secretary McAdoo said in his speech at Chicago before the Commercial Club on January 9. I may say, *en passant*, that I do not know exactly why Secretary McAdoo should be given the distinction of understanding this great question better than some of the rest of us, but he is put forth as the exponent and defender of the bill we now have under consideration. He was the only man called before the committee of the other House to discuss it, except two Members of the body, each of whom, I believe, had a bill of his own; and he is going out into the great cities of the country announcing his views, which are undoubtedly the views of the administration, telling the people of the beauties and advantages of this measure, which is being condemned by the business interests of the country from one ocean to the other. Secretary McAdoo briefly discussed this matter of discriminating duties in his Chicago speech, and I will read what he said about it:

A provision for discriminating duties is contained in the Simmons-Underwood tariff bill—

Says Secretary McAdoo. It should be "the Simmons-Underwood tariff *law*"—

enacted in 1913, but the Attorney General has held that it violates our treaty obligations with various foreign nations. This plan, therefore, must be dismissed as unworkable. Even if our treaties did not stand in the way, and we could enforce such discriminating duties in favor of our ships, it would be easy for other nations to retaliate with similar discriminations and thereby largely negative such a policy. Retaliatory reprisals of this character would only prove hurtful by creating irritation and ill will and prevent the building up of our trade under our own flag.

That was not done during the early days of the Republic, when we had discriminating duties. We had no difficulty in enforcing them and building up our own interests without any irritating controversies with foreign nations; but very likely foreign countries might undertake to retaliate.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire further yield to the Senator from Minnesota?

Mr. GALLINGER. I yield.

Mr. NELSON. Is it not in the power of the Government, under nearly all of these treaties, to denounce them, as it is called—to terminate them?

Mr. GALLINGER. They can be denounced by giving one year's notice.

Mr. NELSON. By giving one year's notice we could denounce all these treaties and get rid of them and resort to discriminating duties of 5 per cent——

Mr. GALLINGER. Yes; or 10 per cent, or any other per cent.

Mr. NELSON. Or 10 per cent; and if we resorted to that, and denounced these treaties, and did it during the continuance of the present war, would we not have a good opportunity to make a start of it and to build up our shipping and avoid the question of subsidy?

Mr. GALLINGER. I think if we were rid of those treaties, or agreements, as they are sometimes called, we would have taken a long step toward putting the question of discriminating duties to the test. I will say to the Senator from Minnesota that, whatever others may have done, after this exhaustive investigation on the part of the Merchant Marine Commission ended I took it upon myself to urge upon the then Department of State that it would be good policy for the Government to denounce those treaties and let us start anew. It was not done, however; and we are in exactly the same situation now, so far as those treaties are concerned, that we were then.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire further yield to the Senator from Minnesota?

Mr. GALLINGER. I yield.

Mr. NELSON. In the seamen's bill that is pending now we propose to abrogate all those treaties, so far as they relate to seamen. If we do it in that case, is there any sane reason why we should not do it in the case of discriminating duties, and denounce them on that ground, too?

Mr. GALLINGER. I do not know whether it can be done in reference to seamen without the notice of one year.

Mr. NELSON. No; but would not the denouncement of a treaty in the case of seamen work as a denouncement of the entire treaty?

Mr. GALLINGER. I should hardly think so; but I am not versed in law, and would not venture to enter upon ice that might be too thin to carry me, so I must refrain from answering that question.

What I was about to say, however, was this: As free ships have failed, notwithstanding that policy was urged upon us as the panacea for all our shipping ills, so I feel sure that the discriminating-duty policy, if it shall be adopted, even if those treaties could be gotten rid of, would not to any large extent solve the problem.

I want to read what the Merchant Marine Commission said on the question of discriminating duties. It will be found on page 77 of Document No. 225, Sixtieth Congress, first session:

The historic policy of discriminating duties which the United States maintained in full to 1815 and in part as late as 1828 and even 1849, occupied so large a place in the inquiry of the Merchant Marine Commission that it is well to make at once a frank explanation why a return to this policy at the present time has not seemed wise to a majority of the commission.

It is probable that when the commission was appointed, in 1904, a majority of those Senators and Representatives composing it who had positive views favored another trial of the discriminating-duty policy, and believed that that course would be recommended to Congress. Moreover, from the very beginning of the inquiry, powerful arguments for the discriminating-duty plan were advanced, especially by the Maritime Association of the Port of New York, the largest shipping trade organization in America. This policy of the Fathers of the Republic, as it was well described, was ably advocated not only by many practical shipowners and shipbuilders but by many manufacturers and merchants—usually, however, in connection with the policy of mail subventions to regular lines, which may be said to have met with almost unanimous support in every section of the country.

These arguments had a very great effect upon the commission, but at the same time some very serious objections were disclosed in the radical difference of mercantile conditions between the first half of the nineteenth century and the first decade of the twentieth century. In the first place, there were the 30 commercial treaties with foreign Governments—the very foundation of our modern commercial relations—which prohibit both discriminating custom duties and discriminating tonnage dues. These treaties of course could be abrogated, but notice of this would have to be given a year in advance, and new treaties without a discriminating duty clause negotiated on terms as favorable as before. This, manifestly, would be a difficult though not an impossible undertaking.

Far more serious than the abrogation and renegotiation of 30 commercial treaties would be the almost certain retaliation of foreign Governments. It is true that if they retaliated only against our shipping they could not do much harm, for an American vessel, even direct from the United States, is seldom seen now in European waters. But these foreign Governments would probably shape their retaliation where it would hurt and be effective—against our export trade in general—by discriminating duties on the products of our agriculture and our manufactures.

As an individual member of the commission I never laid much stress on that. I think this matter of retaliation is a two-edged sword, and against the United States, as powerful as it is, no other Government will rush into retaliation without giving the matter very serious thought:

Indeed, certain important commercial associations of the central West, while strongly favoring the development of the merchant marine, sent to the commission a formal remonstrance against the adoption of the discriminating duty policy because of the danger of foreign retaliation that would be provoked by it against the export trade of the United States. In this connection the fact is worth considering that in the years from 1789 onward, when the discriminating duty policy was practiced with so much success, the United States imported far more than it exported, so that discriminating duties were applicable to the larger part of our foreign trade, while now the United States exports very much more in both bulk and value than it imports, so that not only would discriminating duties be less effective for the encouragement of American shipping, but foreign retaliation would be far easier and more injurious.

But the weightiest of all objections to a return to the discriminating duty plan is neither the treaties nor retaliation, but the fact that in order to apply these duties for the adequate encouragement of the merchant marine, the free list of the tariff, covering almost half of the foreign commodities we purchase and consume, would have to be abolished. It is safe to say that this consideration counted more heavily than any other in bringing the majority of the commission reluctantly to the conclusion that discriminating duties could not now be invoked for the object we all desire—the rehabilitation of the American merchant marine in foreign trade.

In the fiscal year 1903, 43 per cent; in 1904, 47 per cent; and in 1905, 46 per cent of our entire imports came in free of customs duty.

I do not know that any Senator present can tell me what the percentage is under the existing law, but unquestionably it has been greatly increased over that of 1905—

This is in value; in bulk, inasmuch as these free imports were largely foods and raw materials, probably 60 or 70 per cent were free. In other words, unless the free list were abolished, discriminating duties could be applied to the encouragement of not more than 30 or 40 per cent of American shipping engaged in general foreign trade.

On the other hand, if the free list were abolished and these free articles made dutiable the result would be an increase in the cost of certain foods of the American people and certain crude materials of their manufacturing, for those free articles are, as a rule, noncompetitive products, chiefly from tropical countries, which can not, even under a duty, be produced in the United States. In 1789 and afterwards, when discriminating duties were so successfully applied for the encouragement of our shipping, nearly all imports were dutiable, and such a thing as a free list was scarcely known to our own or any other government.

There are strong political as well as commercial reasons why, if we are to have any American ships at all, we should have them in the trade with our sister republics of this continent, and the great neutral markets of Asia. In fact, the specific form in which discriminating duties have been most often and earnestly advocated before the commission has been as applying to the so-called "indirect trade"—that is, not against a British vessel bringing British goods or a German vessel with a cargo from a German port, but against European craft that seek to invade our carrying trade with Brazil or China or other neutral nations. It has been urged that discriminating duties in this indirect trade would not be so likely to provoke European retaliation as if the duties were imposed against British or German ships bringing goods of their own country. And it has been urged also that discrimination in the indirect trade, while arousing the least possible resentment, would give our vessels entire control of our trade with the nonshipowning peoples of South America and the Orient.

Unfortunately, however, it is this very trade with South America and the Orient that can not be gained for American ships unless the free list is abolished, for most of the products of those southern and eastern countries are now and long have been nondutiable in the ports of the United States. Thus, when the commission looked into this question it found that 98 per cent of our imports from Brazil, 96 per cent from Chile, 81 per cent from Colombia, 80 per cent from Venezuela, 82 per cent from Ecuador, or 82 per cent of all our imports from South America and 94 per cent from Central America were absolutely free of duty. In our import trade with China 50 per cent, with Japan 64 per cent, and with India 69 per cent are free of duty. Unless the free list were abolished discriminating duties could not adequately encourage American shipping to engage more largely in commerce with the republics to the south of us and the great markets of the Orient.

If conditions were everywhere as they are with our trade in Europe, where the free imports represent 28 per cent, or our trade with Cuba, whence we import chiefly sugar and tobacco and only 17 per cent of our purchases are on the free list, discriminating duties could be effectively applied for aid to American shipping. But the long series of public hearings before the commission has made it unmistakable that the American people desire American ships, not only in our Cuban

trade, but also and especially in our trade with South America and the Far East. Discriminating duties would not give us American ships in these important trades unless the free list were abolished, and here is the most urgent of the several reasons why the discriminaing-duty policy has not been recommended by the majority of the commission. The plan of mail and other subventions embodied in the bill of the commission was finally adopted because it is both more equitable and more effective.

These subventions will cost something. So, too, would it cost something to apply discriminating duties by the method suggested of reducing the duties on goods imported in American vessels. In either case it is necessary, in order to make this encouragement of shipping adequate and effective, to equalize the difference in wages and cost of construction between American and foreign ships, and in some cases to offset foreign subsidies. American ships in order to reach an equality of conditions must either receive a certain sum in subvention or retain an equivalent from the reduced duty in the form of higher freight rates.

In the long run, it is likely to be found that the subvention plan will involve the less actual cost to the Treasury.

Now, Mr. President——

Mr. PERKINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from California?

Mr. GALLINGER. I yield to the Senator.

Mr. PERKINS. I ask the Senator if it would not be feasible to adopt the policy of establishing ocean lines under the act of March, 1891, which provides that the Postmaster General may make contracts for ships for the transportation of the mails on the outward voyage. The Senator from New Hampshire conferred a great benefit on the country in securing the enactment of that law, and I ask him if it would not be more advisable to amend the law now so as to apply to present conditions?

Mr. GALLINGER. Yes; I have a bill pending before the Committee on Commerce for that very purpose which I propose to offer as a substitute for this bill at the proper time, and while I have little hope that it will commend itself to a majority of the Senate I shall hope that it will get a support that will be at least encouraging, so far as the future is concerned.

I have no disposition to go into the question of subsidies to-day. Later on, if this debate continues long enough, I may have something to say on that subject, but not to-day. The Senator from Minnesota [Mr. NELSON], however, suggested that the discriminating duties policy was preferable to a subsidy. I have always been puzzled to understand where the difference comes in. In the one case, if certain import duties are to put a dollar in the Treasury of the United States and we give a ship 5 per cent we get 95 cents. The difficulty that arises with me is as to the difference. We might just as well put the 100 cents in the Treasury and pay out 5 per cent of it in what is familiarly called a subsidy, so far as the interests of the Government or the interests of the people of the United States are concerned, as to halt the 5 cents before the money reaches the Treasury.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Will the Senator from New Hampshire yield to the Senator from Minnesota?

Mr. GALLINGER. I yield, Mr. President, because if there is any real difference in the financial operation I should like to know it. I have asked the question a great many times and have never received a satisfactory answer. I hope the Senator from Minnesota can give it.

Mr. NELSON. I ask the Senator if there is not this difference: Any subsidy plan that I have noticed does not affect all ocean ships, but only ships of a certain class, whereas if you have a discriminating duty it will percolate through all our shipping and all vessels, big or small, engaged in our foreign commerce will get the benefit of it. I have never yet seen a subsidy bill pending here that has been so adjusted that all the shipping would get the benefit of it; it would be limited to certain classes, while a discriminating duty would cover all vessels. Is not that one advantage?

Mr. GALLINGER. Mr. President, that is the most cogent and convincing answer that has ever come to my question. There is a great deal of force in it. It is true that the late Senator Frye, who, I will say to my good friend from California, deserves credit for the authorship of the ocean-mail act of 1891 to a much greater extent than I do, offered a bill that did affect all classes of shipping. It is true that the merchant marine commission bill, which I had the honor to present to the Congress, looked to the same result; but it soon became apparent to those of us who are not afraid of subsidies, who do not get scared every time the word "subsidy" is shouted, that no such bill could pass the Congress, and the result was that we turned our attention to trying to get the ocean-mail act of 1891 liberalized, with the idea of putting on lines to South and Central America and the Orient under the terms of that law.

When I come to that in my discussion I shall show that if the original bill as it passed this body had not been emasculated in the House of Representatives we would not be worrying to-day over ship facilities to South and Central America and the Orient and Australasia. We would have them. We have imperfect shipping facilities now, but we would have had adequate shipping facilities if the House of Representatives had not been wiser than the Senate and reduced the subvention carried in that bill about 33⅓ per cent.

Concerning the free-ship policy and subsidies the Boston Herald has called attention to the fact that the free-ship policy in time of peace proved utterly without avail, but it was hoped that the war and its hazards to ships of belligerent nations would supply a powerful motive to seek the shelter of the flag of the United States, and to make this transfer easy the President recommended, and Congress passed, an act approved August 28, 1914, repealing the five-year age limit, authorizing the suspension of the law requiring that officers of foreign-built ships admitted to registry should be American citizens, and further authorizing the exemption of these foreign-built ships from American regulations for survey, inspection, and measurement. In other words, a premium or a subsidy was virtually offered to foreign-built ships as against American-built ships in overseas trade, American ships being compelled to comply rigidly with American laws in all these particulars. President Wilson now signifies that he is convinced that the new free-ship law, even with these exceptional inducements, has failed to meet the expectations of its advocates, and Government ownership and operation must now be made the maritime policy of the United States. On this issue the administration will find aligned against it in Congress and the country not only virtually all real Republicans but many conservative Democrats as well.

I have already said, Mr. President, what I am going to repeat, that no hearing worthy of the name has ever been held on the bill now before the Senate. In another body it had a hearing covering two days, but no representative business men, or those engaged in shipping, were heard. Two Members of the House of Representatives and Secretary McAdoo were the only ones who were called upon to state their views. Had the financiers of the country, and the men who have actual knowledge of the shipping industry been called, beyond a doubt an entirely different showing would have been made; but that was not done, for reasons that I will not stop to discuss.

Now, Mr. President, that we may thoroughly understand the matter involved in this proposed legislation, it is desirable to examine the bill and reports on it before entering into a discussion of the subject. On December 9, 1914, the senior Senator from Missouri [Mr. STONE] introduced a bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia, to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes.

That bill, which has been changed in many material respects, I am going to read. Before reading it I will make the suggestion that if the speed limit which was set by the President and the majority of this body for the passage of that bill had not been halted by the minority of the Senate we would have passed a bill so different from the one that is now before this body as not to be recognized by its author. I said on yesterday, and I repeat to-day, that the President owes the minority a vote of thanks, and that the majority in this Chamber ought to decorate the minority for holding up this bill long enough to give them, in caucuses by day and by night, an opportunity to bring forth a third edition of the bill, so unlike the first that the resemblance is undistinguishable by ordinary human beings.

Senate bill 6856, introduced by the Senator from Missouri [Mr. STONE] on the 9th day of December last, and which we had every reason to believe, and we know, had the indorsement of the President of the United States, reads as follows:

That the United States, acting through the shipping board hereinafter created, may subscribe to the capital stock of any corporation now or hereafter organized under the laws of the United States or of any State thereof or of the District of Columbia upon the terms and conditions herein mentioned.

SEC. 2. That the object of such corporation shall be the purchase, construction, equipment, maintenance, and operation of merchant vessels in the trade between the Atlantic, Gulf, or Pacific ports of the United States and the ports of Central and South America and elsewhere to meet the requirements of the foreign commerce of the United States.

I have inquired several times, Mr. President, where those "elsewhere" routes are to be established, and I have received no answer. I have asked if they are to be across the North Atlantic or across the Pacific to China and Japan and Australasia, or to the Philippines, or where, but no answer has been vouchsafed. So we are left in the dark as to what is proposed to be

done in the matter of establishing routes except to Central and South America. I further read from the bill:

The initial capital stock of such corporation shall not be over $10,000,000, of the par value of $100 per share, but the shipping board, with the approval of the President, may consent to or cause an increase of the capital stock from time to time, as the interests of the corporation may require: *Provided*, That the United States shall subscribe for 51 per cent of each and every such increase. The United States shall subscribe to 51 per cent of such stock at par, and the remainder thereof shall be offered for public subscription. The United States may further subscribe at par to an amount of such stock equal to that not taken by public subscription. Such corporation may begin business as soon as 51 per cent of such stock has been subscribed and paid for by the United States.

SEC. 3. That the United States, through the shipping board and with the approval of the President, is authorized to purchase or construct vessels suitable, in the judgment of the shipping board—

As originally provided, the Secretary of the Treasury, the Postmaster General, and the Secretary of Commerce were to constitute that board. Just think, that those three men, not one of whom has had any shipping experience, not one of whom has any expert knowledge, were to be made a board to purchase, construct, and operate these vessels. Surely the minority has done the country a service in holding up this bill until the majority conceded that this was not a proper shipping board, and they have dropped from the board one member of the President's Cabinet and added to it three civilians, presumably men who know something about the subject. So, if we have not done anything more than that, we have justified the discussion of this question, which we propose to continue until such time as we can get a bill that commends itself to the business interests of the United States.

Mr. PERKINS. I ask the Senator to read section 4.

Mr. GALLINGER. I had not finished section 3. I will read that section first.

SEC. 3. That the United States, through the shipping board and with the approval of the President, is authorized to purchase or construct vessels suitable, in the judgment of the shipping board, for the purposes of such corporation, with a view to transferring them to such corporation, and for this purpose the Secretary of the Treasury, upon the request of the shipping board, may issue and sell or use for such purchases or construction any of the bonds of the United States now available in the Treasury of the United States under the act of August 5, 1909, the act of February 4, 1910, and the act of March 2, 1911, relating to the issue of bonds for the construction of the Panama Canal, to a total amount not to exceed $30,000,000, for the purpose of purchasing such vessels.

Mr. STERLING. Mr. President——

The PRESIDING OFFICER (Mr. ROBINSON in the chair). Does the Senator from New Hampshire yield to the Senator from South Dakota?

Mr. GALLINGER. I yield to the Senator.

Mr. STERLING. I think the Senator from New Hampshire omitted some words. I will ask him if they are found in the first draft of the bill as first introduced. The words are "with the approval of the President."

Mr. GALLINGER. I read that.

Mr. STERLING. I wondered if they were incorporated in the original bill.

Mr. GALLINGER. Yes; I read them.

Mr. STERLING. I did not so understand.

Mr. GALLINGER. The Senator did not hear me when I read "with the approval of the President." The President can hardly be expected to have expert knowledge of shipping. A man who has devoted his life to educational pursuits and who presumably has not engaged in any industrial or mercantile business during his entire life could hardly be expected to be a competent judge in establishing shipping lines to Central and South America and elsewhere. So I think we do deserve a vote of thanks from the administration and the majority in the Senate for having held up this bill until they could reconstruct that shipping board.

I remember a story—probably it is not authentic—of a man who was called to the Cabinet of a President and put in the position of Secretary of the Navy. He did not know anything about the Navy; he had never seen the sea. He went to New York on a junket of some kind and went on a war vessel. He looked it over, and after a while he said, "Why, by gosh! the thing is hollow, isn't it?" [Laughter.] The shipping board would have about as much technical knowledge of shipping as that illustrious member of the President's Cabinet of some years ago.

Well, we have forced them to revise the shipping board, and they are going to put on some civilians. I hope they will not do as they did with the Federal Reserve Board and put on all Democrats. I should hope that we might get one good, sensible Republican who knows something about the question of shipping on that board, and perhaps we shall. The only chance we had of getting a Republican on the Federal Trade Commission was to put it in the bill. If we had not done that we probably would have been served exactly as we were in the construction of the Federal Reserve Board, which was made unanimously Democratic. I will now read section 4, as requested by the senior Senator from California:

SEC. 4. That the shipping board is authorized to transfer the vessels purchased or constructed as herein provided to such corporation, and such corporation shall issue to the United States in payment thereof its gold bonds bearing interest at not less than 4 per cent per annum, and upon such further terms and conditions as may be prescribed by the shipping board, such bonds to constitute a first and paramount lien upon such vessels thus transferred and upon all the property of such corporation: *Provided*, That the amount of bonds received by the United States in payment for such vessels shall not be less, at the then par value, than the total amount expended by the United States in the purchase or construction of such vessels, and same may be sold by the Secretary of the Treasury, in his discretion and with the approval of the President, to reimburse the Treasury for expenditures made in the purchase or construction of vessels. Such corporation shall make suitable provision for sinking fund and for the depreciation charges under the rules and regulations to be prescribed by such shipping board.

As this business is going to be run at a loss—and there is no doubt about that—I do not think the sinking fund will be a very serious part of the transaction.

SEC. 5. That vessels purchased or constructed by such shipping board and conveyed to such corporation as herein provided shall be entitled to registry under the laws of the United States, and shall be deemed vessels of the United States and entitled to the benefits and privileges appertaining to such vessels, except such vessels shall engage only in trade with foreign countries or with the Philippine Islands and the islands of Guam and Tutuila. Such vessels shall be subject to the navigation laws of the United States except as herein provided.

You will observe in this original bill our friends who were so extremely desirous during the last session to get foreign ships into the coastwise trade have now got the camel's nose in the tent by designating the Philippine Islands and the islands of Guam and Tutuila and have added in the new bill the island of Hawaii.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Utah?

Mr. GALLINGER. I yield to the Senator.

Mr. SMOOT. The Senator is no doubt aware that an effort has already been made to allow foreign ships to enter our coastwise trade. Does the Senator believe that if this bill becomes a law that that will be still another step toward allowing foreign ships to enter our coastwise trade?

Mr. GALLINGER. Oh, absolutely; that is the purpose.

Mr. SMOOT. It seems to me it would logically follow that that would be the case, and I wanted to know the Senator's opinion as to whether that is so or not.

Mr. GALLINGER. At the last session of Congress a bold attempt was made to put foreign ships into the coastwise trade of the United States. We had a lengthy discussion on it. If I ever contributed anything to a discussion that is worthy of remembrance I flatter myself that what I said on that subject is worthy of some consideration. When the vote was taken it was defeated by two to one in this body. Now, under the guise of an emergency shipping measure to put vessels on the trade routes of the world comes a proposition that those vessels shall engage to some extent in the coastwise trade of the United States. In the last edition of this bill it is boldly said that the vessels that are to be constructed—and most of them will be constructed in foreign shipyards, probably—are to be allowed to trade with Hawaii, which has always been considered a coastwise port. So that, defeated in the broad purpose, it is attempted under the guise of a bill of this kind to get the same result to a limited extent, beyond question with a belief and hope that if this bill goes through Congress the next attempt to put foreign ships into our coastwise trade and destroy our shipyards and our American shipping industry will be successful.

SEC. 6. That, subject to the direction of the President, the Secretary of the Treasury, the Postmaster General, and the Secretary of Commerce are hereby constituted a board to be known as the shipping board, with full power to vote the stock of the United States in such corporation and to do all other things necessary to protect the interests of the United States and to carry out the purposes of this act.

SEC. 7. That, with the approval of the Congress, such shipping board may at any time sell the stock of such corporation owned by the United States.

I suppose we will have a bargain-counter sale after this trial proves to be a financial failure, as it will.

SEC. 8. That the President of the United States is hereby authorized to charter, lease, or transfer vessels purchased or constructed under the provisions of this act and such naval auxiliaries now belonging to the Naval Establishment of the United States as are suitable for commercial use and which are not required for use in the Navy in time of peace, and vessels now owned and operated by the Panama Railroad Co., to any corporation now or hereafter organized as in this act provided or to any other corporation or corporations now or hereafter organized, upon such terms and conditions as the shipping board, with the approval of the President of the United States, shall prescribe. The vessels purchased or constructed by the United States through the

shipping board, with the approval of the President of the United States, shall be of a type, as far as the commercial requirements of the foreign trade of the United States may permit, suitable for use as naval auxiliaries in the Naval Establishment of the United States.

Mr. President, we have had quite a number of bills dealing with the subject of the rehabilitation of the American merchant marine, but we have had no bill that did not require that all vessels should be constructed upon plans and specifications of the Navy Department, and that they should be so constructed as to be useful in time of war, and be at the command of the Government of the United States whenever needed. These, however, are to be "of a type, as far as the commercial requirements of the foreign trade of the United States may permit, suitable for use as naval auxiliaries in the Naval Establishment of the United States." They would be of no use under those circumstances to the Navy of the United States or to the Government of the United States in time of war.

SEC. 9. That the President of the United States shall at any time have the right, upon giving written notice of his intention to the corporation using the vessels under the provisions of this act, to take possession for use as naval auxiliaries in the United States Navy or for other purposes of any vessels used by such corporation at a reasonable price or rental.

SEC. 10. That a detailed statement of all expenditures under this act and of all receipts hereunder shall be submitted to Congress at the beginning of each regular session.

SEC. 11. That for the purpose of carrying out the provisions of this act there is hereby appropriated, out of any money in the Treasury of the United States not otherwise appropriated, the sum of $10,000,000.

SEC. 12. That this act shall take effect from its passage.

Mr. President, I have read that bill for the purpose of emphasizing what I have already said, that had we allowed it to pass at any time or at as early a time as the majority of this Senate thought it ought to pass, we would probably have had a bill very similar at least to that when it became a law. It was, however, held up, during which time the majority had nightly caucuses on this question, and they came in with an amended bill which I have not at hand, but it was very different from that, and which they said they would offer as a substitute before the vote was taken. Then they found fault that we were holding up this legislation which was so essential to the people of the United States; stating that the President wanted it and that we ought to concede that we are, what the President characterized us as being, a lot of ignorant men trying to do the work of the Government of the United States, and to allow his mind and the mind of the majority to control and to pass the bill.

Well, we did not conclude to do that. So not agreeing in their nightly caucuses—some of which I am told were rather tumultuous—they recessed the Senate over last Saturday and spent the day in further deliberation. Out of that caucus emerged this bill which is now, we are told, the perfected bill of the committee and which will be offered as a substitute for the original bill when the vote shall be taken.

I will read this bill to see if we can discover any relationship between it and the original bill. There may be some distant relationship; it may be a second cousin or something of that kind; but the relationship is not very close. So I will read it. It was reported on January 15, calendar day January 25; in other words, we had gone 10 days in continuous legislative session without morning business, without hearing the voice of the Chaplain invoking us to perform our duties faithfully and well under the oath that we had taken. On the calendar day of January 25 this substitute was submitted to the Senate by my good friend, the senior Senator from Florida [Mr. FLETCHER]. Here it is:

That the United States, acting through the shipping board hereinafter created, may subscribe to the capital stock of a corporation of the District of Columbia.

It will be observed that it is not "of the United States or any State or the District of Columbia," as provided in the original draft, but "of the District of Columbia." I believe they can incorporate in this District anything on earth, if they pay a dollar for it, and I do not know whether or not this is a matter of economy or otherwise; but, at any rate, it is to be "of the District of Columbia." The bill continues:

Said corporation shall have for its object the purchase, construction, equipment, maintenance, and operation of merchant vessels to meet the requirements of the foreign commerce of the United States, or to charter vessels for such purposes, and to make charters or leases of any vessel or vessels owned by such corporation to any other corporation, organized under the laws of a State, a majority of the stock being owned by citizens of the United States, firm or individual, citizen or citizens of the United States, to be used for such purposes and shall have power to carry out said objects and purposes: *Provided*, That the terms and conditions of such charter parties shall first be approved by the shipping board, the initial capital stock of which corporation shall not be over $10,000,000, of the par value of $100 per share.

The members of said shipping board, as incorporators, may for the purpose of carrying out the provisions of this act form a corporation of the District of Columbia, by making and filing a certificate of incorporation, as provided in subchapter 4 of chapter 18 of an act entitled "An act to establish a code of laws for the District of Columbia," approved March 3, 1901.

The corporation so formed, its officers and trustees and stockholders, shall possess all the powers conferred and perform all the duties imposed by said subchapter 4, except as the same are by this act limited or qualified.

The powers of said corporation shall be limited to the purposes of this act and to such as are necessarily incident thereto.

Said corporation may sue and be sued in any district court of the United States, and may remove to said courts any cause brought against it in any other court.

Said corporation may require any officer or employee to give security for the faithful performance of his duties.

Persons subscribing to the stock of said company shall pay for the same in full at the time of subscription.

Well, Mr. President, the citizens of the United States need not worry over whether they shall be required to pay in full or in part, because it is inconceivable to me that any citizen of the United States is ever going to take a share of the stock in this losing venture. They will not do it.

The stock owned by the United States shall be voted by the shipping board or its duly selected representative.

The officers and trustees of said corporation shall be citizens of the United States, but need not be citizens of the District of Columbia. Such officers and trustees shall be subject to removal at any time by vote of a majority of the stockholders at any meeting thereof.

Said corporation and its capital stock shall, so long as the United States owns a majority of said stock, be free from all public taxes.

Supposing that we should make a proposition here that a shipping corporation should be free from public taxes, I wonder what would be said about it. Yet here is a great shipping corporation, to go into competition with private shipowners and private corporations, and we are going to exempt the property from taxation because the Government owns one share more than a majority of the stock. It is an absurd proposition.

At no time shall less than 51 per cent of the stock of said corporation be held by the United States, unless the United States shall dispose of all of its stock.

Congress reserves the right to alter, amend, or repeal this act.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Illinois?

Mr. GALLINGER. I yield to the Senator from Illinois.

Mr. SHERMAN. Before the Senator from New Hampshire leaves section 1, I ask him if he has noted that if the United States should desire to lease or charter one of these boats to an individual it is prevented from doing so? However responsible the individual might be, he would be compelled to incorporate himself with associates before he could be permitted to take the lease. Does the Senator know of any good reason for such a limitation?

Mr. GALLINGER. I do not. I had observed that as I read it, and thought it was a most extraordinary provision. As we are promised some defense of this bill from the other side of the Chamber, I am very glad the Senator from Illinois has called especial attention to it, so that we may at the proper time, if we are permitted to interrogate Members on the other side of the Chamber, ask them what the reason for that inhibition is. It does not strike me as being wise.

SEC. 2. That the United States shall subscribe to 51 per cent of the initial capital stock of such corporation at par and the remainder thereof may be offered for public subscription at not less than par, and the United States may then further subscribe at par for any amount of such stock not taken by public subscription, but the shipping board may cause such corporation to begin business as soon as 51 per cent of such stock has been subscribed and paid for by the United States. The shipping board, with the approval of the President, may consent to or may cause an increase of the capital stock from time to time as the interests of the corporation may require, but without authority of Congress the portion of such increase to be paid for by the United States shall not exceed $10,000,000, neither shall the proportion of stock held by the United States at any time be less than 51 per cent: *Provided*, That a sufficient number of the shares of stock of said corporation shall be set apart for holding by the persons for whom the stock of the United States may be voted as trustees, and such shares shall be issued or transferred to such persons to qualify them as trustees of such corporation, and such shares shall be transferred to the successor or successors of any such person or persons.

SEC. 3. That the United States, through the shipping board and with the approval of the President, is authorized to purchase or construct vessels suitable in the judgment of the shipping board for the purposes of such corporation with a view to transferring them to such corporation, and for this purpose the Secretary of the Treasury, upon the request of the shipping board and the approval of the President, may issue and sell or use for such purchases or construction any of the bonds of the United States now available in the Treasury of the United States under the act of August 5, 1909, the act of February 4, 1910, and the act of March 2, 1911, relating to the issue of bonds for the construction of the Panama Canal, to a total amount not to exceed $30,000,000 for the purpose of purchasing or constructing such vessels: *Provided*, That any Panama Canal bonds issued and sold or used under the provisions of this section or other existing authority may be made payable at such time after issue as the Secretary of the Treasury, in his discretion, may deem advisable and fix, instead of 50 years after date of issue, as in said act of August 5, 1909, not exceeding 50 years: *Provided further*, That payments for such purchases or construction from proceeds of sales of bonds, or delivery of bonds in payment thereof, shall be made only as ordered and directed by the shipping board.

SEC. 4. That the shipping board is authorized to transfer the vessels purchased or constructed as herein provided to any such corporation in which the United States has become a stockholder as hereinbefore provided, and such corporation shall issue to the United States in payment thereof its gold bonds, bearing interest at not less than 4 per cent per annum, and upon such further terms and conditions as may

be prescribed by the shipping board, such bonds to be secured by a first mortgage lien upon such vessels, severally, thus transferred: *Provided*, That the amount of bonds received by the United States in payment for such vessels shall not be less, at the then par value, than the total amount expended by the United States in the purchase or construction of such vessels, and the same may be sold by the Secretary of the Treasury, in his discretion, and with the approval of the President, to reimburse the Treasury for expenditures made in the purchase or construction of vessels. Such corporation shall make suitable provision for sinking fund and for the depreciation charges under the rules and regulations to be prescribed by such shipping board; and all vessels acquired under this act, or in which the United States shall otherwise be interested as owner, in whole or in part, or upon which the United States shall have or hold any mortgage, pledge, lien, or other security, shall, when and while employed solely as merchant vessels, be in all respects subject to all laws, regulations, and liabilities governing merchant vessels, in like manner and to the same extent as merchant vessels in private ownership when duly registered under the laws of the United States.

All rules and regulations relating to or which affect shipping, navigation, or water-borne commerce of the United States, heretofore made or published, by authority of law, shall only be and remain in force until midnight on the 31st day of December, 1915, and by proclamation of the President shall cease to have any force or validity at any prior date when new shipping rules and regulations shall as provided hereby take the place of those now in existence.

The shipping board herein provided for shall propose such rules and regulations applicable to the shipping and water-borne commerce of the United States in lieu of those now in force and covering matters of like character as they may determine suited to the present needs of such shipping and commerce, which, when approved by the President and published, shall apply and become of full force and effect in lieu of such rules and regulations as are now applicable thereto. In the rules and regulations hereby authorized to be adopted and put into force different classes of shipping, navigation, and water-borne commerce may be appropriately and differently treated and provided for. Such rules and regulations when promulgated may be modified, changed, or amended by the shipping board.

On yesterday I called attention to those two paragraphs, which struck me as being extraordinary and unusual, under which all the rules and regulations now made under authority of law relating to navigation are to be wiped out of existence, and the shipping board may, of its own volition and according to its own motion, make another code of rules and regulations that will take their place after a certain specified date.

The junior Senator from Delaware [Mr. SAULSBURY], for whose fairness and judgment I have profound respect, interrupted me to say that he felt sure that, when I understood this matter, I would agree with him that it was very desirable legislation, and he has said to me that he proposes to address himself to it, pending which I certainly shall not close my mind against the matter, but will be glad to support it if it is shown that it is a desirable thing to do, which it may be. I pass from that.

SEC. 5. That vessels purchased or constructed by such shipping board and conveyed to such corporation as herein provided shall be entitled to registry under the laws of the United States, and shall be deemed vessels of the United States and entitled to the benefits and privileges appertaining to such vessels, except such vessels shall engage only in trade with foreign countries or with the Philippine Islands, the Hawaiian Islands, and the islands of Porto Rico, Guam, and Tutuila, provided that the above restrictions shall not apply to such of said vessels as are built in the United States. Such vessels shall be subject to the navigation laws of the United States except as herein provided.

SEC. 6. That the Secretary of the Treasury and the Secretary of Commerce, and three additional members, two of whom shall be of practical experience in the management and operation of steamships in the foreign trade, are hereby constituted a board to be known as the shipping board, with full power, subject to the approval of the President, to vote the stock of the United States in said corporation, either as a body or by one or more of its members duly authorized by a majority, and to do all things necessary, whether specifically enumerated or not, to carry out the purposes of this act and protect the interests of the United States, said three additional members to be appointed by the President by and with the advice and consent of the Senate. The salary of each of the three additional members of said board so appointed shall be $6,000 per annum.

I can not quite understand why the members of the Trade Commission, whose duty it will be, if they have any duties except to disturb the business and industries of the United States, should be paid $10,000 per annum under the law which we passed a little time ago, and these men who are to have in charge this great interest should be paid the pitiful sum of $6,000 per annum. I think it is a discrimination that ought to be corrected.

SEC. 7. That, with the approval of the Congress, such shipping board may at any time sell the stock of such corporation owned by the United States.

SEC. 8. That the President of the United States is hereby authorized to charter, lease, or transfer such naval auxiliaries now belonging to the Naval Establishment of the United States as are suitable for commercial use and which are not required for use in the Navy in time of peace, and vessels belonging to the War Department suitable for commercial uses and not required for military transports in time of peace, and to direct or cause to be chartered, leased, or transferred vessels now owned and operated by the Panama Railroad Co., to any corporation now or hereafter organized as in this act provided upon such terms and conditions as the shipping board, with the approval of the President of the United States, shall prescribe. The vessels purchased or constructed by the United States through the shipping board, with the approval of the President of the United States, shall be of a type, as far as the commercial requirements of the foreign trade of the United States may permit, suitable for use as naval auxiliaries in the Naval Establishment of the United States.

SEC. 9. That the President of the United States, upon giving to any such corporation in which the United States shall be a stockholder, through its president, vice president, secretary, or manager, notice in writing for such reasonable length of time as in his judgment the circumstances require and will permit of his intention so to do, may take possession, absolutely or temporarily for use as naval auxiliaries, of any vessel or vessels owned or leased by or otherwise in the possession of said corporation, and said corporation shall be entitled to a reasonable price or rental therefor, to be fixed by the shipping board, with the approval of the President: *Provided*, That if in the judgment of the President an emergency exists requiring such action he may take possession of any such vessel or vessels without notice.

SEC. 10. That the shipping board shall make to Congress, at the beginning of each regular session, a report of expenditures and receipts under this act and of the operations of any corporation in which the United States may have become a stockholder hereunder.

SEC. 11. That for the purpose of carrying out the provisions of this act there is hereby appropriated, out of any money in the Treasury of the United States not otherwise appropriated, the sum of $10,000,000, or, in lieu of such appropriation, the Secretary of the Treasury may sell Panama Canal bonds to the amount of $10,000,000 in addition to those provided for in section 3, and on the same terms, and set apart and use the proceeds thereof for such purposes.

Mr. President, I have read these two bills for the purpose of calling directly to the attention of the Senate the fact that, had it not been for the discussion which the minority insisted upon, we probably never would have seen this amended bill. It took the majority two weeks, or thereabouts, after an incubating process in caucus, to produce the measure that is now before the Senate as a proposed substitute for the bill originally introduced. I have read them for the further purpose of showing to the Senate that, if there is any relationship between the two bills, it is very remote, and that the new bill deserves the same scrutiny and the same careful discussion that the original bill deserved. I hope the Senator from Minnesota [Mr. NELSON] and the Senator from Illinois [Mr. SHERMAN], who are paying me special attention, both of them distinguished lawyers, will take that bill and dissect it and analyze it and tell the Senate precisely what it proposes to do. I am not a lawyer, and hence my opinion on legal points would be of little consequence; but I have taken the liberty of presenting the matter to the Senate in a form which I think will engage the attention at least of the two Senators to whom I have referred.

On December 16, 1914, the Senator from Florida reported, with certain amendments, the bill which had been introduced by the Senator from Missouri [Mr. STONE] on December 9; but inasmuch as the bill has been revamped, I will not take the time of the Senate, as I had intended to do, to call attention seriatim to the amendments proposed in the bill as reported on December 16.

I think, Mr. President, for a thorough understanding of this question, inasmuch as the bill has not been debated by its proponents except for a brief speech by the Senator from Florida [Mr. FLETCHER], that it is my duty to read into the RECORD the majority report and the views of the minority on this bill. They ought to be illuminating, whether they are or not; and inasmuch as in the hurry of other duties I have not had time to read either of them, I think I ought now to acquaint myself and other Senators with the terms of these documents.

Mr. STONE. Mr. President, would it not be just as satisfactory to the Senator to let them be printed in the RECORD without reading?

Mr. GALLINGER. I have a very great desire to read them for my own information, and if they go in the RECORD without reading I never will read them, because I seldom read anything in the RECORD. I treat that serial—or whatever you may call it—pretty much as the other citizens of the United States do, and seldom refer to it; and it is always a matter of amusement to me when a Senator gets up here and solemnly asks to put something in the RECORD, on the ground that it is important to the people of the United States and that they will see it in the CONGRESSIONAL RECORD. No, Mr. President, it would not be agreeable to me to have these reports printed in the RECORD without reading. I want to know what is in these reports, and if no one else cares that is their misfortune.

Mr. STONE. But in the interest of the Senator's health——

Mr. GALLINGER. The Senator need not worry about my health. The Senator from New Hampshire is in very good health, thank you. The advertisement that I got last evening in the Senate was not at my suggestion. I never felt better in my life.

Mr. President, Order of Business No. 737, report No. 841, entitled "Promotion of Foreign Commerce of the United States by Providing Adequate Shipping Facilities," was reported by the Senator from Florida [Mr. FLETCHER] on December 16, 1914, and ordered to be printed. Of course, it was not ordered to be printed without at least carrying the implication that

it would be read. There is no use in printing a thing if we do not read it. Now I will read it:

The Committee on Commerce, to whom was referred the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or a State thereof or of the District of Columbia to purchase, charter, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes, having considered the same, report it to the Senate with amendments with the recommendation that the bill as amended do pass.

It will be observed in the beginning that this is a report on the original bill. The Senator from Florida, representing a majority of this body and the President of the United States, told us in the beginning that it ought to pass. The Senator from Florida has not made any report on this third edition of the bill, and we are somewhat in the dark as to whether or not he thinks that ought to pass. The report continues:

The bill as reported by the committee provides that the Government, through a shipping board composed of the Secretary of the Treasury, the Postmaster General, and the Secretary of Commerce, may subscribe to the capital stock of any corporation now or hereafter organized under the laws of the United States or of any State thereof, or of the District of Columbia, for the purpose of purchasing, chartering, constructing, maintaining, and operating merchant vessels in the trade between the Atlantic, Gulf, or Pacific ports of the United States and the ports of Central and South America and elsewhere to meet the requirements of the commerce of the United States.

The initial capital stock of the corporation shall not exceed $10,000,000, but the shipping board, with the approval of the President, may consent to or cause the capital stock to be increased from time to time, as the interests of the corporation may require.

The capital stock shall be divided into shares of the par value of $100, and the United States shall subscribe for 51 per cent of the stock, and for a like per cent of every increase, and the remainder shall be offered for public subscription. The United States may, however, subscribe at par to an amount of such not subscribed for by the public.

The corporation may begin business as soon as the 51 per cent of the stock is subscribed and paid for by the United States.

The United States, through the shipping board, with the approval of the President, may charter, purchase, or construct vessels suitable to carry out the purpose of such corporation and transfer them to such corporation upon terms and conditions to be prescribed by the shipping board.

The Secretary of the Treasury, upon the request of the shipping board, may issue and sell what are known as Panama Canal bonds to a total amount not to exceed $30,000,000 for the purpose of purchasing or constructing such vessels.

Upon the transfer of the vessels to such corporation the corporation shall issue to the United States in payment therefor its gold bonds, bearing interest at not less than 4 per cent per annum, such bonds to constitute a first lien upon the vessels so transferred and all other property of such corporation.

The bonds shall not be less in amount at their par value than the amount paid by the United States for the vessels.

The Secretary of the Treasury may, in his discretion, and with the approval of the President, sell such bonds to reimburse the Treasury for the expenditures made in the purchase or construction of vessels.

The vessels purchased, chartered, or constructed by the shipping board and transferred to such corporation shall be entitled to registry under the laws of the United States, and may engage only in trade with foreign countries or with the Philippine Islands, the Hawaiian Islands, and the islands of Guam and Tutuila. The shipping board, subject to the direction of the President, is vested with full power to vote the stock of the United States in the corporation and to do all other things necessary to carry out the purpose of the act, and may at any time, with the approval of the Congress, sell the stock of such corporation.

Section 8 of the bill authorizes the President to charter, lease, or transfer such naval auxiliaries belonging to the Naval Establishment as are suitable for commercial use and not required for use in the Navy in time of peace, and now owned and operated by the Panama Railroad Co., to any corporation organized under the act, upon such terms and conditions as the President may prescribe. The bill further provides that the vessels purchased or constructed under its provisions shall, as far as the commercial requirements of the foreign trade of the United States may permit, be of a type suitable for use as naval auxiliaries. The question of providing vessels for our merchant marine from a standpoint of the Naval Establishment had been under consideration for some time by the subcommittee of the House Committee on Naval Affairs.

Mr. STONE. Mr. President——

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). Does the Senator from New Hampshire yield to the Senator from Missouri?

Mr. GALLINGER. I yield to the Senator from Missouri.

Mr. STONE. May I ask the Senator if he will read louder so that I may know whether or not he is reading correctly? He might make a mistake.

Mr. CLARK of Wyoming. Will not the Senator take this seat?

Mr. GALLINGER. Can the Senator assure me that his hearing is normal?

Mr. STONE. My hearing is normal, but the Senator is reading in a very low monotone.

Mr. GALLINGER. Will the Senator from Missouri promise me that he will stay until I get through reading this report if I read a little louder?

Mr. STONE. Well, I will stay a while.

Mr. GALLINGER. Would the Senator consider it a discourtesy if I offered him my seat and I took the next one to the right?

Mr. STONE. No; not a discourtesy.

Mr. GALLINGER. The offer is made. I shall endeavor to read so that the Senator will hear me. My voice is in excellent condition.

The same subject was being considered by the House Committee on the Merchant Marine and Fisheries, from the standpoint of the merchant marine. Section 8, as written in the bill, is the result of a conference between Chairman PADGETT and Mr. TALBOTT of Maryland, of the House Committee on Naval Affairs, and the chairman and Mr. HARDY, of the House Committee on the Merchant Marine and Fisheries, and has the approval of the committee, as it harmonizes both views.

Two committees of the House seem to have collaborated on that bill—a rather unusual procedure.

A detailed statement of all expenditures under the act and of all receipts thereunder shall be submitted to Congress at the beginning of each regular session.

The bill carries an appropriation of $10,000,000 to carry out the provisions of the act.

Before discussing the merits of the bill generally, it is the purpose of the committee to point out several amendments agreed to by the committee and to assign reasons for their adoption.

On page 2, line 4, after the words "United States," it is proposed to insert the following clause:

"or to charter vessels for such purposes, and to make charters or leases of any vessel or vessels owned by such corporation to any other corporation, firm, or individual to be used for such purposes: *Provided*, That the terms and conditions of such charter parties shall first be approved by the shipping board."

The object of this is to enable the corporation, in which the Government is the controlling stockholder, to charter ships, as well as to purchase and construct them, and also to make charter of any of the ships owned or controlled by it to other corporations, firms, or individuals, if the purpose of the act or any part of the objects of the act could be best secured through such charter parties. It will be observed that the amendment guards the interests of the Government by requiring all such charter parties made by the corporation to be specifically approved by the shipping board.

On page 4, line 9, after the words "Philippine Islands," we propose to insert the words "the Hawaiian Islands."

It is obvious that the ships owned by this corporation should have this right, as it is distinctly in the interest of the commerce of the country that additional facilities should be given to these islands.

On page 5, lines 5 and 6, it is proposed to strike out the words "vessels purchased or constructed under the provisions of this act and."

The retention of these words would bring sections 4 and 8 into conflict with each other, as section 4 places the transfer of such vessels in the hands of the shipping board, while section 8 limits the right to the President. It seemed wise to the committee that section 4 should control, as the specific terms upon which the shipping board may make a transfer are stated in the act and the board can not go beyond that authority.

On page 5, line 10, after the word "vessels," it is proposed to insert the words "belonging to the War Department suitable for commercial uses and not required for military transports in time of peace and vessels."

If naval auxiliaries of a certain character are to be the subject of charter, lease, or transfer, there can be no valid reason against a like charter, lease, or transfer of vessels in the War Department.

Inasmuch as the authority to do this is vested solely in the President, it is safe to assume that the general interests of the country are sufficiently safeguarded.

It has been deemed wise, however, to limit the transference of these vessels to the corporation authorized by the act, and the committee has, therefore, agreed to strike out the words on page 5, lines 15 and 16, "or to any other corporation or corporations now or hereafter organized."

This bill purposes to initiate an American ocean-going marine, an object desired by all Americans. The annual toll paid by the United States to vessels flying foreign flags is variously stated at from $200,000,000 to $300,000,000. This seriously affects adversely the balance of international trade, and by itself is a matter calling for legislation to work a change.

That sentence sounds familiar to me, because I have called attention to that fact over and over and over again, but deaf ears were turned to it for a period of at least 10 years.

Not only is this so, but recent events have made clear to the entire country certain facts which it is the purpose of this legislation to alter. Our great and growing foreign commerce, aggregating over four thousand two hundred and fifty millions yearly, of which our exports form much the larger part, depends for its ocean transportation chiefly upon the merchant marine of the nations which are our own commercial competitors in the markets to which we all sell. By reason of this control by others of our needed transit facilities, we are subject alike to their primary interests and to their risks. If, for example, their primary interest calls for them to withdraw ships for purposes of war, the ships are withdrawn, and with them go the facilities we need, and we are without recourse. If the exigencies of war call for destruction by the enemy of one of the powers whose ships we use, that destruction takes place. With the destroyed ships American cargoes go to the bottom. Our commerce is immediately affected, but we again are helpless. If the exigencies of war call for the interning in foreign ports of merchant vessels carrying American cargoes under the flag of a belligerent, the ships are interned, and the cargoes they carry, though belonging to Americans and as a matter of fact though paid for by Americans, can not be secured, because the American interest in the cargo is necessarily subordinated to the belligerent interest in the vessel itself. All these conditions have actually existed in recent months, and some of them exist to-day.

Furthermore, it is the fact that the primary interest in the transportation of our ocean-borne commerce is that of the European stockholders in the companies which do the transporting. Those stockholders look to their investments to return them a profit. Therefore the business must be done in that way which is first of all most profitable for the European stockholders, and this may, and as a matter of fact does, work out to the disadvantage of American commerce. The two opposing interests are these: First, and most important to us, the interests of American agriculture, industry, and commerce as a whole; second, and least important to us, though now in control, the interest of European stockholders to have their ships so operated as to return them the largest element of profits. We have been content hitherto

to subserve the interests of the European stockholders, and to a minor extent of American stockholders in ships under foreign flags; but the shock of war has disclosed the fact that this arrangement, while seeming to work well in ordinary times, has in it the elements of weakness outlined above, and which are now plain to all.

In addition to this and in part because of the operation of the causes above suggested, there is at present a lack of vessels, even of those flying foreign flags, and a far greater lack of vessels under our own flag. This has resulted in a grievous advance of freight rates to almost all portions of the globe. The least advance which has come to the knowledge of your committee is 10 per cent on Asian business, but on certain goods, such as steel and iron, rates have advanced more than this. To South Africa the advance has been 20 per cent; to South America, 25 per cent; and to European ports from 50 to 1,000 per cent, depending upon the merchandise carried and the ports of destination. The present rate upon cotton from Galveston to Bremen is ten times that which prevailed a year or more ago, this in spite of the fact that cotton is not contraband and that the belligerent Governments permit its free passage. As this report is written, shipowners, chiefly foreigners, are reaping a rich harvest of profits at the cost of American producers, whose prices are necessarily diminished in proportion to the excessive tax put upon their wares for the benefit of the owners of ocean transportation lines. When it costs $15 a bale merely to transport cotton across the ocean, it is evident that this charge is a heavy handicap upon our entire cotton-producing interest at a time when we have the largest crop in our history.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Utah?

Mr. GALLINGER. I yield to the Senator.

Mr. SMOOT. The Senator recognizes, does he not, that the charging of $15 a bale on cotton from here to Bremen is only a temporary matter, and also that that exceedingly high charge is made on account of the risk involved in taking cotton to that port? In fact, Mr. President, I sometimes think, and I ask the Senator if he does not think so, that this bill never would have been thought of or brought to the Senate if cotton had not been involved?

Mr. GALLINGER. Oh, Mr. President, I have long recognized the force of the old saying that "Cotton is king." We know that, and we know that a great deal of the attempted legislation of this Congress has been in the interest of the cotton producers, who doubtless have met with a serious loss, as the manufacturers and the laboring people of the industrial North have met with a serious loss under the conditions that prevail at the present time. But the people of the North have not sought relief by legislation.

Even this serious burden imposed upon our people against our will and beyond our control is not, however, the greatest danger possible. We now see clearly that the fortunes of war or the naval interests of a belligerent may at any time stop our transportation movement entirely.

If so, what good would it be if we had 30 or 40 more ships if they could stop it entirely? They would just stop that many more ships.

It did so for about two weeks in the month of August, and circumstances may recur to cause it to do so again. At a time, therefore, when the United States abounds in crops of wheat, corn, cotton, apples, for which a profitable market exists abroad, and when the world, both that part of it which is in arms and that which remains at peace, is calling as never before for the products of our mines and factories, we are all but helpless in the face of the largest opportunity we have ever known.

Why, Mr. President, the Secretary of Commerce tells us about twice a week that we are prosperous, that we are having remarkable prosperity in our country at the present time; and while in his vision he sees greater prosperity ahead of us, yet he has never admitted that we are suffering as this report indicates we are.

Mr. ROOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from New York?

Mr. GALLINGER. I yield to the Senator from New York.

Mr. ROOT. I should like to ask the Senator at this point whether it is not a fact that our exports of food products have been for several months past extraordinarily great? Have they not been far above our ordinary exportation of such products?

Mr. GALLINGER. I understand that to be so.

Mr. ROOT. Is it not a fact also that the prices which our farmers have been receiving for their food products have been far in excess of those which they ordinarily receive?

Mr. GALLINGER. Probably from 25 to 50 per cent greater than in former years.

Mr. ROOT. Am I correct in assuming that the newspaper reports of $1.40 and above $1.40 a bushel for wheat are correct?

Mr. GALLINGER. That is undoubtedly true.

Mr. ROOT. I mean the prices which have been received here—the Chicago prices, the prices received in this country for wheat. Is it not apparent, then, that the difficulty of high rates for transportation is an incident to the extraordinary demand for such products at extraordinarily high prices?

Mr. GALLINGER. That would seem to be so, and I have no doubt it is so.

Mr. ROOT. Does not that seem to be an exigency which we can contemplate with reasonable complacency?

Mr. WILLIAMS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Mississippi?

Mr. GALLINGER. I yield to the Senator.

Mr. WILLIAMS. I should like to ask the Senator in that connection if he thinks that the shortage of tonnage and the extremely high price of freight for cotton at 8 cents a pound—2 cents below the cost of production—quite justifies the inference sought to be arrived at from the question?

Mr. GALLINGER. Well, Mr. President, I am not fully informed on the cotton situation, and if the condition which the Senator from Mississippi suggests exists to-day I have no doubt it will soon cease. I have no idea that it will exist for any length of time.

Mr. ROOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire further yield to the Senator from New York?

Mr. GALLINGER. I do.

Mr. ROOT. May I ask, according to the memory of the Senator from New Hampshire, whether the Senator from Mississippi has not, apparently for purposes of argument at this juncture, jacked up the cost of production of cotton as compared with the statements that were made when there was a general attempt here a short time ago to get the Government of the United States to put $250,000,000 in to meet that exigency? Was not 8 cents the figure stated then, and is not 8 cents more than the cost of production of cotton?

Mr. WILLIAMS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire further yield to the Senator from Mississippi?

Mr. GALLINGER. I do.

Mr. WILLIAMS. If the Senator from New Hampshire will pardon another question, I will ask the Senator from New Hampshire if he does not remember very well that during that discussion the senior Senator from Georgia [Mr. SMITH] and various other Senators stated 10 cents as the price of production, and whether the price fixed in the sought-for legislation was not 10 cents, and whether it was not fixed because of the fact that it was thought that that was the price which would give back to the planter the price of production of cotton? I will ask the Senator, further, whether he does not believe that whereas some people peculiarly efficient in the administration of their farms can raise cotton for less, and some peculiarly inefficient must pay even more, it was generally agreed at that time that 10 cents was about the ordinary price of production with the present or then obtaining price of supplies for the plantation?

Mr. GALLINGER. Mr. President, I have not a very vivid recollection about that matter. I shall not dispute the statement made by the Senator from Mississippi. I know that cotton has been sold at 6 cents in some former years. I do not know whether or not the cotton growers were losing 4 cents a pound on it during all that time.

Mr. WILLIAMS. If the Senator will pardon another question——

The PRESIDING OFFICER. Does the Senator from New Hampshire further yield to the Senator from Mississippi?

Mr. GALLINGER. Certainly.

Mr. WILLIAMS. I should like to ask the Senator if that was not at a time when mules and meat and flour and meal and bagging and ties and everything else that the cotton planter purchases were obtainable at very low rates? I may add, as an addendum to the question, that there was a time in this country when we could produce cotton at 6½ cents, and that was not 15 years ago. The price of production of cotton has been going up, however, for the reasons I have stated, and also because the price of labor has been going up. At that time the price of labor in the field in the South was $8 a month plus, of course, the food and shelter of the hands. Now it runs from $16 to $20, and supplies have gone up, especially meat and breadstuffs, until the cotton planter who does not raise his own supplies can not hope to come out whole if he sells cotton at 10 cents, and very few of them do; and mules have gone up. At the time of which the Senator is speaking we bought pretty good cotton mules at $75 a head, and now they cost $150.

Mr. ROOT. May I add another question to this symposium?

Mr. GALLINGER. I yield to the Senator from New York.

Mr. ROOT. Is it not a fact that there has been an enormous overproduction of cotton? Has there not been a larger crop of cotton raised during this year than for many, many years past, and does not a great overproduction of cotton inevitably have the effect of bringing down the price?

Mr. WILLIAMS. In that connection I should like to ask the Senator from New Hampshire a question.

The PRESIDING OFFICER. Does the Senator from New Hampshire further yield to the Senator from Mississippi?

Mr. GALLINGER. I do.

Mr. WILLIAMS. Before this war broke out, in spite of the fact that we knew just what the new crop was, was not the price of middling upland cotton 12¼ to 12½ cents; and has there not been a growth in the consumption of cotton more than outrunning the growth in its production, substituting cotton in mercerized goods and in various other things for various other textiles of every sort?

Mr. ROOT. Mr. President, may I ask further——

The PRESIDING OFFICER. Does the Senator from New Hampshire further yield to the Senator from New York?

Mr. GALLINGER. I yield, but I fear I shall forget some of the question.

Mr. ROOT. May I ask, then, why the attempt was made to secure $250,000,000 from our Government for the purpose of buying the great body of cotton, accompanied by provisions in the proposed law penalizing the continuance of the present acreage of cotton, and why there has been a State-wide, country-wide, move toward an agreed reduction of cotton acreage?

Mr. WILLIAMS. I should like to ask the Senator from New Hampshire one further question.

The PRESIDING OFFICER. Does the Senator from New Hampshire further yield to the Senator from Mississippi?

Mr. GALLINGER. I yield, with pleasure.

Mr. WILLIAMS. Does not the Senator from New Hampshire think, and does he not think the Senator from New York ought to know, that the reason why we were seeking a curtailment of production was because there had been this immense curtailment of consumption on account of the war?

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Utah?

Mr. GALLINGER. I do.

Mr. ROOT. Mr. President——

The PRESIDING OFFICER. To whom does the Senator yield?

Mr. GALLINGER. I yield first to the Senator from New York.

Mr. ROOT. I will ask the Senator from New Hampshire to pardon me for treating him as if he were a billiard ball, and caroming upon him in my conversation.

Mr. WILLIAMS. Mr. President, will the Senator from New Hampshire pardon just one more question?

Mr. GALLINGER. Yes; I yield.

Mr. WILLIAMS. Does the Senator know of anybody in this entire body who presents the appearance of being a more friendly intermediate carom ball than he, and anybody who stands it with greater patience and with more good humor? [Laughter.] I would also apologize if I thought any apology were necessary, but I know that the Senator from New Hampshire is enjoying it.

Mr. GALLINGER. I certainly am.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield now to the Senator from Utah?

Mr. GALLINGER. I yield to the Senator from Utah.

Mr. SMOOT. I was going to ask the Senator from New Hampshire if he did not think the statement made by the Senator from Mississippi that it costs 4 cents a pound more to raise cotton now than it did 15 years ago was rather an extravagant statement, for this reason: The average of an acre of land in the South is 1 bale of cotton of 500 pounds. Now, 4 cents a pound would make $20 an acre. It can not be possible that it costs $20 additional to cultivate 1 acre of land over and above what it cost some 10 or 12 years ago, because that, I think, is a very, very good price for the entire labor that there is upon the planting and the rearing of cotton and bringing it to the gin, but not after it reaches there. Of course it costs some little after that?

Mr. GALLINGER. Mr. President, I have enjoyed this symposium, as the Senator from New York characterized it, and I am very glad that I have emerged from it without a more personal reference to the billiard ball, which I rather expected would be made.

Mr. President, I always approach with a good deal of hesitancy a discussion with the Senator from Mississippi [Mr. WILLIAMS]. I rather enjoy it on the question of the tariff, for the reason that we hold diametrically opposite views on that subject, and when we retire from the field we are both satisfied that we came out victorious; but when it comes to a discussion of the cotton question I am at a very great disadvantage.

I remember something about the discussion when our good friends from the South asked us to have the Government issue $250,000,000 in bonds to buy the cotton crop of the South and, I suppose, put it in cold storage, awaiting a customer. During that discussion my mind was made aware of the fallacy that the Government ought to go into that business at all. I felt then on that matter as I feel on the question that is now before us. The shipping interests of the country appeal to me very strongly, and I am proposing to do and am doing what I can to defeat this bill. But above and beyond every consideration of the shipping industry, the question of Government ownership of the means of water transportation is what is engaging my attention more particularly, and it is irresistibly driving me to oppose this bill with all the energy and whatever ability I can command.

I know that the present occupant of the chair [Mr. MARTINE of New Jersey in the chair], my good friend the Senator from New Jersey, holds diametrically opposite views from what I do on the matter of Government ownership, because we have talked it over. The Senator from New Jersey is equally as sincere as I am. He sees no danger and doubtless he sees great benefits to the people of the country in Government ownership. I see nothing but harm and disaster to the best interests of the country, and for that reason I have more strenuously opposed this bill than I otherwise would have done.

Mr. President, undoubtedly the cotton producers are at the present time suffering, but I believe it will be only a temporary matter. We have suffered in the North. We have seen the factories and workshops of New England closed, the workmen on the streets. My sympathies were enlisted in their behalf, but we have had to wait our time. We have had to wait years until we could get relief. The relief at last came. Again, to a certain extent, the disaster has overtaken the industrial interests of my section of the country, but we do not expect to get relief by any emergency measure that we might propose.

Now, I will continue the reading of this interesting report:

> Even this serious burden imposed upon our people against our will and beyond our control is not, however, the greatest danger possible. We now see clearly that the fortunes of war or the naval interests of a belligerent may at any time stop our transportation movement entirely. It did so for about two weeks in the month of August, and circumstances may recur to cause it to do so again. At a time, therefore, when the United States abounds in crops of wheat, corn, cotton, apples, for which a profitable market exists abroad, and when the world, both that part of it which is in arms and that which remains at peace, is calling as never before for the products of our mines and factories we are all but helpless in the face of the largest opportunity we have ever known. The need of others for our goods is our sole reliance for transportation facilities. The wrath of other nations, one with another, may at any time cause these facilities to be removed. Even at present high rates ships are not available for many purposes until March. The situation is emergent, expensive, and it is impossible, with any due regard to the interests of American commerce, to permit it to continue a day longer than is necessary. The Associated Press says:
>
> "During the first four months of the war 54 British foreign-going ships, with cargoes, were captured or destroyed. Further, that losses to Scandinavian shipping have been, through mine disasters: Sweden, 8 ships; Denmark, 6 vessels; Norway, 5 vessels; and Holland, 3 vessels. There is grave uncertainty as to maintenance of the present insufficient supply of tonnage."

Well, Mr. President, if 54 British ships have been destroyed, there are almost 4,000 British ships left, at the lowest calculation. So I do not think that ought to alarm us.

> Numerous plans have been suggested to build up our merchant marine, the principal one being the payment of direct subsidies. The American people have never been willing to foster private interest in this way, nor is there any sign that they have changed their minds. The adoption by us of the plan of service subsidies in the carrying of our mails has not given that increase to our merchant marine promised by the advocates of that policy.

Mr. President, as I said an hour ago, if the bill the authorship of which belongs to the late Senator from Maine (Mr. Frye), whose memory is enshrined in our hearts, had been passed in another body as it passed this body, no one could have complained that it had not been a complete success. As it was, the rates were so reduced that we are now expending a small amount of money in the matter of mail subventions and as a result we are keeping our four lone ships on the north Atlantic; we are keeping a line to Venezuela; we are keeping one or two lines to South American ports; and we are keeping a few ships across the Pacific; I do not know how many. I am told, Mr. President, that the line that crosses the Pacific would to-day have to surrender and cancel their sailings were it not that the little British colony of New Zealand makes a contribution to that line. It is not to the credit of our country.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Will the Senator from New Hampshire yield to the Senator from Minnesota?

Mr. GALLINGER. I yield to the Senator.

Mr. NELSON. Would not the passage of this bill work the destruction of that Pacific line?

Mr. GALLINGER. Very likely.

Mr. NELSON. Ruin it entirely?

Mr. GALLINGER. I fear so.

Mr. NELSON. Drive it off the sea?

Mr. GALLINGER. Especially if an "elsewhere" line is going to cross the Pacific. I do not know where else they will put it.

We are now paying four vessels of the American Line—the *New York*, the *Philadelphia*, the *St. Louis*, and the *St. Paul*—in the north Atlantic trade, about $735,000 per annum for mail transportation. For the conveyance of United States mails to foreign countries we paid for the fiscal year ending June 30, 1914, to American steamers $1,409,483.77, and to foreign steamers—because American steamers could not be had—$1,429,434.25.

Mr. President, if that $1,429,434.25 that is now being paid to foreign steamers to convey our mails was added to the rates that are allowed in the ocean mail act of 1891, we would not have to employ foreign ships to carry our mails across the north Atlantic.

The Government has no control over the passenger or freight rates charged by these vessels, and it may be properly assumed that they charge all the traffic will bear.

Of course that goes without the saying. The Government has not as yet attempted to control the passenger and freight rates across the oceans of the world.

An investigation made by the Committee on the Merchant Marine and Fisheries of the House of Representatives into steamship conferences and agreements in the domestic and foreign trade disclosed the fact that for three or four years prior to 1913 ocean freight rates increased from 50 to 100 per cent. Since July 1, 1913, the New Orleans Cotton Exchange certifies that the rates on cotton from New Orleans to Liverpool have advanced as follows per 100 pounds:

	Cents.
July 1, 1914	28
August 1, 1914	28 to 33
August 17, 1914	50
August 23, 1914	50
October 28, 1914	60
November 9, 1914	60
November 11, 1914	65
December 1, 1914	70
December 4, 1914	75
December 11, 1914	85

Or more than 200 per cent since July 1, 1914.

The following memorandum from the Treasury Department shows the abnormal increases on other articles of commerce:

Mr. President, I will ask permission to place that memorandum in the RECORD without reading.

The PRESIDING OFFICER. Without objection, that course will be pursued.

The matter referred to is as follows:

Memorandum concerning rise in freight rates, New York to Liverpool.

	Grain, per bushel.	Cotton, per 100 pounds.	Flour, per 100 pounds.	General cargo, per ton.	Provisions, per ton.	Freight.	Bottoms.
	Pence.	*Cents.*	*Cents.*	*s. d.*	*s. d.*		
Dec. 12, 1913.	2	30	14	17 6	20 0	Scarce....	Ample.
Mar. 12, 1914.	1½	25	12	17 6	20 0	...do.....	Do.
June 12, 1914.	1½	20	10	17 6	20 0	Increased	Being held for higher rates.
July 12, 1914.	2½	20	12	17 6	20 0	...do.....	Do.
July 30, 1914[1]	2½	20	12	17 6	20 0	Plenty...	Demand for tonnage increasing.
Sept. 5, 1914.	3	20	20	17 6	20 0	Scarce....	Ample.
Oct. 12, 1914.	4	35	21	20 0	30 0	Increased	Demanding higher rates.
Nov. 12, 1914.	6½	50	24	20 0	30 0	...do.....	Becoming limited.
Dec. 12, 1914.	8	75	26	30 0	30 0	Considerable.	Scarce.

[1] No rates quoted until Sept. 5.

A comparison of the freight rates between New York and Liverpool is shown by the above table and is most interesting and instructive.

Between December, 1913, and the end of July, 1914, the rates for the most part held uniform, there being, however, a slight advance in the grain rate, a slight decrease in the flour rate, and a fall of 50 per cent in the rate for cotton.

In December, 1913, there was more tonnage available than freight offered.

At the end of June, 1914, there was plenty of freight offered for shipment, but shipowners were holding their tonnage in expectation of higher rates, and this condition continued until the war.

For several weeks following the outbreak of the war shipping was demoralized and trans-Atlantic freight traffic was practically at a standstill.

By the first week in September sea conditions became more settled, but, while there was ample tonnage offered, the difficulty in financing cargoes caused a very limited demand for the ships. As a result the freight rates on standard cargoes were practically the same as during the normal times before the outbreak of hostilities.

During September the demand for tonnage steadily increased, and the shipowners naturally began to hold their tonnage for higher rates.

By the first week in November, the greatly increased rates offered by shippers were sufficient to bring out the ships, and the idle tonnage was rapidly utilized; by the end of November ships began to be scarce, and at the present time the lack of tonnage is clearly set forth in the following quotation from the New York Journal of Commerce, of December 12, 1914:

"The full-cargo steamer market continues exceedingly strong, influenced by a steady demand for tonnage and a very limited supply of same available before the middle of January. The bulk of the demand continues to come from the shippers of grain, cotton, coal, and general cargo to European ports, principally to the Mediterranean, and rates have advanced steadily, until at the present they are at their highest with every indication of further advances being recorded within the next few days."

This scarcity of ships has resulted in the tremendously increased freight rates, as shown by the above table. Comparing the rates current on December 12, 1913 (when world conditions were normal), with rates at the present time (Dec. 12, 1914, when available tonnage has been greatly diminished through the effects of war), we find the following very marked increases in the trans-Atlantic freight rates for the staple articles of export: Freight on provisions, 50 per cent; on general cargo, 70 per cent; on flour, 86 per cent; on cotton, 150 per cent; on grain, 300 per cent.

Mr. GALLINGER (reading)—

Inasmuch as freights have been going up abnormally and without sufficient economic cause during years of almost universal peace, and inasmuch as they have transcended the bounds of reason since the beginning of the European war, your committee is of opinion that this is a most auspicious time to begin the augmentation of the American marine by Government action.

It is not sufficient, however, to draw attention to the increases in the rates for ocean transportation, however onerous those rates may be to the business of our American producers, whether industrial or agricultural. There is a far more important element to be considered, namely, the control by us, and in the interest of America as a whole, of our ocean transportation. This control does not now exist. We stand helplessly at the water front and let others do our business for us to their own great gain, subject to their own risks.

Mr. President, that sounds like some language I have used in debate in this body on bills relating to the American merchant marine. I have said that this is the only country in the world that denies the protection of the Government in any form to its products when they reach the water's edge.

They do it in their own way as to time, place, and character of transportation, and no one will pretend that they have extended to us in all respects equal facilities to those which they have furnished to their own peoples.

I have said that also. I have called attention over and over again to the fact that when we ship goods to Europe for South American trade we are dependent upon foreign Governments and foreign shipping combines when they are placed upon the docks at Liverpool or any other British port; that there is a discrimination on the part of the foreign shipper to take the goods of his own people as a matter of preference and allow our goods to remain there just as long as he chooses to do it. I have urged that as a reason, over and over again, why we should have an adequate American merchant marine, but I never thought that it possibly could be accomplished by the Government going into the shipping business and buying 30 or 40 ships to put on the oceans of the world. It is unspeakable that that could by any possibility solve this problem.

We need control of the situation in several ways. Control should be exerted over rates of transportation, in order that condition like those existing to-day shall become impossible. If there were American ships of ample capacity to carry cotton from our southern ports, or grain and apples from our northern cities, and if these ships were so controlled that the rates for transportation therein could be made such as were just alike to the vessel and to the shipper, a handicap would be at once removed which now, at a critical point in our financial history, is weighing us down.

It will be observed, Mr. President, that there is a very serious "if" in that sentence, and that "if" will remain there even after this bill becomes a law, if it ever does.

In the second place, control should be exerted as to the routes to be followed. In the interest of American commerce as a whole it should not be permitted that the necessity of European stockholders for earnings should dictate where and when ships should go. That is a matter we ought to control for ourselves, and in which we can not afford to be controlled by others. It should rest with us to say that such and such a ship shall go to such and such a place when and as American commerce needs to have it go there.

Well, Mr. President, if the Government can do that, the Government can work miracles.

It can not be imagined that the American people, who desire their commerce to be promoted by shipping, shall be content to have that promotion remain a secondary thing in the interests of certain investors, chiefly abroad, but partly at home.

Again, control should be exerted as regards the character of the transportation furnished. We need passenger facilities to South and Central America and to other portions of the world as good as those which Europe provides for her own people. In the past we have been handicapped by the fact that to reach Argentina and Brazil Americans have found it preferable to go by way of Europe. In short, it is the duty of the Government in all these matters, by its control, to be helpful to American commerce and not to be helpless in the whole matter.

This legislation, so far as it permits the control of ocean freight rates by transportation in vessels under Government direction, is in line with all recent rate legislation. It permits that to be done at sea which we have long done at home, and provides for the ocean carrier what we long ago provided for the common carrier on land. By reason, moreover, of the international character of ocean transportation, control by Government direction of vessels of the kind proposed by this measure is the only way available for that power over rates which we have long exercised on shore, and which present circumstances show us is badly needed at sea.

When the control of the rates on 30 or 40 ships on the different routes of the world regulates the charge on 4,000 or more ships that England has in the carrier service we will certainly see a remarkable demonstration of a man or a Government lifting itself by its boot straps. It can not possibly result.

The following communication from the Department of Commerce shows the great decrease of ships and tonnage from United States ports:

Again, Mr. President, I will ask to put that table in the RECORD without reading.

The PRESIDING OFFICER. Without objection that course will be pursued.

The table referred to is as follows:

Net tonnage of vessels cleared from the United States for foreign ports during the five months ended Nov. 30, 1913 and 1914.

Month.	1913			1914		
	American.	Foreign.	Total.	American.	Foreign.	Total.
July	1,873,857	3,836,127	5,709,984	1,558,249	4,062,802	5,621,051
August	1,749,384	3,762,141	5,511,525	1,634,974	2,971,270	4,606,244
September	1,571,473	3,688,980	5,260,453	1,366,790	3,055,424	4,422,214
October	1,749,735	3,538,895	5,288,630	1,320,718	2,584,068	3,904,786
November	1,498,253	2,896,501	4,394,754	956,264	2,404,695	3,360,959

Mr. GALLINGER (reading)—

These facts clearly indicate that an emergency exists—there is a lack of ships—and that our people are being deprived of the means of transportation for shipments of many classes of their goods and are being mulcted by excessive and unreasonable rates upon shipments actually made.

Private enterprise with an unquestioned occupancy of the field has broken down at a crucial point and has failed to give us ships to meet the demands of our shippers. The Chamber of Commerce of Pensacola, Fla., of date December 12, 1914, sent the following letter to the committee:

"PENSACOLA, FLA., *December 12, 1914.*

"Senator D. U. FLETCHER,
"*Senate Office Building, Washington, D. C.*

"DEAR SENATOR: We here do not know whether to be amused or disgusted in regard to interviews given out by prominent gentlemen, who should know better, as to the great number of ships available for carrying freight and the ease in obtaining them.

"If some of the gentlemen who talk this way would come down to this coast and see how our business is hampered by inability to get bottoms and the extraordinary freight rates charged they might change their minds as to the abundance of vessels available. The fact is that freights are almost at a prohibitive figure, and vessels can hardly be obtained even at the piratical prices asked.

"Congress will be doing a great service for this coast if they can find some effective means of remedying this serious situation.

"Very truly, yours,

"C. E. DOBSON, *President.*"

This letter is in agreement with the statements from two departments of the Government—the Treasury and Commerce—and accords with our conclusions that an emergency exists.

Well, Mr. President, when these 30 or 40 ships get distributed over the ports of the United States and are traversing the various routes over the seas, I do not imagine that Pensacola, Fla., will get a great many of them.

We have already stated that it is our belief that there is no division of sentiment among our people upon this question. We not only need an enlarged merchant marine to meet the present emergency, but legislation which will give us an enlarged American merchant marine, with ships flying the American flag, traveling on sea lines regularly with scheduled dates of sailing and well-advertised points of destination. Private enterprise has failed to fully give our people these advantages under their own control, and by that failure has seriously interfered with the full development of our foreign trade. It now remains for the Government, by wise legislation, to initiate a greater American merchant marine.

It is not desired to create a Government monopoly in the shipping business. It is not necessarily involved in the proposed legislation that the Government shall permanently remain interested in shipping. Wherever private interests will, at reasonable rates and with proper facilities, serve American commerce in ocean transportation, the Government will be more than content to have them do so.

So that, Mr. President, if the time ever comes when American shipping companies shall say to the Government that they will reduce their rates and carry commerce at a figure that this shipping board thinks is just, the Government will then surrender the business to private parties, and the very next day the private concerns can advance the rates if they see fit. Is there anything to prevent it?

By the proposed plan the Government will not enter the field of ocean transportation as a cutthroat competitor. Its purpose is to aid and not to injure American commerce, and it must, of course, be recognized that privately owned American vessels in ocean transportation are a part of American commerce, and are not therefore to be hindered, but rather are to be helped. The very steadiness of control that will be introduced into the situation through the proposed measure will itself be an element of aid to the privately owned transportation lines. We shall be content to have a large portion of our foreign commerce carried under the American flag in privately owned vessels. But we can not rest content while over 90 per cent of our foreign commerce is carried under foreign flags, subject to the primary interests which naturally arise under those flags, out of our own control in every respect, and with no limitation on charges save the exactions for profit of stockholders to whom American commerce is but incidental to their own stronger interests.

"TRADE FOLLOWS THE FLAG."

This maxim has been adduced in a thousand arguments and its truth has never been seriously questioned.

It has been questioned a great many times, but I will not stop to question it to-day—

Few commercial steamers carry the American flag, and this bill is the beginning of a movement to put the flag on a far greater number of genuine American-owned vessels and to send them out as carriers of our products and of return cargoes to and from all parts of the world. These ships will be genuine American ships, and will not only win from the peoples to whom they go a fair share of their trade, but will carry to them articles of our home production whose merit will win their way. The transportation lines established under this bill will be permanent, regular in their sailings, and controlled for the public good.

Mr. President, just think of the German ships interned in New York, if they are to be purchased, as it is suggested from various sources that they will be purchased—just think of those ships being "genuine" American ships, as this report says they will be!

This bill not only initiates a merchant marine as a necessary adjunct in the permanent development of our foreign trade by supplying regular transportation to foreign markets, but will be an important factor in our national defense, increasing the efficiency of the Navy and Army by providing naval auxiliaries with a trained personnel and transports available on demand.

The bill as drawn affects only our foreign shipping and does not affect the coastwise trade of the United States—

This was written before Hawaii was put into the bill, which is now offered as a substitute for the original bill.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Connecticut?

Mr. GALLINGER. I yield to the Senator from Connecticut.

Mr. BRANDEGEE. It is reported that the Democratic caucus has proposed an amendment to allow these vessels to go into our coastwise trade.

Mr. GALLINGER. They do in the substitute bill, so far as Hawaii is concerned, which has always been regarded as coastwise trade, and that is only the beginning. The report wisely suggests:

In the coastwise trade there is no emergency; we have an abundance of ships for all our coastwise demands, and they carry the American flag. In the foreign trade, however, we have a shortage of ships, and a still greater shortage of ships carrying the Stars and Stripes.

We have an abundance of ships in the coastwise trade, Mr. President, because we have protected them from competition with cheaper-built and cheaper-navigated foreign ships. The consequence is that we have a coastwise fleet that is not only the admiration of our own country but the admiration of the world. It appears, however, to be too successful, too prosperous, to suit some people, and it is now proposed to let foreign ships, under certain conditions, get into that trade.

The bill will create work for our shipyards, not only in the construction of ships but in the matter of repairs. Our shipyards for the construction of our war vessels successfully outbid the world for the construction of war vessels for Argentina, and it is believed that they can carry this successful competition into the construction of merchant vessels. Besides this, the bill will create a demand for material entering into construction, repairs, and alterations, and also for necessary supplies.

Not to any greater extent than if the ships were built by private parties.

The entire proposed cost under this measure is less than is the loss to the Nation caused by a fall in price of the present cotton crop of 1 cent per pound by reason of excessive freight rates.

The bill creates a Government activity and expenditure for the benefit of the commerce of all the people. We have now not over 1,400,000 gross tons of shipping available for the foreign trade, and much of this has, indeed, but a nominal existence, because it comprises old vessels not yet withdrawn from registry, and others whose cargo capacity is insufficient to meet their heavy operating cost. Our flag is rarely seen at hundreds of ports throughout the world. This is a reason for this new governmental activity—a full and sufficient reason for the creation of a corporation or corporations organized or to be organized and controlled by the Government of the United States to purchase, charter, control, and operate merchant vessels for the benefit of the agricultural, manufacturing, mining, and commercial interests of the country. The reason is still greater in the face of the fact that a great foreign war has paralyzed our foreign commerce at a moment when new and profitable fields are opening up, inviting our entrance, while private capital and enterprise is unable to remedy the disease.

Yes, Mr. President, it is too true that the flag is seldom seen in the ports of the world, where 75 years ago it was seen wherever American travelers happened to be. The Merchant Marine Commission took testimony on this point, and four gentlemen testified that they had gone around the world, one of them twice, one of them in his journey covering a distance twice around the world, and that they had rarely ever seen the American flag, unless it was on the yacht of some millionaire or on a battleship of the United States. This is not news to some of us. We have appreciated it for a long time, and have done all we could to remedy the evil; but, Mr. President, when Mr. Seabury

of New York, an expert, testified that, if we supply ships to take care of the entire commerce of the United States, we will have to invest at least $600,000,000 in the enterprise, I want to ask in all seriousness what good will $30,000,000 do?

Senate Document No. 225 of the Sixtieth Congress, first session, entitled "Development of the American Ocean Mail Service and American Commerce," says, on page 65:

"One of the most important features of the voluminous testimony taken all over the country by the Merchant Marine Commission was the insistence of practical men of business—merchants and manufacturers and bankers—not themselves interested in any way in shipowning or shipbuilding, that the lack of American ships prevented us from securing an adequate market abroad for the products of American manufacturing, mining, and agriculture."

And every one of those men, Mr. President, was in favor of the Government of the United States extending some aid in some form to the shipping interests of the country.

It may be safely assumed that the American people will not consent to any change in the conditions provided by law for American seamen. It is furthermore the case that the operation of ocean vessels presents problems of cost of operation which are not finally worked out.

I supposed they had been worked out, and I think they have.

Statements are made concerning one or another element of operation of American vessels which are so clouded by private interest or so utilized to enforce a special claim as to make both the present and the possible facts somewhat uncertain. The pending measure will provide an opportunity which private capital can not extend to determine, free from all question of private interest or prejudice, just what the facts are respecting the cost of ocean transportation under our flag. The cheapest water transportation of bulk freight by steamers is under the American flag, in the specialized ships which carry ore and other bulk cargoes on the Great Lakes. The cheapest ocean transportation for bulk freight is also under the American flag, in the large coastwise schooners upon our Atlantic coast. Private interests have never yet undertaken to determine on any considerable scale whether these facts can be projected further into a larger development of our American merchant marine.

Mr. President, the cheap transportation on the Lakes and on the coast by the coastwise ships of the United States is due wholly to the fact that the Government is giving those ships adequate protection by excluding from that trade all foreign ships. So these ships, protected against foreign competition, are giving cheap and adequate transportation; and the very statement of this report disproves the allegation, which has been made here over and over and over again, that the coastwise shipping of the United States is a monstrous monopoly which ought to be destroyed.

There is the highest marine technical authority for saying that American steamers can be constructed for ocean purposes so that their loading will be much less costly than is that of European-designed steamers; and it should be remembered that it costs more per unit to load and unload cargo into and from a vessel than it does to transport it across the ocean.

I assume that that depends upon the character of the cargo. It may be true of some things, but it can not possibly be true of all the products that enter into ocean transportation.

There are, therefore, problems in marine transportation of essential importance to American commerce, but which private capital has not been able hitherto fully to work out. This measure will provide for the first time adequate means for the study of these problems, through which study both private and public interests will gain.

It remains to review briefly the effects of the existing situation on our agriculture. When the present war broke out we faced trying conditions by which our farmers especially were seriously threatened. Their crops were ready to move, and had, in fact, begun to move. They were immediately confronted with the stoppage of the mechanism of exchange and with the absence of ships.

About August 7 embargoes were placed by all railroads against grain for Galveston, New Orleans, Baltimore, and New York destined for export. Within a few days thereafter there were reported to be 1,700 cars of grain in the railroad yards of Galveston alone, with the elevators full and no facilities for shipping. The railroads were lined with cars that could not be moved. Weather conditions were unfavorable and a serious loss was not only threatened, but actually sustained. By the week of September 10 shipping embargoes against vessels had been placed on all German, Swedish, and Russian ports, with the single exception of Gothenburg, Sweden, and shipping companies running to those ports refused to accept any consignments. The Galveston embargo was raised August 27, by which time there had been tied up in the Galveston yards alone about 3,000 cars of wheat. Like conditions prevailed in New Orleans. On September 1 the railroads entering that port raised the embargo there also.

So the emergency passed without our building any ships.

By September 10 it is reported that 275 vessels, most of them under the German flag, but many carrying American cargoes, had been seized by hostile cruisers, thus removing available tonnage that could otherwise have been used to handle American grain and cotton.

On October 25 every elevator in Galveston was full and 2,800 cars of wheat still waited on the tracks. On November 3 the Santa Fe Railroad advised the Interstate Commerce Commission by wire that they had not received any grain for export by way of Galveston since October 24, having thus put a second embargo upon wheat shipments for lack of shipping facilities from Galveston. The railroad company stated it was forced to put on this embargo, as they could do nothing to assist in transportation beyond Galveston; in other words, there were no ships available.

The vice president of the Galveston, Houston & Henderson Railway stated December 11 that there were on Galveston Island 1,767 cars containing 2,000,000 bushels of wheat; that all the elevators were full, and that 2,000,000 additional bushels were in transit to Galveston. On that same day the vice president of the Santa Fe Railroad stated that they had found it necessary on December 1 to renew the embargo against wheat for Galveston, which had been made effective as of the 16th of December, and that there were then in Galveston, or en route to that port, 3,800 cars of wheat on the Santa Fe system alone. There have thus been three separate embargoes on wheat at Galveston. It is apparent, therefore, that even after the current of exchange was restored the movement of the great wheat crop continued, and still continues, to be delayed for lack of ships.

The situation as regards cotton was still more serious, and continues to be so. Our communications with South America, unsatisfactory enough in normal times, are still more so under present abnormal conditions.

The industries of South America are largely extractive. They have the products from the farm, from the ranch, from the forest, and from the mine. Some of their agricultural products are competitive with those grown in the United States, but by far the larger volume of South America's agricultural products are not grown in the United States and are therefore noncompetitive, such as coffee, rubber, cocoa, and bananas.

In some of those countries cotton and woolen goods are wanted. American tractors are doing service in Chile as well as in Belgium.

Locomotives, cars, steel rails, structural steel for trusses, cement, harvesters, automobiles and supplies, machinery of all kinds, including fire engines made in the United States, have all been introduced in South America and the demand and use can be greatly extended.

Means of making deliveries and the interchange constitutes the chief factor to be provided.

It is believed direct credit facilities and arrangements for financial transactions can be supplied as needed.

In view of the importation in the last year and a half of a small amount of Argentine corn and Argentine beef there has been an attempt to alarm the farmers, especially of the Middle West. As a matter of fact, there is no danger even under the existing state of agriculture in this country of successful competition on the part of the Argentine farmers with those of this country. The total corn crop of the Argentine Republic in 1913 was 196,600,000 bushels; the total corn crop of the United States in 1912 was 3,125,000,000 bushels; and in 1913, 2,447,000,000 bushels. The shortage in 1913 as compared with 1912 in this country was 678,000,000 bushels. Argentina's total crop was less than a third of this shortage. A very small fraction of this total crop reaches this country.

And yet, Mr. President, after we had in a moment of mental aberration placed corn on the free list, with a surplus of corn in this country so far as our own people's wants are concerned, in the eight months prior to the beginning of the European war we had imported 10,000,000 bushels of foreign corn into the United States. We did not need it. We had corn enough and to spare, but it was sent here because it could be offered to our people cheaper than the American corn.

Mr. BRISTOW. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Kansas?

Mr. GALLINGER. I yield to the Senator from Kansas.

Mr. BRISTOW. It was sent here, was it not, because it could be grown so much cheaper in other countries, where the expense of producing the corn and of carrying on the farm was very much lower than it is in the United States?

Mr. GALLINGER. Beyond a question they produce it very much cheaper.

[At this point a message was received from the House of Representatives.]

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Utah?

Mr. SMOOT. I do not ask the Senator to yield to me. I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

Mr. THOMAS. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator from Colorado will state it.

Mr. THOMAS. There has been no business transacted under the rule since the last quorum was called.

Mr. SMOOT. Why, Mr. President, there has just been business transacted, because we have received a message from the House of Representatives.

The PRESIDING OFFICER. A message has been received from the House of Representatives. The Chair decides that the point of order is not well taken. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gronna	Nelson	Smith, Ga.
Bankhead	Hardwick	Norris	Smith, Mich.
Brady	Hollis	O'Gorman	Smoot
Brandegee	Hughes	Oliver	Stephenson
Bristow	James	Overman	Sterling
Bryan	Johnson	Page	Stone
Camden	Jones	Perkins	Swanson
Catron	Kern	Pittman	Thomas
Chamberlain	La Follette	Reed	Thompson
Chilton	Lane	Robinson	Thornton
Clapp	Lee, Md.	Root	Tillman
Clark, Wyo.	Lippitt	Saulsbury	Townsend
Culberson	Lodge	Shafroth	Vardaman
Dillingham	McLean	Sheppard	White
du Pont	Martin, Va.	Sherman	Williams
Fletcher	Martine, N. J.	Shively	Works
Gallinger	Myers	Smith, Ariz.	

The PRESIDING OFFICER. Sixy-seven Senators have responded to their names. There is a quorum present.

Mr. MYERS. Mr. President, I will occupy the floor——

The PRESIDING OFFICER. The Senator from New Hampshire has the floor.

Mr. GALLINGER. I do not yield, Mr. President.

The PRESIDING OFFICER. The Senator from New Hampshire does not yield.

Mr. MYERS. I merely wished to say, if the Senator will permit me, that I thought he was through.

Mr. GALLINGER. Oh, I have hardly commenced. [Laughter.] I venture to say that not half a dozen Senators have read this interesting report, and I am delighted to see that they have come in to listen to the remainder of it.

European markets are strong competitors for all agricultural products from South America and receive the greater amount of South America's surplus. The importation of corn to the United States from all countries, including Argentina, for the year ending October 31, 1914, was seven-tenths of 1 per cent of the crop of the United States, or 16,000,000 bushels. During the same period the United States exported over 11,000,000 bushels. A great part of the corn imported was used in New York City in the manufacture of corn-sirup products. It really cuts no figure in our domestic price. We shall export this year more corn than we have imported—

We imported $5,000,000 worth more last year than we exported, according to these figures—

The same general situation is presented in the importation of meats. For the last year we imported 160,000,000 pounds of meat from Argentina. The total domestic production is 15,000,000,000 pounds. The amount imported, therefore, is 1 per cent of the domestic product.

That is more than I thought it was. I said a moment ago that under the existing tariff law, which put the products of the farm on the free list, we had imported 10,000,000 bushels of corn which we did not need from foreign countries; but, as was suggested by the Senator from Kansas [Mr. BRISTOW], labor is so much cheaper in those countries and the cost of production is so much lower that they can afford to raise corn and pay the transportation charges and compete successfully with our American corn; and according to this report—good Democratic authority—16,000,000 bushels of corn have been sent into the United States since the Underwood-Simmons tariff law was placed on the statute books.

Later on I hope the Senator from North Dakota [Mr. GRONNA] will have something to say on this subject. That Senator knows all about it, and he doubtless will talk about it before the debate ends. It is a good subject for him.

During the same period the United States exported over a billion pounds of meat products. The proportion of the imported meat to our total domestic product is inconsiderable. The Argentine meat does not in reality compete with our western beef, because of its character and quality. The amounts of these two commodities that will come to this country in the future are not likely to increase largely or to get far from the Atlantic seaboard. These two products are the principal ones in which American agriculture has not shown a satisfactory advance in recent years.

In the last 15 years the American corn crop has not materially increased, and the beef cattle have decreased in number by 12,000,000 head, and the number of hogs has decreased by three or four million.

Mr. GRONNA. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from North Dakota?

Mr. GALLINGER. I yield to the Senator for a question.

Mr. GRONNA. May I ask the Senator from New Hampshire if he is familiar with the fact as to the price that was paid for this corn that was imported from Argentina?

Mr. GALLINGER. I will say in reply that I am not; but it must have been sold cheaper than the American corn or it would not have found a market in the United States.

Mr. GRONNA. It was sold at an average of about 10 cents a bushel lower than the price paid for American corn.

Mr. GALLINGER (reading)—

In this same period our population has increased 23,000,000. Conditions have changed very rapidly in this country, and agriculture has been going through a period of adjustment. With improved conditions, with better financial facilities adapted to the needs of agriculture, with proper farm management, with increasing attention to forage crops and to live stock in the settled portions of the Union, the farmers of this country will not only produce corn and meat and other products to supply the home demand, but will supply also a considerable part of the demand of foreign countries. It is not complimentary to the intelligence of the American farmer to attempt to alarm him by the dangers of competition from foreign farmers. In any event, the small volume of competitive products that are being imported will probably benefit at least three farmers for every one who might feel the competition. If any grain whatever reaches the farming sections it will certainly largely benefit the cattlemen and stock raisers. This country is still an exporter of agricultural products, having sent abroad in 1913, according to the preliminary figures, $1,123,000,000, while it imported $815,000,000, consisting for the most part of noncompetitive products. It should not be forgotten that the American farmers export considerable quantities of agricultural products to South America. In 1911 we exported $125,000,000 worth of farm and forest products to South America alone.

It is highly likely that with direct shipping we shall continue to export to South America even more farm and forest products and more than we import.

I shall show, later on, that we have now direct shipping facilities to South America which exceed the present demand for cargo space.

The greater part of our importation of agricultural supplies from South America consists of things which we do not produce here. In 1911 we imported from South America $116,655,000 worth of forest and farm products. Of this total coffee represented $76,000,000; cocoa, about $5,000,000; and rubber, hides, and things of like character, the greater part of the remainder. With direct or better shipping facilities, we shall secure more of these things.

So far as South America is concerned, the principal result from direct or improved shipping facilities should be:

1. The importation of a larger volume of noncompetitive agricultural products from South America, such as coffee, cocoa, etc., on better terms than heretofore.

2. The importation of quantities of nitrates, especially from Chile, needed by American farmers for fertilizers.

3. A small amount of competitive agricultural products, negligible in comparison to our total domestic product.

4. The exportation to South America of larger volumes of agricultural products, especially from the West, such as wheat.

5. A large increase in the exportation of manufactured products.

6. Increased travel between South American countries and the United States, larger contact, and more friendly relations.

In such case it is highly likely that instead of having a large trade balance against us with South America, we shall witness the development of a credit there in our favor.

There is one South American product of decided importance to the farmers of the Nation to which we may give especial attention, namely, the nitrates. We are dependent largely upon Germany for potash. We have been using very little nitrates in fertilizers because of its high price, and yet our fertilizer experts say we are greatly in need of this important ingredient. The rapidly increasing demand of cattle feeders is taking cottonseed products, fish scrap, blood, and high-grade tankage out of the reach of farmers as fertilizers. We should get large quantities of nitrates from Chile. She produces at least 3,000,000 tons annually. This has gone for the most part to Europe. This country has received about a half million tons, which have been used mainly for making explosives. The head of one of the largest nitrate-producing companies of Chile, sent here recently by the Chilean Government, visited the Department of Agriculture and represented that if there was direct shipping connection between Chile and the Gulf ports of the United States through the Panama Canal Chile could send us six times the present volume of imports of nitrates at a price from 30 to 40 per cent lower than present prices, and that the farmer then could afford to use these nitrates in large quantities. The Chilean representative stated that Chile is in need of our coal for the navy and for industries, especially the coal from the Middle West. He asserted that ships coming from Chile with nitrates would return with coal and manufactured products. It is scarcely necessary to point out that a line touching at Chile could also reach other countries of the west coast of South America and would develop a volume of traffic between those countries and the United States.

As has been before stated, there is the most pressing need for ships to take our cotton to German ports for Germany and Austria and to bring back dyestuffs, cyanide, and other chemicals. We are informed through representatives of the Agricultural Department who were sent to Europe some time ago that Germany can use and would take from one and a half to two million bales of cotton, and that the price prevailing at present in Bremen ranges from 19 cents to twenty-one and a fraction cents. Austria would also take a considerable amount of cotton. The president of the British Board of Trade asserts that the cotton situation in Great Britain is improving and estimates that the English consumption will be 75 per cent of the normal. Yet, as all know, cotton is not moving satisfactorily to England, and is moving only with the very greatest difficulty to Germany, and probably none is reaching Austria. Our total exports thus far in 1914 fall almost 3,000,000 bales short of the 1913 figures. Unquestionably if we had additional ships under the American flag this situation would rapidly improve and much of the distress of the producers, the business men, and the bankers, not only in the South but throughout the country, would be relieved. The need is urgent. There is no telling how long the disturbance abroad will last and how long, therefore, we shall suffer unless the requisite action is promptly taken.

The report of the House of Representatives is attached and made part of this report; also Senate Document No. 601, entitled "American Merchant Marine"; also letter of 28th instant from Hon. William C. Redfield, Secretary of Commerce.

Mr. JONES. Will the Senator yield for a question?

Mr. GALLINGER. I yield.

Mr. JONES. Is the Senator aware of the fact that in the Columbia River Basin there are nitrate possibilities far in excess even of those in South America, and that all that is necessary to make them available is to have the water power of the Columbia River developed?

Mr. GALLINGER. I have known something of the possibilities of the development of those nitrate beds in the Columbia River Basin. I am not familiar with the details of it; but it has been called to my attention.

Mr. JONES. Is the Senator also aware of the fact that a bill is now on the calendar which if passed would make it possible to develop those nitrate possibilities in our own country?

Mr. GALLINGER. No; Mr. President, I was not aware of that fact, but it emphasizes what I have said several times, that there is no reason on earth in the minds of many of us, and I think the minds of a majority of this body, why the entire time of this session of Congress should be taken up considering this shipping bill, when the appropriation bills, including the river and harbor bill and the southern claims bill, the bill to which the Senator from Washington refers, and 200 or 300 other bills that are on the calendar remain unattended to. What the Senator says emphasizes what I have frequently asserted, that the country expects us not to give our time to the consideration of this controverted bill, but to take up the appropriation bills

and other bills and pass them and go to our homes. That is what the country expects.

The report of the Senate committee which I have read attaches as a part of the report, and adopts it, the report of the House Committee on the Merchant Marine and Fisheries, which I will now read:

The Committee on the Merchant Marine and Fisheries, to whom was referred the bill (H. R. 18666) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes, having considered the same, report it to the House with the recommendation that the bill do pass.

The bill provides that the Government, through a shipping board composed of the Secretary of the Treasury, the Postmaster General, and the Secretary of Commerce, may subscribe to the capital stock of any corporation now or hereafter organized under the laws of the United States or of any States thereof, or of the District of Columbia, for the purpose of purchasing, constructing, maintaining, and operating merchant vessels in the trade between the Atlantic, Gulf, or Pacific ports of the United States and the ports of Central and South America and elsewhere, to meet the requirements of the commerce of the United States.

The initial capital stock of the corporation shall not exceed $10,000,000, but the shipping board, with the approval of the President, may consent to or cause the capital stock to be increased from time to time as the interests of corporation may require.

The capital stock shall be divided into shares of the par value of $100, and the United States shall subscribe for 51 per cent of the stock, and for a like per cent of every increase, and the remainder shall be offered for public subscription. The United States may, however, subscribe at par to an amount of such stock not subscribed for by the public.

The corporation may begin business as soon as the 51 per cent of the stock is subscribed and paid for by the United States.

The United States, through the shipping board, with the approval of the President, may purchase or construct vessels suitable to carry out the purpose of such corporation and transfer them to such corporation upon terms and conditions to be prescribed by the shipping board.

Mr. SMITH of Michigan. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Michigan?

Mr. GALLINGER. I yield to the Senator.

Mr. SMITH of Michigan. I should like to ask the Senator from New Hampshire if in connection with this report there was not certain testimony taken, notably the testimony of Secretary McAdoo, and that in that hearing where Secretary McAdoo testified he admitted that, so far as private subscriptions to the stock of this so-called shipping company were concerned, there could be no possible promise of any profit on it? In fact, does not the Senator know that Secretary McAdoo admitted that it would be a losing venture both for the Government and for the private investors in that stock?

Mr. GALLINGER. I have called attention, Mr. President, during the discussion of this shipping bill to that rather remarkable hearing which was had in another body, a hearing that occupied a few hours. Two Members of the House gave their views and the Secretary of the Treasury gave his views, but no expert was called, no shipping man, no man interested in transportation was called, and that meager hearing is all we have to point our way in the consideration of this measure except the report which I am now reading. I feel fully justified in reading it, as I have heretofore stated, for the reason that I do not believe six Senators in this body have given it any consideration.

Secretary McAdoo did say that on some of the lines he expected there would be a loss, but he was not sure that there would be a loss on the whole, and in that respect he differs from every business man and shipper I have talked with, because they all say that there will be a very large loss, and that it is an inevitable loss.

Mr. SMITH of Michigan. If the Senator will permit me to interrupt him——

Mr. GALLINGER. I yield to the Senator.

Mr. SMITH of Michigan. Is it not a fact that the plan under contemplation will launch this corporation after the Government has made its subscription of 51 per cent of the stock?

Mr. GALLINGER. Yes; that is the provision.

Mr. SMITH of Michigan. That clearly indicates that they do not hope for numerous or prompt applications for the other 49 per cent. Otherwise they would wait until the corporation was fully organized.

Mr. GALLINGER. The bill provides that the corporation shall be launched, or it may be launched, when 51 per cent of the stock is subscribed. Knowing the Senator from Michigan as I do, a shrewd business man, who does not subscribe to anything which has not a reasonable prospect of a return upon the investment, I do not imagine that he will sell his automobile and put the proceeds in the stock of this corporation.

Mr. SMITH of Michigan. No; but, if the Senator will pardon me, I doubt seriously whether I will buy another if the present condition of industrial affairs continues.

Mr. GALLINGER (reading)—

The corporation may begin business as soon as the 51 per cent of the stock is subscribed and paid for by the United States.

The United States, through the shipping board, with the approval of the President, may purchase or construct vessels suitable to carry out the purpose of such corporation and transfer them to such corporation upon terms and conditions to be prescribed by the shipping board.

The Secretary of the Treasury, upon the request of the shipping board, may issue and sell what are known as Panama Canal bonds to a total amount not to exceed $30,000,000 for the purpose of purchasing or constructing such vessels.

Upon the transfer of the vessels to such corporation the corporation shall issue to the United States in payment therefor its gold bonds bearing interest at not less than 4 per cent per annum, such bonds to constitute a first lien upon the vessels so transferred and all other property of such corporation.

The bonds shall not be less in amount at their par value than the amount paid by the United States for the vessels.

The Secretary of the Treasury may, in his discretion, and with the approval of the President, sell such bonds to reimburse the Treasury for the expenditures made in the purchase or construction of vessels.

The vessels purchased or constructed by the shipping board and transferred to such corporation shall be entitled to registry under the laws of the United States and may engage only in trade with foreign countries or with the Philippine Islands and the island of Guam and Tutuila. The shipping board, subject to the direction of the President, is vested with full power to vote the stock of the United States in the corporation and to do all other things necessary to carry out the purposes of the act, and may at any time, with the approval of the Congress, sell the stock of such corporation.

Section 8 of the bill authorizes the President to charter, lease, or transfer such naval auxiliaries belonging to the Naval Establishment as are suitable for commercial use and not required for use in the Navy in time of peace, and now owned and operated by the Panama Railroad Co., to any corporation organized under the act, upon such terms and conditions as the President may prescribe. The bill further provides that the vessels purchased or constructed under its provisions shall, as far as the commercial requirements of the foreign trade of the United States may permit, be of a type suitable for use as naval auxiliaries. The question of providing vessels for our merchant marine from a standpoint of the Naval Establishment had been under consideration for some time by the subcommittee of the Committee on Naval Affairs. The same subject was being considered by the Committee on the Merchant Marine and Fisheries, from the standpoint of the merchant marine. Section 8, as written in the bill, is the result of a conference between Chairman Padgett and Mr. Talbott, of the Committee on Naval Affairs, and the chairman and Mr. Hardy, of the Committee on the Merchant Marine and Fisheries, and has the approval of the committee, as it harmonizes both views.

A detailed statement of all expenditures under the act and of all receipts thereunder shall be submitted to Congress at the beginning of each regular session.

The bill carries an appropriation of $10,000,000 to carry out the provisions of the act.

We shall not discuss the desirability of having an American merchant marine. We will assume there is no difference of opinion on that point. The fact that we pay a sum variously estimated to be from $200,000,000 to $300,000,000 annually to vessels under foreign flags to transport our commerce, which seriously affects our balance of trade, is urged as a sufficient reason why we should have a merchant marine of our own. But this is only one of the many reasons.

The present disturbed conditions in Europe, resulting in the demoralization of shipping under the flags of the belligerents, give emphasis to the need of more merchant vessels under the American flag to meet emergencies such as now exist. Just how to build up our merchant marine has always been the question that vexed us. No one has ever doubted that we can do so, taking into account our vast resources, if we could once agree upon the plan.

This bill is a departure from all plans heretofore presented to Congress to build up our merchant marine. The country is opposed to subsidies, and with good reason.

Mr. President, I submit that this question has never been submitted to the people of this country. Wherever it has been tested out in a State campaign the proponents of the question of subsidies have always been successful. So this ad captandum way of disposing of the question of subsidy I do not accept.

Mr. McLEAN. Mr. President——

Mr. GALLINGER. I yield to the Senator from Connecticut.

Mr. McLEAN. I note the author of that report lays great stress on the fact that the shipping facilities for cotton are very inadequate, and that this affects the present price of cotton.

Mr. GALLINGER. Yes.

Mr. McLEAN. I should like to ask the Senator if he does not think the fact that wheat is selling at $1.46 a bushel, while cotton is selling for 8 cents a pound, disposes of that argument. Is it not a fact that cotton, being a secondary necessity, the consumer, not knowing whether the demand for the future is going to be normal or not, is afraid to buy cotton? If there was the same demand for cotton that there is for wheat, cotton would receive the same transportation facilities wheat has received. Wheat is a prime necessity; the people must have bread. Consequently the future consumption is certain. On the contrary, cotton not being a prime necessity, of course the European consumer is waiting to know whether there will be any demand for cotton or not, and the price of cotton will be just as uncertain as the duration of the war.

Mr. GALLINGER. The Senator's observation is entitled to serious consideration, and at first blush I should say that the Senator's argument is sound. I read further from the report:

Under the artificial stimulus of subsidies a few ships might be built and operated by favored companies at large expense to the Government without adequate returns. The method proposed in recent years has been to amend the ocean mail act of 1891 and pay to vessels of 16 knots speed for ocean mail service the sum of $4 per mile for each outward voyage. This would mean that the Government would pay ocean mail steamers of the type described in the act on voyages to South America about $16,000 for each outward voyage and on voyages to the Orient from $16,000 to $30,000 for each outward voyage. We now pay the four vessels of the American Line—the *New York*, the *Philadelphia*, the *St. Louis*, and the *St. Paul*—in the North Atlantic trade about $735,000 per annum mail subsidy. They are 20-knot vessels.

The Government has no control over the passenger and freight rates charged by the subsidized vessels. They follow the custom of all unregulated lines and charge all the traffic will bear, and this, too, without reference to the cost of the service or what would be a reasonable profit on the investment. The investigation made by this committee into steamship conferences and agreements in the domestic and foreign trade disclosed that for the three years prior to 1913 ocean freight rates increased from 50 to 200 per cent. The cost of the service did not increase in proportion to the increase of the rates. The profits of the regular lines in most of the trade areas during the period were very large. They charged all the traffic would bear.

It is claimed by the lines that ocean freight rates, beginning in 1913, have been receding from their former high level. It may be the rates became so high that the effect was to retard the movement of commerce and lower rates became necessary on that account, and it may be that increase in ocean tonnage, stimulated by the enormous profits, created a sharper competition for the traffic, with the result of lowering the rates. Be that as it may, the fact remains that no restraining hand was laid on the lines, either in the domestic trade or foreign trade, to enforce reasonable rates.

If this bill is enacted into law, it will serve at least a twofold purpose in the trade in which the Government-controlled vessels are employed.

First. These lines will be projected to ports in Central and South America and elsewhere to increase our mail facilities and to meet the growing demands of our foreign commerce.

Second. The corporation or corporations organized to operate these lines will be controlled by the Government through the President and shipping board, and they will have the power to regulate the rates for carrying the mails and for passenger and freight service. It will not be necessary for the Government to furnish vessels to handle all the traffic, nor is it desirable.

It is not desired to create a Government monopoly in the shipping business. Foreign competition can be met in a friendly spirit and on terms fair to foreign shipping and just to ourselves. We should be content if a reasonable portion of our foreign commerce is carried under the American flag, but we are not content to permit 92 per cent of our foreign commerce to be carried under foreign flags with no other limitations on their charges for the service than what the traffic will bear.

Mr. SMITH of Michigan. Mr. President, may I ask the Senator a question?

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Michigan?

Mr. GALLINGER. I yield to the Senator from Michigan.

Mr. SMITH of Michigan. May I ask the Senator, Is it seriously proposed that ships that are owned by private corporations are still to be permitted to navigate the ocean? Is there to be no attempt to monopolize this over-seas commerce, either to Europe or to South America? The report which the Senator has just read indicates that they still propose in some way to allow private corporations to continue in business.

Mr. GALLINGER. Yes; it seems to be a fact that they generously are going to permit that; but another remarkable thing to me is that they are going to regulate the fares and freights. Whether or not they mean they are going to regulate them only on these Government ships, which will be but a moiety of the overseas transportation, is not very clear; but I hardly think they can regulate fares and freights across the oceans of the world on ships owned by private companies. But, as pretty much everything is being regulated these days, perhaps ocean transportation can also be regulated by law.

Mr. SMITH of Michigan. If the Senator will permit me to ask him another question, I desire to say that if they only propose to have a few ships, I suppose that those bottoms will be reserved for the special favorites in the over-seas shipping, and that those who do not happen to come under the favor of the department will be obliged to use the ships owned by private corporations at the rates at which they can profitably carry their freight?

Mr. GALLINGER. I would not say that that would be the result; of course, it might be the result; but I will repeat what I perhaps have twice before said—that with 4,000 and more British ships engaged in carrying cargoes across the ocean, these 30 or 40 ships of ours, distributed all over the world, will never be heard of. Somebody may discover one of them in some port; but they are so negligible as compared with the immense traffic over the Atlantic and Pacific Oceans that it is inconceivable that they will make any impression upon rates or upon anything else.

Mr. SMITH of Michigan. Mr. President, will the Senator permit another interruption?

Mr. GALLINGER. Certainly.

Mr. SMITH of Michigan. I do not wish to interfere with the continuity of the Senator's thoughts, but does the Senator not think that, in order that all shippers may be treated alike and be served by the same instrumentality, the bill ought to provide for the purchase of all over-seas ships that now operate under the American flag? That would give all shippers an equal opportunity to get in before the favored ship departs; otherwise a ship that is to be especially commandeered by the Secretary of the Treasury on its voyage to South American or European ports might find itself so overburdened with traffic that it could not safely make the journey, and the traffic that they were unable to put aboard this Government ship might be compelled to use another medium of transportation less favorable, and therefore, naturally, in selling the products that are carried a discriminatory rate would have to be enforced in order to prove profitable either to the shipper or to the carrier.

Mr. ROOT. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from New York?

Mr. GALLINGER. I yield to the Senator from New York.

Mr. ROOT. May I ask whether that would not be essentially a subsidy?

Mr. SMITH of Michigan. Oh, no.

Mr. ROOT. Would not the effect be that these favored shippers whose products are carried on these few Government ships at lower rates than the market rates would be receiving a subsidy?

Mr. SMITH of Michigan. Of course I have not the floor and I would not interfere with the Senator from New Hampshire, so I will allow him to answer this very pertinent question. However, if I were called upon to answer, I would say that it would not interfere; that it would simply be the practical application of the last Thanksgiving proclamation which emanated from the White House.

Mr. GALLINGER. Mr. President, the suggestion of the Senator from Michigan [Mr. SMITH] is in line with the wise suggestions which the Senator is in the habit of making while we are debating great questions in this body. I quite agree with him that, if the Government is to build 30 or 40 ships and put them in the over-seas trade, putting behind them the influence and power of the Government, it would be no more than right that the Government should buy the four ships that traverse the North Atlantic, the few ships that traverse the Pacific, the line to Venezuela, the United Fruit Co. line, and other lines that have come under the American flag, and give them all a fair show.

Mr. SMITH of Michigan. Exactly.

Mr. GALLINGER. I think that would be a proper thing to do, but it is not proposed to do that.

Mr. SMITH of Michigan. I am not so sure about that.

Mr. GALLINGER. Well, the Senator will examine all these matters for himself. The Senator ought to read the report which I have read to-day—he has not read it and he was not in the Chamber all the time to hear the report read——

Mr. SMITH of Michigan. Mr. President, this is becoming somewhat personal. [Laughter.] May I interrupt the Senator?

Mr. GALLINGER. I yield to the Senator.

Mr. SMITH of Michigan. I read every line in the report before the bill was reported out of the Committee on Commerce. I read what the Senator has not himself read, but what I hope he will read before he takes his seat. I am very familiar with the report, and it was my duty to read it. I do not know that I would have read it as a matter of interesting history or as a matter of good fiscal or economic policy, but I have read it and I was here when it came from the committee.

Mr. GALLINGER. I am delighted to know that one Senator has read this report. I had forgotten that the Senator from Michigan is a prominent member of the Committee on Commerce. Doubtless the report was submitted to the committee before it was presented to the Senate, and I presume that a few members of that committee did either hear it, or pretended to hear it read.

Mr. SMITH of Michigan. I must say, if the Senator will permit me another interruption, that the bill, too, was handed to us fully completed, but we never had much of an opportunity to change it.

Mr. GALLINGER. The bill the Senator saw was not the "completed" bill. The third edition of the bill, recently submitted to the Senate, is now said to be the completed bill. How soon it will be supplanted by another bill I can not say. The report continues:

It is urged that the Government should not engage in the operation of ships, but that the business should be given over to private firms or corporations; that the powers proposed to be vested in the President and the shipping board under the bill are extraordinary and

should be withheld by Congress; that, in view of the fact that the principal maritime nations of Europe are at war, we should be careful to observe our obligations as a neutral and scrupulously avoid any act that would create friction between our Government and the belligerents. Hence out of the abundance of caution we should do nothing in the direction of building up our merchant marine. We will notice these objections in their order.

Why should the Government not purchase or construct merchant vessels and operate them directly or, as proposed in this bill, through a corporation or corporations organized or to be organized and controlled by the Government and operate them for the benefit of the great agricultural, manufacturing, mining, and commercial interests of our country? Efforts have been made ever since the Civil War to restore our mercantile marine to some measure of its ante bellum greatness. These efforts have all failed. It would not serve any useful purpose to recite the causes of the decline of our merchant marine or of our failure to build it up again.

Mr. President, I propose later on to take up that subject in my own way, depending upon the facts of history to show exactly what the causes for that decline were.

The fact confronts us that we have less than 1,000,000 tons of shipping in the foreign trade, and our flag at the masthead of an American merchant vessel is unknown in most of the ports of the world. And now, with our foreign commerce paralyzed by the war in Europe, with new and profitable fields opening up and inviting us to enter them, private capital and enterprise are not forthcoming to meet the existing emergency.

It is worthy of remark that every bill pending before the committee provides for Government ownership in some form, and every proposition submitted for the consideration of the committee has as its basis the suggestion that the Government shall finance the projects, either by guaranteeing the bonds or in some other way lend them the credit of the Government. We find no fault with the demand or the necessity for it on the part of private interests.

We talk a great deal about subsidy; it has become almost a byword. Every time we make a suggestion that the Government might in some way help out the American merchant marine the word "subsidy" is iterated and reiterated. Now, listen to this:

It is worthy of remark that every bill pending before the committee provides for Government ownership in some form, and every proposition submitted for the consideration of the committee has as its basis the suggestion that the Government shall finance the projects, either by guaranteeing the bonds or in some other way lend them the credit of the Government. We find no fault with the demand or the necessity for it on the part of private interests.

That sounds like subsidy. What else can it be? They can not do this business without the credit of the Government being back of it, and it is proposed to put the credit of the Government back of it, and to have the Government finance the project. Mr. President, that is the worst kind of subsidy, almost as bad as buying the cotton crop of the South.

The war in Europe has not only demoralized commerce but credits as well, and however much enterprising citizens and corporations may wish to meet the demands in the present emergency without Government aid, they seem to be powerless to do so without Government aid. Hence the rational course for the Government to pursue to meet the present emergency is to utilize its resources in such manner as will inure to the benefit of all the people.

I want to read that paragraph again:

The war in Europe has not only demoralized commerce but credits as well, and however much enterprising citizens and corporations may wish to meet the demands in the present emergency without Government aid, they seem to be powerless to do so without Government aid. Hence the rational course for the Government to pursue to meet the present emergency is to utilize its resources in such manner as will inure to the benefit of all the people.

"Government aid"! It is subsidy when some of us ask for it, but a great patriotic act on the part of the Government when other people ask for it.

Mr. C. J. Owens, managing director of the Southern Commercial Congress, appeared before the committee and approved the bill and submitted a paper prepared by Mr. B. M. Baker, of Baltimore, a gentleman of wide experience in dealing with all problems affecting ocean transportation, suggesting that the Government, through a director of transportation, charter the ships purchased or constructed by the Government to corporations or individuals, who would furnish as security 20 per cent cash of the cost of the vessels transferred to them under charter and pay in advance as charter money 8 per cent per annum for such vessels as should be assigned to them, the vessels to be employed in such direct lines of service as would be acceptable to the Government; all rates and conditions and contracts to be under the control of the Interstate Commerce Commission; no one corporation or firm to be allowed to charter in excess of $5,000,000 in value of the ships owned and controlled by the Government. Mr. Baker's suggestions are worthy of very careful consideration by the shipping board, who are accomplishing the purposes set out in the bill.

I know Mr. Baker well. He is an experienced shipping man, but I know also that Mr. Baker has held a great many different views on the subject of rehabilitating the American merchant marine. The last bill which I presented and championed in this body looking to a betterment of the merchant marine was supported by Mr. Baker.

If private capital is ready and willing to take over this business if the Government will furnish the ships, why would it not be better for our great commercial and manufacturing centers to take 49 per cent of the capital stock in the corporation or corporations that may be organized under this bill and accomplish the same purpose?

The Government, through stock ownership and the shipping board, would retain control over the corporation and accomplish in a simple and direct way all that could be accomplished through the Interstate Commerce Commission. Later on the Committee on the Merchant Marine and Fisheries will propose to Congress comprehensive legislation to bring all common carriers by water under the control of the Interstate Commerce Commission, but it is not practicable to do so in this emergency legislation.

We have no doubt that the shipping board will exercise the powers vested in them with discretion and one regard for the public welfare.

We are in accord with those who feel that it is better, whenever practicable, for the Government to avoid engaging in any business that can be conducted as a private enterprise. But, as stated, private enterprise has failed to respond to the demands of our over-sea commerce. How much longer must we wait?

But it is said that we are vesting too much power in the President and shipping board. A canal through the Isthmus of Panama connecting the Atlantic and Pacific Oceans was the dream of centuries. The great De Lesseps at the head of a private corporation with large resources failed to construct. The Government of the United States undertook the stupendous task a little over 10 years ago, and the greatest engineering feat in the world's history is an accomplished fact. The Congress vested in the President of the United States the authority to construct the canal and provided him with the funds to do so, and the work is done and the Government will control and regulate this gateway of commerce for all time. Private capital and enterprise were unwilling or unable to undertake to develop the rich resources of Alaska. At this session of Congress an act has been passed authorizing an expenditure of $40,000,000 to build railroads in Alaska to develop its resources. So what is proposed here is not an innovation. It is in line with these other great undertakings of the Government.

The Panama Canal act and the act authorizing the construction of railroads in Alaska vest in the President vast powers. That power, as far as the Panama Canal is concerned, has been exercised wisely and for the public good, and we feel assured the same will be true as regards the construction of railroads in Alaska.

Are the duties and responsibility vested in the President and shipping board under this bill so much greater in scope or difficult of execution than those vested in the President under the Panama Canal act or the act for the construction of railroads in Alaska that we should withhold them, urgent as is the demand that we do something for our merchant marine? Is an American owned and controlled merchant marine less important to our national welfare than the Panama Canal or railroads in Alaska?

Mr. President, there is a difference. When the Panama Canal was built it did not enter into competition with any other canal owned by private parties. When the railroad in Alaska shall be built, if it ever is, it probably will absorb the existing railroads in that Territory, because I understand the Government is now negotiating for their purchase, so that there will be no competition there. It is very different when the Government goes into competition with private shipping corporations in the matter of over-seas commerce:

It is not intended by this bill to discourage private enterprise, but to aid it.

We need not expect smooth sailing in our efforts to build up an American mercantile marine in the foreign trade. The task has been neglected too long.

We do not expect support for this bill from those who believe there is no other way to build up our merchant marine than by granting subsidies or subventions.

Then, again, there are thoughtful, prudent, and patriotic people who say we should exercise great care in our efforts to build up our merchant marine at this time. They caution us not to violate any of our duties or responsibilities as a neutral power. Their words of warning are entitled to our thoughtful consideration, but should not influence us to the extent of causing us to sit down, fold our hands, and do nothing until peace is restored in Europe. In other words, rather than hazard the possibility of a misunderstanding with one or more of the belligerents, some would have us make no effort to repair the damage done to our industries and commerce by the war in Europe or to exercise any of our rights as a neutral power. We have rights as neutrals as well as duties to be observed.

It will be noticed that the author of this report says, and I repeat the words—

In other words, rather than hazard the possibility of a misunderstanding with one or more of the belligerents, some would have us make no effort to repair the damage done to our industries and commerce by the war in Europe, or to exercise any of our rights as a neutral power.

A plain acknowledgment that we do hazard our rights as a neutral power in the legislation that is proposed.

Fears are expressed that we will involve ourselves in complications with Great Britain and France if we buy German ships. That may be. The bill does not direct the shipping board to buy ships of the subjects of any particular nation. They have the widest discretion in the purchase or construction of vessels. We have no reason to believe they will act otherwise than with the greatest care in whatever they may do.

Why, Mr. President, if it were known in certain financial circles in New York that there is no intention to buy those German ships, certain men would go in sackcloth and ashes for the next 30 days.

The President will have the State Department to advise him on all questions affecting our right and duties as neutrals. The belligerents have their diplomatic representatives in Washington through whom objection to any proposed purchase may be made, and we should assume that the President and shipping board will avail themselves of all sources of information before acting.

It may be well, however, for the benefit of those who seem to think we have no rights as a neutral power to buy ships of belligerents to call attention to international law governing the sale of enemy ships to subjects of neutral States.

After listening to the magnificent addresses of the senior Senator from New York [Mr. ROOT] and the senior Senator from Massachusetts [Mr. LODGE], I am greatly interested in knowing exactly where the author of this report finds any

justification for a different view from that advanced by those two distinguished Senators. I am reading this report for information, and I hope Senators will listen to it, because it will raise a question, I apprehend, between the authorities that are given here and the views of the Senators from New York and Massachusetts; and it may result in enlivening this debate, and in educating some of us who know little about international questions and certainly nothing about international law, if those two Senators will gratify us by speaking to the subject again before this debate closes. The report continues:

We quote from International Law, Oppenheim, edition 1912, volume 2, pages 117 and 118, "War and neutrality," "Transfer of enemy vessels":

"SEC. 91. The question of the transfer of enemy vessels to subjects of neutral States, either shortly before or during the war, must be regarded as forming part of the larger question of enemy character, for the point to be decided is whether such transfer divests these vessels of their enemy character. It is obvious that, if this point is answered in the affirmative, the owners of enemy vessels can evade the danger of having their property seized and confiscated by selling their vessels to subjects of neutral States. Before the declaration of London, which is, however, not yet ratified, the maritime powers had not agreed upon common rules concerning this subject. According to French practice, no transfer of enemy vessels to neutrals could be recognized, and a vessel thus transferred retained enemy character; but this concerned only transfer after the outbreak of the war; any legitimate transfer anterior to the outbreak of war did give neutral character to a vessel. According to British and American practice, on the other hand, neutral vessels could well be transferred to a neutral flag before or after the outbreak of war and lose thereby their enemy character, provided that the transfer, took bona fide, was not affected either in a blockaded port or while the vessel was in transitu, the vendor did not retain an interest in the vessel or did not stipulate a right to recover or repurchase the vessel after the conclusion of the war, and the transfer was not made in transitu in contemplation of war."

From reading some of the speeches made in the House when the war-risk insurance bill was under consideration, it might be doubted if we have any rights as neutrals.

In the interest of a well-informed public opinion on this subject, and that doubting Thomases may be convinced that we really have some rights that belligerents are bound to respect, we quote (International Law, Oppenheim, "War and neutrality," vol. 2, edition 1906):

"SEC. 297. Neutrality as an attitude of impartiality involves the duty of assisting neither belligerent either actively or passively, but it does not comprise the duty of breaking off all intercourse with the belligerents. Apart from certain restrictions necessitated by impartiality, all intercourse between belligerents and neutrals takes place as before, a condition of peace prevailing between them in spite of the war between the belligerents. This applies particularly to the working of treaties, to diplomatic intercourse, and to trade. But indirectly, of course, the condition of war between belligerents may have a disturbing influence upon intercourse between belligerents and neutrals. Thus the treaty rights of a neutral State may be interfered with through occupation of enemy territory by a belligerent; its subjects living on such territory bear enemy character; its subjects trading with the belligerents are hampered by the right of visit and search and the right of the belligerents to capture blockade runners and contraband of war.

"SEC. 314. There are two rights and two duties deriving from neutrality for neutrals, and likewise two for belligerents. Duties of neutrals are, first, to act toward belligerents in accordance with their attitude of impartiality; and, secondly, to acquiesce in the exercise on the part of either belligerent of his right to punish neutral merchantmen for breach of blockade, carriage of contraband, and carriage of analogous of contraband for the enemy, and accordingly to visit, search, and eventually capture them.

"The duties of either belligerent are, first, to act toward neutrals in accordance with their attitude of impartiality; and, secondly, not to suppress their intercourse, and in especial their commerce, with the enemy.

"Either belligerent has a right to demand impartiality from neutrals, whereas, on the other hand, neutrals have a right to demand such behavior from either belligerent as is in accordance with their attitude of impartiality. Neutrals have a right to demand that their intercourse, and in especial their commerce, with the enemy shall not be suppressed; whereas, on the other hand, either belligerent has the right to punish subjects of neutrals for breach of blockade, carriage of contraband, and the like, and accordingly to visit, search, and capture neutral merchantmen.

"SEC. 398. The guaranteed freedom of commerce making the sale of articles of all kinds to belligerents by subjects of neutrals legitimate, articles of conditional as well as absolute contraband may be supplied by sale of either belligerent by these individuals. And the carriage of such articles by neutral merchantmen on the open sea is, as far as international law is concerned, as legitimate as their sale. The carrier of contraband by no means violates an injunction of the law of nations. But belligerents have by the law of nations the right to prohibit and punish the carriage of contraband by neutral merchantmen, and the carrier of contraband violates, for this reason, an injunction of the belligerent concerned. It is not international law, but the municipal law of the belligerents, which makes carriage of contraband illegitimate and penal.

"The question why the carriage of contraband articles may, nevertheless, be prohibited and punished by the belligerents, although it is quite legitimate as far as international law is concerned, can only be answered by a reference to the historical development of the law of nations. In contradistinction to former practice, which interdicted all trade between neutrals and the enemy, the principle of freedom of commerce between subjects of neutrals and either belligerents has gradually become universally recognized; but this recognition included from the beginning the right of either belligerent to punish carriage of contraband on the sea. And the reason obviously is the necessity for belligerents in the interest of self-preservation to prevent the import of such articles as may strengthen the enemy, and to confiscate the contraband cargo, and eventually the vessel also, as a deterrent to other vessels.

"The present condition of the matter of carriage of contraband is therefore a compromise. In the interest of the generally recognized principle of freedom of commerce between belligerents and subjects of neutrals, international law does not require neutrals to prevent their subjects from carrying contraband; on the other hand, international law empowers either belligerents to prohibit and punish carriage of contraband in the same way as it empowers either belligerents to prohibit and punish breach of blockade."

We should assume that the President and shipping board, in the exercise of any powers granted or duties imposed by this bill, will keep well within our rights as neutrals.

Many of the lines now seeking shelter under the American flag, although American owned, may when the present crisis is passed again pass under foreign flags if it is to their pecuniary advantage to do so.

While we need merchant ships to meet the present emergency, let us pursue a policy that will secure them to us after the present conflict in Europe is passed.

The following table may prove interesting as showing our trade relations with Central and South America at the time the table was prepared. We understand conditions have not changed materially since 1911.

I ask permission to print that table without reading, if the Senate will grant it.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

Trade between the United States and nations of Central America, Mexico, South America, and the West Indies.

[Imports and domestic exports for the year 1911 into and from the United States. Foreign commerce and navigation 1911, 1091–1124.]

Country.	Imports into the United States.	Exports from the United States.
Nations which by treaty enjoy equal rights with the United States as to direct and indirect trade:		
Honduras	$2,657,009	$2,036,424
Costa Rica [1]	4,838,416	3,434,844
Colombia	8,994,460	4,836,262
Bolivia	327	891,593
Paraguay	34,516	86,986
Argentina	29,090,732	43,753,424
Total	45,615,460	55,099,533
Mexico	57,450,111	60,247,097
Guatemala	2,562,488	2,400,383
Salvador	1,463,792	2,090,053
Nicaragua	1,442,299	2,452,945
Panama	3,506,735	20,790,661
Cuba	110,309,468	59,962,955
Haiti	813,713	5,226,640
Dominican Republic	3,632,453	3,741,197
Venezuela	7,635,256	3,739,030
Ecuador	3,628,805	2,234,998

Brazil	100,867,184	27,150,672
Chile	19,941,000	12,037,140
Uruguay	1,613,736	5,262,367
Total	324,181,070	212,934,742
Grand total	369,796,530	268,034,275

[1] Treaties protect only the direct trade.

Mr. GALLINGER (reading)—

The following summary of the Latin-American trade situation, prepared by Hon. John Barrett, director general of the Pan American Union, may be interesting and instructive, as it is of recent date.

Following the receipt by cable this morning (September 6) from Latin-American capitals of the latest commercial data, Director General Barrett, of the Pan American Union, has prepared without delay, for the information of the United States commercial interests, a revised compilation of the very latest figures of Latin-American commerce, of which a brief summary is given below:

The 20 Latin-American countries of Central and South America conducted in 1913 a foreign commerce valued, approximately, at $3,000,000,000. The exact total was $2,870,188,575. Of this total the imports were valued at $1,304,261,736 and the exports at $1,565,916,812. This gives Latin America a favorable balance of $261,655,049.

Of the principal sources of origin of Latin-American imports Great Britain furnishes products valued at $322,036,347; United States, $317,323,294; Germany, $216,010,418; France, $103,220,223; Italy, $55,494,413; Belgium, $48,747,164; Austria-Hungary, $9,026,478; Netherlands, $8,293,859; Switzerland, $6,189,050; all other countries, $217,290,517. Although the United States ranks second, the possibilities for building up its trade are shown by the fact that the total of Latin-American imports, aside from those coming from the United States, amounts nearly to $1,000,000,000, or exactly $986,938,469.

The exports of Latin America, the European market for which is now greatly lessened by the war, amounted in 1913, approximately, to $1,566,000,000. Of this total the United States was the greatest purchaser, taking products valued at $504,378,212. Then came other countries as follows: Great Britain, $316,419,914; Germany, $192,394,702; France, $120,907,415; Belgium, $62,557,566; Netherlands, $43,277,631; Italy, $27,964,001; Austria-Hungary, $23,294,991; all other countries, $247,722,380. Although, therefore, it will be seen that Latin America sells in large quantities to North America, she exports to other countries, the majority of which are engaged in war, products valued at $1,061,538,600.

These statistics are obvious evidence of the present United States responsibility and opportunity in Latin-American commerce, and of the immediate necessity of a readjustment of international trade conditions for the benefit not only of the United States, but of the Latin-American countries.

As a part of the report there is appended Senate Document 601, Sixty-third Congress, second session, entitled "American Merchant Marine, an article prepared by the Southern Com-

mercial Congress on the proposed establishment of a merchant marine," which I will read:

The Committee on the Merchant Marine of the House of Representatives in its report of September 8, 1914, on the Government ownership and operation of merchant vessels in the foreign trade of the United States said:

"We shall not discuss the desirability of having an American merchant marine. We will assume that there is no difference of opinion on that point."

No one can honestly take issue with that statement of the committee.

In order to establish an American merchant marine the above committee, after full deliberation, favorably reported a bill authorizing the Government, acting through a shipping board composed of members of the Cabinet, under the direction of the President, to acquire and operate merchant vessels in the foreign trade of the United States, these vessels also to be available as naval auxiliaries.

There is an idea abroad that this bill is a war emergency measure. This is not so. In its report the committee says:

"The fact that we pay a sum variously estimated to be from $200,000,000 to $300,000,000 annually to vessels under foreign flags, to transport our commerce, which seriously affects our balance of trade, is urged as a sufficient reason why we should have a merchant marine of our own; but this is only one of many reasons."

Long before the beginning of the present war the need for an American merchant marine was so keenly felt that the Senate passed a bill known as the Weeks bill, which proposed to use naval vessels as a nucleus for an American merchant marine.

Objections to the shipping bill now before Congress has developed from two sources. It was to be expected that there would be objection by shipping interests which have been reaping the benefit of American inactivity in the foreign shipping trade. It was also to be expected that certain financial interests and their affiliations, especially those interested in foreign shipping, would object to a Government merchant marine.

Opponents to the bill have advanced arguments to sustain their position, but not one of them will stand analysis. Many newspapers and periodicals are opposing the bill, but the fact that they enjoy considerable advertising and other patronage from the steamship lines and the financial interests that are opposing the bill may go far toward explaining their position on this great question of an American merchant marine.

Mr. President, that is a serious charge against the newspapers of the country, inasmuch as not only the great newspapers in New York, Boston, and Philadelphia are opposing this bill, but the truth is that all over the country newspapers that can not by any possibility derive any financial benefit from advertising for the shipping interests of the country are opposing it, and the fact is significant.

(1) Opponents to the bill say that there are a large number of ships at present in American harbors unable to get cargoes; hence there is no need for a Government merchant marine.

A recent investigation has proven this not to be true. Ships seek cargoes at all times, but the present chartering market is very firm, and when the question of foreign credits is settled and commerce begins to move, as it must very shortly, there will be a positive famine in ships, as over 5,000,000 tons of German and Austrian shipping are completely out of commission, to say nothing of the large number of British, French, and Russian merchant ships which have been taken over by their respective Governments for transports and naval auxiliaries.

There are, all told, considerably less than 100 American ships in the foreign trade in the whole world, including all of the ships which have just taken American registry to secure the protection of the flag on account of the war.

I think, Mr. President, the author of this paper will revise his figures when he makes a careful inquiry concerning the number of American ships that are now engaged in the foreign trade in the whole world, and will place the figure at a very much higher number.

None of these ships are idle. Therefore, even though there were hundreds of idle ships in every American harbor, it would not alter the necessity for passing the shipping bill now before Congress, as all such ships would be foreign ships, and the object of this bill is to establish an American merchant marine.

(2) Opponents to the bill say that if the Government will not enter the shipping business private capital will provide an American merchant marine.

This is rather inconsistent with their statement that the harbors are full of idle ships, for, if that is true, private capital will find no attraction in the shipping business.

What likelihood is there to obtain private capital for this new business, especially to the amount contemplated by the shipping bill, $40,000,000, when long-established, going concerns find it impossible to obtain money except at heavy rates?

When the city of New York must pay 7 per cent, including bankers' commissions, for a loan of $100,000,000; when the State of Tennessee found it most difficult to obtain a loan of $1,400,000, it is quite certain that private capital will be unable to provide an American merchant marine, especially as it did nothing in the matter while the opportunity was open during the past 50 years.

(3) Opponents to the bill say that the Government will lose much money in this business.

This argument has been their favorite one. The bugaboo of increased taxes, "loss of the initial investment every three years," and much more of the same nature has been circulated in an effort to defeat the bill.

The shipping business is one of the most profitable in the world. Special Diplomatic and Consular Reports, page 39, says:

"The White Star Line, in 1910, earned a net profit of £540,000 on a capital of £750,000 after writing off £370,016 for depreciation. A dividend of 30 per cent was paid in that year."

The Holland Amerika Line earned about 50 per cent net on its capital during the fiscal year of 1913. The Hamburg-American Line earned about 30 per cent net during its fiscal year of 1913. These are only a few specific instances of steamship-line earnings. They are not at all unusual, but are the regular thing in the shipping business.

F. E. Dixon & Co., of London, who own and operate a large fleet of "tramp" freighters, showed earnings of about 50 per cent net last year, which proves that steamship earnings are large in the irregular services as well as in the regular lines. In fact, the profits in the steamship business are so large that frequently the entire cost of a ship is earned in two years.

Now, Mr. President, think of that! Yet private parties and private corporations will not engage in the business when it is said the profits are so large that the entire cost of the ship is earned in two years. It is absurd on the face of it.

The question will arise, Why have not Americans gone into such profitable business? The answer is, For the same reason that Americans have neglected the vast foreign export trade. They have been too busy with their industries at home.

But, unlike the export trade, which each manufacturer can work up individually, to establish an adequate merchant marine is so large an undertaking at this time and involves so large an amount of money that if it is to be done at all it must be done by the Government.

(4) Opponents to the bill say that there will be danger of the United States violating neutrality if it operates merchant ships at this time.

The report of the Committee on the Merchant Marine says:

"We have rights as neutrals as well as duties to be observed. * * * The President will have the State Department to advise him on all questions affecting our rights and duties as neutrals. * * * We should assume that the President and shipping board, in the exercise of any powers granted or duties imposed by this bill, will keep well within our rights as neutrals."

On this point the Secretary of the Treasury, Mr. McAdoo, also says:

"The board proposed in this bill consists really of the President of the United States and certain Cabinet officers therein mentioned. I think there is no more punctilious citizen of the United States with respect to the neutrality of this country than the President of the United States. I think you may safely depend on it, if this bill is passed and this board is vested with power to act, that that power will be exercised in such a way that the neutrality of this country will be preserved."

(5) Opponents to the bill make an alternative proposition that we should build up an American merchant marine by granting subsidies.

Subsidy seekers have managed to create a belief that the merchant marines of European countries, especially the merchant marines of the two greatest maritime countries in the world, Great Britain and Germany, have been built up by granting subsidies to its shipping. Neither of these countries grants subsidies except to a very limited extent and for very special service.

Mr. President, Great Britain grants to its shipping in various forms $10,000,000 a year. It does not make any great difference whether it is in subsidies or in mail subventions or in any other way, she makes that contribution to the shipping of the Empire, and we are up against it to that extent.

The Hamburg-American Line, the largest and perhaps the most successful steamship company in the world, has never received a subsidy.

Possibly not a direct subsidy, Mr. President, and yet the German Government, owning the railroads of the Empire, grants all kinds of concessions to the shipping interests of Germany in the way of reduced rates on the carriage of their products, and in various other ways they grant subventions to the shipping interests of that country.

A moderate subsidy was granted by Great Britain to the Cunard Co. in connection with the steamers *Mauretania* and *Lusitania*, but that was chiefly to keep the Cunard Co. from selling out to the International Mercantile Marine, the combination organized by J. P. Morgan & Co. Over 90 per cent of the total tonnage of Great Britain does not receive a farthing of subsidy.

A modest subsidy indeed. It is a notorious fact that the English Government advanced $13,000,000 to build the *Mauretania* and *Lusitania*, with the provision that it should be paid back, I believe, at the rate of 2 per cent by the owners of those great vessels if they ever got ready to pay it back; and it was to be paid back in the shape of mail subventions. Suppose the Government of the United States should put up one-half that amount to allow the New York Shipbuilding Co. to build two great ocean greyhounds, what would be said about it? Yet they say it was not a subsidy to the Cunard Co.

It has been to me rather amusing and irritating sometimes to have this constant iteration of the statement that no subsidies are paid to the shipping of foreign countries, when the truth is that Great Britain alone pays annually over $10,000,000, and the entire amount that Great Britain, Germany, France, Japan, and other nations pay aggregate at least $50,000,000. Turn to the report of the Commissioner of Navigation and see what he says about that. Yet a gentleman representing the Southern Commercial Congress repeats parrotlike the statement that the merchant shipping of Great Britain and Germany is not receiving any subsidies or subventions from their Government. The author of that statement is either not well informed, or he is not honest in his views.

Mr. SMITH of Michigan. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Michigan?

Mr. GALLINGER. I yield.

Mr. SMITH of Michigan. Just for a question. I desire to ask the Senator if it is not true that many of the critics on the other side of the Chamber of the subsidy plan voted in the last tariff law to give a preference to shipments made in American

bottoms? To be sure, the department has very wisely held, I think, that that exemption interferes with our treaty rights or treaty obligations, but nevertheless that constituted, did it not, a subsidy? Is not that the Senator's opinion?

Mr. GALLINGER. Mr. President, I have to-day stated, as I have stated several times before, that from my viewpoint, if the Government is to receive a dollar in import duties and it goes into the Treasury of the United States, and the Government pays out 5 cents of it, it is not different from having it halted before it gets into the Treasury of the United States, out of which 5 cents is taken and given to the shipping. I can not see any difference in the principle. Of course, it is in the nature of a subsidy.

Mr. SMITH of Michigan. It is a sort of preferential duty, and to that extent must it not constitute a subsidy?

Mr. GALLINGER. Undoubtedly so. I will now conclude the reading of this report:

> It will surprise many to know that the United States pays a larger subsidy to four American ships owned by the International Mercantile Marine, namely, the *New York, Philadelphia, St. Paul,* and *St. Louis,* than is paid by any foreign nation for similar service—

The author of this paper has made a discovery that no one else has ever discovered—

> This country pays to these ships an annual subsidy of about $735,000, and obtains practically nothing in return for this except the carrying of the mails on these steamers, which, at regular rates, would amount to only a trifling fraction of the amount of the subsidy. As a matter of fact, most of our mail goes forward on foreign ships, as they are much faster and they sail more frequently, the subsidized American ships being among the smallest and most out-of-date steamers in the North Atlantic trade.

We are paying, Mr. President, a little over the amount to foreign ships that we have paid to American ships for the carriage of our mails; but the report of the committee which I have read to-day frankly says that is because we have not American ships to do the work. The principle of giving a mail subvention to ships is a universal custom among the maritime nations of the world, and to say that the subventions to these American ships for the carriage of the mails is larger than the subvention paid to the ships of Great Britain is an absurdity not worthy of discussion.

> The extraordinary large profits in the steamship business show that steamships can be operated profitably under the American flag without a subsidy, in spite of the somewhat higher wages and better living requirements of American seamen; therefore it will be well-nigh impossible to obtain a subsidy simply to make up the extra profits possible under foreign flags.

Mr. President, the gentleman writing this paper is an official of the Southern Commercial Congress, and I wish to inquire of that gentleman, or some one in his behalf, why, if this be so, he does not invite the congress which he represents, composed of business men, not only in the South but, to some extent, in the North, to go into this business of shipping?

> The extraordinary large profits in the steamship business show that steamships can be operated profitably under the American flag without a subsidy, in spite of the somewhat higher wages and better living requirements of American seamen; therefore it will be well-nigh impossible to obtain a subsidy simply to make up the extra profits possible under foreign flags. For the same reason we will never have an American merchant marine unless it is established by the Government, because such private capital as may go into the foreign shipping business will operate under foreign flags to get the benefit of cheaper operation when the dangers of war are passed.
>
> The present war has made it possible to secure, at most favorable prices, an excellent choice of modern, up-to-date steamers of different nationalities, also many steamers not yet out of the builders' hands, hence not yet nationalized, at less than the contract price. Also, as a result of the war, the financial success of the enterprise is more fully assured, as we will not have the competition of the warring nations to the same extent that we would have in times of peace.

Does anyone believe that this handful of ships the Government is either going to build or buy will have any appreciable influence upon the great trade over the oceans of the world, when England alone has four or five thousand cargo ships engaged in that trade and is to-day rapidly building more ships? This writer continues:

> The $40,000,000 called for by the shipping bill will not be an expense, as the bill's opponents are pleased to call it, but it will be an investment of the first class, without considering the enormous advantage to the whole people of the United States in having an American merchant marine under Government control and the great reduction in rates that will be possible, as the Government will not desire net earnings of from 30 to 50 per cent on its investment, but will be content with only a fair return.
>
> It would be little short of a political and economic crime if we did not avail ourselves of the present almost unbelievable opportunity to do in a most practical manner that which Congress was endeavoring to do before the commencement of the war as best it could by means of the Weeks bill.

Mr. President, the custom of the Senate has been of late to meet at 11 o'clock and take a recess at 6 o'clock. The hour of 6 o'clock has passed, and I wish to inquire of the other side whether they propose to take a recess or an adjournment at this hour?

The PRESIDING OFFICER (Mr. OVERMAN in the chair). The Senator from New Hampshire asks the Senator from Indiana [Mr. KERN] a question.

Mr. GALLINGER. I observe, Mr. President, that the Senator from Indiana did not hear me. I stated that the custom of late had been that the Senate should convene at 11 o'clock and take a recess or adjournment not later than 6 o'clock. I do not know whether or not for any reason that rule has been departed from.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Florida?

Mr. GALLINGER. I do.

Mr. FLETCHER. I will say that we do not desire to take a recess now; we wish to proceed until at least 9 o'clock before we take a recess.

Mr. GALLINGER. Well, Mr. President, I think we ought to repeal all our eight-hour laws on the statute books if that is the decision of the majority of this body. It is not going to shorten this discussion by imposing arbitrary and cruel conditions upon the minority, and I hope the majority will reconsider their decision.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Utah?

Mr. SMOOT. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary proceeded to call the roll, and called the name of Mr. ASHURST.

Mr. FLETCHER. I make the point of order that there has been no business transacted since the last call for a quorum.

Mr. GALLINGER. The roll call has commenced.

Mr. SMOOT. The roll call has begun.

Mr. FLETCHER. There has been no response; and I make the point of order.

The PRESIDING OFFICER. The present occupant of the chair has but recently assumed the chair, and does not know what has taken place in the Senate.

Mr. FLETCHER. Nothing has taken place except the Senator from New Hampshire [Mr. GALLINGER] has been speaking.

Mr. SMOOT. I do not particularly care to bring the question before the Senate at this time.

Mr. FLETCHER. Then the Senator had better withdraw his suggestion.

The PRESIDING OFFICER. The Senator from Florida, the Chair thinks, has the floor. Does the Senator from Florida yield to the Senator from Utah?

Mr. SMOOT. I will yield, then, until the Senator from Florida gets through.

Mr. FLETCHER. I simply desired to raise the point of order, as the Senator from Utah suggested the absence of a quorum, that——

Mr. SMOOT. I do not particularly care to raise a question at this time on the point, and I am perfectly willing to ask unanimous consent that it be now withdrawn. If it is satisfactory, Mr. President, I ask that my request for a quorum be withdrawn at this time.

Mr. FLETCHER. Mr. President, I do not care to put the situation exactly as the Senator from Utah may want it. I do not want any business to transpire. That is the reason why I have made the point of order. To have the question ruled on by the Chair and to ask unanimous consent for something is business. That may be the purpose of the Senator from Utah.

Mr. SMOOT. No; the Senator from Florida mistakes the object of the Senator from Utah. The Senator from Utah does not want to take any advantage at all of the Senator from Florida, nor does he want that question discussed to-night. Therefore, as I understood the Senator from New Hampshire has yielded the floor——

Mr. GALLINGER. No; I have not yielded the floor at all.

Mr. SMOOT. Do I understand that the Senator from New Hampshire has not yielded the floor?

Mr. GALLINGER. I have not. I made a suggestion to Senators on the other side of the Chamber as to what the purpose was. We have not been notified that we were to be held here to an unusual hour to-night, and so I made an inquiry; that was all. I have not yielded the floor.

Mr. SMOOT. Then I was mistaken. I thought the Senator from New Hampshire had yielded the floor.

The PRESIDING OFFICER. The absence of a quorum has been suggested.

Mr. SMOOT. Therefore, if I am mistaken as to the situation——

The PRESIDING OFFICER. The Senator from Utah asks unanimous consent to withdraw the suggestion of the absence of

a quorum. The Chair thinks it doubtful whether or not the request is in order; but the Chair will rule, if there is no objection, that the Senator has permission to withdraw his suggestion as to a quorum. The Senator from New Hampshire [Mr. GALLINGER] claims that he is entitled to the floor, and the Chair so rules.

Mr. GALLINGER. Mr. President, as I have occupied the floor for 7 hours and 20 minutes to-day, while I am about as fresh as when I began, and could accommodate our friends on the other side for another 7 hours, if they wanted to not listen to me, and inasmuch as I shall have abundant opportunity later on to continue the discussion, I yield the floor for the day.

Mr. SMOOT. Now, Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested.

Mr. FLETCHER. I do not see that the suggestion is any more in order now than it was before. No business has intervened. The Senator from New Hampshire simply yields the floor. There has been no further business; and I make the point of order that the suggestion of the Senator from Utah [Mr. SMOOT] is not in order.

Mr. GALLINGER. That is business.

Mr. SMOOT. A Senator yielding the floor is not taking him off the floor; the whole question is open before the Senate for any business to be attended to.

Mr. GALLINGER. For anything.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hitchcock	Overman	Sterling
Bristow	Hollis	Page	Swanson
Chilton	Hughes	Perkins	Thompson
Clapp	James	Pittman	Thornton
Crawford	Jones	Pomerene	Tillman
Cummins	Kern	Sheppard	Walsh
Dillingham	La Follette	Shively	Williams
Fletcher	Lee, Md.	Simmons	
Gallinger	Martin, Va.	Smith, Ariz.	
Gore	Martine, N. J.	Smoot	

Mr. THORNTON. I am requested to announce the necessary absence of my colleague [Mr. RANSDELL], and ask that this announcement stand for the remainder of the day.

The PRESIDING OFFICER. Thirty-seven Senators have answered to their names. There is not a quorum present. The Secretary will call the names of the absentees.

The Secretary called the names of the absent Senators, and Mr. CLARK of Wyoming, Mr. JOHNSON, Mr. REED, Mr. SAULSBURY, Mr. SHAFROTH, Mr. SMITH of Georgia, Mr. STONE, and Mr. WHITE answered to their names when called.

Mr. BRYAN, Mr. SHIELDS, Mr. THOMAS, and Mr. LIPPITT entered the Chamber and answered to their names.

The PRESIDING OFFICER. Forty-nine Senators have answered to their names. A quorum of the Senate is present.

Mr. KERN. I move that at not later than 9 o'clock this evening the Senate take a recess until 11 o'clock to-morrow morning.

The PRESIDING OFFICER. The question is on the motion of the Senator from Indiana, that at not later than 9 o'clock the Senate take a recess until to-morrow morning at 11 o'clock.

Mr. OLIVER and Mr. SMOOT. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. JOHNSON (when his name was called). I transfer my general pair with the junior Senator from North Dakota [Mr. GRONNA] to the senior Senator from Alabama [Mr. BANKHEAD] and vote "yea."

Mr. SAULSBURY (when his name was called). I transfer my pair with the junior Senator from Rhode Island [Mr. COLT] to the junior Senator from Louisiana [Mr. RANSDELL] and vote "yea."

Mr. SMITH of Georgia (when his name was called). I transfer my pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from South Carolina [Mr. SMITH] and vote "yea."

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Kentucky [Mr. CAMDEN] and vote "yea." I ask that this announcement stand for the day.

Mr. WALSH (when his name was called). I have a general pair with the Senator from Rhode Island [Mr. LIPPITT], but by its terms I am privileged to vote when it is necessary to make a quorum. Apparently that condition exists, and accordingly I vote "yea."

The roll call was concluded.

Mr. BRYAN (after having voted in the affirmative). I transfer my pair with the junior Senator from Michigan [Mr. TOWNSEND] to the junior Senator from Georgia [Mr. HARDWICK] and will let my vote stand.

Mr. JAMES (after having voted in the affirmative). I transfer my pair with the Senator from Massachusetts [Mr. WEEKS] to the Senator from Illinois [Mr. LEWIS] and allow my vote to stand.

Mr. CHILTON. I transfer my pair with the Senator from New Mexico [Mr. FALL] to the Senator from Nevada [Mr. NEWLANDS] and vote "yea."

Mr. SIMMONS (after having voted in the affirmative). I have a general pair with the junior Senator from Minnesota [Mr. CLAPP], but under the terms of that pair I have a right to vote on this question.

Mr. WILLIAMS. I have a pair with the Senator from Pennsylvania [Mr. PENROSE], but under the conditions of a notice which I gave him some time ago I have a right to vote whenever it seems necessary to make a quorum. I therefore vote "yea."

The result was announced—yeas 36, nays 6, as follows:

YEAS—36.

Ashurst	Kern	Reed	Stone
Bryan	La Follette	Saulsbury	Swanson
Chilton	Lane	Shafroth	Thomas
Fletcher	Lee, Md.	Sheppard	Thompson
Gore	Martin, Va.	Shields	Thornton
Hitchcock	Martine, N. J.	Shively	Tillman
Hollis	Overman	Simmons	Walsh
James	Pittman	Smith, Ariz.	White
Johnson	Pomerene	Smith, Ga.	Williams

NAYS—6.

Bristow	Cummins	Perkins	Smoot
Clapp	Page		

NOT VOTING—54.

Bankhead	Dillingham	McCumber	Sherman
Borah	du Pont	McLean	Smith, Md.
Brady	Fall	Myers	Smith, Mich.
Brandegee	Gallinger	Nelson	Smith, S. C.
Burleigh	Goff	Newlands	Stephenson
Burton	Gronna	Norris	Sterling
Camden	Hardwick	O'Gorman	Sutherland
Catron	Hughes	Oliver	Townsend
Chamberlain	Jones	Owen	Vardaman
Clark, Wyo.	Kenyon	Penrose	Warren
Clarke, Ark.	Lea, Tenn.	Poindexter	Weeks
Colt	Lewis	Ransdell	Works
Crawford	Lippitt	Robinson	
Culberson	Lodge	Root	

The PRESIDING OFFICER. A quorum has not voted. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	James	Page	Stone
Bristow	Johnson	Pomerene	Swanson
Bryan	Jones	Reed	Thomas
Chamberlain	Kern	Saulsbury	Thompson
Chilton	La Follette	Sheppard	Thornton
Dillingham	Lane	Shields	Tillman
Fletcher	Lee, Md.	Simmons	White
Gore	Martin, Va.	Smith, Ariz.	Williams
Hitchcock	Martine, N. J.	Smith, Ga.	
Hollis	Overman	Smoot	

The PRESIDING OFFICER. Thirty-eight Senators have answered to the roll call. There is not a quorum present. The Secretary will call the names of absentees.

The Secretary called the names of absent Senators, and Mr. CLARK of Wyoming, Mr. PITTMAN, Mr. SHAFROTH, Mr. SHIVELY, and Mr. WALSH answered to their names when called.

Mr. SMITH of Georgia. I wish to state that the junior Senator from South Carolina [Mr. SMITH] is still detained at his home by sickness in his family.

Mr. OLIVER, Mr. LODGE, Mr. SUTHERLAND, Mr. STERLING, Mr. WARREN, Mr. ROOT, Mr. BRANDEGEE, Mr. LIPPITT, and Mr. CATRON entered the Chamber and answered to their names.

The PRESIDING OFFICER. Fifty-two Senators having answered to their names, a quorum is present. The question is upon the motion of the Senator from Indiana that not later than 9 o'clock this evening the Senate shall take a recess until 11 o'clock to-morrow morning, upon which the yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). Announcing my pair and its transfer as before, I vote "yea."

Mr. JAMES (when his name was called). Making the same transfer as on a former roll call, I vote "yea."

Mr. JOHNSON (when his name was called). Making the same transfer as before, I vote "yea."

Mr. TILLMAN (when his name was called). Making the same transfer as before, I vote "yea."

Mr. WILLIAMS (when his name was called). With the same explanation that I made on the previous roll call, I vote "yea."

The roll call was concluded.

Mr. SMITH of Georgia. I renew the statement I made with reference to the transfer of my pair from the Senator from Massachusetts [Mr. LODGE] to the Senator from South Carolina [Mr. SMITH], and I will let that statement remain in force until the Senator from South Carolina returns to the city.

The result was—yeas 34, nays 2, as follows:

YEAS—35.

Ashurst	Kern	Reed	Stone
Bryan	La Follette	Saulsbury	Swanson
Chamberlain	Lane	Shafroth	Thomas
Chilton	Lee, Md.	Sheppard	Thompson
Fletcher	Martin, Va.	Shields	Thornton
Gore	Martine, N. J.	Shively	Tillman
Hollis	Overman	Simmons	White
James	Pittman	Smith, Ariz.	Williams
Johnson	Pomerene	Smith, Ga.	

NAYS—2.

Bristow	Smoot

NOT VOTING—59.

Bankhead	Dillingham	McCumber	Root
Borah	du Pont	McLean	Sherman
Brady	Fall	Myers	Smith, Md.
Brandegee	Gallinger	Nelson	Smith, Mich.
Burleigh	Goff	Newlands	Smith, S. C.
Burton	Gronna	Norris	Stephenson
Camden	Hardwick	O'Gorman	Sterling
Catron	Hitchcock	Oliver	Sutherland
Clapp	Hughes	Owen	Townsend
Clark, Wyo.	Jones	Page	Vardaman
Clarke, Ark.	Kenyon	Penrose	Walsh
Colt	Lea, Tenn.	Perkins	Warren
Crawford	Lewis	Poindexter	Weeks
Culberson	Lippitt	Ransdell	Works
Cummins	Lodge	Robinson	

The PRESIDING OFFICER. No quorum has voted.

Mr. REED. Mr. President, I want to call attention to the fact——

Mr. SMOOT. There is nothing in order but to develop a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Johnson	Pittman	Smoot
Brandegee	Jones	Reed	Stone
Bristow	Kenyon	Robinson	Swanson
Bryan	Kern	Saulsbury	Thomas
Chamberlain	La Follette	Shafroth	Thornton
Chilton	Lane	Sheppard	Tillman
Clark, Wyo.	Lee, Md.	Shields	Walsh
Fletcher	Lodge	Shively	Williams
Gore	Martin, Va.	Simmons	
Hollis	Martine, N. J.	Smith, Ariz.	
James	Overman	Smith, Ga.	

The PRESIDING OFFICER. Forty-one Senator are present. The Secretary will call the roll of absentees.

The Secretary called the names of absent Senators, and Mr. PAGE, Mr. POMERENE, Mr. ROOT, Mr. STERLING, Mr. THOMPSON, and Mr. WHITE answered to their names when called.

Mr. OLIVER, Mr. DILLINGHAM, Mr. SUTHERLAND, Mr. CATRON, Mr. LIPPITT, and Mr. WARREN entered the Chamber and answered to their names.

The PRESIDING OFFICER. Fifty-three Senators having answered to their names, a quorum is present. The question is on the motion of the Senator from Indiana [Mr. KERN] that at not later than 9 o'clock the Senate shall take a recess until 11 o'clock to-morrow.

Mr. SMITH of Georgia. Before the roll call begins again——

Mr. LODGE. I rise to a point of order. Pending the call of the roll no other business is in order.

The PRESIDING OFFICER. The Chair will hear the Senator from Georgia.

Mr. SMITH of Georgia. No roll call has begun. We tried a roll call on the motion and failed to secure a quorum, and we have been forced to go to a call of the Senate to see whether a quorum is present. A new roll call may now begin, but it has not yet begun, and therefore it is not pending. The first name has not been called.

What I desire to suggest for the consideration of the Chair, pending this call, is that no rule of the Senate requires, when the roll call on a motion fails to disclose a quorum, that at once the roll of the Senate shall be called for a quorum. There is no rule of the Senate which requires anything of the kind, and it is within the discretion of the Senate to determine what action shall be taken when the vote upon the motion of the Senator from Indiana fails to disclose a quorum. I ask before any procedure is had on the call for a quorum after this vote is had that the Senate may have an opportunity to give direction on the subject.

Mr. LODGE. Mr. President, this rests on a higher ground than the rules. It rests on the Constitution. No business can be done without the constitutional quorum.

Mr. SMITH of Georgia. Except to force the presence of a quorum.

Mr. LODGE. Except a motion to adjourn or to produce a quorum.

Mr. SMITH of Georgia. I would suggest, then, that the action be taken to procure a quorum without another roll call.

Mr. LODGE. We have a quorum now. Fifty-three Senators have answered to their names.

Mr. SMITH of Georgia. I know. I am submitting the suggestion to the Presiding Officer for his consideration. I shall bring it up when the roll call has been completed.

The PRESIDING OFFICER. The Secretary will call the roll on agreeing to the motion of the Senator from Indiana [Mr. KERN].

The Secretary proceeded to call the roll.

Mr. BRYAN (when his name was called). I have a pair with the junior Senator from Michigan [Mr. TOWNSEND]. I transfer that pair to the junior Senator from Georgia [Mr. HARDWICK] and vote "yea." I will let this announcement stand for the day.

Mr. CHILTON (when his name was called). Making the same announcement as to the transfer of my pair as before, I vote "yea."

Mr. JAMES (when his name was called). Making the same transfer of my pair as on the former roll call, I vote "yea."

Mr. SAULSBURY (when his name was called). I have a pair with the junior Senator from Rhode Island [Mr. COLT], but with the condition that I have a right to vote to make a quorum. I desire this announcement to stand in the present condition. I vote "yea."

Mr. TILLMAN (when his name was called). Repeating the announcement that I made before, I vote "yea."

Mr. WILLIAMS (when his name was called). With the same explanation made upon the last roll call, which explanation I ask to stand for the balance of the day, I vote "yea."

The roll call was concluded.

Mr. JOHNSON. Making the same transfer as before, I vote "yea."

Mr. CHAMBERLAIN. I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. He was here when the roll was called a few moments ago and is in the cloakroom now. Under those circumstances, I feel that I am at liberty to vote. I vote "yea."

The result was announced—yeas 37, nays 3, as follows:

YEAS—37.

Ashurst	Kern	Saulsbury	Thomas
Bryan	Lane	Shafroth	Thompson
Chamberlain	Lee, Md.	Sheppard	Thornton
Chilton	Martin, Va.	Shields	Tillman
Fletcher	Martine, N. J.	Shively	Walsh
Gore	Overman	Simmons	White
Hollis	Pittman	Smith, Ariz.	Williams
James	Pomerene	Smith, Ga.	
Johnson	Reed	Stone	
Kenyon	Robinson	Swanson	

NAYS—3.

Clark, Wyo.	Lodge	Smoot

NOT VOTING—56.

Bankhead	Cummins	Lippitt	Ransdell
Borah	Dillingham	McCumber	Root
Brady	du Pont	McLean	Sherman
Brandegee	Fall	Myers	Smith, Md.
Bristow	Gallinger	Nelson	Smith, Mich.
Burleigh	Goff	Newlands	Smith, S. C.
Burton	Gronna	Norris	Stephenson
Camden	Hardwick	O'Gorman	Sterling
Catron	Hitchcock	Oliver	Sutherland
Clapp	Hughes	Owen	Townsend
Clarke, Ark.	Jones	Page	Vardaman
Colt	La Follette	Penrose	Warren
Crawford	Lea, Tenn.	Perkins	Weeks
Culberson	Lewis	Poindexter	Works

The PRESIDING OFFICER. The motion of the Senator from Indiana is carried.

Mr. LODGE. I make the point of no quorum on that vote. I rise to a question of order, Mr. President.

The PRESIDING OFFICER. The Senator from Massachusetts will state it.

Mr. LODGE. The Constitution says:

> Each House shall be the judge of the elections, returns, and qualifications of its own Members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent Members in such a manner and under such penalties as each House may provide.

It is perfectly clear, Mr. President, when the point of no quorum is made, where the roll call discloses the absence of a quorum, that no business can be done. Otherwise we are going contrary to the Constitution.

The PRESIDING OFFICER. The roll was called upon the motion and then a quorum was developed. March 20, 1912, a similar question was before the Senate and Vice President Sherman ruled on it. The Chair asks the Secretary to read from page 530 of Gilfy's Precedents.

The Secretary read as follows:

26. MEMBER HELD AS PRESENT TO MAKE A QUORUM, AS DISCLOSED BY THE ROLL CALL JUST HAD FOR THE PURPOSE OF ASCERTAINING THAT FACT.

[62d Cong., 2d sess.; J., p. 221, Mar. 20, 1912.]

An omnibus pension bill being under consideration,
On motion by Mr. SMITH of Georgia, to amend the bill by striking out, on page 1, lines 6 to 10, inclusive, as follows:
The name of Thomas Jefferson, late of Company C, One hundred and twenty third Regiment United States Colored Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.
After debate,
On motion by Mr. MCCUMBER, to lay the amendment on the table,
Mr. SMITH of Georgia demanded a division of the Senate.
On the question to agree to the motion to lay the amendment proposed by Mr. SMITH of Georgia on the table,
The yeas were 21 and the nays were 5.
The number of Senators voting not constituting a quorum.
The Vice President [Mr. Sherman] directed the roll to be called;
When,
Forty-nine Senators answered to their names.
A quorum being present.
The question being again taken on the motion by Mr. MCCUMBER, to lay the amendment proposed by Mr. SMITH of Georgia on the table,
On a division of the Senate,
The yeas were 31 and the nays were 8.
So the amendment was laid on the table.
Mr. SMITH of Georgia raised a question of order, viz, that the Senators voting did not constitute a quorum, and therefore the laying of the amendment proposed by him on the table was not in order.
The Vice President [Mr. Sherman] overruled the point of order, and held that, while a quorum had not voted, a quorum was present, as disclosed by the roll call just had for the purpose of ascertaining that fact. (See CONGRESSIONAL RECORD, 62d Cong., 2d sess., pp. 3674–3678.)

Mr. JAMES. That settles it.

The PRESIDING OFFICER. What is the further pleasure of the Senate?

Mr. SMOOT. Mr. President——

Mr. WILLIAMS and others. Regular order!

Mr. SMOOT. I rise to a point of order.

The PRESIDING OFFICER. The Chair will hear the Senator from Utah.

Mr. SMOOT. I remember well the occasion referred to.

Mr. WILLIAMS. Regular order!

The PRESIDING OFFICER. The regular order is demanded.

Mr. SMOOT. Then I suggest the absence of a quorum.

Mr. JAMES. That is not in order.

Mr. STONE. I make the point that we have just had a roll call and that nothing has been done.

The PRESIDING OFFICER. The Secretary will call the roll.

Mr. JAMES. Just a moment before the roll call is ordered. Does the Senator from Utah make the point of order with the knowledge that there are about 14 Republicans in the cloakroom, who come out here on propitious occasions and then retire upon other occasions not so propitious?

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Kenyon	Robinson	Stone
Bryan	Kern	Saulsbury	Swanson
Chamberlain	Lane	Shafroth	Thomas
Chilton	Lee, Md.	Sheppard	Thompson
Fletcher	Martin, Va.	Shields	Thornton
Gore	Martine, N. J.	Shively	Tillman
Hollis	Overman	Simmons	Walsh
Hughes	Pittman	Smith, Ariz.	White
James	Pomerene	Smith, Ga.	Williams
Johnson	Reed	Smoot	

Mr. KENYON. I desire to announce the unavoidable absence of the Senator from Wisconsin [Mr. LA FOLLETTE].

The PRESIDING OFFICER. Thirty-nine Senators are present—not a quorum. The Secretary will call the names of absentees.

The Secretary called the names of absent Senators, and Mr. CLARK of Wyoming and Mr. PAGE responded to their names when called.

Mr. OLIVER, Mr. ROOT, Mr. JONES, Mr. DILLINGHAM, Mr. SUTHERLAND, Mr. LODGE, Mr. BRANDEGEE, and Mr. LIPPITT entered the Chamber and answered to their names.

The PRESIDING OFFICER. Forty-nine Senators having responded to their names, a quorum is present. The question is upon the pending amendment to the shipping bill.

Mr. SMOOT. Mr. President, I move that the Senate adjourn; and upon that I ask for the yeas and nays.

The PRESIDING OFFICER. The question is on the motion of the Senator from Utah that the Senate adjourn.

Mr. JAMES. Mr. President——

Mr. FLETCHER. What is the motion?

The PRESIDING OFFICER. The Senator from Utah has moved that the Senate adjourn.

Mr. JAMES. I make the point of order that that motion is not in order. The Senate has already determined that at the hour of 9 o'clock they will take a recess, and therefore a motion to adjourn is not in order.

Mr. CLARK of Wyoming. Mr. President——

Mr. JAMES. Senators will allow me to state my point of order. The point of order is that the Senate has already determined to take a recess, and therefore a motion to adjourn is not in order.

Mr. SMOOT. The motion was to take a recess "at not later than 9 o'clock."

Mr. JAMES. The motion to adjourn would not be in order until the motion to recess has been reconsidered.

The PRESIDING OFFICER. The Chair will ask the form of the motion of the Senator from Indiana [Mr. KERN]?

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. The Chair desires to know the exact terms of the motion of the Senator from Indiana; whether the motion was that not later than 9 or at 9 o'clock the Senate take a recess.

Mr. JAMES. The point of order I make——

The PRESIDING OFFICER. The Chair understands the point of order made by the Senator from Kentucky.

Mr. JAMES. Is that the motion of the Senator from Utah is to adjourn, and as the Senate has already adopted the motion of the Senator from Indiana to take a recess——

The PRESIDING OFFICER. That is the point on which the Chair desires enlightenment. The Chair desires to know exactly what the motion of the Senator from Indiana was.

Mr. JAMES. The motion of the Senator from Indiana was that at not later than 9 o'clock the Senate should take a recess until 11 o'clock to-morrow. Therefore, a motion to adjourn, which would bring in the morning hour, in which two or three hours could be filibustered away, is not in order. The very purpose of the motion of the Senator from Indiana was to prevent such a filibuster as has been going on; and the attempt now is to further such a filibuster.

Mr. SMITH of Arizona. No business has been transacted since.

Mr. SMOOT. Mr. President, Rule XXII states that—

When a question is pending, no motion shall be received but to adjourn.

Under the rules of this body a motion to adjourn is in order at any time.

Mr. REED. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Senator from Missouri will state his point of order.

Mr. REED. The point of order I make is that this question is not debatable, unless the Chair expressly states that he desires light on it.

The PRESIDING OFFICER. The Chair does not know its terms, and he would like to have the exact terms of the motion of the Senator from Indiana stated.

Mr. KERN. Let the motion be read by the Reporter.

Mr. WILLIAMS. Let the record be read.

Mr. HUGHES. There is no question about that.

Mr. JAMES. The point of the Senator from Utah [Mr. SMOOT] would be well taken—that is, that a motion to adjourn would be in order at any time—if the Senate had not previously determined that it would take a recess, but the Senate having determined that it would take a recess at not later than a certain hour, a motion to adjourn is not in order. The only possible motion that the Senator from Utah could properly make would be a motion to reconsider the former action taken by the Senate.

The PRESIDING OFFICER. The Chair will have to understand the form of the motion of the Senator from Indiana; and he calls on the Reporter to read the motion. The Chair can not rule on the point of order until he knows the form in which the motion of the Senator from Indiana was put.

Mr. BRYAN. Mr. President, the rules of the Senate are more important than the question whether we shall take a recess at 9 o'clock or adjourn. My opinion is that the Chair is mistaken in the view——

The PRESIDING OFFICER. The Chair is satisfied about the form of the motion made by the Senator from Indiana. The motion as made by the Senator from Indiana reads:

I move that at not later than 9 o'clock—

That does not mean that the Senate can not adjourn sooner than 9 o'clock.

Mr. KERN. But the motion was to take a recess to a time certain. The Senate has determined that when the recess is taken it will be to a time certain to-morrow.

The PRESIDING OFFICER. The Senator from Indiana moved that at not later than——

Mr. KERN. The motion of the Senator from Utah is a motion to adjourn generally.

The PRESIDING OFFICER. That at not later than 9 o'clock this evening the Senate take a recess——

Mr. KERN. Until 11 o'clock to-morrow. The pending motion is a motion to adjourn, and it carries the Senate over until 12 o'clock to-morrow, which is a reconsideration of the vote on agreeing to the motion to take a recess.

The PRESIDING OFFICER. The Senate has already acted and declared that it will meet at 11 o'clock to-morrow and that a recess will be taken at not later than 9 o'clock to-night.

Mr. KERN. But, Mr. President, the motion to adjourn, which is now pending, carries us over until 12 o'clock to-morrow. The original motion was for a recess.

Mr. BRYAN. Mr. President, the point at which the Chair, in my opinion, erred was in holding that on a yea-and-nay vote less than a quorum could vote to take a recess, unless there were enough Senators in the Chamber not voting but paired to make a quorum. The precedent cited by the Chair, in my judgment, did not sustain the position——

Mr. JAMES. I make the point of order that that question has been settled and is therefore not before the Senate.

Mr. BRYAN. I think it is in the discretion of the Chair to hear a discussion of the matter.

The PRESIDING OFFICER. The Senator from Florida has the right to make a statement, and the Chair will recognize the Senator.

Mr. BRYAN. The precedent cited, Mr. President, was this: The absence of a quorum was suggested and the roll was called and a quorum developed. Then a motion was made by the Senator from Georgia and a division was called for—not the yeas and nays. That is, as I understand, what occurred. A certain number stood up on one side and a certain number on the other side, and then Vice President Sherman ruled that upon a division the motion was carried. It was not carried as the result of a yea-and-nay vote.

It seems to me, Mr. President, that paragraph 3 of Rule V justifies the Chair in going this far, that when the absence of a quorum is suggested the roll is thereupon called and the presence of a quorum is ascertained and the question pending, as in this instance, being a motion to take a recess and a yea-and-nay vote is had upon that motion, as a result of which it develops that a quorum has not voted, I believe then the Chair has the right, on motion, to request the attendance of absent Senators, and upon their failure to attend upon request to compel their attendance, but when they come into the Chamber it is not necessary for them to answer "present" in order to ascertain again if a quorum is present, but as they come in they should be required to vote upon the pending question. Now let us see. Paragraph 3 of Rule V reads as follows:

Whenever upon such roll call—

That is, when the absence of a quorum is suggested—

it shall be ascertained that a quorum is not present, a majority of the Senators present may direct the Sergeant at Arms to request, and, when necessary, to compel the attendance of absent Senators, which order shall be determined without debate; and pending its execution, and until a quorum shall be present, no debate nor motion except to adjourn shall be in order.

Mr. SMOOT. Will the Senator yield for a moment there?

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Utah?

Mr. BRYAN. Certainly.

Mr. SMOOT. I want to call the Senator's attention to the fact that that refers to the situation when there is the suggestion of an absence of a quorum and not when the absence of a quorum develops as the result of a vote. If the Senator will read paragraph 2 that will be made clear.

Mr. BRYAN. I understand exactly. When any Senator suggests the absence of a quorum, then the roll must be called to ascertain whether a quorum is present or not.

Mr. SMOOT. That relates to the suggestion of the absence of a quorum and not to the situation when the lack of a quorum is developed on a roll call.

Mr. BRYAN. Then, when a quorum is not developed upon that roll call, it is the right of the Senate to request the attendance of absent Senators, or, if, in its judgment, it is necessary, to compel the attendance; but the rule does not say that when Senators attend they shall answer "here," instead of answering "yea" or "nay." There is nothing in the rule to require that procedure to take place.

It is certain, Mr. President, that the Senate has always been very careful to withhold from the Vice President or the Presiding Officer the right or the privilege of suggesting the absence of a quorum; and yet, if it be true that upon the failure of a quorum to vote on any pending question, the Vice President or the Chair has the right to direct, or can direct, the roll to be called to ascertain the presence of a quorum, in effect that is suggesting the absence of a quorum. There is nothing in the rules requiring him or permitting him to do that, and the Senate never intended that the Chair should have that power or right.

Mr. President, the rules of the Senate are not as full and complete as are the rules of the House; but in order that it may be known exactly what the situation is I will read the rule of the House, or that portion of it which is material:

4. Whenever a quorum fails to vote on any question, and a quorum is not present and objection is made for that cause, unless the House shall adjourn there shall be a call of the House——

The PRESIDING OFFICER. This discussion is going on out of order; but the Chair appreciates that the Senator desires his views to be made a part of the RECORD.

Mr. BRYAN. The rule continues:

and the Sergeant at Arms shall forthwith proceed to bring in absent Members, and the yeas and nays on the pending question shall at the same time be considered as ordered. The Clerk shall call the roll, and each Member as he answers to his name may vote on the pending question, and after the roll call is completed each Member arrested shall be brought by the Sergeant at Arms before the House.

Our rule on the subject is not as explicit as that; but there is nothing in the rule to require the Chair or to permit the Chair to suggest the absence of a quorum. So it seems to me it is permissible for the Chair to direct absent Senators as they come into the Chamber to vote upon the question then pending.

Mr. President, for one, I am not willing to concede that when the yeas and nays have been ordered on a motion to take a recess or on a motion to adjourn less than a quorum, counting those paired and present, can take that action.

I think the Chair is perfectly justified, when the presence of a quorum is developed, in holding that on the next motion to take a recess absent Senators as they come in shall be required to vote upon that motion. That will very quickly end the difficulty.

Mr. SMOOT. Mr. President, the Senator from Florida has said what I wanted to add when I was taken off the floor in relation to the precedent that was cited by the Senator from Georgia, because the Senator from Florida has stated the case exactly as it was. It was not on the call of the yeas and nays, but it was on a division. I do not want to take any more time on that, but I do want to call the attention of the Chair to Rule V, which has been referred to. I want Senators to follow me in reading Rule V, paragraph 2 and paragraph 3, and they will see that it applies only where the absence of a quorum is suggested. Paragraph 2 reads:

If, at any time during the daily sessions of the Senate, a question shall be raised by any Senator as to the presence of a quorum, the presiding officer shall forthwith direct the Secretary to call the roll and shall announce the result, and these proceedings shall be without debate.

Paragraph 3 reads:

Whenever upon such roll call—

Such roll call; it is not a motion.

Mr. BRYAN. No.

Mr. SMOOT. It is the suggestion of the absence of a quorum.

Mr. BRYAN. Certainly.

Mr. SMOOT (reading)—

Whenever upon such roll call it shall be ascertained that a quorum is not present, a majority of the Senators present may direct the Sergeant at Arms to request, and, when necessary, to compel, the attendance of the absent Senators, which order shall be determined without debate; and pending its execution, and until a quorum shall be present, no debate nor motion, except to adjourn, shall be in order.

Mr. BRYAN. Mr. President——

The PRESIDING OFFICER. The question now before the Senate is that raised by the Senator from Kentucky as to whether a motion to adjourn is in order. The Chair would like to hear the Senator upon that question. The Chair has already decided the other question and does not propose to change his decision. The Chair would like to hear the Senator on the pending question.

Mr. BRYAN. Mr. President, my object in rising was to say that I will not agree to the proposition that upon a yea-and-nay vote, with less than a quorum present, the Senate can take any action except to adjourn.

The PRESIDING OFFICER. The Chair thinks the principle is the same, and has ruled.

Mr. SWANSON. Mr. President, I do not see why there should be any criticism of the decision of the Chair. The yeas and

nays are ordered, not to ascertain the presence of a quorum but to find out whether a man votes affirmatively or negatively. It is simply an evidence of the presence of a quorum. There is no difference between a yea-and-nay vote as evidence and a division, which is made to ascertain the affirmative or negative of a proposition. Vice President Sherman declared that a quorum having been ascertained previously, and being present, they had a right to declare the question carried when a majority voted. It is simply evidence, and not a bit more evidence on a yea-and-nay vote than it is on a division. There are certain things of which the Chair must take cognizance. It seems to me upon this point that we have decided to take a recess, which is different from a motion to adjourn; and if it is contrary to it, the only way to remove it is by a motion to reconsider. I do not see how we can have two contrary motions. We have decided to take a recess, not later than 9 o'clock, until 11 o'clock to-morrow morning, and a motion now to adjourn would be contrary to that.

The PRESIDING OFFICER. That is the question before the Senate—whether or not a motion to adjourn is in order under these circumstances.

Mr. LODGE. On the point of order now pending, if the Chair will permit me——

The PRESIDING OFFICER. The Chair will be glad to hear from the Senator from Massachusetts.

Mr. LODGE. Never before, Mr. President, have I heard it suggested that a motion to adjourn was out of order if business had intervened since the previous vote. The Constitution excepts the motion to adjourn from all other business. I turn hastily to one or two of the general authorities here in regard to the matter. I will first point out that our own rules give it precedence over every other motion when business has intervened.

Mr. Reed was a great master of parliamentary law and was not a friend of delay. In his manual he says:

> Motion to adjourn—Highly privileged.—The motion to adjourn is a motion which enables the assembly to rest from its labors, and is highly privileged. It is frequently said that a motion to adjourn is always in order, but there are too many exceptions for the rule to be so succinctly laid down. A motion to adjourn can not take a Member from the floor, can not interrupt the verification of a vote, and can not be entertained while an assembly is dividing. It can not be repeated until some business has intervened, and in the United States House of Representatives it yields to the presentation of a conference report.

Those are the only exceptions stated.

Mr. SWANSON. Mr. President, will the Senator permit an interruption at that point?

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Virginia?

Mr. LODGE. I do.

Mr. SWANSON. That is true; it is always in order except where the legislative will has expressed itself otherwise, and the only way you can change the legislative will when it has once expressed itself is to move to reconsider. We say this motion is contrary to the motion to take a recess; and where the legislative will has expressed itself definitely the right way to change that will is to move to reconsider. That principle of parliamentary law—that where the legislative will has once expressed itself it must remain in force until it is reconsidered—changes the general parliamentary law that a motion to adjourn is always in order, provided the legislative will has not been otherwise expressed.

Mr. LODGE. This is the first time I ever heard stated the exception referred to by the Senator from Virginia, and it is not found in any of the books, if they are of any value.

I will now read from Cushing:

> As it always must necessarily be within the power of the House to bring its sittings to a close for the day—for otherwise it would seem that it might be kept sitting against its will and for an indefinite time—a motion to adjourn may be made at any time, with one exception, namely, when the question of adjournment has just previously been put and decided in the negative. If this motion, therefore, is made and seconded whilst any other question is pending, it takes precedence of such question, and if decided in the affirmative that question is, of course, interrupted and superseded without being decided either in the affirmative or negative.
>
> No expression of the legislative will can deprive a legislative body of the power of adjournment; otherwise it could be kept in eternal session.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. But the Senate has made an order that not later than 9 o'clock this evening the Senate shall take a recess until 11 o'clock to-morrow morning.

Mr. LODGE. Mr. President, my point is that no action of the Senate can supersede the motion to adjourn.

Mr. KERN. Mr. President, if the Senator will allow me——

Mr. LODGE. It is a question of the highest privilege. It is the first motion. It takes precedence of every other motion. It is vital to the life of the assembly. It can not be set aside by any arrangement whatever. We have just set aside an arrangement of the Senate which is a standing rule—to adjourn until 12 o'clock. We have just set it aside by a motion to recess to a day certain. It takes precedence of that motion.

Mr. KERN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Indiana?

Mr. LODGE. I do.

Mr. KERN. Does the Senator from Massachusetts hold that when an order of the Senate has been made and entered, by a deliberate vote of the Senate, that it will recess until to-morrow at 11 o'clock, that order may be vacated and rendered nugatory by a motion to adjourn?

Mr. LODGE. Why, unquestionably, by a majority vote to adjourn. If the Senate, as frequently happens, agrees that it will adjourn at 6 o'clock or 7 o'clock or at whatever hour you please, that does not cut off a motion to adjourn before that time; and a motion to adjourn takes precedence of a motion to take a recess.

Mr. KERN. The Senator's position is, then, as I understand, that after an order of the Senate has been deliberately made by a vote of the Senate it may be vacated without a motion to reconsider?

Mr. LODGE. Why, certainly, Mr. President; it may be vacated by a motion which takes precedence of it.

Mr. SWANSON. If the Senator will permit me, the precedence exists only before the vote is taken. If you do not make your motion to adjourn before a vote is taken on the motion to take a recess, it does not take precedence after the legislative will has expressed itself. You are entitled to have a vote on adjourning first. If you wanted to adjourn instead of voting to take a recess, you should have made the motion; then the issue would have been made. You failed to do that, however, and waived your precedence, and the legislative will has expressed itself for a recess.

The rule is that during the legislative session you can not possibly have one law passed contrary to another, because after the legislative will on the subject has expressed itself the only way it can be gotten rid of is under the rule which allows a motion to reconsider to be made in a limited time, which I think is three days. There never will be a termination of questions that have been voted on if the decision can be gotten rid of without a motion to reconsider. If the Senator will read further in that book on reconsideration and the settlement of matters, he will find that it has been decided by all writers on parliamentary law that the only way to change the legislative will when once expressed is to avail yourself of the motion to reconsider.

Mr. LODGE. It does not touch the motion to adjourn.

Mr. SWANSON. The motion to adjourn was entitled to precedence. The Senator failed to make it, and the legislative will expressed itself in favor of a recess.

Mr. CLARK of Wyoming. Mr. President, will the Senator from Massachusetts yield to me?

Mr. LODGE. I yield.

Mr. CLARK of Wyoming. I should like to ask the Senator from Virginia a question. He uses the expression "the legislative will." What legislative will does he mean, the will of a single house of a legislative assembly or the will of both bodies?

Mr. SWANSON. Possibly "legislative will" would mean the decision of both bodies, and therefore it might be an inapt term; but I mean that the will of the Senate, as expressed, is that not later than 9 o'clock to-night we shall take a recess until 11 o'clock to-morrow. The only way you can get rid of that legislative will is to move to reconsider under the rules.

Mr. LODGE. Mr. President, I do not think anything can shut off a motion to adjourn except the exception stated in all the authorities.

Mr. KERN. If the Senator will allow me one word further, the motion I made sometime ago that the Senate take a recess at an hour certain, is a motion that has been very frequently made. The records of Congress are full of precedents for that motion. I undertake to say that in no instance has that motion ever been vacated by a motion to adjourn. We make the motion here almost every day. It has been made every month; it has been made every year—a motion that at a certain time the Senate will take a recess; and that is final. It has not been undertaken, heretofore, to vacate that order by a motion to adjourn. The motion is made and carried. The Members of the Senate have a right to rely upon it. They do rely upon it. They have always relied upon it. They go their ways. They understand, when they leave the Chamber, as to the time of the meeting next day. The Senator's proposition, on the other hand, is that when the order is solemnly entered upon the rec-

ords of the Senate any Senator at any time may vacate it and get rid of it by moving to adjourn. I submit that the mere statement of the proposition shows its absurdity.

Mr. SWANSON. Mr. President, I should like to ask the Senator a question. The same rule the Senator has cited says that you may offer an amendment. There is one amendment that can always be offered——

Mr. LODGE. An amendment to what?

Mr. SWANSON. An amendment to a bill. Motions to amend, to recess, or to adjourn are always in order; but you can not offer an amendment that is contrary to a motion that has been previously adopted by the Senate, because it is out of order.

Mr. LODGE. This is not an amendment at all; it is a question of a privileged motion.

Mr. SWANSON. The Senator has the right, this being a privileged motion, to make it at any time, even though there is another question pending, provided it is not contrary to a motion that the Senate had previously adopted, and the right to amend ceases when the amendment is contrary to what has been previously adopted. A motion to adjourn, therefore, is not in order when it is contrary to something that has been previously adopted.

Mr. LODGE. Mr. President, if the motion to take a recess has such power as that, of course it takes precedence of all motions. The motion to take a recess, however, is not only inferior in point of precedence to the motion to adjourn, but the motion to take a recess to a time certain is an amendable motion. This particular motion simply was that the Senate should take a recess not later than 9 o'clock and that when it took the recess it should be until 11 o'clock to-morrow. It did not say that it should not take a recess earlier than that. My point is simply that no vote as to time can deprive the motion to adjourn of its privilege. It is the only motion privileged by the Constitution. It has the highest privilege that any motion can possibly have. It is absolutely vital to the existence of the body, and no man would suppose for a moment that any arrangement about a recess would prevent the body from adjourning.

The PRESIDING OFFICER. It is not an arrangement; it is an act of the Senate itself.

Mr. LODGE. No act of the Senate can cut off the motion to adjourn. I am not aware of anything that can cut it off except those things stated by every authority. Every authority treats the motion in the same way—that it is in order at any time, no matter what has happened, except when the house is dividing, or during the verification of a vote, or, of course, when no business has intervened. In this case business has intervened. We have adopted this motion, and therefore none of the circumstances have arisen which would interfere with it. We are not calling the roll; we are not verifying a vote; and I can only say that to me it seems the most extraordinary idea that a motion to adjourn can be held to be out or order.

Mr. BRANDEGEE. Mr. President, will the Chair permit just one remark?

The PRESIDING OFFICER. The Chair will be glad to hear from the Senator from Connecticut.

Mr. BRANDEGEE. I can see no force whatever in the claim that because the Senate has voted, as the Senate did vote, that not later than 9 o'clock it would take a recess, therefore it has estopped itself from changing its mind on the subject. There is nothing sacred about the majority vote of the Senate, which at that time thought it was in the mood to take a recess, and so voted. To say now that a motion to adjourn can not be made because it is something different from what the Senate thought an hour ago seems to me to present no point of order at all. The Senate changes its mind from hour to hour.

Mr. SMITH of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from Connecticut yield to the Senator from Georgia?

Mr. BRANDEGEE. Certainly.

Mr. SMITH of Georgia. If the Senate changes its mind upon a question, should it not express that fact by a formal reconsideration of the first expression?

Mr. BRANDEGEE. There is no doubt if the Senate wanted to reconsider the motion it would be in order, but if it does not care to reconsider but cares to express its change of purpose by carrying a motion which renders null and void the previous motion it has a perfect right to do it, and it can not be ruled out on a point of order, that it is not in order for the Senate to adjourn instead of taking a recess.

Mr. JAMES. Perhaps the Senator has not a right to move to reconsider.

Mr. BRANDEGEE. Of course he would have to vote with the majority to make the motion.

Mr. JAMES. He could not have voted with the majority and therefore could not make the motion.

Mr. BRANDEGEE. I am not saying whether he could or not. The Senator from Georgia asked me if it was not necessary to move to reconsider if the Senate wanted to do anything different. In my opinion, I answer him frankly, it is not, because if the Senate votes to adjourn it does something different, and it accomplishes its purpose.

Mr. JAMES. It would be perfectly in order to reconsider, but that is not the course that was adopted.

Mr. SMITH of Georgia. I wish to ask the Senator a question.

The PRESIDING OFFICER. Does the Senator from Connecticut yield to the Senator from Georgia?

Mr. BRANDEGEE. Certainly I yield.

Mr. SMITH of Georgia. I am entirely indifferent about this matter, but it is the effect of what the Senate has done that to-day we will not adjourn, but we will take a recess. We stop our session in two ways, either by a recess or by an adjournment. Is not the resolution that we passed a formal declaration by the Senate that the session to-day shall not close by an adjournment but by a recess?

Mr. BRANDEGEE. Formally, but it is not final and is not sacred.

Mr. SMITH of Georgia. No; it is not final.

Mr. BRANDEGEE. If the Senate later wants to adopt a course which is inconsistent with taking a recess, it has a perfect right to do it if the majority so determines.

Mr. SMITH of Georgia. But is not the only way to keep the record of the procedure properly, when you change your mind, that you express the change by a reconsideration?

Mr. BRANDEGEE. That would be a perfectly orderly method, and so with a motion to adjourn. There is no question in my mind——

Mr. JAMES. In one instance the Senator from Utah——

Mr. BRANDEGEE. I do not yield just at the present in the midst of a sentence. I will yield to the Senator in a second.

Mr. JAMES. That is all right.

Mr. BRANDEGEE. This is merely a reconsideration of the intention an hour or two ago. They thought then it was desirable that we should take a recess to-night instead of an adjournment, and so voted. To say now that it is not in order to propose anything that is inconsistent with that action, if they have changed their minds and want to do something else, I would not use the word "puerile," because that is not a proper word to characterize the conduct or opinion of Senators, but it is a most startling novelty. I can not conceive that a point of order will lie against a motion to adjourn whenever the Senate wants to adjourn.

Mr. ROOT. Mr. President, I speak with great diffidence on any question relating to the rules, because I am a young Senator, and I do not know very much about them, but it appears to me to be both the meaning of the rules and the precedents on the subject, and the common sense, that all dispositions made by the Senate as to what it will do at any particular time are always subject to a motion to adjourn—that it is always in order, and that it is not competent to debar the Senate from the right to adjourn by any order that can be made as to the future. It is a matter of common occurrence that a special order is made for a particular time, and no one will doubt that although the order has been made that the Senate at a particular time will proceed to consider a particular order of business, it is always subject to the Senate's right to an adjournment. The Senate can always do away with the effect of its order that at a particular time it will do a particular thing by adjourning before that time comes, and any resolution adopted that not later than a particular time a recess will be taken must be deemed to be subject to the always existing right of the body to adjourn.

Is it possible, sir, that a body can be tied up for the future by its own resolution? Suppose the Senate were to adopt a resolution that it would never adjourn—that clearly would not be competent. The right of adjournment is one that is always preserved by necessary implication in whatever disposition is made regarding future action.

Mr. STONE. Mr. President, may I say just a few words?

The PRESIDING OFFICER. The Senator from Missouri will be heard.

Mr. STONE. With all due respect to some of my colleagues on this side, I express the opinion that a motion to adjourn is in order.

The PRESIDING OFFICER. The Chair has no doubt about it, and has so ruled. The Chair decided at the outset that the motion is in order.

Mr. STONE. I did not desire the Chair to decide it. I desired to make some observations. I think a motion to recon-

sider when made by a Senator entitled to make it is in order. I think a motion to take a recess now in accordance with the order of the Senate at any time before 9 o'clock is in order.

The PRESIDING OFFICER. On that line the Chair will suggest to the Senator from Missouri that there is a precedent, of date the 16th of August, 1912, where unanimous consent was given to take up a certain bill for that particular day, and when a motion was made to adjourn, although there was a unanimous-consent agreement, it was held by the Chair that a motion to adjourn is always in order.

Mr. STONE. Mr. President, I do not quite see the pertinency of the suggestion of the Chair on the point as to whether this motion is in order.

Now, I want to say as preliminary to a final observation that the scheme or plan being followed by our friends on the other side is perfectly apparent. We take a yea-and-nay vote on any question and they disappear in the cloakroom, leaving one or two on guard. A point of no quorum is raised, and upon that roll call they march out and answer "Present." That can be repeated, and it has been repeated several times to-night.

Now, what is the significance of it? It means that if they answer to the roll call—that is their idea and they are acting upon it—and a quorum is disclosed, no motion can be made to compel the attendance of absent Senators, and thereupon you proceed again until a motion is made to adjourn or to take some other action, and, when a yea-and-nay vote is called for, then they disappear, and when there is a new roll call to find a quorum they come in.

Now, what I want to do is to have no quorum on a roll call. I desire to have an order made by the Senate to arrest absent Members and bring them here to the bar of the Senate. The only way I see to thwart the highly entertaining and reputable practice pursued by our friends on the other side is for Democrats to refrain from voting when the roll is called, and then let the motion be made to bring in absent Senators. A game that two can play at is the one these gentlemen are attempting. What we want is an order for absent Senators and a writ issued by the Chair to bring them here.

Mr. FLETCHER. Mr. President, let me make a parliamentary inquiry. If the motion which is now pending is carried, will it mean that the Senate enters now upon the recess which it had previously determined to enter upon sometime before 9 o'clock, that the recess goes into effect and the Senate will meet to-morrow at 11 o'clock in pursuance of its previous action?

The PRESIDING OFFICER. The Senate made an order to take a recess. A motion to adjourn is always in order. A motion in this case would be in the nature of a reconsideration of the former action, because the Senate has a right to adjourn under the rules, and by adopting the motion would modify the order for a recess. If it does not and the motion to adjourn is voted down, then the order of the Senate to take a recess until 11 o'clock to-morrow will be operative.

Mr. FLETCHER. I wish to ascertain what the Chair would rule in that case.

Mr. JAMES. Mr. President——

Mr. FLETCHER. If the Senator will allow me to finish——

Mr. JAMES. Certainly.

Mr. FLETCHER. The point the Senator from Kentucky makes goes to the question of the Senate putting itself in a conflicting position in this, that if it has decided, as it did, that some time before 9 o'clock to-night, or by 9 o'clock, it will take a recess until 11 o'clock to-morrow, then if a motion is made to adjourn and it is carried the question would be whether that meant that at the time of the adjournment the recess before determined upon would be entered upon and would take effect as had been previously decided by the Senate. If the motion to adjourn is in order, it seems to me it can only be in order in that respect, to carry out the previous decision and action of the Senate. Otherwise there is a hopeless conflict, and the only motion in order after the Senate has adopted the first motion, that on or before 9 o'clock it will take a recess until 11 o'clock to-morrow, would be to take a recess now. That motion would be in order, and to make a motion to adjourn after having taken the first step is precisely like, after having passed a bill, to have some one get up and move that it be recommitted. If the motion is in order at all it can only be in order, I submit to the Chair, in so far as it carries out and is consistent with the previous action of the Senate, and it would only mean that instead of waiting until 9 o'clock to enter upon the recess the Senate decides to do so at this time. If it means that, then I say it is in order and is precisely the same motion, in effect, as would be a motion to take a recess now.

Mr. JAMES. Mr. President, the Senator from Florida [Mr. FLETCHER] loses sight of the fact——

Mr. OLIVER. Mr. President, I rise to a point of order.

Mr. JAMES. I have taken the floor to argue upon a point of order.

The PRESIDING OFFICER. The Senator from Kentucky has the floor on the question of order.

Mr. JAMES. I do not yield to the Senator from Pennsylvania. I have the floor for the purpose of discussing the point of order.

The PRESIDING OFFICER. The Senator from Kentucky has the floor and will proceed.

Mr. OLIVER. Mr. President, I rise——

The PRESIDING OFFICER. The Senator from Kentucky has the floor to argue the point of order.

Mr. JAMES. I shall take but a moment, Mr. President. The statement of the Senator from Florida that the motion of the Senator from Utah [Mr. SMOOT] would have the effect to take a recess I do not agree with at all, because the Senator from Utah is quite explicit in moving not to take a recess, which he could do and which, under the former action of the Senate, the Senate could take at this time or any moment up to 9 o'clock, but he very deliberately moves to adjourn. Of course his purpose is to have the Senate meet at 12 o'clock and give an opportunity for further filibustering. Then the order of the Senate to take a recess at a certain hour to a certain hour amounts to nothing. If the point of order I have made is overruled and a motion to adjourn, which is to do the very thing the Senate had theretofore determined that it would not do, is in order, then there is not the slightest use for a Senator to make a motion to take a recess until the Senate is ready to recess.

The Senator from Utah could not make a motion to reconsider the order for a recess. He knew that very well. He could not move to reconsider, because he did not vote with the prevailing side. Therefore he does by indirection, according to the ruling the Chair has intimated, that which he could not do directly. He has moved to adjourn, and of course if it is to be held that when the Senate deliberately takes action fixing a time at which it will do one thing, without ever moving to reconsider that action it can do another thing, you will find that you will have confusion worse confounded.

Mr. OLIVER. Mr. President, I simply wish to ask the Chair a question. I understood that the Chair a short time ago ruled upon the motion of the Senator from Utah.

The PRESIDING OFFICER. In answer to the question of the Senator from Pennsylvania the Chair will state he has no doubt the Senate can adjourn, and if it adjourns it will adjourn until 12 o'clock to-morrow.

Mr. SMOOT. Mr. President, I have not said anything yet upon the point of order raised by the Senator from Kentucky [Mr. JAMES], and I would not have done so but for the statement he has just made. It has been held in the Senate ever since I have been a Member of this body that the Senate can not only adjourn when the motion is carried by a majority, but where there has been a unanimous-consent agreement it can be set aside by a motion to adjourn.
